COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The great War Loan, the prospectus of which is reproduced elsewhere, is the most gigantic financial proposition ever placed before the public. It is for an undetermined sum in hundreds of millions, required for the purpose of overcoming the Empire's enemies; it is issued at par, bearing interest at 4½ per cent.; it is conversionary, inasmuch as it enables holders of the 3½ per cent. War Loan, of Consols and Government Annuities to convert their holdings into stock of the new Loan; and, finally, it offers both the lower (I mean less prosperous) and upper classes similar opportunities for placing their savings at the Government's disposal. From five shillings to thousands of pounds—surely a more comprehensive range could not have been chosen! In a word, the loan is gigantic and, judging by all published accounts, its reception was hearty, spontaneous, unique, and the results achieved will, I am sure, be gigantic also. For there is not a single family throughout our vast Empire that will not contribute in one form or another to the 4½ per cent. War Loan of 1925-1945.

***

I regret to read of the death of Mr. Hajji-Pavlou, a prominent member of the best class of Cyprian merchants and a well-known figure in the island. The death of Mr. Demosthenes Hajji-Pavlou removes a well-known figure from the community. The firm of Messrs. Hajji-Pavlou Brothers, long established in Limassol, is a leading house in the wine and spirit industry, and has a wide reputation. They have been the recipients of gold medals from the Société Agricole of France, and have gained many medals and other honours at various exhibitions, and from other societies in Europe, including England. As Mayor of Limassol Mr. Demosthenes Hajji-Pavlou carried out much useful work, notably in the metalling and paving of streets. His loss will be felt by a very wide circle of friends of several nationalities.

***

Still another regret has to be chronicled from Cyprus. I understand that, in spite of all opposition, the Government has seen fit to allow the motor mail and passenger service on the island to be discontinued. Readers of THE NEAR EAST will remember my special plea some weeks ago for a compromise between the Cyprus Motor Transport and Development Company and the Government, with a view to maintaining the service, which was a boon to the country. At the eleventh hour, as a result of the petitions addressed to them, the Government made an offer increasing its subvention to the company, but this was still far and away below the company's minimum. It must be remembered that the Cyprus Motor Transport and Development Company has been working at a loss ever since they acquired the concession. The latter expired on May 31 last, and the company refused to renew it unless better terms were obtained. The Cyprus Government therefore invited tenders, without result, and it was then hoped that a compromise between Government and the holders of the concession, enabling the latter to show at least a small profit, would be arrived at. Unfortunately, it was not to be, with the depressing result that mails and passengers will in future be horse-driven, to the disgust of the local inhabitants. The company, I understand, is to be wound up. This is deplorable, especially at a time when we have many lukewarm "friends" in Cyprus. It is, however, thoroughly British—penny wise, etc.

***

The *Egyptian Gazette's* reference to a change of coinage in Egypt can hardly come as a surprise, the difference between the English and the Egyptian pound having often made more than one accountant curse his luck. It is now intended, it seems, to make the Egyptian pound equivalent to the English sovereign, both presumably equal to 100 piastres. The *talari*, still the medium of exchange in the cotton and other commodity markets, would then be worth exactly 4s., and not 4s. 2d., as at the present time. The change will be a doubly welcome one, because it will also normalise Egypt's postal rates, which still labour under fractional disadvantages. On the other hand, the suggestion now made by the Egyptian Government shows how easy it would be for us to turn our own awkward duodecimal system into a decimal one. As a correspondent suggests, this could best be done by dividing the shilling into ten pence, and giving a new name to the ten-shilling piece, which would then be equivalent to 100 pence or fifty piastres.

***

We publish on another page a further article on the Jaffa orange trade from a correspondent who is now in Egypt. I should, here, like to make some comment on the writer's statements. In the first place, he is evidently inclined to express his gratitude to the British authorities for having averted a disaster to the Jaffa orange trade by allowing shipments to "England and Egypt" on the one hand, and to "Dedeagatch, in transit for further destinations inland, and Turkish ports," on the other. *In transit for further destinations inland*, smacks extraordinarily like trading with the enemy, and if this trading has been aided and abetted by the British authorities, as seems to be suggested, words fail to express my surprise! Either the Jaffa orange traders are British subjects, in which case their trading with Egypt and England is comprehensible, and their trading with "Dedeagatch, in transit for further destinations inland, and Turkish ports," is not permissible, or they are not British subjects, and consequently have to be treated as aliens, with no claim to any special treatment. This is the more obvious when it is remembered that in these same columns some few weeks ago I registered the complaint of Cyprus orange traders at having no facilities offered them for exporting their products either to Egypt or to any other port "in transit for further destinations inland." Charity, I think, should begin at home. Evidently the British authorities in Egypt do not think so, because, instead of enabling the Cyprian trader to give a well-deserved fillip to the orange trade of the island this year, they would seem to have helped swamping Cyprus's only available markets with enemy goods.

The second comment concerns the paragraph regarding the introduction of oil into Jaffa, with a view to supply fuel to the irrigation engines in the orange orchards. If the writer is to be believed, the British authorities in Egypt at one time "were generously inclined to consider the licensing of the necessary quantities of petroleum into Jaffa to save the people from ruin!" In the eleventh hour our "generosity" seems to have cooled down, but that we should ever even have contemplated permitting the import of oil fuel to Jaffa passes all understanding. After this it can no longer come as a surprise to us if in Egypt, that happy land of paradoxes, enemy directors are openly allowed, at their own sweet will and pleasure, to sit on the boards of Egyptian companies.

***

"Greek firms would prefer British goods if they could only obtain terms similar to those given by competitors," I read recently in a Consular report. It is the old, old story, and, like others of its kin, it is an invariable factor. The whole question is: Are we, or are we not prepared to give the consumer in the Near East terms similar to those given him by our competitors? If we are not, there is no longer the slightest use in arguing or labouring the point. If we are prepared to do so, we must first of all start creating facilities whereby neither do we stand to lose anything by giving long terms, nor is the buyer too assiduously pushed for his payments. This can only be done by the institution of local British commercial banks, as far as possible under local management, but governed from headquarters in London. Without such banks—incidentally they would be good paying concerns—there is absolutely no chance of our ever being able to compete with the terms offered by our rivals, either in Greece or elsewhere.

***

While on the subject of Greece, I should like to point out that the United States are eagerly currying favour in that country. Communications are now frequently published in the *Daily Consular Reports*, urging the American manufacturer to do his utmost to push his trade in Greece, and giving him sound advice how best to do so. It is a point worth remembering. Surely, if it is worth the American's while to cross the Atlantic to trade with Greece, it should also be worth ours to push our trade in that country.

***

I again wish to draw my readers' attention to the appeal for beds for the wounded made by Nurse Wheatley, whose good work in the Near East—more particularly in Constantinople prior to the war—is well known to late British residents in the Near East. We publish to-day a list of those who have already subscribed to the fund, but a further sum of about £5 is needed to pay the costs and the expense of sending out the seven beds required at the clearing station at which Miss Wheatley is tending our wounded.

***

Owing to a change of programme, Dr. H. B. Gray did not lecture on Wednesday on the "Resources of Cyprus and Malta." The lecture was devoted to the resources of New Zealand.

COMMENTATOR.

Alexandria Prize Court.

In re S.S. Koerber.

We have been favoured with a full report of the judgment in re s.s. Koerber, delivered by Judge Grain, of the Alexandria Prize Court on June 5. The following are extracts therefrom :—

Judgment.

The s.s. Koerber is an Austrian ship belonging to the Austrian Lloyd Steamship Company, 5,470 tons gross and 3,117 net register, fitted with wireless, and her master is Marco Antonio Zadro. She left Colombo for Djibouti on August 1, 1914, but on the following day, on the high seas, received a wireless message from her agent at Colombo not to call at Djibouti, but to steam at full speed for Trieste. This order was carried out, as the log book states that "on receipt of the message an order was given to drive the engines at full speed," and the master accordingly made for Trieste. On August 13 at mid-day she arrived at Suez, where the harbour master boarded her, and caused certain parts of her wireless to be removed; these having been removed, were given to the master (Zadro), and he was told not to use his wireless while going through the Canal. The ship only remained a few hours at Suez and then proceeded unmolested through the Canal to Port Said, where she arrived the following morning, August 14, at 7 a.m. The master, Marco Antonio Zadro, alleges in his log, his affidavit, and his evidence taken at Malta (where he is now interned) that the first knowledge of war having broken out between Austria and Great Britain was obtained on his arrival at Port Said on the morning of August 14, war having been declared between Great Britain and Austria on the midnight of August 12. Both the agent of the line and the master of the ship admit that the ship was free to leave the port of Port Said up to August 22, and as a matter of fact she was unmolested until on or about October 16.

But the agent and master differ as to their reasons for the ship remaining in port. The master of the Koerber in his report to the owners of the vessel states that he "Was officially informed by the local authorities that Austrian vessels would be allowed to leave the harbour until August 22 midnight, and after this date the departure would be prohibited."

Also in his log, under the date of August 14, he states: "In order to avoid certain capture by the enemy, the captain decided to remain in Port Said until the close of hostilities"; while the agent of the line states in his affidavit: "Although Zadro (the master) in his said report states that he decided to remain in Port Said he was under my orders. . . . and any decision he came to was the result of my instructions," and maintains that the reason for the ship remaining was that a free pass was refused and that Captain Trelawny, the Port Officer at Port Said, had informed him that the port was a neutral one.

It appears there were constant conversations by telephone, and at interviews between Captain Trelawny and the agent, and the agent and the master, but unfortunately there is no record obtainable of these conversations and consequently the parties have only their own memories to rely upon. As far as Captain Trelawny's memory serves him he says: "I may have acquiesced in a statement that the port was neutral, but never said definitely it was."

With regard to safe conduct passes, the agent states that on August 14 he went to Captain Trelawny and asked for safe conducts, that Captain Trelawny said: "She can leave up to August 22, but I cannot give you safe conduct." Although this statement is not definitely accepted by Captain Trelawny, nevertheless he does say that "on August 14 all safe conducts were withdrawn, but all ships were free to leave. If they had left at any time they would have been captured." On October 15 the master, under the orders of the harbour authorities, steamed out of the harbour, and an affidavit of Lieut. H. G. Briggs, of H.M.S. Warrior, states that she was captured as prize on October 16, 1914.

In coming to a conclusion on these facts as to whether this was a ship using Port Said as a place of refuge, and thereby ceasing to enjoy any protection under the stipulations of the Suez Canal Convention, or whether she remained there on account of guarantees of safety from the authorities at the port, I have two courses open to me, or perhaps three. I can either take the evidence of the master, or the agent, or a mixture of both (of which the affidavit put in by the master and dated October 28, 1914, is a fair sample), but I prefer to be guided by the plain statements made by the master of the vessel on his own initiative in his log, and in his unprompted written statement to his owners, rather than the affidavit which was prepared for him to sign, and the somewhat contradictory evidence of the agent and Captain Trelawny, which is made up of hearsay statements, telephone communications and conversations.

The master in his report to the owners of the vessel dated August 20, does not say a word about the port being considered a neutral one, but states, "as usual with our authorities nothing definite could be decided on." He does certainly in his log state, after he has entered his decision to remain until the close of hostilities, that "Port Said is considered a neutral port." But taking the master's evidence as a whole I am of opinion that he had at once, practically as soon as he heard of the war, decided of his own accord, to take shelter in Port Said, as the lesser of two evils, rather than venture out to certain capture. And, therefore, this ship comes under the "Gutenfels" judgment.

But Mr. Halford, who appears for the owners of this vessel, also puts in a plea under the Hague Convention, 1907, viz., that she is "a ship which has left its last port of departure before the commencement of the war and has entered a port belonging to the enemy while still ignorant that hostilities have broken out," and produces the evidence of the master, the wireless operator, first officer, second officer, and junior second officer, also the secretary to the Austro-Hungarian Consulate at Singapore who was a passenger on the boat. The evidence was taken on commission at Malta where the above-named are all interned, and was taken on oath.

I have studied that evidence very carefully, and it does seem somewhat extraordinary that although they appear to have heard of the war between every other nation they yet should not have heard of the war between Great Britain and Austria.

They heard that "Germany was at war with the whole world," that there was "war between Germany, France and Russia," "England and Germany," "Germany and Belgium," and "Austria and Serbia." But they, one and all, swear that they had not heard of the declaration of war between Great Britain and Austria, not only before entering Suez, but they state that even while there they did not hear of it, and that the first news they got was after passing through the Canal and arriving at Port Said. The operator states that from midnight on August 12 until his arrival at Suez he neither sent nor received any wireless message. And he further states that the first news he had was at Port Said, where he was told "war had broken out while his ship was passing through the Canal." The period, considering the difference in time between midnight at London and the next midday at Suez, is certainly very short for the news to have become generally known. The statements of all these witnesses are very definite, and were not in any way affected by the cross-examination, nor is there any definite evidence before me that they had knowledge of the war, beyond the probability that having wireless, they would have picked up this news. I am of opinion, therefore, that I must accept this evidence, which compels me to come to the conclusion that this was a ship entering the harbour in ignorance of the outbreak of hostilities between Great Britain and Austria.

The next question I have to consider is what is to be the form of order I make in this case. Although in a former and similar case to this, the President of this Court, with whom I was then sitting, made an order for detention and restoration after the war, from which order I differed, holding that the order should be one of detention with liberty to apply, viz., the "Chile" order, and on that occasion the President's view as the senior judge prevailed, nevertheless, without any desire to in any way show disrespect for that judgment, because I have the highest respect for the views the President has taken in these cases, I do not consider that the judgment binds this Court, and, that being so, I think I should be inconsistent if I did not adhere to my previous opinion. Therefore, the order in this case will be the "Chile" order, viz., detention during the war with liberty to apply.

Near East Markets.

LOCUSTS IN CYPRUS.

(From a Correspondent.)

Cyprus, June 4.

In dealing with locusts, the spraying method has been again successful; and this has been supplemented by purchase of the insects by weight where desirable. Amongst the locusts this year were some alien swarms of a very large species, which occasionally—but rarely—finds it way to Cyprus. The flights were apparently from Syria, which was this year a fertile and formidable breeding ground for the pest. From the south two invasions, in March and April respectively, attacked Egypt. The proximity of the Syrian mainland is always a source of danger from this scourge; so that even if in Cyprus the now indigenous swarms are almost exterminated, there may always be fresh incursions from neighbouring countries.

Of the carob crop it is still too early to speak, as the trees are always liable to suffer from an excess of hot, parching winds. The season for gathering is from the middle of August.

JAFFA ORANGE TRADE.

(From a Correspondent.)

Cairo, June 7.

It was predicted in my last report that, owing to the interruption of Jaffa orange exports during December and January, the two months wherein the shipments used, in normal times, to be most active, the season would be prolonged till the middle of May. As a matter of fact, it has actually been drawn till the very end of that month, *i.e.*, fully a month and a-half later than usual, the last shipment of about 6,000 boxes having arrived at Alexandria on May 29 by a Greek steamer that had been chartered and performed three successive voyages between Jaffa and Alexandria.

According to reliable statistics the total shipments of oranges effected to England viâ Alexandria amount to about 112,229 boxes, of which 89,874 to Liverpool, 20,759 to Manchester, 676 to London, and 920 to Hull. A further full cargo of about 25,000 boxes is said to have been shipped direct to Liverpool by a chartered Greek steamer, s.s. Ekaterini, in April last. Out of this total only about 13,000 boxes have been shipped between the end of October and end of November; while the large balance had to be shipped by every available opportunity between the following dates, February 5 and May 18. The shipments to Alexandria totalled about 55,000 boxes, and wholesale prices here averaged about 6s. per box. Never before have such large quantities of Jaffa oranges been imported into Egypt during such a period; and, while the consumers were delighted, the native orange growers resented the competition of this outside fruit which, by successive and comparatively heavy arrivals, led to a general pulling down of prices. In Liverpool, however, prices varied considerably according to the quality and condition of the fruit. While good and sound oranges fetched handsome prices, sometimes over 12s. per box, the lower grades could not stand the long voyage and arrived mostly in a wasty condition, fetching, according to the last reports, prices hardly sufficient to cover freight and expenses, which, this year, were unusually high. Anyway a complete disaster has been averted, and between the shipments made to England and Egypt, on the one hand, and to Dedeagatch, in transit for further destinations inland, and Turkish ports, on the other, probably more than the third of the crop has been saved from utter ruin, and the largest measure of the credit is due to the British authorities both here and in England for their generous and reasonable attitude.

The greater problem now is the maintenance of the orange orchards themselves. It is known that those orchards are supplied with well water which is rather deep, and is pumped up by means of oil motors. The old and primitive *naoura*, turned by animals, has been in almost every case superseded by modern steam-driven machinery. Now, as the Turkish Government has requisitioned most of (not to say all) the petroleum in the country, the merchants dared import no further quantities. At one time the British authorities here, having had their attention specially drawn to the important British shipping and trade interests involved in the Jaffa orange trade, thus seriously jeopardized, were generously inclined to consider the licensing of the necessary quantities of petroleum into Jaffa to save the people from ruin, and, at the same time, to protect future British interests, but as they had reason to believe that this exceptional measure would be nullified by the high-handed and heartless action of the Turkish Government, they let matters stand as they were.

In the case of certain British protected subjects, even the motors are said to have been confiscated by the authorities. Still, some hopes are yet entertained that these and other orchards, threatened with utter ruin, through the absence of oil, may yet be saved by the installation of the old *naoura* system. Although horses and mules have been entirely commandeered by the authorities, yet cows and donkeys may, as a makeshift, be temporarily substituted. But the scarcity of money and of wood may present yet another problem difficult of solution. The orange trees are usually watered during the dry season every five to six days, and it is said that if they be left unwatered for a few weeks at a stretch they run the risk of drying up completely. The fierce, and feebly checked, invasion of locusts, which are said to have devoured the tender shoots and flowers, have aggravated an already most serious condition of affairs.

COTTON REPORT.

(From Our Own Correspondent.)

Liverpool, June 24.

Messrs. Reynolds and Gibson report:—

Egyptian Spot.—There has been a fair amount of business reported this week in cotton, but the tone has been quiet and prices have ruled in buyers' favour. Quotations show a decline of 15 points. The sales are estimated at 3,100 bales, as against 2,700 last week.

Manchester Report.

As forecast in our last report, the cotton trade dispute has been settled by acceptance of all parties concerned of the Board of Trade proposals. The general tone of the market continues quiet, and very little confidence in the future is displayed. The most important feature of the week has been the issue of the prospectus of the new War Loan, and it is feared in some quarters that the very generous terms offered by the Government may cause a run on the loan capital of the mills. Egyptian yarn continues neglected.

PRODUCE REPORT.

Currants.

London, June 24.

No arrivals have taken place, but the s.s. Salermo and s.s. Princesse Clementine are afloat with full cargoes. Nearly the whole of these have been sold to arrive. In the absence of sufficient stocks prices of all qualities are constantly hardening, and the choice of fruit offering on the market is extremely restricted. Business in new crop is being done at lower rates than present spot values, but as the goods can hardly be expected to arrive much before the end of September this reduction does not affect the present position. The crop prospects are reported to be good at present. Prices this past week for Provincial are 29s. to 29s. 6d., Amalias 30s. to 31s., Patras 31s. to 33s., Gulf 31s. to 32s., Vostizza 36s. to 40s., Island 30s. to 31s., smalls 29s. to 35s.

In Liverpool the general demand has been quieter this past week, but there was no pressure to sell, holders being firm and not inclined to accept any less money in order to make more sales ex quay. The business done was at full rates, and there is nothing now offering on the market under 27s. 6d. Zante of good quality was in request at 30s. to 32s., up to 33s. being paid for smalls Fine fruit is cleared from the Liverpool market, and good is getting into small compass.

Sultanas.

There is a good general inquiry at fully late rates, and there seems to be no prospect of further arrivals from neutral countries in the near future. New crop reports are varied, but with the existing difficulties of cultivation, including the absence of sulphate of copper for treating disease, no large yield can be expected. It is too early to speculate on the prospects of shipments from Turkey.

In the Liverpool market the few thousand packages that arrived by the s.s. Pontiac and s.s. Bulgarian met with an active demand, and nearly all cleared at 58s. to 65s. per cwt., so that, again, there is very little remaining in first hands, and there is nothing afloat for this market. Some Afghanistan fruit was sold at 54s. and 55s., showing an advance of 2s. per cwt. from previous sales.

Seeds.

Linseed is dearer, London-Calcutta being quoted 55s. for spot and 55s. afloat. Rapeseed is quiet, but steady; Cawnpore brown June-July is quoted 51s., and pure Guzerat 56s. Cotton seed has been inactive. London-Egyptian on passage, quoted £8 15s., and June shipment, £8 15s. per ton.

Oils.

Linseed oil continues to decline, but there is a better demand at the reduced rates ruling. On the spot, pipes, £26 5s.; barrels, £27 5s.; month, £26 15s.; July-August, £27 10s.; September-December, £28 12s. 6d. Rape oil has declined in value. Ordinary brown on the spot, naked, £36 to £40. Cotton oil shows a further reduction; crude, on the spot, pipes, £28 15s.; refined, on the spot, pale, pipes, £30 10s.; sweet, barrels, £36 to £37.

Oil Cakes.

Egyptian cotton cakes are only in moderate supply, but, with some falling off in the consumptive demand, quotations remain steady, best brands selling at £6 11s. 3d. to £6 12s. 6d., while for June, orders ask £6 10s. ex ship, and July £6 12s. 6d. Linseed Cakes.—There is some slight improvement in the tone of the market, and values are, if anything, the turn dearer both for foreign and home-made descriptions, more especially the latter, in consequence of short productions from the mills at the present moment. Best London made sell slowly at £10 2s. 6d. to £10 5s. Fine quality Greek in bags make £10 10s., ex. docks. Decorticated cotton cake is procurable in limited quantity at £8 15s. per ton, ex. dock.

Onions.

The export of this article to the Continent has practically been prohibited by the Government. With heavy stocks of Egyptian here and more on the way, the prices have slumped badly. Quotations, however, are well above the average for the time of year.

Locust Beans.

The scarcity continues, with prices for whole at £8, and kibbled at £8 10s.

DATES.

SPHINX BRAND.

PRODUCE OF BASRAH.

Selected from the famous Gardens.

Only superior qualities of

Hallawees, Khudrawees, Sayers and Zehdi

are packed.

In cartons of one to four pounds, small boxes, ordinary cases, baskets, tins, and skins.

SPHINX competes with all other brands in quality, packing, and is guaranteed to be clean, sound, fresh, and free from disease.

Sole Proprietor:

BAHJET S. FORAGE, BASRAH.

Trade Notes.

Egypt.

Tenders are invited for the supply of clothing for the pupils of the Bulâq Elementary Training College for Women Teachers, for the school-year 1915-1916, as shown in the following list:—

No. of Sample	Description.	Quantity.
1	Flannelette, width 74 centimetres, in two colours	2,570 metres
2	Printed calico, width 80 centimetres, in two colours	2,660 ,,
3	Coloured zephyr, for pinafores, width 90 centimetres	2,120 ,,
4	Native blue linen, for pinafores, width 97 centimetres	1,060 ,,
5	Muslin for veils, width 72 centimetres	1,520 ,,
6	White press buttons	700 dozens
7	Tape	1,660 metres
8	Shoes for girls; different sizes ranging from 37 to 42	660 pairs

The contractor may obtain the measurements necessary for the supply of shoes at the Bulâq Training College. Persons desirous of tendering should apply for inspection of samples and copies of the specification to the Central Stores of the Ministry of Education, Darb el Gamamiz, Cairo, any day (Fridays and holidays excepted) between the hours of 8 a.m. and noon. Tenders must be submitted on the form supplied by the Central Stores, and in double sealed envelopes, the object of the tender being indicated on the first, and the second bearing the address: "Ministry of Education, Sharia el Turka el Gharbi, Cairo." Every tender must be accompanied by a provisional deposit of two per cent. of the total value of the offer. Post office orders or cheques on local banks will be accepted, but not cheques on banks abroad. The provisional deposit may be replaced by a letter of guarantee from an approved bank in Egypt to the effect that the bank will hold at the disposal of the Government a sum equivalent to ten per cent. of the total value of the contract, in the event of the tenderer obtaining the same. Tenders may be submitted for the supply of some or all of the articles, but in no case will a contractor be allowed to supply other than the total quantity required of any one article. Tenders will be received by the Ministry up to noon on July 31, 1915. They will be opened on August 1, 1915, at 10 a.m., at the Central Stores of the Ministry of Education.

Tenders are invited by the War Office, Cairo, for the supply of 9,600 baskets, earth; 2,100 handled brooms, grass; 320 unhandled brooms, grass; 260 basins for *zirs*; six cooking pots, medium, copper; six cooking lids, medium, copper; twenty-four cooking pots, large, eighteen gallons, copper; eight skimmers, copper. Date, June 26.

Tenders will be received at the Central Stores of the Ministry of Finance for the supply of articles of stationery required for the Government Departments during the year 1915-1916. Persons wishing to tender should apply to the Economat Central at the Ministry of Finance in order to consult the conditions and specifications of the supply. Tenders will be received up to July 22, 1915, at noon.

Tenders are invited by the War Office, Cairo, for the supply of 650 lamps, candle (Shamadans), with globes; 1,000 globes, spare (Shamadans), for the Citadel Stores, Cairo. Persons wishing to tender can see the conditions of contract at the above office, any day, from 9 a.m. to 1 p.m., except Fridays and general holidays. Date, June 30.

Messrs. Compton and Sons were recently the successful tenderers to the Ministry of Education for the supply of blue suits for the Industrial School.

Messrs. Setton and Company, of Cairo, were the successful tenderers recently to the War Office, Cairo, for the supply of barley at the War Department Stores.

Agents, Egyptian subjects, established since 1903, desire to represent, on commission, British manufacturers and exporters of cinema films, textiles, clothing and underclothing (men's, ladies' and children's), novelties for ladies, glass and earthenware, ironmongery, etc. First-class English references. Address, Grossmann and Grunfeld, P.O. Box 831, Cairo, Egypt.

Cyprus.

The Board of Trade have been informed by the Chief Collector of Customs at Cyprus that raw cotton has been added to the list of articles the exportation of which is prohibited to foreign ports in Europe and on the Mediterranean and Black Seas, other than those of France, Russia (except Baltic Ports), Belgium, Spain and Portugal, under the Proclamation of March 15, 1915.

Under the power and authority vested in him by the Quarantine Law, 1879, His Excellency the High Commissioner orders that all direct arrivals from Greece shall be subjected to medical inspection, with disinfection of clothing and effects of third class and deck passengers, to be undergone either at Larnaca, Limassol, or Famagusta.

Greece.

The Egyptian military authorities have given orders to the Customs Department not to accept any goods from Greece that are not signed by the British consuls of their places of origin. With regard to exports from Egypt to Greece these must be accompanied by a declaration that the goods are for the use of the inhabitants of Greece.

Engineering Notes.

Forced Draught.

It is reported that owing to the high price of coal many steam factories in the Near East are seriously embarrassed, and that some have already been closed for that reason. We have mentioned in these columns that in some districts an inferior kind of coal (such as lignite, brown coal, also wood and a variety of woody substances) can easily be obtained at very cheap rates, but in most of the local factories, especially the larger ones, such fuel cannot be used with satisfactory results. The fault often lies with the construction of the chimneys, the plans and details of which are made and sent, as a rule, by the makers of the engines and boilers without any knowledge of, or consideration for, local conditions. The result is that such chimneys are often found unsuitable for inferior classes of fuel. Inefficiency to supply the needed draught for the combustion of the available fuel is the principal fault. In the circumstances, therefore, and given the present high price of fuel, the question of mechanical draught as applied to steam boilers is worthy of serious attention, especially when it involves a saving of from 3s. to 5s. per ton. An insufficient supply of air causes imperfect combustion of the fuel, indicated by the production of black smoke. An excess of air causes waste of heat. The maximum efficiency lies, therefore, between the two extremes.

The Chimney Draught.

The natural draught in a chimney is entirely dependent on the difference of temperature between the inside and outside. The higher the temperature of gases passing inside, as against a lower exterior temperature, the greater the velocity and consequent higher intensity of draught at the furnaces. With this increased draught a greater quantity of fuel can be consumed on the same grate area and a greater heat obtained. This, transmitted to the water in the boiler, increases the capacity of the latter by raising more steam in a given time. Similar results to the above described accrue from increasing the height of a chimney, but there are two important reasons why these methods should not be adopted by those desiring maximum efficiency with minimum expenditure: (1) The high temperature of the gases going up the chimney means an enormous and constant waste. (2) The tall chimney entails a very high initial cost.

Advantages of Forced Draught.

The installation of a fan for increasing the draught would give better results than the highest possible temperature of waste gases or the tallest chimney it is practicable to build. The results are due to a less volume of air being required, though at a higher pressure than with chimney draught. A chimney usually works at a vacuum of ½ in. to ¾ in., while an induced draught fan is generally arranged to give 1½ ins. to 2 ins. In consequence of this higher pressure thicker fires can be carried and higher temperatures maintained, resulting in more rapid conduction of heat through the heating surfaces, and therefore a greater economy of heat than with chimney draught. The increase in evaporating power of boilers fitted with induced draught fans is such that usually three boilers do the work of four with chimney draught, and in some instances two boilers have evaporated as much as three were previously doing. The principal economy, however, lies in the fact that with mechanical draught a cheaper and inferior fuel can be used than with natural draught; and this is of great importance to steam users in the Near East, who may find relief from their present embarrassment by adopting this system. British makers of such mechanical draught plants give, as a rule, particulars as to size required, price of same, and plans of erection to buyers abroad.

New War Motors.

Agents of American firms have recently been very busy in the Balkan States trying to obtain Government orders for a new and very unusual type of mechanical transport in the form of vehicles arranged so that all four wheels are utilised for transmitting the drive, steering, and braking. They assert that a large number of these have been supplied to the Allies, and it is stated that military authorities in the Balkan States are very favourably impressed with these new war motors. The advantage of this system of construction is that the vehicle can negotiate successfully broken and soft ground, as well as such severe inclines as would probably render mechanical transport by the ordinary rear-wheel drive and front-wheel steering type hors de combat. It is, of course, evident that when climing a hill a vehicle which has power transmitted to the four points that are in contact with the road must have the advantage over one which has only two points in contact; and so much is this the case, in fact, that the makers guarantee their armoured trucks to climb a gradient as steep as one in two, the power to enable them to do this being derived from petrol engines of 120 h.p. The steering gear is ingenious, as it controls both of the axles, so that the rear wheels follow exactly in the tracks of the front wheels. This feature, together with the four-wheel drive, makes the machines very serviceable on muddy and broken roads. It is stated that Russia has already given an order for 300 of these vehicles, costing £1,000 each.

Baghdad Railway.

On June 12, *Engineering* published the following review of work on the Baghdad Railway:—In spite of the war, or, as it is asserted in some quarters, owing to military considerations connected with the war, the work on the Baghdad Railway is being pushed forward with no small amount of energy, and by degrees the comprehensive scheme is being opened for general traffic. Recently the most important tunnel on the Baghdad Railway, the Bilemedik Tunnel, has been pierced and is approaching its completion; its length is 1,826 metres. The sections upon which work is most active are those in the Cilician Taurus and in the Amanus Mountains, which are associated with the military advantages that will be obtained when there is a direct railway connection from the Bosphorus to the Egyptian frontier. The work, however, is not confined to the above-mentioned remaining links in the Baghdad Railway system, which are deemed to be of immediate strategical importance, but also comprises more easterly portions which cannot be deemed to be of any direct military moment. Several fresh sections have been opened for traffic, both in the most northerly part of Mesopotamia and as regards the extension of the line from the coast to the Euphrates and a more southerly section in the vicinity of Baghdad. Unfinished portions in various districts of Asia Minor divide, so to speak, the Baghdad Railway from Konia to the Euphrates into three sections, and, as a fourth section, may now be counted the line which proceeds from Baghdad in a northern direction, the length of which is 120 km.

EGYPTIAN HALL MARKS.

The *Journal Officiel* of June 3 publishes the following communiqué from the Assay Office, Ministry of Finance:—

The attention of the public is called to the fact that the Egyptian Government hall marks on gold and silver jewellery have been slightly altered, and from June 1, 1915, will be as mentioned below. To protect themselves against fraud the public are requested to see that all gold and silver jewellery bought is stamped with the Government hall marks. Marks other than those of the Government carry no official guarantee whatever of the genuineness or quality of the article. The new hall marks are:—

GOLD.—(1) A rectangle containing the design of a bird. (2) A square containing the fineness, as karats, in Arabic figures, and letters denoting the Government Assay Office where stamped. (3) A square containing the Government private date mark. Where possible, marks 1, 2, and 3 will be stamped on all articles; on very small articles, No. 2 only will be marked.

SILVER.—(1) An oblong containing the design of a cat. (2) A square containing the fineness per cent. in Arabic figures, and letters denoting the Government Assay Office where stamped. (3) A square containing the Government private date mark. (4) The Turra mark (monogram of the Sultan of Egypt). Where possible, marks 1, 2, and 3 will be used on all articles; on very small articles, No. 2 only will be used. No. 4 will only be used on large articles of 90 and 80 per cent. fineness respectively, and always together with marks 1, 2, and 3.

INGOTS OF GOLD AND SILVER.—(1) An oblong containing the name of the Assay Office in Arabic. (2) Numbers (Arabic) denoting the fineness. (3) A square containing the Government private date mark.

NEWS FROM ALL SOURCES.

It is stated that before the war there were bank notes in circulation in Egypt to the amount of £E2,700,000, whereas at the present time the bank note circulation is £E8,250,000.

The *Vossische Zeitung*, says an Amsterdam telegram, learns from Constantinople that a tunnel nearly three miles long, near Bagdje, through the Amanus Mountains, has been completed, thus connecting the Baghdad Railway on the Kiliki plain with Aleppo, in Northern Syria.

Mr. R. N. Ingham, Chartered Accountant, has been appointed Chief Accountant of the Khedivial Mail Steamship and Graving Dock Co., Limited, as from May 17, and has been invested with all powers formerly exercised by his predecessor.

Montenegrins in Canada, of whom there are 6,000, have been called home. They will leave with the Italian Reservists.

In reply to the inquiry sent by the Manchester Chamber of Commerce to the Foreign Office, Sir Edward Grey stated that the island of Mitylene must not be considered from a commercial point of view as a hostile island.

On June 19 the office of Egyptian and Foreign Trust, Limited, will be removed from 4, Corbet Court, Gracechurch Street, E.C., to 222-224, Dashwood House, New Broad Street, E.C.

The conflagration which devastated one of the most densely-populated quarters of Pera on Tuesday last, and lasted from noon till midnight, was one of the biggest fires, says an Athens telegram, ever reported in Constantinople. Hundreds of houses were detroyed.

Owing to the participation of Italy (Egypt's biggest supplier of paper) in the war, the Egyptian newspapers are suffering from a serious shortage of paper, and have been reduced in size.

The May issue of the *Boletin de las Cámaras de Comercio* (Madrid) states that, according to the Spanish Consul at Melilla the imports into that port during 1914 represented a value of 48,887,161 pesetas. The principal countries contributing to this trade were as follows:—Spain, 25,349,191 pesetas; United Kingdom, 8,758,434 pesetas; France, 6,246,179 pesetas; Algeria, 3,766,033 pesetas; Germany, 1,762,115 pesetas; Belgium, 1,242,291 pesetas; and Italy, 608,082 pesetas. The imports from the United Kingdom consisted chiefly of coke, gasoline, candles, common soap, cotton and woollen goods, cordage, carts and carriages, sugar, tea, condensed milk, and preserves. In view of the situation due to the European war it is to be presumed, remarks the Consul, that the imports from Germany and Belgium were confined to the first seven months of the year. The chief German imports were lubricating oil, window glass, fittings for doors and windows, metal manufactures, starch, common soap, cotton and woollen fabrics, paper in rolls, watches, typewriting machines, phonographs, electric wire, incandescent mantles, machinery in general, sugar, and toys.

The report of the Malta and Mediterranean Gas Company, Limited, states that the balance of the general revenue account is £7,335. The directors recommend the payment of the usual dividends on the first and second preference capital and a dividend of 4 per cent., free of income-tax, on the ordinary capital, making, with the interim dividend paid in December last, 6 per cent. for the year to March 31, leaving £2,420 to be carried forward.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF

COMPANY MEETINGS.

BANK OF ROUMANIA, LIMITED.

The ordinary general meeting of the shareholders of the Bank of Roumania, Limited, was held on June 23 at the offices, 7, Great Winchester Street, E.C., the Earl of Bessborough, C.V.O., C.B., presiding.

The Secretary (Mr. H. W. A. Kilgour) having read the notice convening the meeting and the report of the auditors,

The Chairman said: In rising to move the adoption of the report and accounts for the year 1914 I wish, first of all, to refer to the great loss which Roumania has sustained by the death of King Charles, who, after a reign of 48 years devoted exclusively to the welfare and progress of his country, passed away quite unexpectedly on October 10 last, and was laid to his rest amidst universal mourning. With regard to the balance-sheet, I may say that the result of the year's working has been quite satisfactory. However, owing to the unprecedented level of exchanges there has been deducted from the profits shown in Bucharest, after making provision for bad debts, a sum of Lei 370,400 to meet possible losses in exchange on unmatured operations, and after having written £6,661 8s. 3d. off investments there remains a sum of £17,171 8s. 10d. I would point out that the increase in deposits, for which there is a corresponding increase in the cash, is not a sterling liability, but a liability of our Bucharest Branch in Roumanian lei. A large part of the increase represents the proceeds of bills, etc., collected in Roumania on foreign account. Owing, no doubt, to the high rates of exchange and the difficulty of procuring remittances, much of this money is being left in Roumania for the present by the owners.

Turning now to the general state of affairs in Roumania, I may say that during the first half of the past year normal conditions prevailed there. The Balkan war being over, it was thought that peace in that part of Europe had been secured, at any rate for some years, and with the prospect of a good harvest the outlook was considered very encouraging, and a spirit of enterprise was manifest everywhere. These optimistic hopes were shattered by the outbreak of the European war, accompanied, unfortunately, by adverse reports from the country respecting the harvest. All this might have had serious results but for the far-seeing action of the National Bank of Roumania, to whom the financial and commercial community owe a debt of gratitude. In some quarters there was a demand for a general moratorium, but it was not acceded to, and it was only towards the end of December that a partial step in that direction was taken by decreeing a moratorium for foreign liabilities. This was done on account of the difficulty of procuring exchange, owing, firstly, to the war, and, later on, to the closing of the Dardanelles, Roumania's principal route for the export of her produce. The national accounts for the financial year ended March 31, 1914, resulted in a surplus of nearly £2,250,000; but those for the year ended March 31 last are not yet available. The National Debt was reduced, through the regular operation of the sinking fund, by £1,600,000 during the year; but in order to meet heavy military expenditure the Government obtained a loan of £8,000,000 from the National Bank.

The receipts from the national railways for the year 1914-15 showed a decrease of £200,000, owing to the dislocation of trade, while the output of crude petroleum for 1914 amounted to 1,783,947 tons, a decrease of a little over 100,000 tons compared with the previous year. Owing to unfavourable weather, last year's harvest did not come up to expectations. The crop prospects for the present year were very good until recently, but it is too early to speak definitely as to what the result will be.

I have again to express to the staff of the Bank, both here and in Roumania, my thanks for their conscientious services during these very trying times. In consideration of the exceptional state of affairs and the very serious increase in the cost of living at home and abroad we intend to make them a special allowance.

Mr. E. W. H. Berry seconded the motion, which was carried unanimously.

The Chairman proposed that the retiring member of the board, the Viscount Goschen, should be re-elected a member of the board.

Mr. E. W. H. Berry seconded the motion, which was carried unanimously.

Mr. J. Mason Williams moved that Messrs. Jackson, Pixley, Browning, Husey and Company should be re-elected auditors for the ensuing year, and that their remuneration should be fixed at forty guineas.

Mr. G. H. Tuck seconded the motion.

Mr A.. Hood proposed a vote of thanks to the Chairman, the board of directors, and staff.

Mr. W. J. Hoskins seconded the motion, which was carried unanimously, and the proceeedings terminated.

DELICIOUS COFFEE.
RED WHITE & BLUE
For Breakfast & after Dinner.
Wholesale, of Hanson's, London, England.

ALEXANDRIA WATER COMPANY.

The thirty-seventh annual general meeting of the shareholders was held in Alexandria on June 4, 1915, at which the following report and balance-sheet were unanimously approved. The number of shares represented was 22,878. The report states:

The directors, in submitting to the shareholders their annual report on the year's working, together with the accounts and balance-sheet to March 31, 1915, have pleasure in reporting that, in spite of the present circumstances, the actual revenue of the company shows only a slight diminution as compared with last year. A sum of £7,918 has been spent on new works during the course of the year. The length of new filtered and unfiltered water mains laid during the year amounts to 6,621 metres, and the length of high pressure mains to 1,297 metres. 6,816 new sprinklers and drenchers and 10 additional fire hydrants have been connected up to this latter installation. The high pressure service has been used for the extinction of 12 fires during the year, and has in each case proved its efficiency. At the Ramleh Pumping Station the second Diesel engine (250 h.p.) has been completed and started working in September last. In consequence of the high price of coal, the directors have examined the question of burning liquid fuel in our boilers. A trial plant that has been ordered will soon be at work and will enable us to ascertain the economy gained in using liquid fuel, and the advisability of adopting it in general so long as the supply of this article can be assured. The total receipts, which amount to £142,849, show a decrease of £1,421 as compared with last year; on the other hand, there is also a diminution in the working expenses of £973, making a nett decrease of £448 on last year's figures. The directors have written off a sum of £7,218 from buildings, machinery, mains, etc., which brings the total sum written off up to date to £100,101. The value of the securities, based on the nominal market price at March 31, 1915, shows a loss of £15,000 owing to the general depression of all first-class securities in consequence of the war; the directors have thought it prudent to write off this depreciation from the "profit and loss" account by the credit of a special account, "provision for depreciation of securities," reserving for themselves the right of subsequently transferring to the "profit and loss" account whatever increase in value the securities may attain, as soon as the situation seems to them to justify such a transfer, but, at any rate, not later than twelve months after the conclusion of peace.

The balance of the "profit and loss" account, after making the above depreciation and the usual allowances, and after deducting the interim dividend of 4 per cent. paid on December 15, 1914, is £57,000, from which should first be deducted 6 per cent. to complete, with the interim dividend, the 10 per cent. on the capital, namely, £36,000, leaving a balance of £21,000, of which one-half is due to the municipality according to the existing convention, and the other half to the shareholders, namely, £10,500, representing 1s. 9d. per share, and this added to the above makes a total of 7s. 9d. per share, which with the interim dividend of 4s. paid on December 15, 1914, makes a total dividend of 11s. 9d. for the year.

Baron J. L. de Menasce and Mr. A. L. Gorra were the two directors who retired by rotation, and, being eligible, offered themselves for re-election, which was duly confirmed.

WAR ON GERMAN TRADE.

In connection with the campaign undertaken by the Board of Trade, on the advice of the Advisory Committee on Commercial Intelligence, to assist British manufacturers and merchants to secure trade formerly in the hands of Germans or Austro-Hungarian firms, the Board continues to receive a very large number of inquiries for the names of sellers or buyers of articles.

Special arrangements have been made in the Commerical Intelligence Branch of the Board of Trade for dealing with these inquiries, and lists are prepared and circulated of articles which inquirers desire (a) to purchase, and (b) to sell. List 26 is now ready, and may be obtained by United Kingdom manufacturers and traders.

£4 10s. % WAR LOAN, 1925-1945.

ISSUE OF STOCK OR BONDS,

Bearing interest at 4½% per annum, payable half-yearly on the 1st June and the 1st December.

Price of Issue fixed by H.M. Treasury at £100 per Cent.

A full half-year's Dividend will be paid on the 1st December, 1915.

The Stock is an investment authorised by "The Trustee Act, 1893," and Trustees may invest therein notwithstanding that the price may at the time of investment exceed the redemption value of £100 per cent.

Applications, which must be accompanied by a deposit of £5 per cent., will be received at the Bank of England, Threadneedle Street, London, E.C., and may be forwarded either direct, or through the medium of any Banker or Stockbroker in the United Kingdom. **Applications must be for even hundreds of pounds.**

Arrangements are being made for the receipt of applications for smaller amounts than £100 through the Post Office.

Further payments will be required as follows:—

£10 per Cent. on Tuesday, the 20th July.
£15 per Cent. on Tuesday, the 3rd August.
£15 per Cent. on Tuesday, the 17th August.
£15 per Cent. on Tuesday, the 31st August.
£10 per Cent. on Tuesday, the 14th September.
£10 per Cent. on Tuesday, the 28th September.
£10 per Cent. on Tuesday, the 12th October.
£10 per Cent. on Tuesday, the 26th October.

THE GOVERNOR AND COMPANY OF THE BANK OF ENGLAND are authorised to receive applications for this Loan, which will take the form either of Inscribed Stock or Bonds to Bearer, at the option of the Subscribers.

If not previously redeemed the Loan will be repaid at par on the 1st December, 1945, but his Majesty's Government reserve to themselves the right to redeem the Loan at par at any time on, or after, the 1st December, 1925, on giving three calendar months' notice in the "London Gazette." Both Capital and Interest will be a charge on the Consolidated Fund of the United Kingdom.

The books of the Loan will be kept at the Bank of England and at the Bank of Ireland. Dividends will be paid half-yearly on the 1st June and 1st December. Dividends on Stock will be paid by Warrant, which will be sent by post. Dividends on Bonds will be paid by Coupon.

Inscribed Stock will be convertible into Bonds to Bearer at any time without payment of any fee; and Bonds to Bearer will be exchangeable for Inscribed Stock on payment of a fee of one shilling per Bond.

The instalments may be paid in full on or after the 20th July, 1915, under discount at the rate of 4½ per cent. per annum. In case of default in the payment of any instalment by its proper date, the deposit and the instalments previously paid will be liable to forfeiture.

Scrip Certificates to Bearer, with Coupon attached for the dividend payable on the 1st December, 1915, will be issued in exchange for the provisional receipts. As soon as these Scrip Certificates have been paid in full they can be inscribed (i.e., can be converted into Stock); or, they can be exchanged for Bonds to Bearer (as soon as these can be prepared) in denominations of £100, £200, £500, £1,000, £5,000, and £10,000. Inscribed Stock will be transferable in any sums which are multiples of a penny.

CONVERSION OF

£3 10s. per Cent. War Loan, 1925-1928.
£2 10s. per Cent. Consols.
£2 15s. per Cent. Annuities.
£2 10s. per Cent. Annuities.

Holders of £4 10s. per Cent. War Loan, 1925-1945, will have the additional right, **in respect of each £100 Stock (or Bonds) held by them,** and fully-paid in cash, to exercise one or other of the four following options of conversion, **provided application for conversion is made not later than the 30th October, 1915.**

OPTION 1. Conversion of £3 10s. per Cent. War Loan, 1925-1928.

To exchange Stock (or Bonds) of £3 10s. per Cent. War Loan, 1925-1928, to an amount not exceeding £100 nominal, for fully-paid Stock (or Bonds) of £4 10s. per Cent. War Loan, 1925-1945, at the rate of £100 of the former, with a cash payment of £5 per cent. thereon, for £100 of the latter.

Persons who exercise this option will receive the dividend of £1 10s 11d per cent. payable on the 1st September, 1915, in respect of the £3 10s. per Cent. War Loan, 1925-1928, surrendered, and a full half-year's dividend of £2 5s. per cent., payable on the 1st December, 1915, in respect of the £4 10s. per Cent. War Loan, 1925-1945, issued in lieu thereof.

OPTION 2. Conversion of £2 10s. per Cent. Consols.

To exchange Stock (or Stock Certificates) of £2 10s. per cent. Consols to an amount not exceeding £75 nominal, for fully-paid Stock (or Bonds) of £4 10s. per cent. War Loan, 1925-45, at the rate of £75 of the former for £50 of the latter.

Persons who exercise this option will receive the usual quarter's dividend of 12s. 6d. per cent., payable on the 5th October, 1915, in respect of the £2 10s. per cent. Consols surrendered, and a full half-year's dividend of £2 5s. per cent., payable on the 1st December, 1915, in respect of the £4 10s. per cent. War Loan, 1925-1945, issued in lieu thereof.

OPTION 3. Conversion of £2 15s. per Cent. Annuities.

To exchange Stock (or Stock Certificates) of £2 15s. per Cent. Annuities, to an amount not exceeding £67 nominal, for fully-paid Stock (or Bonds) of £4 10s. per Cent. War Loan, 1925-1945, at the rate of £67 of the former for £50 of the latter.

Persons who exercise this option will receive the usual quarter's dividend of 13s. 9d. per cent., payable on the 5th October, 1915, in respect of the £2 15s. per Cent. Annuities surrendered, and a full half-year's dividend of £2 5s. per cent., payable on the 1st December, 1915, in respect of the £4 10s. per Cent. War Loan, 1925-1945, issued in lieu thereof.

OPTION 4. Conversion of £2 10s. per Cent. Annuities.

To exchange Stock (or Stock Certificates) of £2 10s. per Cent. Annuities, to an amount not exceeding £78 nominal, for fully-paid Stock (or Bonds) of £4 10s. per Cent. War Loan, 1925-1945, at the rate of £78 of the former for £50 of the latter.

Persons who exercise this option will receive the usual quarter's dividend of 12s. 6d. per cent., payable on the 5th October, 1915, in respect of the £2 10s. per Cent. Annuities surrendered, and a full half-year's dividend of £2 5s. per cent., payable on the 1st December, 1915, in respect of the £4 10s. per Cent. War Loan, 1925-1945, issued in lieu thereof.

In the event of future issues (other than issues made abroad or issues of Exchequer Bonds, Treasury Bills, or similar short-dated Securities) being made by his Majesty's Government, for the purpose of carrying on the War, Stock and Bonds of this issue will be accepted at par, plus accrued interest, as the equivalent of cash for the purpose of subscriptions to such issues.

A commission of one-eighth per cent. will be allowed to Bankers, Brokers and Financial Houses on allotments made in respect of cash applications for this issue bearing their Stamp; but no commission will be allowed in respect of applications for conversion.

Application Forms for Cash Subscriptions may be obtained at the Bank of England and the Bank of Ireland; at any Bank or Money Order Office in the United Kingdom; of Messrs. Mullens, Marshall and Co., 13, George Street, Mansion House, E.C.; and of the principal Stockbrokers.

Application Forms for Conversion will be forwarded with each Letter of Allotment.

The LIST of APPLICATIONS will be CLOSED on or before SATURDAY, 10th July, 1915.

Bank of England, London, 21st June, 1915.

COMPANY NOTES.

Shell Transport.

Referring at the general meeting held on Tuesday to the company's interests in Roumania, Sir Marcus Samuel, the chairman, said :—"Coming events cast their shadows before, and for a considerable period before the actual outbreak of the war, the movements of our ships in the Black Sea were constantly interfered with. In many cases steamers leaving Constanza and Batoum were vexatiously kept by the Turkish authorities for long periods. I venture to hope (continued the chairman) that whatever may be the outcome of the final fate of the Dardanelles, these waters may be so settled that shipping shall never be hampered again by the vexatious regulations arbitrarily and unnecessarily enforced, which have frequently militated so greatly against all shipping engaged in the Black Sea trade. For a period of many months now shipments from Roumania and Russia have been impossible. In the case of the former country, the Government have done their best to minimize the serious inconvenience caused to producers by placing at the disposal of the various companies the whole of the tankage which they had prepared in connection with the pipeline from Bacoi to Constanza, in which facility the Astra-Romana participated. Under such circumstances, it was necessary to decrease output, or the figures of production of the Astra, excellent as they are, would have proved even more satisfactory. It is with much pleasure that I have to inform you that the Astra-Romana has acquired a new territory at Ochiuri, where the first well is already giving a production of 90 tons a day. It is a compact area of 1,300 acres, and the well referred to is situated 200 metres from the boundary, so that we have every expectation of developing a most profitable field there."

Ellerman Line.

The report states that the dividends on the guaranteed preference shares, the 5½ per cent. preference shares, and the preferred ordinary shares, to September 30, have been duly paid, and the dividend for the remaining three months has been reserved for. The directors have limited the dividend on the deferred ordinary shares so as to enable them to set aside the £750,000 by way of extra provisions, or to reserve fund, as provided for under the scheme of reorganization. Of this sum, £500,000 has been applied by way of extra depreciation and other provisions, including provisions made in the accounts of the subsidiary companies, and £250,000 has been transferred to reserve fund. At the present date substantially the £750,000 referred to is invested in outside securities, Treasury bills, and fixed deposits. The trading for the first ten months of the period under review was of a very favourable character, but the outbreak of war, in August last, necessitated large additional expenditure for war risk insurance, working charges, and to meet very considerable interruption and disorganization of the services. Notwithstanding the largely increased earning capacity, arising from additional capital represented by new tonnage, the results for 1914 showed little improvements over the results of 1913. The directors view with apprehension the great increase in the cost of working the steamers, which is bound to tell adversely on the future, as experience in the past has proved that expenses take a very long time to fall to anything approaching the normal again. Since the outbreak of war, the company has had steamers of a total gross tonnage of 174,827 requisitioned for Government purposes, and steamers aggregating 77,461 tons are similarly employed at the present time. Since the date of the last report the passenger steamers City of Exeter, City of Nagpur, and City of Cairo have been delivered, also several cargo steamers; and including the tonnage of subsidiary companies, and the estimated tonnage of the steamers building, the total gross tonnage of the fleet is now about 633,500 tons. The City of Mysore was unfortunately lost by stranding, and the steamers City of Winchester, City of Khios, Assiout, Flaminian, and Andalusian have been destroyed by the enemy.

Egyptian Agricultural Co.

The directors report that an arrangement to provide, for some years to come, on reasonable terms, the necessary funds for developing the estates was on the point of completion, but all such calculations were upset by the war. Outlay on the estates could not be wholly suspended without doing irreparable mischief, but everything short of this has been stopped. The profit and loss account for the year shows a deficit of £3,025. The cotton crops from the estates were excellent. The charge for interest is necesarily heavy and there is no "set off" from the Dreaga purchase, the purchaser having failed to fulfil his contract. The property, as soon as legal proceedings are completed, will again form part of the Chaba Estate Meeting, 57, Old Broad Street, June 28, 2.30.

Egyptische Hypotheken Bank.

During January the Banque Hypothécaire Egyptienne appealed against a decision of the *juge des reférés* at the Mixed Court of Mansourah forbidding the sequestration of property belonging to the bank's debtors, the bank pleading that they were not managing it properly. During the hearing of the appeal some days ago it transpired that the original name of this bank was Egyptische Hypotheken Bank, and it was urged that it could not, according to the terms of Sir John Maxwell's proclamation, appear before a Court in Egypt. This view was not held by the Court, says the *Egyptian Gazette*, as the proclamation refers to branch establishments of enemy firms, the head offices of which are in enemy countries, whereas the Hypotheken Bank was formed in Egypt and has no head office elsewhere.

Anglo-Egyptian Oilfields.

The *Morning Post* says:—In times past the shareholders in the above oilfields have been treated to most optimistic reports as to the possibilities of the properties. At one time, in April, 1914, the company turned out rather over 17,000 tons in a fortnight, and in October last 7,620 tons were produced in a week, owing to the re-opening of the well on the Hurgada property. Since then the production has practically fallen off week by week until about a fortnight ago it had dropped to seventy-seven tons, the last return being 394 tons. It is thought that this falling off may be due to three reasons. One is that the Hurgada well may be corked again; secondly, a shortage of labour brought about by the war; and the last reason may be the crowded condition of the wharves and the difficulty of obtaining transport under present conditions. Whatever the reason is for present poor results, the shareholders feel entitled to be kept informed as to the real position, and it is certainly rather disconcerting to them to see the price of the shares continually falling. The annual meeting should be held shortly, but there is a demand that the directors should make a statement without delay.

BANK OF ROUMANIA, LIMITED.

Notice is hereby given that on and after the 2nd July, a DIVIDEND of 6s. per share, free of English Income-tax, for the year ended 31st December, 1914, will be PAID to the shareholders on the books of the Bank at the close of business on 5th inst. and against delivery of Coupon No. 23 of the shares to bearer.

The coupons must be entered on forms, which can be obtained on application at the Bank on and after 24th instant (Saturdays excepted) and left three clear days for examination.

H. W. A. KILGOUR, Secretary.
7, Great Winchester Street, London, E.C.,
23rd June, 1915.

THE GHARBIEH LAND COMPANY.

CAIRO.

Owing to present circumstances, a Resolution was passed at the Ordinary General Meeting of this Company in Cairo on 31st May, 1915, adjourning the Meeting to a date to be notified in due course by the Board of Directors.

WHEN WRITING TO ADVERTISERS

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for the week, 24 tons; dec., 118 tons. Hurgada production for the week, 102 tons; dec., 110 tons.

BANK OF ROUMANIA.—Payment is announced on and after July 2, of dividend of 6s. per share, free of English income-tax, for the year ended December 31.

EGYPTIAN DELTA LIGHT RAILWAY.—Receipts for the 11 days ended May 31, £E3,794, as against £E5,736 for the corresponding period of last year.

EUROPEAN OILFIELDS.—Production for week ended 13th inst., 87,800 poods. Price of crude oil at Blacktown, 40½ copecks per pood.

ORIENTAL TELEPHONE AND ELECTRIC COMPANY.—Notice is given that the register of transfers of four per cent. redeemable debenture stock will be closed from June 17 to 30, both days inclusive, for the preparation of warrants for the half-yearly interest due July 1.

ROUMANIAN CONSOLIDATED OILFIELDS.—Week ended June 12, 2,004 tons.

SOCIÉTÉ ANONYME DU BEHERA.—Coupon No. 42 of debentures falling due on July 1, and Coupon No. 20 of preference shares which fell due on January 1, 1915, as well as the reimbursement of debentures that were redeemed at the drawing of May 29 last, will be paid on and from July 1 next at the offices of the National Bank of Egypt in London, Cairo, and Alexandria.

SUEZ CANAL RECEIPTS.—Receipts of the Suez Canal of the 19th and 20th inst. amounted to 490,000fr., against 660,000fr. for the corresponding days last year.

TELEPHONE COMPANY OF EGYPT.—Notice is given that the register of transfers of four and a-half per cent. redeemable debenture stock will be closed from June 17 to 30, both days inclusive, for the preparation of warrants for the half-yearly interest due July 1.

ENEMY COMPANIES IN EGYPT.

The latest issue of the *Official Journal* contains the following announcements:—

Deutsche Orient Bank.

Notice is hereby given that under Article 8 of the Proclamation of January 25, 1915, the General Officer Commanding in Chief has appointed Mr. R. E. Moore as Controller of the Deutsche Orient Bank in Egypt in the place of Mr. F. G. Bonham-Carter, who has resigned.

Messrs. Mayer and Co.

Notice is hereby given that under Article 8 of the Proclamation of January 25, 1915, the General Officer Commanding in Chief has appointed Mr. R. E. Moore as Controller entrusted with the supervision of the working of the Egyptian branches of the firm of Messrs. Mayer and Co.

Stein's Oriental Stores.

Notice is hereby given that under Articles 8 and 10 of the Proclamation of January 25, 1915, the General Officer Commanding in Chief has appointed Mr. R. E. Moore as Controller entrusted with the supervision of the working of the Egyptian branches of Stein's Oriental Stores.

EGYPT'S COINAGE.

There seems to be a movement on foot in Egypt to reform the existing coinage, so as to make the £E1 (100 piastres) equivalent to the £1 (97½ piastres), and to modify the value of certain minor coins. The Government, it would appear from the *Egyptian Gazette*, have the matter under consideration, and have officially addressed seven questions to all the leading bankers in the country as a preliminary to the introduction of important reforms. The following are some of the principal questions:—

What are, in your opinion, the arguments for or against the alteration of the title of Egyptian gold by attributing to the Egyptian pound a value equivalent to that of the pound sterling? Do you approve of this modification?

Are there, in your opinion, coins of silver, nickel, or bronze which can be added with advantage to the list of Egyptian coins now in circulation? Amongst the latter are there any that it would be advisable to suppress?

It has been noticed that coins of a value less than 5 milliemes are not in general use and that the base of prices for retail sales tends towards the piastre and half-piastre to the detriment of the consumer. It has been proposed: (a) To put into circulation bronze coins of the value of 2 milliemes and one millieme of a larger size than those now existing in nickel of these values, which are inconveniently small. (b) To put into circulation a coin of 2½ milliemes. Which of these two measures in your opinion would best remedy the inconvenience above described?

In order to facilitate the distinction of nickel coins from silver it has been suggested to give to the former an undulating or polygonal form or to perforate the centre. Which of these do you consider preferable?

NATIONAL BANK OF GREECE.

NOTES OF THE WEEK.

There are indications that the accession of Italy is strengthening the diplomacy of the Triple Entente in the Near East. The policy consistently urged in these columns of bringing Roumania, Serbia, Greece, and Bulgaria together by imposing upon them the terms which will settle their present controversies is now finding advocates in other quarters. A writer in the *Tribuna* on the diplomacy of the Entente Powers in the Balkans undoubtedly reflects the views of the Italian Government, and serves to illustrate the lines on which that Government has tendered advice to the Allies. The diplomacy of the Entente, it is pointed out, has been working on wrong lines. Instead of urging one or other of the Balkan States to take action inspired by an exclusive consideration of its own interests, and limited to its own individual national programme, they ought to have treated the question upon the only sound basis, that of the higher interests of all the Balkan peoples, and aimed at a revival of the Balkan League.

As we point out elsewhere, the Balkan League will have to be revived in fact or in effect at the end of the war. Its non-existence under present conditions predicates a state of affairs heading sooner or later for war. But if the settlement after the war is to be worthy of the name, it must imply that the danger of a conflict in the Balkans has been eliminated at least for some considerable period. Accordingly, on whatever lines the settlement is to run, it must see to it that no challenge of hostilities thrown down in the Balkans has the least chance of success. If this be done, any State nursing a grievance which it hopes to be able to remedy by an ultimate appeal to arms must be persuaded of its error, and be brought to realize that, unless it can arrive at an amicable arrangement now with its neighbours, it stands to have its grievances stereotyped for the better part of all time. In the face of this menace there will inevitably be a reaction in favour of a general settlement on terms. If, after a certain amount of discussion between the Triple Entente and the Balkan States, that settlement is imposed upon the latter as the final judgment of the Powers to whom they owe their existence as independent nations, there can be little doubt that the solution of the present *impasse* will be accepted with a feeling of relief.

Whether the proposal of the writer in the *Tribuna*, that a conference should be held to settle the matter, is sound we have serious doubts. Past experience of conferences of delegates from the Balkan States with or without representatives of the Great Powers does not encourage confidence in their ability to reach their goal speedily. Inasmuch as the basis of any settlement must be mutual concessions, to which the States will not voluntarily agree, there would seem to be no purpose in calling them together to record their differences. On the other hand, if the necessity of making these concessions be imposed upon them by the four Great Powers, there is nothing to prevent them, after accepting the situation, from coming together in their own time to make suitable arrangements between themselves in the light of the territorial concessions already exacted from them. Any refractory State—we are confident that there will be none—would easily be made to realize that it would stand out of the agreement at its own cost.

If in carrying into effect this plan of a settlement from without there may seem to be an echo of the German Emperor's "Woe to him who lifts up his hand against me," it has to be remembered that the method would come as a relief to the Balkan peoples themselves. Popular sentiment in the three neutral countries is strongly in favour of the Entente Powers, and the delay of the latter to take steps to enable that sentiment to be translated into action merely gives rein to the artificial opposition fed by German intrigues and bribes.

In an interesting article the correspondent of *The Times* in the Balkan Peninsula sets out the factors for and against intervention. Our readers will be familiar with most of these factors—the anxiety of the countries concerned to avoid a protracted war, the military prestige of Germany, and the "initial advantages in high places," which the Central Powers have used to the full. The fact that Germany and Austria-Hungary have also flung to the widest possible limits their net of intrigue in the Balkans is a matter of common knowledge; but few people in the West will have realized the part which bribery has played in the German programme. It has been employed, says the well-informed correspondent of *The Times*, on an unprecedented scale. "Functionaries and officials of every degree, from the highest to the lowest, have been corrupted, and immense sums

Digitized by Google

have been lavished on the Press. Ingenious devices have been adopted in order to distract public attention. Thus at Bucharest *batailles de fleurs* have been organized with a view to providing the populace with frivolous amusements tending to obliterate the memory of suffering Transylvania; carriages and baskets of flowers have been provided gratuitously for those taking part in the fêtes." To the German programme the Allied Powers oppose the policy of regarding Roumania as a rational being, capable of weighing the pros and cons of any course and arriving at a sound decision. It may not flatter Roumanian vanity, but it credits her with the common sense and seriousness of purpose. In spite of vehement protestations and protracted bargainings, we shall refuse to believe that the Germans have gauged the Roumanian intellect more accurately.

Not the least pernicious aspect of the delay on the part of the Roumanian Government is the tendency it has to divide the nation into opposing camps. If the Government's policy had been demonstrably sound, it ought to have been an easy matter to convince the Opposition leaders that the interests of the country were being safeguarded, and that in due course the national ideals would be realized. In this way political demonstrations would have been avoided, as well as the folly of embittering political parties on the eve of what may prove the severest ordeal in the nation's history. The mistake made by the Bratianu Cabinet is the more remarkable as it was freely claimed by the Liberal party two years ago that it had compelled the Conservative Government to take the action against Bulgaria that led to the occupation and cession of the Dobruja.

The dramatic interest that would otherwise attach to the occupation of Scutari by the Montenegrins is overshadowed by more important events in other theatres of the war. Our knowledge of the actual course of events in Albania is scanty. A few weeks ago the Serbians had crossed the Albanian frontier, were in possession of Elbassan and Tirana, and were supposed to be marching on Durazzo. Their entry into that town, however, was not confirmed. Now we have the Montenegrins operating in Albania. They occupied San Giovanni di Medua, where the Albanians had been holding up and looting Montenegrin vessels using the Boyana River, and on June 27 took possession of Scutari. The Albanians, at Austria's instigation, have been administering both to Serbia and Montenegro a number of pinpricks in the form of raids. As the two Slav States are on the eve of a fresh advance into Austrian territory, it would have been suicidal to have left their Albanian frontiers exposed to any serious attacks. The decision was, therefore, taken to checkmate Austrian machinations by a joint occupation of Albanian territory. The Serbian expedition, as we have already seen, was entirely successful. The Montenegrins have also advanced without opposition, if we except the report of a skirmish in the Djakovitza Pass on the frontier.

According to the reports received from Italy, the occupation of Scutari was not only peaceful, but in accordance with the wishes of the populace. The inhabitants, including representatives of all denominations, went out to meet the Montenegrin troops, and accompanied them into the town. General Vukovitch, having taken possession in the name of King Nicholas, informed the inhabitants that they were henceforth Montenegrin subjects. The lowering of the Austrian flag over the Consulate will have completed the satisfaction with which the Montenegrins avenged the affront they had to endure two years ago when, after the successful capture of Scutari, they were obliged to evacuate it by the Powers at Austro-Hungarian dictation.

In a Note to the Powers who are her Allies in this war Montenegro has explained the circumstances which led her to occupy Scutari. At the same time M. Andre Radovitch, a former Prime Minister, has arrived in England on a special mission on behalf of the Montenegrin Government. It is stated that he has given formal assurances to the British and French Governments that Montenegrin troops had only occupied portions of Albanian territory for strategic reasons. Montenegro, he has added, has no intention of occupying Scutari, and, although the Albanian question is a vital one for Montenegro, King Nicholas's Government will always respect the decision of the Great Powers. Any seeming contradiction between M. Radovitch's statements and General Vukovitch's announcement to the inhabitants of Scutari will attract no notice at this stage. The Albanian question excites little interest outside the country, unless it be in Germany and Austria-Hungary. The chief interest of the Allies in Albania at the present moment lies in the prospect of keeping it quiet. With the Serbians and Montenegrins in occupation of the more important centres in the north, the possibility of unrest in the country is robbed of most of its dangers.

Such news as there is of the operations at the head of the Persian Gulf points to the expeditionary force still being employed in the work of clearing the Busreh vilayet of stray parties of Turks, who were left behind when the main forces withdrew. The district is settling down to its hottest season, and, although the climate improves the farther one withdraws northwards from the Gulf, it is unlikely that this period of the year would be chosen for a general advance up the Tigris.

Any advantage that the Turks may have in position on Gallipoli Peninsula is counterbalanced by the increasing difficulty that they must be experiencing in replenishing their supplies of munitions. We have seen what Austro-German superiority in guns and ammunition has accomplished in Galicia. It should not be outside the bounds of possibility that the same thing should happen in our favour on Gallipoli. So long as the supplies are in Turkey they will reach the Turks on the Peninsula; but we may at least hope that the facilities hitherto enjoyed by the Porte for replenishing those supplies have now been withdrawn. At the same time neither this country nor the men who are performing great deeds in front of the Turkish positions can rely upon the expected failure of the enemy's supplies. When shells run short, they will still have bayonets, and trenches will have to be won by steel against steel. In this connection a *caveat* may be entered against the placing of too much reliance on reports of the situation in Constantinople. Even if it were true that the appearance of British submarines threw the town into a panic, it is unlikely that the master minds which are directing the Turkish resistance shared or even noticed the alleged consternation of the streets.

Some notable progress has to be recorded in the operations on Gallipoli Peninsula. The Press Bureau issued on Wednesday afternoon a report, based on dispatches from Sir Ian Hamilton, which records an important advance made by our forces on June 28 in the neighbourhood of Krithia. The action opened at nine in the morning with a bombardment by our heavy artillery and that of the French. The field artillery and some of our warships soon joined in, and the latter were markedly successful in keeping down the enemy's fire in their neighbourhood. Shortly before eleven the Border Regiment, leaping "from their trenches as one man, like a pack of hounds" rushed an advanced work, known as the Boomerang Redoubt. To the west three lines of trenches were captured with little opposition, and to the east the Royal Scots carried two lines of trenches with a fine charge. The Royal Fusiliers, the Lancashire Fusiliers, and the Gurkhas were all actively engaged, and all did well, while the Australian Corps was ordered to cooperate by making a vigorous demonstration. During the night the enemy counter-attacked the furthest trenches gained, but was repulsed with heavy loss, and Sir Ian is able to report that, except for a small portion of trench held by the enemy, "all and more than was hoped for from the operations has been gained." As a result, our line has in places been advanced over a thousand yards. The Turkish losses are reported to have been enormous.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 21.

Austro-Hungarian Subjects in Egypt.

To the general satisfaction of the Entente colonies sterner measures are about to be taken with regard to the enemy subjects still left in this country. This step is foreshadowed by the publication of a notice from the General Officer Commanding the British Forces that, in view of the possibility of stricter measures being put into force with regard to Austro-Hungarian subjects, any such subjects desiring to be treated exceptionally owing to their sympathies being Italian or Russian must obtain certificates to that effect from the Consulates concerned. Since the British policy throughout has been to treat Austro-Hungarians more leniently than Germans, it is permissible to assume that these "stricter measures" will also be applied to the latter. Of German subjects there are comparatively few left in Egypt, but there exists a considerable number of subjects of the Dual Monarchy who up to now have been accorded exceptional treatment because they were protected subjects or hailed from the districts actually or about to be occupied by the Entente Powers and their Allies. It was obviously unfair that these people, merely because they had declared that they dissociated themselves from the actions of their country, or were reputed to be in sympathy with Italy or Russia, should be left unmolested. Their position under this arrangement became such that, no matter which side might win, they were perfectly safe, whilst at the same time it somewhat tied the hands of the Egyptian Government. Moreover, there is no doubt that those Austro-Hungarians who were pronounced pro-Germans were taking advantage of the situation to carry on under its cloak whatever intrigues are still possible. All said and done, the situation was in the highest degree unsatisfactory. Now all those who since the war are understood to have regretted their attachment to the Dual Monarchy will be able to regularize their position, and will have an opportunity to give practical evidence of the sympathies they have so often professed. It is to be presumed that great care will be taken in the granting of certificates, and thus the Government will be free to take the proper measures against all those who are unable to satisfy the Russian and Italian Consulates as to the bona fides of their sentiments.

The Sultanic Library.

It is understood that an Egyptian, Ahmed Lutfi Bey El Sayed, is about to be nominated Director of the Sultanic Library. Under ordinary circumstances such an appointment would not merit much comment, but to-day it may be taken as a sign of the times; for the Directorship of the Khedivial Library, as it was called under the old *régime*, has hitherto been one of the posts to which the Germans have always laid claim. For some time the Egyptian Government has wanted to appoint an Egyptian to this post, and it offered Berlin all manner of compensations in the way of appointments in other administrations. On the resignation of Moritz Bey in 1911 negotiations to this effect were opened up; but, for reasons best known to itself, the German Government proved obdurate, and after the post had remained vacant for two years, and the efficiency of the library administration was beginning to suffer, the Egyptian authorities had to give way and consent to the appointment of a German. The last incumbent left Egypt before war broke out; and now that an Egyptian is to be appointed to succeed him we may be certain that we shall not henceforward see any more posts reserved for the disciples of Kultur, as the other positions to which the German Government used to lay claim will certainly be either suppressed or filled up by Englishmen or Egyptians. In this respect the only international fetters binding Egypt to-day are the posts specially reserved by agreement for Frenchmen; but in view of the change in status it is to be assumed that at the end of the war this country will regain its complete liberty of action in regard to the nomination of its officials, as in other matters, and that thenceforward international and political expediency will not play therein the permanent and detrimental part that it has done in the past.

As far as one knows the proposed nominee possesses no qualifications, and is in fact a lawyer. Until recently he was the editor—no successful one—of a vernacular organ. Whether the appointment will be an improvement is, therefore, a moot question. The library, which is said to be the finest of its kind in the East, contains over 76,000 volumes, most of them extremely valuable books of reference and some of them exceedingly old MSS. Very great care requires to be shown in its management, and the director should be an experienced man and one who has special knowledge and aptitude. Under the old régime, of course, no Egyptian was ever trained with a view to assuming eventually the control of this important institution. The only Egyptian who might fill the post with success and with benefit to the library is one who is renowned for his research in Oriental literature and has an extensive library of his own, but who unfortunately holds an important position in the Government, which it is doubtful whether he could be persuaded to give up even for work that would be so near his heart. Failing the obtaining of the services of this savant, the wisest course would appear to be to postpone the excellent scheme of appointing an Egyptian and to select a foreigner experienced in this particular branch, whose mission, in addition to administering the library, would be to train up an Egyptian who would be qualified to succeed him in the post, which *par excellence* ought to be held by a native of the country.

PARCELS FOR THE MEDITERRANEAN EXPEDITION.

The War Office communicates the following:—

Opportunities sometimes occur for sending certain goods free of charge to troops serving in the Mediterranean. This free conveyance is provided in transports if the necessary accommodation is available, and applications for the conveyance of baggage and parcels by this means should be addressed to the Military Forwarding Officer, Devonport.

Applications to ship wines and spirits consigned to recognised messes, or sporting ammunition, should be addressed to the Secretary, War Office; but it should be noted that many of the transports at present employed have no spirit rooms, and that these goods cannot be shipped in the ordinary cargo space.

No parcels under 11lb. can be accepted. Goods should be packed in rectangular cases and not measure more than 30 cubic feet.

Carriage to Devonport must be defrayed by the sender, and from the port of disembarkation by the addressee if necessary.

BRITISH PRISONERS IN TURKEY.

It is officially stated that the Foreign Office has received information from the American Ambassador that sixty-five British prisoners of war, in the hands of the Turks at Afia-Kara-hissar, have been visited by a representative of the American Embassy in Constantinople, who delivered money, clothing, and supplies to them. He reported that both officers and men are treated well and are in good health, and that their present conditions seemed to be satisfactory.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, June 13.*

The King's Illness.

The second stage of the King's illness has been even more grave than the first. As he began to grow worse on the evening of his birthday, it was thought that the relapse was brought on by excitement over the enthusiastic demonstrations made under the Palace windows by the people in their desire to express their joy at his Majesty's recovery. Only a few hours before the graver symptoms set in Professor Kraus had examined the patient and stated that he was no longer in any danger and that he had entered upon the convalescent stage. The Professor and his Austrian colleague were therefore about to embark for Piræus, where a destroyer awaited them. Thus if the Greek doctors, from nervousness at having to treat the King, and fearing to give him chloroform, performed their operation imperfectly, the distinguished German doctors' judgment was also at fault. On the other hand, it must be admitted that, although the first crisis may have been overcome by a miracle, the second yielded to the consummate skill of the Austrian surgeon, M. Eiselsberg, who performed the second operation with a local anæsthetic. After the operation there was an alarming rise in temperature and the pulse reached 155, but the patient's strength was kept up by serum injections. His Majesty is now free from fever, and though still very weak, he is steadily improving, and may be considered out of danger; but his convalescence will in all probability be very slow.

The Electoral Campaign.

The relapse of the King put a stop for the time to the electioneering campaign, which began again, however, as soon as his Majesty's condition improved. The Government published its electoral programme last Wednesday. M. Gounaris promises the introduction of a system of proportional representation and of decentralisation of public administration, modification of the Customs tariff, a more equitable distribution of taxes by increasing the direct and diminishing the indirect contributions, the foundation of a maritime bank and of a Greek assurance society, the formation of a large maritime mail company, measures for the benefit of the working class, solution of the agrarian question by reallotment of the large farms, and, finally, the State control of the raisin trade.

The reforms here promised are just those announced by M. Venizelos when he came into power, many of which have already been inaugurated by him, though his plans were hindered by the exceptional circumstances which embarrassed his Government. There is nothing new except the reform of the electoral system; but in Greece, where there are no parties apart from personal leaders, the introduction of proportional representation will not have the effect desired, for the candidates are too numerous, and will become more numerous still when the representatives of the minorities are included.

As regards foreign policy, the Government announces that it is willing to "admit, even during the international crisis, of any action necessary to guarantee the national rights and realize national aspirations, but remains firmly resolved to retain all territories already acquired."

The Device of the Government.

On the other hand, M. Gounaris takes every opportunity of reminding his electors that the return of M. Venizelos to power would mean war, without any guarantee of Greek territorial integrity, and he continues to accuse the ex-Premier of negotiating territorial concessions involving the sacrifice of large Greek populations, ignoring, as before, the promised compensations and the large Greek populations of Asia Minor which these would have united to the mother country.

The Reply of the Venizelists.

M. Répoulis, Minister of the Interior in the Venizelos Cabinet, replied to the above accusations, which he characterised as a "base calumny." He warmly defended the policy of his chief, and deplored the losses suffered by Greek interests through the policy of the present Government.

The view expressed in the Paris *Temps* that Italy's intervention has placed Greece in a much less advantageous position for negotiating terms has made a great impression on the public mind.

Probable Results of the Elections.

The sudden return of M. Venizelos to Athens and his action in going immediately to the Palace to present his respects and solicitations for the King's recovery have done much to restore him to his old place in the public favour. But the Government Press is unremitting in its efforts to prejudice the people against him, spreading false tales of his so-called intrigues, of the failures of the Allies in the Dardanelles, and of Germany's having promised to Greece what England has promised to Italy, i.e., Cyprus and the Dodecanese. Nevertheless, the victory of the Venizelist party is considered certain. It is only in Macedonia, where the Government candidates are supported by the Jews and the Turks, that they may be successful.

After the Elections.

The people will demand, by its vote, the return to power of M. Venizelos and his reconciliation with the King—if, indeed, this has not already been effected through the telegram of felicitations and sincere good wishes which M. Venizelos addressed to the King and his Majesty's reply, "Most hearty thanks," bearing his own signature. It remains to be seen whether, even in the event of the success of the Venizelist party, the health of the King will allow of any early change in the Government; for in the present trying circumstances the King would be faced with many difficulties, involving, probably, keen discussions, besides the usual formalities of presentation, signature of decrees, etc.

It seems probable, therefore, that the present Government will have to remain in power until the King is restored to health, perhaps even till July 20, when the Chamber meets again and will elect a President. The Government Press declares that if M. Venizelos persists in his policy of intervention, without making conditions with the Allies, the King will again oppose him and once more dissolve the Chamber, reinstating the present Government. The same papers maintain that the King would be justified in adopting such an attitude, because the Venizelist party did not make intervention part of its programme for the elections, so that the King cannot consider the victory of M. Venizelos as signifying the country's approval of this policy.

Lecture by the Italian Minister.

Count Bosdari, Italian Minister at Athens, in the course of a lecture delivered last week before the "Dante Alighieri Society," expressed regret that Italy's participation in the war had not roused any enthusiasm in Greece, but had on the contrary been rather coldly received, and had even given rise to expressions of distrust and hostility in the Athenian

* Delayed in transmission.

"Try a chota peg o' Perfection.
"Notice how mellow and silky it is?—not a touch of 'bite' or harshness. That's the effect of maturing in sherry casks. Makes it a little darker in colour, too.
"You'll order a case of Perfection?
"Well, everyone of 'ours' is doing the same. They all like it. Here's a toast, old man. Drink up—To Perfection, the best whisky in India, from the everlasting hills to the plains."

Digitized by Google

Press. Count Bosdari was at pains to prove that the fears of the Greeks were without any foundation. Italy, he said, had always favoured Greek interests, and had supported Greek claims in Northern Epirus, and he hoped to see these suspicions quickly dissipated and confident and cordial relations established between the two sister nations. Reminding his audience that Italy had always faithfully observed the principle of nationality, Count Bosdari spoke of the Dodecanese, saying that Italy might for political reasons be obliged to make some slight departure from the rule in regard to the islands, and as for Asia Minor, the territories there were vast enough to satisfy the claims of all.

The effect of these statements was the reverse of reassuring. Behind the high-sounding diplomatic phrases of Count Bosdari people detected Italy's intimation to Greece that she intended to keep all the Greek islands which she wrongfully refused to give up to Turkey.

The Press observes further that Signor Salandra stated the other day when speaking at the Capital that Italy would have occupied Chios if she had not been prevented by Austria—doubtless in this also she was anxious to demonstrate her respect for the principle of nationality! Finally, the Italian Minister is reminded of the vexations caused to the inhabitants of Rhodes by the Italian authorities, who forbade any national demonstrations in their churches or schools, and the *Athenae* asks Count Bosdari whether the Austrian Minister would have been allowed to speak at Rome of Trieste and its Italian inhabitants in the same light way as the Italian Minister had spoken at Athens of the twelve isles taken from Greece by his Government.

CYPRUS NOTES.

(From a Correspondent.)

Cyprus, June 11.

Officials and Service.

No encouragement is given to the younger officials to offer their services at Home; on the contrary, some who would gladly offer themselves are unable to do so. This seems very questionable policy on the part of the authorities. In these circumstances there is no apparent reason why a small local force of volunteers should not be organised, who could be drilled and practised in shooting. There is no lack of zeal and patriotism amongst officials, small as the numbers are, in all the districts of the island.

A Greek Patriot.

The unveiling of a statue of the late C. Sozos, who was Mayor of Limassol and member of the Legislative Council, and who lost his life while fighting for Greece in the Balkan War, will take place at Limassol on June 27. A marble memorial in honour of other Cypriot volunteers who fell during that war will also be unveiled. Invitations to be present have been sent by a local committee to the High Commissioner, the Greek Archbishop, the bishops, the Hellenic Consul, mayors of towns, and others. Speeches will be made by the Greek members of Council of the Limassol District.

GEOGRAPHICAL NAMES IN THE NEAR EAST.

Mr. Arthur R. Hinks, F.R.S., Secretary of the Royal Geographical Society, speaking on Monday evening last on the map which the society has compiled under the supervision of the geographical section of the General Staff of the War Office, gave an amusing account of the difficulties presented in the endeavour to find English spellings for Bulgarian, Serbian, modern Greek and other names. In the cases of Polish and other languages which use the Roman characters, but give them, or a slight modification of them, an entirely different significance, he said it was quite impossible. Thus a name which we commonly spelt Lodz was properly pronounced Woodsh. In the case of languages which used Cyrillic or other non-Roman characters transliteration was easy if there was an official spelling, but this did not always exist. Thus there was equally good authority for each of the three spellings, Bucureşcii, Bucureşci, and Bucuresti. Turkish presented the difficulty that many of the vowels were not written at all.

THE STATE OF SYRIA.

(From Our Correspondent lately in Palestine.)

Prior to Italy's declaration of war Syria was thrust into semi-obscurity; now, with Italy's entry into the conflict and the consequent cessation of the Italian steamship service, that obscurity has been rendered almost complete. The numerous friends of Syria will undoubtedly be interested to learn something more regarding the extreme plight of the unlucky country. The following narrative, therefore, which I succeeded in obtaining from an officer of an Italian steamer which was among the last ships to leave Syrian waters, may be of interest. The officer said:—

"Jaffa was the first port at which we touched. The number of boats that in ordinary times came off to the ship in order to land passengers had not diminished. Instead of disembarking passengers, however, they came with the object of buying food and some of the daily necessaries of life, which had totally disappeared from the market. Some destitute boatmen begged for food, while others described their terrible plight and destitution. Many unspeakable acts would these poverty-stricken and hungry boatmen commit in order to live. If murders, thefts, and assaults were everyday occurrences before the war, the state of public security must now be much worse.

"I could not elicit much information regarding the military preparations for the deferred invasion of Egypt, but I was told that the railway line running from Haifa to Nablus has been extended to Lydda, and that abundant railway material seems to be at the disposal of the Hejaz railway authorities. The construction of a further extension is still in progress.

"At such a time in a normal year, the Jaffa harbour would have contained not less than a dozen ships waiting to load oranges, but now not a single steamer was to be seen and the oranges are neglected. I welcomed the hour of the ship's departure from Jaffa, as I was anxious to be rid of the turbulent and begging boatmen.

"On the ship's approach to Haifa, once a thriving port, I was impressed by the silence of the place, which appeared like a cemetery. The agent boarded the ship and made his perfunctory visit, but, there being no mail and no passengers, the ship left at once.

"Beyrout presented a more cheerful aspect. Two powerful American cruisers are on constant guard there. The American College continued to show signs of life; for despite the effects of the war, it is still open, and lessons are given regularly. What does the S.P.C. apprehend as long as the Tennessee and the North Carolina keep vigilant watch? The American relief ship, Vulcan, which was the bearer of several hundred tons of provisions for distribution among the suffering inhabitants, was still in port. Her cargo had not yet been discharged, but the American Consul—whose great efforts on behalf of the safety and welfare of British subjects at the beginning of the war are universally appreciated—was endeavouring to procure for the provisions free and unmolested entrance through the Custom House. No agreement for an unhampered distribution had yet been arrived at, and it was feared that the Turks' insistence on appropriating a large part of the goods might compel the American authorities to abstain from discharging the cargo.

"The American community at Beyrout is rendering invaluable services to the people, and extending material assistance to the panic-stricken inhabitants. Relief in the form of money is distributed to the people, provided they work a certain number of hours daily; roads are being repaired, so that some streets are in a splendid condition now. The presence of the Tennessee and the North Carolina has also tended to assist the Beyrout shop-keepers and cafés.

"At Beyrout we received instructions to wait, as war was already in the air. Two other Italian ships were also awaiting instructions, so that in the event of Italy's entry into the war, the ships would convey Italian subjects to Italy or to another safe place. We had to remain three days at Beyrout, after which we steamed for Tripolis. It should be remarked, however, that at Beyrout the ship's agent who boarded the steamer on its arrival was not allowed to land until its departure, for fear of furnishing the boat's authorities with military information. In Tripolis no such restrictions are imposed. On the contrary, passengers were allowed to embark freely, and the ship took a cargo of silk.

"Our next destination was Alexandretta. From thence we proceeded to Mersina, where we took a cargo of cotton, sesame, and other cereals. A remarkable incident took place during the ship's stay at this port. Two natives were condemned to death on the charge of attempted escape from military service. One, a Christian, was hanged, while the other, a Moslem, was shot. On inquiry I discovered that such incidents often occurred on account of the considerable number of persons who attempt to evade military service. Apparently these measures had been adopted in order to impress upon the inhabitants the futility of attempting to escape."

NEWS FROM TURKEY

(From Our Special Correspondent.)

Athens, June 14.

Smyrna Quiet.

It was reported last week that the British and French subjects in Beyrout had been exiled to Urfa, and that those in Smyrna were to be sent to some town in the interior. This rumour has not, however, been confirmed. In fact, recent private information from Smyrna indicates that all is well there.

The news from Constantinople is indicative of a very disturbed state of affairs there, and the presence of British submarines in the Marmora and at Constantinople is highly disconcerting to the authorities, as it is now almost impossible to send troops and supplies to the Dardanelles by sea. Everything has now to go by train to Muradli, and from there to the Peninsula by whatever means is available.

The Coal Factor.

The shortage of coal is daily making the situation more acute, but in spite of the presence of the Russian fleet near the Bosphorus, a vessel now and then runs the gauntlet, and the other day the s.s. Zoungouldak got through with 1,800 tons. Considering how seriously the position at Constantinople is affected by the insufficiency of coal, the failure of the Russians all through the winter to make any real attempt to prevent supplies getting into the city is incomprehensible. The present situation might have been brought about last February had the Russians, upon the outbreak of war, adopted measures to stop coal going into Constantinople; but even now, when no Turkish warship ventures into the Black Sea, vessels flying the Turkish flag are able to go to the coal ports, remain there several days loading, and return to the Bosphorus. Even lighters, etc., at the loading ports are not destroyed. In the meantime the railway from Zoungouldak to Adabazar is, according to trustworthy reports, nearing completion, and when finished will enable Constantinople to receive regular supplies of coal.

The service of steamers on the Bosphorus is reduced to a minimum. The steamboat service on the Golden Horn is suspended altogether, and the only means of getting to the Princes Islands is by train to Maltepe and thence by small steamer.

Bread is obtainable in limited quantities, and only by means of a police ticket, and this leads to many struggles round the bakers' shops. This shortage of bread is not the result of want of wheat, but, rather, of the absence of fuel for the flour-mills, which are now at a standstill.

The papers definitely announce the arrival of one German submarine in Constantinople, and reports are current that three have entered the Dardanelles. It is rumoured that a large supply of ammunition from Germany for Turkey has been held up in Roumania; a certain amount of small shells, hand-grenades, etc., are apparently being made in Constantinople itself. Many German officers, travelling sometimes as professors, sometimes as commercial representatives, continue to arrive in the capital, but German and Austrian families are leaving.

The Spirit of Ottomanism.

The spirit of Ottomanism is stronger than ever, and every opportunity is taken to eliminate as far as possible anything European. For instance, signboards of shops must in future be written in Turkish, and a fortnight is allowed to carry out this change. The Greek schools must no longer be called "Hellenic," and one is almost afraid to make use of the name "Constantine," this name being to the Turks just now like a red rag to a bull. The Court Martial appears to be very busy with all sorts of trivial matters. A Turkish woman was sentenced to two months' imprisonment for not being veiled according to the prescribed form, and one, Sarikli Mehmet Agha, got five months for desecrating the Turkish flag by using it as a curtain!

The proprietor of the *Tanin* is now publishing a daily paper in French called the *Hilal*, but the "news" it contains is, of course, only from German sources, and the object of the publication, which is undoubtedly financed by the Germans, is to disseminate their own false information.

Taxes and Import Duties.

A law has been passed authorising certain taxation to provide funds for the support of widows and orphans of the soldiers who have been killed. There are three taxes: on telegrams and letters (letters must now bear additional stamps of 4 and 6 paras), on tobacco, and on spirits. The import duties have been raised to 30 per cent. Half of the duty on all such goods as may be required by the military authorities must be paid in kind. The municipal authorities have been authorised to collect and appropriate the rents on shops, etc., forming part of those foreign school buildings which have been seized.

The Government have announced that a *vecika* (receipt) for the purpose of future indemnification will be given to the proprietors of those houses which have been requisitioned by the military authorities, and during the occupation of such houses by the military the taxes will not be collected.

It is announced that the section of the Baghdad railway from Telahrad to Tuan in the Harran district, 62 kilometres in length, has been completed, and is open to traffic.

(From Our Correspondent.)

Odessa, May 30.

Russian Naval Activity.

The vigilance of the Russian Black Sea fleet, which is repeatedly making raids on the Turkish Black Sea coaling ports of Eregli and Zoungouldak, destroying each time numbers of colliers and transports, is evidently greatly upsetting the operations of the Turkish naval and military authorities.

Turkish prisoners, taken by the Russians from some of these transports, say that the German Ambassador in Constantinople found it necessary to issue a lying report to the effect that the Goeben had practically destroyed the Black Sea fleet, and guaranteeing Turkish sailors immunity from any danger; thanks to which declaration further Turkish transports ventured out to the coaling ports, only to find the Russian Black Sea fleet far too much alive to allow of their returning, the transports being destroyed and their crews sent as prisoners of war to Sevastopol. So much deceived were the Turkish sailors that, sighting a torpedo boat when near Eregli, they confidently concluded that it must be a Turk, and only discovered their error when escape was impossible.

Turkish Prisoners' Reports.

The Turkish prisoners, who were all very recently in the Turkish capital, all confirm that Turkey is in a terrible state economically, more so than she has ever been before. Gold and silver can be said to be no longer in circulation, Turkish officials remain unpaid since the commencement of the war, wheat and flour can no longer be bought, and many of the shops in Pera and Galata have closed down owing to the absence of fresh supplies.

Notwithstanding the danger from without, the prisoners say that the various political factions continue their strife unabated. In order to maintain their prestige, the Young Turks publish a daily bulletin of fresh Turkish victories by land and sea; but, in spite of the most stringent precautions, their opponents manage to issue and circulate proclamations advising the people not to believe the lying reports of the Young Turks, and recommending the people to revolt, to turn all the Germans out of Turkey, and to conclude a separate peace, as the only way out of the present impossible situation. The prisoners consider that the passage of the Dardanelles by an Allied Fleet will be the signal for a general revolt in Constantinople against the Young Turks and Germans. The Young Turk party appreciate this, and some of the best known of them have already departed from Constantinople; whilst the German officers and officials have taken the precaution of sending away their families.

Turks Short of Ammunition.

The Vice-Director of the Ottoman Bank, who has just arrived here and who left Constantinople only a week ago, brings word that the Turks' weakest spot is their shortage of ammunition. He also says that the Turks are feverishly fortifying Constantinople and that their German taskmasters will insist on their defending the capital to the last extremity.

The most important event in Russia's war with Turkey is the recent Russian occupation of Van, the ancient capital of Armenia, situated on the lake of the same name, and having a population now of about 50,000 people. The Turks are expected to make their next stand at Bitlis, on the south of the lake.

NOTICE TO SUBSCRIBERS.

Subscribers to "The Near East" who have left the Ottoman Dominions since the war will oblige by notifying the Manager of their new address as early as possible, so that the supply of the paper should not be unduly interrupted.

"The Near East" has largely increased its circulation in the United Kingdom since the war, and the Management is convinced that there are many people still who would be glad to know of its existence. Specimen copies will be forwarded post free if the names and addresses of friends are sent to the Manager, at 16-17, Devonshire Square, E.C

ROUMANIAN LETTERS.

(From Our Own Correspondent.)

Bucharest, June 7.

Political Rivalries.

The struggle for the presidency of the Conservative party continues with unabated vigour, and the situation has now become quite Gilbertian. A meeting of the Consultative Committee, attended by representatives from various provincial centres, was held last Sunday at the Liedertafel Hall, and led to a violent scene amongst the sightseers outside the building, fisticuffs being freely indulged in, sticks wielded vigorously, and even revolver shots being fired. Matters became so serious that the police were unable to cope with the situation, and the foot gendarmerie had to be hastily summoned to separate the combatants. While this was going on outside, the scene inside the building was but little less discreditable, all attempts at speaking by either side being howled down by the other. The final voting—if such it may be called—resulted in favour of M. Marghiloman; but he, feeling the position to be a precarious one, and at the same time not wishing to abandon it, declared that he would take M. Lahovary as his adviser. The result was, as one person present put it, "We came to get rid of one President, and now we have two."

The leader of the anti-Marghiloman party, M. Nico Filipescu, followed these proceedings up with a most violent article against M. Marghiloman, wherein the latter is accused of having corrupted some of the members of the Congress with foreign money—meaning, of course, with funds supplied by the German Legation. M. Marghiloman demanded a categorical withdrawal of these statements, which M. Filipescu declined to make in the terms desired. This led M. Marghiloman to send a circular telegram to all the Conservative organizations in the country, relating the facts and declaring that he can no longer treat with M. Filipescu and his associates. Doubtless this will lead to M. Filipescu and his adherents calling a meeting of the executive committee of the party to proceed with the election of someone else in place of M. Marghiloman.

External Politics.

As regards external politics, the position is a strange one. Things have quieted down to an extraordinary extent, and it might almost seem that, after all, Roumania would be content with a "thinking part" in the great European drama now being enacted. The negotiations with Russia have come to a deadlock, or, if local and Russian journals are to be believed, Roumania has increased her pretensions rather than decreased them within the last few days. For the *Novoe Vremya*, in a leading article, says:—

The Bucharest Government would like to obtain Transylvania, the Bukovina with Czernowitz, and the Banat up to the Danube. Besides these pretensions the Roumanian Government raises the question of the European Commission of the Danube. And apart from all this the Roumanian representatives in the discussions in London and Paris have raised the question of the alteration of the Roumanian-Bessarabian frontier. Such claims are regarded as excessive, and, we learn from official circles, all discussion between Roumania and the Triple Entente are at an end. From the same diplomatic source we are informed that the Austrian Government, through its representative at Bucharest, not long ago offered Roumania, in exchange for her neutrality, three districts of Bukovina (between Campulung and Dorna-Sabra), and at the same time the Cabinet at Vienna intimated its readiness to discuss a rectification of the Transylvanian frontier.

In connection with this the *Adeverul* states that it was known some time ago that Roumanian politicians had decided to act in unison with Italy, and that in January an agreement (verbal) was come to by which Roumania was compelled to take action as soon as Italy declared war on Austria-Hungary. Now, the paper goes on:—

Roumania pretends that the Italian Government did not let her know, even at the last moment, of its decision, and therefore this country considers itself freed from all obligations in the matter. A Roumanian diplomatist of high authority informs us that this country will follow an independent policy, and only its own interests will be taken into account. Judging by popular feeling, many are still convinced that Roumania will grasp the real situation and will desire to satisfy national wishes, which are for active intervention.

There may be a good deal of truth in the quotation from the Russian paper; but it is quite misinformed as to any question of the abolition of the European Danube Commission, for this is a matter that does not concern only Russia and Roumania. As to the Bessarabian frontier, too, the journal must certainly be misinformed. Admittedly the topic is often discussed by café politicians, but it cannot be imagined that either in the Roumanian Cabinet or amongst leaders of the Opposition there exists any idea of bringing up such a matter for discussion. Since the Russo-Turkish war Russia has afforded the Roumanians in Bessarabia a full measure of liberty, and there are very few of them who are able to form a considered opinion on the point who would wish to see any change made. A new generation is springing up; and though language, dress, and national customs are adhered to, some of the most faithful subjects of the Tsar are to be found amongst the Roumanians of Bessarabia. Therefore, the member of the *Novoe Vremya's* staff who invented the Bessarabian idea has not hit on a very happy subject for the display of his ingenuity.

New "Wireless" Station.

There is now in existence at Bucharest a wireless telegraphy station much more powerful than the older one. On Tuesday night the new station "spoke" to Athens, which replied, and messages have since been exchanged with the Eiffel Tower.

It is worthy of note that, wireless apparatus and material being uniformly contraband of war, every part of the new installation has been constructed in this country, partly at the State railway workshops and partly in those of the Post.

Italian Reservists' Departure.

The Italian reservists who leave to join the colours are made the objects of enthusiastic demonstrations. A party of about 800 left from the Filaret station on Tuesday amidst intense excitement, being conducted to the station by a large crowd, in which students were conspicuous, with music and Roumanian and Italian flags. An equally inspiring scene was witnessed at Braila when a party of reservists and volunteers from the Italian colony at the Jacobsdal quarries in the Dobruja arrived there, accompanied by the band of the colony and the greater part of its members.

Attempted Smuggling of Munitions of War.

The strict measures taken by the Roumanian authorities to prevent any munitions of war passing through this country has been met by all sorts of ingenious attempts at evasion on the part of the Germans and Austrians, who are extremely anxious to smuggle through to Constantinople the ammunition that the Turks so urgently need. The latest attempt—unsuccessful, like many before it—was to pack shells in beer barrels, and to send these—in one of those specially constructed trucks which the Teutons employ for the transport of their beloved beverage—through to Bulgaria, whence, one supposes, the rest of the transport would have been an easy matter. The senders, with characteristic thoroughness, even went to the length of ordering ice at different stations to renew that packed round the barrels. Unfortunately for these ingenious

gentlemen, the vigilant Roumanian Customs authorities insisted on tapping a barrel—with the usual result. Unfortunately for them, too, the forwarding agents are the Austro-German house of Schenker and Co., the same firm that formerly endeavoured to smuggle through a large quantity of ammunition which actually passed the Roumanian frontier and was only detected at Bucharest. For that offence they were mulcted in a fine of 10,000 frs., and now they have been forbidden to forward anything whatever over the Roumanian railways. It is of particular interest to note that the contraband consisted of, among other things, bombs containing asphyxiating gas and hand grenades.

BUCHAREST, June 13.

Negotiations with Russia Resumed.

At a Council of Ministers held on the 8th inst., M. Bratiano announced that the Russian Government had put forward fresh proposals, the terms of which, though far from acceptable to the Roumanian Government, made it possible to resume negotiations once more. A copy of the *aide memoire* sent by M. Sasonoff was handed to each member of the Council; and though the contents of this document have not been made known to the public, certain journals, which claim to know, state that Russia gives way on the question of the Pruth frontier, so that Czernowitz would become Roumanian, while as regards the Banat, proposals are made for a strategic zone that shall become Serbian. It is stated that the resumption of negotiations is due to the good offices of Italy.

One newspaper, generally well-informed on political matters, declares that the proposals of Russia vary but little from those previously made, save with regard to Marmorosch, which may be regarded as a step forward. The Note is couched in extremely friendly terms; but there is nothing at all to indicate that negotiations could be concluded on terms to induce this country to abandon its policy of neutrality for one of activity in the immediate future.

An Anti-War Meeting.

The grandiose demonstration of last Sunday is to have its sequel next Sunday, in a meeting announced in placards, posted about the streets, asking Roumanian citizens whether they wish to die, or see their children die, for the caprice of a lot of lunatics, epileptics, and criminals. These choice expressions are said by some to emanate from the German Legation, while others attribute them to M. Marghiloman and his supporters. What success will attend the meeting remains to be seen. On these occasions numbers go for very little; for sightseers are always more numerous than actual sympathisers; and it is for this reason, doubtless, that the meeting is called for a holiday, so that it may appear, to the uninitiated at least, to be of importance.

Battles of Flowers.

For some time there have been almost weekly battles of flowers, organised by one society or another, with a view to augmenting its funds. These have been held on the Chaussée, and have developed into something quite different from the orderly and innocent affairs one usually associates in one's mind with such things. Commencing at about 5 p.m., they have continued far into the night, and have spread from the Chaussée into the town and along the Calea Victoria. The last one or two appear, moreover, to have been attended by a class quite different from that they were intended to attract; and the rowdyism displayed has called forth many complaints from Press and public. As a result, the Prefect of Police, M. Corbescu, has very properly seen fit to issue orders that in future such fêtes must be confined strictly to the further end of the Chaussée, that no entrance fee whatever shall be charged, and that the "fighting" must be confined to the Chaussée only. (Hitherto, carriages have had to pay 40 frs., and motors 80 frs., while the public could look on, or join in, for a single lei.)

The Prefect's order is received with general approval, for it is felt that with half the world fighting, and with scores of Roumanians dying daily in the Austro-Hungarian Army, such displays of frivolity are entirely out of place.

More German Smuggling.

The cases of attempted smuggling of arms and ammunition by Germany, mentioned last week, have been followed by others. A few days ago it was announced that a number of new goods waggons for the Oriental railways were to pass through; and in due course some trucks, empty and innocent-looking in the beauty of their fresh paint, were actually passed on to Bulgaria. There, fortunately, a smart Bulgarian "smelt a rat," with the result that most of the trucks were found to have false bottoms, the space thus provided being packed with shells. Word was at once passed to the Customs authorities here, and about a score more trucks were seized. This should prove a useful haul for the Roumanian railways, which suffer from a chronic shortage of goods trucks.

The Conservative Party's Difficulties.

The crisis in the Conservative party is not yet over. M. Jean Lahovary, proclaimed chief of the party by M. Filipescu and his friends, acted in that capacity by publishing a notice in the *Epoca* setting forth his reasons for accepting the position. He shows that the Conservative party has always been in touch with the national aspirations; that from the first its representatives showed clearly that they were opposed to Roumania siding with the Central Powers; and that it was necessary for the country to act, and act on the side of the Quadruple Entente. From the moment that M. Marghiloman refused to conform to the wishes of the majority of the party he could no longer remain its leader. And, finally, the executive, by 36 votes to 34, withdrew the leadership from him and confided it to M. Lahovary.

Since then M. Marghiloman, in a speech to his supporters at Jassy, has declared himself in favour of action eventually—at the time of the Greek Kalends, one supposes!—and denies any pro-German sympathies. But he refuses to abandon the leadership.

German Propaganda.

In spite of their lack of success in this country, German propagandists are still active; and it is announced that the German agents who worked so actively in Italy are now to come to this country. As an example of the trivial means resorted to, it is credibly reported that, the news of the fall of Przemysl coinciding with one of those battles of flowers referred to above, the German agents, anxious to make it appear that Roumanians rejoiced at the event, paid people to join in the revelry. Two hundred people are said to have benefited by this means; and it is significant that at this particular fête the number of common people taking part in the "battle" seems to confirm the rumour.

The attention of the Minister for War has been called to the fact that the German agents have been distributing gratis in various barracks copies of the papers bought by their Government. A *communiqué* to the Press announces that this distribution will not be permitted in future.

KINDLY EGYPTIANS.

A correspondent writes to the *Westminster Gazette* giving some particulars of spontaneous demonstrations of sympathy with our wounded on the part of Egyptians, which are distinctly touching. He says:—

I have just heard from a young official who is taking in a number of wounded Australians, in a town south of Cairo. He tells me that the resident Egyptians were very much interested, and came to him repeatedly to ask about the wounded and how they were cared for; eventually many came privately to say they would like to help in the good work, and they brought money—one £8, another £5, and so on—which they asked him to send anonymously to the Red Cross Fund at Cairo.

I think it shows a very kindly feeling on the part of the Egyptians. Certainly no one would have asked them to contribute; but it was the sight of the wounded men which excited their interest. I may add that everyone likes, and everyone admires, the Australian wounded.

THE SOUL OF THE SLAV.

It was in a village in Old Serbia, in the beautiful iris-spangled valley of the Morava, that I became acquainted with the Royal Prince Marko, the legendary hero of Serbian epic. Or rather, it was there that I learnt to know, and partly to understand, the wonderful hold which the Prince has over his people, how he inspires and leads them on even to-day, more than 400 years after his death. It was evening, towards nightfall, and the scene was a village inn, a simple building of no intrinsic beauty, but one which was to live, a lasting memory, in my mind. A wandering minstrel, strolling from anywhere to nowhere, stopped at the inn in the twilight, and was asked by someone for a song. Simply, and without ostentation, the minstrel seized his *goussle*, and began reciting, accompanying his chant with notes from the primitive instrument in his hand. The men—sturdy, strong, well-set, hard-featured—listened in silence. Peasants and farm-hands, their wives and children, returning from the fields, paused when passing the inn, then stopped, listening intently, drinking in the *gousslar's* words with their eyes and ears, swaying with the narrative as corn sways in the wind, now dreading for the life of their hero, now battling fiercely with him against the oppressor, now exultant in his victory. "He is singing them one of the Prince Marko epics," whispered my companion, and I listened to words that I did not understand. Yet so powerful was the simplicity of the song, so tense, nay, magnetic, had become the atmosphere, that I, too, was swayed. For the soul of the Slav, that indefinable something which has throughout the dim ages of oppression kept alive the national ideal and reared strong men and brave women, had been quickened on this memorable evening in my presence, as it is quickened year in year out in every village where the Jugo-Slav awaits the return of Prince Marko, seated on his piebald charger.

The above scene was brought back to me the other day in the Victoria and Albert Museum, in the hall where Ivan Mestrovic is exhibiting some statuary and a model Slav Valhalla. The discussion of art as such is sterile. If really the Slav people look up to Mestrovic as their national sculptor, who can carve their ideal out of stone or out of wood, and help the epics in their noble task of keeping the glorious past alive, then, truly, he is a great artist, a great sculptor, for he will arouse the soul of the Slav among the people just as the unknown *gousslar* aroused it one night at the village inn in the Morava valley.

What are, in a few words, the chief characteristics of Mestrovic's work as revealed to us by the exhibition at South Kensington? Strength of line and mysticism. Yet rarely do the two go hand in hand; both are, however, characteristic of the Southern Slav. Their heroes are men of superhuman strength, strong as the Titans of yore, muscular as the gods of the Norsemen's sagas. Prince Marko rides through the land of epics, the strongest of the strong; and as such Mestrovic has given him to us in an equestrian statue devoid of a soft line, full of power and action. The Slav to whom it is shown for the first time will pause and look long at his hero. It will invoke in his mind the wonderful deeds performed by rider and charger on the plains of Kossovo; he will see him battle with the Moor in Istamboul, or emerge from his castle in Prilip to right some maiden's wrong. For such is the power of art. The same happens when our Slav spectator stands in front of that other heroic figure, the portrait of Milos Obilic, the avenger of the battle of Kossovo; he who slew the Sultan of the Turks. Here we have the same strong lines, the same play of light and shade on an intensely muscular body (would not Michel Angelo and Ribera have revelled in this semi-torso!). Doubtless the sculptor has carved other Serbian heroes in the same way, hoping that some day they may find a worthy resting-place in that Temple of Fame which he is striving hard to have erected on the plains of Kossovo. But the two alluded to suffice to show how Mestrovic has seized and perpetuated the Slav's conception of his superhuman heroes.

The mystic side of the young artist's nature is revealed in more than one figure at the exhibition; and, strange to say, it reminds me of the Spanish school rather than of any other. Both are steeped in piteous sorrow: the Mater Dolorosa of the Sevillian school and Mestrovic's bold series of weeping widowhood. His aim, he has told us, is "to sing of suffering, so that others may bear their suffering with more strength," and the result is this series of nude statues, powerfully carved, and invoking pictures in the lives of men and women: the soldier's departure for the battlefield of liberty, that battlefield some hours later covered with slain, among whom lies the soldier; and then, his widow mourning at home, and vehemently, yet with an intense love, kissing the infant in her arms. Free from all mannerism, without either the extreme suppleness of the Italian or the intense vigour of the "heroic" lines, these figures tell a sorrowful tale of poignant woe that must perforce appeal to the Serbs, whose sons and husbands have bled by thousands for their country's freedom and for the national ideal of the Jugo-Slavs. Here, again, then, Ivan Mestrovic can be said to have grasped the significance of the soul of the Slav and to have translated it into imperishable marble.

In the preceding paragraphs I have attempted to show how and why it is that Mestrovic can lay claim to being the national Jugo-Slav sculptor. The psychology of his people is known to him, and he can lead them as the *gousslar* leads them. There is affinity between the wandering minstrel singing his songs into the air as a bird sings and this sculptor who, instead of a *goussle*, wields his chisel with an intense sincerity that convinces his spectators and inspires them.

But, having thus analysed Mestrovic as an artist embodying the ideals of his race, we pass to his significance as an individual artist. Frankly, there is much that is chaotic, incomprehensible, and small about a work that is otherwise great. Germany—or rather Vienna—has spoilt him (*vide* the bas-relief "Salome" and his architectural motives), and he has an inordinate hankering after Oriental (Babylonian and Egyptian) motives. I think, however, that the young sculptor's genius, young as years go, will eventually steer clear of the conventionalities which, like so many pitfalls, lure him into side-tracks, there to be lost. Take a case in point. Where is the description of Sharatz showing his mane to have been close cropped? The equestrian statue of the Royal Prince Marko loses by this conventional treatment; the eye is drawn willy-nilly to the mane, the only long, jarring line in an otherwise harmonious composition.

These remarks, however, compared with the tremendous significance of Mestrovic as a national poet in marble and bronze, may appear superfluous. For art creators will go their own way, whatever the critic may say. After all, it is just as well that it is so, because otherwise we should adopt a conventionalism equal to that of Egypt at her worst. I do not think that there is much fear, however, that Ivan Mestrovic will fall into this net; he is too great a man, and he is young. Time will flow on, his style will mature, and he will leave the extravagant, the conventional, and small for the simplicity of line, theme and motive. Whereupon his national significance will become intensified, and the Jugo-Slavs will have acquired an eloquent exponent of that artistic culture to which Lord Robert Cecil referred in his opening speech at the exhibition last Thursday.

C. R.

IN MEMORY OF KOSSOVO.

On Monday, which was the anniversary of the battle of Kossovo, which was fought in 1389, and in which the Serbs lost their independence, the South Slav Committee organised a patriotic festival. At noon a solemn Requiem Service was celebrated in the Russian Church for the Serbian heroes who fell in the great battle and for all South Slavs who since Kossovo have died for their country. The service was attended by representatives of Serbs from Serbia, Montenegro, Bosnia, and Herzegovina, and by representatives of Dalmatia, Croatia, and Slovenia. Monsignor Smirnoff, who officiated, delivered a patriotic address, speaking of the brotherhood of all Slavonic nations.

At some subsequent proceedings M. C. Miyatovich spoke on the importance of the festival, and before separating cheers were given for King George and for the British Empire.

IN STRICKEN SERBIA.

(Being further extracts from letters written by Dr. Lauwens, of the Wounded Allies' Relief Hospital in Serbia.)

SALONIKA, May 9.

I have been obliged to come here myself to hunt up 216 packages—boxes and beds—which have been detained here for twelve days. To-day I have succeeded in getting them despatched, and to-morrow morning I return. The journey back will take thirty-six hours, and I was forty-eight hours in coming down here—two nights in the train without a wink of sleep.

KRAGUJEVATZ, May 13.

I am back at Kragujevatz, tired but glad to have made the journey, for I have been able to expedite matters, and especially to make arrangements for the expeditions that are to follow. At Nish, where I had to spend a few hours, I took advantage of the opportunity to visit the military hospital, and gathered some hints that will be useful in our establishment.

Two days ago a lot of our material arrived, and we are hard at work on making our hospital ready, which it is rapidly becoming. The epidemic is steadily diminishing, and the rate of mortality is becoming much smaller. We shall have principally surgical work to perform as soon as the offensive is taken in this direction, and I have telegraphed to the committee to send us chiefly surgical material.

May 20.

We are still working like niggers, fixing up baths, etc.—for they know nothing of such things in Serbia—and getting arrangements for laundry work ready. We have received splendid bedding for 100 beds, and certainly our hospital will be the best equipped in the town. We have had to unpack and erect the beds and bedding, and to supervise the workmen who are building and plastering.

On Monday morning we were informed that in two hours we should receive some patients. As our installation is not yet complete, they have sent us sixty-five patients suffering from exanthematic typhus from another hospital. For a large number of serious cases had arrived from the front, and it was necessary to clear one of the completely-equipped hospitals for their reception. Yesterday and to-day we have had further arrivals; to-day we are seventy-nine. So we have made a beginning! I am eagerly awaiting the surgical material that the W.A.R.C. has promised me; for there are amongst the typhoid patients many cases that call for operation—gangrene, etc., etc., while we are waiting for cases of war surgery.

The typhoid epidemic is still diminishing, but is far from being stamped out. Now preparations are being made to face the cholera if ever it should make its appearance.

Four more nurses have arrived, so that our party now consists of two doctors and six nurses, which is sufficient for a hospital of 100 beds. We have not yet received any news of the W.A.R.C., nor of the material that was sent off on April 23. So we are just doing the best we can. I have to be quite a Jack-of-all trades: carpenter, locksmith, cook, housemaid, treasurer, and even doctor. I speak English, French, German in turn, and sometimes it is quite amusing. We have four servants—two prisoners and two Serbians—to look after our house, and in the hospital we have two interpreters and eleven Serbian *infirmiers;* but things will not go on by themselves, and one has to be constantly on the look-out, and sometimes scolding.

May 27.

There is plenty of work. We have had patients since the 16th, and to organise a hospital where everything is lacking is most exacting work. One must think of everything, from the dish-cloths and the brooms down to the temperature charts and the medicines, keep the books in order, and supervise every detail. However, things are beginning to move. We are waiting for the surgical material from London in order to begin our real work. According to current rumours we shall soon have wounded here. Serious happenings are expected at the front.

PROPOSED ENGLISH ORPHANAGE IN SERBIA.

It is the desire of the Serbian Relief Fund to establish an English orphanage in Serbia for the assistance of the children who lose their fathers in the war. Writing to *The Times* in support of the project, M. C. Miyatovich says: "This most terrible and cruel war has made many a child in Serbia fatherless and motherless. Our best women, under the leadership of Mme. Pashich, the wife of the Serbian Prime Minister, have joined hands and hearts to save these orphans. But they lack sufficient funds to organize proper orphanages. They have to appeal to the charitable friends of poor children. Through the exertion of Mme. Pashich our French friends have generously enabled her to establish a French orphanage at Kraguyevats. But there are many orphans who could not find place there. The Society of St. Helena, of which Mme. Pashich is the president, intends establishing, if possible, a British orphanage at Uskub, organized and carried on on British lines and in British spirit. I appeal specially—but not exclusively—to British children and mothers to enable us by their help to establish and keep up such a British orphanage in Serbia. It would be a touching monument of British sympathies with the Serbians, one of the many stirring results of the Alliance with Great Britain, into which God's merciful Providence has led our nation." Contributions should be sent to the treasurer, Sir Edward Boyle, Bt., Serbian Relief Fund, 55, Berners Street, W., and earmarked "Orphanage."

SERBIA AND BULGARIA.

The Serbian Legation has authorised Reuter's Agency to issue a categorical denial to the semi-official statement published in Sofia to the effect that news from Macedonia continually makes mention of the murder and ill-treatment of the Bulgarian population in the villages of Podarjikon, Dobrovitza, Dragobrachta, and Vinitza, and in the districts of Palanka and Kotchani.

RUSSIA AND THE BALKANS.

The following quotation from an article written in English by the editor of the *Novoe Zueno* (the *New Link*) of Petrograd is interesting as showing at first-hand Russian opinion concerning the neutral Balkan States. The first portion of the article reviews the possible effect that Italy's intervention may have upon Sweden and Holland. The writer proceeds:—

The effect on Roumania is more precarious. . . . Roumanian diplomacy has conducted the pourparlers, about the "pay" for the help of Roumania's army parallel with Italy, but not with equal success. Italy had received on paper the promise of her reward. Roumania has not. The conditions of discussions about Ismail or Bukovina are certainly worse for her than they were before April 25. . . . The position of Bulgaria and Greece depends on that of Roumania. Greece cannot move if not sure of Bulgaria. . . . It was justly said months ago that the key of the situation of the whole Balkan imbroglio lies in Sofia. What diplomacy has failed to realise until the very last moment was that this key can be placed in our hands not by demonstration of diplomatic weakness and pourparlers about the reward of Bulgaria, but by definite terms dictated to Sofia through Bucharest and Athens.

THE ANGLO-SERBIAN HOSPITAL.

Mr. James Berry, F.R.C.S., Senior Surgeon of the Royal Free Hospital, who is at present in charge of a Hospital at Vrnjatchka Banja, Serbia, writes, on May 31:—

I have just telegraphed again saying that I feel obliged to stay out here a while longer. I have been specially asked to do so, not only by the Serbian War Office but also by the Serbian Government and by Sir Ralph Paget, with whom I have been in frequent communication. There are plenty of doctors of all nationalities out here, but there are hardly any surgeons of hospital standing and experience at the present time, and so far as we can tell there will be a great deal of work before long. The head of the Army Medical Department was over here some ten days ago, and he has given a definite assurance, both to me and to Sir Ralph Paget, that if there is fresh fighting, we shall have numbers of serious freshly wounded cases to deal with here. Indeed, I have heard some talk of making this place a great centre for surgical cases. Our hospitals and sanitary methods appear to have made considerable impression here in Serbia. These are not ordinary times, and I have to consider first of all how I can be of most use to the common cause. In England there are hundreds of surgeons who can do my work there just as well as I can, but there are probably hardly any who could run this place satisfactorily. We have now built up a huge organisation of six separate hospitals in different parts of the town. We have an aggregate of over 300 beds, although at the present time only about 130 are occupied, as we are waiting for freshly wounded.

Colonel Gentchitch, Head of the Serbian Army Medical Department, expresses the hope that arrangements may be made by the British Committee for continuing the work which has been of so much service to Serbia. The administration of the Anglo-Serbian Hospital is under the supervision of a Committee in London, of which Mr. W. H. Dickinson and Sir Francis Layland-Barratt are active members. Further donations for the work will be welcome if sent to Mr. Reginald Garratt, Royal Free Hospital, Gray's Inn Road, London.

ARMENIANS IN PERSIA.

Writing from Ispahan on May 19, the day after the murder of the chief of the Russian Bank in that city, Mr. Allinson, a C.M.S. missionary, said: "The Britishers are all perfectly calm, and there is no need for distress; the mission work is going on as usual." For some time the people in Julfa (the Armenian suburb of Ispahan) had been greatly disturbed, but Mr. Allinson says: "The Archimandrite of the Gregorians addressed a special letter to the Government in Teheran, which was quickly followed by a visit of the Ispahan Governor to Julfa. The latter assured the Armenians that he was fully alive to all the rumours; that he was personally responsible for all Europeans and Christians; and that his arrangements were ample for all eventualities."

THE SUDAN SUMMER.

(FROM A CORRESPONDENT.)

The most trying time of the Sudan summer season has commenced—that of the *habub* visitation. The first dust storm afflicted Khartoum on May 29, and, although proving far less savage than usual, its force sufficed to break down several of the fine trees which form so great an attraction of this city. No one who has failed to witness a real *habub*, or who has not been caught in one, can form any idea of its unpleasantness, or of the damage than it can occasion. The storm can be seen approaching at a distance of several miles, and when at its full blast neither man nor beast can stand up against it. The fine, powdery particles of sand, which feel to the skin as sharp and as penetrating as needle points, fill the atmosphere for fifty or sixty miles around, rendering objects invisible at a distance of more than one-half mile. Sometimes the storms, which arise and subside quite suddenly, will endure from nine o'clock in the morning to four or five in the afternoon, while so dark and dense becomes the air that travellers lose their way, and occasionally have been known to die upon the road. Formerly, troops on the march suffered terribly from these visitations; there is upon record the instance of an entire convoy on the march from Korosko to Abu Hamed having been destroyed by a violent wind. This was in 1897; while in the summer of 1891 an air-wave of a particularly dense description caught a party of Egyptian cavalry under similar circumstances, many men and horses being lost. The districts of Tokar and the Red Sea Littoral suffer the most heavily, as a rule.

HEAT AT KHARTOUM.

The excessive heat at Khartoum of the last three weeks of May, during which period, says the *Sudan Herald* of June 5, the average daily maximum temperature exceeded 110 degrees, has taken heavy toll of the City of London Regiment now serving in Khartoum, for they have lost no fewer than four of their number during the past week, all of whose deaths were either directly or indirectly attributable to the oppressive heat. Despite some months' sojourn in Malta, before arrival in the Sudan, the heat has proved more trying to the men of the battalion as a whole than that of the island.

"The duty (continues our contemporary) the battalion is performing here, though without doubt irksome to those whose very existence is one great longing to come into violent contact with their country's enemies, is none the less an essential duty, and no light part in the scheme of Empire, and one the value of which will not, we feel sure, be underestimated by our countrymen throughout the Empire when the history of our world-wide campaign comes to be written."

CEREBRO-SPINAL MENINGITIS IN THE SUDAN.

With regard to the epidemic of cerebro-spinal meningitis in the Sudan, the *Sudan Times* says:—

We are glad to be assured (from an authoritative source) that the spread of disease should not cause any undue alarm. It is already abating in the southern districts of the Sudan, where it first made its appearance, and seems to be moving northwards. It may continue to spread, in spite of all efforts, through the month of June; but in all probability, judging by past experience, it will disappear after the beginning of the rainy season. In this connection we may state that the greatest difficulty which the medical authorities are finding arises from the fact that the natives of the villages in which the disease appears do not inform the Government about such cases until several deaths have occurred, then they are alarmed and always make haste to inform the Government, appealing for help. Under such circumstances, the contagion would already have spread to a wider extent than the authorities can trace, and the next thing they know about it is when another appeal comes to them for help from a district hitherto considered unaffected.

HELP MONTENEGRO!

THE SMALLEST AND POOREST OF OUR ALLIES.

THE MONTENEGRIN RED CROSS AND RELIEF FUND

Donations can be sent to her Grace the DUCHESS OF RUTLAND, 16, Arlington Street, S.W.; or to the Hon. Treasurer, LADY ROPER PARKINGTON, 58, Green Street, Park Lane, W.

BRITISH HELP FOR MONTENEGRO.

Dr. Clemow's friends and admirers will read with peculiar interest and satisfaction the following official telegram which Sir J. Roper Parkington, Consul-General for Montenegro, has received from Cettinje:—

The doctors, nurses, and assistants of the English hospital mission have been received in Montenegro with the greatest enthusiasm and most sincere gratitude. Their ceaseless activity and boundless energy have proved most helpful, and numberless wounded and sick Montenegrins already owe their recovery to the skill and attention so willingly bestowed upon them. On Thursday last, the King received Dr. Clemow in private audience and most cordially thanked him and his devoted colleagues for all the benefits conferred upon his subjects. At a banquet in honour of Dr. Clemow and the members of the English mission, given by the "Croix Rouge" of Cettinje, the Minister of Public Instruction spoke in the warmest terms of the invaluable services rendered by the generous British nation in providing these hospital contingents, which had proved so great a blessing in a time of dire need. The Minister concluded his remarks with a touching reference to the deep gratitude all Montenegrins felt for the self-sacrificing hospital workers, and for the generous contributors to the fund which had made these missions possible.

MISSIONARIES IN PALESTINE.

The Church Missionary Society has heard through Government channels that the U.S.A. Consul-General at Beyrout received a letter from Miss Lawford, the C.M.S. missionary who still remains in Palestine. This letter is dated March 25, and it states that she and Miss Johncock and Miss Croft (nurses of the Edinburgh Medical Mission) believe that they are doing a good work in Nazareth, and that under the circumstances it is their duty as missionaries to remain there. Miss Lawford said in her letter that the head officials had been most kind and helpful.

Dr. Hoskins, American Presbyterian missionary of Beyrout, wrote on April 17, sending letters from the Rev. I. Baz, of Jerusalem, and the Rev. S. Saba, of Haifa. These show that the native Church work is going on regularly and without opposition, excepting in Jaffa and El Husn. The pastor (the Rev. B. Musa), the catechist, and the schoolmasters in Jaffa and district, after being imprisoned in Damascus for nearly four months, were allowed to rent a house there.

Why You Should Read
Public Opinion

Edited by PERCY L. PARKER.

PUBLIC OPINION'S greatly increased and increasing circulation since the war began shows that it fulfils a most useful purpose to-day by way of inspiration and information. It gives a magnificent analysis of all the great problems—social, political, financial, and religious—arising out of this War of Nations which will alter the whole of life for the present generation.

The world will have to begin a new chapter of living as the result of this war. Long after it is ended we shall be face to face with the most vital problems of human conduct which have ever engaged the human race.

A more consistent ethical line of conduct and a simpler method of life will be necessary all round if we are to come out of the ordeal successfully; and a tremendous reconstruction of human society on an ethical basis will be one of the most urgent duties of the day forced upon us by events.

If you wish to get at the heart of what men and women are doing, thinking and saying about all these great problems you should read PUBLIC OPINION each week. No other paper takes its place. It is unique and is read by an increasing number of thoughtful people all over the world.

PUBLIC OPINION

can be sent to any address in the United Kingdom for three months for 2s. 9d., or to anywhere in the world for 3s. 3d. Yearly subscription to the United Kingdom 10s. 10d., or Abroad 13s.

FRIENDS ABROAD

Everyone who has friends Abroad should send a copy of PUBLIC OPINION to them each week. It is the best for the purpose.

TWOPENCE WEEKLY.

FREE SPECIMEN COPY

will be sent to any address on receipt of a post card by THE MANAGER, PUBLIC OPINION, 32, TEMPLE HOUSE, TALLIS ST., LONDON, E.C.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE FUTURE OF CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—With reference to the letter of Mr. Kenneth H. Ledward, who comments on a letter of Mr. George L. Houston, published in THE NEAR EAST of June 11, regarding the future of Cyprus, the arguments of the former do not appear to carry much weight. If we have been right in holding Cyprus for thirty-six years, there seems to be little reason for interrupting our work of regeneration in the island. (1) The argument that we are fighting for the principle of nationality, though true, has been overworked. If we were to abandon our hold on the ground of nationality only, the map of our Empire would undergo very considerable shrinkage. Moreover, the Moslem community of Cyprus, though relatively small, has been consistently and genuinely loyal during the whole of our occupation, whereas the Greek agitation, which has been persistent and has caused considerable trouble, has bordered on sedition. Full regard is certainly due to the Moslem population. (2) Though Cyprus has not been, for obvious reasons, "a paying concern," it is now paying its way, and on the direct road to a recovery of its prosperity. The statement that famines are frequent will, I believe, not bear examination. There is nothing to show that abandonment would not at present be, from a strategic point of view, a blunder. (3) The compensation which M. Venizelos seeks in return for Greek intervention in the war does not—as far as is generally known—include the cession of Cyprus. The administration of such territories as Greece is likely to acquire, in Asia Minor or elsewhere, would demand her full attention for many years to come.

If we were to abandon Cyprus to Greece not only would our work for regeneration be arrested, but there would be rapid retrogression. The state of the island is in many respects comparable to that of Egypt, as regards the results achieved and the evolution of order out of chaos. Lord Milner and Lord Cromer have shown clearly how disastrous, both from a material and moral point of view, would be our abandonment of Egypt to any Power that would not or could not govern on our lines. The future of Cyprus, if in question, will no doubt be settled on wide political grounds, in full agreement with our Allies; but no one who knows Cyprus can doubt that, as regards the welfare of the Cypriot people, the continuation of our administration for a long time to come is essentially the best outlook.—I am, etc.,

BRITON.

June 30, 1915.

SERBIA AND BULGARIA.

To the Editor of THE NEAR EAST.

Sir,—Mr. Janitsch, in your issue of the 21st last, has sounded the signal for retreat, and I trust this will be the end of our discussion. Just a few words more. Mr. Janitsch is simply audacious, with no notion of responsibility for what he advances or the authority he cites in support of his contention. Just an instance.

I consider Sir Arthur Evans among the best authorities on the question of nationalities in Macedonia. Mr. Janitsch cites Sir Arthur, and says: "I do not know any English scientist acknowledged as an authority concerning the Slav languages and ethnography who asserts that the Macedonians are Bulgars. On the contrary, I know some of the English scientists who do not think so. Let me only mention the name of Sir Arthur Evans. . . ." Now, I happen to know very well Sir Arthur, and to remember the last visit he paid to Macedonia was about 1888. He travelled through Sofia and viâ Kustendil, accompanied by Mrs. Evans and Mr. Allan, then residing in Sofia. Sir Arthur's object was an inquiry in Kratovo, the traditional burial-place of Serbian kings during the forty to fifty years of Serbian rule over Macedonia. He was very anxious to award some portion of Macedonia to the Serbians on ethnographical grounds, and was in hopes of finding in Kratovo, if anywhere, traces of Serbian language or tradition. Mr. Allan, after experiencing the peculiar methods of the Turkish police, came back to Sofia and communicated to me the conclusion Sir Arthur had arrived at: "No, I cannot find anything Serbian here; everything is Bulgarian."

Sir Arthur had, at that time, another anxiety—to award the town of Pritep to the Serbians, *because it had been for a few years the capital of a Serbian prince*, Kral Marks, vassal to Sultan Bayazid, the Thunderbolt, in the end of the fourteenth century. Kral Marks fought equally well against the Christians as against the Turks. He died fighting on the side of the Turks against the Vlachs (now Roumanians) in 1394. He is, however, the subject of heroic songs and extraordinary but popular traditions. These heroic songs and traditions are common to the Bulgarians as well as to the Serbians; they are, however, more national in Serbia than in Bulgaria. I remember well Sir Arthur had no idea of awarding this Bulgarian district to the Serbians *on ethnographical grounds*.

Sir Arthur has crossed and re-crossed Macedonia, has studied the nations there, and has written and published sketch maps in the *Manchester Guardian* and elsewhere, giving the frontier lines beyond which, according to his knowledge, such or such nationality had not right of claim. Never to my knowledge has Sir Arthur given to the Serbians any part of Macedonia that the Bulgarians claim on ethnographical grounds or by the rights of treaty.

Sir Arthur and Mr. Allan are alive and, I trust, well. They can speak. *Ab uno disce omnes.*—I am, etc.,

Sofia, June 8, 1915. P. M. MATTHEEFF.

BRITISH REFUGEES FROM TURKEY FUND.

To the Editor of THE NEAR EAST.

Sir,—The "British Refugees from Turkey Fund" was initiated by Lady Neave and some friends in January. On February 10 an urgent request by telegraph was received from H.B.M.'s Minister at Athens, asking for £1,000. At that time the fund had scarcely collected £100, but with the united efforts of the Executive Committee sufficient was subscribed to send to those in distress, not only in Athens but in Constantinople, Syria, and Paris, and to assist British refugees in England. No further testimony is required as to the utility of our work than these words of Sir Francis Elliot's:—"Not only has your help been invaluable, but also indispensable in helping British refugees stranded in Athens, and I regret I cannot say we shall not require further assistance from the fund. More and more is still needed."

The committee of this fund wish to thank all those who have so generously responded to their appeal, and hope that the following brief summary of the work already accomplished may be of interest to them:—

	£	s.	d.
Total received	2,267	7	8
Remitted to Constantinople (for distribution through the American Embassy)	620	0	0
Remitted to Athens (for distribution through the British Legation)	750	0	0
Payments in England (through the Committee in London)	278	7	4
Remitted to Dedeagatch (through Mr. Morgan)	80	0	0
Remittance to Paris	5	0	0
Administration Expenses	6	16	4

In many cases loans have been made which are being repaid, but the calls on our resources are still urgent, and subscriptions will be gratefully received.

BOOKS FOR OUR SOLDIERS.

To the Editor of THE NEAR EAST.

Sir,—I think you will be interested to hear that many people have sent us books through seeing your notices in THE NEAR EAST. I thought you would be glad to know about this.

I am sending you a copy of the letter received from India this morning, which shows how much the books are appreciated out there.—I am, etc., EVA ANSTRUTHER.

Depôt for the Camps Library,
22, Earl Street,
Westminster, London, S.W.,
June 23, 1915.

[COPY.]

The Hon. Secretary,
Camps Library,
London.

Madam,—I have received from the Adjutant-General, India, a parcel of books for the use of the N.C.O.'s and men of my unit, sent from the Camps Library. Please accept my best thanks. There could be no more acceptable present for the men at the present time when, owing to the hot weather, they are obliged to remain in their bungalows during the greater part of the day.—Yours very sincerely,

(Signed) R. K. HARVEY, Lieut.-Colonel,
Commanding 1/5th East Surrey Regiment.

Cawnpore, May 26, 1915.

NEAR EAST BOOKSHELF.

ROUMANIA AND THE GREAT WAR.*

Dr. R. W. Seton-Watson has already laid the reading public under an obligation by his collaboration in "The War and Democracy," which holds pride of place as the best book in a short compass on the circumstances leading up to the war and the issues at stake. He now supplements this good work by a monograph on Roumania, based, as he reminds us, on a lecture delivered to the Royal Scottish Geographical Society. Here, in a few pages, Dr. Seton-Watson takes us hurriedly through the salient features of Roumanian history with a view to offering an estimate of Roumanian policy in relation to the war. The origin of the book precludes any elaborate inquiry into the antecedents of the Roumanians, or a full account of present-day conditions in the country. It offers the general reader, however, a comprehensive view of the stages by which Roumania has reached her present position, a clearer appreciation than the average Briton already has of what that position actually is in relation to the Great Powers and the Balkan States, and a sympathetic explanation of Roumania's delay in ranging herself unreservedly on the side of the Triple Entente.

The ignorance prevailing in Great Britain of Roumania and Roumanian affairs is mainly accidental. During the period in which the British public has manifested an increasing interest in foreign politics Roumania has contrived to maintain the even tenour of her way. Her military exploits in 1876 would probably have made a more lasting impression in this country if they had not been achieved at the expense of the Turks, whom we have allowed to monopolise for so long most of the sympathy and interest our foreign policy has been able to spare for the Near East. From that date Roumania appeared to be completely absorbed in the Austro-Hungarian and Russian orbits; she was spared the unenviable notoriety which attached to the domestic politics of the other Balkan States, and she lay off the main route from Western Europe to Constantinople, which clung to the unbroken train journey through Belgrade and Sofia, in preference to the no less interesting and more picturesque route over the Carpathians with a sea passage from Constanza, through the Bosphorus. Interest in Roumania revived slowly with the discovery of her commercial and industrial potentialities; but up to the outbreak of the second Balkan War the country did not command in Great Britain the attention it deserved, in view of the fact that the Roumanian Army takes rank immediately after those of the six Great Powers, while her trade almost equals in volume the combined trade of Serbia, Montenegro, Bulgaria and Greece. That trade, moreover, is backed by one of the great wheat granaries of Europe and the fourth largest oilfields in the world.

Now that the British public has "discovered" Roumania and has been led to expect her co-operation with the Allied Powers, it has reason to regret the policy of neglect, diplomatic, national and commercial, which has been adopted towards the Roumanians in the past. The interval of waiting for the Roumanian Government to take action cannot be put to better use than by gaining some insight into the considerations which on the one hand impel Roumania to make common cause with the Triple Entente, and on the other hold her back from military action at this juncture.

In desiring the incorporation of Transylvania, the Roumanians are actuated by something more than a platonic desire to round off the boundaries of their kingdom by the inclusion of their kinsmen on the other side of the Carpathians. They are urged on by the thought of all the oppression and injustice that has been the lot of these people for generations. Throughout this period the Roumanians of Hungary have shown themselves at one with their fellow countrymen by their contributions to the common fund of the race, alike in politics, in literature, and in economic progress. For this reason Dr. Seton-Watson lays emphasis on the situation of the Roumanians in Hungary. On the other hand, in the history of the Roumanians in Bessarabia he finds "an almost complete blank." He states the causes, and adds:—

> There is no such national movement as in Transylvania, and Bessarabia's contribution to the stream of Roumanian national life has been almost negligible. While Transylvania has supplied Roumania with a long succession of poets, journalists, doctors and politicians, Professor Stere, the distinguished Liberal deputy and economist, stands alone as the representative of Bessarabia."

In the negotiations now pending with Russia, it is understood that the question of Bessarabia has not been raised, and our author does not allow that province to appear in his estimate of "the new frontier and a just settlement."

Another point which this book clears up is the connection between Roumania and the late Triple Alliance. The secret military convention for defensive purposes was, as far as Roumania was concerned, "exclusively the work of King Charles himself, who, in recent years, had more than ever kept foreign policy in his own hands."

> Hence the remark addressed to the late king at the Crown Council held on the outbreak of war, when he failed to win support for his scheme to render aid to Austria. "In peace time it was possible for your Majesty to follow a policy contrary to the sentiment of the country, but to make war in defiance of that sentiment is impossible."

But if the sentiment of Roumania is wholly on the side of the Triple Entente, why does she delay to enter the struggle? Dr. Seton-Watson offers a variety of reasons:—Military unpreparedness (though he falls into a not unnatural error in supposing that the Roumanian army marched against Bulgaria in July, 1913, with anything like "extensive armaments." It was singularly ill-equipped with artillery, and remained so until after the outbreak of the present war); the need of intervening when she can hope to turn the scale without a long campaign; the equivocal attitude of Bulgaria; German intrigues having for their object misrepresentation of the Allies' intentions; uncertainty regarding the future of the Dardanelles. At the present moment we know that Roumania still holds back because she has been unable to obtain from Russia the terms she requires. Dr. Seton-Watson sketches the frontier which an equitable allocation of territory would give Roumania. It cuts athwart what the Roumanians are asking and what the Russians are prepared to give. Perhaps eventually they will agree to compromise and accept his verdict. The line of the Theiss he characterises as "merely ridiculous," adding that its acquisition would involve the occupation of the purest Magyar districts in Hungary, and even Debreczen itself, "the stronghold of Magyar Calvinism." He holds, too, that "the Serbian claims to the Western Banat are unanswerable on racial grounds, while on strategic grounds they are, if possible, even more overwhelming."

Appendices on the racial distribution in Hungary and an ethnographical map complete the valuable monograph.

* "Roumania and the Great War." By R. W. Seton-Watson, D.Litt. (Constable and Co., Ltd. Price, 2s).

Tales from Five Chimneys. By Marmaduke Pickthall. (Mills and Boon. 6s.)

FOR THE WOUNDED.

To the Editor of THE NEAR EAST.

Sir,—A parcel of books arrived here to-day, and were quickly distributed among the men. As I keep a very sharp eye on them and see that all are returned and carefully dealt with, the library is a source of great pleasure to everyone—patients, both officers and men, and the staff. We have something to suit nearly everybody's taste now I think. One officer shouted with joy when he saw "Hajji Baba." I am very grateful, it gives the men such a great pleasure. They make a dash for books and papers as soon as they get into the wards. I have received the invoice for the beds to-day, so I shall soon be able to tell you of their arrival.—With many thanks, I am, etc.,

K. H. WHEATLEY.

June 24, 1915.

The following is a final list of subscriptions received by the Editor of THE NEAR EAST for Nurse Wheatley's appeal for seven beds for the wounded under her care:—

The Staff of the Imperial Ottoman Bank	£3	3	0
The Hon. Mrs. Sackville-West	1	1	0
Mrs. Bullard	1	0	0
Andrew Ryan, Esq.	0	10	0
J. P.	0	10	0
"Sphinx"	0	8	0
D. S.	0	5	0
"Baghdadi"	0	5	0
Dr. J. Leigh	0	5	0
"Gippie"	0	5	0
F. E. Roe, Esq.	0	5	0
J. M. Ruedi, Esq.	0	5	0
J. Bee, Esq.	0	2	6

The cost of the seven beds, including insurance and freightage to Southampton, is £8 4s. 6d.

BOOKS OVER 1,000,000 VOLUMES ON ALL SUBJECTS, including Commercial, Educational, Political, Military, and all Foreign Languages, etc., etc. Accountancy and Law Books a speciality. Text Books for every Examination SECOND-HAND AT HALF-PRICES. New at 25 per cent. Discount Send for Catalogue No. 145 (post free), and state wants. Books Purchased. W. & G. FOYLE, 121-123, Charing Cross Road, London, W.C., England.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1915. July	1915. June		1333. Shaaban	5675. Tamuz
2	19	Friday	19	20
3	20	Saturday	20	21
4	21	Sunday	21	22
5	22	Monday	22	23
6	23	Tuesday	23	24
7	24	Wednesday	24	25
8	25	Thursday	25	26

To-day is the birthday of H.R.H. Princess Marie of Greece, wife of Prince George, who was born at St. Cloud, in 1882.

To-day is also the birthday of H.R.H. Prince Olaf of Sweden, who was born at Sandringham, in 1903.

Tuesday is the birthday of H.R.H. Princess Victoria, second sister of the King, who was born at Marlborough House, in 1868.

On Tuesday afternoon the King visited Sir A. Fripp's hospital, 17, Park Lane, and decorated some of the officers there. Amongst those thus honoured was Captain A. Carton de Wiart, 4th Royal Irish Dragoon Guards, who was invested by His Majesty with the insignia of a Companion of the Distinguished Service Order.

The Sultan of Egypt has created a special dignity, the Riasset, for bestowal only upon Prime Ministers.

The *Egyptian Gazette* understands that the Sultan intends to make a motor tour in the provinces of Lower Egypt after the month of Ramadan, and that the three new touring cars recently ordered from Europe are to be used for the purpose of the tour.

Under date of the 24th ult., Reuter's Amsterdam correspondent reports:—A telegram from Constantinople states that the Sultan has been successfully operated upon for stone in the bladder on the advice of Professor Israel, who was summoned from Berlin.

The Aga Khan has arrived in London from France, and is staying at 40, Wilton Crescent, S.W.

Sir Edward Grey has returned to town, but has not yet resumed his duties at the Foreign Office.

On the invitation of the Lord Mayor, Earl Kitchener has consented to address a meeting at the Guildhall next Friday afternoon on the subject of recruiting for the Army.

M. Andre Radovitch, ex-Prime Minister of Montenegro, has arrived in this country on a special mission from his Government to Great Britain and France in connection (Reuter's Agency is informed) with supplies and equipment for the Montenegrin Army. On Monday he had a conference at the Foreign Office and was also received by Lord Kitchener.

Mr. Noel Buxton, M.P., and Mrs. Buxton gave a luncheon party to meet Madame Pasitch, the wife of the Serbian Prime Minister, at the Hyde Park Hotel on June 25. There were present Lord Crewe, Acting Foreign Secretary; Lord Robert Cecil, Under Secretary for Foreign Affairs; Mr. Herbert Samuel, Postmaster-General; Lord Newton; Sir Edward Boyle, Hon. Sec. of the Balkan Committee; Monsieur Mestrovitch, the Serbian sculptor; Lady Grogan; Sir Arthur Evans, F.R.S.; Dr. Seton-Watson; Mr. C. R. Buxton; and others.

Field-Marshal Lord Methuen inspected on Saturday the Malta Corps of the St. John Ambulance Brigade for overseas service. The inspection took place at the Palace square in the presence of a large gathering. The Governor delivered a speech, in which he referred to the good work performed by the Association.

Mr. R. Pasitch, son of the Serbian Prime Minister, arrived in London last week.

M. Vesnitch, the Serbian Minister in Paris, whose arrival in England last week was reported in these columns, spent the week-end in the country on a private visit, and on Tuesday he left London for the Continent.

H.E. the Roumanian Minister was amongst the callers at the Foreign Office on Tuesday.

The Marquess of Crewe, Acting Foreign Secretary, received the Greek Minister at the Foreign Office on Wednesday afternoon.

Telegrams received from Bucharest announce that M. Jean Lahovary, one of the most prominent Roumanian statesmen, died suddenly on Sunday of heart disease. He was formerly Foreign Minister, and was quite recently elected as leader of the Conservative party, in circumstances that are fully described in our Bucharest Correspondent's letter.

Halil Bey, President of the Ottoman Chamber of Deputies, stopped in Sofia on his way back from Berlin to Constantinople, and had an interview with the Bulgarian Prime Minister, M. Radoslavoff.

A marriage has been arranged between Dr. A. R. Neligan, Physician to the British Legation at Teheran, and Kate Mary Leigh Spencer, eldest daughter of the Rev. G. L. Spencer and Mrs. Spencer, of The Priory, Clifford, Herefordshire.

Mr. H. P. Kingham, manager, and Mr. H. Hodgson, of the National Bank of Turkey, arrived in England last week from Constantinople, having travelled by way of Nish and Salonika.

On Tuesday Lady (Ralph) Paget presided at a children's meeting held at the Mansion House in connection with the Serbian Relief Fund. Mr. Crawfurd Price gave a suitable address, illustrated by lantern views. Madame Pashitch was present.

Mr. H. E. Poynter, formerly of the Ottoman Public Debt Administration, has been given a commission as lieutenant in the Army Service Corps.

A branch of the Royal Naval Medical Information Bureau has been started in Alexandria by Miss Violet Asquith, in order to send information regarding the sick and wounded of the Royal Naval Division in hospital at that town. Inquiries should be addressed to the Secretary, Royal Naval Information Bureau, c.o. the National Bank of Egypt, Alexandria. A similar branch has been established in Malta. Inquiries should be sent to Mrs. Lawrence Smith, R.N. Hospital, Malta.

Captain Guy B. Pears is, we are glad to learn, recovering from the effects of his wounds. His progress is, however, slow, and it will be several months before he will be fit to resume duty. Captain Pears' name figured in the *Gazette* on Tuesday last week as mentioned in despatches, and on the following day it was announced that he had been awarded the Military Cross.

Mr. Harkness, formerly the accountant of the Khedivial Mail Line, who recently joined the firm of Grace and Co., at Alexandria, has obtained a commission as first lieutenant and is acting as Embarkation Officer at Alexandria docks.

Lieut.-Col. Arthur Solly-Flood, who is suffering from the effects of gas poisoning, was an Adjutant of the South African Light Horse, and won his D.S.O. during the South African War. He was for some time attached to the Staff in Egypt, and has also served at the War Office. He assumed the command of the Royal Irish Dragoon Guards upon the promotion of the former Colonel R. L. Mullens to the rank of Brigadier-General.

The King has been graciously pleased to approve of the grant of the Victoria Cross to Lieutenant-Commander Martin Eric Nasmith, Royal Navy, for the conspicuous bravery specified below:

> For most conspicuous bravery in command of one of his Majesty's submarines while operating in the Sea of Marmora. In the face of great danger he succeeded in destroying one large Turkish gunboat, two transports, one ammunition ship, and three storeships, in addition to driving one storeship ashore. When he had safely passed the most difficult part of his homeward journey he returned again to torpedo a Turkish transport.

The King has further been graciously pleased to approve of the award of the Distinguished Service Cross to the undermentioned officers of the same submarine:

> Lieutenant Guy D'Oyly-Hughes, Royal Navy.
>
> Acting Lieutenant Robert Brown, Royal Naval Reserve.

Approval has also been given for the award of the Distinguished Service Medal to each member of the crew.

The promotion of Lieutenant-Commander M. E. Nasmith, V.C., to be Commander, was officially announced on Wednesday.

The Admiralty announces that the King has been graciously pleased to give orders for the award of the Distinguished Service Cross to Lieutenant H. Pirie Gordon, R.N.V.R., for services while attached to landing parties from H.M.S. Doris on the Syrian Coast. The official announcement adds:—"This officer has been specially mentioned for bravery under fire by the Commander-in-Chief, East Indies. The commanding officer of H.M.S. Doris reports: 'With regard to the officers who have taken part in the landing parties, I should like particularly to bring to notice the name of Lieutenant H. Pirie Gordon, R.N.V.R., who has landed on every occasion, and whose conduct has gained the highest approval at all times.'"

Lieutenant Pirie Gordon has a special and intimate knowledge of Syria and the Near East, which he has been able to turn to excellent account since he received his commission, last November.

The Admiralty also announces that the Distinguished Service Cross has been awarded to Skipper James Sargent, R.N.R., for services in the operations off Smyrna on March 8, 1915, when H.M. Minesweeper 285 was sunk by a mine. Skipper Sargent was in the armoured wheel-house when the explosion occurred, and, although severely bruised by a heavy iron plate, picked his way to the after-end of the shattered and sinking vessel with the object of ordering Second Engineman F. W. Ingram to stop the engines, the engine-room telegraph being broken. He continued to encourage his men, and did not leave the vessel until she sank beneath him.

Skipper Alfred Swain, R.N.R., and Skipper Alfred E. Berry, R.N.R., also receive the Distinguished Service Cross for services in connection with mine-sweeping operations in the Dardanelles.

The Admiralty further announces that Mahomet Salim, senior naval officer's interpreter, has been awarded the Distinguished Service Medal, for obtaining valuable information under dangerous conditions in the Shatt-el-Arab in December last.

We regret to learn that Mr. Albert Simmons, one of our fellow-countrymen who had to leave Turkey on the outbreak of war, and who is now residing at Wimbledon, has lost his son, Mr. Henry Cecil Simmons. The latter was serving with the 123rd Heavy

BOARDING HOUSE,

Battery, R.G.A., and he died on May 7 from wounds received the previous day east of Ypres.

The *Westminster Gazette* states that Lieutenant Harold Gorst, 5th Battalion Yorkshire Regiment, younger son of Sir John Gorst, has been shot in the thigh. He is not seriously hurt, but is returning to this country to recuperate.

Lieutenant G. G. Eady, R.N.V.R., and Lieutenant E. Whittall, R.N.V.R., have been promoted to the rank of commander, and Mr. A. Charnaud, R.N.V.R., to the rank of Lieutenant.

It is announced that Brigadier-General Noel Lee, V.D., 6th Battalion Manchester Infantry Brigade, died at Malta on June 22 of wounds received at the Dardanelles on June 4. He was the second son of the late Sir J. C. Lee, of Lea Hurst, Cromford, Derbyshire, was appointed brigade commander of the 6th Battalion Manchester Infantry Regiment in September, 1911, and was formerly a member of the Territorial Advisory Council. During the time he was in Egypt before going on to the Dardanelles he made many friends, who will sincerely deplore his loss. He was forty-seven years old.

Lieutenant Boulanger, of the 8th Lancashire Fusiliers, late of the National Bank, Cairo, is going on satisfactorily. He was struck on the temple by a nail from a shrapnel shell and is at the Abbassieh School Hospital at Alexandria.

Among the Anglo-Egyptians who have returned wounded to Alexandria from the Dardanelles is Mr. W. H. Cadman, formerly of the Ministry of Education, Cairo, and now of the 6th Manchesters. He has been wounded through both arms by Maxim fire and is at Victoria College Hospital. In one arm the main nerve is severed and he has lost the thumb of one hand.

Mr. James T. Murdoch, who was engineer in the employ of the Egyptian Engineering Stores of Alexandria and Cairo, joined the 8th Manchester Regiment while they were at Abbassia, Cairo. His previous training in the Cadet Corps at Cheltenham College and in the Officers Training Corps at King's College, London, enabled him to enter the regiment as second lieutenant. The regiment has been to the Dardanelles and he has been returned to Alexandria, wounded by a bullet through the knee, but is progressing favourably. His brother, Mr. Gilbert Murdoch, has joined the R.A.M.C. as a private and is training somewhere in Wales. Both are the sons of Mr. Fred. T. Murdoch, British Consular Agent, Mansourah.

Miss Guinevere Kennedy, daughter of Mrs. Myles Kennedy, is making satisfactory progress towards recovery after her recent operation.

In our list last week of the members of the Imperial Ottoman Bank who have newly enlisted, Mr. H. W. Lyster should read H. N. Lyster, and Mr. E. W. Martin, said to have been given a commission in the 2nd/4th Batt. York and Lancaster, has been given a commission in the 1st Norfolk Regiment.

Our Larnaca Correspondent writes (June 18): Dr. Patrick, District Medical Officer, Larnaca, has severed his connection with the Cyprus Government and left with his wife, who is a trained nurse, to join the Red Cross. Dr. Patrick's departure leaves a blank which will be very difficult to fill, as he had made a great reputation all over the Island as a skilful surgeon, and was most amiable and courteous in his dealings with all.

Signori Vittorio and Pietro Mantovani, sons of the popular Italian Consular-Agent here, have left for the war, thus setting an example which is being followed by other members of the small Italian Colony of Cyprus. Two members of the Lapierre family have also left for service in France.

The Egyptian papers report the death at the Civil Hospital, Khartoum, of Miss Beddels, of the C.M.S. Mission in Palestine, who had lately been acting as superintendent of the girls' school at Atbara. She fell a victim to fever, and, though taken to Khartoum for better medical attention, died on June 1.

The many friends of M. Léopold Jullien, managing director of the Union Foncière d'Egypte, will be interested to hear that he is serving as a private in France.

APPOINTMENTS, PROMOTIONS, etc.

Our Bucharest Correspondent writes, under date of June 15:—"Local papers reported a day or two ago that M. Radeff, Bulgarian Minister here, was to be transferred shortly to another post. Inquiries prove this report to be quite without foundation. M. Radeff asked for two weeks' leave, for purely personal reasons, and he has actually returned from Sofia already. Far from the report of his transfer being true, it is generally recognised that relations between this country and Bulgaria have improved so much of late largely as a result of M. Radeff's skilful handling of affairs; and it is certain that neither Government would wish to see him moved from a post that he fills so admirably.

Our Larnaca Correspondent writes (June 18): M. Lambros Emyalis, Greek Consul, will soon be leaving Cyprus for Athens, to enjoy his well-earned pension. His successor will be M. Paraskeopoulos.

At its last sitting the Egyptian Council of Ministers decided to maintain Rear-Admiral Robinson, Director-General of Ports and Lighthouses, in the Government service for five years from next year, when he will attain the age of sixty years.

Captain John U. F. C. Alexander, Coldstream Guards, has been attached to the Egyptian Army as a special service officer. He has been granted the temporary rank of Bimbashi and attached to the 10th Sudanese for duty.

Bimbashi J. T. Simson has been transferred from the Sudan Government to the Medical Corps.

Kaimakam C. E. Vickery Bey, D.S.O., Sudan Government, has been struck off the strength of the Egyptian Army.

Mr. W. G. Hayter, of the Legal Department of the Egyptian Ministry of Finance, has been appointed to represent the Government on the board of directors of the Cairo Water Company in the place of Colonel Garner.

Mr. Dubrief, the Bulgarian Consul in Alexandria, has been appointed Attaché at the Bulgarian Embassy at Constantinople.

The following officers have recently been struck off the strength of the Egyptian Army: Kaimakam E. E. B. Mackintosh Bey, Assistant Adjutant-General; Bimbashi C. H. F. Cox, Sudan Government; Bimbashi J. L. F. Tweedie, Sudan Government; Bimbashi F. R. Roche Kelly, Sudan Government; Bimbashi P. D. Carey, Veterinary Department; Bimbashi J. C. Brand, 13th Sudanese.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

THOMAS.—On June 28, at "Glack," Braconing Avenue, Boscombe, the wife of L. Irving Thomas, of Constantinople, formerly of Amay, China, of a daughter.

MARRIAGE.

SCHEGLOFF—WHISKER.—On June 8, at Bucharest, by the English chaplain, the Rev. J. Howard Adeney, B.A., after a previous ceremony at the Church of the Russian Legation, Captain Alexander Schegloff, Imperial Russian Navy, to Jessie Annie Gertrude, only daughter of the late George E. Whisker.

WHERE TO STAY.

Cairo's Hotels de Luxe.

BULGARIA'S DILEMMA.

While we have never doubted that the self-interest of the Balkans will ultimately reassert itself and bring together the States that now look askance at one another, we have realised that the difficulties in the way of this consummation cannot be disposed of lightly. Even now, after eleven months of war, the cog-wheels of diplomacy revolve with surprising slowness. Stories in the form of reports of the withdrawal by Turkey of her forces from Adrianople to the Chatalja Lines indicate the direction in which the interventionist wind is blowing; but we are possibly still some distance away from the goal which the Balkan States must in their heart of hearts long to reach. The acquisition of territory, however ardently desired, is but a stepping-stone to the fulfilment of the national aspirations, which have evolved in each case the picture of the country enjoying its maximum strength from the incorporation of its available resources, and working out its own destiny in peace. Three years ago, for a brief space it was realised that the way to these national aspirations lay through an amicable understanding among the States, and the Balkan League was formed, to the astonishment of the Balkans no less than of the rest of Europe. Events proved, however, that the old feelings of antagonism had not been given time to die. The governments created the League, but the peoples remained estranged. The conception of common interests was of too recent growth to allow the compact to stand the least strain. Since the second Balkan War it would seem as if the old hatred had become intensified, and until the outbreak of the European war the last thing that was to be expected within twelve months was a revival of the Balkan League. But the conflict now being waged leaves little room for the minor hostilities of the Balkans; or rather shall we say, that the fierceness of the present struggle makes permanent peace the only possible outcome when finally the sword has been sheathed. Hence the Balkan governments feel that, as the arbitrament of war will not be tolerated again, they must make the best of such opportunities as they have for mutual agreement. Such an agreement, however, is only possible under the driving force of the great war, with the incentive coming from without.

Bulgaria is the pivot of any fresh understanding among the Balkan States, for it is the Bulgarians alone who have cause to resent the existing state of affairs. Before the outbreak of the war her course seemed clear. She had but to nurse a spirit of revenge, and trust to her own recuperation or the achievements of her somewhat erratic diplomacy, to bring her once more into her own. The greatest disservice that could be rendered her was to force her to take early action in the matter. But this is what has happened as a result of the war. She has to throw in her lot with one or other of the belligerent parties. If the Central Powers should win and Bulgaria remain neutral, she could expect no mercy; if the Triple Entente wins without her aid, she must be prepared to see the *status quo*, with all the injustice it implies to her, crystallised, if not actually aggravated, as a result of the settlement after the war. On the other hand, however much she may believe in the ultimate victory of Germany and Austria-Hungary, it is clear that they are in no position to render Bulgaria any assistance, and, if she throws in her lot with them, she must bear the brunt of the struggle single-handed. We shall do the Bulgarians no injustice if we suppose that their sympathies have been with the Triple Entente while they have been unable to decide who would be the ultimate victors. Their uncertainty regarding the issue of the struggle need cause no surprise. They have had no means of gauging the determination of the Allied Powers; on the other hand, they have had well dinned into them both what Germany and Austria-Hungary had already achieved and what they were resolved upon accomplishing in the future. To intensify their dilemma, when they sought to follow the line of their sympathies, they were met by rebuffs. The Powers of the Triple Entente were ill-advised enough until quite recently to give the cold-shoulder to Bulgaria. Under the unfortunate impression that, because Serbia and Bulgaria were at daggers drawn, they must adopt the predilections of their Balkan ally, they have allowed the whole strength of the Balkans to be neutralized. Only when the task of forcing the Dardanelles proved more formidable than had been anticipated did the diplomacy of the Triple Entente deign to inquire into the terms upon which Bulgaria was willing to give her co-operation. The blame, therefore, for Bulgaria's delay in making common cause with the Allies does not rest entirely with the Bulgarians. They had received no encouragement from the Triple Entente to abandon their neutrality, and no attempt had been made to see how far acceptance for their claims could be secured from the other Balkan States.

The failure on the part of the Triple Entente to keep in close touch with Bulgaria is the more remarkable as the grudge she entertained against the Central Powers was known. To some extent, it is true, the Bulgarians were the Ishmaels of Europe, their hand against every man and every man's hand against them. But their grievance against the Allied Powers was a negative one, in that the latter had failed to uphold the Treaty of London and the Treaty between Serbia and Bulgaria. Against the Central Powers they could bring a charge of active hostility—against Austria-Hungary for urging Roumania to demand the cession of Bulgarian territory as compensation for Roumanian neutrality, against Germany for having incited the Turks to further resistance, and, still worse, for having, in the person of the Emperor, "fought like a lion" to prevent Bulgaria from obtaining Kavalla. In these circumstances it ought not to have been difficult to obtain from Bulgaria the assurances that were needed to throw the whole weight of the Balkans into the Allies' scale. A sympathetic hearing of Bulgaria's claims against her neighbours would have compelled a review of the situation in the interests of the Balkans as a whole, and any settlement imposed by the Powers of the Triple Entente would have been accepted, with little or no demur, by all the States concerned. By waiting until the position at the Dardanelles has shown that the Allies require all the support they can obtain we have allowed the Bulgarians to place the lowest motives on our eleventh-hour interest in their affairs. Goodwill on the side of either of the contracting parties has clearly been excluded by self-interest, and Bulgaria, under such conditions, cannot be blamed overmuch if she sets a high price upon her co-operation and tries to postpone it until the last moment. She will do well, however, to recall that it is mainly the temporary difficulty at the Dardanelles which has given her her opportunity. If the Turkish defence should be broken through, collapsing suddenly for want of munitions, she might find the moment for her intervention had passed. Her neighbours cannot be expected to have any enthusiasm for the settlement which the Powers of the Triple Entente may have to impose, and they would welcome the passing of the need for Bulgaria's co-operation. If, therefore, Bulgaria has decided that her national honour requires her to draw the sword for the attainment of her rights, it is to be hoped that she will decide to strike while the opportunity is open to her.

THE KHEDIVIAL WAKFS SCANDALS.—I.

(By Our Cairo Correspondent.)

The Egyptian Courts are being called upon to deal with a series of prosecutions undertaken against the trustees of the Seif-ed-Dine Wakf and others for misappropriation of certain funds belonging to that Daira and also for malpractices connected with that estate and with the Khedivial Wakfs. The notification of these prosecutions is the first official intimation of the conclusion of the inquiry, to which I referred in your issue of February 12 last. The amount involved in these prosecutions is small, but it is one in a series of most scandalous misappropriations running into several times six figures. It may interest your readers if I summarise, as briefly as circumstances permit, the salient features that have been brought to light in the course of the inquiry. Before I proceed to give these details, however, I must make the following explanation.

It is quite a common practice amongst devout Moslems to direct, either during their lifetime or by will after their death, that their estates shall be put in trust for their heirs, who receive their share of the revenues according to certain prescribed limitations, a part always being set aside for the endowment of mosques or for distribution in charity. The estates thus put in trust go under the name of "Wakfs," and the will constituting them is termed a "Wakfia."

All the wakfs in the country were managed by a central administration called the Public Wakfs Administration, which, since it was free from all uninterested and foreign control, became notorious for the scandalous abuses that were perpetrated in its management. In 1913 Lord Kitchener contrived to set a term to this disgraceful state of affairs by taking the administration of the wakfs away from the control of the Khedive and converting it into an independent Ministry directly responsible to the Council of Ministers. Although the short life of the new Ministry has witnessed the passage of two Ministers, whose names have not been free from scandal, it is believed that the reform is already having good effects, and that the national endowments will henceforward be honestly administered, and that their revenues will not be diverted from the objects for which they were intended.

Included in the wakfs administered by the Public Administration were certain wakfs belonging to the Khedivial family. These Abbas Hilmi Pasha ordered, by rescript on January 1, 1900, to be detached thereform and to form a separate administration under the denomination "Private Wakfs" (Aukaf Khussussia). The reason for this step is not recorded anywhere, but, as a year or so prior to this the Ministry of Finance had been authorised to exercise some control over the accounts, it is to be presumed that the ex-Khedive, fearing that this would inevitably lead to a control over the administration, thought best to ensure that certain wakfs should unreservedly be left in his hands, and so signed the rescript in question.

To these wakfs were from time to time added those belonging to rich Moslems, whom Abbas Hilmi Pasha, by devious ways best known to himself, persuaded to nominate him as trustee. One of the most notable and most recent instances of valuable wakfs being diverted from their rightful trustees to the Khedive's hands was the Kasr-el-Ali wakf constituted in favour of the widows of the late Ismail Pasha, and to which reference was made at the time in The Near East. It may be remembered that the Cadi, on the death of the last widow, interpreted the wakfia to mean that the Khedive was the rightful trustee since he was the "worthiest" member of the family. Thus property with an annual revenue of £E60,000 passed into the control of the Khedive.

For years the members of the Khedivial family and those who were interested in the wakfs controlled by the "Aukaf" have openly complained of the administration, which annually resulted in a decrease in the revenues accruing to them therefrom, and as soon as the new régime was started, an inquiry was set on foot. Simultaneously the affairs of the old Wakfs Administration were looked into very closely by the new Ministry, but whilst no details are available as to the revelations made by the latter, the facts elicited in the course of the "Aukaf" inquiry are quite sufficient to convey a conception of what abuses of power and trust went on under the old régime, and, to justify the general complaint of the beneficiaries, that no sooner did a property become wakf than its revenues fell off in a remarkable manner.

The inquiry into the "Aukaf" has demonstrated that the administration was carried out in a most disgraceful manner. The staff, from the director downwards, was absolutely subservient to the will of Abbas Hilmi Pasha, who indulged in a sort of roving commission over the funds. The latter were handled most irresponsibly and solely with a view to the interest of those who administered them, and the "Aukaf" acted throughout as a most accommodating banker to the various directors and to the Daira Khassa, which, it must be explained, was the Privy Purse of the ex-Khedive, and so was synonymous for him.

Owing to the woefully involved nature of the accounts and to the chaotic state of the administration, it has been, so far, impossible to ascertain what total amount has been mishandled since the creation of the "Aukaf." While documentary evidence, as is usual in such cases, shines by its absence, little reliance can, of course, be placed on what the accused parties state; but a study of certain items, traced during recent years, affords an instructive insight into the morality of those responsible, and, albeit it is not pretended that the figures given are in any way complete for the years referred to, the instances quoted should be quite sufficient for their purpose.

During the fifteen years that the "Aukaf" have existed there have been only two trustees. The first was Ahmed Khairy Pasha, one-time Mudir of Behera, who retained his appointment until January, 1913, when he had a disagreement with the Khedive. It has been ascertained that, amongst other sums as yet to be investigated, this worthy gentleman withdrew between 1906-1912 £E22,400, for which he was supposed to present vouchers in justification of the expenditure incurred by him. Of this over £E12,600 went in the purchase of land. The Pasha did not see why he should bear the risk of what he frankly admits were speculations, so all his land transactions were debited to an account "Payments to be accounted for," and the fees were paid by the "Aukaf." At the same time the management was entrusted to the staff, but the land was registered in his own name. Little by little the land was sold off and the corresponding debits disappeared, though none of the profits appeared in the books, and by the time he resigned there remained only 22 feddans, on which he stood debtor for £E2,300. In reality his indebtedness was greater, as he had caused to be passed to his credit the entire purchase price in cases where payment was to be made by instalments, and had opened accounts in the names of the purchasers for the amounts in question. Of the balance of £E10,000 all but £E3,000, for which no regular vouchers can be found, was subsequently adjusted by vouchers drawn in accordance with the wakfias, but no proof is forthcoming that the amounts in question were actually spent on the objects mentioned; it is highly probable that the whole of this sum went the same way as other amounts.

In addition to the foregoing, £E20,650 was withdrawn as "Advances." According to Khairy Pasha, all the sums that went to make up this amount were either handed personally to Abbas Hilmi Pasha at his request or were paid on his orders to certain people. He declares that Abbas Hilmi Pasha had no intention whatsoever of reimbursing these amounts in cash, but gave him instructions to settle them from the following sources: Firstly, came the interest on the funds deposited at the Deutsche Orient Bank. Originally these funds were deposited at the National Bank of Egypt without interest, as the Islamic Law forbids the putting out of money at interest. But in 1906 they were transferred to the German bank, which, according to the letter of the head of the Khedive's legal department, had by arrangement with the Khedive agreed to pay what was picturesquely deserbed as a "compensation for deposit." But Khairy Pasha explains that, ever solicitous for his sovereign's honour, he did not wish that the Cadi should find out that his Highness had transgressed Moslem teaching, and, preferring to risk the blame himself, he arranged that this "compensation for deposit" should be credited to his own account! Being also trustee for the Seif-ed-Dine estate and, no doubt considering that the example set by his Highness

was one to be followed in this case as well, he placed the funds of that Daira also at interest, arranging likewise that the proceeds should be credited to his own account.

Secondly, it was understood that he was to use the revenue from the non-wakf property, although, as it had been purchased with wakf money, the return should have gone to the wakf funds. Thirdly, certain sums reserved for charity were to be utilised. This gave rise to an exceedingly disgraceful abuse of trust, to which reference will subsequently be made. Fourthly, drafts were to be made on the administrative expenses, which, as they are allotted by the Cadi to the Nazir —the Khedive—are considered to have legally been his rightful due. It is to be noted that sometimes the amount paid in was less than that withdrawn from the various sources, in which case one wonders whether his Highness or who else pocketed the difference; at other times a round sum was made up by the convenient device of issuing a pay order on the Kavalla Wakf for "distribution to the poor"!

In this way Khairy Pasha had paid off over £E14,000 of the advances by the end of 1912 when his difference arose with Abbas Hilmi Pasha. To facilitate his resignation it was arranged that his outstanding of £E6,300 should be adjusted. The adjustment was carried out in the most audaciously and barefacedly illegal manner. In the first place, the 22 feddans referred to, and on which £E2,338 was owing, were revalued at £E4,488, the £E2,338 was written off, and the "advances" were credited with the difference. Next, a statement was prepared to the effect that £E2,850 had been spent on the Kavalla refugees in and outside Egypt and the Kavalla Wakf was debited therewith; various small sums were taken from the other sources agreed upon, and finally the advances account was wiped out by another small draft of £E132 on the ever-convenient Kavalla Wakf, on which the poor were such a drain.

In the settlement of these £E20,650, only £E5,200 were taken from a source which could legally be defended. The balance all came from falsified book entries, or from the proceeds of misappropriated funds. It is to be noted that in addition, Khairy Pasha withdrew £E2,500 from the interest and £E500 from the revenues of the non-wakfs, for which no entry can be traced. Khairy Pasha pleaded that throughout he was but a tool, that he carried out implicitly the orders of the Khedive, and that, moreover, he knew no French, and had absolutely no experience of business. Whilst the first part of his defence may quite possibly be true, the ignorance he pleads of business methods is nothing short of "judicial ignorance," for it is to be noted that whilst his ignorance led him to leave to the "Aukaf" the management of property that was registered in his own name, it did not prevent him from drawing all the revenues, which in the five years amounted to the tidy sum of £E3,500, as well as the proceeds of the interest. No amount of business inexperience can excuse such acts, the gravity of which should have been apparent to a man of his standing. The proffering of such an excuse only serves to aggravate his offence.

(To be continued.)

MONTENEGRO AND ALBANIA.

Sir J. Roper Partington, Consul-General for Montenegro, has received the following official telegram from Cettinje:—

"In view of the statement published by the telegraphic agency at Petrograd, concerning the supposed intrigues of the Austrian Consul at Scutari to incite the Montenegrins to occupy that town, in order to divert our troops from direct attacks on Austria, the Press Bureau at Cettinje authorises the following announcement: Montenegro has been quite aware, from the very commencement of the war, that the Austrian agents were doing all in their power, by promoting raids of armed Albanians across our frontier and systematic robbery of provisions and stores, to force our attention from the actual central conflict and thus deprive our friend and ally, Serbia, of our support. The Austrians were enabled to organise these schemes by their secret agents in Albania, owing to Scutari having been withheld from us after the last Balkan war. At the conference held in London at that time, the Austro-Hungarian Empire successfully prevented Montenegro from obtaining a reasonable rectification of the frontier, and so necessitated a constant guard to be kept on the Albanian border. The position became quite intolerable of late, as the Albanians seized our transports on the river Boyana and pillaged or destroyed the cargoes of food and provisions destined for our troops and populace. The Montenegrin Government had no alternative but to put an end to these wanton attacks, and was, therefore, forced to occupy certain important positions on the frontier, and so render further annoyances of this nature impossible. The entire Albanian population in the neighbourhood of Scutari have followed the example set by the nobles and chieftains of the tribes, and surrendered the arms distributed to them by the Austrian Consul at Scutari, at the same time expressing loyalty to our authority. The Mayor of Scutari personally visited the Montenegrin commander to assure him of the existing friendly feeling, notwithstanding the difference of creeds. It is evident that it was vitally necessary for Montenegro to effectually put an end to these Austrian intrigues, so that the larger portion of the Montenegrin troops guarding the Albanian frontier could be released to take part in the wider field of war against our common enemy."

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Army Veterinary Corps in Egypt. June 24.

Mr. HARRY HOPE asked the Under-Secretary of State for War if he would state what were the rations which the men of the Army Veterinary Corps in Egypt received.

Mr. TENNANT: The men of the Army Veterinary Corps receive similar rations to those provided for other soldiers of the Regular Army serving in Egypt. The precise details of the scale of rations fixed for the troops have not yet been reported to the War Office.

Letters to Prisoners in Turkey. June 28.

Mr. PETO asked whether the Foreign Office had yet succeeded in establishing direct postal and parcel communication with the interned British seafarers in Turkey?

Lord ROBERT CECIL: The answer is in the affirmative. Letters and parcels for British prisoners in Turkey should bear a clear indication of the name, rank, or rating, and place of internment of the prisoner, if known, and addressed to him at the Central Post Office, Constantinople, care of the General Post Office, London. The Swiss Postal Administration has agreed to act as intermediary in the transmission of the correspondence.

News of Dardanelles Operations. June 30.

Sir H. DALZIEL suggested that the Government might give more frequent announcements regarding the progress of the Dardanelles operations. Could not the Home Secretary give an assurance that at no distant date they might have a Ministerial statement as to the progress of the operations up to the present time? Up to the present time the House had had no communication from Ministers in regard to these particular operations, and there were many questions which they might be disposed to ask. Some might like to know why we gave two months' notice to the enemy before we landed a single soldier, thus allowing them to construct fortifications and prepare for any attack that might be made. But for the moment he would content himself by asking whether the Government will not promise to give the public at no very distant date more information than they have had up to the present time?

Sir A. MARKHAM, who associated himself with the observations of his right hon. friend, remarked that those who had relatives fighting in the Dardanelles had no more information than the man in the street as to the position in the Dardanelles. The public, who made sacrifices of relatives and of money, were entitled to know how the wars in which the nation was engaged were being conducted, and he asked the Home Secretary to state frankly what were the military reasons which prevented such information being given to the House. If there were good military reasons why the information should not be given they would be willing to remain uninformed; but how was it that in every one of nine wars the policy of concealment continued to be practised?

Sir J. SIMON (Home Secretary), in the course of his reply for the Government, said: My right hon. friend said he hoped the time would soon come when a statement might be made with the authority of the Government as to the course of operations in that part of the field of war. I am very glad to be in a position to make a statement to the House on this point, and I am authorized by the Prime Minister to say that as soon as the national interests permit, a suitable occasion will be taken for making a statement as to the operations of the Allies in the Dardanelles. I am very glad to be able to inform the House that a despatch from Sir Ian Hamilton has been received, and arrangements for its publication are in an advanced state, and will shortly appear in the London Press. I am glad to be able to deal to that extent with the point raised by the right hon. gentleman. He put one other point. He wanted to know what was meant when it is said the military authorities had to censor the unofficial reports from the Dardanelles. I understand that the plan is this. I am told that there are more British and Colonial correspondents at the Dardanelles than there are in Flanders, and of course they write their accounts and reports there on the spot. It is quite inevitable that they should be censored, within limits, on the spot. I do not believe that in any field of war any other course could ever be followed, but the despatches, having been in that way reviewed, are sent by the quickest possible route to this country, they are instantly handed out to the newspapers concerned, and it is not the practice of the Press Bureau to censor those newspaper accounts as they reach this country further than they have been already censored. . . . I assure my two hon. friends, so far as I am concerned —and I believe I am speaking with the authority of the whole Government—that it will be our constant object to make the publications as full as we can, keeping back only such matter as the expert authorities assure us is calculated to be helpful to the enemy.

TANGIER TO TEHERAN.

While trustworthy news from Persia is scarce just now, reports of one kind and another are plentiful. A good many of them concern Herr Pugin, whose "designs" appear to be almost as numerous, if neither as commendable nor as successful as those of the great architect who has the same name. One of these reports has it that this ingenious would-be Consul-General and pseudo-convert-to-Islam, in the course of his endeavour to enlist recruits for his own particular section of the German-made Jehad, incurred liabilities to the extent of nearly £6,000, and that when his scheme failed to mature the German Legation at Teheran calmly disowned all connection with him. As a result, the report runs, he found it advisable to make himself scarce. Hence his hurried departure to Birjand, where, one may suppose, it is hoped that his reputation has not preceded him.

***

I see it is reported that the German Consulate at Haifa has been bombarded by a French warship, as the result, apparently, of the Huns' representative having incited some natives to desecrate the burial-places of French soldiers interred on Mount Carmel. I sincerely hope the news of the bombardment is true, and I could only wish that the egregious Hardegg had been buried in the ruins of his home; for if ever a consul abused his official position, this hard-boiled ruffian has done so, and he deserves any ill that may befall him. You may remember that I chronicled some of his doings in these columns five months ago. His compatriot, Herr Lange, to whose conception of his duty as Belgian Consul at Haifa I also drew attention (December 4 last), and he are clearly a well-matched pair.

***

Apropos of the puzzling paragraph, concerning the list of French and British prisoners issued by the Red Crescent Society of Constantinople, which I reproduced last week, a correspondent has been kind enough to send the Editor a suggested solution of the mystery. This is that "surname" is a printer's error for "name"; and the correspondent adds: "In Syria it is usual to call any man by his father's name added to his own, as, for example, Faris Ibrahim." I am obliged to the writer for trying to help me, and I am ready—especially after last week's "Tangier to Teheran"!—to believe that a printer is capable of almost any crime. But I fear we cannot saddle him with this particular offence; for "surname" occurs twice, and the wording of the paragraph is such that it must have attracted the attention of printer and printer's reader alike. Moreover, the reference to "the Oriental custom" seems to show that the writer of the paragraph was acquainted with the use of the father's name, as mentioned by the Editor's correspondent. So I still have to "give it up."

***

I referred last week to the *Busra Times*, and remarked that it was going very strong. Now I learn that, thanks to British enterprise, it actually had a rival in Baghdad at the end of last year. This information I gather from the following letter, which appeared in the "Correspondence" column of the *Busra Times* of May 7:—

> Sir,—It may interest some of your readers to learn that your valuable paper is only senior by a few days to another British newspaper in Mesopotamia. On December 3 last there was issued in the British Residency, Baghdad, for the entertainment and instruction of the imprisoned British community, numbering over fifty, the first number of the *Baghdad Bugler*, edited by Mr. E. B. Soane, of the A.P.O. Co. The issue was continued daily for a week with great success, when it was brought to an untimely end, as the authorities, becoming alarmed at the sounds of unceasing typewriting emanating from the newspaper offices, seized the machines. The *Bugler* did not survive their blow, but perhaps one day he will bugle once more.—I am, etc.,
>
> ONE OF THE BAGHDAD REFUGEES.

May the hope hinted at come true soon! In the meanwhile I would suggest that an appropriate call for the *Baghdad Bugler* to practise would be the "Recall." I fancy, by the way, that the *Bugler* was not the first British paper run in Baghdad. Over twenty years ago, unless my memory plays me false, a typewritten sheet made its appearance for a few numbers—and was then "suppressed by the Censor," or something of the kind.

***

I see that things have been lively on one of the great Central African lakes, and that an armed German vessel has been driven ashore and pounded into impotence by the guns of one of His Majesty's ships. I wonder how many people realise what an important part our unofficial Navy is constantly playing in the history of our Empire. We all know the proud part played by our gunboats at the battle of Omdurman, but there have been many days since then. Gradually, as the railways of the Sudan expand, gun-boats are becoming of less military importance than in the old days, but they will always remain, as they have always been, of great moral value to the country. With guns that roared their warning message over the heads of hostile natives, they were the pioneers of civilisation in the Southern Sudan where, in the far off channels of the Nile, the white man was until quite recently unknown. During the campaign which culminated in the fall of Omdurman these gunboats were under the command of naval officers, but although these have long since been replaced by civilians during the years of peace, the efficiency of the boats as a fighting machine has never been forgotten in the Sudan.

***

From Egypt comes a tale that has the true flavour of the Thousand Nights and a Night; the tale of an idle, but doubtless virtuous and beautiful lady, of daring robbers and dashing police officers, of mysterious funerals and a lonely—I am not quite sure about this, but I trust it *was* lonely—cemetery. Do not all these characters and accessories figure again and again in the pages of the Nights? Of course they do; and the obvious thing, therefore, in passing on the story to which I refer is to do so as best I may in the style of those fascinating tales. But which translation shall we take as pattern? The immortal Burton would without a doubt have handled the affair worthily, not to say racily; but THE NEAR EAST is sometimes read by the Young Person. To attempt the style of Lane would entail a fresh visit to the scene, with pages of description of its setting, to say nothing of pages of notes or of innumerable diacritical marks; and the Editor might object. A judicious blending of the two appears to be called for. So——

***

You must know, then, that in the reign of the great and glorious Sultan Hussein Kemal (may Allah prolong his days!) there dwelt in Boulak a lady of most excellent virtue and most surpassing beauty. Her gait was like that of the young gazelle; her form was supple as the willow; her eyes, which were like sloes, were arched by brows slender as the new moon of Ramadan; and her complexion, delicate as the first hint of dawn across the desert, was fairer than that of the daughters of Egypt; for she came from Italy (Good luck to her—I mean, May her shadow never grow less!). And it so fell out that, her lover having departed to his own land to fight the savage enemies of his King and country, who needed him, the lady found time hang heavy on her hands. But, instead of sitting sewing shirts for soldiers, she, being indolent, preferred to sit at the window and observe what went on in the streets.

***

And sitting thus one day, she observed a funeral procession leave a neighbouring house. The next day she saw a similar procession leave the same house at the same hour; and so the thing happened on the third day and on the fourth. Then the lady, fearful lest perchance some sore pestilence had taken hold of the neighbourhood, and lest the stricken household had failed to convey information of their misfortune to those officers whom the Sultan had deputed to combat such evils, hastened to a certain official who was said (but God alone is all-knowing) to be her friend, to whom she imparted the tale of what she had witnessed. The official, having heard her out, bade her keep silence regarding the matter, saying that he would attend to it forthwith. And the very next day, when yet a fifth funeral started from the house of ill omen, it was met by many officers of the police, who bade the mourners stand, and, in spite of many indignant protests on their part, insisted on examining the corpse.

***

Then did the mourners beat their breasts with vigour ten times greater than any they had shown before, wailing aloud the while, and calling down curses on the hard-hearted officers who would thus shamelessly profane the dead. But the police persisted in their purpose; and, lo and behold! in place of a corpse there was found much stolen property. For the mourners were a band of robbers who had hit upon the plan of using a tomb as the receptacle for their booty; and if they had not been tempted by avarice into over-confidence their bold design might well have enabled them to escape detection. As it is, they are probably wishing that the Italian lady had gone to her own country to help nurse the wounded, or to—well, to any other place far removed from Boulak. . . . Such is the story as it was told to me. As to its truth, I can only say once more, with the ingenious *raconteur* of the Nights, "God alone is all-knowing."

THE PRESS ON THE NEAR EAST.

France and Syria.

M. P. Ginest contributes to the *Dépêche Coloniale* an important and interesting article on Syria, in which he says:—

I do not see why we should not realise in Syria what England hopes to accomplish in Mesopotamia. From a political point of view our installation in Syria appears still more important. It is also necessary that Alexandretta should be the head of a line of railway connecting with the Baghdad Railway, whose shareholders include many people of French nationality. It is important, too, that the port should be equipped with modern plant, and that it should complete the system of which Toulon and Bizerta are already the principal citadels. Let the English possess their line head at Busreh, let the Russians penetrate into Asiatic Turkey, viâ Constantinople, but on condition that we possess Alexandretta. From time immemorial the Marseilles merchants have expected from our installation in Syria an important expansion in their trade and a remunerative increase of their exports. All this will come about only on condition that we hold the door to Syria.

Serbia and the Enemy.

The correspondent of the *Morning Post* (June 25), writing from Budapest on the 12th ult., laid bare the details of a new move in the Austro-German diplomatic campaign against Italy. The information contained in the following extract from his dispatch is almost bewildering, as such proposals, coming at the present time, can hardly be expected to influence the other Balkan States towards the continuance of a policy of neutrality towards the Central Empires:—

A few days ago the Austrian and German Press, especially those journals which are inspired by their respective Governments, including the *Fremdenblatt* (the Emperor's paper, connected with the Austro-Hungarian Foreign Office) and the Budapest *Az Ujsaz*, Count Tisza's organ, have been gently insinuating that a separate peace should speedily be concluded with Serbia. They generously acknowledge that Serbia has fought valiantly and successfully, that she is a nation which deserves independence, territorial concessions, and an outlet to the sea through Albania, and that, in a word, the Central Empires have no objection now to her realising all her national aspirations.

The Suicide of Turkey.

In an article under the above heading in the *Moslem World* (July), Mr. Cassamally Jairazbhoy, vice-president of the Moslem League, says that—

The history of the great war of 1914 will contain no more amazing chapter than that which records the entrance of the Ottoman Empire into the lists; nor does the history of the civilised world afford any parallel to the manner in which that ill-fated Empire has been decoyed to its end by its false friend Germany.

The writer places the responsibility for Turkey's downfall upon the shoulders of the Young Turks, who, he avers, led their country along to certain ruin.

Cliques and parties quarrelled among themselves, tried statesmen were thrown on one side, or—as in the case of Turkey's finest soldier, Nazim Pasha—were ruthlessly murdered to make way for young upstarts without experience and without knowledge, men in whose ears German promises sounded like the assurance of a worldly paradise to be attained with scarce an effort. Under such men Turkey fell an easy victim to one enemy after another.

He concludes with the argument that it is now to the best interests of Islam that she should be released from the tyrannical influence of Stamboul, but asks for the assurance of the Allies that the person and dignity of the Sultan may be protected.

Austria Hungary.

According to an article contributed by a special correspondent to the *Daily Chronicle* (June 25), the Hungarians are now in complete control of the destinies of Austria-Hungary:—

The German-speaking Austrians have collapsed like the effete oligarchy that they were. Roumanians, Italians, and Serbs are cowed, Ruthenians and Poles are sullen, Bohemians are openly, defiantly hostile. But the Tyrolese, the Bosnian Mohammedans, and the Hungarians remain.

The writer goes on to say that great efforts are being made to throw dust in the eyes of the public by publishing assurances that the "Serbs were dully quiet and the Roumanians splendidly loyal." How far these assurances are compatible with actual fact may be gathered from the following extract from his article:—

There are 15,000 prisoners in Arad fortress, of whom 12,000 are "politicals"; nearly all Austro-Hungarian subjects, by race Serbs or Roumanians. They represent the intelligence, the potential leadership of the subject races. Yes. The Magyars are a race of rulers—but a grim, savage, despotic, grinding sort of rulers. What time the Emperor-King decorates with much fuss a few of his Roumanian officers his functionaries are doing their best to crush out Roumanian spirit. The leaders are all interned or exiled, the men pressed into service, the priests silenced, the teachers terrorised, the whole population is under the vigilant surveillance of an army of spies and "agents provocateurs."

The active help of the Transylvanian peasants will, in the opinion of this writer, be of the greatest value to Roumania if she decides to cross the Carpathians.

Palestine and the War.

Mr. F. J. Scrimgeour, writing in the *Moslem World* (July), gives a very interesting description of conditions in Palestine from the beginning of the war until the time that German intrigue had drawn Turkey into hostile action. He shows that prior to the war Christians and Moslems were living upon terms of the utmost good fellowship, and points to the fact that the action of the Jews in attempting to obtain "certain fields in the vicinity by illegal means" has still further lessened the separation between Moslem and Christian. The current of popular feeling appears, indeed, to have been entirely with the Allies in their fight for freedom at the beginning. Then, however, the Germans started their great and ultimately successful campaign to influence the Mohammedan population towards active participation in the war.

Beyond all shadow of doubt the entire resources of Germany were marshalled to achieve this end, and the nature of the means employed was such as can only be termed despicable. The certainty that all members of the Christian communities would continue to sympathise with the cause of the Entente Powers led Germany to employ all her arts in the endeavour to raise a spirit of Holy War.

Gradually, feeling began to change, and in view of the falsehoods exposed in the following extract, this is certainly not surprising.

According to German announcements to the inhabitants of the coast towns, Britain was preparing to destroy all Moslems and their property by naval fire. To avoid the unspeakable atrocities which, they stated, would accompany the landing of a British force the German families moved to their inland colonies. This led to the evacuation of Acre by the Moslems, who fled to the villages on the hills. Every idea which appealed to religious fanaticism was urged upon prominent Moslem families and leaders of Arab tribes. Reports of the wholesale conversion of Germans, even including the highest in rank, to Islam, were allowed to remain uncontradicted. Indeed, it became clear that the German policy was to influence the Moslems of Syria and Palestine towards war, not as Ottomans . . . but as followers of the Prophet, who would drive the infidel from Egypt.

The Dardanelles.

Not only in Palestine have the Turks been deluded and oppressed by German lies concerning the British. The *Liverpool Daily Courier* (June 28) published a most interesting article on the Dardanelles over the initials of "A. T.," in which an almost incredible story is told. The correspondent received his information direct from a British sailor who had come straight from the Dardanelles, where he had served on a hospital ship, and we quote from that portion which deals with the attitude of the German-driven Turk towards his British captors when they were brought aboard wounded:—

They were brought from the shore in lighters, and they cowered in dark corners like frightened sheep awaiting the butcher's knife. . . . They were in the last stages of nervous fright. . . . Whenever an English officer or sailor approached a prisoner, the Turk would be seized with a fit of trembling pitiable to see. There was a Turkish officer, a man of education, who spoke English, and when he was questioned as to the cause of this fear, he told how the ignorant and credulous Turkish privates had been deceived by their German officers with wild tales of British barbarity to wounded prisoners, and consequently were in constant dread of torture and death. He said that although the Turkish officers had striven to persuade their men that the English were humane to prisoners it had no effect. In one case this false rumour had a tragic sequel. A Turk was brought on board with an arm blown off from the shoulder by shell fire. He was brought before the ship's doctor. The doctor made a movement to examine the wound. The Turk fell dead at his feet. In the kindly act of the doctor he had seen the beginning of torture and the shock killed him. It was only after they had been a few days in the sick wards . . . that the fear of death began to leave their faces, and they began to realise how foreign the idea of barbarity is to the English character.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The following was sent me by a correspondent, not of British nationality, in Egypt:—"The solemn declaration (he writes) of Sir Henry McMahon that free trade will be maintained here in Egypt, and that no special privileges will be bestowed on British trade, has reassured all traders and has again revealed the generosity of the British nation and the beautiful traditions of the Liberal Party." As my correspondent is not a British trader, I can understand his gratitude; but I would ask: What does the British trader think of the fact that in a British possession he is to enjoy no privileges over and above his foreign competitors, who, in nine cases out of ten, are backed by foreign banking concerns? My correspondent's effusion reminds me of the story of the boastful traveller narrating in his club in glowing language a courageous fight he had had with a lion—much to the lion's discomfiture—when a quiet voice broke in from beside the fireplace asking pathetically: "Dear me, I wonder what the lion's version of the story would be?"

***

A subject of peculiar interest to British exporters is revealed this week in the announcement, published elsewhere, of the formation of a new company, to be called by the awkward name of the "Society (?) for Promoting British Trade, Limited." The object of this company is stated to be to enter "into a contract with C. Marks" (a gentleman unknown to me) "for the acquisition of the benefit of his knowledge and experience relating to the carrying on of exhibitions in Great Britain or abroad in connection with British and colonial manufactures and trade." The idea, admittedly, is an excellent one, and deserving of all the support it can obtain. My readers will remember that about a year ago I started a campaign in these columns for the formation of a British Exhibition Company, whose object it was to have been to run a series of sample exhibitions in the Near East with a view to promote British trade in the regions covered by this journal. Support, I am glad to say, was forthcoming from many quarters, but, unhappily, the war broke out, and the scheme, together with many others that would likewise have favoured our trade with the Balkans and Turkey, was postponed *sine die*. It would now seem that with an initial capital of £2,000 the project has been taken up by a company which has practically chosen the world as its playground. This is ambitious. It would be better for the company to limit the scope of its activities to one particular ground, and I can do no better than recommend the Near East. Of course, now is not the moment to put any such scheme into operation, but the preparatory steps must be taken *now*, and it is these latter, I take it, that the "Society for Promoting British Trade, Limited," has in view. I trust, however, that they have no intention of passing over the Near East—one of the most important of our future markets.

***

This last assertion has been championed in these columns week after week, and, to judge by the July number of *Kelly's Monthly Trade Review*, my contention is rapidly becoming recognised as sound and essential to the development of our home industries. I have always maintained that the Near East is an excellent market (prospective); that it requires, or stands in need of, "forced" treatment; and that the *sine qua non* of a successful exploitation of that market consists in the creation of trading facilities—*i.e.*, in the establishing, primarily, of commercial banks in the various Balkan States, said banks to be under British control and financed largely, but by no means entirely, by British capital. If we get our banks (incidentally they will pay excellent dividends if run on anything like business lines) we shall get the Near Eastern trade. This view is corroborated in all its essentials by the writer of the article on "The Necessity of Establishing British Banks in Russia and the Balkans" in the review alluded to above. His conclusions are identical with those which I have expressed over and over again, as the following quotations will show:—"In the Balkans, buyers are accustomed to pay by accepted bills part, if not all, of the value of their purchases. British manufacturers are accustomed to payment against shipping documents in England. This has been a severe handicap to British trade in foreign countries where the Germans have had matters much their own way. Throughout the Balkans our manufacturers and traders urgently require a powerful banking institution behind them, which will enable them to do business on broader and speedier lines and to give wider financial terms to the foreign buyer. It ought to be possible for merchants and traders of repute in these countries to obtain loans by means of bills of exchange with the guarantee of merchandise or other security. New banks should be able to buy or sell international bills of exchange or open credits in foreign money for the operations of the exterior commerce and the facilitation of commerce. . . . No stronger incentive to trade could be given than by the establishment of an 'English' bank, with branches in Belgrade, Bucharest, Salonika, Sofia, Varna, Constantinople, etc."

***

I have been maintaining the same thesis over and over again, and am pleased to see that my views are gaining ground. I will go a step farther, however, and state that we will not be able to do justice to our own industries in the Near Eastern market unless we have our Anglo-Balkan bank. As I remarked last week, the whole question amounts to this: Is the Near Eastern trade worth our while? If it is not, let it slide into foreign hands; if it is, we must have our commercial bank—not a bank working on philanthropic lines, that is to say, eating up its capital and paying no dividends, but one paying handsome dividends and doing good, useful work for British trade at the same time. Surely the prospect, based on foreign banking results in the Near East during the past twenty years or more, should appeal to the investor, and, surely, if *bonâ fide*, it ought to receive the support of the Government.

***

I trust the matter will not be allowed to drop now that it has become more popular than it was some months ago. Of course, what applies to the Society for Promoting British Trade applies to the banks in question, namely, that the only immediate course to be followed is a preparatory one, but that *now* is the time to make all preparations. As far as the bank is concerned—and I do not only speak from hearsay—some such movement as analysed above is already on foot. Unfortunately, its scope, as in the case of the Society for Promoting, etc., is so vast that the Balkans will be like unto a drop in the bucket. This is unfortunate. For what we want is an Anglo-Balkan commercial banking institute, pure and simple, with British and local (Greek for Greece, etc.) capital, and devoting itself almost exclusively to commercial business and Government contracts.

***

The accompanying extract from an interview given to a Reuter's representative by an Englishman occupying an influential position in Constantinople, and who left that city in the middle of June, will be of some interest:—"The chief feature of life is the shortage of petroleum, which is a serious matter for the large section of the community who do their cooking by oil. Food supplies were dear, but relatively plentiful. The stories of the failure of electric light and shortage of coal were not in accordance with fact up to the time I left, and the various accounts of a panic-stricken city were equally baseless. There was not the slightest sign of panic." From which it would appear that the exploitation of the Zunguldak coal mines, reported as interrupted by the Russians, continues without halt. It is to be regretted.

***

The following interesting survey of Roumania's financial position is from the Earl of Bessborough's speech at the meeting of the Bank of Roumania, published last week:—"During the first half of the past year normal conditions prevailed in Roumania. The Balkan War being over, it was thought that peace in that part of Europe had been secured at any rate for some years. These optimistic hopes were shattered by the outbreak of the European war, accompanied, unfortunately, by adverse reports respecting the harvest. In some quarters there was a demand for a general moratorium, but it was not acceded to, and it was only towards the end of December that a partial step in that direction was taken by decreeing a moratorium for foreign liabilities. This was done on account of the difficulty of procuring exchange, owing to the war, and, later on, to the closing of the Dardanelles. The national accounts for the financial year ended March 31, 1914, resulted in a surplus of nearly £2,250,000, but those for the year ended March 31 last were not yet available. The National Debt was reduced, through the regular operation of the Sinking Fund, by £1,600,000 during the year, but in order to meet heavy military expenditure the Government obtained a loan of £8,000,000 from the National Bank."

Egyptian Wheat Problem.

Maize a Good Substitute.

During the greater part of two centuries, from the time when Cleopatra poisoned herself so as to escape from figuring in a Roman triumph, in 30 B.C., until the time of Marcus Aurelius (A.D. 161-180) Egypt contributed so much of Rome's food-supply that she exercised no small influence. She had the power to starve Rome into submission had she revolted, and the Roman emperors, therefore, administered Egypt as a personal domain, in charge of an autocratic Prefect, who had the power to take any necessary action without reference to the Senate.

The grain ships loaded up in the harbour of Alexander's city, to the east of the modern Ras-el-Tin, with wheat from the basin-lands which in those days covered not only Upper Egypt, but the Delta also. Sometimes, when there was famine in Egypt through a defective flood, as in the reign of Trajan, the grain ships returned to Alexandria, bringing back the exported corn to save the situation.

In those days the summer crops were negligible, since all the cultivable land was inundated by the flood, and maize had not then been introduced to the Old World from the New. In modern Egypt there is but little basin-land left, none of which is in the Delta; the summer crops are the mainstay of the country—always excepting the Egyptian clover, on which all Egyptian agriculture depends—maize is the principal food-crop, and less wheat is grown than is consumed. The Granary of the Roman Empire is no longer a wheat-exporting country.

The old reputation dies hard, however, and many eyes have been turned to Egypt as a possible source from which to augment the wheat supply of the world, under a vague impression that the famous fertility of Egypt is capable of anything. When the cotton area was restricted, this impression was much strengthened. As a matter of fact, Egypt has double the population nowadays as compared with that which she supported in Roman times, and she can make but little difference to the world's wheat-supply, partly because the bulk of her crop is unsuitable for European bread-making, partly because it requires a great deal of cleaning, even if it were suitable, and partly because the quantity she can grow is limited.

"Hindi" Wheat.

Taking these three difficulties in order, some of the wheat grown in Egypt is better than the rest, not being Egyptian. In the beginning of this century the State Domains and Khedivial Agricultural Society introduced the Muzaffinagar white wheat from India, and under the name of "Hindi" this is now grown extensively, but only under perennial irrigation, since if it cannot be given water when the grain is swelling, the crop is poor. Such Hindi wheat is a fairly saleable product on the home market, though it is nothing at all special, and is capable of a great deal of improvement, which has actually been effected in India. Areas freed from cotton could be planted with this wheat, followed by maize in the summer, if there is enough seed-wheat available, but the saleability of the product would be affected adversely by the second consideration. Meanwhile, the ordinary Egyptian wheats are scarcely saleable in Egypt, being deficient in "strength." This does not merely apply to those native wheats which belong to the macaroni type, and are unsuitable for making bread, but to the ordinary flour-wheats of the country, other than Hindi. Some years ago large shipments of wheat were made from all parts of the world in the course of an inquiry by the millers, and the two Egyptian shipments were adjudged to be quite definitely the worst in the world for English bread-making. These are the wheats which are grown on the basin land, and also—with Hindi—under perennial irrigation.

These poor-quality native wheats are the same kinds as those which Egypt supplied to Rome, and it may be asked why they are not good enough for modern Europe. The reason is that the public taste has changed, demanding a light spongy loaf, such as can only be made from "strong" wheats. Wheats lacking in "strength" make flour which bakes into a tough, rubbery loaf. Most of our English wheats also have this defect, though to a less extent, and the millers can, in consequence, only use them in the proportion of one part to four or five parts of the strong wheats from Canada, the U.S.A. and Russia. Native Egyptian wheat could only be used in a still smaller proportion, scarcely worth the trouble of mixing. Even the Hindi wheat would not be used alone, being by no means strong enough. This lack of strength is only a trifling disadvantage to the native Egyptian, since his bread is made up in flat pancakes, often kept for weeks and soaked in water before being eaten, and rubberiness and toughness are unimportant.

Difficulty of Cleaning.

The next objection to Egyptian wheat is the amount of cleaning which it requires. Supposing the Hindi wheat to be grown for export, threshed on the threshing-floor with the norag in the usual manner, and then sent to Europe, it would only be saleable at a heavy discount, on acount of the earth, dust, and stones which it contains. If these were not removed before grinding they would play havoc with the rollers of the mill. Their removal involves a great deal of trouble, since ordinary dressing machinery is not designed to handle this kind of impurity in the grain. Some very angry remarks have been made by millers handling experimental consignments of Egyptian wheats, even though these had been threshed with care on big estates. It may be taken for granted that in order to establish any sort of reputation, every ounce of wheat exported from modern Egypt would have to be specially dressed before it went on board ship, in special dressing-machinery, since even machine-threshed Egyptian wheat is not entirely free from the roller-destroying rubbish. This would involve the locking-up of a good deal of capital, the inspection of consignments, and an increase in the cost of production, which would only be worth while if the wheat were of good quality, selling at a high price. It would certainly not be worth while with inferior wheat, such as the native kinds, and but doubtfully so with Hindi. With wheat as with cotton, the prime necessity for Egypt is quality. Experimental consignments such as have recently obtained favourable reports from the Imperial Institute are no guide, since they had clearly been specially cleaned, whereas a single shipload of ordinary Hindi, threshed with the norag on the threshing floor, would damn Egyptian wheat for a decade to come.

Lastly, there is the question of quantity. Wheat is too expensive a crop for the fellah to grow extensively nowadays, when he has maize as an alternative crop. Maize occupies the land for about four months at most in the summer, as compared with six months for wheat in the winter, and its yield is about half as great again as that of wheat from the same area. The result is that the wheat crop of Egypt is not more than thirty million bushels, while the maize crop is quite sixty million bushels. But this does not suffice for the needs of the inhabitants, the equivalent of some five million bushels more of wheat being imported, mostly as flour from France. This is due to the changing taste of the upper classes, and to the European colonies in Egypt, who prefer European bread to native bread, and can only obtain such light bread from imported wheat or flour. Thus, before Egypt can begin exporting wheat, she has to make up leeway to the extent of some 15 to 20 per cent. increase in her present wheat crop in order to wipe out this import.

There seems to be some idea that Egypt still exports wheat and maize, since such exports figure in the Customs' returns. Actually, however, this export is almost entirely the supply of food to the annual Pilgrimage to Mecca. It is far outweighed by the imports, mostly of flour.

It remains to be seen whether Egypt can make up this leeway and become a wheat-exporting country. This, in the first place, necessitates the exclusion of some cotton, since, although wheat is a winter crop, it is not harvested until long after the cotton has been sown. Thus, the same piece of land cannot carry cotton after wheat in the same year. Wheat must be followed by maize. Assuming Egyptian cotton to have become unprofitable, owing to the ravages of the boll-worm, and to remain at the area of one and a-quarter million acres at present fixed by decrees, could the remaining half-million acres be all put under wheat? It is a difficult question, but the history of Egyptian exports and production for the last few years indicates fairly clearly that wheat would stand little chance in rivalry with beans. The export of beans from Egypt has been diminishing steadily, as more land went under cotton, the yield of beans is larger than that of wheat from the same area, with much the same price—thus making it the more profitable crop for the grower—and lastly, instead of having to make a new market under disadvantages, Egyptian beans have long been on the Egyptian market, with a good reputation behind them. Probably an increased supply of Egyptian beans could be readily absorbed.

Beans More Profitable.

It is more than probable that the fellah, looking very carefully to his own pocket, will put his land under beans, rather than wheat, if he cannot grow cotton on it. He can sell his surplus of beans, and over-feed himself on the subsequent maize crop. Beans also have the advantage that they do not diminish, and may increase, the nitrogen-fertility of the soil on which they grow, thus leaving it practically unimpaired for the following maize crop.

Again, even if beans did not rival wheat successfully as a business proposition, much of the land set free for a wheat crop through the prohibition of cotton would normally be put under berseem (clover) to maintain its fertility, and this could not be dispensed with in favour of wheat.

It seems reasonable to assume that not more than two-fifths of the area set free from cotton will be put under wheat, making 200,000 acres in all. This is probably an extremely high estimate, but if this land produced thirty bushels an acre, which is well over the average yield in Egypt, it would give a crop of six million bushels. This amount is just about equal to that which the country has been importing in the form of flour and grain.

Thus, Egypt can be self-supporting (given a milling industry), but at the present rates of yield there is no likelihood of her exporting more than a trivial amount of wheat, if, indeed, any at all.

Maize Flour.

On the other hand, her export of beans might be greatly increased, and the question of maize is on an entirely different footing. In this case the whole area freed from cotton could be turned over to maize. This crop, yielding about 40 bushels an acre, would give—on the half-million acres turned over from cotton—a crop of some 20,000,000 bushels, none of which would be needed for native consumption, already fully supplied, and therefore free for export; this amount would be roughly a hundredth part of the total maize crop of the world, but since most of the world's maize crop is consumed locally, only a small part being exported to Europe, it would make a conspicuous figure on the world's maize markets. It would, in fact, have to be handled with care, or it might become almost unsaleable through over-supply, unless its appearance were notified to the trade in advance, and public opinion duly prepared to make more use of maize in the public diet. At a time of high wheat prices the employment of maize flour has much to recommend it. The flour is too "weak" to make a good loaf by itself, but it can be mixed with strong wheat in the proportion of half and half, and then bakes satisfactorily, while there are many special preparations in which it is employed. Lastly, for those consumers who were willing to abandon the conventional loaf, it could be made into the flat pancakes of native bread, as in Egypt.

Summarising, it would seem that an export of wheat from Egypt is very unlikely.

British Interests in Turkey.

Red Tape versus National Interests.

To the Editor of THE NEAR EAST.

Sir,—Our trade with Turkey consists in exports and imports, and as money is cheap here and dear there, we are always creditors and very seldom debtors. Such being the position when war began with that country, our outstanding balance there, roughly speaking, could not have been under two million pounds, the fate of which becomes daily more uncertain as the war drags on and the Turkish Government's power of spoliation increases with its greater needs.

Earlier than this our merchants had, on account of the war with Germany, curtailed credit to Turkey and called for outstanding balances. Those of the Turkish merchants who were able to cover their debit balances took the earliest opportunity to ship produce as cover (or part cover) to this country. A few of them, feeling insecure with their own Government, sent us even shipments in excess of their indebtedness so as to leave them in secure hands on this side. All this took place in the usual way of legitimate business, which the Government of this country is constituted to protect, and lays itself out to promote for the benefit of its people.

What was, therefore, the surprise and consternation of merchants on this side, on arrival of the steamers bringing these shipments, which left the Turkish ports before war was declared, to find the Government claim them as enemy goods I leave you to imagine!

In the majority of cases our merchants were expecting to sell these goods, and with the proceeds to meet other engagements they had, and perhaps to pay current expenses, too. They found themselves deprived of them, and, in consequence, some were thrown in difficulties and had to suspend payment altogether. Others, more fortunate, were not injured beyond having to wait for their money, and are still waiting the pleasure of the prize court.

Here, then, was the Government, instead of giving protection to legitimate trade, doing wilful harm to its *own* traders, and jeopardising its reputation for honour with their clients, who in 99 cases out of 100 are friends and not enemies to this country.

It was my duty as a senior of a business firm—quite disinterested in the result—to call the attention of the proper authorities, outside the prize court which is supposed to act on their behalf, to this failing, and I am glad to say they admitted that there can be no claim on the part of the Government to the goods, beyond preventing the proceeds from leaving this country during the war, or allowing any debtor, having interest in these goods, to avoid settlement here of an unsecured debt.

This, however, left the question of the prejudice caused by the temporary sequestration. This sequestration was effected in two ways. One way was that the Government took the goods and disposed of them; the other way was that it allowed the merchants to receive the goods, giving it a banker's guarantee for the proceeds thereof, and we know that bankers will give no guarantee without being paid for it, while requiring a security of equivalent value to the guarantee, so the one way is like the other—the merchant remains deprived of the use of his money for the time being.

This prejudice was recognised, too, but as an only excuse for its creation, the Government says that it has no means of telling which of the goods are British firms' absolute property as cover for money lent on interest, and which are alien enemies' absolute property sent here on consignment!

Consequently merchants will have to put up with the prejudice until the prize court and the committee attached to it can go into these matters and examine the proofs which merchants can produce for their title in the goods.

A more absurd and arbitrary way than this procedure can never be registered against any Government.

It is, therefore, necessary to call the attention of Parliament, first to the violation of the law, which requires any claimant to property in a third party's possession to prove his title to it, before putting sequestration upon it; second, to the incapacity of Government officials in dealing with the task, after knowing that they were causing prejudice and waste of public money and time.

I will make no comparison between our treatment of this question and our Allies' handling of it, but leaving our Government to follow its own conclusions, I ask what would have been simpler than to appoint forthwith an assessor who could have called on the merchants interested, and offered for a small charge to examine their books and correspondence relating to the goods in dispute and settled the claims according to law and equity?

Unfortunately, mere Government clerks cannot see or do such things, and the heads of departments are content to go on with routine work for ever, or to shift responsibility from one shoulder to another!

The Government has certainly a great deal to do just now; nevertheless, it is to our benefit to see that competent specialists are made use of where and when required, or as the Arabic proverb says, "to give our bread to the baker to bake, were he to eat half of it," *i.e*, sooner than losing it all by entrusting it to incompetent hands!—Yours,

ALEXANDER SEFI.

Cricklewood, June 30, 1915.

BRITISH SEAMEN'S HOSPITAL IN CONSTANTINOPLE.

Reuter's Athens Correspondent (June 26) stated that, according to advices from Constantinople, it is understood that the British Government refuses to continue to contribute towards the upkeep of the British Seamen's Hospital in Constantinople. It is feared that, consequently, the Turkish authorities will seize the property, which would mean the loss also of the Consular residence, the sailors' home and the prison, all of which are adjoining buildings. It is necessary (continues the correspondent) to draw the attention of British shipowners' associations and the Chamber of Commerce to this state of affairs, and the risk of losing such valuable property, purchased with shipowners' money. It is urged that steps should be taken to preserve valuable and useful institutions which are the pride of the British colony and monuments to British trade and commerce in the Levant.

The *Daily Telegraph* Athens correspondent cables a similar plea, saying that the hospital was built with funds contributed by British shipowners, and that "it is most undesirable that this fine hospital should fall into the hands of Turks."

BRITISH TRADE WITH GREECE.

The following information is from the report by H.M. Consul at Piræus (Mr. W. J. Norcop) on the trade of that district in 1914, which will shortly be issued:—

With the acquisition of new territory there arose an inclination on the part of private individuals having a certain amount of capital at their disposal to establish industries; and there was a sensible increase in the number of enquiries for British-made machinery of various kinds, including boot-making plant, machinery for making cigarette boxes, tobacco packets and currant boxes, stone-breaking machinery, tar-spraying apparatus, small turbine plants and pumping machinery in general. The trade in motor cars, both for private and commercial purposes, increased considerably, and several agencies carrying stocks of motor tyres and other accessories were established in Athens, with branches at the various large centres. There was also a much increased demand for cotton and worsted yarns, and enquiries were made for machinery with a view to the opening of new mills. These enterprises, together with the enquiries for boot-making plant already mentioned, were a direct result of the late wars; the increase in the numbers of the Greek army on peace and war footing and the doubling of the population owing to the acquisition of fresh territory, gave rise to a natural desire to be able to manufacture the large supplies of military equipment hitherto obtained from abroad, and to a feeling that the new markets opened up in Macedonia, Epirus, Crete and the other newly acquired islands should be catered for by the mother country herself.

Imports into Greece from Germany and Austria-Hungary have certainly diminished, though they have by no means ceased. German shippers continue to extend the same terms of credit that they gave before the war. On the other hand, some British manufacturers, who formerly gave credit, or who accepted cash against bills of lading on presentation in Greece, now demand either cash with order, or a confirmed banker's credit in London to guarantee cash before shipment. To the further detriment of British trade with Greek ports, freights are high and uncertain. The result is that Greek merchants are being forced to apply to American exporters for such articles as they can no longer obtain from Germany and Austria-Hungary.

One reason why German and Austro-Hungarian firms have done well in Greece is because they have always been willing to suit the requirements of the market in many ways which British manufacturers in general have not appeared willing to do. Other factors contributing to the success of German and Austro-Hungarian firms are the cheapness of their goods, long credit (60 to 120 days), c.i.f. prices which include cost of packing, discounts, quick delivery of goods, the use of the metric system of weights and measures, and the employment of smart travellers with a practical knowledge of their duties, who gauge how much credit can be given.

There have been many complaints at the slackness of delivery on the part of British firms which has deflected much business from them, and has enabled competitors to step in and secure trade by prompt deliveries.

Strange as it may appear, it is nevertheless true that Greek merchants have found it easier to obtain goods from Germany than from the United Kingdom. At least a proportion of the orders which have been sent there have been executed with great promptitude and without any change of terms, the long credits which have always been allowed by German firms being still allowed without difficulty or question. Thus a good opportunity has been lost by British manufacturers of securing the German trade.

Greek firms would prefer British goods if they could only obtain terms similar to those given by competitors. The Greek buyer wants credit because the customs duties in Greece are very high, and, as he has to pay these duties before he can get delivery of the goods, he wants time before he pays the bill of the exporter.

The exportation of tea from Egypt is now permitted.

Egypt and the War.

Openings for British Trade.

(From Our Own Correspondent.)

Cairo, June 18.

The British Chamber of Commerce of Alexandria, to which all British manufacturers, who trade with Egypt, owe so much and which is ever on the alert for opportunities for improving the commercial relations of the British Empire with this country, has not lost much time, and following the example of its prototypes at Home and in the Colonies, it has set itself to a serious study of the openings, which will result from the exclusion of Germany and Austria from the Egyptian market. The fruit of this study has just been given to us in the form of a most interesting report on the subject. This document might, with advantage, be read side by side with the article entitled "German and Austrian Trade with Egypt," which was published in The Near East of November 13 last, for whilst most of the statistics and points were already noted in that article, the Chamber's report supplements it with many useful details and items of information.

The statistics printed below either did not appear in the table accompanying the above-mentioned article, or were included in the figures for the category to which they belong. The notes appended are, perhaps, the most interesting part of the report. Thus, under textiles, the imports of which amount annually to about £E3,000,000, we are informed, that, whilst grey and bleached cotton piece goods and most printed calicoes come from the United Kingdom, Austria and Italy monopolized the imports in flannelettes, longer credits being given for coloured than for white goods. Plain and fancy dyed cotton goods came principally from Italy, Austria and Germany, the quality being inferior to that produced in Great Britain and the lower prices appealing more to the natives. It is pointed out that this trade has much increased of recent years and that it deserves the special attention of British manufacturers, as it is one, where they have been beaten by Continental competitors, whose goods have superseded various plain white and grey goods made in Lancashire. It is interesting to note that the United Kingdom has held its own against Continental manufacturers in the matter of Cotton Single Yarns, but that a large share of the trade has gone to India, where the yarn spun by the local mills is good enough for the native weaver. In cotton hosiery there is a large growing demand chiefly in the cheap lines. Whilst the German article has somewhat cut out the British, owing to price, it is curious to note that the latter, itself, has been ousted by articles of Japanese manufacture.

Machinery.

Under machinery we find that the bulk is imported from the United Kingdom, but that other countries have of late begun to compete, notably Germany, which considerably increased its imports. Electric motors, principally, come from England, but, in electric appliances, British manufacturers have neglected the market the bulk of which, especially metallic filament lamps, have been supplied by Germany and Austria. The United Kingdom supplied a considerable share of the iron and steel, but Belgium was predominant in iron and steel plates and bar and angle-iron and girders and latterly German imports were annually increasing. In hardware, as in machinery and metal goods, German manufacturers captured a great part of the market by offering long credits and by supplying inferior goods at low prices. It is stated that five or six years ago more tools were imported from England than from all the other countries put together, but the British manufacturers could not compete with their German competitors under the circumstances, since the inferior article appealed to the purchaser by reason of its cheapness. The same applies to the bedstead trade, which up to two years ago was confined to Great Britain. It is further pointed out that the trade in cheap articles has been encouraged of late years by the Government, which, in putting its requirements up to public tender, has apparently favoured the lowest priced articles without sufficient consideration for the quality.

There would appear to be great openings in table cutlery, window glass, lamp-glasses, paints and colours, etc. Germany seems to have ousted the French make of table cutlery, which is in more demand than the bone or ivory-handled variety, with an article similar in appearance, but, of course, cheaper in price. Belgium has almost entirely supplied the window-glass, whilst lamp-glasses, the stock of which is very low, came almost exclusively from Germany and Austria. In colours and paints the better class article has been supplied by Great Britain, but in the lower grades Germany, whose prices often defied competition, Italy and Belgium held the market.

Leather and Stationery.

In leather goods of every description Germany has generally done the most business owing to the demand for a cheap article. The English goods have usually been found too heavy and of too good quality for the local buyer, though when an English-made article has been purchased by a client, he has always found that the higher price was compensated for by the durability.

A large trade is apparently to be done in pencils, penholders, leather-board and cardboard. Pencils were almost entirely a German speciality, cheap qualities of blue and red pencils, both combined and separate, carpenters' pencils and cheap penholders being in great demand. The two other articles were chiefly supplied by Germany and Austria, and a large trade is to be done, there being especially a big demand for brown cardboard used in the soles of boots.

Imitation jewellery was largely supplied by Germany and Austria. Real gold was furnished chiefly from Germany at cheap prices on account of no hall-mark being necessary. In this connection we obtain an insight into German methods, for the report goes on to say that 13-carat gold is often stamped 18 carat.

How to Work the Market.

Having in this manner indicated briefly where openings exist, the Chamber proceeds to call the attention of British traders to the procedure which they should adopt if they wish to do successful business with this country. In the first place they should bear in mind that business in manufactured goods, with the sole exception of cotton piece goods, is largely done in Egypt through the medium of local commission agents, and that the home export houses are rarely utilized. Consequently it is important that they should appoint agents in every case and should ensure that the men they want to appoint are responsible and competent by consulting the Chamber on this point. Secondly, when the magnitude of the business or the prospects warrant the expense and time, merchants should, themselves, visit the country and should periodically send out travellers. The Chamber, very rightly, draws attention to the fact that the percentage of British travellers, who visit Egypt, is very small compared with those from other countries, and that many of them speak no other language than their own. It points out that Egypt is not only on the way to the Far East, but is also the centre for visiting Syria and the Near East generally, and that it should be possible for travellers to break their journey here without any great extra expense. In this connection it mentions that reduced travelling rates for commercial travellers are granted on Continental steamship lines and suggests that British traders should take measures to obtain similar facilities on British steamship lines.

Of the accuracy of the Chamber's remarks on the subject of travellers there can be no question. German manufacturers never dream of sending out a representative, unless he can speak at least French and English, and very often the men, who come to this part of the world, can also speak Italian and Greek. When one considers the vast cosmopolitan population of this country and the fact that a very great part of the retail and agency business, when it is not done by natives, is in the hands of Levantines and Greeks, one can readily understand that to succeed in Egypt, "push and go" methods require to be supplemented by linguistic qualifications.

Studying the Local Market.

The Chamber might with advantage have drawn attention to one other important requirement—viz., the great necessity for home

Table Showing Comparison between German, Austrian, and British Trade in 1913.

	Total.	Germany.	Austria.	United Kingdom.
	£E.	£E.	£E.	£E.

manufacturers, if they want to extend their trade, to study the local market and to be prepared to adapt themselves to the requirements of that market. Whilst one of the reasons they were beaten in the past by their German and Austrian competitors was that the latter undersold them at every turn; it cannot be denied that they asked for trouble by refusing to supply anything which was not of their own standard or which necessitated any deviation from their methods. Thus, in many instances of which the writer is personally aware, home manufacturers steadily declined to deliver goods packed and folded in the manner asked for by the local traders and consumers, with the natural result that the German and Austrian, who were far more accommodating and enterprising, found that the market was, so to speak, thrown at them when it was known that they were ready to comply with any request, no matter how trivial, presented by their clients. Of course, there are limits to compliance with buyers' requirements which are apt at times to become somewhat exacting, but it cannot be contested that in the past the British trader has been far too conservative, and that, as a consequence, he has in many cases lost leeway to his foreign competitor solely through this characteristic.

Parcels Post.

A case in point, as it happens, is cited by the Chamber in its report—viz., the proportion of trade done by the United Kingdom by parcels post. It is pointed out that a large amount of trade is done with Egypt in this manner. Thus in 1913 imports through this medium came to £E967,284, and in 1912 to £E949,869. The principal lines are hats, clothing, stationery, fancy leather goods, photographic supplies, and small articles of hardware. The report states that while the United Kingdom supplied in 1912 more than 30 per cent. of Egypt's imports, she sent only 19 per cent. of the parcels received from abroad. The reasons for this are that, firstly, British manufacturers often refuse to accept small orders, while foreign firms cater for this class of trade; and, secondly, that the conditions of the British Post Office are less favourable, the cost being 50 per cent. to 100 per cent. more than that imposed by the French, Italian, Austrian, and German Post Offices, the maximum bulk allowed being much less, the time in transit longer, and the risk of damage greater, due to packing in bags instead of in baskets or in boxes.

C.O.D. System.

Further, the Chamber points out that, although the C.O.D. system was inaugurated between the United Kingdom in 1908, little advantage has been taken of it. In 1913 13,985 parcels valued at £E21,697 were exchanged with the United Kingdom compared with 27,880 parcels, valued at £E50,156, with France, and 28,844 parcels, valued at £E35,312, with Germany. Frequent cases have arisen where British firms have either shown complete ignorance of the existence of this system or have simply refused to send goods by this route. If this refusal is due to fear that consignees will decline to take the goods when eventually tendered by the Egyptian Post Office, it may interest home manufacturers to know that, according to statistics obtained by the Chamber, only 1 per cent. of C.O.D. parcels are returned to the senders for various reasons.

The Chamber closes what must be considered a most valuable report with the suggestion that the manufacturers, traders, chambers of commerce, and other corporate bodies in Great Britain should be more adequately represented by properly qualified Government trade commissioners, or, failing that, that the services of the British Chamber of Commerce, with its trained staff, should be officially made use of. It also suggests that when the time is opportune a British pattern and sample exhibition should be organised in Egypt. These are matters that the home traders should consider. In the meantime they should, whenever the opportunity arises, put themselves into communication with the British Chamber of Commerce at Alexandria, which can supply full information on many of the branches of trade that have not been dealt with in its report, and can give sound advice on all commercial questions submitted to it, for its members comprise experienced and reliable representatives of practically every British commercial interest in the country.

Trade Notes.

Egypt.

Messrs. Alfred Setton and Co. were the successful tenderers recently to the War Office, Cairo, for the supply of Indian grain bags.

Tenders are invited by the Egyptian Ministry of Finance for the supply of office articles of stationery (including paper fasteners, pens, pencils, ink, gum, typewriter ribbons, etc.) required for the use of the various Egyptian Government offices during 1915. Copies of the conditions and form of tender, etc., may be obtained from the "Economat Central, Ministère des Finances," Cairo, at which address also sealed tenders, made out on the proper form and accompanied by samples of the articles it is proposed to supply, will be received up to noon on July 22.

A provisional deposit equal to 2 per cent., or a bank guarantee of 10 per cent., of the value of the offer must accompany each tender. A copy of the *cahier des charges*, together with lists of the various articles required, may be consulted by United Kingdom manufacturers of the goods mentioned at the Commercial Intelligence Branch of the Board of Trade.

Cyprus.

The Board of Trade have received copy of a Proclamation, dated May 23 last, which prohibits the exportation from Cyprus of "empty barrels" to all destinations.

Crete.

H.M. Vice-Consul at Canea (Mr. E. C. D. Rawlins) reports that a local firm, which has hitherto dealt almost exclusively with German and Austrian firms, desires to get into touch with United Kingdom manufacturers of woollen vests and pants; suède, woollen and all kinds of gloves; straw and felt hats; caps; handkerchiefs; cotton, etc., socks; and shirts and collars. It is understood that the firm is also interested in perfumery. During the war the firm in question is willing to accept goods sent c.i.f. Piræus, and to pay net cash on delivery of goods or on arrival of shipping documents at Canea. Correspondence should be in French. Quotations should be accompanied by samples, and in this connection H.M. Vice-Consul remarks that the sending of gratis samples is a feature in the methods of foreign competitors who have built up a successful trade with Crete.

United Kingdom manufacturers of the goods mentioned should apply, in the first instance, to the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C., for the name and address of the inquirer. Further communications should be addressed to the British Vice-Consulate, Canea.

Karachi.

A recent Consular report states that various kinds of combs are in demand just now. The market for combs here has always been good, but now, when Germany has been shut out, the market should prove to be really worth cultivating. Combs set with jewellery are wanted as well as the plainer ones. Celluloid combs are likewise in demand. Parsee women, as a rule, use a large number of combs in their hair, as they seldom wear hats, but throw a light piece of silk or other material over their heads. Imported celluloid dressing-combs should be about 6 ins. long, and they would sell at 2s. 6d. to 3s.

WAR ON GERMAN TRADE.

In connection with the campaign undertaken by the Board of Trade, on the advice of the Advisory Committee on Commercial Intelligence, to assist British manufacturers and merchants to secure trade formerly in the hands of Germans or Austro-Hungarian firms, the Board continues to receive a very large number of inquiries for the names of sellers or buyers of articles.

Special arrangements have been made in the Commercial Intelligence Branch of the Board of Trade for dealing with these inquiries, and lists are prepared and circulated of articles which inquirers desire (a) to purchase, and (b) to sell. List 27 is now ready, and may be obtained by United Kingdom manufacturers and traders.

CYPRUS TRADE.

(From Our Own Correspondent.)

Cyprus, June 18.

Trade is very stagnant, especially as regards exports, though some wool is being sent to England. There are plenty of last year's carobs on hand still, but freights are practically prohibitive. The prices of all necessities are rising, the prohibition of export of cattle has done nothing to lower the price of meat, and until the municipalities take this question up we cannot expect meat at a reasonable price.

CLOTHING TRADE IN EGYPT.

The following information regarding the clothing trade in Egypt is extracted from recent issues of the "Journal of the British Chamber of Commerce of Egypt":—

The total imports of ready-made clothing into Egypt in 1914 were valued at slightly over £E1,000,000. Of this amount, imports from Austria-Hungary represented about 28 per cent., from the United Kingdom about 16 per cent., from Germany nearly 14 per cent.; the bulk of the remainder was furnished by France and Italy.

The predominance of Austria-Hungary in this trade has probably been due mainly to long credits, the average being nine months from the date of arrival of the goods. But apart from the question of facilities as to payments, Austrian firms have especially laid themselves out to meet the taste of native customers, sending representatives twice a year to Egypt. Both Austrian and German firms were able to quote c.i.f. prices when requested to do so. The establishment of retail shops in Cairo and Alexandria, and branches in other towns, has also formed an important part of the Austrian and German systems of obtaining trade in Egypt. As a result of the war Austrian and German competition has been eliminated, and the bulk of the business is now being done for cash or on greatly reduced terms of credit. With the elimination of this competition, which has depended more on terms of credit than on prices, the principal obstacle to British trade has been removed. If British manufacturers desire to obtain a larger share of the clothing trade in Egypt, they must study local tastes and requirements. Small orders should be taken and c.i.f. prices quoted if necessary. With reference to the taking of small orders it may be noted that ties are chiefly imported by parcels post, and clothing could also be imported by means of the same service.

In view of the heavy demand for fezzes in the Near East and North Africa the suggestion is put forward that factories should be started in the United Kingdom for the manufacture of these goods. It is also suggested that, under present circumstances, the question of opening branches in Egypt is worthy of serious study by some of the large retail establishments in the United Kingdom dealing in ready-made clothing.

The section of the public which buys ready-made suits has been accustomed for many years to the Austria "cut," and Vienna firms make a speciality of supplying the designs of cloth most favoured by native customers. The tendency on the part of the natives in the towns is to adopt European clothing. In many cases, however, their limited means do not permit of the purchase of new garments, and this fact may lead to a fairly large trade in second-hand garments.

The trade in Egypt for hosiery is of considerable and growing importance. The native demand is principally for cotton hosiery in cheap lines, not too flimsy but with a fair amount of weight. German articles were sold cheaper than those of British manufacture.

The imports of shawls into Egypt during 1913 were valued at £E92,761, of which more than half was manufactured in Germany, about a quarter in Austria-Hungary, and only £E2,706 was furnished by the United Kingdom. The qualities most in demand are of two distinct manufactures: one known as the zephyr is made of low quality wool zephyr and sold by the kilogramme; the other is a mixture of cotton and wool, made in all fancy colours and various sizes.

EGYPTIAN COTTON.

(From Our Own Correspondent.)

Alexandria, June 21.

As a result of Italy entering the war, prices have dropped. Exports have weakened, and it looks as though the stocks held here until next season will amount to about 700,000 cantars.

In view of the excellent outlook for the coming Egyptian and American crops, speculation is circumspect, and prices show no tendency to rise. The Egyptian Government is beginning to sell the cotton stored in order to realize the prices paid for its stock.

The Egyptian crop is progressing favourably, though it is ten days later than last year. Worms have appeared on the leaf in some districts, but the heat of the past few days prevents the disease from spreading.

761,500 bales of cotton have been exported this season, as against 906,000 bales during the same period of last year.

Arrivals from the interior amount to 6,300,000 cantars as against 7,590,000 cantars last year.

The results obtained by the Sudan Plantations Syndicate in 1914 were not so satisfactory in consequence of the partial failure of the crop and the low prices at which the cotton had to be sold, and the dividend was reduced to 2½ per cent. The latest reports of the Zeidab crops are very good.

COTTON MARKET.

(From Our Own Correspondent.)

Liverpool. July 1.

Messrs. Reynolds and Gibson report :—

Egyptian Spot.—There has been a fair demand for cotton this week, and good business has resulted. Prices have ruled rather in buyers' favour, and quotations of Brown, Upper, Joannovich, and Nubari are reduced five points, and Abassi ten points, while those of Sakellarides are unchanged for good and below, and five points lower for fine and extra fine. The sales are estimated at 3,200 bales, against 3,100 last week.

Manchester.

With the cotton trade dispute out of the way, at any rate for the present, there has been a fair business doing. We hear that it is principally in the low counts, but on the other hand we gather that the higher counts are likely to come more into demand in the near future.

SUDAN COTTON-GROWING.

In their report to the shareholders, the directors of the British Cotton Growing Association refer to cotton growing in the Sudan as follows :—

Owing to the war the arrangements for raising the loan of £3,000,000 for the development of the Sudan had to be suspended. In the meantime some preliminary operations were put in hand, and it is understood that the investigations prove that no unforeseen engineering difficulties are likely to occur when the work of construction is commenced.

A pumping station has been erected at Barakat, a little south of Wad Medani, and a considerable quantity of land was planted with cotton in 1914. The plantation at Tayiba was extended to 2,000 acres. The latest reports of the crops at both stations are very good.

A new co-operative system, which may have most important results, was introduced by Lord Kitchener at both these stations. The Government provide the land and the water and receive 35 per cent. of the proceeds of the crop. The Syndicate will provide the financing, direction, and management, and will receive 25 per cent. This leaves 40 per cent. to go to the tenant for his time and labour. Lord Kitchener is much to be congratulated on the boldness and simplicity of this scheme.

Arrangements have been made by the Association to assist in the financing and marketing of the 1914-15 crop, and it is hoped that the assistance given by the Association will ensure that the native grower will receive the highest possible price that the market will justify. This is the more essential at the present juncture when prices are on the low side.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.

MANUFACTURERS OF

"LALIMLI" WOOL WEAR

Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .

Near East Markets.

CYPRUS GRAIN.

The Government of Cyprus offers for sale 218,500 kilés (bushels) of barley, and 42,000 kilés of oats, both of this year's harvest, subject to the retention of such amounts as may be required for seed corn advances. Particulars of the amounts to be retained may be ascertained from the treasurer. It is estimated that all this grain will be placed in the stores between the month of June and October 31, 1915, and delivery must be taken within a period to be arranged with the treasurer, but in no circumstances later than November 30, 1915.

The grain alluded to will be placed in varying amounts in the different Government stores, and tenders for the purchase of any one or more lots will be received by the Treasurer, Cyprus, on or after July 10, 1915. (Tenders may be submitted for lots of 2,000 kilés of barley for early payment and delivery.) Samples of the grain at the various stores may be obtained from the commissioners of the districts, but no sale effected on the basis of this notice shall be deemed to be a sale by sample. All the stores, with the exception of the store of Nicosia, which is connected with the Famagusta Harbour by railway, are situated near the sea shore.

CORFU OLIVE OIL.

H.M. Consul at Corfu reports: "The 1914 olive oil crop was insignificant, producing only about 20,000 barrels (of 16 gallons) of a very poor quality. The 1915 crop is expected to be a very good one, although no estimates could, at the time of writing, be formed. The prices of olive oil fluctuated between £40 and £60 per tun f.o.b., casks included. A small quantity of extra fine oil was shipped to the French and Italian Riviera (Nice, Porto Maurizio, Oneglia, San Remo, and Lucca), where it is bottled, etc., and sold as Lucca oil.

MALT EXPORTS TO THE NEAR EAST.

Answering a question by Mr. Gretton, Mr. Montagu on Wednesday gave the following figures showing the amount of corn malt, the produce of the United Kingdom, which was exported from the United Kingdom to certain countries during the months of January to May, 1915, and during May this year:—

	Jan.-May, 1915. Cwt.		May, 1915. Cwt.
Greece	4,739	....	1,200
Egypt	12,961	....	400
Gibraltar	46	....	46
Malta and Gozo	167	....	84

NEAR EAST SILK PRODUCTION.

The following figures, showing the Near East silk production in 1913 and 1914 (estimate) are from statistics published by the Lyons Silk Merchants' Union (quantities in kilos):—

	1913.		1914. (estimate)
Turkey-in-Asia—			
Brousa and Anatolia	465,000	..	360,000
Syria and Cyprus	490,000	..	420,000
Other provinces	135,000	..	110,000
Turkey-in-Europe	85,000	..	60,000
Balkan States (Bulgaria, Serbia, and Roumania)	135,000	..	105,000
Greece, Salonica, and Crete	185,000	..	150,000
Caucasus	385,000	..	350,000
Turkestan and Central Asia (exports)	225,000	..	—
Persia (exports)	210,000	..	—

The world's total production in 1913 was 27,320,000 kilos (China and Japan together 20,000,000 kilos) as against an estimate for 1914 of 21,870,000 kilos.

GREEK CURRANTS.

The following information is taken from the reports of the British Consular officers at Zante and Cephalonia:—

Zante.

According to the official statistics of the Privileged Company for the Protection of Currant-growers and Merchants, which has the control of the currant trade, the total crop of the island reached some 9,000 tons in 1914, against 8,000 tons secured in 1913, of which, however, only 7,000 tons were more or less marketable, whilst about 1,500 tons were completely ruined by the heavy rains in August.

With the outbreak of hostilities the position of the commodity became precarious, not only owing to the closing up of the German and Austro-Hungarian markets, but also to the stoppage of shipments for the Netherlands, normally a large consumer of Zante currants. The trade was thus confronted with an impending crisis, to avert which the Government resorted to the expedient of increasing by 15 per cent. the quantity which by law must be retained in the country, with a view to enhancing the value of the commodity by restricting the amount available for exportation. The quantity thus retained was raised from 35 to 50 per cent. in the Morea, and from 40 to 55 per cent. in the Ionian Islands. This measure, put into effect only after a considerable quantity of currants had been exported, produced some activity in the market, but prices were dsadvantageous to the producers, who had already sustained a loss to the extent of 20 per cent. of their produce through the rains.

As the season advanced, conditions in Greece improved somewhat, in consequence of the demand from the United Kingdom and America, and also on account of large shipments being permitted for Italy and the Netherlands. About 3,000 tons of the crop were exported from Zante to the United Kingdom, and 500 tons to the Netherlands. Some 2,500 tons of rain-damaged fruit entered the stores of the Privileged Company for retention, and about 1,500 tons remained in the hands of producers and merchants by the end of the year. Prices opened at 135 drachmae per 1,000 lbs. for sound fruit, but gradually fell to 125 drachmae per 1,000 lbs. as the British market became replete with the Morea produce; whilst the rain-damaged fruit realised from 85 to 120 drachmae per 1,000 lbs. These prices were considered unsatisfactory, in view of the increase of shipping expenses, high freights, and cost of packing brought about by the war.

Cephalonia.

The currant crop in Cephalonia was about 4 per cent. below that of 1913. About two-thirds of the crop was housed dry, as was also 1,000,000 lbs. which had been partly rain-damaged; the greater part of the remainder which was on the drying grounds was so badly damaged by the continual rain that followed that about 3,500,000 lbs. were delivered into the stores of the Privileged Company for the Protection of Currant-growers and Merchants up to the end of the year, and probably a further quantity will have to be delivered out of the fruit left behind. The price obtained for prime fruit shipped from the opening of the season to the end of the year was from £1 3s. 6d. to £1 5s. 6d. per cwt. c.i.f., including the risk of war, the average price being £1 3s. 6d. per cwt. c.i.f.; for the slightly rain-damaged fruit, which was sold as sound, prices were between 1s. and 1s. 6d. c.i.f. below that for prime fruit.

The July number of the Chamber of Commerce Journal publish a special supplement entitled "Trade Products of the British Empire." It is a statistical account of the resources of the British Empire as a supplier of foodstuffs and of raw materials for British industries, with statistics and notes as to foreign sources of supply.

PRODUCE REPORT.

Currants.

LONDON, July 1.

In the absence of stocks on spot, business has been confined to sales of parcels afloat by s.s. "Salermo" and "Princesse Clementine." New crop sells well, so far as Pyrgos is concerned, but owners' ideas for better descriptions are higher than buyers are willing to pay

In Liverpool there have been no further arrivals, but the s.s. "Avon" is just due with about 1,000 tons. The demand during the week was good, and holders in some instances made slight concessions in order to clear ex quay. Good to fine qualities are difficult to obtain, and any odd parcels available command high prices. Advices from Greece are firm, and prices quoted higher.

Sultanas.

After the late great activity the market for Smyrna fruit is quiet, but prices are steady at late rates. There has been a good business in Afghans, which are relatively cheap. In Liverpool, owing to scarcity and the advance in prices asked for the few that are offering, there has been very little business doing. Should there, however, be any extra demand, dealers will have difficulty in finding any fruit for their requirements, as there is very little now remaining in first hands, and apparently nothing further to come forward.

Dates.

There has been only a moderate demand at recent rates. Persians are quoted 14s. 6d. to 20s.

Onions.

The present outlook for this article is far from promising. Heavy offerings of Egyptian meet with a dragging sale, and quotations are again lower for all qualities. Some faulty parcels changed hands last week at from 3s. 9d. to 4s. per bag at the auction.

Seeds.

Linseed is steady, but generally quiet:—London-Egyptian spot and afloat quoted 52s. 9d., June-July was sold 53s., July-August 53s. 4½d., August-September 54s. Cotton seed is steady, but rather quiet:—London-Egyptian spot quoted £8 17s. 6d. and June £9 2s. 6d. per ton. Rapeseed is steady, but generally quiet; pure Guzerat June-July is quoted 56s., and brown Cawnpore ditto 51s.

Rangoon beans are firm at 74s. ex wharf, whilst for June-July shipment £16 10s. per ton c.i.f. terms is quoted.

Oils.

Linseed Oil.—The market is quiet, and prices for arrival are lower in some positions. On the spot, pipes £26 5s., barrels £27, month £26 12s. 6d. to £26 15s. sellers, July-August £27 7s. 6d., September-December £28 5s. Rape oil is dearer only for Japan, but otherwise there is no change to report. Ordinary brown on the spot, naked £36 to £37; English refined, barrels, £38 to £40. Cotton oil has improved in value; crude, on the spot, pipes, £29; refined, on the spot, pale, pipes, £31; sweet, barrels, £36 to £37.

Oil Cakes.

Cotton Cakes.—Recent arrivals of Egyptian have been principally disposed of, but with a fair quantity obtainable afloat the market is with difficulty held up, in spite of higher quotations from the other side. Spot values are £6 10s. to £6 12s. 6d., while for June shipment holders ask £6 10s., and July shipment £6 12s. 6d. to £6 15s. per ton. Decorticated cotton cakes may be bought in limited quantity at £8 15s. to £9 per ton.

Linseed Cakes.—The market this past week has been extremely quiet, with very little business passing, but with no pressure on the part of the holders values remain firm, while in forward positions a premium of fully 10s. to 15s. per ton is demanded. Best London-made make £10 2s. 6d. to £10 5s.; fine quality of Greek in bags offer at £10 10s.

Macedonian Timber.

Mr. F. A. Salaman recounts in the *Timber Trades Journal* of June 5, a visit of inspection to a large timber estate in Naoussa, Macedonia, from which the following extracts are reproduced :—

The town of Naoussa is built on a commanding picturesque plateau, overlooking a garden scene of marvellous beauty, thickly planted with mulberry trees that are interspersed with productive vineyards. Numberless silkworms are reared in this fertile region, from which is obtained the raw silk which provides the nucleus of an extensive silk industry. There are several cloth and silk weaving mills possessing numerous spindles, all driven by water-power, clear and sparkling, supplied by various streams that flow from the surrounding hills. Three miles from Naoussa the forest begins extending in one unbroken line almost for nine miles northwards in the direction of Vodena, another flourishing city of 15,000 inhabitants, and taking this line as a central pivot the forest lies east and west on either side for seven miles—i.e., fourteen miles east and west. The topographical nature of the country is highly undulating and hilly; the sides and summits of the highest elevations being clothed in a dense mass of virgin timber, with oak, chestnut, beech, box, walnut, and other varieties in a lesser degree; the principal trees predominating in the order named. The majority of the oaks are of large size, straight, with clean stems; the timber is a fine hard wood, and when cut in the quarters show extremely good figuring.

Chestnut.

The trees of this species are of colossal dimensions, some of them overgrown and only fit to be turned into tannic acid. The owner, at great expense, has built an up-to-date factory ready to be equipped with the necessary machinery to operate this particular industry. The commercial timber can be used for a variety of purposes; in its texture it closely resembles oak, is specially adapted for cabinet work of all kinds, and is one of the best woods for veneering, taking glue well.

Box.

These trees are well grown; the wood is of a light yellow, silky lustre, works up smoothly, is very durable, and it would be easy to make a cut of from 100 to 150 tons per annum of two inches and over in diameter.

Walnut is found in patches growing on various parts of the estate, running from two to over three feet in diameter; many of the trees possess burrs of small and large dimensions. The colour of the wood is black, streaky, and most suitable for gun-stocks and veneers.

The configuration of the country lends itself to economical logging, as many of the more elevated portions slope abruptly into the valleys from whence roads radiate to the main roadway, which has been well made, properly ballasted, and right up to date in every respect.

When viewing this vast amount of splendid standing timber, I could not help asking myself how and why it had so long escaped the attention of the ubiquitous saw-mill men who are continually searching the world for supplies to meet the ever-increasing demands of Western Europe and other countries.

When I left London early this year the majority of those engaged in the timber trade deplored the scarcity of all kinds of hard woods, declaring that should the war continue for any lengthened period there would result a great scarcity in London by the end of the year. I will say to these pessimists—Try Macedonia for hard wood; there you will find sufficient timber of this class to meet most of your immediate requirements. One London firm, viz., Millars' Trading Co., has already entered this field and are now operating there to advantage. It appears they have contracted with the owner on mutual terms for the whole beech cut. They have built an up-to-date band saw mill, manufactured by Ransome and Co., Ltd., of Newark-on-Trent; they have cut and constructed timber roads radiating into the forest, and linked up the mill by an aerial railway with the station at Goulachan on the line of railway leading to Salonika.

ROUMANIAN PETROLEUM.

Although many Roumanian petroleum producers cut down operations, the total Roumanian output for the first quarter of the year was 468,685 tons, against 434,280 tons last year, an increase of about 8 per cent., due to a number of new gushers in the district of Baicoi. The returns for January were 168,561 tons, for February 137,966 tons, and for March 162,158 tons. Export difficulties have caused producers to accumulate large stocks. About a month ago exports viâ Predeal were resumed, but again interrupted a fortnight later owing to transport difficulties on the Hungarian railways. Producers have some apprehension, says the *Morning Post*, lest the space still available in the reservoirs becomes exhausted. Raw oil and oil products have been chiefly diverted to the reservoirs, and the Government has taken steps to encourage the management of the various concerns to see to the storing of arrears. The recapture by Austria-Hungary of the oil-producing district of Baryslaw-Tustanowice is regarded as a factor calculated to aggravate matters in the Roumanian industry. Prices of raw oil have again weakened, and buying has been checked.

Engineering Notes.

Cobalt Steel.

In recent works of reference, Cobalt is described as "a grey metal, malleable and resembling nickel, found in combination with arsenic and sulphur," and that "it is of great value in the arts as a colouring medium, its protoxide yielding a brilliant blue, largely utilised for colouring glass and porcelains, as well as painting pigments." Yet, to-day, cobalt is recognised as a most valuable engineering material, which, like tungsten and molybdenum, has come to be of great industrial importance. At the present time, when there is a great need of tools for the production of shells and munitions, tool-steel is needed in every factory at home, as well as in other friendly or neutral countries, in order to cope with the increasing demand of output. Considerable quantities of the steel in question were hitherto exported from Germany to other countries, but that source being closed, buyers experience great difficulty in obtaining the required supplies. It will, therefore, be of interest to them to hear of a new British tool-steel, and its superior properties. Recent experiments have shown that tool-steel made of a suitable alloy of iron, carbon, and cobalt, is capable of speeding up to a remarkable degree any work in connection with the production of war material, so far as turning, planing, slotting, drilling, and milling of iron and steel is concerned. This special steel, which is a British production, has been tested in America against a vanadium steel with a ½-inch diameter twist-drill. The cobalt steel drill made 15,200 holes before the drill required to be ground, the hole depth being ½-inch through a malleable casting, and the drill running at 820 revolutions per minute under a large stream of oil. No other alloy steel drill could do better than 2,200 holes under similar conditions before re-grinding.

Treatment of Cobalt.

The heat treatment of cobalt steel is simpler than that of any other high-speed tool-steel. The forging of tools is done at a yellow heat, and hardening is effected merely by heating up the tool to a white heat, and allowing it to cool in the open air. Superheating to a fusing point is entirely unnecessary with cobalt steel, and quenching in the usual media, such as air-blast, tallow, whale or linseed oil, molten lead, petroleum, or water, is not required.

German scientists and experts admitted that "the employment of cobalt in the production of high-speed steels is followed by a remarkable increase in the cutting power and durability, without increasing the purchasing price above the average market price," which is about 3s. 9d. per lb.

According to Professors Arnold and Read, whose paper on "The Chemical and Mechanical Relations of Iron, Cobalt, and Carbon" was read at a recent meeting of the Institution of Mechanical Engineers, cobalt steel may be produced by melting together in suitable proportions ingots of pure cobalt, Swedish bar iron, and Swedish white iron, afterwards adding pure metallic manganese and aluminium ten minutes before teeming. Cobalt has a brilliant silver-white appearance when polished, and, like iron, is very magnetic, being, in fact, next to iron on the list of magnetic metals. It melts at 1,490 deg. Cent., as compared with 1,520 deg. for iron, while its specific gravity of 8.8 is well above that of iron, which is 7.8.

British Resources.

Canada is the world's principal producer of cobalt; in fact, all the cobalt of commerce emanates from the neighbourhood of the town of Cobalt, which is situated in North Ontaria, near the shores of Lake Tamagaminque. The deposits, which were only recently discovered, are immensely rich also in silver. It is hoped, therefore, that now that the value of cobalt steel has been realised, there will be an ever-increasing demand for a metal of which our Empire appears to possess unlimited supplies.

THE BAGHDAD RAILWAY.

We reproduced last week from the *Engineer* a paragraph dealing with the Baghdad Railway. The following table, from the same source, gives particulars of the sections opened for traffic at the beginning of the present year, and the dates when they were made available for general use. They constitute about half the entire comprehensive scheme of railway construction in these regions, and, barring the short passages of the mountains, the most difficult part technically, the lines which still have to be built in Mesopotamia altogether pass through level country:—

West of the Cilician Taurus.

	Km.
Konia-Bulgurlu (October 25, 1904)	200
Bulgurlu-Ulukisla (July 1, 1911)	38
Ulukishla-Karapuna (December 21, 1913)	53
Total	291

In the Plain from Adana.

	Km.
Dorak-Jenidje-Mamure (April 27, 1912)	115
Toprak-Kale-Alexandretta (November 1, 1913)	60
Total	175

Between the Amanus Mountains and the Euphrates.

	Km.
Radiun-Aleppo-Djerablus (December 15, 1912)	203
Euphrates Bridge-Tel-el-Abiad (February, 1915) about	60
About	263

In Babylonia.

	Km.
Baghdad-Sumikeh (June 2, 1914)	62
Sumikeh-Istabulat (August 27, 1914)	38
Istabulat-Samarra (October 7, 1914)	30
Total	130

Added to this there is the small branch line in the Adana plain—Adana-Mersina, 67 km.—which the Baghdad Company has acquired, and which, until the opening of the port of Alexandretta for the Asia Minor portions of the Baghdad Railway, represents the only access to the sea. That makes an aggregate of 926 km. of the Baghdad Railway so far opened for traffic, whilst the entire distance from Konia to Basra amounts to 2,190 km.

In addition to the portions of the main line which still have to be built (a further section—Tel-el-Abiad-Ras-el-Ain—was opened last week), a number of branch lines have been planned, which can be built by degrees and independently of each other, but the plans for which have already in the main been drawn up. These are:—

	Km.
Bagliche-Marash	65
To Aintab	40
Djerablus-Bireduk	38
To Uria	40
El Helif-Mardin-Diarbekr-Charput	220
Mossul Erbil	100
Sadije-Chapikin	130
To Tus Churmatli	95
El Badji-Hit	160
Total	888

These branch lines with the main railway and the Adana-Messina and Toprak Kale-Alexandretta branch lines, already opened for traffic, and with an aggregate length of 127 km., make an aggregate of 3,205 km. of railway in this region of the Near East. The Germans count upon these as a future German railway system, and also the railways in Anatolia already built or, so far, only planned. Likewise, the Angora-Sinas line, which was planned just before the war broke out, but the construction of which in the meantime probably will be left in abeyance. This railway, which is the first effort in the matter of railway building in Northern Asia Minor, where no line has hitherto been constructed, at the wishes of Russia, is, no doubt, only the beginning of a comprehensive overland line, which will join with the above-mentioned branch line of the Baghdad Railway, the Charput-Diarbekr-Mardin-El Helif line. It may be mentioned here that the construction of this new overland line means the realisation of the oldest project in connection with the Baghdad Railway, which was dropped owing to Russia's objection to any railways being built through North and East Asia Minor, when the present Baghdad scheme through Southern Asia Minor was substituted. The war has relieved Turkey of any considerations as regards Russia.

EGYPTIAN VESSEL TORPEDOED.

On June 1, s.s. Saidieh, of the Khedivial Mail Line, was torpedoed in the North Sea by a German submarine. The first news of this hostile act was received in Egypt from the London offices of the company. It appears that the losses include one English lady passenger and six Greek firemen and one Greek sailor.

The following information is from the *Egyptian Gazette*:—The s.s. Saidieh used to travel on the Piræus-Constantinople line before the war and was a favourite steamer. Her old skipper, Captain Findlay, is now in command of the s.s. Abbassieh, which is at the present moment in Leith. Her present skipper was Captain Ryall.

The s.s. Saidieh left Alexandria on May 15 for Hull. She was chartered by Cox's Shipping Agency and carried a cargo of cotton seed and onions. She was fully insured.

The manifest was as follows:—

Behrend and Co., Ltd., 933 cotton seed.

	Bags Onions.
H. Deff	500
F. Vidal and Fils	1,000
R. Toriel	1,000
G. Philippidis	1,000
A. Constantinou	500
Farg. Bey Said	987
Kaniskeri	11,218
	16,205

Alexandria Notes.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, June 22.

Local conditions have improved, in spite of the fact that the cotton crop has brought us in £16,000,000 less than last year. Sugar, onion, and barley crops have been good, but, on the other hand, the bean crop has not been good, and the wheat crop disastrous. Rice, however, presents a record crop, owing to the restriction of cotton-growing.

Though the Stock Exchange is still officially closed, "street" operations are frequent. The most sought-after shares are Crédit Fonciers, National Banks, Agriculturals, Turkish Lottery Bonds, Salt and Sodas, Port Said Salt Company, and the Levant S.S. Company.

Union Foncière d'Egypte.

As a result of the important sums taken from the profit and loss account for extraordinary amortisations, the balance-sheet for the year shows a loss of £E14,614, from which must be deducted last year's carry-forward, leaving a net loss of £E9,784.

The effects of the war and of the cotton crop have been felt by the company. Thus, the total value of the arrivals in Alexandria of cotton and cotton seed is £E15,626,017, as against £E31,503,643 last year. The company owns 9,170 feddans of land.

Nungovich Hotels.

Profits for the financial year 1914-15 amount to £E17,712, which, with the carry-forward of last year, brings the total profits up to £E23,401. Expenditure, including redemption of debentures, etc., amounts to £E25,230, so that the final balance-sheet shows a loss of £E1,828. The tourist season was *nil* this year, but, in spite of this, the company was able to meet all its financial charges. As a result of the war, the company was obliged to limit its work to local requirements. The Grand Continental was open the whole winter, and results were satisfactory. In spite of the bad year, the thermal establishment at Helouan did well. The Savoy Hotel and the Hotel des Bains and the Grand Hotel at Helouan remained closed. As for the Casino San Stefano and Mena House, they were both requisitioned as military hospitals. When war broke out the company had started building and improvement works, which had to be stopped.

The capital of the company in shares is £E144,300, and its immovable property is estimated at £E563,318. The reserve stands at £E104,704, and the mortgage debentures in circulation amount to £E357,396.

EGYPTIAN REVENUE DECREASE.

Cabling on Monday, the Cairo correspondent of *The Times* gave the following final figures of the State accounts for the year ended March 31:—

	£E.
Revenue	15,389,124
Expenditure	16,857,783
Deficit	1,468,659

which is debited to general reserve, reducing the latter to £E3,634,890 on April 1 last.

The revenue was £E2,198,876 and the expenditure £E1,304,217 less than had been budgetted for, thus making the deficit £E894,659 more than had been expected. During the period £E115,800 of the Public Debt was amortized.

ENEMY COMPANIES IN EGYPT.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, June 15.

An interesting question has come up for settlement by the local authorities. Amongst the many commercial enterprises which the active Teuton founded in this country as an outward sign of his peaceful mission, but in reality as a covering to the web of political intrigue that he was ordered to weave by the Wilhelmstrasse, was a cotton ginning and cotton pressing company under the name of the Baumwollpress Aktien Gesellschaft. This company was, of course, on the outbreak of the war regarded as an enemy concern and treated as such. A short while ago, the company changed its name to that of the "Egyptian Cotton Presses," and made to recommence operations. The military authorities intervened and refused to sanction the change of name. It now transpires that three-eighths of the capital (£E30,000 out of £E80,000) and one-half of the debentures belong to British subjects, and that there is not a single German left in the company, whilst the local banks, who had a lien on certain stock, had appointed the Bonded Stores to manage the affairs of the company. The authorities have now been approached for permission to carry on the business of the company, and there is little doubt, as it is now under entirely British management, that permission will be secured for the benefit of the British capitalists interested, and that provision will be made for the setting apart of the profits accruing on the German capital invested therein against the day when all enemy property will be taken over on account of indemnities due from Germany for damage done to private properties of the Allied subjects.

COMPANY MEETINGS.

BANK OF ATHENS.

At the recent general meeting of shareholders of the Bank of Athens, which was held in Athens, the Chairman of the Board of Directors made the following statement:—

"Last year the new and grave difficulties with which the bank was confronted by the stir made by the prosecution of the former managers, and by the clauses of the moratorium, did not permit the Board to present the shareholders with anything better than a trial balance-sheet, as the task of meeting these difficulties took all the time of the general management and made the exact evaluation of the assets impossible. It was hoped that such exceptional circumstances would soon cease to exist and that a detailed statement might be drawn up as the directors had wished. That has not been possible, unhappily. The prosecutions which were started in September, 1913, lasted the whole year, and their continuation is aggravating in the highest degree the state of mind of the public, for whom the persistence of the judicial action, the scope of which they had not at first understood, had a significance which inspired them with lively uneasiness and prevented them from giving their entire confidence to the bank. The consequences of this state of mind are to be found notably in serious withdrawals of deposits, a total of 29,189,000 drachmas, which is a source of continual worry to the directors. The foreign markets were also profoundly impressed, and under such conditions it was difficult, not to say impossible, to think of finding any support whatever or of finding a basis for a new financial organisation. The moratorium was not only maintained in Greece, but circumstances imposed similar methods in Turkey and also in Egypt. This prevented any useful action for the realization of the assets of the bank. The most formidable war that history has known has for ten months hurled five Great Powers one against the other, as well as several smaller Powers, and if Greece has so far stood apart from the hostilities, it should be remembered that three of the countries in which the bank has agencies, Great Britain, Turkey and Egypt, figure among the belligerents, and that we are suffering from all the difficulties of the state of war peculiar to each of these countries, as well as the general consequences of the upheaval that has taken place in the domain of economics. The events which last year made the drawing up of a trial balance-sheet necessary, far from diminishing, have become extended and aggravated, and have even more imperiously obliged the Board this year to present a similar balance-sheet." The Chairman of the Board, after this frank statement of the difficulties with which the bank found itself confronted, wound up his declaration with the encouraging assurance that, after all, there was plenty of life left in the bank as the National Bank of Greece was the chief shareholder, and that groups of French financiers, represented by the Banque de l'Union Parisienne, had promised help after the war.—*Egyptian Gazette.*

ELLERMAN LINES.

The fifteenth ordinary general meeting of the Ellerman Lines, Ltd., was held on Wednesday at the offices, 12, Moorgate Street, E.C., Sir John Ellerman, Bart. (Chairman of the company), presiding.

The Chairman, in moving the adoption of the report, said that the shares in the hands of the public carried a limited dividend and limited rights, and the results showed that, in the aggregate, the dividend was covered more than five times by the earnings of the company. During the greater period of the year under review the receipts were very satisfactory, and they had anticipated a largely increased profit. The declaration of war in August last had entirely changed that view; expenses were largely increased, delays and congestion took place, and the Government requisitioned steamers for the purpose of carrying troops and stores. He was glad to say that, owing to their policy of largely adding to their fleet in former years, they were able to give to the Government steamers aggregating practically 175,000 tons. Some of those steamers had now been returned, and now they had steamers aggregating nearly 80,000 tons employed by the Government. The rates which the Government paid were a little less than half of the market rate, so that all shipowners who were cheerfully accepting those rates were taking a share in the conduct of the war. Since January 1 of this year freights had increased very materially, and the results for the coming year should be of a favourable character. Rates, he thought, would continue to increase. They had suffered the loss of five steamers by the enemy, and the "City of Mysore" had also been lost by stranding. The construction of the steamers which they had building, involving about £1,000,000, had been very much delayed, and in many cases it was a question whether they would be able to obtain delivery until some time after the termination of the war. The financial position of the company was very satisfactory, and the value of the fleet, on the basis of the present market prices, was something like £10,000,000, as against the £3,500,000 at which it stood in the books of the company.

Mr. M. W. Mattinson, K.C., seconded the motion, which was carried unanimously.

EGYPTIAN AGRICULTURAL COMPANY.

Presiding at the annual meeting held on Monday, the chairman said that all their calculations had been upset and most of their hopes frustrated by the war. The cotton crop was about double in quantity that of the last year, and the quality was excellent, but prices realised were so much lower that the final results showed a set-back, especially as owing to the partial suspension of development work, a larger proportion of fixed charges had to be borne by revenue. Arrangements for providing funds were nearly completed last July when the war put an end to the negotiations for the time being, though it was hoped they would be revived when matters became normal. Meanwhile, such expenditure as could be prudently cut down was being provided for by temporary advances secured on the estates and assets. A moratorium having been declared in Egypt and business brought almost to a standstill, little progress could be made in realising outside assets, and there seemed no other course than to await the advent of better times. The report was adopted.

COMPANY NOTES.

Bank of Abyssinia.

The report presented to the shareholders at the annual meeting of shareholders, held in Cairo on May 28 last, states that the gross profits for the year ending December 31, 1914, amounted to £8,621 13s. 5d., but the directors considered it necessary to set aside a sum of £12,000 as provision for bad and doubtful debts, to make various amortizations amounting to £2,247 12s., and to make a provision of £15,563 18s. 9d., corresponding to the depreciation in the value of the bank's assets caused by the heavy fall in the value in gold of the Maria Theresa dollar. Thus, after deducting a total of £29,811 10s. 9d., there is a debit balance of £21,189 17s. 4d.

Flower Motor Ship Company.

The directors report for the year ended December 31 that the running of the engines of the two vessels delivered to them, namely the Arum and the Arabis, has not been so successful as they had hoped. An agreement has been arrived at with Messrs. Swan, Hunter, and Wigham Richardson, Limited, by which they have assumed responsibility for the running of these ships, and have agreed to pay the shareholders 4 per cent. per annum interest. The m.v. Abelia, contracted for delivery in 1913, has not yet been delivered. The company has taken no further commitments and, consequently, it is not necessary to call up any further capital. Under these circumstances the company's capital remains intact, and after crediting interest earned and sundry profits, £7,954 18s. 10d., and debiting expenses, £317 17s. 9d., there remains at the credit of profit and loss account £7,637 1s. 1d., out of which your directors recommend the payment of a dividend of 4 per cent. on the paid-up capital (less income tax, which will be deducted at the rate of 1s. 6½d. in the £), leaving a balance of £637 1s. 1d. to be carried forward. Mr. Andreas Rickmers has ceased to be a director. In accordance with Article 90 of the Articles of Association, two directors, Sir Marcus Samuel, Bart., and Mr. James N. Graham, retire from the board, and, being eligible, offer themselves for re-election.

British Cotton-Growing Association.

The directors report that during the year subscriptions amounting to £2,230 have been received from the North and North-East Lancashire Cotton Spinners' and Manufacturers' Association, £268 from the members of the Federation of Master Cotton Spinners' Association, £1,000 from the Liverpool Cotton Association, and £773 from the Co-operative Societies, operatives, and others, altogether amounting to £4,271, and making a total capital of £474,582, of which £454,225 has been allotted in the form of shares. The balance of capital yet to be raised amounts to £25,418, towards which £13,000 has been promised conditionally on the whole of the capital being subscribed, leaving a net balance of £12,418 still to be found. The business of the association was considerably affected by the war during the latter part of the year, as cotton was difficult to sell even at the low prices prevailing. The turnover in cotton in 1914, therefore, shows a reduction on the 1913 amount.

NEW COMPANY.

Society for Promoting British Trade, Limited.

Under the above heading a new company was registered at Somerset House on June 24, with a capital of £2,000 in £1 shares. The object is stated to be: to enter into a contract with C. Marks for the acquisition of the benefit of his knowledge and experience relating to the carrying on of exhibitions in Great Britain or abroad in connection with British and Colonial manufactures and trade. The management is vested in an executive council, consisting of not less than ten nor more than twenty members, the first of which are: Sir Francis Osborne, Bart., Sir Henry C. Eggar, Kt., M.V.O., W. Tarver, J.P., F. Shelford, Com. C. A. Denison, R.N., C. W. Forward, J. Simpson, C. Marks, W. I. Thomas, E. H. Laird, C. F Higham, R. L. Service, C. J. Drummond, C. J. Horner and J. Nayler (all permanent, subject to holding fifty shares).

Digitized by Google

COMPANY RESULTS, &c.

BRITISH COTTON GROWING ASSOCIATION.—The tenth annual meeting of the shareholders will be held at the offices of the association, Manchester, on July 6.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended June 10 amounted to £E3,494, as against £E5,588 for the corresponding period of last year.

EGYPT AND LEVANT STEAMSHIP COMPANY.—An interim dividend in respect of the year to January 31, 1916, at the rate of 5 per cent., less income-tax, has been declared on the ordinary shares, and is payable at the Anglo-Egyptian Bank, Ltd., Cairo and Alexandria, or at the registered offices of the company in London, on presentation of Coupon No. 10.

KENEH ASSOUAN RAILWAY.—Coupon No. 40 of the 1st debenture issue of 1895 and Coupon No. 35 of the 2nd debenture issue of 1898 of the Société Anonyme du Chemin de Fer Keneh Assouan will be paid on July 1, at the rate of 3½ per cent. per annum, at the Cairo, Alexandria, and London offices of the National Bank of Egypt.

LAND BANK OF EGYPT.—The numbers are announced of 275 4 per cent. debentures, Series I., 92 4 per cent. debentures, Series II.; and 62 4 per cent. debentures, Series III., redeemable on and after July 1.

MONTENEGRO 5 PER CENT. LOAN.—Messrs. Boulton Bros. and Co. announce that they have not yet been placed in funds to meet the half-yearly coupon due July 1, but that as soon as the necessary funds have been received by them an announcement will at once be made.

ROUMANIAN CONSOLIDATED OILFIELDS.—Production for the work ended 19th inst., 1,556 tons.

NATIONAL BANK OF ROUMANIA.

GREEK DEBT.

RECEIPTS FROM ASSIGNED REVENUES.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to April 30, 1915 (New Style: January 14 to May 13, 1915) :—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
		Drachmæ.	Drachmæ.
Gross Receipts, Apr.,	1915	3,110,116	2,205,274
Do. do. do	1914	2,627,615	2,521,489
Estimated Receipts for 4 months (Law of Control)		9,633,333	3,566,667
Actual Receipts, 4 months,	1915	12,717,086	8,842,887
Do. do. do.,	1914	13,442,646	10,115,333
Difference between estimated and actual receipts for 4 months	1915	+ 3,083,753	+ 5,276,221
	1914	+ 3,809,313	+ 6,548,666

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

NOTES OF THE WEEK.

Much has been published during the week regarding the operations at the Dardanelles. One dispatch from Sir Ian Hamilton deals with the fighting between June 30 and July 2, in which the enemy is estimated to have lost 20,000 men. The scene was the ground won by our troops on the previous days in the neighbourhood of Krithia, and the Turks assumed the offensive. In the middle of the night of June 29, after a day of unsuccessful attacks, they were discovered by the searchlights of H.M.S. Scorpion, to be advancing on our trenches. Few of that half-battalion escaped from the ship's gunfire, but it was only the prelude to a series of attacks delivered throughout the night. Twice our troops were driven back a short distance, but in the early morning the trenches were retaken, "and they have since been strengthened." These attacks, according to the statements of prisoners, were made by the personal order of Enver Pasha, who was present in the trenches on June 29. Stringent orders had previously been issued that no further attacks were to be made, because, if the Turks remained on the defensive, the British would be forced to attack, and would suffer as severely as the Turks had hitherto suffered. But these Fabian tactics did not suit Enver Pasha's impetuous disposition, and he is credited with having given the order that the Australians were to be driven into the sea.

The complete failure of Enver Pasha's tactics, which were renewed on July 2, and again on July 4, with as disastrous results as before, will lead, it is to be feared, to the re-adoption of the policy which he overruled. The contention that, if the Turks remain on the defensive, we shall have to attack is sound; but we shall hope to find that from now on our troops will not suffer as severely as the Turks did, nor as the Allied forces have suffered in the past. Up to the end of May the total casualties among the British naval and military forces were only a few hundred short of 39,000. There has been heavy fighting since, and in five weeks these figures will have received substantial additions. But gradually the Allies must be overhauling the disadvantages under which the attack has had to be carried out hitherto. No attempt is now made to minimise the seriousness of the task before our naval and military forces, and we may expect our superior resources in men and material to tell before many weeks have passed.

Elsewhere in this issue we publish extracts from Sir Ian Hamilton's dispatch on the operations at the Dardanelles up to May 5. Few people will be able to read his stirring narrative without a thrill of admiration for the troops who undertook what might well have been regarded as an impossible task. But there is the other side of the picture. When the operations covered by the dispatch were over, the Allied position on Gallipoli Peninsula was almost as far advanced as it is to-day. The slight progress achieved in the intervening two months and the heavy toll of life that it has entailed tell their own story. To-day the Dardanelles operations occupy a different position from that which they were intended to assume when they were first planned. They have become virtually an objective in themselves, and are no longer a means to an end. The opening of the Straits and the Bosphorus will be in due course an incident of the war; but we shall do well not to seek to measure its results by the cost of the operations on Gallipoli.

Under the heading "Calais or Suez," the *Deutsche Tageszeitung* gives prominence to an article appearing in *Das Groessere Deutschland*, which discussed the relative importance of Calais and Suez to Great Britain. A British statesman, it is pointed out, if confronted with a choice between "an anti-British Calais or a non-British Suez, a menace to the English Channel or the closing of the Egyptian canal, would without hesitation or doubt resign Calais and stand by Suez." This ingenious dilemma, which has special significance at this moment, serves the writer as an introduction to the statement that it is still essential to Germany that Egypt should be conquered. The attempt made at the beginning of the year was merely a "*Studienreise*" undertaken with the express intention of gaining experience and fixing the conditions under which the real attack would have to be made. "German engineers are now building to this very end a Syrian railway and a Sinai railway, which will later on bring up the necessary heavy artillery and convey it across." The way from Constantinople will then be free, and the way from Berlin to Constantinople, it is asserted, must become free as the result of the decisive victory in Galicia. "There and then can England be struck, and receive her death-blow—let us hope before this war is at an end."

Digitized by Google

The *Deutsche Tageszeitung* endorses all that its contemporary has to say about Egypt and the Suez Canal, and bids its countrymen reconcile themselves to a long war in order that the object in view may be achieved. Great Britain, we are told, is the soul and leader of the anti-German Coalition, and her destruction cannot be postponed; therefore, it must certainly take place "before this war is at an end." But at the same time the *Deutsche Tageszeitung* cannot allow the idea of a German Calais to be dismissed lightly. Suez does not exclude Calais, nor does Calais exclude Suez. The two objectives must not be regarded as alternatives, but must be pursued simultaneously. The point is not one on which we are able to give the Germans any advice; they must decide for themselves how many or how few "first objectives" they set out to attain. We welcome, however, the candid assumption that it is Germany who is to be established at Suez as well as at Calais. Her Turkish allies will, no doubt, be pleased at the prospect, and, after their experience of German rule in Constantinople, will redouble their efforts to win Egypt for the Germans.

When the article was written any further "thrust at Calais" seemed almost as remote as a second advance against Egypt; but the report that Calais, by order of the German Emperor, has still to be taken at all costs raises the question whether a more resolute attempt may not yet be made to throw an invading army across the Suez Canal. On this subject Djemal Pasha has had some interesting remarks to make to a German correspondent. He claims that the Turkish frontier line has now been shifted three hundred miles westwards, from El Arish and Akaba to a point near the Canal. This "conquered" territory, he added, is being developed in every direction. "We have constructed there numerous wells, which will supply water to our troops, and we have taken other measures to enable our army to stay and to march there. . . . Since the English have turned the Canal into a war zone, we too no longer regard the Canal as neutral territory, and have, therefore, placed mines in different parts of it, by which one ship has already been sunk." Djemal Pasha's line of reasoning in regard to the fortification of the Suez Canal is thoroughly in keeping with that of his German overlords, and no doubt he reflects the intentions entertained at one time or another by the German authorities in regard to Egypt. But there is reason to believe that the army for which the Sinai Desert has been made to blossom as a rose has received an urgent call elsewhere, and that Djemal Pasha himself has had to go to the Dardanelles. It would be in keeping with German practice to emphasize the greater importance of the Suez Canal at a moment when a fresh attempt on Calais was being prepared.

The incidence of the harvest and the fact that negotiations are actually in progress combine to account for an absence of definite news from the Balkans. Both in the case of Roumania and Bulgaria the approach of harvest time would offer a strong inducement to postpone for another few weeks a declaration of war that had been put off until that moment. This year the crops, in addition to being well above the average, are vested with special importance for any country about to be drawn into the war. At the same time the Roumanian no less that the Bulgarian Government is glad to have so ready an excuse for deferring its fateful decision. The prospect of a long war can have no attractions for a Balkan State, and in a campaign in which war expenditure can be reckoned in substantial sums by the day even a week's postponement becomes an important consideration.

The situation in the Balkans is admitted to have been the chief subject discussed between the German Imperial Chancellor and the Austro-Hungarian Minister of Foreign Affairs at the meeting which took place in Vienna during the latter part of June. This fact is only a further indication of the importance attached by the Central Powers to the maintenance of Roumanian and Bulgarian neutrality. No stone is being left unturned to influence the two Balkan countries in favour of Germany and Austria-Hungary. We may affect to despise their methods, but it has to be admitted that neutrality continues to be maintained in three Balkan States. The importance of this fact to the Central Powers can be gauged by the successes they have achieved during the last month in Galicia, which would not have been possible if Roumania had already taken the field. Among the measures taken to influence Roumanian opinion may be mentioned the distribution of thousands of copies of a book containing Count Tisza's speeches on the Roumanian question, including statements on Hungary's policy towards the Roumanian nationalities within her borders.

The announcement is made that Mr. H. J. O'Beirne, Counsellor of Embassy at Petrograd, has been appointed British Minister to Sofia in the place of Sir Henry Bax-Ironside. A change of Ministers at Sofia at this moment can hardly be dissociated from the negotiations now in progress between the Bulgarian Government and the Entente Powers. Ten months after the outbreak of the European War the British Government tardily admits the importance of having Bulgaria on the side of the Triple Entente. It is thus realised apparently for the first time how far during the last few years Bulgaria has been allowed to drift from a natural friendship with Great Britain. In order to win her back again, not by intrigues after German methods, but by the establishment of normal diplomatic intercourse, special missions have become necessary and a change of British representatives in the Bulgarian capital. We have had to pay dearly for the preoccupations of British diplomacy, which have not allowed British interests in the Balkans to receive adequate attention in the past. Mr. O'Beirne goes to Sofia with a reputation of consummate tact and marked ability. His known sympathy with the Bulgarians should stand the country in good stead at the present time.

In the course of his reply to a deputation of the Southern Slav Committee, Lord Crewe, acting at the Foreign Office for Sir Edward Grey, made some remarks, which may well be taken to heart at this time in the Balkans. Never, he said, in so far as he had studied history, neither in consequence of a war of liberation, boldly undertaken, nor with the help of powerful coalitions, had any nation realized to the full extent all its desires of expansion or its dreams of territorial acquisition. It was useless to ask why. Doubtless it has sometimes been because there existed, so to speak, a fringe of population on the frontiers which it was difficult to classify as belonging to one race rather than another. We could not hope that at the end of this war history would not repeat herself. These words of caution may not be necessary for the Balkan Governments; they are undoubtedly necessary for the Balkan peoples. In the Press particularly little heed would seem to be paid to the axioms to which Lord Crewe gave expression. If the lesson had been learnt in the Near East there would be far less mutual recrimination between the leading newspapers of the different countries.

In a letter to the *Egyptian Gazette*, Bishop MacInnes, of Jerusalem, touches upon Cairo's need for a new church or cathedral. Not only is the present structure in a very bad state, but it is now far too small for the congregation during about five months of every winter season in normal times. Although the committee of All Saints' Church has decided to postpone the issue of an appeal until the autumn, Bishop MacInnes has been asked to make a statement on the subject, in order that gifts or promises of help may be received at once. The proposal, it is hardly necessary to say, is one with which we are in hearty sympathy. We can conceive of no more fitting memorial of this war in its relation to Egypt, the establishment of a Protectorate, the magnificent achievements in Gallipoli Peninsula of the troops, based on the country, than a cathedral in Cairo. A lasting

Digitized by Google

tribute must be raised to the heroic feats of arms associated with Gallipoli. The Peninsula itself will not offer a suitable site, but there is much to be said for the selection of Egypt. We shall hope to find, therefore, that Bishop MacInnes' proposal meets with a spontaneous response. Into the question that it raises of a cathedral without a bishop we need not enter here, for by the time the building is completed this difficulty may have been overcome.

In referring to conditions in Constantinople, the correspondent of *The Times* in the Balkan Peninsula mentions the fact that much relief is felt in the city because the British submarines in the Sea of Marmora abstain from torpedoing passenger steamers. On one occasion a steamer plying from Constantinople to Skutari met a submarine sailing on the surface with the British flag displayed. Great panic prevailed on board, but the steamer was allowed to proceed unmolested. As a rule there is reason to be sceptical of reports regarding conditions in an enemy country; but, apart from the medium through which this information reaches us, it is evident that the action of our submarine commanders in sparing passenger steamers has sufficiently impressed the Turks to allow them to testify to their relief. We may hope that they will go further and compare the British action with the "frightfulness" their German allies practise on the helpless passengers in the ships which their submarines meet.

An official despatch from Constantinople states that in the Bahr Sorak region a British expedition which was being conveyed by the Euphrates railway northwards suffered a defeat at the hands of the Turks and was forced to retire. The report requires confirmation before it can be believed in all its details. There is, however, no reason why a British force should not be operating in the region mentioned. With the occupation of Amara it was clear that force of circumstances had compelled a modification of the original intention to confine the Expeditionary Force to the Shatt-el-Arab. Any movement up the Tigris would entail a second line of advance, which would naturally follow the Euphrates valley. When the facts of the second advance are known, we may hope to find that the Turkish "success" has been greatly exaggerated.

The future of Hamburg is of greater concern to Germany than to the Near and Middle East. But the latter are regarded as of considerable importance to Hamburg, and it is of interest to note how the city which has suffered more than any other in Germany is being buoyed up with hopes of what the future has in store. It is admitted that a long time must elapse before Germany's trade with her present enemies can assume the proportions it reached before the war. On the other hand, make-weight, it is stated, will be found in a closer relationship with her Allies, while a particularly attractive outlook offers in the "Mohammedan world." The completion of the Baghdad Railway is to work wonders for German trade in Mesopotamia and Persia, to which have to be added Afghanistan and Baluchistan. Tripoli, Morocco, and China are also to be at Germany's feet as a result of the war. The picture is painted in purely commercial colours, and does not appear to rest on any sweeping victories for German arms. From the point of view of Hamburg's mercantile marine, however, it overlooks one important consideration; it is that, if at the end of the war Germany were denied for a substantial period the use of the Allies' coaling stations, her shipping would hardly be seen east of Gibraltar.

THE GALLIPOLI LANDING.

SIR IAN HAMILTON'S DISPATCH.

The following are extracts from Sir Ian Hamilton's dispatch of May 20, referred to in our Notes of the Week. They are taken from the introductory remarks, which explain many points that have hitherto presented puzzles to students of the Dardanelles operations.

In accordance with your lordship's instructions I left London on March 13 with my General Staff, reaching Tenedos on March 17, shortly after noon.

Immediately on arrival I conferred with Vice-Admiral de Robeck, commanding the Eastern Mediterranean Fleet; General d'Amade, commanding the French Corps Expéditionnaire; and Contre Amiral Guepratte, in command of the French squadron. At this conference past difficulties were explained to me, and the intention to make a fresh attack on the morrow was announced. The amphibious battle between warships and land fortresses took place next day, March 18. I witnessed these stupendous events, and thereupon cabled your lordship my reluctant deduction that the co-operation of the whole of the force under my command would be required to enable the Fleet effectively to force the Dardanelles.

By that time I had already carried out a preliminary reconnaissance of the north-western shore of the Gallipoli Peninsula, from its isthmus, where it is spanned by the Bulair fortified lines, to Cape Helles, at its extremest point. From Bulair this singular feature runs in a south-westerly direction for fifty-two miles, attaining near its centre a breadth of twelve miles. The northern coast of the northern half of the promontory slopes downwards steeply to the Gulf of Xeros, in a chain of hills, which extend as far as Cape Sulva. The precipitous fall of these hills precludes landing except at a few narrow gullies, far too restricted for any serious military movements. . . .

The three dominating features in this southern section seemed to me to be :—

(1) Saribair Mountain, running up in a succession of almost perpendicular escarpments to 970 ft. The whole mountain seemed to be a network of ravines and covered with thick jungle.

(2) Kilid Bahr plateau, which rises, a natural fortification artificially fortified, to a height of 700 ft. to cover the forts of the Narrows from an attack from the Ægean.

(3) Achi Babi, a hill 600 ft. in height, dominating at long field-gun range . . . the toe of the peninsula.

Altogether the result of this and subsequent reconnaissances was to convince me that nothing but a thorough and systematic scheme for flinging the whole of the troops under my command very rapidly ashore could be expected to meet with success; whereas, on the other hand, a tentative or piecemeal programme was bound to lead to disaster. The landing of an army upon the theatre of operations I have described—a theatre strongly garrisoned throughout, and prepared for any such attempt—involved difficulties for which no precedent was forthcoming in military history, except possibly in the sinister legends of Xerxes. The beaches were either so well defended by works and guns, or else so restricted by Nature that it did not seem possible, even by two or three simultaneous landings, to pass the troops ashore quickly enough to enable them to maintain themselves against the rapid concentration and counter-attack which the enemy was bound in such case to attempt. It became necessary, therefore, not only to land simultaneously at as many points as possible, but to threaten to land at other points as well. The first of these necessities involved another unavoidable, if awkward contingency, the separation by considerable intervals of the force.

Before doing anything else I had to redistribute the troops on the transports to suit the order of their disembarkation. The bulk of the forces at my disposal had, perforce, been embarked without its having been possible to pay due attention to the operation upon which I now proposed that they should be launched.

Owing to lack of facilities at Mudros redistribution in that harbour was out of the question. With your lordship's approval, therefore, I ordered all the transports, except those of the Australian Infantry Brigade and the details encamped at Lemnos Island, to the Egyptian ports. On March 24 I myself, together with the General Staff, proceeded to Alexandria, where I remained until April 7, working out the allocation of troops to transports in minutest detail as a prelude to the forthcoming disembarkation. General d'Amade did likewise.

By April 7 my preparations were sufficiently advanced to enable me to return with my General Staff to Lemnos, so as to put the finishing touches to my plan in close co-ordination with the Vice-Admiral Commanding the Eastern Mediterranean Fleet.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, June 27.

Result of the Elections.

After having done its best to conceal the result of the elections, the Government has finally acknowledged defeat. The President of the Council, who at first was at pains to inform the Press that out of 315 seats the Government had gained 165, was ultimately compelled to admit that the Vénizelist Party had obtained the majority. The number of Vénizelists elected appears to have been 180, showing a majority of 55 votes over all the other parties put together. It must be noted, however, that of the 74 seats in Macedonia, M. Vénizelos obtained only five or six, all the others having been won by the Government. This is due to the fact that its candidates coalesced with the Turks, who detest M. Vénizelos, and with the Jews, who form the bulk of the population in the Salonika district. Thus, leaving out of account the seventy-four seats in Macedonia, M. Vénizelos has obtained 175-180 votes out of 250 throughout Old Greece and Epirus, as well as in the islands, that is, wherever Greeks only have voted. The Greeks, as a whole, have proved once more their patriotism and sound political judgment, in spite of the calumnies heaped on M. Vénizelos and the efforts made to undermine his popularity. Not a single Anti-Vénizelist was elected in either Athens or the Piræus.

The Political Situation.

M. Gounaris, in communicating to the Press the news of the Liberal Party's triumph, expressed regret that, owing to the illness of the King, which made it impossible for His Majesty to give his attention to a change in the Ministry, he was not in a position to hand in his resignation, and he must, therefore, wait till the meeting of the Chamber. He added, however, that should the King's condition sufficiently improve to admit of his interesting himself in political events, he would lose no time in taking the course indicated by the elections.

In spite of these declarations, however, the Government is endeavouring to come to terms with the Rallists and Theotokists, and taking steps to secure the votes of the Anti-Vénizelist deputies in favour of the Government candidate for the presidency of the Chamber. It is now asserted by the Vénizelist organs that portfolios have been offered to attract Vénizelist deputies, or at any rate to prevent their return to Athens for the presidential election. The same papers suspect that the German Propaganda Bureau has made similar efforts to prevent the return to power of M. Vénizelos. They hoped that, if their candidate were not elected, they would at least be able to so weaken the Vénizelist party's majority as to render impossible the formation of a stable Cabinet, and that the result would be a second dissolution of the Chamber, in which case the present Government would remain in power to proceed with new elections.

Greece's Foreign Policy.

According to the Government organs, the King is more determined than ever to refuse his consent to the abandonment of neutrality, and, should M. Vénizelos wish to return to power he will have to renounce his policy of action, and make the *amende honorable* by acknowledging his mistake. Otherwise there will be another dissolution of the Chamber. These statements, however, reflect only the opinions and wishes of Government circles, and perhaps of certain military and foreign circles, for as the King is not yet in a fit state of health to interest himself in matters of State, his views cannot possibly be known.

Bulgaria and the Entente.

The attitude of Bulgaria continues to play an important part in shaping the decisions of Greece. After the irreparable indiscretion of M. Gounaris, who revealed the plan which M. Vénizelos had entertained for the cession of Kavalla to Bulgaria, the latter insists, and will continue to insist, on having that region handed over to her. On the other hand, the Entente Powers, realising that they cannot rely to any extent on the co-operation of Greece, have decided to proffer their aid to Bulgaria in inducing Greece to cede the territories she claims. This fact, which has greatly disconcerted official circles, undoubtedly constitutes a check for the present Government, seeing that the same Powers had promised M. Vénizelos that they would not ask for any concession whatever from Greece in favour of Bulgaria. Now, it is quite possible that Bulgaria may make an attempt to occupy this territory, the Powers having made it tacitly understood in their offer that she would have their consent to such a step. Greece might then find herself at any moment confronted with a war which she would have to wage alone, without the assistance, either military or financial, of any of the Powers and, moreover, without having anything to gain, but merely in order to defend the contested territories.

Greece's position would not be any better if Bulgaria came to an understanding with the Powers and decided to take part in the Dardanelles operations, for the Powers would then have no further need of Greece. The rôles of the two countries would be reversed, and it would be Bulgaria who, profiting by her opportunity, would become the stronger of the two.

M. Venizelos' Role.

As Greece cannot in any case take any action for two months, until such time as the new Government is installed and the country's eventual participation in the war is negotiated and decided on, M. Vénizelos will have ample time to follow the course of events. By that time the Entente Powers will have come to an arrangement with Bulgaria which will exclude the intervention of Greece in the Dardanelles; or else the negotiations will have definitely failed, in which case the Powers, having no longer to consider Bulgaria, will be in a position to guarantee the territorial integrity of Greece. This will decide the entry of Greece on the side of the Entente Powers, above all if the danger of an Austrian descent on the Balkans is averted. Greece would then be able to send a force of 100,000 to 150,000 men to the Dardanelles, which should speedily bring operations there to a satisfactory conclusion.

The German Propaganda.

The actions of the German propagandists who are working in Athens, under the leadership of the famous Baron Schenk, have of late become such as to call forth indignant protests from all sides demanding his expulsion. This outcry has somewhat worried the poor Baron, and it is reported that, in order to protect himself against any measures that may be taken against him, more especially when M. Vénizelos returns to power, he is about to join the German Legation as "Commercial Attaché."

PERSIA'S NEUTRALITY.

Reuter's Agency is informed that, according to a Persian official telegram received from Teheran on Monday, the Persian Government is taking every precaution to prevent any action on the part of individuals or otherwise likely to prejudice its neutrality, and adding that Dr. Pugin, who, it was reported some days ago, was starting or had already begun a journey towards the Afghan frontier, had not started, but was in Teheran. The telegram states that the situation in Ispahan is quiet and that there is no cause for anxiety.

NOTICE TO SUBSCRIBERS.

Subscribers to "The Near East" who have left the Ottoman Dominions since the war will oblige by notifying the Manager of their new address as early as possible, so that the supply of the paper should not be unduly interrupted.

"The Near East" has largely increased its circulation in the United Kingdom since the war, and the Management is convinced that there are many people still who would be glad to know of its existence. Specimen copies will be forwarded post free if the names and addresses of friends are sent to the Manager, at 16-17, Devonshire Square, E.C.

NEWS FROM TURKEY

(From Our Special Correspondent.)

Athens, June 21.

The event of the week in Constantinople has been the celebration of the 462nd anniversary of the taking of Constantinople by the Turks. Last year was the first time that this event was officially celebrated, and the celebration this year was carried out with much more pomp and bluster, though the Sultan does not appear to have taken any part in the proceedings. Stamboul was beflagged, and crowds thronged the streets. A procession was formed outside San Sophia and marched to the Fatih Mosque, where speeches were made over the Conqueror's tomb. There is a certain irony in celebrating the foundation of the Ottoman Empire on what looks like the eve of its dissolution.

Situation in Constantinople.

This week's arrivals from Constantinople all describe the situation there as extremely critical, and one marvels at the submission of the Turks to their German taskmasters, who seem to be thoroughly hated. The city is crowded with wounded; and many empty houses, including some English residences at Kadikeui, are being occupied by them. Owing to the difficulty of transport, many wounded are now being left at one or other of the small towns between the Peninsula and Constantinople. They get very little, if any, attention.

It is estimated that the Turkish losses must now exceed 120,000 men, and it is said that the Turkish troops now fighting at the Dardanelles are much inferior to those who were on the Peninsula when the Allies landed. German officers continue to arrive in Constantinople to replace losses, but German families are leaving. The Turkish people, fed by the newspapers, are quite confident that the capital will not fall into the hands of the Allies. The British submarine's appearance at Constantinople seems to have caused more alarm than anything else. A few more similar raids and some bomb-dropping on the Arsenal and on the ammunition factory at Macrikeui and other places would probably produce a real panic in Constantinople, which might bring about a change in the political situation. The creation of such panics in the capital itself would make more impression on the Turks than any amount of fighting at the Dardanelles.

Supplies of Coal.

The Russians seem powerless to prevent coal finding its way into Constantinople; for further supplies have arrived, and the flour mills have again been able to work. Wood, too, is being accumulated to replace coal in the mills, factories, etc. Bread is therefore still obtainable, though in limited quantities. There are very few steamers running on the Bosphorus or to Kadikeui, and gas for domestic purposes is supplied in limited quantities.

Krupps appear to have converted the workshop of the Tramway Company at Chichli into a factory for making munitions, and many workmen from Germany are there making shells, hand grenades, etc.

Several German submarines are said to have entered the Marmora, and a small Turkish submarine appears to have come into existence, but is not in a working condition. The Breslau received serious damage in her last encounter with the Russians, and on her return to Constantinople about thirty of her crew were buried at Chichli. The Turkish *communiqué* states that she sank one Russian torpedo-boat and damaged another. The steamer torpedoed by our submarine in Panderma appears to have been the large Government transport Gul Djemal.

(From An Occasional Correspondent.)

Athens, June 22.

Treatment of Englishmen.

I have received many interesting details as to the present condition of affairs at Constantinople from a particularly well-informed Greek subject who has just arrived from that city. His position enabled him to mix freely not only with the British and other subjects of the Allies, but also with the Germans and Turks, and he had special opportunities of observing everything. The following is a résumé of his interesting story:—

As a rule the British who remain are not molested. The chief exception has been Mr. Churchill, whom the Turks treated with the utmost cruelty, in the hope of getting useful information out of him. He has now been released. The Rev. Robert Frew is still bravely carrying on his work of mercy among the British prisoners, without hindrance from the Turks. I am assured that the prisoners, and particularly the wounded, are really well treated, the principal reason being that, in consequence of the scarcity of Turkish medical men, they are looked after by Greek doctors, who are as attentive and kind as they dare be to them. My friend saw several of these prisoners at Maltepe, near the Seven Towers, on the outskirts of Stamboul—not the place of the same name on the Asiatic shore of the Sea of Marmora.

Appearance of the British Submarine.

My informant happened to be near the Galata Bridge when our submarine put in an appearance. There was a regular panic, and all the shops were quickly closed, but the police immediately afterwards insisted on these being opened again. The torpedoed transport was not lying by the Arsenal in the Golden Horn, but alongside the quay at Galata, outside the bridges. It would in any case be very difficult for a submarine to pass under the floating bridges, because the Turks, or rather the Germans, have placed obstacles in the water, in the shape of chains, wire-netting, etc. The Turks are in such mortal dread of our submarines that they adopt some very absurd precautions. For example, the boatmen and caique men of Galata, who are mostly Greeks, are not allowed to leave the shore, "in case they carry fuel or provisions to the submarines"! For the same reason no boat is allowed to cross the Marmora, or from one of the Princes Islands to another, unless accompanied by a policeman, who assures himself that no goods are to be carried to the enemy. But that is not all. At the point of departure a list is made of the persons in the boat, and this is checked at the point of arrival. Again, on the return journey the full number must turn up, otherwise there will be trouble! Fishing is entirely prohibited.

Another point of deeper military interest is that reinforcements for the Dardanelles are no longer sent by sea, for fear of the submarines, but are despatched by train to Uzun Keuipru, on the route to Adrianople, whence the troops have to march to their destination. This takes several days, and they usually arrive in a state of great exhaustion.

Life in the City.

There is practically no business being done, and those shops which remain open have mostly been obliged to do so by the police. Bread is doled out to the Mohammedan population, but the Christians have great difficulty in procuring any. It is of a dark grey colour. Coal is unobtainable. A few vessels are still forced to sail into the Black Sea to ship coal, but few of them ever return, as they are mostly sunk by the Russians. The captains of these vessels are threatened with death if they refuse to sail. To supply themselves the Turks have now instituted a search in all Christian houses, where they commandeer all the coal found. Petroleum costs about £T1 (18s.) per tin, and other commodities in proportion. The Army, however, seems still to have a good stock of supplies, and my friend saw trains full at various places. These come through Bulgaria.

Christians Disarmed.

All Christians have recently been disarmed. A thorough search was made in every house, and all sporting guns, revolvers, pistols, and other weapons were simply confiscated. This has created much alarm among all Christians, because the Turks have been allowed to retain their arms, and if the Turkish mob should turn upon the Christians they will be absolutely defenceless. Executions are constantly taking place, and a day or two before my informant left seventeen persons—mostly Armenians, but also including two or three Greeks—were hanged in Stamboul.

Serious Quarrel at the Dardanelles.

Details of the quarrel between Turkish and German officers at the Dardanelles have been leaking out little by little, but my informant obtained his information at first hand from both Turkish and German sources. It seems that the Turkish officers objected to the advances against positions in solid formation in the German fashion, and pointed out the deadly effect of British machine gun fire against such formations. It was downright slaughter, they said, and they insisted on adopting more open formations. There were also other causes of dispute. The Germans in their arrogance would not listen, and the quarrel became acute. Some officers were killed on both sides, and the result was that most of the Turkish officers were arrested and bundled back to Constantinople, to be replaced by others more appreciative of German methods.

Scarcity of Water.

Owing to the shortage of coal, the pumping machinery at Dercos, which provides the city with its sole pipe-water supply, no longer works, and water is extremely scarce. At the recent great fire in Pera not a drop could be got from the pipes, and the fire was simply allowed to burn out. It ravaged the district behind the Greek Embassy and nearly consumed that building.

Feeling Among the Turks.

Many Turks would like to make peace, but Enver either refuses to listen or is too secure in the clutches of his masters the Germans to be able to do anything but fight. Turkish officers assured my friend that the first attack on the Dardanelles very nearly succeeded; and they declare that if it had been continued a day or two longer the Turks would then have given way. But during the long interval which

Digitized by Google

elapsed before the present attack there was ample time to prepare the most elaborate defences, and the Turks are now again quite hopeful.

A German officer boasted to my friend of the great resisting power of their elaborate series of concrete trenches, which he declared were practically indestructible. But it is apparently quite true that the men are becoming disheartened and demoralised. They are not accustomed to this slow trench warfare, in which the enemy rarely shows himself. "Show us our enemy," they say, "and we will fight; but we can see nothing until they are upon us like a thousand devils, and then we have no chance against their superior weapons and skill."

The Goeben and Breslau.

The Goeben still lies in the bay of Stenia, in the Bosphorus, surrounded by lighters to protect her from torpedoes. She seems to be quite *hors de combat*. The Breslau lies in the Golden Horn, showing, even to the passing observer, evidence of severe damage in her upper works amidships, as a result of her last encounter with the Russian fleet. The Russian bombardment of the Black Sea entrance of the Bosphorus is clearly heard in Pera, and some of the shells aimed high at the forts find their way down near Therapia.

General Limann von Sanders, who is in supreme command, travels constantly between Hademkeui, near Chatalja, and the Dardanelles. He is said to wear armour of some kind, not only over his body but over his head, and one seldom sees more than a pair of eyes looking through huge goggles. He fears assassination by some "disenchanted" Turk. At his house no one is admitted unless he is personally known. There is a small sliding panel in the door, by the use of which visitors can be thoroughly examined to make sure that they have no evil intentions.

Reports regarding the state of Constantinople are somewhat conflicting, being tinged inevitably by the hopes or fears of those who are responsible for them. In these circumstances the view taken by a neutral free from bias is of peculiar interest, and we have pleasure in publishing the following extracts from a letter written by an American resident in the city on June 18. The writer has since left Turkey. We are indebted to the recipient of the letter for permission to publish these extracts:—

Since we have received no English mail at all we fear you also have received little news from Turkey. We live in suspense from day to day, praying for the English to come in. The Germans fill the city and think they own the whole place—it is so disgusting! The language of the place is Deutsch; even the beggars on the bridge ask one for *zehn Para*. Everything has risen so in price that people do not know what to do. Oil is a lira a tin, candles and matches so expensive that people go to bed in the dark. Thread is 2½ piastres a spool, and everything else proportionately higher in price. Nothing has come in this year except the Deutsche, and you can't imagine how hard it is to get anything. . . . The English left in Constantinople have been treated very well. . . .

Enver Pasha has built three palaces this year—two in Bekitash and one on the hill above Karouchesme. He has robbed the people right and left. . . .

—— and —— are remaining this year, as travelling is next to impossible. Really, it never was so bad. . . . Oh, if the English don't soon come in life will be unbearable!

There are 50,000 wounded Turkish soldiers in the city, and everyone is doing Red Cross work. When we go to the hospital they say, "Sen Allemand?" When we answer "American," you should see their countenances fall. There are a few English soldiers in Gulhané Hospital. There was one over at Beylerbey, who died the other day. We all had been over there to see him, and the Bebek and Hissar ladies went over often and took him nice things to eat. They tried to have him moved to where the other English soldiers were, but no such joy was granted him. He was the only English soldier there, and he was for seventeen days with only Turkish-speaking companions. He wrote on a paper what he wanted, and through that the English and Americans learned he was there. Then a nurse came to his ward who spoke some English, but all in vain. . . .

Did you hear the story of the Goeben? It had been lying at Stenia all the winter, and the sailors were having a fine time, doing nothing but drink beer and eat sausages. So one day the Turkish *hanums* went to them and said: "Why don't you go to the Dardanelles and fight, where our brothers, husbands, and fathers are dying? You sit here and eat our bread and live on the fat of the land," and so on. Well, the next morning the ship left, but it was not gone long!

The British Hospital may be soon in the hands of the Turks if the British Government does not do something to hold it. They have ordered the staff home, and the Red Cross cannot raise enough money to run the whole establishment, for there are so many wounded now at Tash Kishla, near Bekitash. We hope the Government will do something, for we know what the Turks would do to it if they have half a chance.

Another letter which reaches us from a trustworthy source gives news of Constantinople up to June 18:—

You have doubtless heard of the large fire which occurred in Constantinople on Tuesday last, when between 1,500 and 2,000 houses were destroyed. The fire raged from 11 a.m. till past midnight, and for the benefit of those of your readers who know Constantinople I would add that it included the Chikour, Bostan, and Jehanghir quarters—that is, from the back of Galata Serai down towards Tophaneh and up towards the Italian Hospital (which was saved), and back towards Rue Sira Selvi. The Rue Rodolphe is all destroyed, as well as part of the continuation of same, known as Rue Faik Pasha. Several mosques were burned, and a few lives were lost. At one time the Tophaneh Artillery Administration was in danger. The wind was very high, and during the progress of the fire changed from north to south.

On Wednesday, 16th, at daylight, the Turks hanged twenty Armenians on the Sultan Bayazid Square, supposed to belong to the Hintchakist party. They have been in prison over eight months. Those hanged included several school teachers, from different parts of Turkey, and a doctor.

Several Sisters (nuns) have come through. One of them, who was imprisoned by the court-martial, was so ill that the American and Italian Ambassadors and the Pope's representative at Constantinople were so active on her behalf that the Turks eventually released her. There are still some Sisters and priests locked up. I am told that twenty-two Sisters while in prison occupied a room five metres square with only two or three beds amongst the lot, and they used to take it in turns to rest. The Sister Superior of the Convent of Notre Dame de Sion has been, and is still, in prison, since May 10. She was condemned by court-martial to death, but the ambassadors intervened, and succeeded in getting her sentence commuted to fifteen years' penal servitude, which after the war she has to undergo in Germany.

One of the Sisters still in prison is sixty-five years of age. The principal charges against the religious bodies is that of carrying on a correspondence with the enemy. Some postcards produced, and explanations demanded, were again very amusing. One spoke of the "Lamentations of Jeremiah," which puzzled the Turk, and it was only after great difficulty that the Dragoman of the American Embassy could get the Turks to understand what it meant. Another was signed with initials which, of course, were wrongly interpreted. "Frcs.," a scribble, and short for Francois, the censor declared meant "Faire Regne Cesser Sultan!"

CYPRUS NOTES.

(From a Correspondent.)

Cyprus, June 26.

The Government Offices removed to Troodos for the summer months during the week ending the 19th instant.

His Excellency the High Commissioner and Lady Clauson arrived at Government Cottage, Troodos, on Friday, the 18th instant. On the previous Wednesday his Excellency paid a visit to Famagusta.

Mr. Alexander Mavrogordato, Financial Assistant, Public Works Department, has been appointed Registrar of Co-operative Credit Societies. The Bill for the establishment of these societies was passed in the Legislative Council session of last year, and has since received the Royal sanction.

A scheme is under consideration for erecting a hospital for consumptives at Limassol, or possibly a wing may be added to the existing municipal hospital there for the reception of cases of phthisis. It is understood that Government has promised a grant of £350 for this object.

The first batch of convalescent wounded arrived yesterday, in all about 250. These are being conveyed from Famagusta to the new railhead at Gorykhon, and thence by motor ambulance to Troodos, where every preparation for their comfort has been made.

(From Our Own Correspondent.)

Larnaca, June 27.

A large number of counterfeit Cyprus Government £1 banknotes were recently put in circulation in the island, but, luckily, the fraud was quickly detected and the offenders arrested, thanks to the able manner in which the police acted in the matter. With the false notes the culprits had bought a quantity of grain, for which they paid high prices, but which was seized before it was shipped.

The Rev. John Hackett, D.D., who died recently at Lyme Regis, was well known in Cyprus, where he resided several years as Chaplain to the Forces, and where he collected data for his monumental work on the "Orthodox Church of Cyprus." He took a lively interest in Cypriot affairs, especially in the controversy which some years ago divided the island into two parties owing to the Archiepiscopal question, and published in the *Irish Church Quarterly* (October, 1908), the *Guardian*, and other papers, several articles dealing with the subject. His death is deeply deplored by a large circle of Cypriot friends. To the widow and the only son, Lieut. John Hackett, R.N., who is now serving in the Dardanelles, we beg to convey our sincere condolence.

An interesting article entitled "Valentina Visconti" (Queen of Cyprus, 1378-1393) has appeared in the May issue of the Italian Review *Rassegna Nazionale*, and is worth reading.

BULGARIAN LETTERS.

(From Our Own Correspondent.)

Sofia, June 15.*

Bulgaria and the Entente Powers.

The reply of the Bulgarian Government to the proposals put forward by the four Entente Powers on May 29 is to be delivered very shortly, certainly this week, possibly even to-day. Judging by the favourable tone of the official (Ministerial) Press, it may be confidently anticipated that this reply will prove satisfactory to the Entente, and that it will serve as a basis for general discussion and arrangement of differences and difficulties. According to well-informed circles, the reply will not contain any impossible or impracticable demands about guarantees for the compensation offered in Macedonia. As to the "Contested Zone," for which the Serbo-Bulgarian Treaty of 1912 provided Russian arbitration, the Bulgarian Government in its reply is now going to suggest arbitration by the four Entente Powers. The demands of Bulgaria in other regions are based on the principles of nationality and on commercial and economic exigencies.

Since the date of the proposals the political atmosphere here has undergone a distinct change in favour of the Entente. The Ministerial *Narodni Prava*, the organ of the Prime Minister, in a couple of leading articles dwelling upon the success of the present Cabinet's foreign policy, announces to the nation that the time for the reparation of the wrong done to Bulgaria by the unjust treaties of Bucharest and of Constantinople is rapidly approaching: the favourable opportunity of "unfurling our flag," as King Ferdinand said two years ago to the disbanding troops, has now come. This article and another about the preparedness of the Army have served to raise the spirit of the nation, and the general feeling has now changed in favour of the Entente.

Albania and the Powers.

The Albanian colony here has to-day handed to the representatives of the Great Powers a memorandum protesting against the Serbian invasion of their country, and urging the maintenance of an independent Albania, guaranteed by all the Great Powers.

The Casino Outrage Trial.

The 23rd inst. is fixed as the date for the trial of the accused in the case of the bomb outrage at the *Bal masqué* at the Casino on February 13, and in the plot against the life of the King and the attempted murder of the lawyer, M. Dobrinovitch. The accused are seven in number, and amongst them is M. Vikentia P. Anastasoff, a high functionary in the High Court of Accounts. Amongst the witnesses—about eighty in number—who have been summoned to appear is Dr. Gennadieff, the leader of the Stambulovists. The accused will be tried by the ordinary military tribunal at Sofia. Your readers will remember that the bomb outrage resulted in the death of Lieutenant Boyadjieff, son of General Boyadjieff, a former Minister for War; of Mme. Bajaroff, daughter of General Fitcheff, the present Minister for War, and others.

A Postal Notice.

Yesterday the Direction of Bulgarian Posts and Telegraphs issued a notice declining any responsibility for the loss of registered letters sent for Servia or Turkey. The reason for this step is that the military censors in the two countries mentioned are taking possession of and confiscating postal correspondence.

Bulgarian Reply Delivered.

P.S.—I have just received a telephone message stating that the Bulgarian Government's reply to the Entente Powers has been delivered this morning by the Prime Minister, who called personally at the four Legations.

Sofia, June 22.

The Political Situation.

As reported in my previous letter, the Bulgarian reply to the four Entente Powers was delivered last Tuesday. About the contents of this reply absolute secrecy is maintained; but judging by the subsequent acts of the Bulgarian Government, it seems that they mean business and earnestly desire to come to a satisfactory arrangement. Last Saturday the Prime Minister, Dr. Radoslavoff, requested all the newspaper editors to meet him, and informed them regarding the political situation and the efforts which the Cabinet is making to secure the abrogation of the Treaty of Bucharest. For the sake of the vital interests of the country the Premier urged them to avoid publishing false rumours and criticisms which might be prejudicial to the success of the negotiations with the Entente.

Meantime, notwithstanding the friendly attitude of this country towards Turkey in this crisis, the Turks have replied to the Bulgarian proposals for a rectification of the Turco-Bulgarian frontier, in accordance with the Treaty of London, by reinforcing their frontier posts and the garrison of Adrianople, strengthening all their fortifications, and mining the bridge over the River Arda and all other railway and road bridges. These hostile measures caused the Government here to summon M. Koloucheff, the Bulgarian Chargé d'Affaires at Constantinople, to Sofia for consultation and explanations. He arrived here last Friday, and in view of the strained situation his return to Constantinople seems somewhat problematical. Indeed, a rupture of relations with Turkey is anticipated.

The Casino Outrage.

The trial of the alleged perpetrators of the Casino bomb outrage of February 13 last, which begins to-morrow, continues to attract widespread interest here. Every event connected with it is keenly followed, not only because the trial concerns the misdeeds of an anarchical group, but because the reputed prime mover in the alleged plot, Vikentia P. Anastasoff, is reported to have been in close relations with Dr. Gennadieff, by whom, it is reported, funds were supplied "for the Macedonian cause."

Bulgarian Refugees from Macedonia.

According to private information from Stroumitza, ten thousand fresh refugees have arrived from Serbian and Greek Macedonia during the past week. Half of them are Turks.

A sad scene was witnessed at Pirot railway station last Friday by some Russian diplomatists and British travellers, who were on their way to Sofia. Five Bulgarian women, three of them in peasant costume, accompanied by four young children, were suddenly ordered by the station police to leave the train; and their baggage, which included various household effects, was thrown out on to the platform. The women and children broke out into lamentations, which increased as the train departed, leaving them behind. They were on their way from Uskub to join their male relatives, who had already emigrated to Bulgaria.

For Armenian Victims.

Last Sunday a requiem service was celebrated at the Armenian church here for the Armenians lately killed at Constantinople. As your readers will doubtless have been informed, the Young Turk authorities last week hanged fifty Armenians and shot five in Constantinople, and three more were shot at Adrianople. Another Armenian, who said that the Bulgarians would soon be seen in Turkey, was also condemned to death. The service here was attended by representatives of various Armenian and Macedonian revolutionary organisations, and touching addresses were delivered.

SERBIAN LETTER.

(From Our Own Correspondent.)

Nish, June 19.

The Balkans and the Entente.

Great disappointment is felt in Serbia at the turn of the campaign on the Russian frontier. It was at one time confidently expected here that the Russian forces, once across the Carpathians, would have a walk over in Hungary and be joined by the Serbian forces on the way to Budapest.

The hard battles fought in Galicia and the plain hints regarding the necessity of an understanding between the Balkan States in order that they may play their part in the war and help to bring the operations of the Triple Entente to a successful issue seem not to have produced the desired effect either in Bulgaria or Serbia. Bulgaria, it is said, insists on wholesale concessions on the part of Serbia. But neither the Serbians nor the Greeks are disposed to make any concessions, and the Governments of both the latter countries are to a great extent under the influence of public opinion; and to this fact must be added the attitude of the military party.

The semi-official organ *Samouprava*, in an article published the day before yesterday, says that most of the Bulgarian newspapers and members of the Bulgarian Parliament are of opinion that the Bucharest Treaty is a political mistake.

The Bucharest peace (says *Samouprava*) was the result of circumstances consequent on the initiative of the Bulgarian Government. It is a heavy chain for Bulgaria in its political life, but it is the result of errors in Bulgarian diplomacy, and is a well-earned chain. It appears to be the opinion in Bulgaria that Bulgarians, like the Germans, are the chosen people of God, and that it is allowable for them to commit political errors without having to suffer for them. Through their conceit of exaggerated power they have deceived themselves and brought harm on themselves, and not only that, but they have also not ceased to make demonstrations against Russia and Serbia. That is surely not the way to come to an understanding with Russia and Serbia, who, although the Slav question is of great importance to them, will not make any concessions to Bulgaria until Bulgaria does something to aid in the Slav question.

The Belgrade *Pravda* states that, according to the Russian Press, Greece proposed to Serbia to resist jointly the granting of any concessions to Bulgaria, and that Greece will on no account cede Kavalla or any other territory.

Serbo-Italian Relations.

Yesterday the *Samouprava* published another article referring to Serbo-Italian relations, and quotes an interview with M. Sasonoff, published in an Italian paper. In this article it is stated that the Russian Minister said that in future Italy will exercise in the Balkans the greatest part of the influence which Germany and Austria-Hungary formerly wielded there. The Adriatic is, through Otranto, Pola, and Valona, a closed sea; and Italy need not fear Russia, which only asks of Italy that she should not do anything inimical to Slav interests. Nor is it likely that Italy will commit the same errors that Austria made in preventing the Slav commercial and cultural development. As regards Bulgaria, she will find out sooner or later that she will be compelled to act on the side of the Triple Entente.

Serbia and Albania.

In a former letter I alluded to the advance of Serbian forces in Albania. These continue to execute their allotted task. It is stated that Serbian telegraph and post offices have been opened at Elbassan, Tirana, Liumi, and Pishkopeia.

Exchange of Prisoners.

Referring to the agreement with Austria-Hungary for the mutual exchange of interned Austrian and Serbian subjects respectively, the arrival in Serbia is announced of two parties, one consisting of 360 persons and the other of 330 persons, who came by way of Turnu-Severin (Roumania) to Prahova (Serbia). The remainder of the interned in Austria-Hungary are expected to arrive in about a week.

The German aviators, Lieutenant Schaefer and his companion, who were made prisoners last week at Kriva Palanka have been sent on to the Serbian headquarters at Kragujevatz.

SUDAN NOTES.

(From a Correspondent.)

Recent Legal Appointments.

Mr. C. F. Ryder, formerly Second Inspector, has now been made Province Judge at Port Sudan. He has been in the service of the Government since the latter part of 1905. Several other legal appointments have been made by the Governor-General recently, including the conferring of District Judgeships upon Messrs. B. H. Bell, stationed at El Obeid, Province of Kordofan; R. V. Winter, stationed at Wad Medani, in the Blue Nile Province; E. G. Sarsfield Hall, stationed at Singa, in the Sennar Province; A. G. Pawson (lately on leave), and Major S. K. Flint, stationed at Halfa, in the province of that name.

Honour for a Loyal Sheikh.

Sir F. Reginald Wingate, in his capacity of Governor-General, has just conferred upon the Sheikh Mohammed Gadah el Dam, Sheikh of the Fellatas, the Robe of Honour of the Second Class, "for services rendered." The Sheikh is one of the many Sudan chieftains who have behaved with great loyalty and devotion to the British Government during the crisis in Egypt and the Sudan. The Fellatas—who are also known ethnologically as the Felatas, Foulahs, Fellatahs, Fulani, and Fulhe tribe, inhabit the west and central Sudan, and are often erroneously allied with the Nubas, with whom, however, they have nothing in common. They were originally Hamites, now fused in many places with the surrounding negro peoples. The Fellatas, like the Hausas and other tribesmen from the regions mentioned, are included in the general term "Takarir." A number of them remain as permanent settlers in the Sudan, and several small colonies of them are to be found in Kordofan, especially around Dilling and in the south of the Bara District. They are very amenable people, who earn their living by cultivation, gum collecting, and, in the towns, by water-carrying and other menial work.

Khartoum's Police Magistrate.

Captain F. Burges, the well-known and popular police magistrate at Khartoum, is at present on leave, granted on "medical grounds." Captain Burges's is one of the busiest courts of justice in the Sudan. It was created in the earliest days of the British Occupation—March of 1899. Although invariably patient and attentive in dealing with each case as it comes before him, Captain Burges arrives very rapidly at a decision, and thus is enabled to deal with several hundred cases—mostly of a trivial nature—in the course of a single day's hearing. During the sixteen years that he has been in the Government service, the Police Magistrate of Khartoum has acquired a close insight into the character of the people; he benevolently regards them more or less in the light of children, to be handled with corresponding thoughtfulness and gentleness; and it is but seldom that he passes a severe sentence. On the other hand, he displays but scant sympathy with, or clemency towards, the hardened offender. During the course of the year many thousands of cases come before him, and he has the law and the best manner of applying it at his fingers' ends.

BRITISH REFUGEES IN ATHENS.

The attention of ex-British residents of Constantinople at present in Athens is drawn to the fact that "The Near East" is on sale every week at M. Th. Vafiades' Bookstore, where subscriptions are also received.

FRENCH NATURAL SPARKLING TABLE WATER.

PERSIAN NOTES.

(From a Correspondent.)

Persia's Embarrassing Position.

The position of Persia has been most embarrassing since the beginning of this war. She declared her neutrality at the outbreak, and emphasised it by the issue of an Imperial Firman to that effect. Ever since then the Persian Government has rigorously, and by every means at its disposal, striven to maintain that neutrality; but unfortunately it has not been able to make it respected—the Turks invaded Persian territory, in the province of Azerbaijan, arguing that Russian troops were already there and were threatening the Turkish right flank. The protests of Persia to both sides were of no avail; the Turkish and Russian forces came into conflict, and Azerbaijan became the scene of fighting.

A mistake made at this juncture, and one which certainly aggravated the situation, was the employment of Shuja-ed-Dowleh by the Russian authorities. Shuja-ed-Dowleh's antecedents are known to everybody, and it is notorious that by his cruelty and tyranny he had made himself most unpopular in Azerbaijan, and is especially hated by the Kurdish tribes on the borders of Turkey. Nothing, therefore, could have aggravated the Kurds and alienated their sympathies from Russia more than such a step. Shuja thus did more harm than good to the cause of Russia. What is more, if report speaks true, he ran away as soon as the first shot was fired by the Turks; and a quantity of ammunition and a number of guns belonging to the Persian Government, which he had taken with him from the arsenal in Tabriz, fell into the hands of the Turks when he sought safety in flight.

It is recognized by those Europeans who are well-informed, and especially by those who come from Persia, that had the Russian troops been withdrawn from Persia at the beginning, the Turks would not have dared thus to violate the neutrality of the country. As it is, the presence of the Russian troops has furnished the Turco-German propagandists with a strong weapon. The Turks and Germans use every possible means to win over Persian public opinion, and to induce the Persians to throw in their lot with them. The Turks induced the Ulemas of Nejef and Kerbellah to issue *fetvas* calling on the Persians to make Jehad (Holy War). The Persian Government energetically put a stop to this, though, it must be confessed, it was a difficult task.

Then the Persian Government had to deal with the question of Herr Wassmuss and Dr. Pugin. The former the Germans proposed as Consul-General in Shiraz, and the latter at Ispahan; but the Persian Government refused to recognize either, as both had been carrying on propaganda in favour of Germany and Turkey.

Then came the Turkish incursion into Kermanshah, which has aroused great indignation among the Persians against the Turks. The Turkish advance was resisted and checked by the population of Kermanshah.

The Ispahan Incident.

M. von Kaver was the manager of the Russian Bank at Ispahan. He had at the same time undertaken the management of the vast properties of Prince Zill-es-Sultan at Ispahan, receiving a very remunerative salary from the Prince. His immunity and position as manager of the Russian Bank and acting Vice-Consul of Russia gave him vast powers; and these, it is stated, he used injudiciously, and thus made many enemies, especially among the retainers of the Prince. One of the latter, Garib Khan, was murdered some time ago, and his relatives and friends attributed the murder to the instigation of M. von Kaver. The assassination of the latter is regarded by everyone in Ispahan as a vendetta on the part of Garib Khan's friends. It was in no way due to anti-foreign and far less to anti-Russian feeling or agitation. The incident caused painful regret among all classes of Persians, and most of the Persian newspapers in their leading articles expressed their indignation and regret. The Persian Government spontaneously offered ample reparation, and paid a considerable sum to the widow of the late Vice-Consul.

Persia and the Propagandists.

Judging by letters lately received from Persia, it is quite erroneous to say that German or Turkish propaganda is having any considerable success there. The Persians have always had the highest friendship for the English, whom they consider as the protectors of liberty and of liberal ideas. Moreover, from time immemorial they have looked upon Great Britain as the champion of the maintenance of the integrity and independence of Persia; and this not only because she has proved herself to be the defender of the rights of small nations, but also because the maintenance of Persia as a buffer state is, for obvious reasons, so vital to the defence of her Indian Empire. But it is regrettable to see how little her agents in Persia are doing to keep up Britain's prestige and fair name, and to combat propaganda on the part of other foreign agents. Should these propagandists have any success it will be due largely to the fact that since the beginning of the European War England has shown very little interest in Persia; and especially will it be due to the fact that Russia has not been, and is not, doing anything to win public opinion and to inspire confidence. Mistakes of policy and method are continually committed. Reference has been made above to the great mistake of making use of Shuja-ed-Dowleh, and to the harm it did to the Russian cause. And now the Teheran newspapers are full of the account of a political crisis which they refer to as a "contemplated coup d'etat." They report that Mr. Marling, the British Minister, with Mr. Churchill, the Oriental Secretary to the Embassy, accompanied by Monsieur Back, the Russian Chargé d'Affaires, had an audience of the Shah, which lasted three hours; and it is said that the object of the audience was to induce His Majesty to appoint Saad-ed-Dowleh as his Prime Minister. Now Saad-ed-Dowleh is one of the best-hated men in Persia, if not the best-hated. He was the right-hand man of the Ex-Shah when he bombarded the Mejliss, and he was exiled, together with the Ex-Shah. But he has always enjoyed the goodwill of the Russians, in the same way as the Shuja-ed-Dowleh.

Two years ago Saad-ed-Dowleh, who is an old man of eighty-five, was permitted to return to his family from exile; and once before (soon after his return) the Russian Legation in Teheran proposed him as a candidate for the Premiership, but the mere mention of his name caused agitation and public demonstrations, and the idea had soon to be dropped. To put forward such a candidate, whom both the Russian and British Legations knew well from previous experience, was astonishing. It would have been blind policy in ordinary times; but how unpardonable and disastrous at this juncture when everything should be done to win public opinion and to inspire confidence!

To resume—the Shah is reported to have replied to the British and Russian representatives that as a constitutional sovereign he had to refer the question to the Mejliss, and could confide the Premiership only to a statesman who enjoyed the confidence of the majority. The members of the Mejliss were indignant when they learnt that the name of Saad-ed-Dowleh had been suggested. Meanwhile, the people had also heard about these events, and protest meetings and demonstrations were held in public places. What still further aggravated the situation was the report that, once appointed as Prime Minister, Saad-ed-Dowleh would become Dictator and would close the Mejliss and suppress the newspapers. In fact, he would rule Persia as Shuja-ed-Dowleh rules Azerbaijan. In short, it was considered that it could not have been worse if a Russian Viceroy came to take over the Government of Persia. This incident had a most regrettable effect on the prestige of Great Britain and Russia in Persia.

The more regrettable is it that it should have occurred soon after the arrival of Mr. Marling, the new British Minister; for, thanks to skilful representations by interested parties, many people were persuaded that he was the promoter of the scheme. That, it need hardly be said, is a mistake; but it is to be feared that certain parties who ought to have had regard for British interests and British prestige did—unwittingly, let us hope—play into the hands of those who were behind the manœuvre.

OUR SERBIAN ALLIES.

The following official statement was issued by the Serbian Press Bureau on Thursday of last week:—

On June 27 early in the morning we succeeded in forcing a landing at Micharska Ada, to the east of Shabatz, and captured the place. We took 185 prisoners. The enemy's losses were heavy. We captured a field telephone, 106 rifles and bayonets, and five ammunition waggons.

On the morning of June 28 four hostile aeroplanes flew over the outskirts of Belgrade. On being fired at by our artillery they changed their course and made for Obrenovatz. One of the machines was badly damaged, and was forced to land on the heights of Bejania, where it caught fire. The three others dropped bombs on Obrenovatz without any result. Prisoners were taken at Micharska Ada, and more than 200 arrived at Nish yesterday.

In connection with the aeroplane raid it may be of interest to quote the official *communiqué* issued in Vienna on June 30. It said:—

As a reprisal for the Serbian attack near Shabatz, one of our aerial squadrons early yesterday morning bombarded the wharf at Belgrade and the military camp of Orasae, south-west of Obrenovatz, with very good success.

According to a message forwarded from Corfu to the *Corriere d'Italia*, two Serbian regiments have occupied Durazzo, and the Italian Minister there has left for Rome to confer with his Government on the situation.

Great Britain and the Jugo-Slavs.

Last Friday Lord Crewe, as representative of the Secretary for Foreign Affairs, received at the Foreign Office a deputation of the Jugo-Slav Committee. The deputation was presented by Dr. A. Trumbitch, deputy of the Dalmatian Diet and President of the Committee, and included Dr. Ivo de Giulli (Ragusa), Dr. Gustav Gregorin (Trieste), Mr. Ivan Mestrovitch (Dalmatia), Dr. Nikola Stojanovitch (Bosnia), Mr. Frano Supilo (Croatia), Mr. Duyan Vasiljevitch (Bosnia), and Dr. Niko Zupanitch (Carniola).

Dr. Trumbitch explained that the organisation represented all the Jugo-Slav provinces of Austria-Hungary, its object being to enlist sympathy for the national aspirations of their people. Living under eleven different administrations, they suffered from the odious domination of their enemies. Though described as Serbs, Croats, and Slovenes they were one nation, and they sought deliverance from the Austro-Hungarian yoke and union with their brethren of Serbia and Montenegro. Of old their task was to bar the way against Ottoman invasion. Their new mission was to serve as a dyke against the Germanic tide, which tended to flow towards the Ægean and the Mediterranean. They could only do this if formed into a single State. If Serbia had been overthrown by the Germans and Austrians the British possessions of Egypt and India would have been threatened. Those Jugo-Slavs who inhabited all the northern and eastern coasts of the Adriatic were mariners whose qualities would complete in the happiest manner those manifested by Serbian deeds on the battlefield. That population and its territory ought therefore to be preserved to the Jugo-Slav nation.

In reply, Lord Crewe expressed his regret that Sir Edward Grey had not been able in person to welcome the deputation. He then went on:—Permit me to say that I have given great attention to the political and moral considerations of which you have given an outline. Questions of nationality, aspirations towards the complete expression of racial genius, have always had the liveliest sympathy of the English people. From the 16th Century to the present day the annals of our country and the memoirs of our statesmen have continually testified to this fact. Therefore, after the victorious conclusion of the war, which we all expect, you may count upon our goodwill to realise, in proportion as the map of Europe may be rectified by the Powers, the principles of which you are evangelists. You must, however, pardon me if I add in a frank and friendly manner a word of caution on this subject. Never, as far as I have been able to peruse the historic annals to which I have referred, neither as the result of a war of liberation boldly undertaken nor with the help of allied Powers, has any nation realised to the full its desire for expansion or its dreams of territorial acquisition. It is unnecessary to ask why. Sometimes it was because there existed on the frontier a fringe of population who could not be said to belong definitely to either of the races concerned, and we cannot hope that history will fail to repeat itself at the close of the present war. In any case, however, the deputation may rest assured that the Slav spirit will find great opportunities of expansion, with a future of incontestable grandeur and prosperity on new and wider fields.

"More than Gilbertian."

The Times special correspondent in Belgrade declares, in an article published on Wednesday, under the heading "River Warfare in Serbia," that "the present situation in Belgrade is almost more than Gilbertian." Nobody acquainted with the facts of the case will feel disposed to dispute that statement. The correspondent referred to goes on to say that the Austrian monitors on the Danube, "since their number was reduced from seven to six by a pretty piece of torpedo work on the part of the solitary little picket boat commonly known as 'The Terror of the Danube,' have been singularly unenterprising." That, of course, is not Gilbertian. But what follows is distinctly so:—

There are understood to be weighty reasons why nothing must be known in England of the composition of the mixed artillery force which, under General Jivkovitch, military commander of the district, has charge of the defence of Belgrade. Its composition is thoroughly well known to the Austrians. The essential facts have been published in French, American, Swiss, and other newspapers. But it appears that the most calamitous consequences might be expected to follow any publication of the same facts in England. One can say nothing, then, except that the force is charmingly cosmopolitan, and that the young gentlemen (I cannot, happily, at the moment remember their nationality, for I have not seen them since lunch) who have charge of the Terror of the Danube have great larks with it. They poke their way on dark nights into creeks and passages where they are not in the least expected and annoy the Austrians dreadfully.

The Austrians have three picket gunboats which look like toy Dreadnoughts, with machine guns mounted in their turrets. Anyone of them could eat up the "Terror" in a few minutes if it could get at it. But the "Terror" comes up when it is nice and dark, and makes rude remarks with its single machine gun to one of the Dreadnoughts and then runs like a hare. Ten days ago one of the Dreadnoughts chased it into a prepared minefield, and the Dreadnought's remnants drifted ashore on Kojara Island, in mid-stream, where the hull and turrets are plainly visible from Belgrade. . . .

The young gentleman in command of the "Terror" (whose nationality still escapes me) has within the last two days been decorated by his Government with a —well, what corresponds to a D.S.O. And most thoroughly has he earned it. Night after night he and those with him go gaily on errands of the utmost danger, and they keep fairly terrorized an enemy force of . . . literally more than a hundred times their strength. It almost makes one weep that one cannot say who these young men are.

Mercifully, *The Times*, greatly daring, adds:—"We understand that the officer referred to by our Correspondent is Lieutenant-Commander Kerr, R.N., who has recently been awarded the D.S.O. for the 'pretty piece of torpedo work' mentioned. The crew of the boat (The Terror of the Danube) all received the Distinguished Conduct Medal."

In this connection we may venture to note that photographs have been reproduced in several English papers during the past week showing various scenes in connection with the fighting in Serbia, and that, to the uninitiated at least, quite a number of the "Serbians" look extraordinarily like our own soldiers and sailors. One artillery man, for instance——. But there! Of course they were all men of the Serbian Army—and Navy!

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

GREECE AND KAVALLA.

To the Editor of THE NEAR EAST.

Sir,—The late various attacks against the Greeks which have been recorded in your review have made all Greeks reading and appreciating your review feel very sorry.

In the issue of June 18, under the title of "Notes of the Week," you say:—"There are many Hellenes on the coast of Asia Minor, but it is impossible that the Hellenes of Greece should feel toward them as the Roumanians do towards their kinsmen in Transylvania, or the Bulgarians towards their Macedonian kinsfolk. . . ."

I can assure you that we love and look towards the liberation of our kinsmen more than any other nation. We have proved it in our various wars, which were always carried on for the liberation of our fellow-countrymen under the yoke of Turkey.

But how do you want us to give Kavalla, a country which we have liberated only a year ago, to the Bulgars? How do you want us to enslave a Greek population in order to give freedom to another equally Greek? Who will guarantee to us that Bulgaria, her appetite once whetted, will not want to swallow the city of her dreams—Salonika?

No, you must not blame us for not wanting to surrender Greek territory inhabited by pure Greeks.

We will deliver all our kinsmen, but shall enslave none.

Our sympathies are fully for the Triple Alliance. We wish and hope she will have the final success; we will always stand for her, but let her not ask us to surrender any Greek territory to any country.—I am, etc.,

41, Lycabette Street, D. A. NAOUM.
Athens, June 26, 1915.

[We entirely disclaim any desire to make "attacks" upon the Greeks. If we imagine Greece confronted with the two alternatives of "redeeming" scores of thousands of her fellow-countrymen in Asia Minor and of retaining about a thousand who might otherwise pass over to Bulgaria, and if we find that she deliberately chooses the latter, the inference is that she is not impelled by any ardent desire to redeem the scores of thousands in Asia Minor.—ED.]

POLITICAL MANŒUVRES IN GREECE.

A correspondent forwards us some extracts from a letter received this week from Athens:—

In spite of the elections, which were in favour of Venizelos, Gounaris is determined not to let the power go out of his hands. He has the strongest support on the part of the Queen. Despite threats and strong measures, Piræus voted for Venizelos. The consequence is that it is now under military occupation. Nobody is allowed to discuss or to form groups there. The papers even went so far as to say, in leading articles, that votes for Venizelos were votes against the King. All sorts of tricks are played in Macedonia and elsewhere. They are trying to carry the day in Greece by terrorism. Meanwhile the state of the poor King seems desperate. He has grown so weak that he cannot be transported to his country residence, and his brother, Prince George, was not allowed to see him lest the emotion should be too much for the King. Despite all efforts at repression, the party in favour of Venizelos continues as strong as ever.

NEAR EAST BOOKSHELF.

FROM SUSSEX TO SYRIA.*

To very few readers of THE NEAR EAST can Mr. Marmaduke Pickthall need any introduction. In "Said, the Fisherman," "The Valley of the Kings," and "The Children of the Nile" he has shown us that he knows Syria, Palestine and Egypt, and the life and ways of thought of their peoples, as comparatively few Englishmen can claim to know them; and that he can write of them as no other living Englishman can, recalling to us all their subtle charm, yet keeping always a keen perspective and a nice sense of light and shade that is too often lacking in the work of other more pretentious—and, it seems, more "popular"—writers. He revels in the Eastern sunlight, but it does not dazzle him; he can, and does, write with sympathy and insight about the Fellah, whether of Syria or of Egypt, but he declines to gush about him; and he is as free from pose as he is from prejudice.

The title under which the present volume of short stories and sketches makes its appearance will probably puzzle some people until they read the explanation of it which is given in a short prefatory note. It is, however, well chosen and attractive. Mr. Pickthall's old admirers will find no fault with it, and if it serves to draw the attention of new readers to whom a title suggesting the Orient pure and simple would make no appeal, that will be to their advantage. For all the stories are delightful, though they are varied in character to a surprising extent. Many of them are of the East, eastern; many are so purely English that one might fancy the author had spent all his life in some quiet nook in Sussex or Suffolk; others owe their interest to the play of East on West and of West on East; while in two instances Mr. Pickthall breaks what is, one thinks, fresh ground for him, in Switzerland. But wherever the scene is laid the author's art makes it stand out before us clearly, and the characters who move in it are real men and women, not mere puppets. As far as the Eastern tales are concerned, this is not at all surprising, for the creator of Said, the fisherman, is no tyro, but a master craftsman. But, to be frank, "Brendle," though a clever novel, had not prepared us to find him handling purely English subjects with such success as he has done in some of the stories in this collection. One or two of them are so good as to remind one of some of Mr. Thomas Hardy's short stories, and to make one believe that if Mr. Pickthall tried his hand at a longer tale of rural life in Sussex or Suffolk, in, say, the style of "The Trumpet Major," he would make of it a great success.

Probably, however, in spite of the changes that it seems destined to undergo, and that he must surely regret, the Near East will continue to claim the largest share of his interest, and to provide him with subjects in plenty for work in the future. For our own sakes we hope it may be so. For nobody but Mr. Pickthall could have given us quite such a faithful picture of Druze character as it set before us here, in a few pages, in the story of "The Just Steward." The next tale, "Father Saba," is a fine bit of character study, as is, too, "Jenab ul Emir." In lighter vein, "Hashish" and "The Cook and the Soldier" are almost equally good, while "The Story of Hafiz," which tells of the rise to favour and the subsequent fall from favour of an Egyptian village watchman, is a gem, despite its painful ending. "Count Abdullah" will repay reading by adventurous spinsters who have a taste for making acquaintance with Levantine "gentlemen" in unconventional circumstances—and if *they* do not quite enjoy it, those who do not love Levantines will do so. For the same reason "Virgin and Martyr" will find its admirers. The two Swiss stories are frankly frivolous, but they make good reading.

NEAR EAST BOOK NOTES..

The Royal Asiatic Society has just issued "The Babylonian Tablets of the Berens Collection," by Dr. T. G. Pinches. It is a study of inscriptions found at Tello, on temple records, and is illustrated with reproductions of texts and cylinder seals. The price is 5s.

Vol. V. of "Nelson's History of the War," which is edited by Mr. John Buchan, deals in part with the campaign in the Near East.

Messrs. Forster, Groom and Co. are the publishers of a little book with the alliterative title "Turkish for Tommy and Tar," the price of which is threepence.

* "Tales from Five Chimneys." By Marmaduke Pickthall. (Mills and Boon. 6s.)

14	1	Wednesday	2	3
15	2	Thursday	3	4

Monday is the birthday of H.R.H. Prince John, fifth son of the King and Queen, who was born at Sandringham in 1905.

Monday is also the birthday of H.M. King Peter of Serbia, who was born in Belgrade in 1844.

Our Belgrade Correspondent writes:—Prince George, eldest son of King Peter, has been rewarded for his bravery in the present war. He has been decorated with the Karageorgevitch Star with sword, which his gallant conduct has well merited.

Prince Paul of Serbia left London on Monday for Scotland.

The Aga Khan had the honour of being invited to luncheon with the King and Queen on Saturday. On Wednesday his Highness was received at Marlborough House by her Majesty Queen Alexandra.

Madame Pasitch, wife of the Serbian Prime Minister, has left London for the Continent in connection with the work of the Red Cross Society.

M. Radovitch, ex-Prime Minister of Montenegro, called upon the Russian Ambassador on Tuesday evening.

M. Pasitch, son of the Serbian Prime Minister, left London last Friday for the Continent.

Lady Paget left London last week for Serbia. The Serbian Minister and Mme. Pasitch were at the station to see her off.

H.E. Boghos Pasha Nubar has arrived in London from Egypt and Paris on a political mission on behalf of his fellow Armenians.

Under date of July 3, Reuter's Sofia correspondent reports: Sir Henry Bax-Ironside, the British Minister, who is taking leave of absence next week and who will probably not return here, held a brilliant reception this evening. All the principal personages of Sofia, including Dr. Radoslavoff, the Premier, and the Staffs of the Allied and neutral Legations, were present.

A Reuter's message from Sofia, dated July 6, reports:—King Ferdinand to-day received in prolonged audience Sir Henry Bax-Ironside, the British Minister, who is leaving for England. In the course of the audience his Majesty presented the Minister with a tie pin. The Queen received Lady Bax-Ironside.

An official statement, issued by the Press Bureau on Monday, says that Mr. Hugh O'Beirne, C.V.O., C.B., Counsellor and Minister Plenipotentiary at his Majesty's Embassy at Petrograd, will act as Chargé d'Affaires at his Majesty's Legation at Sofia, during the absence on leave of Sir H. G. O. Bax-Ironside, K.C.M.G., his Majesty's Envoy Extraordinary and Minister Plenipotentiary.

A telegram, dated July 4, from Reuter's Petrograd correspondent announced that Mr. H. J. O'Beirne, who has been Counsellor at the British Embassy at Petrograd since 1906 (with the rank of Minister Plenipotentiary since 1913), had left for Sofia to take up the post of British Minister to Bulgaria.

Mr. Hugh James O'Beirne, C.V.O., C.B., entered the diplomatic service in 1892, and was the same year appointed to St. Petersburg as an attaché. Promoted a Third Secretary in 1894, he was transferred to Washington in 1895. Two years later he was promoted to be a Second Secretary, and in 1899 (March) was transferred to Constantinople. The same year he was temporarily employed at Athens, and in 1900 he was transferred to Paris. In 1904 he was promoted to be a First Secretary, and was later appointed British Agent on the North Sea Inquiry Commission. Next year he was sent once more to Washington, where for a time he was Chargé d'Affaires. He was then transferred to Paris (August, 1905), whence a year later he was once more sent to St. Petersburg, being promoted Counsellor of Embassy. There he has acted frequently as Chargé d'Affaires. He was made a C.B. in 1905, and a C.V.O. in 1908. He received the Coronation Medal in 1911, and was appointed a Minister Plenipotentiary in August, 1913.

Lieutenant H. C. Lukach, R.N.V.R., has for some time past been lent by the Government of Cyprus to act as Political Adviser to Rear-Admiral Wemyss in the Ægean in connection with the operations at the Dardanelles.

The Roumanian Conservative Party has chosen M. Filipescu as its leader in succession to M. Lahovary.

Lord Islington, who has been elected president of the African Society for the year 1915-16, will take the chair at the annual meeting of the society to be held this afternoon at four o'clock, at the Royal Society of Arts, John Street, Adelphi.

Sir Frederick Treves has been confined to his bed as the result of his recent visit to the Near East. In a letter which he sent apologizing for his absence from a meeting of the National League for Physical Education and Improvement, held on Monday at the Mansion House, he wrote: "I am sorry I cannot attend the meeting. More than a month ago—just before I left for Mudros—I acquired, through flies I expect, a complaint in Alexandria which has got gradually worse, until now I am laid up in bed and unable to do anything."

We regret to learn that Mr. Lawrence G. Binns, formerly of Constantinople and now residing at Scarborough, has been seriously ill. Happily he is now much better and able to leave his rooms, but he will be unable to attend to correspondence for some little time.

In a letter, dated the 5th inst., acknowledging the receipt of a parcel of books for the wounded, Nurse Wheatley informs us that she hopes to get home on leave this week.

A Cyprus correspondent writes:—Captain G. A. Williamson, of the Territorials, formerly for several years District Medical Officer, Larnaca, has been appointed military doctor in charge of the convalescent camp for wounded soldiers on Troodos. Captain Williamson has been for four years Professor of Medical Science at the Aberdeen University.

Mr. W. S. Hill, of the English Coaling Company, Port Said, is returning to that town, and leaves England on Saturday.

Our Larnaca (Cyprus) Correspondent writes (June 27):—Mr. T. F. Bowen Rees, of the well-known firm of T. Bowen Rees and Co., of Smyrna, shipowners and army contractors, is in the island on a visit.

A correspondent writes from Canada:—It may interest some of your readers to learn that both the sons of the Rev. W. E. Cockshott, formerly Chaplain to H.B.M. Embassy at Constantinople, and grandsons of the late Dr. John Patterson, an old resident of Cairo and Constantinople, are now serving with the Canadian Expeditionary Force. The younger, Private Basil P. Cockshott, is now at the Front; the elder, Private Maurice C. Cockshott, is in the 48th Battalion at Victoria, B.C., and expects shortly to proceed to the Front.

Last Saturday, at Holy Trinity, Sloane Street, the marriage took place of Mr. Oliver Francis Haynes Atkey, Sudan Medical Department, with Miss Dulcibella Clifford, daughter of the late Mr. P. H. Clifford and of Mrs. Clifford, of 2, Lurgan Mansions, Sloane Square.

A marriage has been arranged, and will shortly take place, between Mr. Maurice Bonham Carter and Miss Violet Asquith, elder daughter of the Prime Minister, who has recently returned from Egypt.

Mr. John Edelmann, of Cairo, is now in an officers' training corps in England.

Writing under date of June 15, our Sofia Correspondent reports:—Miss Helen Scot Hay, a well-known American lady, who, during the Balkan war, rendered great service to Bulgaria as a hospital nurse, arrived here yesterday from Chicago, and is staying at the Hotel Bulgaria as the guest, it is understood, of the Palace. Miss Hay, who is a personal friend of the Queen, visited the Palace yesterday and was received in audience by her Majesty.

The Exarch Joseph, who had been at the head of the Bulgarian Church for thirty-seven years, died at Sofia on Saturday afternoon. He resided at Constantinople, and enjoyed the title of Beatitude. He received an annual subvention from the Kingdom, and exercised jurisdiction over the Bulgarian hierarchy in all parts of the Ottoman Empire.

We regret to learn that Second Lieutenant Crewe Coles, of the 4th East Lancashire Regiment (T.F.), was killed on June 4 in the fighting at the Dardanelles. He was gazetted to the East Lancashire Fusiliers last February, and was the third son of Coles Pasha, C.M.G., late Inspector-General of Prisons, Egypt, and of Mrs. Coles, Stone House, Bishops Hull, Taunton. He was twenty-six years of age.

From Egypt we learn that Mr. McKinnon, who for some years resided at Alexandria, has been killed in action. He held a commission at the time in a Scotch regiment.

Lieutenant Harold Edward Gorst, 5th Battalion Yorkshire Regiment (Territorial Force), who, as reported last week, has been wounded with the Expeditionary Force in France, is the only surviving son of the Right Hon. Sir John Eldon Gorst, of Castle Combe, Wilts, his elder brother, Sir Eldon, who succeeded Lord Cromer in Egypt, having died about four years ago. Lieutenant Gorst was born in 1868, and, an author of repute himself, is the husband of Mrs. Harold Gorst, author of "The Thief on the Cross" and other well-known novels.

Captain Ralph Micklem, Royal Engineers, who has been wounded while on service with the Mediterranean Expeditionary Force, was formerly attached to the Egyptian Army. He was born in 1884, and, joining the Royal Engineers in 1902, was promoted to his present rank eighteen months ago.

BOARDING HOUSE,
51 & 53, EARL'S COURT SQUARE, S.W.
Facing Gardens. High-class Connection.
Home Comfort and Convenience.
Moderate Terms.
Highly recommended by Miss GEERE as suitable for Families from the East.

The partnership formerly existing between Messrs. Joseph Cohen, Jacques Eskenazi, and N. Babani having been dissolved, the Han Halil shop of JOSEPH COHEN is now in the same road, near the Arch Way, Cairo, entrance from the Mousky. Friends and customers are respectfully requested to visit the new shop when visiting the Bazaar, where they will find a rich assortment of carpets, embroideries, etc., etc.—Advt.

Honorary Captain and Quartermaster Arthur Harman, 1st Battalion King's Royal Rifle Corps, is reported killed in action. Born in July, 1865, he served in the ranks twenty-one years. He received his commission to the honorary rank of lieutenant in 1909, and during the war was gazetted to the honorary rank of captain. He took part in the Egyptian Expedition to the Sudan in 1884, and was at the battle of Tamai. He received the Sudan medal with clasp and the bronze star. In the South African War (1899-1902) he saw much service.

Captain Roland Henry Gallagher, who has died in hospital at Boulogne as the result of a motor accident, was a brother of Captain A. E. Gallagher, D.S.O., chief commandant of military police in Cyprus.

The *Egyptian Gazette* of June 26 reports that El Bimbashi Barlow, Inspector, Sinai, is in hospital recovering from wounds received at the Dardanelles.

We regret to announce the death, which occurred at Alexandria on June 24, of Dr. Thomas J. Finney, senior member of the American Mission at that town. Dr. Finney was born in Mansfield, Ohio, U.S.A., on September 12, 1852. He went to Egypt in 1882, immediately after the Arabi Rebellion. After one year in Cairo and fourteen years in Mansoura he removed to Alexandria, which, since 1897, had been his chief centre of work. In addition to his many labours in the church and community and in every variety of mission effort, he was the editor of the *Negm* and *Huda*, two Arabic weeklies published by the American Mission and widely read in the Egyptian Evangelical Church. By this means and by long tours upon the Nile he came into intimate touch with the people.

The death occurred last Friday at 96, Eaton Place, S.W., of Mr. Alfred Hambley Rowe, formerly of Cairo. The deceased gentleman was sixty-seven years of age.

The death has taken place at Khartoum, as a result of a fall from his horse at Wad Medani, of Mr. Turner, of the Sudan Plantations Syndicate, brother of Major Turner, R.E., a former Director of Posts and Telegraphs in the Sudan. Mr. Turner was attended by Dr. Christopherson, and an operation was performed, but without success.

A *matinée* is to be held at the Queen's Theatre this afternoon at 2.30, in aid of comforts for the British wounded in the Dardanelles, when the programme will include an English version of Pailleron's "Le Monde où l'on s'ennuie" and "A Midnight Meeting," by the Marchioness Townshend.

A musical and dramatic *matinée* in aid of St. John Ambulance Special Fund and the hospitals for wounded in the Dardanelles is being arranged by a committee of ladies, and will take place at the Royal Court Theatre, Sloane Square, on Tuesday, the 13th inst., at half-past two o'clock. Princess Christian is patronizing the entertainment, which is being supported by many well-known soldiers and sailors. Tickets may be had from the Assistant Honorary Secretary, St. John Ambulance and Red Cross Special Fund, 5, Belgrave Place, and Miss Collum, 35, Oakley Street, Chelsea, S.W.

A large party of wounded soldiers now located at the nursing homes in Folkestone held a picnic on Saturday at Earl Kitchener's residence, Broome Park, eight miles from Folkestone. The party were taken thither in a large motor-coach, and after arriving at the Park were delighted by a surprise visit from Lord Kitchener, who conversed with each of his visitors, asking where and how they were wounded and if any of them had been gassed. He told them to visit the Park as often as they liked and to enter the garden and help themselves to the flowers. The wounded men gave three hearty cheers for Lord Kitchener before leaving.

General Gouraud, Commander-in-Chief of the French Mediterranean Expeditionary Corps, has been wounded and invalided to France. He was struck by fragments of a shell that burst near an ambulance station to which he had gone to visit the wounded. General Bailloud has provisionally taken over the command.

The Paris correspondent of the *Morning Post*, in commenting on General Gouraud's return, writes: Great regret has been caused by the news that General Gouraud has been wounded in the Dardanelles and forced to return to France. Few French generals commanded more completely the confidence of their men, and the Colonial troops, who had followed him throughout the campaigns that earned him the proud position of the youngest general in the French Army, declared that under his leadership they would go anywhere. He was well known for his reckless daring. While commanding in France he was wounded in the arm, and the one fear of his soldiers was that the unlucky bullet might deprive them of their leader.

The Times Athens correspondent telegraphs (July 6): According to information received by the Press, General Liman von Sanders Pasha was wounded in one of the recent battles in the Dardanelles while visiting the Turkish trenches with other officers of the High German Command in order to encourage the Turkish soldiers.

Reuter's Athens correspondent telegraphs (July 5): Colonel von Leipzig, the German Military Attaché in Constantinople, has been found dead in his apartment. The official version of his death says that he committed suicide.

In connection with the above paragraph, it may be remembered that a telegram from Sofia on June 24, announcing the recall to Berlin of the German Minister in Bulgaria, stated that he was to be replaced provisionally by Colonel von Leipzig.

APPOINTMENTS, PROMOTIONS, etc.

It is understood that the post of Director-General of the General Accounts Department in the Egyptian Ministry of Finance, which will be vacated by August Adib Pasha in the autumn, will be split up into two parts, and that Mr. R. S. Patterson, Director of Accounts in the Ministry of Public Works, will be appointed to one of the new posts in question.

M. Rendis, Secretary in the Hellenic diplomatic service, is acting as Chargé d'Affaires at the Legation at Cettinje.

M. Saltaferos, Secretary in the Hellenic diplomatic service, has been appointed to the Enos consulate.

In a letter only received this week, though forwarded on June 15, our Sofia Correspondent writes: The unofficial Press announces this morning that Djavid Bey, a former Turkish Minister Plenipotentiary to Serbia, has been appointed Minister Plenipotentiary here. Fethl Bey, the present Ottoman representative here, has been recalled and will shortly leave for Constantinople. It is stated that he will be promoted to the dignity of Pasha, and that he will take part in the defence of the Dardanelles with a high rank.

Our Belgrade Correspondent writes (June 19):—Colonel Milivoje Nikolaievitch has been appointed Serbian Military Attaché in London.

Some time ago we announced that a new Egyptian Order had been created by the Sultan. A list of the first recipients of the Order has now been published, among whom we find the following names of Anglo-Egyptian officials:—

Grand Cordon. — Lord Edward Cecil, Financial Adviser; Sir Reginald Wingate Pasha, the Sirdar; Sir Ronald Graham, Adviser to the Ministry of the Interior; Sir Malcolm McIlwraith, Adviser to the Ministry of Justice; Dr. Douglas Dunlop, Adviser to the Ministry of Education.

Second Class.—Sir Murdoch Macdonald, Under-Secretary of State for the Ministry of Public Works; Hon. J. Lindsay, Under-Secretary of State for the Ministry of Finance; Mr. Hayes, Under-Secretary of State for the Ministry of Agriculture; Mr. Brunyate.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

BAWDEN.—On July 1, at Innesfree, Bulkeley, Ramleh, Alexandria, the wife of Niel R. Bawden, of a daughter.

DEATH.

HAUGHTON.—Killed in action on June 24, Alfred John, Second Lieutenant, 9th Durham Light Infantry, only son of D. Haughton, Sandbach, Cheshire, and husband of Lylie Haughton, Louvaine House, North Shields.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Alexandria.
WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.
Inclusive Terms from P.T. 50 (10s.) per day.
Special Terms to Government Officials, Commercial Travellers, and for long stays.
Proprietor and Manager—AUG. van MILLINGEN.

Alexandria.
CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 50 per day.
C. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

Bucharest, Roumania.
GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

PERSIA AND THE WAR.

Persia's interest in the war is far from being an academic one. Internal dissension and organic weakness have made of her an international Tom Tiddler's ground, and with the entry of Turkey into the European struggle, her territory has exercised a powerful attraction not only for some of her own exiles and the Turks among whom they have taken refuge, but also for Dr. Pugin and his fellow-agents from Germany. The peculiar position of the province of Azerbaijan may be held to have justified the Turks in regarding it as a Russian possession, and in seeking to turn the Caucasus army by an attack on its left flank. They were not, however, justified in devastating every part of the country through which they advanced, regardless of the fact that the population was Persian, and that no Russians were to be found there. It showed a still more cynical disregard of Persian rights to dispatch a force in the direction of Ahwaz in an attempt to injure certain British interests in that portion of the country. Both these incidents, however, will have proved instructive to the Persian Government. The conditions of the ill-defined protectorate established over Persia by the British and Russian Governments could never be wholly agreeable to the Persians, and they must have occasionally wondered whether protection from a different quarter might not prove more to their liking. Their experiences in this war will, we may trust, have undeceived them on this point. The place of Great Britain and Russia could only be taken by Germany and Turkey, and both these countries have given an earnest of what their attitude towards Persia would be, if she were ever to find herself at their mercy. As far as the Turks are concerned, not even the religious ties which might be supposed to bind them to Persia have prevented them from letting loose Kurdish hordes on defenceless Persian subjects. The Germans, too, have shown conclusively that they would stop at no measures of deception to induce Persians to sacrifice themselves to German interests. There may be some difficulty in discovering much altruism in the past attitude of the Russian and British Governments towards Persia; but Germany, who might so easily have posed as the affirmation of all that the Persians lacked before in their international relations, could not sufficiently disguise her own intentions in order to profit by her enemies' mistakes. Her agents do not hesitate to bring the religion of the country into contempt, and seek to exploit to their own advantage the lawlessness which has been Persia's undoing in the past.

It should not be difficult in these circumstances for the Persian Government to convince the protecting Powers that it has no interest in taking or countenancing any action likely to prejudice its neutrality. The war, indeed, it is to be hoped, will ultimately prove an unmixed blessing to Persia. Her territory was violated by the Turks and Germans, and the line of their advance was sufficiently scored by excesses to rouse the lasting enmity of the people. With the establishment of British control over Mesopotamia the menace to which the lawlessness of the tribesmen has always exposed Persian territory will be removed, and an end will be put to the encouragement that the Turks have given to domestic strife in Persia. At the same time we may expect that a readjustment of the understanding between Great Britain and Russia will make for a more settled state of affairs in the country. One of the chief troubles of the Persians hitherto has been the uncertainty that has gripped them in every sphere of life. The absence of a common purpose in Persia has stultified whatever good intentions the British and Russian Governments may have had, while the unfulfilment of Russia's aspirations in other directions led her to adopt a policy which neither her own need nor Persia's interests required. The Persian Government was forced to look to the protecting Powers at every turn, but at best it was only offered half-measures. Financially it was forced to live from hand to mouth; the restoration of order was carried out slowly and only partially; the frequent changes in the Ministry betrayed the chronic difficulties with which the country was beset. It will not be possible to remove all the anomalies from which Persia suffers, while the war in Europe continues; but now that Persian territory has been cleared of the common enemy it should be possible to take some steps to lighten the load of the Persian Government. Already an earnest of better things to come is foreshadowed from Teheran. It is announced that there has been an exchange of views on various matters, including agrarian problems and land taxes, between the Russian and Persian Governments. Of the former's reply it is noted with considerable satisfaction that it is couched in such friendly terms as to invest it with special significance in the history of Russo-Persian relations. Russia is at pains to emphasize her desire for an amicable adjustment of the interests of the two countries, and, it is added, the establishment on general lines of an *entente* profitable to both parties thus becomes possible.

The Persians and their Government, however, cannot divest themselves of all responsibility for the future course which the development of the country is likely to assume. Their troubles are mainly of their own creation, for the most potent source of evil has been the venality and incompetence of the official class. From the Persian Notes, which appear elsewhere in this issue, some idea can be formed of the way in which this unsatisfactory feature in Persian public life reacts on the well-being of the country. Our correspondent voices popular opinion in inveighing against two of the most prominent personalities in Persia to-day. But if the Russian and the British Government had to explain why they had made use of the services of Shuja-ed-Dowleh and Saad-ed-Dowleh they would probably maintain that in the circumstances maladministration was preferable to administrative chaos. Not the least of the protecting Powers' difficulties is the lack of suitable men who can be relied upon to build up under friendly advice strong and honest government in Persia. We do not need to inquire whether the alleged "contemplated *coup d'état*" had any real foundation or not; for the important factor is that, rightly or wrongly, the Persians have satisfied themselves that they cannot look to Great Britain to take any action independent of Russia. It would be idle to disguise the fact that the Russians have made themselves suspect in Persia or to deny that the Persians have some justification for their attitude. Nothing, however, in Great Britain's conduct towards Persia ought to have brought her under the same ban; but by adopting an entirely negative policy, and refusing to treat with the Persian Government independently of Russia, Great Britain has come to be regarded as merely Russia's echo. If Persia is to be saved in spite of herself, she must have confidence in the intentions of the protecting Powers. It is impossible that she should gain this confidence unless she has reason to believe the British Government capable of taking up a line of action independent of Russia, and at times of opposing, if necessary, her will to that of Russia's. Fortunately, there is no reason to suppose that occasion will arise in the future for differences of opinion between the two Powers. But for the success of what it is hoped will be a new order of things in Persia it is essential that Great Britain should take the direction of it until the misunderstandings caused by the action of Russian officials, often in antagonism to their Government's policy, have had time to be eliminated. Persia, however, must not forget her part; for failure to devise a *modus vivendi* with the protecting Powers can only result in the development of the country being carried out under a more direct system of foreign control.

THE KHEDIVIAL WAKFS SCANDALS.—II.

(By Our Cairo Correspondent.)

Amongst the various entries by means of which the settlement of Khairy Pasha's advances of £E20,650 was effected there appeared an item which merits some special reference. This item was purported to have been paid to a certain Hussein Fahmy, a lawyer at Assiut, who, it appears, had defended the interests of the "Aukaf" since its creation—i.e., for ten years—without receiving any remuneration. Not unnaturally he at length claimed payment of his fees, which he modestly assessed at £E1,024. Khairy Pasha states that the ex-Khedive sent for him and told him to pass that sum as having been paid to the lawyer and to credit his advances with it, it being his intention to accord the lawyer a "moral reward." Fahmy, who doubtless knew by experience the value of these "moral rewards," held out for a material reward as well. After lengthy negotiations Khairy succeeded in getting his Highness to agree to pay Fahmy £E300. At the inquiry Khairy Pasha naïvely stated that when Abbas Hilmi Pasha said he was going to accord Fahmy a "moral reward" he at once understood that he intended to confer on him the "Mutamaiz" (first-class Beyship). Basing himself on this, the reader might spend an interesting quarter of an hour drawing up a scale of the values of the various other decorations and grades which the ex-Khedive bestowed so promiscuously on those who were willing to pay for them or had served him in some private capacity.

It has already been mentioned that the Daira Khassa treated the "Aukaf" as a bank. It proved more accommodating than most banks, seeing that it charged no commission or interest on the transactions carried out by it. Since both were so completely under the control of the ex-Khedive, this relationship was not difficult to maintain. About £E50,000 was paid as advances to the Daira Khassa between 1904 and 1910. All the sums were eventually repaid in full, though in many instances the loans were outstanding for some long time.

The most important transaction was, however, the sale to the "Aukaf" of the Ragdia and Sabarbay estates of Abbas Hilmi Pasha, about 1,900 feddans in area. His Highness had for some time been contemplating this deal, and he ordered the "Aukaf" to keep uninvested a sum of £E107,000, which it happened to have at its disposal from exchanges of land that had been effected for account of certain Wakfs. The sale price of the two estates was, however, £E315,000, so, to make up the difference, his Highness ordered the "Aukaf" to sell certain lands, which, although they were held in connection with the Wakfs, were not inalienable. The £E107,000 cash and the proceeds from the land were paid over to the Daira Khassa before the deed of sale of the two estates was signed, or even before the consent of the Cadi to the acquisition by the "Aukaf" was obtained. Eventually the authority of the Cadi was secured, and, of course, it was based on reports made by notables of the districts in question. But from the figures there is little doubt that the interests of the "Aukaf" were not for one moment considered, for the non-wakfs property disposed of gave a much better return, and the surplus money in the hands of the administration could have been more profitably invested by the purchase of that property instead of being used for the acquisition of two estates which were far below the value set upon them.

It appears that, apart from the operations which the higher officials of the administration effected, advances were made, on the instructions of Abbas Hilmi Pasha, to Yusef Pasha Saddek, in the days of the boom a stockbroker in Cairo, recently Kapou Kakhadai (Khedive's agent) at Stamboul, and his master's boon companion. These advances amounted to £E9,000 between 1904 and 1908. Of this amount Saddek Pasha, whose name figures frequently in the inquiry, and who must not be confounded with Ahmed Bey Saddek, the sub-director of the "Aukaf," still owes £E3,500. Of the balance only £E2,500 was repaid in cash; the remaining £E3,500 was deducted as commission on the sale of certain Wakfs' property and as remuneration for services rendered in Constantinople in the interests of the Wakfs. No one knows, however, what these services or sales of land were.

In connection with the Daira Khassa, it is interesting to note that Saddek Bey, on entering the "Aukaf," had no means whatsoever beyond his pay. In course of time he opened accounts with various banks, amongst them the Banco di Roma, where in eighteen months he accumulated over £E20,000. When the moratorium was declared the Banco di Roma, to which the Daira Khassa owed a large sum, proposed to set off Saddek Bey's balance against it. But Saddek Bey did not relish becoming a creditor of the ex-Khedive, and demurred. The matter was, however, referred to the latter, who ordered Saddek Bey to clear off the Daira Khassa's debt, and it appears that he personally paid off a substantial amount!

On Khairy Pasha resigning in 1913, Shafik Pasha succeeded him. He proved himself an adept emulator of his predecessor in office. Saddek Bey was the evil genius in this as in the Seif-ed-Dine affair. Much that might be interesting, however, remains hidden, for the time being, at any rate, as Shafik Pasha is in Constantinople, and is unlikely to return. Certain details have been obtained from Saddek Bey, who on the outbreak of the war was arrested as a political suspect, and was retained in custody for some time. He was recently released for no evident reason, and he has now followed the example of his chief and taken refuge abroad—it is believed in Italy or Switzerland. In the light of the revelations subsequently made this leniency on the part of the authorities is much to be regretted, as it will greatly hinder the completion of the inquiry that should be made into the entire administration. So far it has been found that during his eighteen months of office Shafik Pasha drew £E2,925, for which he undertook to produce vouchers, and also £E1,500 from the interest on the funds. The major portion of the information that has been obtained concerns the Charity account, an examination of which reveals a most scandalous state of affairs. It should be explained that certain amounts are annually earmarked out of the various Wakfs funds for expenditure on particular charitable objects indicated by the Wakfias, or on charity in a general way. What has been discovered shows that Abbas Hilmi Pasha, through his favourites, disgracefully abused what were quasi-religious trusts, and used the name of charity as a cloak for his extravagance and political intrigues, etc. The amount misspent since the creation of the "Aukaf" must run into many thousands, if some of the items traced between January, 1911, and May, 1913, are any criterion. The Kavalla Wakfs in particular revealed many disgraceful abuses.

During 1911 and 1912 Khairy Pasha is known to have withdrawn £E8,000 for charity, but only £E1,600 can be traced as having been expended thereon. Particular interest, however, attaches to an item of £E5,000, which was drawn between January 5 and May 5, 1913. Of this £E2,000 was handed personally to Abbas Hilmi Pasha by Shafik Pasha and Saddek Bey; £E1,000 was given to his moawen for transmission to his Highness; £E800 was sent to M. Haccius, who was the director of the school where the ex-Khedive had studied in Geneva, and who has acted as agent of his Highness on many occasions of recent years; and the balance went in entertaining his Highness's guests and into the pockets of disreputable scoundrels and politicians, who took advantage of his petty foibles and battened on the proceeds of his financial expedients.

Many facts hitherto unexplained have been revealed. Thus, periodically, Abbas Hilmi Pasha invited Moslem and Turkish personages and notables to reside in Cairo at his expense. Knowing their Sovereign's parsimonious temperament, people were wont to be surprised, and to speculate as to what was at the back of this sudden access of generosity. But they could have quickly satisfied their curiosity by examining the "Charity" account at the "Aukaf." Probably the Young Turks who periodically came over to Cairo would not be much perturbed to hear that they have been indebted to charity for their visit to Cairo, but one can picture the frame of mind of the Cherif of Mecca when he learns that the cost of his son's stay in Cairo was not borne, as he thought, by the pious Hajji, Abbas Hilmi Pasha, Khedive of Egypt, but that it figures in the books of the "Aukaf" as having been expended on "the deserving poor"!

His Highness, also, was not above accepting charity for his own private expenses. Were technical work required at Kavalla, did he want plans drawn up in connection with his Doloman estate, did he require horses, did his daughter in Constantinople stand in need of nurses for her children, all went down as gifts to the poor at Ramadan or to deserving refugees; and it might be mentioned that amongst the items appeared a payment of nearly £E400 for the expenses at the Imperial Hotel at Vienna of a lady whose identity Saddek Bey declined to reveal, but who, there is every reason to believe, was the Princess Djawidan, the name taken by the famous Countess Torok after she embraced Islam and married Abbas Hilmi Pasha four years ago. There is also another item of £E250, which came under the same heading, and which was expended on the cost of repairing motor-cars that had been sent to the ex-Khedive's estate at Doloman. This would not, on the face of it, appear to have much connection with charity, but the reconciliation between these two contradictory facts was made in an ingenious manner. The cars were destined, it was explained, to enable the Kavalla refugees to learn how to drive, and so be able to earn a living on the estate! In Saddek Bey's mind this sufficiently justified the debiting up of the cost to charity.

Perhaps the most shameless affair was that concerning what it known as the Hani Om Khalil Wakf. This Wakf consisted of 22 feddans, which an old Egyptian woman had constituted years ago on the condition that three-fourths of the revenue should go to her family, and that the remaining fourth should be expended in charity and in the reading of the Koran over her grave. For years her instructions had been faithfully carried out. Suddenly, in 1911, Khairy Pasha bethought himself of this Wakf, and ordered the payments in charity and to Koran readers to be stopped and the sums in question to be paid in in reduction of his own advances. Whilst the fact that the whole amount involved only totalled £E41 speaks for the petty minds of these individuals, this incident itself is illustrative of the callous manner in which those responsible observed their trust.

TANGIER TO TEHERAN.

Some days ago I was waiting to see the Editor. No one ever sees an editor without waiting, and when it is over one frequently wishes it wasn't—this, however, is by the way. While I was waiting I glanced casually through some foreign papers on the table before me, and in doing so came upon a list of names, subscribers to the Prince of Wales's Relief Fund. One grows so accustomed to these things nowadays that I was passing it by when my eye caught a familiar name, and I stopped to investigate. And what I saw made me proud to have known the Sudan, prouder still that I can boast acquaintance with the owners of some of the names which figured in that list. For, generous as has been the response from all quarters to his Royal Highness's appeal, the Sudan officials deserve a place in the very front rank. They are not rich, many of these Englishmen who in these scorching days of the Sudan summer are doing their duty by the Empire no less than our soldiers upon the field of battle, yet over and over again I came upon the bracketed note that told of regularly received monthly subscriptions against the sum of pounds that I know must have come out of a poor man's salary.

***

While yet I was exulting over the wonderful story of deathless heroism that came to us from Sir Ian Hamilton yesterday, a friend came in, and leaving, left a paper that robbed me of half my joy. It was a copy of the *Devon and Exeter Gazette*, not a new one; but having known that journal in bygone days I turned its pages and found the paragraph that swept my mind from one quarter of the Near East to another:—

"The people of England seem to have forgotten us," is the pathetic cry of a soldier serving with the British Expedition at the head of the Persian Gulf; "we have not had as much as a box of matches from England."

The pathos of that appeal is not to be denied. Steadfastly, gloriously, our soldiers in the far-off Gulf region have fought, driving the enemy before them, through swamp and river or across arid wastes. Yet, if the quotation I have used is to be relied upon, and I have no reason to doubt it, those men have been forgotten in the din of nearer alarms, or at least they have received the impression of loneliness which is every whit as bad. The value of a gift is not in its intrinsic worth. That is a platitude with which we are all familiar, so let us remedy the evil of this impression in the minds of our comrades, before it eat into the soul and destroy the charms of victory. Equally with the men in Flemish trenches, equally with the men who figure in Sir Ian Hamilton's report, these men have done their duty: their burthen no less light, their hardships no less real. I hope that each person who reads this paragraph will remember. For that is our least duty.

***

My story of the Fair Lady of Boulak, the Robbers, and the Police has reminded a correspondent of two good tales of a somewhat similar character that Baron de Kusel tells in his entertaining book, "An Englishman's Recollections of Egypt." Both concern the activities of smugglers, and, curiously enough, the detection of the attempted fraud was due in both cases to a horse. In one instance the smugglers employed a closed carriage, drawn by a pair of splendid horses, with an outrider in front, and "doors and windows hermetically closed, as is usual when ladies are inside"; and this so impressed the Octroi guard that not only did they not seek to examine the carriage, but, supposing it belonged to some Great One, they regularly saluted it. Then one day, alas and alack! just as the equipage was passing the obsequious guard, the horses slipped and came to the ground. The officer dashed forward to assist the ladies to alight, and, opening the carriage door, found—many packages of opium and tobacco. The result was a rich haul for the Octroi, which seized not only the opium and tobacco, but also the carriage and horses; while the coachman and outrider were, of course, imprisoned.

***

In the second instance an Arab "funeral" was passing through the town gates (at Alexandria) when a pair of bolting horses scared the bearers so badly that they dropped the coffin and bolted. "There was," writes Baron de Kusel, "a smash—and when they went to look for the corpse they found instead a fine load of the same contraband articles, opium and tobacco." And he adds, rather sadly, one suspects: "Funerals of this kind had been passing through the gates for months."

***

Young as it is in comparison with the rest of Egypt, the Suez Canal has seen some stirring times during recent years. Only a very short time ago her waters were ploughed by a ship which bore the crowned King of England to the great Durbar. The banks of the Canal were guarded, then, as now, with soldiers, but there were no adjacent trenches, no materials of war: the great ship passing along was an impressive emblem of triumphant peace. On that occasion a British officer distinguished himself by accompanying, on horseback, the Royal ship from end to end of the Canal. This was no easy matter, as the land makes particularly bad going at places, but he stuck to it, and he was rewarded by his Majesty's notice and appreciation.

***

A Bulgarian correspondent sends me a story of self-sacrifice on the part of a Bulgarian peasant woman, which seems to me to afford a fine example of the true patriotic spirit. He writes:—"During the Macedonian insurrection of 1903 a poor Bulgarian woman, a native of the town of Struga, living in Roumania, having nothing else to sacrifice for the good of her fatherland, offered her necklace, consisting of nine large Austrian gold coins, worth about £2 each, and two loose coins worth about £1 each. This was, in fact, her 'last reserve.' The Ochrida Charitable Society was much touched by this proof of a rare charitable spirit on the part of a poor woman who did not even wish her name to be published. In fact, it could not at the time bring itself to part with such a precious offering, and so kept it until now, as a cherished souvenir. Lately it decided, the poor woman being dead, to present her offering to the National Ethnographical Museum, for exhibition as a memorial to the donor and an example to the nation. But in order to increase the value of the offering, the Society has decided that the necklace shall be offered as the prize of a lottery of 2,000 fr., which sum shall be employed in some way to perpetuate the memory of the original donor, while the prize itself shall be left in the museum, the committee of which has gratefully accepted the offer." If I understand my correspondent aright, the committee appears to have conducted a smart bit of work on lines that are not altogether unfamiliar at charity bazaars in this country. In any case "the widow's mite" seems to have borne good interest at last.

CORSAIR.

CENTRAL ASIAN SOCIETY.

The anniversary meeting of the Central Asian Society was held at the society's rooms in Albemarle Street on Wednesday last, Colonel Sir Francis Younghusband presiding.

In opening the proceedings, the Chairman said that among those the society had lost by death was Dr. Cotterell Tupp, one of its founders. They would all like to express their condolence with Mrs. Tupp in her loss, and he would like to say how very much the society was indebted to Dr. Cotterell Tupp for the very great energy he had shown on its behalf at its inception and since.

The Secretary (Miss Hughes) read the report of the Council for 1914-15. This stated, *inter alia*, that the membership of the society was about the same as a year ago, and that there had been no diminution of interest in the papers read before it. These had dealt mainly with the influence, direct or indirect, of the war on different countries in the East.

Sir Thomas Hildich moved the adoption of the report. He said that in Central Asia the one thing that Englishmen thought most about was the spread of Russian influence through the regions that lie to the southward of her present borderland. He hoped that one result of the present war would be that the British public generally, and politicians in particular, would acquire new views as to the policy and aspirations of Russia in Central Asia. He personally had never thought that the spread of Russian influence in those regions could be a menace to England, or could be anything but a benefit to the inhabitants of the countries immediately concerned.

The report was adopted, the formal business of the meeting transacted, and a vote of thanks to the chairman terminated the proceedings.

THE PRESS ON THE NEAR EAST.

The Dardanelles Despatch.

Sir Ian Hamilton's dispatch from the Dardanelles, containing, as it does, the record of achievements of most remarkable and sustained valour, the following quotations from the London Press concerning it will be of interest:—

The Times (July 7) says:—

Troops which have shown such astonishing valour in effecting a lodgment on the Peninsula are not to be denied. It may take them long, it may require infinite patience, but we are convinced that the lofty and unflinching courage which inspired our men on the narrow fire-swept beaches will carry them to their goal, no matter how heavy the odds against them.

The *Morning Post* (July 7) pays the following tribute:—

Words fail us to express the admiration we feel for such deeds as these. The men in the field at least have added to the imperishable traditions of the British Army the lustre of achievements worthy of their forefathers. . . . It is well for the people of this country and the people of the Empire that the British soldier and the British sailor are what they are. And it is very ill for the enemy. Germany, it seems, wanted war, and she has got it.

The *Daily Chronicle* considers the dispatch in conjunction with the fuller official reports recently received, and says:—

On the whole these reports afford ground for encouragement, and the despatch enables one better to appreciate it. The enterprise is an extremely difficult one; but it is not a wildcat enterprise, and by the exercise of patience, skill, and heroism, those engaged in it may reasonably look forward to final success. Sir Ian Hamilton's account places the factor of heroism beyond all doubt; the work so far achieved is some of the bravest ever done.

The *Daily Graphic* also refers to these reports:—

Now that the country has learnt how much was accomplished . . . we need have no anxiety about the completion of the work. Within the last two days news of good progress has arrived, which clearly indicates that we are mastering our difficulties.

The *Daily News* concludes its leading article with the following paragraph:—

The blood of our brave sons has watered that desolate land, but out of their sacrifice, we are satisfied, will come the first clear assurance that the struggle for the liberties of Europe will not be in vain.

The Irresolute Neutrals.

Dr. E. J. Dillon is the author of a lengthy article under the above heading in the *Contemporary Review* (July). The first part of his work is devoted to a study of the psychology of the Balkan States, in which he intimates that "the mental moral mechanism" of Balkan nations being "worked by a set of levers that differ widely from those of the more developed peoples of Europe," it is impossible to place any reliance upon the movement of the Balkan nations mainly because they are moved by aims or are menaced by dangers similar to those which forced the Italian people to declare war. In regard to Bulgaria he considers the diplomacy of the Entente Powers to have been at fault, although he places the responsibility of her continued neutrality upon the shoulders of her King. Roumania, he thinks, runs the risk of losing her grand opportunity altogether by a continued policy of delay:

The line of reasoning pursued by Italian publicists during the recent negotiations is equally applicable to Roumania. Suppose, they said, that in this struggle the Allies are reduced to impotence by land and sea, and their enemies are triumphant; suppose, further, that Italy is recompensed for her neutrality or her belligerency by . . . rewards so bountifully bestowed upon her in advance by the Kaiser's agents, her frontiers would then be extended on the map, but her liberty of action in foreign affairs would be paralyzed by the Austro-German *bloc*. And whither would she turn for allies in case she had a difference with the supreme rulers of the world?

It is clear that her condition would be no better than that of a vassal. And it is equally clear that if this war should end with the defeat of the Allies and the victory of the Teutonic *bloc* all the neutral States of Europe would become the vassals of the victors to the same extent and with the same consequences as if they themselves had withstood the Germans in the field and been worsted.

Dr. Dillon thinks that although the Dardanelles Expedition and the belligerency of Italy have not yet produced their full effect in Bulgaria, they will eventually lead her to the side of the Allies in the field, in which case the Roumanian interventionalists would force their Government to follow her example.

The Balkans and "Frightfulness."

In an article entitled "The Balkan Watchers," a recent number of the *Globe* dealt in a straightforward manner with the question of the neutrality of these States. The writer, after reviewing the territorial ambitions of the various neutrals, together with the influence that blood relationship with the Hohenzollerns has upon the reigning houses in Greece and Roumania, says:—

The true causes which restrain the Balkan States are exhaustion and fear. Roumania alone has escaped the effects of a desolating war. . . . The sentiment which is common to them all, and which has had by far the greatest influence in keeping them back, is fear. . . . They knew the thoroughness of the German preparedness, and they dreaded the fate with which their countries would inevitably be visited if Germany did what all the German strategists were convinced she would accomplish. "Frightfulness" in Belgium was intended quite as much as a hint to the Balkan States as to terrorise the Belgian people, and it was not without its effect. But of late military opinion in these States has undergone a marked change. Their experts no longer believe in a German triumph, and have come to a better understanding than they had before of the illimitable reserve forces of the British and Russian Empires.

The Near East and the War.

"Outis," writing in the *Fortnightly Review* (July), proceeds from an examination of the rival claims to success that may be put forward by either group of belligerents as the result of fighting up to date to a study of the existing conditions in the Near East, which he characterises as being of "extraordinary complexity and of the very deepest interest." He thinks that Greece will ultimately accept the policy of M. Venizelos, and intervene in the struggle, while of Bulgaria and Roumania he writes:—

If Roumania could "redeem" her kinsmen in Transylvania, and if Bulgaria could be sure that she should be allowed control over certain portions of Macedonia, both might consider the advisability of joining the Entente Powers. Roumania is, of course, in intimate relations with Italy, and the entrance of Rome into the quarrel has without doubt exercised a considerable influence in Bucharest. But if both Roumania and Bulgaria could get what they want, and yet remain neutral, it might serve their interests still better. At all events, by insisting on their neutrality they can press their demands on Russia, France, and Great Britain from a position of great advantage.

He arrives at the conclusion that we cannot be sure whether we are to receive assistance from the Balkan States, and that it is best to proceed on the assumption that it may possibly be denied us. In the opinion of this writer, the attack upon the Dardanelles was an act of war necessary to the success of the whole campaign of the Allied countries.

Articles to Note.

"A Journey from Bassorah to Baghdad," by J. Niven, in *Chambers' Journal* (July).

"Some Serbian Impressions," by John W. N. Sullivan, in the *New Witness* (July 1).

"Brighter Days in Serbia," by Captain E. N. Bennett, in the *Westminster Gazette* (July 2).

"A Dying Empire. The Real Conditions in Turkey," by Carlo Scarfoglio, from *La Stampa* (Turin), in *Foreign Opinion* (June 30).

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS. July 1.

Dardanelles Casualties.

Mr. JOYNSON-HICKS asked the Prime Minister if he would state what was the total number of casualties divided into killed, wounded, and missing in the Dardanelles campaign.

Mr. ASQUITH: The casualties sustained by the naval and military forces in the Dardanelles up to May 31 are as follows:—

OFFICERS.	
Killed	496
Wounded	1,134
Missing	92
Total	1,722
MEN.	
Killed	6,927
Wounded	23,542
Missing	6,445
Total	36,914

The total casualties sustained are 38,636.

Mr. JOYNSON-HICKS asked whether the right hon. gentleman was now prepared to make a statement as to the reasons for starting the campaign in the Dardanelles in the way it was started and as to the progress of such campaign.

Mr. ASQUITH: I cannot in the public interests at present make a statement.

Persian Gulf Medals. July 5.

Sir CLEMENT KINLOCH-COOKE asked the First Lord of the Admiralty whether he could make some definite announcement as to the date when the long-promised Persian Gulf medal, earned in 1912, would be awarded?

Dr. MACNAMARA: It is hoped to begin the distribution of the medals very shortly.

Colonel YATE: Will it be extended to the members of the Royal Indian Marine Service?

Dr. MACNAMARA: I must ask for notice of that.

A Dardanelles Rumour.

Mr. G. G. GREENWOOD asked the Under-Secretary for War whether he could give the House any information regarding the reports which had appeared in the Press of a British reverse at the Dardanelles.

Mr. TENNANT: No report has reached the War Office, and therefore I think the House may hope that the information is wholly incorrect.

Dardanelles Wounded. July 7.

Mr. TENNANT, in reply to Mr. JOYNSON-HICKS, said the first arrival at Alexandria of men wounded at the Dardanelles took place on the morning of April 29. He could not give the numbers that arrived during the first fortnight, but he could assure the House that the arrangements made for the reception of the wounded at Alexandria had been adequate in all respects.

Mr. JOYNSON-HICKS asked whether the right hon. gentleman made that statement on his own responsibility.

Mr. TENNANT: I make that statement on my responsibility.

Mr. PRINGLE: Can the right hon. gentleman say the same thing regarding the arrangements for the transport of the wounded to Alexandria?

Mr. TENNANT: No, sir, I cannot, and I have stated so in the House.

Mr. TENNANT informed Mr. JOYNSON-HICKS, in reply to a further question, that seven army and three naval hospital ships were now employed between the Dardanelles, Alexandria, and the United Kingdom The first voyages of four of these were in January and February, of four more in April and May, and of the remainder in June. There were also three ships employed on what was called the ferry service. This has been in operation since May.

Hospital Accommodation at Alexandria. July 8.

Sir Arthur Markham asked the Under-Secretary for War whether the Secretary for War refused to give his consent to private persons sending out to Egypt private hospitals at their own expense; and whether, as a consequence, when the wounded from the Dardanelles arrived at Alexandria they were sent to the German Hospital to be nursed by German nurses?

Mr. Tennant: The private hospitals were not and are not required in Egypt. As I stated yesterday, the arrangements for the reception of wounded in Alexandria were adequate in all respects. The General Officer Commanding in Egypt exercised a wise judgment in making use of German hospitals. In fact, it would have been criticised adversely if he had failed to make use of all suitable accommodation which was at his disposal.

THE MONTENEGRINS AT SCUTARI.

Sir J. Roper Parkington, Consul-General for Montenegro, has received the following official telegram from Cettinje:—

Montenegro, for the purpose of assuring the freedom of navigation on the River Boyana and to put an end to frontier raids, was at last compelled to occupy certain strategic positions in Albania. This movement was carried out with tact and discretion, so that the Albanian populace in the districts under our control at once recognised the beneficial effects. The inhabitants of Scutari, weary and disheartened by the state of anarchy which reigned in the town, naturally desired to put an end to an intolerable position into which they had been led by Austrian intrigues; the leading citizens begged the commander of the Montenegrin troops, stationed to the north of Scutari, to enter the town and endeavour to establish law and order. This petition was presented personally by the Mayor and President of the Administrative Council, and also by a deputation of Catholics. The Montenegrin General was satisfied that the request was made without any distinction of religion, and the Montenegrin troops accordingly marched into the town, where they were cordially welcomed by the entire population. Indeed, the reception was most enthusiastic, and the latest report states that complete order and tranquillity is once more restored to Scutari.

ROLL OF HONOUR.

British Subjects from Turkey in H.M.'s Forces.

ASHE, Lance-Corp. R., R.E.
ATKINSON, Bombardier G. M., 266th Battery, 85th Brigade, R.F.A. Colchester.
ATKINSON, Gunner T., "A" Co. Royal Field Artillery.
BAKER, Lieut. A. Warden, 7th Royal Scots Fusiliers.
BARRON, Sergeant J. B., First Canadian Contingent (formerly of the St. George's Boys' School, Jerusalem).
BINNS, Rifleman Edward, 8th Service Batt. Rifle Brigade.
BINNS, Bombardier Harold H. (49,567), Battery Office, 34th Reserve Battery, R.F.A., 6b Reserve Brigade, Piershill Barracks, Edinburgh.
BINNS, Lieut. C. E., R.M. (Interpreter to Mediterranean Forces).
BOLTON, Alfred, Naval Brigade.
BOND, Private H. C., 7th (Reserve) City of London Regt.
BOND, Gladwyn J. T., Inns of Court O.T.C.
BOND, Trooper S. (1779), Royal Horse Guards.
BOND, Corporal R., Royal Field Artillery, Durlston House, Park Road, Swanage.
BORRELL, Rifleman Alfred, 8th Service Batt. Rifle Brigade.
BOWMAN, Private Henry J., R.A.M.C., Duke of York's Barracks, Chelsea.
BROOKS, Corporal G., Royal Field Artillery, Swanage.
CASTELL, Rifleman Henry, 8th Service Batt. Rifle Brigade.
CAUCHI, Act. Corporal Henry (6113), 19th Service Battalion, C Company, Royal Fusiliers, Epsom, Surrey.
CLIFTON, Capt. Ernest H., Durham Light Infantry.
COLES, Dr. D. A., R.A.M.C. (formerly of the English Hospital, Haifa).
COLLEY, Trooper Isaac E., Royal Horse Guards.
CRAWFORD, Private James, 7th (Reserve) City of London Regiment.
CUMBERBATCH, Lieut. A. Noël, 9th East Yorkshire Regiment, Fulford Barracks, York.
CUMBERBATCH, 2nd Lieut. H. D., 9th Batt. the Buffs.
CUMBERBATCH, Lieut. and Adjutant R. C., 15th Batt. Rifle Brigade.
CUMING, Bombardier A. C., 262nd Battery R.F.A., 84th Brigade, Colchester.
DAVIDSON, Bombardier C. T., 266th Battery, 85th Brigade, R.F.A., Colchester.
ELLIOTT, Eric C., 2nd Lieut., Essex Regiment, 11th Batt.
EPPSTEIN, Lieut. W. R., Durham Light Infantry.
FAULKNER, Lieut. M., Admiralty House, Malta
FROMANT, Private F., Grenadier Guards.
GALLIA, Rifleman M., 7th (S) Batt. Rifle Brigade.
GOODACRE, Miss C., Red Cross, Shoreham.
GOUT, Lieut. Charles L. 4th (R) King's Own Yorkshire L.I., Drill Hall, Bank Street, Wakefield.
GOUT, Rifleman Evelyn, 8th Service Batt. Rifle Brigade.
GOUT, Rifleman Richard, 8th Service Batt. Rifle Brigade.
HADKINSON, Rifleman Vivian, 8th Service Batt. Rifle Brigade.
HIGGS, Private J., 6th Dragoon Guards.
HOLTON, Corporal Alfred, Royal Naval Division, Divisional Engineers.
HOLTON, Trooper John, B. Squadron, Essex Yeomanry.
HOYLAND, 2nd Lieut., H.A.D. (Interpreter to the Mediterranean Forces).
IRELAND, Private D. J. (3346), 15th County of London Regiment.
JACKSON, Rifleman Edward, 8th Service Batt. Rifle Brigade.
KERR, Miss E., Army Nursing Corps, France.
KEYSER. Lieut. A.G., 8th Batt. King's Own Yorkshire Light Infantry.
KEYSER, 2nd Lieut. R. N., 10th Batt. East Lancashire Regiment.
KEYSER, 2nd Lieut. Henry, 2/10th Batt. Middlesex Regiment.
KEYSER, 2nd Lieut. J. C., 2/9th Batt. (D.C.O.) Middlesex Regiment.
LA FONTAINE, Rifleman Fred., 8th Service Batt. Rifle Brigade.
LA FONTAINE, Lance-Corporal Hugh, 7th (Res.) City of London Regiment.
LA FONTAINE, Sub-Lieut. J. S., Royal Naval Division, Crystal Palace, S.E.
LANDER, 2nd Lieut. Arthur.
LORIMER, Private D., Army Service Corps, Aldershot.
MACKINNON, Private Eric, 9th Royal Scots Highlanders.
MACKINNON, Dr. J. M., Captain E.A.M.S., British East Africa.
MACKINNON, Patrick, Sapper, Divisional Engineers, 1st Canadian Contingent.
MACKRAY, E. D., Dardanelles Expeditionary Force.
MICHEU, Bombardier C. G., Royal Field Artillery.
MOORE, Miss K. M., Royal Red Cross, Serbia.
MORRISON, J., O.T.C., Inns of Court.
MORTON, Private Stanley, 2nd Sportsman's Battalion.
MOSS, 2nd Lieut., Public Schools Battalion.
MUMFORD, Pat, Army Service Corps, Richmond Park, Surrey.
MUMFORD, Driver P. F., A.S.C., Osterly Park.
MUNRO, 2nd Lieut. J. G., 4th Scottish Rifles, Fort Matilda, Greenock.
NOWILL, Private Sidney, 7th (Res.) City of London Regiment.
PARKER, Trooper G., Royal Horse Guards.
PATERSON, Lieut. Alexander, R.A.M.C., 3rd Batt. Black Watch, Tain, N.B.
PEACOCK, Sapper Frank, R.E.
PENGELLEY, Sapper Walter, R.E.
RAMSAY, Corporal F. R. F., 14th Service Batt. Argyll and Sutherland Highlanders.
REES, Trooper R. (1709), Squadron D (in Egypt), Herts Yeomanry, c.o. G.P.O., Southampton.
ROBINSON, Lance-Corporal J. E., Duke of Wellington's (West Riding) Regiment (formerly of the C.M.S. College, Jerusalem).
RICK, Rifleman Cecil, 8th Service Batt. Rifle Brigade.
ROUTH, 2nd Lieut. C., 3rd/8th (D.C.O.) Middlesex Regiment.
SACKVILLE-WEST, 2nd Lieut. Hon. B., R.N.V.R.
SEAGER, Lieut. John Owen, B. Co., Public Schools Batt., 16th Middlesex Regiment, Woldingham.
SHAW, 2nd Lieut. T., R.E.
STOCK, Lieut. H. W., Royal Marines. (Serving abroad.)
SUNDERLAND, Interpreter (at the front).
THOMPSON, Lieut. Harold H., R.N.V.R.
THOMPSON, Commander W. A., R.N.V.R., H.M.S. "Egmont."
THWAITES, Dr. H., R.A.M.C., Wareham.
TRENTER, Trooper T., Household Cavalry.
VAN LENNEP, Private E., 2nd Sportsman's Battalion.
VAN MILLINGEN, Private R. G. C., 3rd Batt. London Scottish.
VEDOVA, Rifleman Eghbert, 8th Service Batt Rifle Brigade.
VEDOVA, Rifleman Lionel, 8th Service Batt. Rifle Brigade.
VERE, Lieut.-Commander Harry, R.N.
WARREN, Act.-Corporal R. M., 7th (S.) Batt. Rifle Brigade, Guadeloupe Barracks, Bordon Camp, Hants.
WHEATLEY, Miss, Sister Q.A.I.M.N.S.R., No. 1 Casualty Clearing Station, British Expeditionary Force.
WHEELER, Captain P. F. C. d'Erf, 1st Dorset Regiment.
WHITTALL, Captain G., 1st Oxford and Bucks Light Infantry.
WHITTALL, 2nd Lieut. Arthur, 7th (Res.) City of London Regiment.
WHITTALL, Lieut. Hugh, Royal Marines. (Serving abroad.)
WHITTALL, Private Kenneth, 10th Batt. Royal Fusiliers, Colchester.
WHITTALL, Private Roland, 10th Batt. Royal Fusiliers, Colchester.
WHITTALL, Rifleman Walter, 8th Service Batt. Rifle Brigade.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The British Cotton Growing Association, at their annual meeting at Manchester on Tuesday, reported that the total amount of cotton grown under their management during the twelve months was nearly 100,000 bales, and was worth £1,200,000. An anxious time was before them, as the association's Government grant expired in March, and if it were not renewed the association would have to stop all philanthropic work for the encouragement of cotton growing in all parts of the Empire.

***

It would be most unfortunate if, at this critical moment in the history of our country, the grant-in-aid received by the B.C.G.A. from the Government should be allowed to lapse. The Association has done good work, and it is largely owing to its insistence in the matter that the Government grant to the Sudan was rendered possible. The war has, of course, put a temporary stop to the comprehensive scheme of irrigating the Gezireh, but that does not affect the good work done by the Association. Nor were its activities confined to the Sudan. In all our African colonies, from Uganda to Nigeria, and from Rhodesia to the Sudan, the association has given a great impetus to the cultivation of cotton, and it is highly desirable that it should continue to do so. After all, the war is merely a temporary dislocation, and when it is over those national forces now engaged in fighting for our very existence will be employed to exploit our wonderful resources and to maintain, improve, and aggrandise our industries, chief among them being the cotton industry. When that day, the day of peace, dawns, we shall still need, and perhaps in a higher degree than heretofore, the expert aid of sound working associations like the B.C.G.A. That is why we must do our best to maintain them, even if it should appear, in present circumstances, as though we were spending money carelessly. Looking ahead, we cannot but be convinced that the money will be well spent.

***

In last week's issue of THE NEAR EAST I referred to a statement made by an Alexandrian correspondent to the effect that the local trading community was delighted with Sir Henry McMahon's assurance that in Egypt "no special privileges will be bestowed on British trade." I queried whether the British trader was as delighted as his Levantine neighbour, and I see no reason why I should be less sceptical to-day than I was a week ago. On another page we reproduce a paragraph from an article sent to his paper by the Cairo correspondent of the *Railway News*, in which two cases are cited of Government preference for foreign goods as against British-made articles. In both cases—and I imagine they are not isolated—the Egyptian State Railways seem to have been the delinquents. This is regrettable, and will be condemned by the British trader. It is strange that, though we recognize the right of other nations to kill our trade in their colonies by the imposition of high protective tariffs, we fear their objections to the introduction by us of a preferential tariff—let us say, for instance, in Egypt. The sooner we get over these unnecessary qualms the better for British trade.

Crop reports from the Near East are exceedingly favourable. In Serbia the plum trees have grown fruit in spite of the war; in Bulgaria, barley, wheat, and maize are progressing favourably (last year's stocks of the latter are still more than abundant), and both roses and cocoons have resulted in excellent crops, whatever their intrinsic value may be; in Roumania, maize and wheat are ripening in the most satisfactory way. All this is important, as it affects the maintenance and upkeep of an army in the field. So all-important is the question of crop harvests that it is inconceivable how States like Bulgaria and Roumania can become belligerents unless they can rely on important stocks of such commodities as grain, etc.

***

The Times correspondent in the Balkan Peninsula, writing from Sofia on Saturday, throws some curious sidelights on life at Constantinople. The coal pinch seems to be acute. Thus, three trains from Kuleli Burgas, laden with stones for the fortification of Hadem Keni, were recently unable to start owing to lack of fuel. The supply of coal has almost completely ceased (for which our thanks go to our great ally Russia), but it would appear that efforts have been made to obtain supplies from the collieries at Kestambul. I understand that the quality of this coal is very inferior, so that, even if some supplies are obtained, they are not likely to be of great use. Incidentally it may be pointed out that, if the above report is accurate, it shows that a great change for the worse has come over Stamboul during the past month. For, it will be remembered, one of the Englishmen who left Constantinople in the middle of June denied the reports of a shortage of coal at the time.

In spite of the lack of coal—or, perhaps, rather on account of it—fires seem to be more frequent in Constantinople than usual, and this fact, says the correspondent alluded to above, is the cause of extreme disquietude among the people, already depressed and exasperated by many privations. "Upwards of 2,500 houses were destroyed in last week's great fire, and almost every night new fires break out, causing fresh destruction. The police have profited from these calamities to arrest large numbers of foreigners on charges of incendiarism." Fires have always been frequent in Constantinople, as insurance companies know, and one of the first improvements to be introduced in the city by the civilising Power that enters it, is an up-to-date fire brigade service. That the British system is the best is too well-known throughout the Near East to be emphasised in these columns.

***

The letter published in last week's issue of THE NEAR EAST by Mr. Sefi is one more condemnation of red-tapeism at its worst. Why merchants receiving goods from Turkey in part or entire payment of moneys owing to them, said goods having been shipped prior to the outbreak of the war, should have been deprived of them passes my understanding. If it could have been demonstrated that the moneys received from the sale of the merchandise would have gone to enrich the exchequers of our enemies it stands to reason that the goods had to be condemned, but, as there was no such possibility, and as British traders were merely being paid in kind for outstanding cash payments due to them, the attitude of our Government is, to say the least, erratic. The matter deserves a question in the House, so as to raise it above the unimaginative officials of our civil administration. [ERRATA.—Owing to a sub-editorial misunderstanding, Mr. Sefi was made to say in his letter last week that he was the "senior of a business firm." It should have read "a veteran in the business."]

***

From our Vice-Consul in Sofia comes another plea for the creation of a British bank in the Bulgarian capital. Last year our Vice-Consul in Rustchuk urged the establishment of a similar institution, and, week after week, in these columns I have advocated the same thing, based on letters which reach me from correspondents on the spot. As it happens, I have before me a copy of THE NEAR EAST of June 19, in which our Special Correspondent in the Balkans, writing from Belgrade, said: "The creation of an Anglo-Serbian commercial bank, acting as a link between the credit and cash systems, would be the best way to acquire a footing in this market, and would ensure our trade. Well administered and thoroughly competent, it would be a paying concern, and Serbian capital would participate."

***

What is true yesterday will be true again to-morrow, when the war is over. If only, and at little or no cost, immediate preparatory steps were taken to interest our great exporters and some of our leading financiers in the formation of an Anglo-Balkan bank, we would be in a good position when the time comes to improve our commercial relations with the Near East at the expense of our trade rivals. Then, also, we will find our enemies in a state of financial coma, which is one added reason why we should be on the spot "going strong" before the Germans recuperate. That the Fatherland is already hard hit, and that her credit is already ruined, are facts that need not be insisted on. In this connection, an interesting article appeared in Wednesday's *Financial Times* under the heading of "Germany's Ruined Trade," in the course of which the writer refers to an audience granted by the Kaiser to a deputation of bank managers, who bluntly told the War Lord that, "assuming the Allies to be defeated, no indemnity payable by them could adequately compensate Germany for the sacrifices she has been called upon to make since the end of last July, while, in the event of a defeat of the Prussian Armies, the Fatherland will not regain its economic independence for half a century." The outlook is anything but a brilliant one for the Teutons, and it behoves us to take immediate advantage of the new situation and to consolidate our commercial interests in the Balkans by establishing an Anglo-Balkan bank on lines similar to those advocated in these columns.

COMMENTATOR.

NOTICE.

CYPRUS MAIL SERVICE.

WITH reference to Notification No. 11,566, published in the *Cyprus Gazette* No. 1,168 of the 21st May, 1915, it is hereby notified for general information that from the 23rd June, 1915, and until further notice, the Mail Steamer will leave Alexandria on Wednesdays instead of Tuesdays and follow the usual itinerary one day late, arriving at the first port of call in Cyprus on Fridays.

C. W. ORR,
Chief Secretary to Government.

21st June, 1915.

Smyrna and the War.

Commercial and Financial Stagnation.

Owing to the war, news from Asiatic Turkey through British channels is scarce, and, therefore, the following extracts from the report by Mr. George Horton, the U.S. Consul-General at Smyrna, will be read with interest :—

Commercially speaking, the year 1914 was one of the most disastrous in the history of Smyrna. It opened with promising prospects in all branches of activity, especially in agriculture, which forms the basis of the wealth of these districts. Crops were generally abundant, and the estimates for cereals were 20 per cent. higher than for the preceding year. After the re-establishment of peace for the Balkan States, a hopeful horizon had opened for the promotion of new industries and the establishment of new factories. Mining developed with great activity, discoveries of new mines were made, and additional concessions were obtained. Shipping had resumed its normal state, the tonnage of vessels entering the port of Smyrna for the months of January and February being 462,313, as against 291,776 for the same period in 1913. In a word, all indications pointed to a year of prosperity, when conditions were disturbed by a succession of events, ending with Turkey's participation in the European war.

Greek Exodus.

The exodus of the Greeks and their supplanting by non-industrial classes caused heavy losses to the innumerable creditors of the emigrants and immediately brought uncertainty on the market, compelling the banks to show great reserve in the extension of credits. An American sewing-machine firm was especially injured by this exodus of the Greeks, as the chief consumers of sewing machines in this region are Greeks. Large quantities of crops which had been sown by these people were allowed to rot in the fields.

Import trade began to decline, partly owing to general war risk, but more especially on account of the requisitioning of all kinds of goods by the military authorities. Stocks of nearly every nature have been depleted in this district in this manner, and naturally importers have not wished to take the risk of bringing in further goods to meet the same fate. Even orders previously given were cancelled.

The mines in general have shut down either because of lack of workmen or by order of the authorities, the majority of the mines being owned by subjects of belligerent States, notably British.

The Port.

As the port of Smyrna was closed without previous notice, the following steamers were bottled up, together with their cargoes, and have been unable to get away : Assiout, City of Khios, Billiter, British ; New York, American ; King Constantine, Greek ; Deucalion and Achilles, Dutch ; Aegina, German ; Constantine, Bulgarian. It is expected that as soon as the war is over and the port is open, with confidence re-established, there will be a great reawakening of business and especially of importations, as stocks in all lines are being exhausted and the country is being practically denuded of every imported article.

The commercial situation was brought to a state of chaos by the general mobilisation of the Turkish Army and the declaration of war. The port of Smyrna was closed, but the commerce of this region was not even yet entirely suspended. It made desperate efforts to find an outlet at Vourla, a small port about six or seven hours distant from Smyrna over a very bad road. Goods are transported there mainly on camel back, although such horses and carts as have not been requisitioned by the military authorities are also engaged in this service. The goods whose value allows them to stand the extra expense of transportation from Smyrna to Vourla are mainly tobacco and opium, although some figs and raisins have also been sent.

Industries.

Industrial activity for this district during the year 1914 was practically in a state of paralysis. The principal industries are fig packing and carpet weaving. A considerable quantity of figs was packed and shipped despite the great difficulty encountered in obtaining cash. Carpet making, however, which furnished employment to thousands of hands, has been almost entirely suspended on account of lack of wool and money and difficulty in obtaining labour, which has been taken for military service. The wool collected for the carpets has been largely requisitioned.

Generally speaking, the returns of the foreign trade of 1914 are related to the first six months of the year. There are no statistics available of the amount of imports or exports in value, but a statement obtained from the local Custom house of the duties collected is very eloquent in demonstrating the state of the Smyrna trade during the past year. This statement shows that the decrease of imports commenced in June. In November and December, 1914, they were practically nil.

In February, 1915, an increase over the few months preceding was apparent, this being due to shipments of sugar, coffee, soda, etc., the only articles imported since the outbreak of hostilities.

As to the exports, the greatest fall is apparent in the month of November. An improvement during the months following reduced the difference between each month and that of the preceding year's corresponding time to only 50 per cent. or thereabouts.

An idea of the decline of the trade of this city may be obtained from the statistics of the Quay Co., showing the following result : Imports, 7,111,585 quintals in 1913 and 5,794,326 in 1914 ; exports, 7,097,637 quintals in 1913 and 5,340,281 in 1914 ; transit, 779,243 in 1913 and 771,708 in 1914.

The only articles exported were figs, raisins, opium, tobacco, and valonea. Those imported were, as stated above, articles of first necessity, sugar, coffee, soda, rice, oranges, salted fish, in contraband.

Trade with America.

Trade of this district with the United States has suffered, as well as that with other countries, from the war, but it can be said in a general way that, comparatively, the American loss has been smaller than that of other countries, at least in so far as exports from this place are concerned. No statistics of the imports are available, but from an investigation made in the market it has been learned that very small quantities of goods were imported during the year under review, for the causes stated. The imports of shoes are estimated at £1,600, as against £3,600 in the preceding year, while there has been practically no importation of furniture. The imports of petroleum have been considerably less than the previous year. Stocks at present are : American, 56,000 tins ; Roumanian, 410,000 ; Russian, 81,000. Prices have risen 25 per cent. higher than last year, and would continue to rise still higher had not the authorities put a stop to it by fixing the selling price of the different qualities and threatening to seize all the oil if the importing companies and merchants did not carry out the order.

The exports to the United States during last year amounted to £1,095,973, as against £1,147,465 in 1913.

The articles in which a gain in value over the preceding year is apparent are emery stone, licorice root, and especially opium. The increase in opium is accounted for by the prevailing higher prices on account of speculation and the larger shipments made to the United States, in view of the impossibility of shipping to other consuming countries with which Turkey is at war. A decrease is especially marked in the item of tobacco.

The great interior of this region is practically virgin territory, untouched except by the network of agencies of the American oil, tobacco, agricultural machinery, and licorice houses and sewing-machine representatives. With better transportation facilities this region should offer an enormous market for all kinds of American manufactured goods, a market which should steadily increase as the territory is developed under newer and better conditions.

Milling Industry.

Of the thirteen flour mills in Smyrna, with a producing capacity of 4,000 sacks a day, only five remained in operation, the others having closed mainly on account of shortage of money and coal. The output of the two cotton-spinning mills in this city was reduced to only half their average of 9,500 meters. Of the three spinning mills in the woollen industry, employing in normal times about 350 workmen, only one remained open, and that was working at irregular intervals. Even the factory for making the army cloth was doing very little work on account of lack of wool, coal, and money, although there was a great demand for its output.

Coal has been running very short. Ordinarily imported from England, the stock on hand was practically all requisitioned by the military authorities. Some coal of inferior quality was brought here from the Heraclea mines, near Constantinople, but there was practically no stock on hand and transportation was extremely difficult. It was a question as to how much longer the railroads of the district would be able to run or the gas company continue working.

Crop Returns.

Generally speaking, the crop returns of last year were satisfactory, but they afforded little or no relief to the producer, as, on account of the prohibition of exports, most of the products remained unsold and were requisitioned by the army. In 1914 the production of barley was 115,000 tons, as against 100,000 in 1913. The cotton crop was very small, not exceeding 15,000 to 16,000 bales of 440 lbs. each, as against 35,000 to 36,000 the preceding year. Exportation was prohibited and quantities were requisitioned by the military authorities. The wheat crop was very good, amounting to 80,500 tons, as against 53,000 in 1913. The olive-oil yield of last year was below the average, the total production not exceeding 560,000 quintals of 124 lbs., or about half the production of 1913. Prices range more than 10 per cent. higher than last year. The fig crop amounted to 80,000 camel loads of about 4 cwt. each, as compared with 92,000 camel loads the preceding year. The present stock on hand is estimated at 500 quintals. After the closing of the port, shipments were made through Vourla.

The raisin crop is estimated at from 700,000 to 750,000 quintals of 124 lbs., which is about 300,000 quintals short of last year's production. The stock on hand is estimated at 200,000 cwt.

The tobacco crop is estimated at 17,000,000 lbs., or only a little more than one-half that of last year. This shortage is principally due to the lack of skilled tobacco cultivators, and is a result of the expulsion of Greeks. Lack of means of transportation and an economic crisis, both resulting from the war, caused the crop of 1914 to remain unsold in the hands of the producers. As there is no regular market for the merchandise no prices are quoted. It is probable, however, that holders of tobacco would be glad to dispose of their merchandise at very low prices.

Opium.

The crop year for opium started last June with glowing prospects, good prices, and strong demand. The outbreak of the war caused a great decrease in the demand in August, owing to the heavy loss in exchange and other difficulties in the way of financing and moving the crop. The danger at sea, with the great increase in marine-insurance rates, was an additional factor in curtailing trade. Arrivals from the interior were greatly diminished, but a stock accumulated in Smyrna which caused considerable anxiety to the holders.

As soon as shipping facilities improved, during September and October, large shipments were made on consignment to Europe and America. The arrival of large quantities on foreign markets at once brought down the price. This had an effect on the Smyrna market, and has deterred merchants from making further consignments.

The crop of 1914 is said to be about 6,200 cases, of which about 1,000 still remain in the interior. The arrivals at Smyrna were 2,440 cases ; present stock, 900 cases. Arrivals at Constantinople, 2,080 cases ; present stock, 500 cases. Arrivals at Salonika, 650 cases ; present stock, 500 cases.

The prospects for the 1915 crop are good, but there is considerable anxiety as to the possibility of harvesting it with most of the male population away from the farms. The area planted is smaller than usual.

Sudan Gum Exports.

Protecting the Forests of Kordofan.

The *Monthly Report* (April) of the Commercial Intelligence Branch of the Sudan Government says:—

1,097,935 kilos of gum, valued at £32,748, were exported via Port Sudan and 14,034 kilos of gum, valued at £351, were exported via Halfa during April, 1915.

The following table shows the value and quantity of gum exported during the period January to April, 1915:—

Country.	Jan. to March. £	April. £	Total up to April 30, 1915. £
Australia	783	–	783
Egypt	2,713	5,520	8,233
Erithrea	29	—	29
France	7,818	4,171	11,989
Great Britain	11,732	22,171	33,903
Greece	211	—	211
Holland	278	—	278
Italy	6,988	—	6,988
New Zealand	71	—	71
Spain	1,080	—	1,080
U.S.A.	8,122	1,237	9,359
Total value	39,825	33,099	72,924
Total quantity, kilos	1,397,539	1,111,969	2,509,508

The following table shows the quantity of gum carried on the Kosti-El-Obeid Railway from January to March, 1914 and 1915:—

Period.	Quantity Tons.
January, 1914	747
„ 1915	424
February, 1914	1,198
1915	716
March, 1914	2,198
„ 1915	1,639
Total, 1914	4,143
„ 1915	2,779

A correspondent writes:—

Nearly 2,000 years B.C. the Egyptians traded in gum. They used it in the fabrication of their colours for painting and the effectiveness of their mixtures can still be recognized in the brilliancy of some of the mural decorations in the Tombs of the Kings and other show-places in the Land of the Pharaohs. It is difficult to say when gum first became an article of commerce in the Sudan, where it grows in abundance and forms one of the principal sources of revenue under the designation of "royalties" enjoyed by the Government. From the time of its establishment in 1899-1900, the Administration has done everything that lay within its power to foster and protect the gum industry, efforts which, on the whole, have been crowned with much success. Thanks to this spirit of official enterprise, the Anglo-Egyptian Sudan ranks with the French colony of Senegal as one of the great gum-producing countries of the world.

The Great Gum Forests.

The Central Economic Board has been engaged for many years in organizing a system for the protection of the gum trade from ruthless exploitation. The problem that presented itself was no easy one to solve, and it assumed a somewhat acute form in respect to the forests of Kordofan. The completion of the railway to El Obeid, affording ready access to the forests, together with the high prices realized by the gums during a succession of years, led to a great and damaging increase in the collection of the substance, seriously affecting the forests which were, and still are, insufficiently guarded against injury. It must be conceded that the precautions which were taken by the authorities—more especially in the direction of maintaining the forests against reckless destruction—have proved beneficial if not wholly adequate. Similar efforts to protect the industry in the Upper Nile Province have been rather less successful. Investigations proceeding in the Bahr-el-Ghazal, particularly with respect to the suspected existence of the valuable "gum benzoin," promise encouragement.

The latest advices from the Sudan—that is to say, from the Province of Kordofan, the centre of the gum industry—are encouraging as to the quantity of the season's supply; the commodity appears to have been coming into the El Obeid "suk" in unusually large consignments, but the prevailing prices are low. It seems almost as if there might be a recurrence of the glut which was met with in 1912, when there occurred an over-production, and large sums of money became necessary to finance the export. This had amounted to 19,615 tons (the largest ever known), representing a value of £E603,511. Then, in 1913, there ensued a reaction, resulting from the existence of unconsumed stocks on the European market; the exports from the Sudan declined to 15,129 tons of a value of £E371,528, a falling off of no less than £E231,983. How great can be the influence of the market price upon the prosperity of this industry is seen from the fact that while in 1911 only 14,357 tons were exported and realised a value of £E435,622 (or, say, at a rate of £E30 per ton), in 1913 the larger total of 15,129 tons brought in no more than £E371,528. The next best results achieved seem to have been in 1902, when 9,900 tons of the produce realised £E268,878, or an average price of £E27 per ton.

The Gum Market.

In view of the many strict regulations which have been instituted regarding trading with the enemy a considerable reduction in the foreign gum exports must be looked for this season. Germany has always been a heavy purchaser of Sudan gum, although in varying quantities. For instance, in 1912 she took 3,711 tons from the Sudan direct and another 4,261 tons from Egypt; but inasmuch as all the gum exported from Egypt is gum originally collected from the Sudan, the share of the foreign importing countries in this quantity exported from Egypt should rightly be added to the shares of each in the direct exports from the Sudan. Upon this basis Germany took 7,972 tons out of the total of 19,615 for the year 1912 and but 2,983 tons in 1913. For 1914 the amount exported to Germany will necessarily prove very small, while for 1915 it will be negligible. Thus the Sudan gum trade might have felt the effects of the war more deeply than any other industry of the country but for the law of compensation which has again asserted itself.

Fortunately, the United States and Great Britain are still heavy importers of the product, while of late years Italy and France have become substantial and regular customers. Even Spain has "nibbled," and to some extent has offered a desirable market. All these countries are expected to absorb without any effort whatever output the Sudan offers this season. But at prices anything lower than 80—85 p.t. the kantar at El Obeid it is difficult to induce the native picker to work. It is not improbable, indeed, that a goodly portion of this season's harvest may be wasted, since there will be few hands found willing to garner it. The amount thus lost has been estimated at 30,000 kantars.

COTTON EXPORTS.

The Board of Trade announces that the exportation of cotton yarn and thread has been prohibited to all foreign ports in Europe and on the Mediterranean and Black Seas, other than those of France, Russia (except Baltic ports), Spain, and Portugal, by Order of Council. Applications for licences to export these articles to any prohibited destination should be addressed in the usual way to the War Trade Department.

Mr. Runciman, the President of the Board of Trade, has appointed a Committee to consider and advise upon applications for the grant of licences to export cotton yarn and thread, and also raw cotton and cotton waste.

The latest Egyptian Savings Bank figures show that during March 692 new accounts were opened, while eighty-seven were closed down. New deposits totalled £26,706, against £20,911 withdrawn. From the beginning of the year to the end of March, 1,346 new accounts were opened, the total amount of fresh deposits being £E44,894. On the other hand, a sum of £E60,978 was withdrawn during the period, so that the net result was to reduce the total deposits by £E16,084.

ADVICE TO EXPORTERS.

The following extracts are from an article on "Trade Advice" written by the U.S. Consul-General at Athens. Though the American trader is directly addressed, the advice applies likewise to the British exporter:—

"It has been noticed that almost invariably American (British) manufacturers prefer to answer inquiries direct, rather than to appoint a responsible and exclusive agent. The result is that very little encouragement is given to anyone to push the sale of American goods, and the few orders transmitted are, we might say, spontaneous. This forms a marked contrast to German and Austrian methods. The opinion of the American Chamber of Commerce is that manufacturers should find, either directly through the United States Consular service, or through this association, an honest and energetic agent, and after satisfactory references are received appoint him as the sole agent, stipulating conditions, length of time, and territory covered. This agent should be supplied with all necessary data, advertising matter, prices, and samples.

"If these samples are too expensive they could be given on a consignment basis. To sell a foreign article by catalogue is a hard proposition in which very few, if any, buyers would be interested.

"Another serious obstacle in the way of the development of sales in Greece is the exceedingly hard terms of payment demanded by manufacturers. Though other European countries exporting to Greece continue to accord credits, even under present abnormal conditions, up to three and occasionally six months, the American Chamber of Commerce would not take the responsibility of advising such liberal terms as a general rule. On the other hand, to require that buyers in Greece, accustomed to the aforesaid payment facilities, should advance the value of their orders and then wait for perhaps three months or more until they get their goods is tantamount to refusing to sell.

"It would appear that the differences between the conditions imposed by American sellers and those to which buyers in Greece have been accustomed are considerable, and it is the aim of the American Chamber of Commerce to suggest the means whereby such differences may be removed. If a signed order is received from a buyer known to the manufacturer's agent as one who is in the habit of meeting his obligations, and the manufacturer sends the goods against shipping documents through a bank of Greece, no loss can occur, as a rule, for the buyer will not get the goods ordered before paying for them. When the information concerning a buyer is unsatisfactory an advance should accompany the order. This will bind the buyer and will, in case of non-acceptance, cover the return freight. In the event of goods not being paid for the agent should be empowered, besides taking other legal measures, to resell the goods to another party. American trade holds the monopoly on some articles and these the buyers will be obliged to take on any condition, but for those articles that can be procured elsewhere the preference will be given to those manufacturers who supply good, uniform quality at reasonable prices, who attend to proper execution of orders, who can offer the promptest and most economical transportation, and who can be relied upon to protect the interests of the buyer."

Trade Notes.

Egypt.

H.M. Consul at Cairo reports that tenders are invited by the Egyptian Ministry of Education, for the supply and delivery of clothing for the pupils of the Bulac Elementary Training College for Women Teachers, viz.: 2,570 metres of flanelette, 2,660 metres of printed calico, 2,120 metres of coloured zephyr, 1,520 metres of veil muslin, 700 dozens of white press buttons, and 660 pairs of girls' shoes. Samples may be inspected, and specifications and forms of tender obtained, at the Central Stores, Ministry of Education, Darb el Gamamiz, Cairo. Sealed tenders, accompanied by a deposit of 2 per cent., or a bank guarantee of 10 per cent., of the value of the offer, will be received at the Ministry of Education, Sharia el Turka el Gharbi, Cairo, up to noon on July 31. A copy of the *cahier des charges* may be inspected by United Kingdom manufacturers of the above-mentioned goods, on application to the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

The following information is from the report by H.M. Vice-Consul at Alexandria, on the trade of that district in 1914, which will shortly be issued: "Before the war, goods of agricultural unity, and more particularly coal engines, which the fellaheen prefer to oil engines, were imported from Germany an Austria-Hungary. For these engines cotton stalks are being largely used as fuel owing to the present high price of coal. It is possible that British manufacturers might do more in this trade, but it must not be forgotten that at the present time the whole of the Egyptian community is refraining from making purchases that can possibly be avoided."

The *Journal Officiel* for June 7 contains certain revised Tariff Valuations (No. 1) for use in assessing duties on cotton manufactures imported into Egypt, with effect from June 4, 1915, to October 3, 1915, or until denunciation.

The same issue of the *Journal Officiel* contains a Ministerial Decision, dated June 1, 1915, authorising the exportation of wheat from Egypt without limit or restriction. Record, however, is to be kept of the quantities of wheat exported, with a view to the prevention of any ultimate shortage in the country.

EGYPTIAN STATE RAILWAYS.

In connection with our review last week of the statistical information published by the British Chamber of Commerce in Egypt anent Egypt's imports from foreign countries, the Cairo correspondent of the *Railway Gazette* points out that of technical commodities Egypt received rails to the value of £E19,980 from Germany, iron and steel bars and angles to the value of £E18,271, and wrought iron and steel pipes to the value of £E52,271. The writer says these figures relate largely or entirely to the Egyptian State Railways, and show how largely that system has in the past been given over to the use of foreign, and particularly German, material. An interesting case in the same connection has recently come before the Courts in Egypt. In the contract placed by it for the supply of carbon paper, the administration of the Egyptian State Railways specified a German brand. The contractor had been obtaining the article through neutrals, and is now being prosecuted for trading with the enemy for so doing. Shortly before the outbreak of war, also, the State Railways took the contract for clothing their staff away from a British firm and placed it with a local Austrian one. In addition, the administration is now calling for tenders for the supply of American coal, apparently, so far as can be gathered, to the absolute exclusion of the English and Scotch article.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .
CONTRACTORS TO GOVERNMENT

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.
Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.
Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

New Egerton Woollen Mills Co., Ltd.
DHARIWAL, PUNJAB, INDIA.
Sole Manufacturers of the Famous . .
Dhariwal
Long Life Wool Wear
Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c., &c.
CONTRACTORS TO GOVERNMENT.

CYPRUS TRADE.

(From a Correspondent.)

Cyprus, June 22.

The return of imports and exports for the quarter ended March 31, 1915, shows a considerable falling off, which is attributed to the War. The imports are £112,918 and specie £3,468, as against £145,442 and £15,304 for the corresponding period in 1914: decrease £44,360. Exports £114,123 and specie £5,329, as against £155,288 and £28,349; decrease £64,185.

It is needless to say that the island suffers in various ways from the commercial crisis, which threatens to be of long duration.

ANGLO-BULGARIAN TRADE.

The following information is from the report by H.M. Vice-Consul at Sofia (Mr. L. H. Hurst) on the trade of Bulgaria in 1914, which will shortly be issued :—

The value of the imports into Bulgaria for the first four months of 1914 exceeded those for the same period in 1912 by £1,376,000, an increase of 39 per cent. The largest increases are observable in the figures for Germany and Austria-Hungary. Imports from the United Kingdom did not keep pace with this general improvement, the figures up to the end of April, 1914, exceeding those for 1912 by the relatively small amount of £65,400. As usual, the principal imports from the United Kingdom have been textiles, coal, metals, machinery and chemicals.

Speaking generally, Bulgarian merchants prefer British goods to any others. They often state, however, that the German and Austro-Hungarian firms know the market better, and offer more acceptable conditions. This is especially the case as regards credit. Buyers expect from three to six or even nine months' credit, according to the class of article and the size of the order. The Bulgarian is generally honest, and it is but seldom that a firm fails to meet its obligations.

Catalogues intended for Bulgaria should give prices in lew (francs) and weights and measures in the metric system. German is the language most generally understood in commercial circles.

The imperative necessity of making no error in the customs declaration, and the advisability of sending a sample previously to the Customs Department of the Ministry of Finance, should there be any doubt about the legal description of the goods or the duty to which they are liable, have been pointed out in previous reports.

The desirability of founding a British bank in Sofia still continues.

As a consequence of what precedes, and for several other reasons (such as the unfavourable rate of exchange now prevailing and the inability of the local banks to effect transfers to London), the present time cannot be considered as very favourable for extending British commerce with Bulgaria. It is to be hoped, however, that such British firms as already have relations with Bulgaria will at least maintain them through this period, and that British commerce generally will now prepare the ground against the arrival of a more normal time by making its wares, prices and conditions known as widely as possible; when access to Bulgaria again becomes easier, there should be a great opportunity for British trade.

Mr. John Edward Humphery has been elected a director of the Royal Exchange Assurance Corporation.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Belgrade. June 19.

According to information from the Ministry of Agriculture, the plum crops in the whole country are good and plentiful, and as last year's crops were not exported, it is presumed that permission for exportation will now be given.

Sofia. June 27.

This year's barley harvest in New and Southern Bulgaria is practically terminated. Wheat harvesting is shortly to begin. According to the official information, prospects are excellent.

The rose flower crop has been a good one, the timely rains in the Karlova and Kazanlik valleys having done much to favour the blooms. Quantity and quality are excellent. Owing, however, to the impossibility to export the attar, prices have fallen ridiculously low—10 to 20 centimes per oke. The result is that many growers have begun to tear up their roses in the famous "Valley of Roses."

During the month of May 14,581 muscals of attar were exported, valued at 174,972 fr.

In his recent tour in western Bulgaria, the Minister of Agriculture discovered that the old maize stocks are still so important, that half will rot unless got rid of. He has consequently urged on the Cabinet the necessity for lifting the embargo on maize exports.

The cocoon crop is abundant, but owing to difficulties of export, prices are very low. Steps are being taken by the Agricultural Bank to help the farmers by advancing money on their crops and by finding an outlet for their produce.

Cabling from Sofia on June 29 *The Times* correspondent in the Balkan Peninsula said :—

"The five weeks' period of harvest operations in this part of Europe is a time of truce to internal as well as external politics. The peasants are busy in the fields and the politicians generally take their annual holiday. Even in the present exceptional circumstances no marked departure from the usual programme need be anticipated in Bulgaria, especially until the crop, the product of the year's industry, has been gathered in.

"Both Bulgaria and Roumania have greatly increased the area sown owing to the war. The harvest in Bulgaria promises exceptional abundance, and in view of the high price of cereals, the laborious peasant anticipates a substantial reward for his exertions. The spring rainfall, sufficient in almost all parts of the country, was in some districts excessive, and the winter wheat is threatened with mildew, but with this exception the crops are in excellent condition, and promise a yield greatly superior to that of last year, both in quantity and in quality.

"In Roumania the prospects are equally satisfactory. The yield of wheat, barley, and oats will be probably double that of last year. Maize hitherto has been somewhat backward, but is now improving. The vineyards are in excellent condition.

"Harvest work began in Southern Bulgaria about the middle of the month, and is now general throughout the country. Wheat and barley are being reaped in the lowlands of Roumania. In both countries all the crops except maize will practically have been gathered by the third week of July."

PRODUCE REPORT.

London, July 8.

Currants.

The s.s. Salermo and s.s. Princesse Clementine brought about 4,000 tons. The Zante fruit is very g ood and supplies an urgent need, but some parcels of other qualities show a little want of condition. Business during the week has been moderate owing to the slow discharge of the steamers, and to the fact that buyers were waiting to examine their forward purchases before operating further. The stocks of currants in London on June 30 were 1,961 tons, against 4,521 of last year. In Liverpool the market has been somewhat quiet during this past week, but with the arrival of the s.s. Avon a better demand is now being created.

Sultanas.

A large business was transacted during the later part of last week, partly on Government buying and the consequent speculative rise, but this week there has been only a moderate business at full price. The stocks of Sultanas in London on June 30 were 3,004 tons, against 3,179 tons last year. In the Liverpool market, owing to the very small stocks in first hands, holders are very firm.

Onions.

The market for Egyptian, Canary, and Lisbon is utterly demoralised, and forced sales are being made at ruinous figures. Early Valencias are arriving freely, but the quality of most samples is unattractive, and last week's low quotations are barely maintained.

Seeds.

Linseed is rather firmer. London-Calcutta, spot, also afloat, and June-July, is quoted 55s. 3d.; July-Aug., 55s. 6d.; and Aug.-Sept., 55s. 9d. Rapeseed is inactive. Pure Guzerat, June-July, 56s. 6d. is asked, and brown Cawnpore ditto, 49s. 3d. Cotton-seed has been steady this past week, London-Egyptian spot being sold at £9 per ton.

Oils.

Linseed oil has been in better demand and prices have advanced, but the tone is quiet at the close. On the spot, pipes, £27; barrels, £27 15s. to £28; June, £27 5s.; July-Aug., £28. Rape oil: Japan has further improved in value, but brown and refined remain unaltered. Ordinary brown, on the spot, naked, £36 to £37; English refined, barrels, £38 to £40; Japan, in cases, c.i.f., afloat, May till Aug. shipments, £29 10s. Cotton oil is firmer. Crude, on the spot, pipes, £29 5s.; refined, on the spot, pale, pipes, £31 5s.; sweet, barrels, £36 to £37.

Locust Beans.

There is a good demand for this produce, but it is rather scarce, and prices remain at £8 per ton for whole and £8 10s. for kibbled.

Gums.

The market is quiet. Arabic, Turkey sorts, are quoted 40s. to 50s.; East Indian, common to fine, 32s. 6d. to 37s. 6d.; myrrh, good to fine, 96s. to 100s.; sandarac, 15s. to 24s.; tragacanth, first, 530s. to 580s.; low to good sorts, 90s. to 118s.

COTTON MARKET.

(From Our Own Correspondent.)

Liverpool. July 8.

Messrs. Reynolds and Gibson report :—

Egyptian Spot.—The demand has been limited this week, doubtless partly owing to the holidays in some spinning districts. The business reported is consequently small. Quotations show a decline of 5 points. Sales are estimated at 2,000 bales, against 3,100 last week.

Manchester.

There was no special feature in the market this week, but business remains very quiet, the standing demand being chiefly for lots for immediate delivery, based on the present prices of cotton.

DATES.

SPHINX BRAND.

PRODUCE OF BASRAH.

Selected from the famous Gardens.

Only superior qualities of

Hallawees, Khudrawees, Sayers and Zehdi

are packed.

In cartons of one to four pounds, small boxes, ordinary cases, baskets, tins, and skins.

SPHINX competes with all other brands in quality, packing, and is guaranteed to be clean, sound, fresh, and free from disease.

Engineering Notes.

Electric Lift Control.

Electric power is largely utilized for a variety of purposes in most modern towns in the East, but there seems to be a prejudice against its use for lift service. This may, perhaps, be attributed to some breakdowns, or other accidents, which happened through faulty and badly designed apparatus, with the result that local proprietors, as well as local engineers and architects, were discouraged. Nevertheless, the newest systems of electric lift control provide for everything that is required for the satisfactory service of the lift, and especially for its safety in operation. There are four systems of control now generally in use. 1. The automatic push-button system. 2. The semi-automatic push-button system. 3. The car-switch control. 4. The hand-rope control.

Automatic Push-Button Control.

By this method the lift is operated automatically by the momentary pressure of one of a series of buttons marked to correspond with the floor to which it is desired to travel. These pushes may be placed wherever required. The pressure of one of the pushes closes the control circuit, which, in turn, energises a small electro-magnetic relay and starts the lift, allowing the push to be released without opening the circuit. If the car of a six-floor lift, for instance, is at the top and the third floor push is operated, the car must travel down, while if the same push is pressed while the car is at the bottom the car must travel up. The determination of direction of travel, therefore, is accomplished by suitable "direction" switches of fire-proof construction which are located in the lift shaft. They are operated by a spiral cam attached to the car, which constitutes a special feature of the system, inasmuch as in the case of lifts running at 120 ft. per minute accurate floor levels are always attained, while the adjustment is permanently correct, irrespective of rope stretching. This factor is particularly important in the selection of a lift for hotel, hospital, factory, or warehouse use. Safety in operation is assured by a device which makes it impossible for any lift operating on this system to be set in motion until all the doors or gates are closed. Further, the possibility of simultaneous calls is provided against, as should two or more pushes be pressed at the same moment the car will travel to the furthest point of call in the direction of the previous journey, no damage to the gear resulting. No attendant is required; and a lock is attached to each gate or door frame, which is opened by a cam attached to the car when the latter is opposite the floor. This unlocks the door or gate, allowing it to be opened, interrupting the control circuit, so that any movement of the lift is impossible. Closing the door allows control of the lift to be regained, while, immediately the lift is in motion the door is mechanically locked.

Car Switch and Semi-Automatic Push Button Control.

The difference between this and the previously described control system is that it is not freely automatic, in so far as the direction and limit of travel is controlled by the operator. The lift is actuated from the car itself, either by means of a hand-switch fitted with a detachable handle or key, or by means of "up," "down," or "stop" pushes. In either case control circuits are actuated, energizing electro-magnetic switches fixed on or near the lift gear, which automatically start, stop, or reverse the direction of the lift. The controller proper consists of two electro-magnetic switches—a reversing, or direction, switch and a master switch. The former, by a movement of a hand-switch in the lift car, determines the direction of rotation of the motor, and the latter starts and stops the motor. The provision of a device renders it absolutely impossible for the operator to derange the motor.

Handrope Control.

This is the oldest type of electric lift control in use, and an enormous number of lifts are operated by this method, which has the advantage of simplicity and low initial cost, although it is non-automatic. In this system the car is set in motion by the pulling up or down of a suitable hand-rope passing up the lift shaft and down through the cage. The rope, when pulled, operates the controller switch, selecting the direction of rotation of the motor, while a further movement in the same direction closes the main switch circuit, thus starting the motor. A pull on the rope in the opposite manner reverses the cycle of events and causes the motor to stop by the opening of the master switch.

British Made Lifts.

The above described systems of electric lift control are British, and the designs, material, and workmanship of the various apparatuses are also British, a fact which will be of interest to those having the installation of lifts under consideration.

Isherwood Ship Constructions.

It is a remarkable fact that of the vessels torpedoed by German submarines since the outbreak of the war three were built on the Isherwood system—the Belridge, the Gulflight, and the Maricopa. In each of these instances the vessels remained afloat. The Belridge was towed to Thameshaven and then to the Tyne, where she was repaired. The Gulflight was towed to the Scillies, and is being repaired, and the Maricopa was towed to the Tyne, where she also is being repaired. That these three vessels, all of the same special system of construction, should have escaped total destruction is very remarkable, and what makes the case more interesting is that the San Wilfrido, another ship of the same Isherwood construction, struck a series of mines outside Cuxhaven the day before war was declared, and after striking the first and second mines she still remained afloat. It was when she struck a third mine that her doom was sealed. Another instance is the sinking of the Empress of Ireland in St. Lawrence River last year. The vessel which collided with and sunk her was the Storstad, which was constructed on the Isherwood system, and emerged from the collision with comparatively small damage. In the subsequent action brought against her by the Canadian Pacific Railway, the owners of the Empress of Ireland, Mr. Justice Dunlop, in giving judgment, said: "I would mention that the Storstad is built longitudinally, or on the Isherwood system, and is consequently very strong." Unfortunate as these accidents were, they have been a unique series of tests of a new system of ship construction of which the public knew little or nothing. The system, briefly described, is a complete reversal of the fundamental principles which have governed the building of ships since time immemorial, and its advantages include a considerable increase in structural strength. The first ship built on this system was launched in 1908, and the fleet to date, excluding war ships and including ships in course of construction, totals 350 vessels, with an aggregate gross tonnage of about 1,670,000 tons, involving a capital expenditure exceeding £25,000,000. Prior to the outbreak of the war Germany had built four cruisers on the system, including the notorious Breslau.

The German-Baghdad Railway.

A report from Baghdad, says the *Birmingham Daily Post*, states that the German or so-called "Baghdad Railway," which has for its object the linking of Constantinople with Baghdad, by way of Mosul and Aleppo, is not likely to change traffic conditions in any way, as the working expenses of such a line will scarcely enable it to compete, so far as the southern section of the line is concerned, with cheaper, if slower, water-borne transportation of goods. The railway is completed and working from Constantinople to Bourgourluh in the north and from Baghdad to Samara in the south, but further construction has practically ceased, and it seems clear (remarks the American Consul) that no resumption of the work can be undertaken before 1916 at the earliest. The only manufactured articles which leave Baghdad in any considerable quantities are Persian carpets and opium. The introduction of aniline dyes of German manufacture has, however, seriously jeopardised the carpet industry, and, while enhancing the value of antique rugs, has robbed the modern article of artistic and lasting value.

THE NATIONAL INSURANCE COMPANY, "BALKAN" (SOFIA).

The nineteenth annual meeting of shareholders was held at Sofia on April 29, 1915, the chairman presiding.

The Chairman said: I am pleased to inform you that notwithstanding the effects of the war on international trade relations and the incalculable material losses caused thereby, the financial situation of our company has not only been strengthened by increased reserves, but, by reason of the neutrality of Bulgaria, we have been able to preserve our foreign interests and to acquire new ones, the results of which will be felt in next year's balance-sheet. In those States where our greatest interests lie we have at our disposal sufficient funds to enable us to meet our liabilities without transferring funds from one country to another, or suffering losses by reason of the agio.

I.—Fire.

Collected premiums amount to 18,616,189.96 frs., against 18,930,067.36 frs. in 1913. 3,795,338.51 frs. have been used for reinsurance purposes, so that there remain to our credit 14,820,851.45 frs., against 15,511,281.78 frs. in 1913. The slight decrease of receipts is due to the stagnation of the world's trade.

Paid losses amount to 10,127,398.17 frs., or 68.70 per cent. of the premiums, and commissions to 4,423,976.86 frs., or 29.80 per cent. of the premiums. The remaining unsettled losses amount to 2,730,277.57 frs., against 2,275,121.78 frs. during 1913., included in the reserve fund. The collected premiums on account of 1915 placed in reserve amount to 8,436,755.35 frs., or 57 per cent. of the premiums.

II.—Life.

During 1914 3,078 applications for life insurance were received, representing a capital of 12,098,281 frs., of which 2,776 have been approved and granted insurance policies on the capital of 10,727,117 frs., while 238 applications of 895,000 frs. are left over till 1915. After deducting the payment of insurance policies, of unpaid premiums, the decrease of insurance capital, etc., the portfolio on December 31, 1914, amounted to 15,919 insurance policies with an insured capital of 53,939,536 frs., against 45,672,999 frs. on the same date of 1913. The collected premiums amount to 2,061,736.57 frs., and paid losses plus temporary insurances to 615,361.06 frs. Reserves transferred for next year amount to 11,535,177.57 frs., against 10,201,128.09 frs. in 1913, so that the company's reserves in the life branch, as compared with those of last year, have been increased by 1,270,826.38 frs.

III.—Accident.

The collected premiums amount to 1,627,239.82 frs., against 1,525,788.77 frs. during 1913, and the paid losses to 1,387,506.25 frs. The premiums transferred to next year amount to 637,083.35 frs., against 596,172.68 frs. for 1913, and the unsettled losses to 276,897 frs.

IV.—Popular.

The collected premiums amount to 77,590.65 frs., and the reserve transferred to next year to 370,675.97 frs.

V.—Transport.

The collected premiums amount to 1,251,333.76 frs., of which 318,873.45 frs. are for reinsurance, so that 932,790.31 frs. remain to the company's credit. The paid losses amount to 670,772.26 frs., but the transferred reserve of premiums collected for next year and for the payment of the unsettled losses amount to 609,270.99, or 65.37 per cent. of the premiums, against 56.66 per cent. during 1913.

Our dividend from premiums during 1914 amounts to 23,631,090.76 frs., against 23,146,477.28 frs. in 1913. The net profit of 690,440.15 frs. is to be apportioned as follows:—

10 per cent. to reserve fund	69044.02
Dividend of 32 frs. on 3,750 founders' shares	120000.—
Dividend of 16,250 ordinary shares at 27 frs. each	390000.—
Apportionment according to the bye-laws	88637.37
Carry forward	22758.79

The capital of the company after the above distribution amounts to 27,500,629.02 frs., as follows:—

1. Original capital	2000000.—
2. Reserve and emergency fund	996016.28
3. Reserve premiums from different sources	21585933.17
4. Reserve from unsettled losses	2851096.37
5. Transferred interests and profits for 1915	67583.20
	27500629.02

The growth of our operations and the constant increase of reserves and guarantees are clear from the following figures for the last five years:—

Year	Collected premiums.	Transferred prem. and losses.	Reserve.	Dividend % Founders' Shares.	Dividend % Ordinary Shares.
1910	14932799·18	14163629·10	786473·38	22	18
1911	15590396·46	16057127·31	854850·56	26	20
1912	21276117·07	20752583·70	872687·61	26	20
1913	23146474·28	22788065·23	967312·39	29	22
1914	23631090·76	27737029·57	1063599·48	32	27

GERMANY'S RUINED CREDIT.

In order that neutrals, among whom THE NEAR EAST largely circulates, should know exactly into what a disastrous state German finances have been driven, we reproduce the following article, which appeared on Wednesday in the *Financial Times*. Incidentally it may be recalled that the Berlin banks which concluded the Bulgarian 1914 Loan never fulfilled their engagements, nor are they ever likely to do so.

"There has filtered through to London a brief account of the Kaiser's recent speech in Berlin, wherein he stated that the war would be over in October. The circumstances under which that delivery was made require to be explained in order to get an accurate perspective of the situation in which the German Emperor found himself, for the events leading up to the latest Imperial prophecy regarding the termination of the war are known to very few.

"Economists will scarcely need to be told that, at bottom, German's financial position has been completely undermined by the war, and the situation becomes worse week by week as fresh paper money is created. For months past the great financial interests in Berlin have viewed the situation with increasing alarm, but were afraid to approach the august presence of the War Lord individually. Eventually, representatives of the leading banks and other kindred institutions decided to approach the Kaiser collectively and submit their views. An interview having been arranged, the deputation summoned up their courage and stated bluntly that, assuming the Allies to be defeated, no indemnity payable by them could adequately compensate Germany for the sacrifices she has been called upon to make since the end of last July, while, in the event of a defeat of the Prussian armies, the Fatherland will not regain its economic independence for half a century. These and other similar statements were listened to with polite attention by the Emperor, and the financiers withdrew. The official reply to the deputation is to be found in the speech already referred to, which was designed to restore the confidence of the leaders of German commerce and finance, not only as to the improbability of another winter campaign, which is greatly dreaded, but also as to an early and decisive victory for the Fatherland. Unfortunately for the Kaiser, this plan has miscarried, his optimism regarding the war being distrusted among thinking men throughout Germany, while the financial members of the business community are gravely alarmed at the many unmistakable signs of an impending disaster to German credit all over the world.

NATIONAL BANK OF BULGARIA.

State Bank of Emission. *Established 1879.*

Head Office - - SOPHIA.

Branches at Sophia, Roustschouk, Varna, Philippopolis, Tirnovo, Burgas, Widin, Plevna, Sistov, Sliven, T.-Pazardjic, Shumla, Stara-Zagora, Gabrovo, Dede-Agatch, Xanthie, Gumuldjina, and 70 agencies.

COMPANY REPORTS.

ANGLO-EGYPTIAN OILFIELDS.

The report for 1914 states that the production for the year was 101,911 tons, which figure has proved liable to some deduction on account of a slight percentage of water found in the oil. Two large wells, Nos. 10 and 13, in the Gemsah field, stopped flowing in September and December respectively, owing to water breaking in and overcoming the oil. Efforts have since been made to recover the production, which have been only partially successful. On the Hurghada territory oil was struck in large quantities in Well No. 1, at 1,670 ft., in October, but the well became plugged with sand in a few days. The well was reopened in March this year, but after giving in all about 4,000 tons, the well ceased producing. Steps are being taken to endeavour to recover the production. All efforts to obtain oil in paying quantities in the Zeitieh Field having failed, the territory has been abandoned. The amount expended on this field by this company, including equipment, has amounted to about £20,000 in cash and £214,000 in B shares, which were issued in payment for the concessions and the work which had been done thereon by this company's predecessors. At the present time expenses largely exceed the value of the production, but every effort is being made to increase the output from the concessions already held. The profit and loss account for the period from the beginning of the company to December 31 last shows a loss of £82,909.

UNION FONCIERE D'EGYPTE.

The following is the report of the directors for the financial year 1914-15 :—The year under review had hardly commenced when Europe was plunged into a state of war. The outbreak of war had its immediate effect on the economic condition of this country, which, after seven years of financial stringency and difficulties of every description, was immediately still more adversely affected. The consequences of the war were particularly felt by Egyptian cultivators, as the value of cotton, their staple product, fell to almost one-half of the prices we have been accustomed to see in past years. This was, moreover, the case during the months of October, November, and December, when the cultivator is obliged to sell his cotton to meet his engagements. According to statistics published by the Ministry of Finance, the value of cotton and cotton seed received in Alexandria during the period September 1, 1914, to March 26, 1915, is estimated at £E15,626.014, a falling-off of no less than £E15,877.631, as compared with last season's figures of £E31,503.645 for the same period. The average price obtained for cotton grown on the company's estates was P.T.262,2 the cantar, compared with P.T.411 and P.T.410,5 for the two preceeding seasons. These figures will give an idea of the effect the European war has had on the revenue of the country in general, and in particular on the affairs of your company.

Rural Estates.

Sales.—In consequence of this situation we have not only been unable to make any important sales during the year, whereas our annual sales have in the past always exceeded 400 feddans, but it has even been impossible to complete the sale of the 126 feddans mentioned in our last report owing to the inability of purchasers to meet the registration fees. The total of sales still unregistered amount to date to about 150 feddans. The only transaction registered was for feddans 14-23-04 of our El Alf Estate, in exchange for land at Téda. We have made over to the Government, free of charge, feddans 1-09-23 at Santa for the enlarging and deepening of the public drain, of which work we immediately felt the good effects.

Purchases.—Our properties have been increased on the other hand by feddans 79-05-07, of which feddans 39-18-16 were acquired by expropriation of defaulting purchasers, feddans 10 by amicable repurchase, feddans 21-16-00 in exchange for other land, and feddans 7-18-15 purchase of small parcels of land enclosed by our own property which interfered with our schemes of improvement. The following table shows our land position during the year's working :—

Area on March 31, 1914	Fed. 9,647 Kir. 05 Sahmes 18
Land exchanged and disposed of during 1914-15	Fed. 16 Kir. 09 Sahmes 03
Balance	Fed. 9,630 Kir. 20 Sahmes 15
Expropriations, purchases and repurchases to March 31, 1915.....	Fed. 79 Kir. 05 Sahmes 07
Net area on March 31, 1915.....	Feb. 9,710 Kir. 01 Sahmes 22

Development and Cultivation Operations.—The crop of the company and of its tenants amounted to 4.428,6 cantars, as compared with 3.056,95 for the preceding year. This shows that in spite of exterior causes from which not only ourselves but the whole world is suffering, the properties of the company have progressed normally, as the result of our scheme of improvement, which has been strictly followed. The prohibition of rice cultivation last summer had a very prejudicial effect on the working of the company, for, besides the land improving virtues of this crop, sales of rice in normal years have considerably increased our revenue.

Cattle.—Several cases of cattle plague have occurred amongst our working cattle, and in spite of all precautions we have lost twenty-four animals from this disease. We hope in the future, as a result of steps that we have been advised to take, losses of this kind will be eliminated.

Balance Sheet.

Rural Estates.—This item represents the total area remaining in the company's possession multiplied by the cost price per feddan. We must, however, point out that the present value of our estates is lower than the cost price. The abnormal situation in this country, to which the fall in real estate values is due, renders it impossible to proceed, at the present moment, with a useful evaluation. Your Board, however, will, as soon as the general situation of the country becomes normal, submit to you the steps they propose taking in this connection in the interests of the company.

Development of Estates.—In this account are included all liquid assets existing in connection with our estates, such as rent due, cattle, stores and supplies, furniture, etc., with the single exception of pumping machinery, which is placed in another account, and is subject to the same allowance for depreciation as in the case of cattle and stores.

Cession of Vendor's Right, Land Bank.—This account, as a result of the redemption of capital which has taken place during the year, now stands at £E23,732.485, as compared with £E25.559.183 last year.

Debtors for Land Sales.—The total amount under this heading is now £E79,947.445, of which £E23,732.485 is included in the cession of vendor's right, Land Bank account. On the other hand, the amount of the land sales annuities discounted by the Land Bank for which we remain joint guarantors with the debtors to the bank has been reduced from the original figure of £E77,960, to £E52,068.183, as against £E59,006.170 last year.

Annuities in Arrears.—We commenced the twelve months under review with £E7,936.127 annuities in arrears. During the course of the year we have recovered £E3,798.125, thus reducing this account to £E4,138.002.

Annuities for 1914.—The state of this account reflects the agricultural and financial difficulties under which Egypt is labouring at the present time. Out of a total due to us of £E19,992.013 we have encashed £E6,348.706, leaving outstanding £E13,643.307. A part of this latter sum will be encashed when the autumn crops come in.

Banks and Bankers.—Under this heading are included the debit balances of the different credits granted us by our bankers.

Provision for Unpaid Rents.—We have thought it advisable to strengthen this account by £E4,000 in view of the low price obtained by our tenants for their cotton and the uncertainty as regards the future.

Provision Account for Irrecoverable Interest on Annuities in Arrears.—We have drawn on this account for the sum of £E982.329 for writing off irrecoverable arrears. On the other hand we have transferred a similar sum from profit and loss account to the credit of this provision account, thus maintaining it at the same figure of £E2,000.

Profit and Loss Account.

In addition to our usual allowances for depreciation in the case of cattle, pumping engines, stores and supplies, etc., we have deemed it advisable to allocate the following amounts. 1.—£E6,002.009 for rent, which, as a result of the present situation, it will not be possible to recover; (2) £E714.338 debit balance of legal expenses account; (3) £E3,000, as we have already stated, in strengthening "Unpaid Rent Provision Account"; (4) £E982.329 to maintain at its former amount the provision account for irrecoverable interest on annuities in arrears. Your Board have also thought it advisable, in view of the present circumstances, to modify the system of splitting up and charging off expenditure. The sum of £E4,630, representing certain expenses in connection with cultivation and £E1,228, for interest, have been debited to profit and loss account instead of to rural estates account. As a result of the important sums thus charged to profit and loss account for extraordinary depreciation with a view to clearing the present situation, the year's working closes with a loss of £E14,614.065. After deducting £E4,830.427 borught forward from last year there remains a net loss of £E9,783.638 to be carried forward.

As we are not able, as a consequence of the present state of affairs, to proceed with the sale of improved land, which is the essential object of the company, we have concentrated our efforts on the work of improvement, in order that, when the general economic situation allows, we may proceed with our sales under the most satisfactory conditions. By so doing we are maintaining and increasing, from an agricultural point of view, the value of our estates, and we may state that the results of our efforts have been most satisfactory; this has been confirmed by a counter-valuation made at the

instance of our principal creditor, the Land Bank of Egypt.

Board of Directors.

The following directors retire in accordance with the articles of association, and being eligible offer themselves for re-election: Messrs. Périclès Zarifi, Edouard Bourre and Guy C. Foster. Your managing director, Mr. Leopold Jullien, as well as another director, Mr. Georges Yver de la Bruchollerie, have been serving with the colours since the outbreak of war, and the Board take this opportunity of expressing their heartfelt wishes of good luck and a speedy return.

We also ask you to re-elect Mr. S. Pappo, sub-manager of the Land Bank of Egypt, as auditor to the company at the same honorarium as previously, Lstg. 80.

Resolutions Passed at the General Meeting.

(1) The directors' report and the report of the auditor having been submitted, the meeting adopted the balance-sheet and profit and loss account as set forth in the report, and decided to carry forward to the next year the debit balance of the latter account.

(2) Messrs. Périclès Zarifi, Edouard Bourre, and Guy C. Foster were re-elected to the board.

(2) The directors' fees were fixed at Lstg. 3 for each attendance.

(4) Mr. S. Pappo, sub-manager of the Land Bank of Egypt, was re-elected as auditor for the year 1915-16 at an honorarium of Lstg. 80.

No further business being brought forward, the meeting concluded at 4.30 p.m.

NOTES OF THE WEEK.

Roumanian affairs are much to the fore at the present moment. The misgivings which are compelling the Conservative and Conservative Democratic parties to organize demonstrations in favour of immediate participation in the war have hitherto not been shared by public opinion in the countries of the Triple Entente. It was felt that there could be no doubt about Roumania's attitude, that she had voluntarily committed herself to the Allied Powers by accepting a loan from the British Government, and that in due course she would take the field as soon as the psychological moment presented itself. No doubt the Allies would have preferred her to take the field at the time when her co-operation would have been of the greatest value to Russia. But they would be willing to make every allowance for the Roumanian Government's hesitation, and would not be likely to press for Roumania's support, if her military advisers counselled delay.

A different complexion is put upon Roumania's indecision by the outspoken utterances of the parliamentary Opposition, and by the significant proposals made only last week by the Germanic Powers. On July 7 the Austro-Hungarian Minister in Bucharest offered the Roumanian Government certain concessions in the event of Roumania maintaining her neutrality and allowing Germany facilities for supplying Turkey with munitions of war. Roumania was promised the Bukovina with the River Sereth as a northern boundary; the Roumanians in Transylvania would be admitted into the public service, Brasso (Kronstadt) would be granted a University, and the Roumanian churches would receive greater liberty of administration. In the event of Roumania taking the field on the side of the Germanic Powers, the ceded territory would be extended to Czernowitz, and the line of the Pruth in the north and to the Iron Gates, including Mehadia, in the west; Transylvania would receive complete autonomy, and the Austro-German armies would occupy Bessarabia and hand it over to Roumania. The fulfilment of these conditions was "guaranteed" by Germany.

The full significance of these proposals we discuss elsewhere in this issue. That the Roumanian Government will ultimately reject the Austro-German offer cannot be doubted for a moment, because its acceptance would be an act of treachery to the national aspirations of the Roumanians who are resolved to win their brethren in Transylvania for the kingdom of Roumania. But it is eloquent of the state of mind of the Bratiano Cabinet that it should see nothing incongruous in listening to the Austro-German overtures and availing itself of the period given it for the return of an answer. M. Bratiano has also failed to appreciate the effect that his action is likely to have on the Governments of the Allied Powers. That a responsible statesman in Europe should at this stage be so impervious to the lesson of Belgium and the whole conduct of the war by the two Germanic States as to regard a vague promise given on Germany's "guarantee" as worthy of even a moment's consideration would have been past belief, if the phenomenon had not been supplied by the Roumanian Cabinet. The circumstance does not make it easy for Roumania under her present Government to take up the position in the Balkans which destiny would seem to have marked out for her.

As the weeks pass and Roumania continues in the throes of indecision the agitation of the Conservative and Conservative Democratic parties assumes a totally different aspect. So long as there appeared to be good reason for delay on Roumania's part in participating in the war, any attempt to divide the country into hostile camps in the face of grave issues was to be deprecated. But now it would almost seem as if the Opposition were acting on fuller knowledge than that available to the outside world. Its agitation was, perhaps, prompted by well-founded fears lest, in the absence of emphatic protests, the Roumanian Government should continue to play into the hands of the Germanic Powers until it was too late for the alternative course. From the situation in Roumania to-day it is clear that the Government's action has already had regrettable results. Allegations of bribery are being freely bandied about, and they do not concern only subordinate officials. German money has been sent freely into the country. It is argued that it must have had some definite destination, and the purpose for which it would be spent is known. Those who have set great store on the future of a Greater Roumania are dismayed to find the country exposing itself to such humiliating charges.

Digitized by Google

It will be difficult to acquit the Bratiano Cabinet of responsibility for an unsatisfactory state of affairs. If it were confident of the correctness of its attitude, and of the infallibility of its diplomacy, its first duty would be to the country. The Premier might easily have taken the Opposition leaders into his confidence and obviated even the semblance of divided public opinion. His failure to adopt such a course detracts from his claim to statesmanship, however correct his policy may ultimately prove. It may be that he is acting entirely in Roumania's interests, that delay in declaring war is justified on military grounds, which are known to the Premier, but which cannot be made public. Nevertheless, the subordination of the nation's interests to a desire to establish a reputation for shrewdness can never redound to the Premier's credit. There would be little tendency outside the country to cavil at Roumania's hesitation if her attitude were understood at home. But it is the uneasiness of her own people, and the charges now levelled at the Government and public men, that cause other nations to wonder whether Roumania is really embarked on a settled policy or is merely drifting with no other aim than the personal interests of her rulers.

Bulgaria's attitude remains on the whole less equivocal than that of Roumania. She stands to gain more from a victory of the Germanic Powers; her Government is admittedly Russophobe, and has already used this fact to obtain a loan from those Powers. But Germany and Austria-Hungary will have to finish the war before they can give Bulgaria what she wants; whereas the Triple Entente has it in its power to make Serbia, Greece, and Roumania yield up at once the territory claimed by the Bulgarians. On this ground the Sofia Government is ready to lend itself to negotiations with the Allied Powers. Whether it does so whole-heartedly is another matter. The situation in the Near East, however, is undergoing a gradual change, which is not lost upon the neutral States. So far the Dardanelles expedition and Italy's participation in the war have failed to exercise the effect that might have been expected of them. But the collapse of Turkey's defence will be fatal to German influence in the Balkans. The time for building a bridge over which to retreat from an untenable position has, therefore, arrived for Bulgaria, and, fortunately for the Allies, it coincides with certain diplomatic changes at Sofia. The change in the situation is connected with these bridge-building efforts.

Trials and indictments have figured so prominently in Bulgaria during the last two years, without appearing to lead to any result, that it is not necessary to attach much importance as yet to the threatened prosecution of M. Gennadieff, formerly Minister for Foreign Affairs. M. Gennadieff is head of one of the sections of the old Stambulovist party, and with Dr. Radoslavoff, the Premier, is responsible for the Russophobe tendencies of the present régime, and for the advice tendered by King Ferdinand that Bulgaria should definitely throw in her lot with the Germanic Powers. As a result of the court-martial on the men accused of complicity in the bomb outrage at Sofia Casino on February 13, the Court ordered the prosecution of M. Gennadieff on the ground of his intimacy with one of the criminals, to whom he is said to have paid ten thousand francs. The incident has naturally caused a sensation in Bulgaria; but, apart from the possibility of M. Gennadieff establishing his innocence, the fact that he is technically outside the Government may leave the political situation unaffected.

If certain reports are to be believed, Germany and Austria-Hungary are more concerned for Turkey's fate than the time allowance of a month given to Roumania for an answer to their proposals would indicate. The Turks' shortage of munitions is admitted, and the Roumanian Government is said to have been approached with a view to securing free passage for further supplies from Germany. It is evident that large consignments of munitions have reached Turkey through Roumania and Bulgaria. Even now attempts are being made persistently to smuggle fresh quantities through these countries. The Roumanian Government reports the occasional discovery of illicit consignments, but the Allied Powers have no means of knowing whether these discoveries represent all the efforts made by the Germanic Powers to send supplies to their Turkish ally. Roumania's refusal, however, to allow munitions to pass through her territory openly has undoubtedly embarrassed the Central States and Turkey, and we are possibly on the eve of notable developments at the Dardanelles as a result of the Turks' shortage of ammunition.

The Allied forces in Gallipoli Peninsula have placed further successes to their credit during the past week. They have followed up the Turkish attacks, carried out with such disastrous results at the orders of Enver Pasha, by a counter-offensive which appears to have achieved marked success. Our gains, however, have still to be measured in yards. But the losses inflicted on the enemy have been none the less heavy because they are suffered over a restricted area. It is clearly to the Allies' advantage to press home their present superiority while the enemy is experiencing a shortage of ammunition, and we may hope that no similar shortage has been felt on our side. The presence of Enver Pasha in the Peninsula is only one of many indications that the Turks are realizing that only a supreme effort can now save them. We should like to think that our own task was rendered the easier, but it is clear that, even apart from the Turks' fighting instincts, the military situation will provoke a specially sustained effort on the part of Germany's allies at this juncture.

The Greek Chamber is due to assemble next week on July 20. As was anticipated in these columns, M. Gounaris, the Premier, has remained in office, pursuing a Micawber-like policy both in domestic and foreign affairs. At home, owing to the state of the King's health, there has been little chance of anything "turning up" to disturb his position. German gold has been playing an active part in Greece as it has in Roumania, and similar charges are made of the acceptance of bribes by public men. These domestic details have little interest for foreigners, who merely regret to see Greek public life falling back into the ruts from which M. Venizelos' statesmanlike administration had succeeded in extricating it. In the sphere of foreign affairs Greece's most notable concern has been the fate of Greeks in Ottoman territory. While the Greek population in Asia Minor has been spared the worst excesses to which the Armenians have been exposed, it has been passing through some terrible experiences. Thousands, it is stated, have been evicted from their homes along the coast, and have been deported under distressing conditions to purely Turkish districts. Their fate could not have been worse if Greece and Turkey had been at war. It would have been appreciably ameliorated if Greece's participation in the war had led to an earlier collapse of Turkey's resistance. The Turks make no secret of their intentions, if they are victorious in this struggle, of meting out drastic measures upon the Greeks within their borders. But as the condition on which their threats are based is not likely to be fulfilled, their intended victims will take heart, looking to the Allied Powers to bring them relief.

Yet a second attempt within a few months has been made on the life of Sultan Hussein of Egypt. While he was on his way to attend service at a mosque at Alexandria a bomb thrown from a window fell at the feet of the horses attached to his carriage. The bomb failed to explode, but investigation proved that it was of an extremely powerful character. Sultan Hussein showed the greatest *sang froid*. He continued on his way to the mosque, performed his devotions, and went his customary drive in the afternoon. His assailant, unfortunately, made good his escape. From the Cairo correspondent of *The Times* we learn that the Sultan's second fortunate escape has provoked many Egyptian Moslems to utter *Allah haris es Sultan* ("God protects the Sultan"), and he adds that the dastardly attempt "may have a happy effect on the Egyptian

Digitized by Google

mind, which is already superstitiously inclined, by causing it to cast a supernatural glamour around the Sultan."

A raid on the Aden hinterland by a Turkish force is an incident which calls for further elucidation before we can be in a position to gauge its precise significance. According to the official statement, the Aden Camel Troop was despatched on a reconnoitring expedition in consequence of rumours that a Turkish force from the Yemen had crossed the frontier. The troop reported the presence of the Turks with field guns and a large number of Arabs, and, falling back on Lahej, it was reinforced by the advanced guard of the Aden Movable Column. On July 4 the enemy attacked Lahej several thousand strong with twenty guns. Our forces maintained their position until night, but by this time part of the town was in flames, the enemy was beginning to outflank them, and reinforcements were delayed by water difficulties and heavy going. Accordingly the small detachment at Lahej fell back, at first to Bir Nasr, where the remainder of the Movable Column joined it, and then the whole force withdrew to Aden. Here within the fortified area any attack by the Turks, if they are rash enough to attempt one, can be awaited with entire confidence.

The military significance of the raid is small. A Turkish expedition was intended to co-operate last autumn with the Imam against the Idrisi, the Asir chief, who has been in rebellion for some years. It is possible that this force, without achieving its original object, has been deflected towards Aden for the purpose of Constantinople and Berlin war bulletins. The presence of Arab tribesmen with this force will mean that the Turks were strong enough to command respect in the districts through which they passed, but need not imply the pacification of the whole of the Yemen. Politically, the raid is of some importance. There are a number of protected tribes on the frontier and in the Aden hinterland with whom we have entered into treaty obligations. The Sultan of Lahej is a British feudatory and a loyal chieftain. The Amiri and Houshabi are productive and settled tribes, through whose territory run the principal trade routes to Aden, and we have often felt obliged to give them protection in the past. Their fate and the fate of other loyal tribes at the hands of the invading Turks may well be far from pleasant, and we cannot contemplate complacently a policy of inactivity, however masterful, behind the defences of Aden.

Probably the most effective way of dealing with the problem presented by the Turkish raid is to accept the implied challenge and to encourage Arabia to take its own fortunes in both its hands. We may be able to cope more directly with the marauding force, but to deter the Turks from further activities in these regions it may prove necessary to assist the Arab tribes to remove for all time the few emblems of Turkey's half-hearted authority in the Yemen. In the Idrisi and the Emir of Nejd we should probably find the best material for a new order in Arabia. They have suffered no less than the Aden hinterland from the effects of Turkish misrule, and have been doing their best for some time to cope with the evil. The assistance that we could offer them might be small, but the encouragement that they would derive from it would probably be sufficient for the end in view.

Although there is no reason to doubt that shortage of munitions has been responsible for the withdrawal of the Russians from Galicia, it is noticeable that the reports of the fighting capacity of the Austrians are much more favourable than they were at an earlier stage in the war. The probable explanation is that at the beginning of the war the larger portion of the troops employed were of various nationalities, belonging to outlying parts of the Empire, which were more or less disaffected and, consequently, the more ready to desert or surrender. Not only will the Austro-Hungarian commanders have had better material to draw upon recently, but the stiffening of their armies with German troops will have exercised a considerable effect. In this connection it may be mentioned that while there is a great feeling in England of bitterness against Germany for the outrageous manner in which she has conducted the war, there is an entire absence of this animosity as regards either Austria or Hungary. In fact, there is hardly a Briton who does not regret that circumstances have brought his country into antagonism with these two nations.

STAMBOUL.

Have you ever been to old Stamboul?
It isn't a bit like London town!
Though the mists are there of a morning cool
As you hear an anchor let softly down;
Those are not spires on the Seven Hills
That tryst with the sky would seem to keep,
And it is a voice, not a bell, that thrills:
"Come forth, for prayer is better than sleep!"

If ever you go to old Stamboul
Mark well the pathway by which you came,
For there isn't a street laid out by rule,
And hardly one you can call by name;
And it isn't easy to ask your way
To the pilgrim centre that first allures,
Though the throng that passes has much to say
In every tongue in the world but yours!

You will cross the bridge of the Golden Horn,
Or come by train by the old sea wall;
Or, happier still, on some magic morn
You will come by boat—which is best of all;
And thus, perchance, while afar from land,
Will come a vision to bless your eyes
As out of the blue, at the dawn's command,
A mirage city is seen to rise.

That mirage city becomes more real—
You have seen it oft in a dream before—
How its domes and tapering shafts appeal!
What a glamour of sunshine floods it o'er!
Though one partakes of the varied feast,
As a guest he comes, as a guest remains;
Where it once was West it is now the East,
And mystery clings to the latticed panes.

On the road that leads to the old bazaar,
Where Araby's treasure the world may buy,
What living pictures, what tints there are
To catch the fancy and hold the eye!
The Mecca pilgrims that gravely pass,
Having lived, 'twould seem, since the world began,
Will they tell us the riddle of life? Alas!
Asia veils her thoughts, as her face, from man.

One feels the freedom from worldly strain
By the fountained court, in the mosque's cool shade;
For why should man, with a soul to train,
Mind if a kingdom be lost or made?
If he must work for his daily bread
He does it here in a quiet way,
And one might venture that dreams instead
Make up the sum of an Eastern day.

Let us go together to old Stamboul,
Which isn't a bit like London town,
Though the mists are there of a morning cool
As your boat casts gently its anchor down;
Those are not spires on the Seven Hills
That tryst with the sky would seem to keep,
And it is a voice, not a bell, that thrills:
"Come forth, for prayer is better than sleep!"

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 28.

Honours for Egyptians and Anglo-Egyptians.

His Highness the Sultan made this week his first appointments under the new system of grades and decorations instituted in April last to take the place of the old Turkish grades and orders that, under the previous régime, were in the gift of the sovereign of the country. The Grand Cordon of the Order of Mohammed Ali, the highest decoration, has been bestowed on the Sultan's son, Prince Kemal-ed-Din; his brother, Prince Ahmed Fuad; and his cousin, Prince Omar Toussoun. The Grand Cordon of the Order of the Nile has been conferred on all the Ministers, the Advisers, the Sirdar, the Sheikh El-Azhar, the Coptic Patriarch, and on Boghos Pasha Nubar; the Under-Secretaries of State have received the decoration of Grand Officer of the same order. As regards the grades, a further special distinction—that of Riasset—has been created for bestowal solely on Presidents of the Council of Ministers, and Hussein Rushdi Pasha, the present Premier, has been raised to this grade. The "Imtiaz," which is a new institution under the Sultanate, has been conferred on the other Ministers and on Ahmed Mazloum Pasha and Saad Pasha Zaghlul, the President, and elected Vice-President of the Legislative Assembly; whilst the Egyptian Under-Secretaries, the Procureur-General, and the Governors and first-class Mudirs have been created Pashas, whether they possessed that grade under the old régime or not. Various notables have also had the grades of Bey and Pasha conferred on them. Further nominations are expected shortly, and curiosity is expressed as to the persons on whom the Order of Agriculture and of "El Kemal"—the one reserved for women—will be conferred.

For some time the general public—as well as those most directly concerned—has been somewhat puzzled as to how those holding grades and distinctions granted under the old régime would stand under the new order of things. As mentioned, most of those now honoured already possessed the grades just bestowed on them; but there are also a great many notables and officials who have not had their titles confirmed. No official pronouncement has as yet been made in this connection, but it is understood that the holders of old grades will continue to enjoy the privileges that those grades conferred on them, with this distinction, however, that holders of grades bestowed by the Sultan will always take precedence of those who possess similar titles granted under the old régime.

A Cathedral for Cairo.

The Bishop in Jerusalem's excellent letter to the British Press in Egypt setting forth the case in favour of the erection of a cathedral in Cairo will, it is to be hoped, receive the world-wide publicity that it merits. On more than one occasion I have referred in these letters to the unsatisfactory position of the Anglican community in Egypt, and especially Cairo, as compared with that of adherents to all the sister Churches; and I have dwelt on the dilapidated condition of All Saints' Church and the inadequacy of the accommodation which it affords to congregations to-day. When the question of constructing a new church in Cairo was raised before it was always accompanied by a plea for the creation of an Anglican Bishopric in Egypt. The endowment of a see in this country, which comes within the diocese of the Bishop in Jerusalem, is a matter that has always created controversial discussion, and its close association with the question of the erection of a new church in Cairo has undoubtedly militated in the past against any appeal for funds evoking unanimous support. Dr. MacInnes, however, does not connect his appeal with any question of a bishopric, but bases it on grounds that must enlist the sympathy of all those who have the interests of the Anglican Church and of the British Empire at heart.

He points out that Egypt is now a British Protectorate, and that its capital is not only the biggest city in Africa, but also the sixth largest city in the British Empire. All other Churches have a cathedral in this country. Why should the Anglican Church—the Church of the British Empire—not have a representative building to enable it to take its proper place beside its sister Churches, and to act as "a sign and symbol of our Christian faith to the people of Egypt," who set so much store by a man's outward profession of his faith? The Bishop is modest in his proposals. The building is not to be unduly large, as a mere monument, nor so ornate as to be too costly. It is to be such that it will provide sufficient accommodation for present requirements and allow for possible enlargement in the near future. Internal decoration is to be left to private generosity, and where possible the stones and timber of the old edifice are to be used in the erection of the new. A minimum sum of £50,000 will have to be raised for this project, which has the support of the Archbishop of Canterbury, and the hearty approval of Sir Henry McMahon and of Mr. Olney Arnold, the American Agent in Cairo. The local committee will issue an appeal in the autumn, but it has authorised Bishop MacInnes to bring the question now before the public and to make it known that gifts or promises of help will be gratefully received. Already considerable subscriptions for a period of years have been received, and it is hoped that Anglicans at home and abroad and American Episcopalians will give their support, and that friends of men from the colonies who "have died here for King and Empire will be glad to take a part in our task as a memorial of them and of their magnificent achievement in Gallipoli."

Early Closing in Egypt.

Following on the prohibition of the sale of absinthe and the control of that of alcoholic liquors, the military authorities have now forbidden the sale of the latter between the hours of 10 p.m. and 5 a.m. in the Governorates of Cairo, Alexandria, the Canal, and Suez, and elsewhere within a radius of five miles of any military station, and have at the same time ordered all cafés, restaurants, theatres, and similar establishments to close at 10 p.m. Exceptions with regard to closing are being made in favour of approved establishments, which will, however, not be allowed to sell alcoholic liquors after 10 p.m. Although there had been rumours that this step was in contemplation, the promulgation of the proclamation came as a shock. There has been no little criticism of this placing of the community in "leading strings," especially at a time like the present, when the hot weather is on us, and the pre-midnight period is the time when everyone has been accustomed to remain out of doors. It has been asked why the authorities have waited until the present juncture to introduce this measure, the necessity for which was very much greater—in the eyes of the general public—some three months ago, when all the Colonial troops were here. No doubt the military powers that be have very good reasons for taking this step to-day, and so long as exemptions are made wisely and forbearingly, we, as loyal subjects, must acquiesce therein, since the measure is presumably for a wise purpose. It is, however, amusing to note that this forcible early closing, combined with the half-lighting of the streets—due to motives of economy—has firmly convinced the natives that there are Zeppelins in Syria, and that the latest proclamation is a precautionary measure cloaked in diplomatic language!

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, June 28.

The Reign of Terror.

The reign of terror in Constantinople seems to be on the increase, and little mercy is shown to those who have the misfortune to fall into the clutches of the police. Life in the city is anything but pleasant just now, and removal from town to country residences is impossible this summer, as no boats are running to the Princes' Islands, very few steamers are plying on the Bosphorus, and no Christians are allowed to reside beyond Therapia. Local train services are very irregular, there is great nervousness about crossing even to Kadikeui for fear of submarines, and the boats are plentifully supplied with lifebelts.

To add to the misery of the people, one of those conflagrations which occur from time to time in Constantinople took place on the 16th, and hundreds of houses, mostly timber, have been destroyed, the exact number being so far unknown. The newspapers give absolutely no details of the fire, which burnt for twelve hours. The district destroyed is that called Chikour Bostan, lying between the Italian Hospital and Tophaneh. In addition to the wounded and refugees, shelter has now to be found for hundreds of burnt-out families.

As it is, accommodation cannot be found for the wounded, who continue to arrive in large numbers from the Dardanelles, and the mortality is very great amongst them owing to infection and insufficient attention. Many hospitals are full of German wounded.

The Sultan's Health.

The health of the Sultan seems to be causing some anxiety to the rulers of Turkey, as his death might produce a radical change. Enver is no friend of Yussuf Izzedin, but whether the new Sultan would possess the power to adopt a policy inimical to the Germans is somewhat problematical.

There seems to be a continuous arrival of German officers; but on the other hand there has been a general exodus of the Italians, who have been allowed to leave. Many have remained at Dedeagatch, others have gone to Salonika or Italy, and some have come to Athens. Provisions and many necessaries are becoming dearer, especially petroleum, candles, butter, soap, etc. An Englishman writes that he had to pay 73 piastres for a tin of petroleum, but was glad to get it as he had been two days without any. A coal-laden ship occasionally manages to run the gauntlet of the Russian warships. The Breslau went into the Black Sea one night to escort three colliers into the Bosphorus, but her searchlight was seen by the Russian torpedo boats, and as a result she got badly damaged in the stern and had many killed and wounded.

In Constantinople Harbour.

The Germans have erected a wireless station at Zilifdar, and it is said that they are trying to obstruct the passage of the Dardanelles, to prevent the British submarines getting through.

Constantinople harbour presents a very unusual appearance, being practically clear of shipping. Every ship not required has been taken into the Golden Horn, and chains have been placed across the passage ways under the bridges. The inglorious Goeben is loath to leave her snug berth in pretty Stenia Bay, which she has occupied for the past six months.

The British subjects who were sent to the Dardanelles last month were mostly Maltese, and included only two Englishmen, Messrs. Harty and Hoare. By way of showing their gratitude to the Rev. Mr. Wigram for having accompanied them, nearly all these young men, both British and French, attended the service at the Memorial Church the first Sunday after their return.

The latest elimination of things European is the removal of the French names of the streets, for which names in Turkish characters are being substituted.

Very little news comes through from Smyrna, and all seems quiet there, but the misery amongst the poorer classes is said to be intense.

The *Turquie* has been suspended, no doubt with the object of increasing the circulation of the *Hilal*, the French paper published by the proprietors of the *Tanine*. The object of this paper is obviously to disseminate news from German sources, to ventilate Turkey's virtues and her grievances, and to vilify the British. The editor of the *Hilal* and his confrères clearly acquire their inspiration of hate under the influence of Teutonic finance, but the Hymn of Hate is really being sung by the majority of the Turkish race in a key which is somewhat jarring to the "kultured" ear of the Huns!

British Subjects and the Turks.

The expulsion of Mr. Cyril Cumberbatch from Constantinople is the latest vindictive act of the Turkish authorities. On the outbreak of war with Turkey Mr. Consul Waugh and Mr. C. Cumberbatch were appointed by the British Government to remain in Constantinople, attached to the American Embassy, in charge of the archives. Mr. Consul Waugh was expelled in January, and the Turkish Government, by way of retaliation for the expulsion of their representative from London, last week gave Mr. Cumberbatch forty-eight hours to leave Constantinople. Mr. Scudamore is now the only member of the service remaining in the capital.

The authorities have also exiled to some unknown part in Asia Minor Mr. Tully, the local manager of the Gresham Life Insurance Company, and Mr. James Macgill. The British and French subjects at Beyrout, as well as those who had been concentrated at Aleppo, have been transferred to Urfa; and there appears to have been some truth in the rumour respecting the Smyrna residents, as it is now reported that forty British and forty French subjects have been exiled from Smyrna, but, thanks to the clemency of the Vali, the place selected for their exile, it is said, is only a short distance from Smyrna. It is rumoured, however, that they have been allowed to return to Smyrna. It is not improbable—in fact, it is daily expected—that some of the English in Constantinople will sooner or later be sent away.

The crews of the British submarines who are prisoners of war have been sent to Afion Karahissar.

The British Seamen's Hospital.

The British Seamen's Hospital in Constantinople is in danger of falling into the hands of the Turks, owing to the British Government's refusal to provide the necessary funds for its upkeep. The income of the hospital is derived from a tax on British ships visiting Constantinople, and, in fact, the present fine building was built out of surplus funds.

Since the outbreak of the war with Turkey the hospital's income has almost ceased, and as the fees obtained from private patients are insufficient to cover the expenditure, the British Treasury, under whom the hospital is placed, was appealed to for the necessary funds to enable the institute to pay its way. This appeal does not appear to have been favourably received to its full extent by the Treasury, and instructions were sent to Dr. McClean to close the hospital and proceed with his staff to Athens for orders. The result of such a course would be disastrous, as the Turks would take possession not only of the hospital, but also of the Consul's residence, the Sailors' Home, and the prison, and incalculable damage would be done. The position has probably not been appreciated by the Foreign Office, or such a "penny-wise-pound-foolish" course could hardly be adopted. To run the risk of seeing thousands of pounds' damage done to valuable property for the sake of a few hundreds is inconceivable, and it is to be hoped that the representations which have been made to the British Government will result in a satisfactory solution of the difficulty. In the meantime some of the members of the British colony in Constantinople have offered to provide funds to keep the hospital going rather than see it fall into the hands of the Huns and the Turks. The hospital is under the protection of the American Red Cross, and it is thanks to them that it has not been interfered with by the Turkish authorities.

Effects of the War.

Constantinople is still in possession of sufficient coal for present requirements and small supplies continue to arrive. Although the steamboat and train services are very considerably reduced, yet there still appears to be enough coal for the gasworks, electrical stations, flour-mills, and for industrial purposes, and, of course, for the fleet. The electric tramway service is maintained and the telephone service is working satisfactorily.

Considerable destruction has been done to the parks of the British and French Embassies at Therapia, handsome trees having been cut down to make a clearance for gun emplacements.

The mail service between England and Greece has always been unsatisfactory, but since Italy joined in the war the service has become considerably worse. The last London paper received here is that of June 21—over a fortnight ago.

A Postscript.

Since the above was written the Rev. Mr. McNoughton, the head of the American College at Bahdjedjik (Ismid), has arrived in Athens after having been expelled from Turkey. As a matter of fact, Mr. McNoughton was exiled to Angora in May, where he remained six weeks, until the American Ambassador obtained permission for him to leave Turkey.

On arriving in Constantinople last week Mr. McNoughton was taken to the Central Police Station at Stamboul, where he was detained one night, and he there found Mr. Alfred Sellar also under detention. Mr. Sellar is accused of supplying benzine to the British submarines in the Marmora, but as there is no ground for the accusation, it was expected that he would soon be released.

SERBIAN LETTERS.

(From Our Own Correspondent.)

Nish, June 26.

Effects of the Russian Set-back.

To satisfy the demands of Roumania and the Balkan States, in order to promote accord and secure combined action favourable to the Entente, is no easy matter. Austria and Germany do not remain passive, and their temporary success over the Russian Army lends weight to their attempted negotiations with the small neutral States. With the Russian advance held up and the subsequent retreat, and with the Bulgarians discontented and formulating claims on Serbia that are unacceptable to the Serbians, it is somewhat difficult for this country, exposed on the north and on the south, to make any move other than completing all needful preparations for entering into action when the moment is propitious, or when forced to do so.

Austrian Peace Proposals.

It is in these circumstances that Austria-Hungary has twice found ways and means of suggesting to Serbia the conclusion of a separate treaty. How this has been done, on what conditions, or with what ulterior object, I cannot say; but one hears of an offer having been made of Bosnia and Herzegovina and of other dazzling proposals.

With Western European States the folly of any such attempts would be transparent. But in these Eastern countries, with which Austria-Hungary has been closely connected and which she knows intimately, attempts that would be absurd in Western Europe may sometimes be regarded as falling within the region of possibilities.

The *Samouprava*, the Serbian semi-official organ, has published an article confirming in the main the above statements, and throwing some light on the manner in which the Serbian Government views such matters. The following is an extract:—

It must be observed that Austria-Hungary twice considered it needful to secure a separate treaty with Serbia, and several times desired to do the same thing with Russia. Although Germany has never pursued that course of action, it is clearly perceptible by the speeches of several German politicians and through the writings of the German Press that peace would be welcome to Germany. In these public utterances it is made clear that Germany is ready to evacuate Belgium and France on the condition of securing for Germany freedom on the seas and an assurance of its colonies, but what is remarkable in these speeches is that there is never any mention made of Austria-Hungary.

All these circumstances are regarded with interest in Serbia. Our hopes and our wishes are centred in Russia, and in spite of her present inability to advance Russia will be able to fill up the gaps in the ranks of her army, while Germany will not be able to do so.

It must be admitted that a depressing effect has been created on Serbian minds by the successful Germanic advance against the Russian forces. The Serbians expected great and immediate results from the invading Russian Army; and just as their expectations were unwarrantably pitched too high, now is their depression unjustifiably great.

A Labour View.

The organ of the Labour Party, the *Radnitchke Novine*, says to-day that, after eleven months of war, we are in the same spot from which we started.

The results of this first period are not at all commensurate with the losses. Many of us thought that this universal war would be ended in a short time, and that a durable peace would quickly follow; but despite the great loss of life and the immense expenditure of wealth no advance has been made; indeed, Lemberg having fallen, the Balkan peoples have good grounds for fearing the Germanic confederation.

We, therefore, appeal to the Government to convoke a special Parliament for the purpose of proposing the formation of a Balkan alliance which would not have for its object an offensive, like the Germanic confederation, and should not follow the colonial policy of the Quadruple Alliance, but should be an alliance only for the defence of its economic interests.

Military Pessimists.

In conversation with a Serbian officer of high position I was told that the military opinion here is that the Germanic forces will soon capture Warsaw, and that from a military point of view the Russian Army will be considered as beaten; that the Germanic forces will then entrench themselves against the Russians, and detach a large force to operate against the French and British forces, to invade Serbia, and join hands with Bulgaria to assist the Turks, and that the Italians against strong and fortified positions would be unable to make headway, and that consequently the Italian Army would not influence the situation.

This reasoning and the previous high expectations and present low depression show the nervous Serbian temper. Success intoxicates and makes them capable of wonderfully gallant deeds, but in the case of misfortune the tendency is to take an extremely gloomy view of things.

The remarks of the Belgrade *Politika* concerning Italy, the previous Germanic intentions, and the present position of the Germanic group, are much more to the point; and it is hardly to be conceived that after the immensely heavy losses sustained by the Germanic group, making gaps which they can with difficulty fill up, they will be able to detach from their forces attacking the Russians a sufficient number to make headway against the French and British forces and successfully to invade Serbia.

The *Politika*, in sober words, states that from reliable quarters it is informed that in the months of March and April there were on the Bosnian frontier 300,000 Austro-Hungarian soldiers, as the Austrians expected a Serbian offensive; but that when Italy entered into action the greater part of these troops were sent to the Italian frontier, so that now there are not more than 50,000 remaining to oppose any possible Serbian action.

Russia and Roumania.

On the subject of Balkan compensations the *Novosti*, published at Nish, prints a communication from a foreign correspondent, which shows that while seeking to satisfy Roumanian demands, Russia is endeavouring to respect Serbian susceptibilities and desires. "The Russian Government," says the *Novosti*, "is prepared to give Czernovitz to Roumania on condition that the Banat is given to Serbia."

Nish, July 3.

Austrian Cajolery—

The unlikelihood of being able to lure Serbia into the conclusion of a separate peace does not hinder the Austrians from cajoling the Serbian public. The Belgrade *Politika* produces a letter taken from the Munich *Post* written by its Vienna correspondent, which it is presumed is not intended as a joke. Possibly the ten months' experience gained in this war has changed the Austrian mind and turned Austrians' bitter feelings into love, or at any rate, caused them to pretend to forget the sentiments they formerly entertained towards Serbia. This remarkable letter runs thus:—

Until now we have had only sympathy for Serbia, and that was warm and honest sympathy; only we could not tolerate the Palace circles. The Triple Entente sacrificed poor Serbia at the time when they were sure of Italy's action. At first they promised Serbia North Albania, Dalmatia, Bosnia, Herzegovina, Croatia, and now, for the love of Italy, all these promises are thrown to the winds. Should Serbia desire a better future there is no alternative for her but to stretch out her hand to Austria and to reconcile herself with Austria.

So much for Austrian plausibility.

—And German Intrigues.

Serbia seems to be as unfortunate in regard to her friends, or one of them, as she is unhappy with her former adversary and would-be friend of to-day. With regard to her ally Greece, all is not such smooth sailing as might be desired.

The semi-official organ *Samouprava* takes us behind the scenes and shows us the German finger pointing to the goings-on in Greece. It says:—

The Serbo-Greek friendship, which until now has shown good results in the interests of both States, begins to be menaced by a threatening if not an unexpected danger.

In Athens and in Salonika some newspapers begin to complain, stating that Serbia's friendship is not advantageous to Greece,

Digitized by Google

and that on account of the nation's future a friendly understanding with Bulgaria is desirable.

The *Samouprava* proceeds to point out that it requires no keenness to observe that behind this deplorable movement the finger of those States may be found whose interests it is to set the Balkan States one against the other. One cannot forgive Austria-Hungary for always having endeavoured to sow the seeds of discontent between the Balkan States. The misunderstanding and disagreement between Serbia and Bulgaria in 1885 was the diplomatic work of Austria-Hungary, and so was also the second Balkan war. Germany's finger is seen in the resignation of M. Venizelos, and after this event the friendship between Greece and Serbia began to be troubled; but, in spite of all, the Greeks at the last election asserted their confidence in M. Venizelos:—

One may be astonished at Germany's attempt to disturb friendly relations between Greece and Serbia, which serve as a guarantee for a brighter future of both countries. It is incomprehensible to seek to draw Greece towards Bulgaria, to whom the Greek people are averse, and which will lead to a collision with our allies. . . . Without doubt this movement in Greece proceeds from Germany, and to prevent the success of this German policy it is necessary that both Greece and Serbia should manifest jointly an agreement from which both countries could only hope to obtain the best results.

Serbia and Albania.

In Albania Serbian civil institutions are being introduced into those places occupied by Serbian troops, and the roads from the Serbian frontier leading to Durazzo are being put into good order.

Nishava Floods.

Yesterday, at Nish, the river Nishava rose three metres higher than usual, but this morning fell suddenly, nearly to its normal state. The heavy and continuous fall of rain had a more disastrous effect at Pirot and that neighbourhood where the Nishava overflowed. The bazaar quarter at Pirot is quite under water, and in other parts of the town the water entered the church and flooded the Post street. The water has commenced to subside. Fifty houses have fallen, but there is no loss of life.

A few days ago 40 aeroplanes passed through Nish, forwarded by way of Salonika to Roumania.

The Ministry of Agriculture and the Ministry of War have resolved that prisoners of war may be used for field work in the villages of Serbia, and compensation be paid them.

On the railway line Uskub-Salonika a restaurant car has been attached to the fast trains running in both directions.

BULGARIAN LETTER.

(From Our Own Correspondent.)

Sofia, June 29.

The Political Situation.

There is no change in the political situation of the country. Up to the time of writing the Quadruple Entente has not replied to the Bulgarian Note of the 15th inst., asking for explanations regarding some of the proposals put forward by them on May 29; but a cordiality and intimacy in the relations of this country's Government and those of the Entente Powers is noticeable. The Bulgarian military authorities are exercising great vigilance in regard to the transport of goods for Turkey, and are detaining everything that is regarded as contraband of war. Last Saturday eight railways trucks laden with hydroplanes, which had come from Germany by way of the Danube as far as Lom and had been there loaded on to the trucks for transport to Turkey, were stopped at Harmanly by order of the Prime Minister, Dr. Radoslavoff, and were confiscated by the Bulgarian military authorities.

Public attention during the past week has been largely occupied with the trial of the seven individuals, under the leadership of Vikenti Pop Anastoff, who committed the bomb outrage at the Casino last February, made an attempt on the lawyer, M. Dobrinovitch, and plotted against the life of the King. From the course of the proceedings it is not yet quite clear whether all the malefactors have been caught, or to what extent the prisoners now on their trial are culpable. All the journals are full of details of the trial and pictures of the prisoners and the witnesses.

M. Steg in Bulgaria.

Some days ago, M. Steg, formerly French Consul at Salonika, and author of the Reval reforms, which aimed at securing autonomy to Macedonia, arrived here. He had interviews with all the leading politicians here, and it is presumed that he was entrusted with a special mission of some kind. He also met many of the Macedonian leaders with whom he was in touch during his consulship at Salonika. Last night he left again for Paris.

British Warship at Dedeagatch.

On the 26th inst. a British cruiser called at Dedeagatch and took on board the King's messenger, Mr. Sykes, and the British Consul at Dedeagatch, whom she conveyed to the headquarters of the Allied Fleet. She returned not very long afterwards, and after landing the officials sailed once more.

The Allied Fleet has searched several Greek steamers in the neighbourhood of Dedeagatch, and is reported to have made several hauls of contraband goods destined for Turkey. The fleet is showing great activity in this respect.

Patriotic Societies' Activities.

Last Saturday the Dobruja Society handed in at the Foreign Ministry a memorial on the subject of the concessions that Roumania ought to make to Bulgaria.

On Sunday the National Committee here held a meeting at which the question of what the future boundaries of Bulgaria ought to be was discussed.

Russia's Black Sea Fleet.

On the evening of the 27th inst., a Russian squadron of 23 vessels was seen from Varna. They were also sighted off Emine Burun, and towards which one division was making, while the other was heading in the direction of Kustendil. Off Emine Burun they fell in with two Turkish vessels coming from Kustendil and sailing along the coast. These they stopped, and, finding they were carrying war materials, took their crews off them and then sunk them. Shortly after they fell in with two more Turkish boats, which, being found also to have munitions of war on board, were treated in the same manner.

Opening of Sofia Jockey Club.

Recently, under the auspices of the Ministry for War and the presidency of General Janeff, a society was founded for the purpose of promoting horse-breeding and encouraging racing in the country. It was styled the Jockey Club; and last Sunday, in the presence of a large crowd, the formal opening of the club took place at the race course. The ceremony was attended by the Crown Prince Boris, Prince Cyril, and the Royal Princesses, the Royal suite, Dr. Radoslavoff, the Prime Minister, General Fitcheff, the War Minister, Dr. Dintcheff, the Minister of Agriculture, and other Cabinet Ministers, generals, many deputies and leading citizens. General Fitcheff performed the opening ceremony, by cutting a cord and declaring the club opened, and there were then races by officers of the army, and a distribution of prizes to the winners.

"Try a chota peg o' Perfection.
"Notice how mellow and silky it is?—not a touch of 'bite' or harshness. That's the effect of maturing in sherry casks. Makes it a little darker in colour, too.
"You'll order a case of Perfection?
"Well, everyone of 'ours' is doing the same. They all like it. Here's a toast, old man. Drink up—To Perfection, the best whisky in India, from the everlasting hills to the plains."

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, June 20.*

Negotiations with Russia.

M. Bratiano had promised a reply to the Russian proposals by the 14th inst. This he subsequently postponed, as he wished to have the assistance of all the Cabinet in preparing his answer, and M. Costinescu, Minister of Finance, was absent. A Council of Ministers was therefore called for last Friday, when the terms to be proposed to Russia were decided upon, and a copy of the communication was handed to the Russian Minister. But no information regarding the terms has been allowed to leak out, and the public is as much in the dark as ever regarding the likelihood of Roumania making a move.

Two articles published in foreign journals are causing some comment here. One, in the *Idea Nazionale* (Rome), states that Roumania, after acting as though she intended to follow Italy's lead, has taken up an ambiguous position which may lead to a surprise that would be as disagreeable to the Entente as it would be to the Roumanians across the border. On the other hand, Bulgaria, which has many times declared its wish to remain neutral, now appears (says the article) disposed to join the forces of Right against Might, and is deterred chiefly by the attitude of certain Balkan countries. "No more illusions," the article concludes. "Let us leave these two countries to determine their action in their own particular interests!"

The second article is in the *Journal de Genève*, and in it the writer, M. Georges Lorand, recalls the imposing manifestations he witnessed in Bucharest not long ago, and the remark made to him by M. Filipescu: "You can tell Italy and France that Roumania will not be late at the rendezvous." To-day all is changed. At Bucharest there is procrastination, and excuses are put forward to prevent the Entente from noticing the offers made to Roumania by emissaries of Hungary; whereas Bulgaria, if formally assured of that part of Macedonia which she desires, would march on Constantinople.

The writers of these articles ought not to forget that when M. Lorand was in Bucharest Russia was advancing southwards in what seemed to be an irresistible manner, which she is no longer doing; and that for Roumania to advance alone into Transylvania to-day might spell disaster. Her forces and supplies are not inexhaustible, and those who formerly condemned M. Bratiano's policy of moderation are to-day inclined to consider it at least a wise one.

More Attempted German Smuggling.

Yet another attempt on the part of the Germans to smuggle ammunition through Roumania has been detected by the authorities, whose smartness and zeal afford the best proof of the baselessness of the rumours regarding ammunition being allowed to pass. On this occasion eight trucks supposed to contain only material for reinforced concrete work were found actually to contain shells. Trucks, goods, and ammunition have all been confiscated.

"Undesirable Aliens."

Reports have been published that the Ministry of the Interior intended to remove forcibly all Jews from villages on the borders of Moldavia to the interior. This is incorrect. The Ministry of the Interior issued an order that all *foreigners* and *foreign Jews* in the localities referred to and engaged in the business of grain brokers or otherwise, and likely to "perform acts detrimental to the country," should "remove themselves" from those districts. This order is directed against a host of undesirables engaged in the grain business, who have flooded the country of late, and is intended to prevent the smuggling of grain across the frontiers. The peaceful and hardworking Jews on the frontier have nothing to fear.

Two Fiascos.

The public meetings called for last Sunday rather "fizzled out." That announced for the morning, which was known to be of Socialist origin, was suppressed, a collision taking place with the police in an outlying district of the town, some stone-throwing being indulged in, and a few arrests being made. The "anti-war demonstration," arranged for the afternoon by supporters of M. Marghiloman and M. Carp, was a dead failure. At three o'clock, the hour for which it was announced, about forty people, mostly boys, had assembled, and an hour later, when perhaps a score more had gathered, a few flat speeches were delivered, and then the grandoise meeting came to a tame conclusion.

* Delayed in transmission.

Bucharest, June 27.

The Negotiations with Russia.

A meeting of the Cabinet took place on Wednesday, when both the internal and external affairs of the country were discussed. With regard to the former, M. Bratiano declared that all demonstrations on the part of the Opposition would be out of place at the present moment, and that he intended to discourage them by all means. The situation to-day, he said, called for the suppression of all gatherings that might embarrass the Government. In this connection there was a discussion whether the great meeting called by the leaders of the Opposition for this afternoon should be allowed to take place, and though nothing has been done to prevent its being held, the Prefect of Police has issued a notice that no processions are to be allowed, and that persons attending any meeting must disperse quietly as soon as it is over.

As regards foreign policy, the President announced that two days earlier he had received a communication from Petrograd, to the effect that M. Sasonoff was inclined to accept Roumania's conditions regarding the Banat, also as to the Pruth as a frontier line up to a certain point; but that in regard both to diplomatic negotiations and to military arrangements treaty was necessary, which could not be concluded for at least two months. On this account partial dispersal of the troops under arms would be proceeded with, and longer military leave could be granted.

The above is the account of the meeting given by the *Dimeanatza*, and generally credited. As supporting the belief that movement, at any rate on the part of the present Government, is unlikely during the next two months, a tale now going the rounds may be quoted. This is to the effect that M. Jacques Negruzzi, recently elected Secretary to the Roumanian Academy, being received in audience by King Ferdinand a few days ago, asked if he could safely go abroad for the benefit of his health, to which the King replied: "You can go with an easy mind for at least eight weeks."

On Friday the *Dimeanatza* stated that it was possible to affirm that negotiations had made progress, that agreement had been reached between this country and Russia as to the Bukovina frontier and Marmoresch, and that the only point remaining for discussion concerned certain portions of the Banat. The journal adds that great secrecy is being observed as to the negotiations.

It is worth while pointing out that hitherto the question of military arrangements had not been mentioned, but it was naturally imagined that no military move on the part of this country would be made without a preconcerted plan by the Russian and Roumanian General Staffs.

An Austro-German Canard.

A few days ago M. Maiorescu, the former head of the Conservative Party, went abroad for the sake of his health. Now a strange rumour is current that the real object of his journey is nothing less than a diplomatic mission to the Austro-Hungarian Government with the object of putting forward—with M. Bratiano's full consent—proposals for this country siding with the Teutonic Powers, either openly, by attacking Russia, or covertly, on "friendly neutral" lines. M. Maiorescu is said to have been authorized to negotiate on the basis that Roumania shall receive the Bukovina and occupy Bessarabia in return for her active help, or shall be rewarded with the Bukovina only for friendly neutrality. It is also stated that he was entrusted with this mission only after King Ferdinand had received from Berlin indications of what Roumania might hope for as a reward of her action. There can be little doubt whence

Digitized by Google

this rumour emanates, and it is worth noticing merely as showing to what depths the Austro-German agents are prepared to sink, or to make others sink if possible, in order to bolster up their own tottering power.

Food Problems.

The Government has purchased 30,000 tons of maize for distribution amongst the families of the men called up for military service, many of them being in want; and the grain is being despatched as quickly as is possible in view of the congested state of the railways.

The authorities have had under consideration the question of bread supply in the event of war. The Minister of the Interior has arranged with the millers of this city and its neighbourhood for the purchase of 30,000 tons of wheat flour of a particular quality, and similar measures are being taken in most other towns.

War Material from France.

Forty aeroplanes ordered in France some time ago for the Roumanian Army have just arrived at Bucharest, having been shipped to Salonika, and been brought on thence by train, by way of Nish. Part of a large number of armoured motor-cars, also ordered in France, have already arrived in Salonika, and the balance of the number are on their way. The want of flying machines was at one time given as one of the reasons for Roumania's delay in mobilizing.

ROUMANIA AND GERMAN "SMUGGLERS."

With regard to the renewed efforts which are being put forward by Germany to induce Roumania to permit the passage of arms to Turkey, the Roumanian Government, Reuter's Agency is informed, continues successfully and energetically to prevent all arms from Germany and Austria intended for Turkey or elsewhere from passing through Roumanian territory.

HOSPITABLE ROUMANIA.

(From Our Own Correspondent.)

Bucharest, June 20.

Some time ago a certain Anastase Lascaridis, of Constantza, who owned a vessel named the Chios, loaded the steamer in Bulgarian ports for Constantza and Constantinople. After discharging the former part of the cargo, he calmly announced to the shippers for Constantinople that unless extra rates were paid their goods would be unloaded at Constantza. Some of these goods belonging to Italian merchants, the Italian Consul intervened, and this so angered the Greek that he attacked the Consul in the street.

Thereupon the Roumanian authorities promptly took up the case, which came before the Courts a few days ago, when Lascaridis was condemned to pay a fine of 700 frs. immediately, or to go to prison for a fortnight. Following this, the Prefect of Constantza reported on the case to the higher authorities at Bucharest, with the result that Lascaridis was ordered to be deported, and the following day he was escorted across the Russian frontier, having elected to be sent into Russia.

Lascaridis is a fair type of a large class existing in Roumanian ports, the hospitable laws of this country permitting practically anybody to settle here provided that his passport is in order. He is a Greek by birth, but an Ottoman subject, and he came to Roumania in January. His record for commercial smartness would, it is said, be hard to beat, even in the Orient. His vessel, the Chios, he lately sold to the Russian Government for 700,000 roubles. It is to be wished that Roumania's regulations as to the examination of the antecedents of would-be immigrants were more strict. This country is a haven of refuge for all comers, as Great Britain is in the West, and it is a well known fact that in Roumania no one need ever starve or lack means of living.

The following item, dated June 30, from Government Cottage, Troödos appears in the *Cyprus Gazette*:—

Lady Clauson, as the representative in Cyprus of the Red Cross Society and Order of St. John, appeals for the following additional comforts for distribution among the sick and wounded soldiers of the Convalescent Camp which has been established on Troödos:—

Games of any kind, playing cards, cricketing requisites, footballs, newspapers, books, writing paper, envelopes, indelible pencils, slippers, razors, combs, cigarettes, tobacco, pipes, sweets, etc., etc.

BRITISH REFUGEES IN ATHENS.

The attention of ex-British residents of Constantinople at present in Athens is drawn to the fact that "The Near East" is on sale every week at M. Th. Vafiades' Bookstore, where subscriptions are also received.

CYPRUS NOTES.

(From a Correspondent.)

Cyprus, July 2.

Arrival of Dardanelles Wounded.

The first convalescent wounded from the Dardanelles arrived last week on an armed British India liner now engaged on transport duty. The weather was very hot, and the men must have found the journey up to Mount Troodos a somewhat fatiguing one, but the cooler conditions when once on the top will no doubt have compensated them for the discomforts en route. The first batch were landed on Friday, June 25, the rest following on the three succeeding days. They were entrained at Famagusta in the cool of the morning, and were welcomed by the few English residents, who provided them with lemonade, cigarettes, and tobacco, and gave them a cheery send-off. The men had little or no kit, and on being asked what they specially wanted the reply was generally "handkerchiefs." These were accordingly obtained and provided. To meet a few English people must in itself have been pleasant to these weary warriors and have seemed like a touch of home.

A run of an hour and a-half brought them to Nicosia, where again they were received by their fellow-countrymen, who daily come down to the station and provide the travellers with breakfast and a variety of necessaries. Thus provisioned and heartened, they started off on another two hours' railway run, to be followed by some eighteen miles' stiff climbing performed in motor ambulances, which awaited them at Evrykhou, the railhead of the newly completed extension. The arrangements for their reception and medical attendance on Troodos, which are under the direction of Captain G. A. Williamson, will, without doubt, be fully adequate. The change of temperature at that altitude may perhaps try them a little at first, and additional clothing will presumably be issued to them. Some 200 convalescents are now here, to be followed by further numbers, up to, possibly, 1,000. Among the present arrivals is Lord Howard de Walden. Several of the men look much pulled down by actual wounds and sickness, and all are suffering more or less from the shock and strain of battle as conducted under modern conditions of warfare.

The Forged £1 Notes.

Forgeries of the new £1 bank notes have lately taken place, and the police have been actively engaged in tracing the culprits. The notes were found to emanate from Limassol, where a good haul of these forgeries has been made. Some half-dozen persons are under arrest, and the authorities are now believed to be in possession of the main details. The actual printing appears to have been done in Egypt. All notes of this issue are now being called in.

(From a Correspondent.)

Cyprus, July 2.

When the convalescents who arrived by rail from Famagusta reached Nicosia on the way to Mount Troodos they found a welcome surprise which was greatly appreciated. Refreshments and cigarettes were provided for all. This was due to the energy of Miss Olive Holmes, daughter of the President of the District Court of Nicosia, who made the very successful arrangements. A committee of ladies has now been formed in order that the same hospitality may be afforded to other convalescents who will arrive during the summer season. The convalescent Camp is under medical charge of Surgeon-Major G. A. Williamson, who thoroughly knows the island. He was for some years District Medical Officer at Larnaca, where he earned a high reputation.

The Cyprus garrison of the Malta Regiment now quartered at Polemidia have applied for permission to be moved to the depôt at Limassol. No doubt this would be preferable both for men and officers, as sea bathing and other attractions would be more easily available. The Polemidia Camp is three miles from Limassol, and although it stands about 250 ft. above sea-level, the heat in summer is intense in wooden huts and tents.

Few civilians have so far arrived from Egypt. It was expected that there would be a large influx of visitors.

LETTERS TO THE EDITOR.

SERBIA AND THE MACEDONIAN BULGARS

To the Editor of THE NEAR EAST.

Sir,—Having been much occupied in other ways, I have only noticed rather late in the day a letter of Mr. P. M. Mattheeff in your issue of July 2, calling attention to a statement of Mr. Janitsch regarding my own views on the question of the language and ethnography of the Macedonian Slavs. He quotes Mr. Janitsch as having attributed to me a denial of the view that the Macedonian Slavs are Bulgars.

Allow me, therefore, to say that such an opinion has never been expressed by me either publicly or privately. That there is a Serbian element in the Uskub district may be freely admitted. The traditions and historic monuments of the upper part of the Vardar Valley are pre-eminently Serb. Even the ruins of Marko Kraljevich's Castle at Prilip and the legends that still cling to them must count for something.

But when it comes to the language spoken by the great mass of the Slav population of Central and Southern Macedonia, the fact that it stands linguistically nearer that of the present inhabitants of Bulgaria than that of Serbia is patent to anyone who has travelled through the country. To take a single crucial instance, according to my observations, the use of the article at the end of the word, as in Roumanian and the Scandinavian languages, is universal. And this particularity, shared by the Slavs of the Bulgarian kingdom, may itself be of deep-rooted historic import if, as seems possible, it is to be connected with the great absorption by the Bulgars of Rouman elements. Judging by names like Sabin, some even of their earliest princes were of Latin speech. Their later Empire was frankly "Bulgaro-Vlachian."

It is hardly necessary to recall the fact that the Bulgars owe their name to a conquering horde of Finno-Ugrian race—akin, that is, to the Magyars—who first gave unity to the amorphous "Slovene" mass. But the extraneous ingredient was so quickly assimilated that by the ninth century even the Bulgarian rulers bore Slav names. Already in the tenth century—in the great days of Tsar Samuel—the centre of gravity of the Bulgar State lay on the Macedonian side. His capitals were Prespa and Ochrida, and even the Byzantine conqueror, Basil, "the Bulgarian-slayer," allowed that city to remain the centre of an autonomous Bulgarian Church. Macedonia again formed an important province of the revived Bulgarian Empire of Asên and Peter.

The ephemeral conquests of the Serbian Tsar Dushan could not radically alter these conditions. To the Greek, as, later, to the Turk, the Slav population of Macedonia has remained "Bulgar." The townsfolk and villagers—as I could myself ascertain in the course of long explorations through the length and breadth of Macedonia, carried out *sine ira et studio* before the opening of that dark passage in modern history which has been for its people one long martyrdom—called themselves Bulgars, and their political aspirations were directed towards their brothers east of the Turkish borders.

They have, indeed, been continuously "Bulgars" both to themselves and their neighbours for at least a millennium, and the theory advanced that this national sense has been artificially created in recent years by Bulgarian schoolmasters or Exarchist priests is too grotesque to need refutation. However much it may have been quickened by influences due to Bulgarian emancipation beyond the frontiers, its roots lie far deeper.

At the same time the Serbian view is in itself not difficult to understand. It is easy to point out that, though in its main "shibboleths" the Slav dialect of a large part of Macedonia conforms to Bulgarian usage, there are some features that may be construed as showing a nearer affinity with forms in use in the Serbian area. This is the more intelligible when it is remembered that the Serbian element in many southern and eastern districts is superposed on an earlier Bulgaro-Slovene stratum. So, too, certain customs, such as the Macedonian "slava," find their nearest parallels on Serbian rather than Bulgarian soil.

From this it is but a step to the political calculation that it would only need a generation of Serbian schooling to correct the grammar of the Macedonian "Bulgars" and convert them into good Serbs. The victories of Kumanovo and Monastir, though won against the Turks, after all only reopened paths which Tsar Dushan had followed after his crushing overthrow of the Greeks and Bulgars with their Tatar allies, at Kustendil. Meanwhile, the compromise that might have been possible between the rival Slav claimants for Macedonia has been put off indefinitely by the results of the last Balkan War.

The Bulgarians should recognise that the present is no time for the assertion of historic or ethnographic claims on the Macedonian side, however well founded. If they are wise they will understand that the pushing of extreme Serbian claims on that side has been the natural consequence of the exclusion of the Serbs and their nearest kinsmen from their legitimate field of expansion to the north-west. To-day an integral part of the policy of ourselves and our Allies is the realisation of this Greater Serbian programme by the liberation of the Slav peoples between the Adriatic and the Drave, and the eventual formation of a Jugo-Slav State that shall include the Croats and Slovenes of the North-West as well as the Serbs proper.

It would be by loyally aiding in this larger work of Slav liberation that Bulgaria would earn her best title to a liberal revision of the Peace of Bucharest. At the same time Serbian statesmen should be the first to realize that the attempt to Serbianize the Bulgar population of Macedonia, if persisted in, will, in certain by no means impossible contingencies, supply a dangerous precedent for an Italian and Italianizing domination in North Dalmatia and Eastern Istria.

It is clear that in present circumstances the Allies cannot deprive Serbia, who has fought so gallantly for the common cause, of any territory which is by treaty right hers. But should Bulgaria assist them in making possible the foundation of a Jugo-Slav State on a national basis it is as certain as anything can be in human affairs that they would demand as a condition precedent a just compromise on the Macedonian side.—I am, etc.,

ARTHUR EVANS.

Youlbury, Berks, near Oxford, July 12, 1915.

THE FUTURE OF CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—"Briton's" letter on the question of Cyprus in reply to mine was of some interest to me, although the identity of the writer was concealed. He does not seem to have studied the history of the Cypriot question much. Is he not aware that in 1878, by the discreditable Treaty of Berlin, which left the Sick Man of Europe in the possession of most of his forfeited property, Great Britain acquired Cyprus by a process which in legal parlance might be described as "blackmail"—that is to say, for thirty-five years she wrung taxes out of the Cypriots to pay tribute to Turkey? Otherwise the Cypriots, like the Cretans, would have secured autonomy and subsequent union with Greece. When we found that "Codlin, not Short," was our friend (I mean Russia, not Turkey), a point that Mr. Gladstone found out forty years ago, we "annexed" Cyprus, and refused to pay the blackmail any more; we had no regard in this for the wishes of the Cypriots, the vast majority of whom have always desired to be united to Greece.

As an Imperialist myself I disagree strongly with "Briton's" inference that the inhabitants of our Empire would not be sorry to see the last of us—if I understand him aright; the wonderful response of our Empire in this war disproves this assertion. When I suggested the cession of Cyprus on the grounds of nationality and economy, strictly in return for concessions offered to Bulgaria in Macedonia, I held that Cyprus was on a different footing, and its loss would not be of very great consequence to us. I do not suggest that Cyprus would profit by the change, but if the majority in Cyprus (the Mussulmans will be welcomed elsewhere under the British flag) prefer union with Greece, let them have it subject to the immediate intervention of Greece beside Bulgaria and Serbia. We are likely to acquire in this war most of the German possessions in Africa and Oceania, as well, perhaps, as Mesopotamia. Are we to hazard all this because we refuse to make a concession to legitimate claims of nationality? (For the intervention of the Balkan nations is bound to shorten the war.) When "Briton" disputes my statement that "famines in Cyprus are frequent," he has evidently never been there or spoken with people who have. He might as well assert that malaria is unknown on the Gold Coast.

We shall need all our money for developing our trade and new colonies and in repairing the damages of the war. It is not worth while for us to waste our money in making the island of Aphrodite habitable for the British colonist, and in depriving Hellas of a legitimate field of expansion. The Ionian Islands are as fertile as Cyprus, but we have never had cause to regret Mr. Gladstone's action in handing them over to Greece in 1863. There is even more cause now to be generous to Greece for the reasons which I have enumerated.

Mr. Houston is an able authority on Cyprus, but I held that this was not the time to discuss the question, and this shall be my last word on the subject.—I am, etc.,

KENNETH LEDWARD, F.R.G.S.

THE LATE MR. C. D. COBHAM.

To the Editor of THE NEAR EAST.

Sir,—Two literary men, at one time engaged on the same studies in a remote quarter of the world, have lately passed away with little more than a death advertisement in the newspapers. I trust that both these scholars will be appropriately recorded hereafter by some one who knew them personally.

Claud Delaval Cobham, C.M.G., and the Rev. John Hackett, D.D., were friends and contemporaries in Cyprus during the latter quarter of the nineteenth century, and they produced between them almost the only books of any value on the history of the island in the English language. The "History of the Cypriot Church" is in itself a monument.

I have not seen any biographical notice of Dr. Hackett, and only an inadequate and unsympathetic account of Mr. Cobham in *The Times* of June 4, 1915, under the grotesque title, "The Pasha of Larnaca"—a very invidious designation.

Mr. Cobham died in April, Dr. Hackett about six weeks later.

Mr. Cobham was District Commissioner of Larnaca for about thirty years, during which time he contributed much towards the scientific study of Cyprus, and was famous for his hospitality to students from the Universities and the School of Athens visiting the island. When the Cyprus Exploration Society was started in 1887, he contributed financially towards several special works, and employed a German photographer named Richter as overseer; this is perhaps the foundation of *The Times* correspondent's statement that he was a "pro-German"—another invidious assertion.

Mr. Cobham was a remarkable man to find in such a solitary position as Cyprus. Evidently attracted by the historical associations of the island, he accepted a Government appointment, with its drudgery and red-tape, as so many have done, as a means towards an end. His excellent qualifications and easy command of all the native languages rendered his duties light, and allowed him to devote much time to literature. He influenced perceptibly the public interest in Cyprus, and his disappearance caused a loss which will probably never be replaced. *The Times* correspondent admits that he was revered by the natives, and he was certainly rewarded with as much popularity as such officials ever receive in such circumstances.

Instead of figuring as a buffoon "Pasha of Larnaca," he was always conscious of his position as the local representative of the High Commissioner appointed to represent his Majesty, and as such he was ably qualified to perform his duties.

Mr. Cobham's house in Larnaca was not "Venetian," as described in *The Times*. It was built by Mr. Treadway, an English merchant of the eighteenth century, and it is very regrettable that it has now lapsed into native ownership, instead of being bought for some public purpose, for which it was singularly suitable.—I am, etc.,

Cyprus, July 1, 1915. G. J., F.S.A.

TANGIER TO TEHERAN.

Nobody can have been greatly surprised by the news of the fighting in the Lahej district. At least, the only possible cause for surprise lies in the fact that the Turks have been able to persuade any Arabs at all to fight on their side; but in view of the character of the tribes on the border of the Aden protectorate that is not very astonishing after all. For they are a lawless, turbulent lot, and while the British have occasionally had to give them a little lesson in manners, the Turks as a rule have been too weak to risk attempting anything of the kind. The result has been that while the Arabs immediately next to our frontier have had some idea—though a slight one—of behaving themselves, those a little farther off, who are yet not far enough off to be reached effectively by the not-too-long Arm of Law and Order of the Turk, have been accustomed to go their own sweet way. Consequently they have been always ready to loot and plunder, and there can be no doubt that it was the prospect of exercising their taste for such things that led them to lend their support—for what it was worth—to the Turks, whom in the ordinary way they heartily dislike and despise.

***

It is obvious that our Aden force found themselves up against a fairly tough proposition, and the "water difficulties and heavy going" which, as the official note states, delayed the advance of part of the Movable Column, were distinct misfortunes for us; while the desertion of the Arab transport followers, though not surprising in the circumstances, made matters worse. But the harm done does not appear to have been serious. Aden is not likely to catch even a distant glimpse of the Turkish forces. And if Lahej has suffered, as it is to be feared it must have done, it is pretty safe to say that the damage done will all be paid for in full when the Turk foots the bill that he has incurred by his folly in listening to the Teuton charmer. I am sorry for the Sultan of Lahej and his subjects, but any losses they have suffered are sure to be made good to them ere long; and the little diversion is likely to cost the Turk and his Arab "allies" very much more than it can be worth to either of them.

Whether it be true or not, that is a good story which has been going the rounds this week about the Pathan infantry who, captured by the Huns in Flanders and sent to Constantinople in the hope that they would prove untrue to their salt and fight against the King-Emperor, succeeded in making good their escape and finding their way afoot to Kabul, whence they will rejoin their regiment. Some people, who are far better fitted to judge than I can pretend to be, regard it as a piece of pure invention; but General Sir O'Moore Creagh, late Commander-in-Chief in India, appears to accept it as correct—or, at least, as quite credible. The heroes of the story belong, I understand, to the 40th Pathans, known—unofficially—as "The Forty Thieves," and said to be capable of anything—except disloyalty. The tramp, though a long one, would certainly have no terrors at all for them. Is not the Indian pilgrim—and the Indian pedlar, too, for that matter—accustomed to long journeys on foot? And though they may have had some difficulty now and then in eluding Turkish officials, I personally should be prepared to back a Pathan against a Turk in the matter of wits any day. So I see no good reason to doubt the truth of the story; and I am glad to think that another attempt of the Germans to stir up trouble amongst our Moslem fellow-subjects has come to grief.

***

Both Bulgaria and Roumania are steadily increasing their supply of ammunition and materials of war at the expense of the Germanic Powers. A short time ago the former made a useful haul of hydroplanes, which had been consigned by Germany to her Turkish friends; and these, I trust, will at no very distant date be found useful on the Ægean or the Black Sea, if not on the Sea of Marmora. Roumania, too, thanks to the alertness of her Customs officers, appears to be acquiring a fair supply of shells and other products of German industry. Some of these things, being fit for use only by Huns, are not likely to be employed by the Roumans, but others should prove useful—especially those railway wagons of ingenious construction, which must be very welcome to the Roumanian railways, notoriously short of rolling-stock.

***

But the very frequency of these hauls has given rise to suspicions, which I trust are quite unfounded, on the part of a correspondent. This gentleman writes:—"At least once a week we are informed of the brilliant detection by the Roumanian authorities of German attempts to smuggle arms and ammmunition through to Turkey. This is very satisfactory reading—as far as it goes. But the German smugglers appear to be so unfortunate in their attempts that one may be pardoned for wondering whether, after all, those cases that are detected by the Roumanian Sherlock Holmes are not a mere blind. The quantities of goods seized do not seem to be very large, and Turkey still appears to be getting a good deal of ammunition from one source or another! Are *all* the attempts at smuggling foiled?" I am afraid I cannot answer that question. But until Roumania shows quite clearly that she is *not* playing the game I prefer to think that she is—and will! Her attitude is certainly a puzzling one just now, and not one calculated to inspire much enthusiasm or admiration. But, on the other hand, it must be remembered that her position is not entirely enviable. And the very fact that Germany seems inclined to try bullying methods upon her over this question of letting ammunition through to Turkey is in itself an encouraging sign—for the Entente.

***

When the above paragraph was written I had not seen the statement issued through Reuter's Agency—and presumably on behalf of the Roumanian Government—to the effect that Roumania "continues successfully and energetically to prevent all arms from Germany and Austria intended for Turkey or elsewhere from passing through Roumanian territory." But this, I take it, will dispose of my correspondent's doubts as effectually as it has of mine.

***

A consular officer now in this country tells a truly delightful story of a telephone conversation between Belgrade and Nish at the time when the Serbian capital was being bombarded by the Austrians. The gentleman at the Belgrade end of the wire was an agitated Vice-Consul who had been left in charge, so to say, of the affairs of one of the Great Powers; at the other end was M. Grouitch, who when he left this country to taken up the position of Permanent Secretary for Foreign Affairs in Serbia took with him the good wishes of all who had ever met him. Said the Vice-Consul, greatly excited: "Oh, it is Hell here. Shells are bursting all round us every minute, and the sound is terrible, terrible!" In a flash came back the reply: "Stop speaking!" "What's that? What do you say?" asked the agitated one. "Stop speaking, please." "But why?" "I want to hear the shells bursting."

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1915.	1915.		1333.	5675.
July	July		Ramadan	Ab.
16	3	Friday	4	5
17	4	Saturday	5	6
18	5	Sunday	6	7
19	6	Monday	7	8
20	7	Tuesday	8	9
21	8	Wednesday	9	10
22	9	Thursday	10	11

Last Saturday, being Shaaban 27, according to the Moslem calendar, was the birthday of the Shah of Persia, who was born at Tabriz in 1898. By command of the King, the Hon. Sir Arthur Walsh, Master of Ceremonies, called on H.E. the Persian Minister, and conveyed the congratulations and good wishes of His Majesty.

Tuesday, being July 7 according to the Julian calendar, is the birthday of the Diadoch of Greece, H.R.H. Prince George, who was born at Tatoi in 1890.

The following semi-official statement has been issued in Sofia :—The rumour emanating from Nish, and which is at present going the round of the European Press, to the effect that the health of King Ferdinand of Bulgaria is seriously impaired, is a malevolent invention. King Ferdinand continues to enjoy perfect health, and is unceasing in his solicitude for affairs of State.

By command of the King, the Hon. Sir Arthur H. J. Walsh, Master of the Ceremonies, called upon M. Boshkovitch, the Serbian Minister, at the Legation, 195, Queen's Gate, on Monday, on the occasion of the birthday of the King of Serbia. M. Boshkovitch immediately telegraphed the Royal greetings to his Sovereign.

In the Russian Church in Welbeck Street at noon a Te Deum was sung in celebration of the name-day and birthday of the King of Serbia. The Very Rev. Eugene Smirnoff, the Priest to the Russian Embassy, assisted by the Deacon, officiated. There was a large congregation, the members of the Diplomatic Corps being in full uniform. During the afternoon the Serbian Minister received at the Legation the members of the Serbian colony in London.

Queen Alexandra, accompanied by the Princess Royal and Princess Maud, was present at the matinée given at the Queen's Theatre last Friday to provide comforts for the wounded sailors and soldiers in the Dardanelles.

Lord Kitchener had an audience of the King last Saturday at Buckingham Palace.

Captain Matila Costiesco-Ghyka, Secretary to the Roumanian Legation, left London on Tuesday for the Continent, on leave.

Under date of the 12th inst., Reuter's Sofia correspondent reports:—Sir Henry Bax-Ironside, the British Minister, who is proceeding to England on leave of absence, and Lady Bax-Ironside left here to-day in a special train which was placed at their disposal. M. Dobrovitch and General Savoff, representing the King and Queen, M. Radoslavoff, the Premier, former Ministers, and various other notabilities saw them off at the station.

The Bulgarian Minister and the Hellenic Minister were amongst the callers at the Foreign Office on Tuesday.

The Rome correspondent of the *Morning Post* states that Dr. M. Gavrilovitch, the first Serbian Minister ever appointed to the Holy See, will shortly present his credentials to the Pope. "This," adds the correspondent, "is considered a further diminution of Austrian influence in the Balkans. Up to the last Austria steadily fought the Serbian Concordat, but at the critical moment the British Mission to the Holy See supported our Ally, and Austria was defeated." From 1911 to 1914 Dr. Gavrilovitch was Serbian Minister at Cettinje.

The *Pall Mall Gazette* announces that Lady Wingate is leaving Egypt this week for England.

The Right Hon. Sir Louis Mallet, G.C.M.G., late British Ambassador at Constantinople, presided at a lecture given at the Queen's Small Hall on Wednesday by M. T. E. Steen (a Norwegian banker), who gave his impressions of official tours among the prisoners' camps in Germany, France, and England.

Miss Violet Asquith is suffering from an attack of typhoid fever, which, it is thought, she contracted in Egypt. Her marriage to Mr. Bonham-Carter, which was to take place on the 27th inst., has been postponed, and it is impossible at present to fix a new date. Happily the attack of typhoid is a very mild one, and there is every prospect of complications being avoided.

Our Bucharest Correspondent informs us that Captain Marinkovitch, Extra Military Attaché to the Serbian Legation, has been awarded the Order of the Star of Karageorge for gallantry on the battlefield. Captain Marinkovitch (he adds) has been at Bucharest for two months, after having had a leg amputated in Serbia, as the result of wounds received in the battle of Krupanji.

General Bernard Pasha, Financial Secretary to the Government of the Sudan, left Egypt on June 29 for this country, where he is spending his leave.

Mr. R. E. More, Governor of Khartoum Province, and Mrs. More left Khartoum on June 20. Mr. More will be away from the Sudan for a short period on sick leave. During his absence Mr. Macmichael will be Acting Governor.

The Rev. E. C. Houlston, B.D., of St. Leonard's Parish Church, Dunfermline, has been granted twelve months' leave of absence to enable him to accept an appointment as chaplain with the Mediterranean Expeditionary Force in Egypt.

Mr. Hugh La Fontaine, who is now serving with the 7th (Reserves) City of London Regiment, has been promoted sergeant, and Mr. Sidney Nowill, who is also serving with the same regiment, has been promoted corporal.

Mr. G. H. V. Hooper, of Busreh, was among the passengers who left England by the P. and O. liner Maloja on the 10th inst.

Mr. G. L. Houston is spending a few weeks at Troödos, and intends to return to Kyrenia for the winter.

A marriage has been arranged, and will take place after the war, between Captain Clyde McGilp, of the New Zealand Expeditionary Force, and Jeanne, younger daughter of Chevalier C. Aquilina, of Alexandria.

Last Saturday, at La Rochelle, France, the marriage took place of Mr. Godfrey Thomas Havard, H.M. Consul at Teheran, with Mademoiselle Marcelle Michelin, third daughter of Madame Michelin, of La Rochelle. Mr. Havard has been Vice-Consul at Teheran since February, 1912.

Under date of June 27, our Bucharest Correspondent writes :—

Mr. H. P. Bagge, Vice-Consul at Nicolaieff, has passed through this city en route for Sofia.

Captain Cobban, attached to the Russian General Staff, has passed through Bucharest on his way to the Dardanelles.

Captain Pichon, the French Military Attaché, has left for Petrograd on a special mission.

Much regret will be caused by the announcement, made by *The Times* special correspondent at Kragujevatz, that Mrs. Dearmer, wife of the Rev. Dr. Percy Dearmer, vicar of St. Mary's, Primrose Hill, attached to the Stobart Hospital Mission in Serbia, died of enteric on Sunday after a fortnight's illness. This is the second death from the same cause in the same mission.

Mrs. Dearmer, who was born in 1872, was married to Dr. Dearmer in 1892. She was a writer of considerable merit, and, much interested in the stage, was largely instrumental in founding the Children's Theatre, at which her successful play "The Cockyolly Bird" was produced.

Major Nathaniel Page, late of the Weymouth Division, Royal Marines, whose death at the age of eighty-two is reported from Totnes, was present at the Battle of Balaclava, the fall of Sebastopol, and many other engagements of the Crimean War. He held the medal with two clasps.

Captain C. F. Balleine, of the 8th Battalion Rifle Brigade, who was killed in action in Flanders on the 2nd inst., had, in 1907, seen something of excavating work in Egypt. That year he assisted Dr. MacIver in his work in Upper Egypt.

Captain H. F. Elgee, South Wales Borderers, who is reported killed in action while serving with the Mediterranean Expeditionary Force, had been employed with the Egyptian Army since 1908. In 1912 he took part in the operations against the Beir and Anuak tribes in the South-Eastern Sudan, and was awarded the medal and clasp for his services.

Captain Adrian Aubrey Charles Taylor, Royal Dublin Fusiliers, who was killed in action recently, obtained his commission in 1897, and reached the rank of captain in 1902. At the time of the outbreak of war he was serving with the Egyptian Police, having been appointed to this force on his retirement from the Dublins in 1913. He rejoined his old regiment as soon as war was declared. Captain Taylor had seen considerable service—he was engaged at Aden in operations in the interior in 1903, and was mentioned in despatches, and received the Queen's medal with six clasps and the King's medal with two clasps for his services during the South African War, 1899-1902, where he was severely wounded while serving with the Mounted Infantry.

Lieutenant Hugh Hulton Rupert Crookham, 1st Battalion Cambridgeshire Regiment, who is reported as severely wounded, is a son of the Rev. W. T. R. Crookham, who is a chaplain with the Forces in Egypt.

A correspondent informs us that Mr. Walter Whittall and Mr. C. Rice are among those who have been wounded in the Dardanelles. Both received wounds in the left shoulder and are being invalided home. The same correspondent informs us of the death on the field of honour of Mr. Lionel Bedoda.

Dr. V. H. Rutherford has left England to inspect the Wounded Allies Relief Committee's hospitals in Serbia and Montenegro. The committee has lately received from its Serbian hospital stationed at Kragujevatz news that, the typhoid epidemic being practically at an end, the strictest preventative measures are now in force against any possible outbreak of cholera.

Mr. R. E. W. Chafy, formerly British Vice-Consul at Port Said, has arrived in London from Milan.

Mr. A. B. Geary, British Vice-Consul at Alexandria, has returned to that city from Port Said.

Our Bucharest Correspondent informs us that M. Jean Gradishteanu has been elected President of the Macedonian Roumanian Society in that city.

Under date of July 8, Reuter's Paris correspondent reports: General Gouraud arrived here this morning. On the voyage

from the Dardanelles the surgeons on board the liner found it urgently necessary to amputate his right arm. His right thigh and left leg are broken, but there are no complications arising from sores. An X-ray examination will be made of the right hip, as it is feared that the fracture is a compound one. His general condition is very satisfactory.

Lady Newnes appeals most urgently for books and gramophones for our sick and wounded in the hospitals in Egypt. She is advised that ten thousand books—novels, books of adventure, travel, etc.—would be most welcome, and she has already made arrangements for their dispatch and distribution. Books and gramophones should be addressed to Lady Newnes, care of The Stores Department, British Red Cross Society and the Order of St. John, 83, Pall Mall, and cheques should be made payable to Lady Newnes, 1, The Boltons, London, S.W.

The Serbian Relief Fund are organizing a Serbian Flag Day in London, and the date has been fixed for Wednesday, September 22. The majority of the metropolitan mayors have consented to co-operate.

APPOINTMENTS, PROMOTIONS, etc.

El Kaimakam C. M. Drew Bey, M.B., Medical Corps, is struck off the strength of the Egyptian Army.

It is reported that Colonel Otto von Lossow, Chief of the General Staff of the First Bavarian Reserve Corps, has been appointed Military Attaché to the German Embassy at Constantinople in place of Colonel von Leipzig. The new Attaché was a teacher at the Constantinople Military Academy from 1911 to 1913.

OBITUARY.

M. J. LAHOVARY.

Our Bucharest Correspondent writes under date of June 28 :—

Yesterday morning there died at his residence here, from heart disease, M. Jon Lahovary, who had only been elected a few days earlier to the position of President of the Conservative Party, in place of M. Marghiloman, deposed much against his will, as has been previously reported.

Roumania loses in Jon Lahovary one more of the rapidly dwindling group of the patriots of the old school. Born in 1848, he studied in Paris, where he secured the degree of Doctor of Law, and, returning to Bucharest, he practised his profession of lawyer.

In 1871 he commenced his political career, being elected a Deputy on the Conservative side. From 1892 to 1895 M. Lahovary represented his country at Paris as Minister Plenipotentiary. In 1899, when M. Gh. Cantacuzino formed his Conservative Cabinet, he conferred the portfolio of Minister of Foreign Affairs on M. Lahovary. In 1904, on the reforming of the Cabinet, he took over the Ministry of Domains and Agriculture, and it was in this position, in 1906, that he so ably organised the Jubilee Exhibition at Bucharest. In 1910, when M. Carp was called on to form a Conservative Government, he once more took up the portfolio of Domains and Agriculture, which he held until the fusion of the Conservative and Democratic-Conservative parties during the stirring times previous to the Peace of Bucharest, when he retired.

His loss is a heavy one to his party, as the great difficulty presents itself of finding a suitable person to occupy the position of leader of the Conservative party.

His burial takes place to-morrow, when the King will be represented by Prince Carol.

THE EXARCH JOSEPH.

(From a Correspondent.)

The death of the Exarch Joseph, to which reference was made in these columns last week, robs Bulgaria of one of her most prominent celebrities. His rise to greatness was rapid, and was largely due to the interest of his fellow inhabitants in the town of his birth, who, recognising his talents, petitioned the municipality to bear the expense of sending him to Paris to complete his education. The first important step towards the position he held at the time of his death was taken in 1872, when he was appointed Seretary-General of the Exarchate. He took Holy Orders in the same year, and proof of his exceptional abilities is to be found in the fact that he was appointed to the Bishopric of Vidin after being only two years in the Church. He was consecrated Archbishop in 1876. Further advancement followed a year later, when on the forced resignation of Exarch Anthymos the Archbishop Joseph was elected in his stead. In the troublous times that followed the Exarch laboured untiringly in the interests of his Church. Periods of violent animosity against the Bulgarian Church in Turkey followed in quick succession, and it was due solely to the Exarch's influence that a movement advocating submission to the Church of Rome, in order to secure for Bulgaria the support of a Western Power, was prevented from maturing. Notwithstanding his efforts, however, which were at times at least partially successful, the Bulgarian Church abroad remains in much the same position to-day as when the Exarch was first appointed. He succeeded in establishing two bishoprics in Turkey, it is true, but that was all that could be accomplished in the face of the continued opposition of the Porte. The late Exarch left Constantinople for Sofia as recently as 1913, having consistently refused to abandon his work in Turkey before, although he was several times previously asked to return to Bulgaria.

THE LATE AHMED FARIS.

(From a Correspondent.)

The notice in The Near East of the death of the widow of Ahmed Faris awakens in me a host of memories of a past generation so full of zeal and pride in that modern civilization then held before the Turks as a model of all that is noblest in human nature, which Germany of half a century later has so disgraced.

Ahmed Faris, whose real name was Faris Elshedyak, a Maronite of Lebanon, was a man with a grievance against his generation. A brother of his had been immured by his Bishop in Mount Lebanon for his too liberal opinions, and his cruel death so embittered Faris that he forsook Christianity and never tired of scorning its priesthood. One of his well-known sayings about them is to be found on the front page of his book, "El-Faryak," to the effect that the labour of two bulls yoked for threshing is more useful and profitable to the community than two bishops' teaching.

I cannot understand how his widow could have been writing a book on the "Soul of Islamism," considering that her late husband was never a convinced Mohammedan, or a Mohammedan at all, except in name; it was as a protest against the Maronite cruelty that he took the Islamic name of Ahmed, when he went to Constantinople and thought of founding there the weekly and first Arabic journal in the country, *El-Jawayib*, which was well edited and had a prosperous run for many years, being the only one in that language to give the Eastern world news of the capital and of European doings. The Sultan Abdul-Aziz, uncle of the present Sultan, thought well of him, and I was told that for years he, being the sole editor of his paper, used to dictate every word of it himself (various European newspapers being spread before him) to half-a-dozen scribes, simultaneously. I knew his cousins well in Beyrout, and have met his son when he came to live amongst us here. As a child of ten, I even remember seeing his wife we have just lost, a quaint, slim figure in crinoline and ringlets.

He was, undoubtedly, of considerable power in the use of the Arabic language, but I do not know if and when he contributed to the new rendering of the Bible into Arabic, and I know only of one book written by him when young—"El-Faryak."

A. S.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

Armstrong.—On July 8, at Alexandria, Egypt, the wife of T. E. S. Armstrong, Customs, of a daughter.

MARRIAGES.

Baker—Taylor.—On the 8th inst., by special license, before leaving for the Front, Captain Arthur Warden Baker, only son of Mr. and Mrs. Arthur Baker, of Constantinople, to Jessie, only daughter of Mr. and Mrs. Taylor, of Barnes Place, near Tonbridge.

Byam—Stiven.—On July 10, 1915, at the Garrison Church, Abbassia, Cairo, Major William Byam, R.A.M.C. (attached Egyptian Army), only son of the late Major-General W. Byam, C.B. (late the York and Lancaster Regiment), and Mrs. W. Byam, Sidmouth, to Doris Mabert, second daughter of the late E. W. F. Stiven, M.D., and Mrs. Stiven, of the Manor Lodge, Harrow-on-the-Hill.

Vassallo—Wood.—On June 22, at the Archiepiscopal Palace, Malta, by his Grace the Archbishop of Malta, Charles Vassallo, K.O.M.M., to Laura C. Wood, daughter of the late Cecil Godfrey Wood, H.B.M.'s Consul-General, and Mrs. Wood.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Alexandria.
CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 80 per day.

ROUMANIA'S INDECISION.

It is a matter for regret to those who have pinned their faith on Roumania's hegemony of the Balkans to find her at a critical period in her history the prey of Oriental vacillation and indecision. A country that does not know its own mind can hardly claim to be qualified to assume the leadership of its neighbours. For many years the Roumanians considered that their destiny lay not in the Balkans, but in Europe proper. They preferred to aspire to the position of a hanger-on of one or other of the two groups of Great Powers to carving out an independent future for themselves in south-eastern Europe. With the formation of the Balkan League, and in the face of the events that followed its dissolution, the scales fell from the eyes of the Roumanian people. The potentialities of the Balkans as a political entity were recognized, and the importance attaching to the hegemony of a Balkan federation was appreciated. It was no longer regarded as a slight to be included in the term "Balkan States." Roumania dropped naturally into the position of a leader among those States, and her claims to the title were acknowledged by the Peace of Bucharest. That peace, it is true, implied the extinction for the time being of a Balkan federation in its widest application, and at the moment the rulers of Roumania were more concerned with satisfying certain territorial ambitions of the country than with evolving any far-sighted policy for the consolidation of Balkan interests. But the principle of community of interests in the Balkans had been established, albeit imperfectly, and to Roumania attached the responsibility of furthering that principle in the future. The position called for the display of no small measure of statesmanship, but confidence was felt in the ultimate ability of Roumania to perform all that was expected of her. Unfortunately for the country, the first test of its statesmanship has come too soon. At the outbreak of war between the Germanic Powers and the Triple Entente only one sound course was open to the Balkan States—to proclaim their solidarity and to determine upon the course that they intended to pursue as a single political entity. The implication of Serbia in the conflict no doubt complicated the situation, but it was for the Balkan States to decide how far the well-being of the Peninsula was concerned with Serbia's quarrel and its possible issues, or whether the other countries, while holding together, could still keep aloof from the war.

For such action on the part of the Balkan States it was necessary that Roumania should at once take the lead in bringing about an understanding between the several countries. But far from being in a position to take such a step, the Roumanian Government was actually unable to make up its own mind in regard to the war. It resolved not to commit itself at the bidding of King Carol to the Germanic cause, and proclaimed the country's neutrality. Then, veering round to the side of the Allies, it allowed its Ministers accredited to their Governments to announce that Roumania had taken her decision, and would in due course range herself on their side on the field of battle. On the strength of these assurances the Roumanian Government received financial help from the British and French Governments, and the fullest sympathy was felt with its desire to complete its military preparations before entering into the war. The first suspicion of any indecision on the part of the Roumanian Government was aroused by the action of an important section of the Roumanian people. A movement was started to urge early participation in the war upon the Cabinet. It was clear that if the Government had decided upon a course of action demonstrably in the interests of Roumania, it would have taken the Opposition leaders into its confidence in order to allow the country to present a united front at such a critical time. The fact that the Bratiano Cabinet failed to adopt such a course lent colour to the belief that it was still uncertain regarding its attitude towards the war. For a time it was able to silence popular clamour by pleading that its military preparations were not complete; it also allowed it to be understood that its action would be determined by that of Italy. But the army is now as ready as it will ever be, and Italy has been at war with Austria-Hungary for many weeks. A further plea has been raised that negotiations are in progress with the Allied Powers, and that until the points at issue are settled Roumania must defer military action. The contention in itself holds good. It must also be admitted that the withdrawal of the Russians in Galicia introduces a factor in the military situation which may necessitate a readjustment of the plan of campaign. But neither of these considerations could affect a decision dictated by the interests of the country, and there ought to be no room for any doubt in the minds of Roumanians themselves regarding the course of action which the country is about to pursue.

In Roumania, however, very strong doubt prevails on this subject. The Government shrinks from taking its own countrymen into its confidence, and it has now to submit to the humiliation of having it known that its indecision has exposed it to overtures from the Germanic Powers. On July 7 the Austro-Hungarian Minister at Bucharest made definite proposals to the Roumanian Government. If Roumania remained neutral, and allowed Germany to supply Turkey with munitions of war, she would receive certain concessions as compensation; if she ranges herself on the side of the Germanic Powers she is promised yet further concessions. It is difficult to regard such an offer at this juncture as other than a deliberate insult to Roumania. M. Bratiano's Government is placed by the Germans on a level with the members of the Turkish Committee of Union and Progress. Eleven months after the outbreak of the war Roumania's neutrality or active support is merely a matter of bribes. She is not credited by the Germanic Powers with any national policy based on national interests. For certain services she will receive so much; for greater services she is to have a little more. The conception of a country fired with a national ideal and incapable of being restrained until that ideal be realized, does not enter into the German mind. M. Bratiano and his colleagues, thanks to the policy they have adopted all this time, are to the Germans as merely so many Turkish puppets to be bribed or cajoled into sacrificing themselves for German interests. That the Roumanian Government should have listened to these proposals, and tacitly accepted a time-limit within which to give its reply, must needs be a cause of bitterness to many Roumanians. The circumstances, we fear, will be quoted as confirmation of the strong hold that Germany has obtained in certain quarters in Roumania by means of a lavish expenditure. The Austro-German promises, which the Roumanian Government is now considering, rest for their fulfilment on the word of Germany. When similar offers on the same guarantee were made to the King of Italy, the reply came instantly, that the time had gone by when such a guarantee could be regarded as adequate. The Roumanian Government would seem to be of a different mind. It allows itself to appear flattered by the overtures of the Germanic Powers; it has as little thought for the national aspirations as it has for the interests of the Balkans as a whole. The Austro-German proposals predicate the annihilation of Serbia, as well as the non-realization of the ideal of every true Roumanian, the incorporation of Transylvania in the kingdom of Roumania. But instead of rejecting these proposals as soon as they were uttered, the Roumanian Government takes its time to consider them. Thus does the spirit of indecision prepare pitfalls for itself, and lack of statesmanship is exposed to the charge of lack of patriotism.

THE STATE OF SYRIA.

(From Our Correspondent Lately at Haifa.)

Alexandria, July 2.

The American cruiser Tennessee is the first ship to arrive from Syria since the cessation of the Italian steamship service on the Syrian coast, consequent upon Italy's entry into the war. Her arrival was, therefore, the occasion of great excitement amongst the very numerous Syrian refugees now at Alexandria, who are filled with natural anxiety regarding the safety of their families. I came down from Cairo especially to interview some of the newcomers from the isolated country, and suceeded in eliciting the following information regarding the general situation in Syria. Before proceeding, however, it would be only fitting to acknowledge, through the medium of The Near East, the valuable services that the Tennessee has rendered to Syria in general and the refugees in particular. Since the ill-fated participation of Turkey in the war, the vessel has conveyed large batches of destitute refugees from Syria nearly every week. It should be noted, however, that most of the refugees were foreigners and Jews. Still, the continual presence of an American warship in Syrian waters has greatly helped to tranquillise the panic-stricken inhabitants. Having been relieved by the Chester, the Tennessee is now leaving Mediterranean waters—probably for good—for the United States.

On the occasion of the Tennessee's last voyage from Syria the hotels of Alexandria, already overcrowded, were the recipients of over seven hundred fresh refugees, most of whom are well-to-do people. They are chiefly Italians and neutral subjects. Among the new arrivals are the staffs of the various Italian Consulates in Syria.

Abundance of Coal in Syria.

The most remarkable piece of news about Syria is the announcement of the existence of an abundance of coal in the Lebanon. This confirms the previous reports as to the discovery of coal in certain regions on the Mountain. Large quantities are being mined, and are being utilised for the maintenance of railway communications. The possibility of a stoppage of the railway service as a result of the disappearance of coal is therefore remote. A trustworthy informant stated that coal is being supplied to the Government at the low rate of 30 fr. per ton. However, one ton of Cardiff coal, he stated, was equal to 1½ tons of the newly discovered Lebanon coal.

This announcement serves to testify to the richness of Syria, and is a further proof that the country is capable of profitable development when the "clouds roll by."

Treatment of British Subjects.

The remainder of the British, French, and Russian male subjects previously resident in Syria are now at Urfa. I learn that the Turkish Government is contemplating sending the families of these deportees to Urfa also. The remaining British women and children are to be sent thither as well. I have not been able to obtain full confirmation of this report, but it was given to me by a respectable Syrian notable. I understand that Doctors Graham and Webster, of the American College at Beyrout, who are British, were not allowed to embark on the Tennessee, but they continued to discharge their functions as professors at the College up to the end of the College year. It is rumoured that they are also to be deported to the same destination now that the scholastic year has come to an end. Their hitherto unmolested presence at Beyrout is due to the representations of the American consular authorities, supported by their energetic Ambassador. Miss Nixon, who is attached to the American Consulate-General at Beyrout, is, of course, enjoying perfect freedom.

The Restrictions on Wheat.

The apprehension hitherto entertained of the scarcity of living necessities and the likelihood of an occurrence of famine should be dispelled. Wheat and barley are quite abundant in Syria, but foreign articles are necessarily scarce. It is interesting to note, however, that the Government does not allow the despatch of large quantities of wheat and cereals to the cities on the coast for fear lest, in the event of a foreign occupation, the enemy might utilize these materials. Considerable restrictions have also been imposed by the authorities on anybody attempting to store or export foodstuffs for personal profit. In fact, much credit is due to the Government for the just manner in which it has been distributing wheat amongst the poverty-stricken and destitute population. The authorities' energetic efforts towards public security should also be acknowledged.

The Lebanon.

Conceiving that his position has become untenable on account of the continued opposition he met with from the Administrative Council, the Mutessarif of the Lebanon has resigned. It will be remembered that most of the original members of the Council were forced to relinquish their posts, and were subsequently replaced by Moslem members nominated by the Government. Considerable friction has, therefore, continually existed in the administration, a state of things which disgusted the Mutessarif. As his successor—the present Mutessarif is an Armenian—it is rumoured that the Turkish Government has decided to appoint a Moslem governor.

Ever since the beginning of the war the Druses have declined to enlist in the military service of Turkey. It is stated that they offered their services on the condition that they should be stationed on the coast; but the Turks refused their offer, fearing lest as soon as an invasion took place the Druses would welcome the invaders. I also learn that the Hauran Druses have notified their co-religionists living in the Lebanon that they are welcome to the Hauran at all times, and that in case they are dissatisfied with their life on The Mountain, it would be advisable for them to proceed to Hauran, where there is an enormous store of provisions that would last for several years.

(From a Correspondent.)

Cairo, July 5.

The U.S. cruiser Tennessee arrived from Beyrout at Alexandria on June 28, with about 600 passengers on board, thus affording a chance to learn something about the present situation in Syria and the Lebanon. The majority of the passengers consisted of Italians and Greeks, and the remainder of Americans. All the Italian consuls in Syria, who had assembled at Beyrout and had been unable to leave owing to the absence of steamship communication, availed themselves of the opportunity offered them by the Tennessee. The departure of the Greek Consul-General at Beyrout, who is said to have had great difficulty in leaving, and who received some discourteous treatment at the hands of the Turkish authorities, is rather significant. The Bulgarian Consul-General at Beyrout was also a passenger. He is said to have received telegraphic orders from his Government to proceed to Dedeagatch, thence "probably" to Constantinople; but it would not be surprising to hear later of his having gone on to Sofia instead.

Egyptian Students Detained.

The Turkish authorities are reported to have forbidden the Egyptian students of the American College to leave by the Tennessee, but, with their customary kindness, the President and Faculty of the College have been providing for the needs of all students without means. The College has closed as usual at the end of the Academic year, but has moved its staff and the students who have been unable to return to their homes to their summer headquarters in Shweir, a beautifully situated village in the higher hills of the Lebanon. The interesting fact may here be mentioned that, in spite of the war, the College had almost a full complement of students, viz., 761, against about 900 in normal years. It is announced that in case of the continuation of the war till the autumn, the College will be open as usual and prepared to carry on work as in the past.

The U.S. warship Chester is due to leave Alexandria to-morrow for Beyrout, to relieve the Tennessee, and it is expected that the Des Moines, which is now at Beyrout, and which has relieved the North Carolina, will be coming to Alexandria as soon as the Chester arrives at Beyrout, in order to bring a further contingent of Italians.

Order Maintained.

As far as security and the maintenance of order go, the state of Syria and the Lebanon leaves nothing to be desired. Any attempt at disturbance is suppressed with exemplary severity. It is reported that on the occasion of the visit of an aeroplane of the Allies to drop copies of an Egyptian paper, a fanatic Metwali (Shiite) made an assault on two Christians, but the military authorities promptly had him arrested, and, after having been tried by court martial, he was condemned to death and executed.

The economic situation, however, is said to be rather alarming. Imported articles, when they can be had at all, are sold at famine prices, and even cereals and grain—which are grown in the country, and could not be lacking, as fairly large quantities used to be exported in normal times—are sometimes difficult to obtain. It seems that after the outbreak of the war the leading merchants in the interior declared to the authorities only 20 per cent. of the actual quantities they had hidden away in their stores; and the authorities, when later they discovered the deceit, absolutely prohibited exportation. In the meantime the railway communication between the interior and the coast towns has been interrupted, and some pitiful scenes are reported to have taken place at Beyrout when the flour mills and depots were besieged by famished people of the poorer class. It would seem that the authorities, in anticipation of an enemy landing, have made a point of leaving no surplus stock of foodstuffs in the coast towns.

I have it from a fairly trustworthy source that, owing to the use of crude coal from the Lebanon, the railway engines have been almost ruined by the considerable proportion of sulphur in that coal. The destruction of the

Digitized by Google

petroleum depots near Beyrout and on the Lebanese coast by the warships of the Allies was calculated to aggravate the economic distress. On the other hand, the approaching harvest may be expected to alleviate the situation to a certain extent.

The Governor-General of the Lebanon is reported to have obtained from the Sublime Porte three months' leave of absence outside Syria; and it is now feared that, during his absence, the military authorities will feel tempted to carry out their long-cherished hope of subjecting the Lebanon to military service. This would afford the Turks an occasion for further extortion in the shape of the military exoneration tax. The impecunious authorities continue to exercise their ingenuity in multiplying the sources of revenue, and do not, of course, stop at any extortionate measure. The ruined population is said to be getting restive, and signs of revolt brewing among both the Moslems and Christians are said to have been apparent of late, causing no little alarm in military circles.

The number of Turkish troops in Syria is said to have greatly decreased, and it is estimated that there are not more than 1,800 troops in the Lebanon, stationed in various villages of strategic importance. The behaviour of these troops is reported to have been so far deserving of all praise. It seems that when they first came in the winter, the inhabitants treated them very hospitably, and even saved some of them from freezing; and gratitude has caused a certain cordiality between troops and the civilian population.

Exchange of Prisoners.

A delegate from Djemal Pasha arrived by the Tennessee to treat with the British authorities here for the exchange of the detained subjects of the Allies against an equal number of Turkish prisoners in Egypt. The number of British, French, and Russian subjects detained in Syria is about 500, and it seems that the treatment to which they are being subjected is far from enviable. Very poor food is served to them; and some are said to be suffering now from dysentery. A basis of agreement is believed to have been reached, and the final sanction of the Home authorities is awaited. In case the agreement should be ratified, the men of military age among the Allied subjects will have to undertake on their honour not to carry arms against the enemy, and, of course, the same condition will have to apply to the Turkish prisoners.

The Syrian Protestant College.

Djemal Pasha is said to be moving constantly between Damascus and the Lebanon. On the occasion of the Commencement Exercises of the American College, the President invited the Turkish General, and gave him a reception worthy of his rank; and this is said to have been responsible for the release of the three doctors of Canadian and English origin on the College staff.

It is said also that the Turkish authorities have required from the College the teaching of Turkish and the placing of this language on the same footing as the English language. The President wisely promised to consider the matter and to submit it to the Board of Trustees at New York. The College has also been required to exempt the non-Christian students from attendance at religious meetings. The number of medical students of the College who have accompanied the Turkish Army is said to be thirty-two. The majority have been sent to Gallipoli, Baghdad, and the Caucasus.

EXECUTION OF ARMENIANS.

(From Our Special Correspondent.)

Athens, June 27.

The sequel to the arrests of Armenians in Constantinople and elsewhere some time ago was the execution on June 15 of twenty of them, who had been condemned to death by the Court Martial. The official notification stated that these men were tried and found guilty of having held secret meetings, issuing publications abroad, and holding correspondence with the view of depriving the Ottoman Government of part of its territory by inciting foreigners against the Government, and of having attempted to create an independent Armenia.

Their names were :—Matheos Serkissian, Russian subject of the Caucaus and an influential member of the Hintchak Committee; Hamparsoun Krikor, of Rodosto; Agop Hazarian, of Torana; Minas Kechichian, of Kerassunde; Sempathi Haladjian, tailor, of Bitlis; Vahan Boyadjian, of Chimichkezek; Dr. Bedros Torosian, of Kharput; Armenak Hamparzoun, merchant; Abraham Stepan, shoemaker; Aram Atchikbachian, broker; Herant Kegavian, medical student; Karekin Bogossian, of Karahissar, labourer; Bogos Bogossian, jeweller; Agop Basmadjian, President of the Hintchak Committee at Kirk Kilisse; Thomas Thomassian, professor; Berounian Manoutian, shoemaker; Niguirditch Abranousian, member of the Hintchak Committee at Kharput; Kigame Vaykinian, of Van; Yervante Topouzian, professor at Baghtchedjik; Ohannes Yerkazarian, of Cesarea, and member of the Hintchak Committee; Karnik Boyadjian, coffee merchant.

Two members of the committee, named Sabahgulian and Vertade, were condemned to death by default.

NEAR EAST BOOKSHELF.

AN EASTERN MYSTIC.*

Although the poet Kabir was an Indian whose life work was accomplished in his own country, the volume of his poems, which has recently been published, calls for the attention of any paper dealing with the East—Near or Far—for two reasons. The first of these is that the development of his mind shows him to have attained a standard of thought by no means uncommon in the Near East to-day, and the second is to be found in the fact that both his parents were Moslems. Kabir himself in forsaking the path of orthodox Mohammedanism became a renegade when judged by the formal standard of the Mohammedan religion, and yet when we examine his mysticism we find much of the same belief, shorn of its formalities it is true, but pulsing with the worship of one Omnipresent Deity—the God of Love.

A somewhat remarkable feature of his "Life" is that he sought and made perfect the belief for which his soul craved without adopting the life of the professional ascetic. In the very able introduction which Miss Evelyn Underhill has contributed to Rabindranath Tagore's translation of the poet's works, she tells us that, "side by side with his interior life of adoration, its artistic expression in music and words—for he was a skilled musician as well as a poet—he lived the sane and diligent life of the Oriental craftsman." Valuable as Kabir's works would have been in any case, their value is enhanced by this fact. The profound belief to which he gives expression in his poems was matured amid the surroundings and temptations of every-day existence. Knowing this, we feel, as we read his work, that he went farther than most mystics in their search for truth. Having found what he sought, there was no void, save where error or belief or crime were sheltered. In all else he was face to face with the Supreme Being, the beloved of his poems—God.

> The Flute of the Infinite is played without ceasing, and its sound is love:
> When love renounces all limits, it reaches truth.
> How widely the fragrance spreads!
> It has no end, nothing stands in its way.
> The form of this melody is bright like a million suns: incomparably sounds the vina, the vina of the notes of truth."

We take the above quotation more or less at random to show the trend of the poet's mind, the keynote of his poetry and of his life. Through the poems run alternate notes of sorrow and of joy, as the mind swings to and fro between doubt and certainty, and the language is singularly expressive and beautiful. It is no easy task to translate a work of this description without robbing it of certain of its characteristic charms, but Mr. Tagore has accomplished his task admirably. It is a book which will appeal to all who have ever had any dealings with the unrecognised mystics who are to be found in all quarters of the East. Only to one in many millions is given the gift of expression such as was accorded to Kabir, but there are others scattered over the clean, broad deserts of the East, to whom, could it but reach them, the language of Kabir would seem as an echo to their own dreamings.

THE PRESS ON THE NEAR EAST.

Prisoners of War in Serbia.

An article by Helen Douglas Irvine which appears in the *Outlook* (July 3), gives some interesting details concerning the sixty thousand prisoners captured by Serbia in December. According to this writer the majority are Slav, and their sympathies are strongly on the side of the Serb. Many of them come from Croatia and Slavonia, but although their sympathies lie with their captors now, Miss Irvine anticipates difficulties in the future:—

Yet the Serbs will have difficulties when they come to govern their new provinces. In the first place, those men of Croatia and Slavonia who are not descendants of Serbian emigrants belong not to the Eastern but to the Western Catholic Church, and they are devout and much influenced by their priests. They do not desire continued union with Hungary, but there is a party in Croatia who wish to make of the two provinces a separate independent State. In the second place, there are in Bosnia a considerable number of Mussulmans.

In her description of the treatment accorded to prisoners in Serbia, Miss Irvine shows how utterly erroneous are the ideas of cruelty and callousness once associated with the Serb.

The Serbs treat their Slav prisoners as fellow-countrymen; they are sympathetic with the Roumanians; their feeling for the German Austrians is generally one of tolerant contempt; but they hate the Magyars. . . .

Many of the prisoners have almost complete freedom, for the threefold reason that men cannot be spared to guard them, that many of them do not desire to escape, and that no Serb would help them to escape. The women and the prisoners are doing as much of the work of the country as continues in spite of the war.

It is admitted that prisoners have suffered great discomforts—many have died; but, having regard to the sufferings endured by the whole country, it would seem that they have, on the whole, fared well.

The Balkan Situation.

Mr. A. Wyatt Tilby, writing in the *United Empire* (July), adds another article to the long list of those already written in an attempt to explain Balkan neutrality. He thinks that the States are by no means labouring under misapprehension as to their ultimate fate should Germany be victorious in the struggle, but that fear of being entirely crushed by the Central Empires if they join issue with the Entente, coupled with internal jealousies and a wholly inadequate knowledge of the value of sea power are the causes which combine to prevent their intervention. Also, and especially in the case of Roumania, Mr. Wyatt points out that her national ambition would by no means be satisfied if the Germanic powers are crushed.

If Germany wins Roumania will get nothing, not even gratitude for non-intervention, since her neutrality has taken on an unfriendly cast at times; if the Entente wins, Serbia is assured of a strip of land which will give her both shores of the Danube and place Belgrade (which lies on the south bank close to the junction of the Theiss with the Danube) some distance from the frontier. This must spoil Roumania's plan of a natural frontier formed by the Rivers Theiss and Danube.

The writer seems to consider it likely that, although the greater advantages are to be gathered by intervention, Roumania may still be found hesitating when the Hungarian harvest has been gathered, and the hour when her co-operation would be really valuable, past. Bulgaria, also, by asking too much, runs the risk of losing all; while already Greece, by allowing Italy to forestal her intervention has greatly prejudiced her position as a bargainer. Mr. Wyatt's opinion of the situation may be gathered from the concluding paragraph of his article, which we quote below:—

The rival claims of the three States—the Triple Attente, as they have been humorously nicknamed—are not inspiring of respect or admiration, and a complete account of the bargaining and bartering of the past year would probably disabuse those innocent souls who anticipate, if not a new heaven, at least a moderately new earth, from this war.

Bulgaria and Roumania.

Le Journal des Balkans, Bucharest, in an article quoted by *Foreign Opinion* (July 7) points out that the intervention of Italy "aims at a beaten and punished Germany, not only as a lesson to the world, but for the future independence and tranquillity of every single country." After commenting upon the growing importance of Roumania and Bulgaria, the writer continues:—

It is high time that it was pointed out that Roumania and Bulgaria will have to face some very cruel and bitter deceptions if they do not mean to go in for active participation until the end of the war. The Governments in Bucharest and in Sofia are obliged by the force of events to understand and to help each other, otherwise they will simply become paralysed by a mutual distrust in each other, greatly to the benefit of their common enemies.

The article concludes by emphasising the fact that there is not a moment to lose before Bulgaria and Roumania unite to realise their national ideals and to reaffirm the strength and the deliverance of the Balkan States.

The Strong Man of Greece.

The *Review of Reviews* (July) publishes an interesting character sketch of M. Venizelos. "In the present tangle of Balkan politics there is one name that stands out far above all others," says the writer in reference to this statesman, and the greater part of his article is devoted to biographical details of M. Venizelos' remarkable career. We quote from the writer's remarks concerning the recent deadlock between Throne and Parliament, which follow a brief sketch of the statesman's personal characteristics.

He has naturally made himself many enemies, though not so many as might be expected, chief amongst which is the Royal family, who, in spite of the fact that they owe their present firmly established position entirely to him, have never fully forgiven him for driving Prince George out of Crete. There is no doubt that this personal ill-will has much to do with the attitude Greece has taken up in the present crisis.

The writer is rather at a loss to understand why M. Venizelos, secure in the support of Parliament, should have deferred to the wishes of the King in the crisis, but he adds that "we may be sure . . . he was working in the best interests of the State." The Review considers it certain that ultimately Greece will be found fighting on the side of the Allies.

Plucky Serbia.

In an article "Brighter Days in Serbia," published in the *Westminster Gazette* (July 2), Captain E. N. Bennett writes: "After some five weeks' absence I have returned to find the whole face of the country changed. The snow has disappeared from all but the highest mountains; everywhere are sunshine and verdure: the birds, butterflies, and lizards have come by their own once more. Everywhere the maize fields, corn fields, and orchards are in excellent trim, for in the absence of the men with the colours the womenfolk and children have ploughed and sown."

He reports that "the typhus enemy's" power is broken:—

Such fresh cases as do develop are now few and far between; the rate of mortality has fallen to a very low figure: the virulence of the disease has almost burnt itself out. When one calls to mind the condition of Serbia less than two months ago, the change is almost beyond belief. On April 2 the official figures for one camp in the north were as follows: 50 per cent. dead, 43 per cent. sick, 7 per cent. sound. The railways were abandoned because people dreaded the infected carriages. Salonika was full of Serbian families who had fled, not from the Austrians, but from the typhus. To-day gloom and sadness have made way for fresh hope and a more cheerful outlook. The resilience of these Serbian Slavs is remarkable. The whole country reminds one of battlefields where the action of rain, wind, and sunshine, and the growth of new grass have obliterated nearly every trace of a terrible conflict. In Serbia the dead have buried their dead, and the living are full of fresh vigour and resolution. One of the most terrible aspects of the frenzy of destruction and slaughter which has seized on the civilised world is the awful cheapness of human life. Events of tragic import succeed each other so rapidly, and so vital is the struggle for national existence, that one has less time to brood over personal and individual losses. The talk in Serbian towns and villages is once more not of defence only, but of defiance and forward movements.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The War Loan, the greatest loan in the history of the world, has been a wonderful success. Beside the enormous figures, so eloquent of the wealth of the Empire, as opposed to Germany's growing penury, words fail to express the gigantic nature of the Exchequer's operations. The figures so far given are, of course, not final, as neither has the conversion of old stock taken place yet, nor can subscriptions through the Post Office be accurately gauged before the end of the year. It is, therefore, highly probable that the total to be subscribed will pass the £800,000,000 estimate.

***

Speaking of subscriptions through the Post Office reminds me that our Cairo Correspondent ventilates a grievance which seems to me to be justified. Though the British colony in Egypt is given a legitimate opportunity of investing, through the banks, in the War Loan, the minimum stock to be thus acquired is £100, as in the United Kingdom. Times are hard in Egypt, as everyone is aware, and, consequently, only a very small percentage of the British colony is able to do its little bit. The suggestion is: Could not the Egyptian Post Office—or, at least, the post offices at Cairo, Alexandria, Port Said, and Suez—be empowered to accept smaller subscriptions on the same conditions as at home? Methinks this would not only gratify Anglo-Egyptians, but would also be a source of revenue to the Exchequer. It is to be hoped, therefore, that the matter will be brought before the competent authorities. It is still a long time until December, and quite an appreciable amount might in this way be obtained from the land of Egypt. Similarly, the scheme could be extended to the Sudan, Malta, Gibraltar, and Cyprus—supposing that it has not already been done, which I doubt, as the *Cyprus Gazette*, for instance, makes no mention of these post office facilities in its reproduction of the War Loan prospectus.

***

On March 19 THE NEAR EAST published from its Cairo Correspondent a forecast of the final figures of the Egyptian finances for the year 1914-1915. Shortly afterwards the Financial Adviser drafted his Note containing a rough estimate of revenue. To-day we publish the actual figures, and, though in the matter of expenditure Lord Cecil's figures were nearer the mark than those of our correspondent, in both revenue and deficit our estimate was the more accurate of the two, as the following comparison will show:—

REVENUE.

NEAR EAST estimate	15,250,000
Official estimate	16,800,000
Actual figures	15,389,124

EXPENDITURE.

	£E.
NEAR EAST estimate	16,500,000
Official estimate	16,800,000
Actual figures	16,857,7 3

DEFICIT.

NEAR EAST estimate	1,500,000
Official estimate	1,700,000
Actual figures	1,468,559

***

The accounts of the Sudan, showing a surplus, however small, are most welcome reading. That the balance-sheet for the year would show a deficit this year was almost taken for granted, and the surprise, therefore, will be the greater. There has been a general curtailment and retrenchment, and in view of this, Bernard Pasha can place to reserve a sum of over £E12,000. Royalties have decreased (in the absence of further particulars I should think gum and ivory are both responsible for this decrease), but the effect is hardly likely to be lasting. There are dark days ahead for the Sudan, as well as for the rest of the Empire, and it is for this reason that our Cairo Correspondent warns us not to be too sanguine. However, those responsible for looking after the Sudan Exchequer are to be heartily congratulated on the results achieved in wartime, and it is to be hoped that their next balance-sheet will again confound those who are inclined to be pessimistic when on the subject of the country's future.

***

In connection with my recent plea for Government intervention in the case of the British Hospital at Constantinople, which is in danger of being requisitioned by the Turkish authorities, I have received word from the hon. treasurer of the British Refugees from Turkey Fund, stating that in a letter from Constantinople a strong appeal has been made urging him to support a request forwarded to the Foreign Office, asking the latter to continue their help to the hospital. For the last seven months the American Red Cross have been in possession of the building, paying all expenses, and are unable to continue for lack of funds. It would be a pity if at the present moment the Turks took possession of the building. Not only would they spoil most of the fittings, but would probably remove the greater part of the instruments, and if the shipping community knew of the possibility of losing the building, which is really theirs—it was built mainly by a voluntary tax on ships passing up and down the Bosphorus—they would take steps to pay the £300-£400 needed until we force the Dardanelles. Or it may be in the interest of the British Red Cross to consider this. There could be no finer headquarters for them than the Seamen's Hospital in Constantinople. I appeal, therefore, to the shipping world, to the British Red Cross, and to the Foreign Office, to whose notice the letter referred to above has been brought, immediately to come to the support of the hospital.

***

The Greek mercantile marine in Mediterranean waters has been very active of late—so active, as a matter of fact, that it has been deserving of some attention on the part of the Allies' Fleet. Seven Greek boats which were arrested on suspicion of carrying contraband of war and were taken to Mudros have, it is true, been released, but those seized in Gibraltar are apparently still in detention. It is unfortunate that there should be Greek shipowners so grasping in their greed that they should descend to ordinary gun or ammunition running against the direct interests of their country. It is high time that the Greek Government should take every possible step to prevent Greek subjects from attempting, or being suspected of attempting, to smuggle contraband of war into Turkey. We can hardly believe that, with her great ambitions, Greece is in a position to be at loggerheads with the Allies. She has everything to gain from an attitude of benevolent neutrality towards us, and everything to lose from an adventurous policy adverse to the interests of the Entente Powers.

***

Mr. Wing's question in the House anent the re-arrangement of the Consular Service after the war must not be shelved. It is vital to our trade interests abroad that business men should, in many cases, be appointed to consular posts. In the words of Mr. Wing, the Government should recognise the large numbers of "eligible and capable men engaged as commercial travellers whose technical skill in the arts of salesmanship fit them especially for positions of consul, commercial attachés, and other positions in our embassies in countries where British manufactures need special representation." From Lord R. Cecil's reply it would appear that suggestions made by a Royal Commission are engaging the attention of the Government. I fear that even these, doubtless harmless, suggestions will be watered down, with the result that reforms will consist in the introduction of some minor modifications, in all probability conducive to a greater display of fervent red tape, so dear to the heart of many of our consular officers. What is wanted of the Consular Service is its thorough overhauling, and not only the consideration by the Government of a few suggestions.

***

Then, again, there is the Levant Service, which, I have no hesitation in asserting, is the best branch of our whole service. What is going to happen to it when the war is over? Will its sphere be extended as was originally suggested in these columns so as to embrace the whole of the Near East and the shores of the Black Sea and Southern Russia, or will its effectiveness be curtailed by the loss of some of the posts now held? Or, again, will it be merged into the general service? I hope not, because its members are experts on questions of little avail in, let us say, Patagonia. More could be said on this subject, as well as on the subject of incompetent ministerial appointments, but I prefer to leave it unsaid—at present.

***

The successful series of public lectures on the Empire by Dr. H. B. Gray, the official lecturer, will be continued at the Imperial Institute throughout July. The lectures, which are now illustrated by lantern slides, are followed in each case by a visit to the Exhibition Galleries of the Imperial Institute, which afford a unique object lesson in the Empire's commercial capacities. The resources of the colonies and India are exhaustively represented by specimens, and there are explanatory statements respecting the more important products of each country. Next Wednesday, at 3 o'clock punctually, there will be a lecture on Egypt and the Sudan. Admission is free by ticket, to be obtained at the Central Stand in the Exhibition Galleries, Imperial Institute, South Kensington, S.W.

***

The Senior Official Receiver and Liquidator of the Bank of Egypt, Limited, notifies that he is about to make a fourth return to the shareholders of £1 per share, making, with previous payments, a total return of £7 per share. The fourth return will be paid on July 20, and the warrants will be issued a few days previously to all shareholders whose shares are now fully paid.

Egyptian Finances.

Accounts for the Financial Year.

(From Our Own Correspondent.)

Cairo, June 28.

The Egyptian Government published in this afternoon's *Official Journal* the final figures for its financial year ending March 31, 1915. It may be interesting if I set side by side the original estimates framed in March, 1914, the revised estimates as shown in the Financial Adviser's Note, dated March 24, 1915, and the actual amounts of revenue realised and expenditure incurred. The following table gives these figures :—

I.

—	Original Estimate.	Revised Estimate.	Final Figures.
Revenue	£E17,588,000	£E15,088,000	£E15,389,124
Expenditure	18,162,000	16,800,000	16,857,783
Deficit	574,000	1,700,000	1,468,559

It may be mentioned that in the original estimate the revenue was set at £E115,898 less, and the expenditure at £E502,039 more, than the amounts figuring in the final accounts for 1913.

From Table I. it can be seen that the effect of eight months of war conditions has been to cause a drop in revenue of £E2,314,774, although the actual result is some £E300,000 better than what was anticipated by the Financial Adviser in March last, and that, owing to economies, stoppage of new works, and postponement of repairs and renewal of material, it has been possible to reduce the expenditure by £E1,304,217 on the original estimates, and by £E802,178 as compared with the ordinary and extraordinary expenditure of 1913.

The drop in revenue is reflected in practically every service, and the appended table indicates clearly how the war has affected the different sources of revenue and completely spoilt what promised, in July last, to be an excellent financial year.

Table II. shows that the actual loss in revenue during the first eight months of the war was on the far side of two and a-half millions. It would have been a good deal more if the tobacco duties had not been raised in January, 1914, but it is not clear what effect the doubling of the railway fares and telegraph rates has had on the receipts of the administrations concerned.

On these figures the outlook is not very rosy, but, as a matter of fact, the prospects are far more promising than would appear. In the first place, the greatest loss in revenue occurred in the months when the first shock of war conditions was felt. The revenue dropped £E261,857 in August, £E347,399 in September, and £E837,113 in October. Of the above-mentioned drop of £E2,654,463, no less than £E2,400,051 took place in the five months ending December 31, 1914. With the turn of the year, a marked improvement made itself noticed in practically every branch, and although no head has actually returned to normal, yet, as the analyses of the monthly figures in The Near East will attest, the drop in revenue of the divers earning accounts has been becoming steadily less.

It is to be noted that in the Budget for the current year the revenue is estimated at £E14,756,000, or £E633,124 less than that actually realised during the year just closed, whilst the expenditure is set down at £E15,900,000, or £E957,783 less than that of 1914-15. The Budget was, admittedly, not framed in an optimistic spirit, and there is reason to believe that it was expected that the low figure fixed for the revenue would be exceeded. Conditions have changed very much for the better, even during the past three months; they certainly are vastly improved compared with what they were last autumn, when the uncertainty of the cotton position and the insecurity of the high seas materially affected the trade of the country and the financial position of its inhabitants. Moreover, there is undoubtedly plenty of money in the country. There may, it is true, have been no tourist season, but, on the other hand, we have had thousands of soldiers who have spent and are spending far more money than all the tourists in a bumper season would spend. And, what is more important from a Treasury point of view, instead of, as in a normal winter, going into the pockets of a restricted number of persons and of commercial concerns that spend their profits outside Egypt, this money has been distributed on a very large scale, and has served to improve the condition of many thousands of purely Egyptian inhabitants. And, finally, the agricultural conditions are most hopeful. Water will, it appears, be plentiful; despite the efforts of the locusts, the winter cereal crops are a great success, and there are good prospects of the cotton—the boll-worm is receiving drastic attention—and summer cereal crops. All things considered, therefore—the improving appearance of the land tax, Customs, railways, telegraphs, post office, and port returns assist one materially in arriving at this opinion—the prospects are far from being as unfavourable as they would appear. Egypt's worst time is undoubtedly over, and, without laying oneself open to the accusation of being over-sanguine, one can, I think, say that there is every reason to expect that the final results of 1915-16 will be much better than the Budget and the closing figures of 1914-15 would lead one at first sight to anticipate.

The Egyptian Government is certainly fortunate in having succeeded in balancing its accounts with a much smaller deficit than was estimated in March last. That deficit—£E1,468,659—has been debited to the General Reserve, which, standing at £E5,103,549 on April 1, 1914, was thus reduced to £E3,634,890 on April 1, 1915. As it is estimated that the securities in which this Reserve is invested have depreciated, owing to the war, by £E800,000, the amount available in this fund is only £E2,834,890. The Budget for 1915-16 provided for £E1,144,000 out of this to meet the deficit, but, as already mentioned, there is reason to believe that but a small amount will need in the end to be written off on March 31, 1916.

Sudan Finances in 1914.

Effects of the War.

(From Our Own Correspondent.)

Cairo, June 27.

Those who are responsible for the financial administration of the Sudan certainly deserve to be warmly congratulated on the balance-sheet that they have just presented to the public for the year ending December 31, 1914. From the Budget for the current year, which was reviewed in The Near East of March 19, and wherein the revenue was estimated at £E1,501,000, or £E143,000 less than that of the preceding year, it was apparent that the war was having its effect on the Sudan, which was already suffering from a period of deficient rains and low floods, and it was feared that very great difficulty would be experienced in balancing the accounts for 1914, if indeed it were possible to balance them without a deficit. What made the situation all the more delicate was that the Sudan has no reserve fund in the strict sense, and that Egypt had stopped the financial assistance which she had given for fourteen years in the form of an annual subsidy.

But, as usual, Bernard Pasha and his assistants have achieved the apparently impossible. They have not only balanced their accounts without a deficit, but actually have managed to transfer a surplus to what is known as the reserve fund account. When, after the stoppage of the annual subvention of £E163,000 and the payment in substitution to the Sudan by Egypt of £E85,000 for Customs dues levied on goods destined to the Sudan, the Financial Secretary continued to show a gross surplus of £E40,142, as against one of only £E100,937 under the old conditions, it was considered that he had done uncommonly well, but for a surplus of even £E12,203 to have been produced under existing conditions is still more remarkable.

The principal increases in revenue heads are:—Railways, £E29,420; posts and telegraphs, £E5,669; Customs, £E3,027; animal tax, £E10,736; but decreases are registered in land tax, £E32,139; royalties, £E19,164; tribute, £E5,912; rent of Government properties, £E10,783; and steamers, £E4,245.

The position of the Sudan, however, is one that will require the most careful manipulation. By the end of 1914 the whole of the special credits advanced by Egypt for capital expenditure had been spent, whilst the unexpended balance of the reserve account, including the surplus of £E12,203, has been pledged for expenditure during the current year. The expenditure for 1915, which has been kept at its lowest point consistent with the maintenance of efficiency and with attention to economic needs, has been framed on the assumption that the revenue will only be £E1,501,000. This is £E42,549 below the actual results of 1914. The margin is uncommonly small, but could not, for the reasons stated, be made larger. Under the circumstances, since the Sudan has no subsidiary means of obtaining financial assistance, unless climatic conditions and the international situation undergo some unexpected amelioration, there is every prospect that the current year will not be closed without a deficit. The showing of a surplus on the 1914 accounts has come quite as a surprise, but we must not allow the successful labours of the Sudan financial authorities in 1914 to lead us to expect, as a matter of course, a repetition of this achievement in 1915. There is a limit to all things and to all efforts, and there are abundant indications that the Sudan has to-day reached the margin beneath which it will be dangerous to curtail expenditure. Unless conditions improve very much, therefore, we must be prepared for the possibility of a deficit at the end of 1915. The able manner in which the financial affairs of the Sudan have been handled in the past encourage one to hope that the crisis will be surmounted with minimum hardship to the country, and should cause all concerned to rest assured that the very best will be done to meet the difficulties of the situation, and that, if a deficit has to be shown as a result of the year's working, it will be solely because circumstances rendered it unavoidable.

	1912. £E.		1913. £E.		1914. £E.
Receipts	1,440,635	.....	1,568,352	.....	1,543,549
Expenditure	1,421,334	.....	1,533,063	.....	1,531,346
Surplus	19,301	.....	35,289	.....	12,203

The above table shows how the results of 1914 compare with those of the preceding two years. It will be noticed that the figures for 1912 and 1913 differ slightly from those published as the closing totals. In explanation it should be mentioned that in 1914 a readjustment in the form of accounts took place, the provincial services, which were originally included in the central accounts, being separated therefrom and given their own budget. Moreover, as a subvention of £E163,000 was received from Egypt in 1912, and in 1913 and 1914 this was replaced by the crediting to the Sudan by Egypt of £E85,000 Customs dues on goods destined to the Sudan, an additional deduction of £E78,000 has been made in the final figures for 1912.

The revenue for 1914, although £E100,451 less than the estimate for the year, is only £E24,803 less than the net figure of 1913, but at the same time £E102,914 more than that of 1912. The surplus also compares favourably with that of 1912, before the bad climatic conditions set in.

This result would not have been attained, however, unless great economy and caution had been exercised in the expenditure. In a country like the Sudan, where so much depends on administrative efficiency and care has to be taken not unduly to restrict expenditure in directions which have such an influence on the future welfare of the community, and so of the State, it is exceedingly difficult, after having only just managed to satisfy all legitimate claims, to find means for curtailing expenditure to meet a sudden emergency, such as set in during the last five months of 1914. It speaks volumes for the ability of the Sudan financial authorities and for the loyalty and efficiency of the officials in the service that it has been possible to effect a reduction of over £E100,000

POSTAGE TO TURKEY.

A reciprocal arrangement has been made with the Turkish Government with regard to the postal facilities of prisoners of war. Correspondence posted by or intended for prisoners of war will be regularly exchanged between the United Kingdom and Turkey (free of all postal charges) through the intermediary of the Swiss Post Office, which has placed its services at the disposal of the respective Governments for this purpose. All correspondence for British prisoners of war in Turkey should be addressed to the Central Post Office, Constantinople, care of General Post Office, London. Letters and parcels (which must not exceed 11 lbs. in weight) only may be sent, and letters, but not parcels, may be insured. Money cannot be sent through the Post Office.

Mr. R. A. Willis, writing to the *Times*, says:—"With reference to Sir Ian Hamilton's appeal for comforts for the troops under his command, may I draw attention to the unsatisfactory arrangements for delivery of letters and parcels at the Dardanelles? Not only do many of the packages go astray altogether, but those that arrive take many weeks to reach their destination. The charges for postage also are excessively high.

Trade Notes.

Cyprus.

The following articles have been declared absolute contraband :—Toluol, and mixtures of toluol, whether derived from coal-tar, petroleum, or any other source; lathes and other machines or machine-tools capable of being employed in the manufacture of munitions of war; and maps and plans of any place within the territory of any belligerent, or within the area of military operations, on a scale of four miles to one inch or on any larger scale, and reproductions on any scale by photography or otherwise of such maps or plans. Linseed oil has been declared "conditional contraband."

Egypt.

Tenders are invited by the Controller, Cairo Tanzim Department, for the supply of 100 tons of natural asphalt required till the end of the financial year 1915-1916. Date, July 20.

Tenders are invited by the Ministry of Finance, Cairo, for the supply of articles of stationery required for the Government Departments during the year 1915-16. Date, July 22.

The British Chamber of Commerce of Egypt, Alexandria, reports that an agent in that city, who has hitherto represented a German firm, desires to secure the representation of a United Kingdom manufacturer of shoemakers' thread. A sample of the article required may be inspected by United Kingdom manufacturers at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C. United Kingdom manufacturers of shoemakers' thread may obtain the name and address of the inquirer on application to the Commercial Intelligence Branch, as above, but they should address any further communications regarding the inquiry to the British Chamber of Commerce of Egypt, 6, Rue de l'Ancienne Bourse, Alexandria.

The Vacuum Oil Company, Cairo, were the successful tenderers recently to the War Office, Cairo, for the supply of petroleum at the Tura.

A manufacturers' representative, with several years' experience of the Egyptian market, who is shortly revisiting Egypt, desires to represent United Kingdom manufacturers of fancy leather goods, stationery, fancy jewellery, electro-plated goods, cutlery, tobacco pipes, etc. Communications in this connection should be addressed to the Statistical and Information Department, London Chamber of Commerce, 97, Cannon Street, E.C.

Morocco.

H.M. Vice-Consul at Laraiche reports that a Spanish firm in that town wishes to get into touch with United Kingdom firms desirous of buying unwashed wool (laine en suint), of which the firm has about 40,000 kilogs. to sell. Correspondence with this firm should, preferably, be in Spanish or French. United Kingdom wool importers should apply, in the first instance, to the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C., for the name and address of the inquirer. Further communications regarding the inquiry should be addressed to the British Vice-Consulate, Laraiche.

Tunis.

According to the June issue of the *Bulletin Mensuel de l'Office du Gouvernement Tunisien* the total value of the foreign trade of Tunis during 1914 amounted to 239,110,975 fr., a decrease of 83,807,308 fr. as compared with the previous year. The value of the imports was 132,487,834 fr., a decrease of 11,766,844 fr. as compared with 1913. Decreases were most marked in live cattle, colonial produce, metal goods, and

textiles. On the other hand there was an increase of 16,753,518 fr. in the imports of cereals. The value of the exports in 1914 was 106,623,141 fr. This was a decrease of 72,040,464 fr. as compared with the previous year, and was partly attributable to the poor harvest, the value of the grain exports being over 25,000,000 fr. less than in 1913. There was also a decrease of 16,797,288 fr. in the value of the exports of phosphates, whilst lead and zinc also showed considerable decreases. The failure of the crops and the effect on commercial transactions of prohibitions on export seriously affected the trade of Tunis in 1914.

TRADE OPENINGS.

The *Chamber of Commerce Journal* (July, 1915) publishes the following trade openings. Where addresses are given, replies to the announcements should be mailed direct; where a box number only is given, replies should be addressed to that number, c/o the *Journal*, Oxford Court, London, W.C.

Well-established commission agent in Piræus wishes to represent British works or export firms for galvanised and black sheets, tin plates, ships and boiler plates, wire for nails, dry goods, Bradford and Belfast goods, woollen yarns, cloths, handkershiefs, felt and straw hats, teas, biscuits, caramels, all sorts of textile goods, etc. Address, No. 155, Agency Department.

Commission agent and merchant, established in 1898, desires to represent British firms in the following lines:—Cloth, cotton and woollen yarns, combed wool, boot leather, imitation astrakhan, and other English specialities. Special department for collection of debts and information of all kinds. Address, S. B. Nachmias, Roustchouk, Bulgaria.

Old-established commission agents in Alexandria desire agencies of British manufacturers and exporters, especially in hosiery, but also in any manufactured goods suitable for the Egyptian market. Address, Ben-Amozek Frères, Alexandria, Egypt.

A British company, established in 1908, as merchants and commission agents, having head office in Alexandria and branch office in Cairo, and agents in the principal towns of the Mediterraneam, with English directors and manager and trading throughout Egypt and in the Levant, is open to take up the sole agencies of first class home firms for any article (machinery excepted) which does not clash with existing business; also insurance of all kinds, except accident and life. References will be given to important British firms now represented by the company. Address, The Commercial and Agency Company of Egypt, Ltd., P.O. Box No. 691, Alexandria, Egypt.

Firms in Cairo desire to represent British manufacturers and exporters of all kinds of goods suitable for the Egyptian market, particularly of hats, boots and shoes, collars, shirts, stockings, flannels, neckties, etc. Address, Messrs. Cladakis Frères, 76, Bein-El-Harat, Cairo, Egypt.

Agent desires to represent for Cyprus manufacturers and exporters of textiles (woollen, cotton, silk and mixed goods, yarns, etc.), leather and splits, bedsteads, glass, iron goods, earthenware, hosiery, stationery, lace, hats, ribbons, colonial goods, etc. Address, Cyprien Ph. David, Nicosia, Cyprus.

First-class Serbian wholesale firm (Belgrade) desires to represent a large English manufacturer of cotton yarn. Address, No. 303, Agency Department.

Important Serbian firm (Belgrade) desires to represent a first-class English insurance company. Address, No. 304, Agency Department.

Important Serbian firm (Belgrade) desires to represent a first-class English shipping company. Address, No. 305, Agency Department.

British subjects from Turkey now resident in England will be pleased to learn that under special licence from the Board of Trade the Imperial Ottoman Tobacco Regie, of 158, Wardour Street and 83, Piccadilly, W., have just received a first consignment of cigarettes, including some "Deuxième qualité," a well-known and favourite brand in the Levant.

Near East Markets.

HARVEST OUTLOOK.

Reports received in Italy from Constantinople (says the *Daily Graphic* Rome correspondent) state that the Turkish harvest this year is a record one, particularly in Asia Minor. The crops in the vilayets of Adana, Erzerum, Sivas, Angora, Smyrna, and Broussa are specially excellent. The Minister of Agriculture is taking steps to provide the peasants with reaping, binding, and other harvest machines.

Equally favourable reports come from Bulgaria, where the harvest is double that of last year. In three weeks' time all the crops, with the exception of maize, will be harvested. Till this is done there is no danger of Bulgaria undertaking any warlike operations.

German agents have already made immense purchases of cereals in Bulgaria, Turkey, and Roumania, evidently in view of a winter campaign.

SUDAN COTTON.

The Tokar correspondent of the *Sudan Times* writes that since the cotton market was closed there have been only small quantities of cotton arriving for sale. This is being bought up by Suakin merchants at 20 P.T. per kantar, unginned. The total quantity of cotton sold in the Tokar market during the season just closed amounted to 204,000 kantars.

COTTON MARKET.

(From Our Own Correspondent.)
Liverpool, July 15.

Messrs. Reynolds and Gibson report as follows:—Egyptian Spot.—There has been only a quiet demand this week, which has resulted in moderate sales. Prices have had a declining tendency, and quotations are reduced 20 points for all descriptions, except for fine Sakellarides, which is reduced 25 points, and extra fine 30 points. Sales are estimated at 2,300 bales, against 2,000 bales last week.

Manchester Market.—Trade has fallen off slightly from last week. Egyptian yarn has been more or less neglected.

PRODUCE REPORT.

London, July 15.

Currants.

The market generally has been quiet this past week, as might have been expected, after the large forward purchases made out of the incoming steamers. Grocery fruit is mostly a little cheaper, with the exception of Zante. Smalls are in good demand. Provincials are quoted 27s. to 28s., Amalias 28s. to 29s., Patras 31s. to 33s., Gulf 31s. to 32s., Vostizza 36s. to 40s., Island 30s. to 31s., smalls 28s. to 35s.

In Liverpool, owing to the demand from the country falling away, trade has been quiet, and few sales are reported. The cargo of the s.s. Avon, about 650 tons, was on the market. It consisted mostly of Zante and Calamata fruit, but, with holders anxious for sales ex quay, prices declined somewhat. Quotations were:—Calamata 26s. to 27s., Zante 27s. 6d. to 29s.

Sultanas.

No arrivals have taken place, and the market has been mostly small, fine fruit being the most in demand.

In Liverpool the market is again firmer, and later sales, at 58s. to 63s., show an advance of 2s. to 3s. per cwt.

Dates.

There is a moderate business in old and new crop at recent rates.

Onions.

Egyptian still meet with a slow sale at last week's ruinous rates. Valencias, if sound, sell at a very slight advance.

Seeds.

Linseed has been quiet and values nominally unchanged. London-Calcutta spot and afloat 54s., July-August 54s. 3d., August-September 54s. 6d. Rapeseed is very dull and inactive. Guzera pure basis, June-July quoted 56s. 6d., and brown Cawnpore 49s. 3d. Cottonseed ruled firm, but is closing quiet; London-Egyptian spot cleared at £9, July £9 10s. value per ton.

Oils.

Linseed Oil.—The market is quiet, and prices show a marked decline. On the spot, pipes £26 5s., barrels £27; July-August, £27 5s.; September-December, £28. Rape Oil.—Japan continue to advance, but there is no change to note in brown or refined. Ordinary brown, on the spot, naked, £36 to £37; English refined, barrels, £38 to £40. Japan, in cases, c.i.f. afloat, May to August, £30 7s. 6d. Cotton Oil.—Crude is easier, but refined is unchanged. Crude, on the spot, pipes £29, refined, on the spot, pale, pipes £31 5s.; sweet, barrels, £36 to £37.

Oilcakes.

Cotton Cakes.—During the past week an active demand has occurred for arrived parcels of Egyptian, and with practically no further offers coming to hand for old crop positions, values have an upward tendency, holders at present asking £6 10s. ex ship and £6 12s. 6d. ex quay, while English makes offer in limited quantity at £6 12s. 6d. to £6 15s. per ton.

Linseed Cakes.—There are further signs of improvement in the trade, and more disposition generally on the part of country dealers to increase their stock, in view of a probable hardening in prices on account of increased difficulty in freights. Best London-made offer sparingly, and are, if anything, the turn dearer at £10 5s. to £10 10s. per ton. Fine quality Greek in bags make £10 10s.

Locust Beans.

This article continues very scarce and dear at £8 for whole and £8 5s. for kibbled.

NEWS FROM ALL SOURCES.

An American commerce report states that the trade in wild beeswax is constantly increasing in most of the African colonies, especially Gambia, Gold Coast, Nigeria, Angola, Sudan, Uganda, British East Africa, German East Africa, and Mozambique. A few years ago the exports of wax from these countries were almost insignificant, but now (according to Mr. E. Michel, the author of an article on this subject which appears in the *Bulletin Agricole du Congo Belge*) they amount to thousands of tons. Wax occupies the third place in the export trade of Angola, which ships 600 or 700 tons of wax every year, while Mozambique exports about 100 tons, and Portuguese Guinea 50 tons. In 1911 German East Africa sold abroad over 800,000 lbs., of the value of £40,000. The wild wax, when well purified, is comparable to European wax.

At Bow Street Police Court on July 3, Anastatius Vorres, formerly Greek Consul at Johannesburg, was again brought before Sir John Dickinson for extradition on the charge of committing fraud as a public official within the jurisdiction of the Greek Government. When arrested the accused declared that the matter had been settled in his favour. Detective-sergeant Goodwillie now stated that the depositions were expected to arrive from Athens next week. Mr. Herbert Smith, who defended, said that the accused was recently in Athens, and before leaving he called upon the Minister for Foreign Affairs to present his respects. He left without the least attempt at concealment. It was possible that the Greek Government would consent to withdraw the extradition proceedings in order that the accused might return voluntarily. The Magistrate, in granting a further remand, advised Mr. Smith to consult the Greek authorities with a view to their making representations to the British Foreign Office.

The Sudan Gold Fields Company, Limited, have subscribed £10,000 to the War Loans.

Messrs. Low and Bonar, of Dundee, are subscribers to the War Loan for a sum of £25,000.

Bulgaria's Commercial Progress.

The Bulgarian Minister in the United States contributes an article to the U.S. Consular Reports on the commercial progress made by Bulgaria within recent years. The following are extracts :—

At the time Bulgaria was launched as a principality its resources, both in men conversant with the administration of a State and its material assets, were very limited. Agriculture, the principal occupation of the people, was carried on in the most primitive way; commerce was mostly local or internal. No banking establishments, no savings banks, no industrial enterprises, hardly any railways, no harbours—nothing which really makes for the prosperity of a country existed.

Up to 1888 there were in the whole of Bulgaria, with an area of 36,765 square miles, only three railway lines in operation, covering 236 miles in all. Now the railway mileage is 1,486, while lines in process of construction or which have been already surveyed and are to be built will cover 1,048 miles, making in all 2,534 miles of railways.

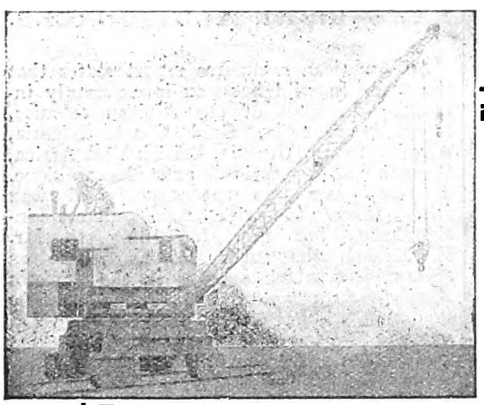
The two chief Bulgarian ports on the Black Sea are Varna and Burgas, and both of them thirty-five years ago were open roadsteads, unsafe and unfit for shipping; now they are well-built harbours provided with all the necessary accommodations for loading and unloading vessels. The improvement of the two ports has had for a consequence the increase of their imports and exports, as, for example, Burgas, which in 1903 had imports and exports of 50,000 tons; in 1911 they had risen to 389,256 tons. For the same years Varna's imports and exports were 217,000 and 467,000 tons respectively.

In regard to industrial development, Bulgaria, which at the time of its political emancipation had only about ten industrial establishments, now has 371. Among these are five sugar factories, several cloth factories, chemical, textile, paper, metallic factories, etc. The mining industry has steadily developed, as is shown by the fact that from 1892 to 1911, 2,221 permits for mine prospecting had been granted by the Government. Coal mines have been discovered and are being worked, one of them calculated to contain 30,000,000 tons of coal, and which during the first eleven months of 1914 yielded an output of 346,226 tons of coal. In order to encourage local industry the National Assembly enacted a law five years ago granting general and special privileges to various enterprises, such as canned meats, lumber manufactures, metallic industries, electric installations, etc. According to this law all the machinery, building, and raw materials necessary for the enterprise are exempt from duty. A free grant of land upon which to erect the factory and its appurtenances and a rebate on the railways for transportation are allowed. Special privileges include the exemption from patent or professional tax, from building or property tax, shares are not subject to stamp duty, free use of State quarries or domains for building purposes, etc. All State, district, and county departments are obliged to supply themselves with the products they may respectively need of these industrial establishments, even if they are 5 per cent. dearer than foreign products.

Agriculture, which is the chief occupation of the people of Bulgaria, and thirty-five years ago was carried on in a very primitive manner, has also received a great impetus. The whole area of the country is estimated to be 24,000,000 acres, of which 9,000,000 are arable fields. The old wooden ploughs, that could just scratch the surface of the ground, have been replaced by modern implements; the tedious and slow process by manual labour of reaping, threshing, and winnowing have been superseded by the more expeditious and efficient machines. The following statistics of the rapid increase of agricultural implements in one of the districts of Bulgaria show how ready the Bulgarian farmer is to adopt new methods of land cultivation. In 1911 there were in this district 2,431 fore-wheel ploughs, in 1914 there were 5,899; in 1911, reaping machines, 60; in 1914, 226; in 1911, winnowing machines, 5,999; in 1914, 8,443; in 1911, threshing machines, 158; in 1914, 649. I need not dwell upon the cultivation of tobacco, the production of silk or cocoons (1,476 tons in 1911), apiculture, or raising of bees. The latter especially has greatly advanced, as is shown by the fact that the 149 dividing hives existing in 1893 increased to 25,963 in 1910.

Commerce.

The same steady and wonderful development and advance is noticeable in the commerce of Bulgaria. In 1887 the foreign commerce of Bulgaria showed imports of almost 65,000,000 lewas and exports of almost 50,000,000 lewas. In 1911 imports stood at almost 200,000,000 lewas, and exports at almost 185,000,000 lewas. According to most recent statistics to hand for last year (1914), the imports from January 1 to the end of April were valued at 104,230,065 lewas, and exports at 75,872,400 lewas. This shows a marked increase over imports and exports during the same period in 1913, and it is calculated that had the year 1914 been a normal one the commerce of Bulgaria would have doubled.



30-ton Steam Travelling Crane.

CRANES

For RAILWAYS, DOCKS, HARBOURS and WORKS.

— ALSO —

HYDRAULIC BUFFER STOPS AND OTHER RAILWAY PLANT

SUCH AS

Turntables, Traversers, Tanks, Pumps, Water-Cranes, Capstans, Winches.

Seaplane Launching Apparatus.

Also Sole Makers of the "Stoney" Control Sluices, with Stokes' Patent Improvements. Over 1,000 already installed.

Trade Opportunities.

What are American* trade opportunities in Bulgaria? Basing the conclusions upon the progress hitherto made by Bulgaria and upon information supplied by people of wide and varied commercial and financial experience, I do not hesitate to draw the attention of American business men to Bulgaria as a promising and remunerative field for American commercial and financial activities in the future. It is a small country, with an area of 43,629 square miles (including the recently acquired territory), and a population of over 5,000,000, but it is a growing country, animated by the desire to develop its resources and expand its activities in the direction of steady, diligent, and peaceful progress. In the development of various industries, mining operations, and railway extension a great deal more could be done if the necessary capital were forthcoming. Bulgaria does not boast of great capitalists, and in order to draw foreign capital its Government is always ready to grant concessions for various enterprises on just and reasonable terms. Recently, in granting a concession for a railway line to the Ægean Sea and the construction of harbours there, it guaranteed 10 per cent. profit on the capital. Agricultural implements, machinery of various kinds, wood and its by-products, boots and shoes, and many other kinds of goods can find in Bulgaria a good market. To ascertain precisely what is needed and in what proportion must be a matter of special study and investigation on the spot.

Banking.

I think it is generally conceded that the development of commerce follows the establishment of banks, which are to facilitate financial transactions and act as pioneers in opening up new fields for the investment of capital. The absence of an American bank in Bulgaria and of direct banking connections between the two countries is a great drawback to the expansion of Americano-Bulgarian commerce. An American bank in Bulgaria will certainly obviate many of the difficulties which hamper commerce between the United States and Bulgaria, and will prove a profitable, as well as a useful, institution in many other ways.

Shipping.

Considering the great distance that separates Bulgaria from the United States, it is essential for the regular and progressive development of commercial relations between the two countries to have easy and rapid communications. To further this end it is of prime importance to establish a regular steamer service between the Bulgarian port of Dedeagatch, on the Ægean Sea, and New York, and occasional services might be maintained even to the two Bulgarian ports, Burgas and Varna, on the Black Sea.

In the last place, I would recommend that in the beginning, at any rate, a fair and reasonable amount of credit should be given to solid and well-tried Bulgarian commercial firms against proper guarantees. It is this custom or method of giving discreetly credit to merchants who do not possess large capital at their command, but are good enough and honest enough to stand by their obligations, that has helped German and other firms to get hold of the Bulgarian market. The policy of "cash down" may be sound and safe, but you have to adapt your methods to the customs and conditions of the people you are dealing with.

WAR ON GERMAN TRADE.

In connection with the campaign undertaken by the Board of Trade, on the advice of the Advisory Committee on Commercial Intelligence, to assist British manufacturers and merchants to secure trade formerly in the hands of Germans or Austro-Hungarian firms, the Board continues to receive a very large number of inquiries for the names of sellers or buyers of articles.

Special arrangements have been made in the Commercial Intelligence Branch of the Board of Trade for dealing with these inquiries, and lists are prepared and circulated of articles which inquirers desire (a) to purchase, and (b) to sell. List 29 is now ready.

* Though the article is primarily intended for American consumption the advice proffered applies equally to British trade.—ED. *N.E.*

Engineering Notes.

American Proposals for the Water Supply of Athens.

In spite of the wearisome exchange of "strong" and "final" Notes between Washington and Berlin, the war storm in Europe has had a very beneficial effect on American economics. Never has there been such "hustle" in American industry and commerce, and the activity of the American commercial traveller has been rewarded with excellent results, while the agents and representatives of contractors and engineering firms have been studying the prospectuses and plans of railways, waterworks, harbours, tramways, etc., which are to be constructed in several parts of the Near East. The waterworks of Athens, which but for the withdrawal of M. Venizelos from the Government would now have been in progress, have also attracted the attention of American engineering firms, and General Wilson, representing an enterprising firm of contractors of New York, has recently visited Athens for the purpose of studying the plans, etc., which the Greek Government possesses for the supply of Athens and Piræus with water taken from Lake Stymphalia and the river Mellas. His impression is that his company could undertake and complete the works in three years, instead of five, which is the time limit in the prospectus. He communicated the details to his company, and was informed that a party of engineers, with the vice-president, will soon proceed to Athens to carry out local surveys for their guidance and for the formation of the company's proposals. It was stated that General Wilson said that the firm of Pierpont Morgan has an interest in his company, which has up to now carried out works to the value of 150 million dollars.

A Substitute for Brass.

With the increasing demand for munitions of war and the consequent urgent need of certain metals a situation has been created that few, if any, of the living scientists and engineers expected to see. Brass is mostly needed, but brass is a compound metal containing two-thirds copper to one-third zinc, and as zinc is now scarce and consequently very dear, a substitute of this alloy would be greatly appreciated by the manufacturers of munitions of war. The substitute, apparently, is found in the aluminium bronzes, which are now much cheaper to manufacture than the brasses, and in certain respects are superior to the latter. Moreover, whereas brass requires percentages of zinc varying between 30 and 40, the aluminium bronzes require only from 7 to 10 per cent. aluminium to produce properties of the same general character. The founding of these alloys, however, presents difficulties different from those associated with the casting of brasses, difficulties which centre round the tenacious film of alumina which is formed on the surface of the molten alloy, and which have to be overcome before satisfactory castings can be produced. On this point Professor Carpenter, of the Royal School of Mines, in his paper on "The Production of Castings to Withstand High Pressures," published some time ago in the "Proceedings" of the Institution of Mechanical Engineers, gives some very valuable advice. "The aluminium bronzes," he says, "should be poured as quietly as possible, and every care should be taken to prevent the metal from being agitated after it has entered the mould. With care and a little practice castings can be made with regularity that are absolutely free from dross, if the following precautions are adopted:—(1) The metal should be poured very slowly; (2) the gate should be so arranged that the metal enters the mould at the lowest possible point. Any form of gate will do, but it is decidedly advantageous to provide a sort of well at the bottom, and use rather a narrow opening; and (3) in the case of greensand moulds, wet sand must be guarded against, particularly in the lower parts of the mould where the metal rests on the sand. If a rather close sand is used it is far safer to dry the surface of the lower part of the mould. Under these conditions the metal enters the mould quietly; and the final result is a casting with a thin and approximately uniform skin of alumina containing perfectly clean metal inside." By the use of this excellent substitute for brass the use of zinc for the production of alloys should, under present circumstances, be restricted to those in which the metal is absolutely necessary.

History of Aluminium.

It seems odd that the "expensive metal" aluminium which until recently was used in the manufacture of jewelry should now be used as a substitute for the "common" old zinc! It was as far back as 1809 that Sir Humphry Davy predicted that in the future a metal would be extracted from the common substance alum. To this metal he gave the name aluminium. However, though its birth was predicted by an Englishman, a German, Dr. Wöhler, first discovered a method of obtaining free aluminium. That was in 1827; in 1854 a French chemist, De Ville, produced the metal from its chloride at a cost of 1s. per ounce; whilst in 1887 Heroult, in Europe, and Hall, in America, took out patents for the electrolytic production of aluminium, and from that date may be reckoned the commercial life of the aluminium industry. The electrolytic production of aluminium at a low cost necessitates a plentiful supply of water power, and consequently one finds but few aluminium plants in England. Two or three years ago the annual output of aluminium was recorded as follows:—Aluminium Company of America, 12,000 tons; Aluminium Industrie Gesellschaft, Neuhausen, 5,000 tons; Soc. Electro-Metallurgique Française, 6,000 tons; British Aluminium Company, 4,500 tons; eight other companies producing 6,200 tons; making a gross total of 34,700 tons. The industry has rapidly increased, in recent years, in the East, particularly so in India—Madras and Bombay. The local working of aluminium was first started in the Madras School of Arts in 1898. Since then a considerable business has developed, and in 1903 it was taken over from the Madras School of Arts by an Indian company.

Trans-Grecian Railway to India.

I learn (says the London correspondent of the *Dundee Advertiser*) that the railway line which is to connect Greece with the rest of Europe is now nearly complete, and will be opened to traffic next month. It will then be possible to travel from Paris to the Piræus in something less than sixty hours, and a saving of about thirty hours each way will be effected in the Indian mail service. The new railway, which was opened as far as Larissa in 1908, will also provide a better and quicker route from England to Egypt and India. It has already enabled travellers to visit such sites as Tanagra, celebrated for its figurines, Thebes and Livadia, and the battlefield of Chæronea. This portion of the line has also provided a new route to Delphi, hitherto accessible by sea alone, and has brought Chalkis and the lovely island of Euboca, with the remains of classic Eretria, within a few hours of Athens. The railway company has done its best to emphasize the classical aspects of this route by adopting a double nomenclature for its stations. Side by side with the modern names are the ancient appellations, with their reminiscences of Aristophanes and the tragedians, the historic Pass of Thermopylæ, the Catalan Castle of Lamia, and so on.

RAILWAYS IN ASIATIC TURKEY.

The participation of foreign capital in Turkish railway construction (says *Engineering*) will appear from the following table, and it should be remarked also that non-German capital is interested in the German undertakings :—

German Capital.

Anatolian Railway (1,032 km.).—Share capital, 135,000,000 fr. in 1913, reduced to 133,861,000 fr.; debentures, 215,365,138 fr.

Baghdad Railway (1,053 km.).—Share capital, 15,000,000 fr.; debentures, State aid, obtained in 4 per cent. debentures of the Baghdad Railway loan, third series (exclusive of destroyed portion), a total of 279,276,630 fr. The debentures of the third series, 118,896,000 fr., still remain in the company's portfolio.

English Capital.

Smyrna-Aidin Railway Company (610 km.).—Share capital, £1,800,000; debentures, £3,360,000.

French Capital.

Smyrna-Kassaba Railway, with extension, including Soma Panderma line (436 km.).—Share capital, 13,000,000 fr. and 250,000 fr. founders' shares; debentures, 70,000,000 fr.

Société Damas Hama and branches (1,226 km.).—Share capital, 15,000,000 fr.

Société de Chemin de fer de Palestine.—Share capital, 4,000,000 fr.; debentures, 10,000,000 fr.

Belgian Capital.

Mudania-Brussa Railway.—Share capital, 500,000 fr. and 500,000 fr. founders' shares; debentures, 5,000,000 fr.

The railways in Asiatic Turkey have materially advanced the industrial conditions of the country, at the same time as the increasing yield of agriculture has helped to swell the receipts of the railways. The Anatolian Railway of late years has not only not had occasion to avail itself of the guarantee per kilometre of the Government, but the Government received from the railway a sum of 546,061 fr. for the year 1913.

Taking as a whole the railways for which the Government had to provide a kilometre guarantee, it will be found that the guarantee to be paid decreases year by year. It was :—

£T.		For the year.
238,041	.....	1913-14
341,387	.....	1912-13
404,317	.....	1911-12
528,917	.....	1910-11
748,910	.....	1909-10

The above sums for the years before 1913-14 comprise also the guarantee on the European-Salonika-Constantinople line, with respectively £T129,628, £T141,983, £T158,323, and £T209,389. The building of new lines, which during the first years may have to work unprofitably, will probably at times again swell this guarantee.

EGYPTIAN RAILWAY NEWS.

The Cairo correspondent of *Railway News*, writing on June 19, says that railway earnings are at a very low ebb all over Egypt, and seem likely to remain so. There is still a heavy military traffic going on, of which the State Railways are reaping nearly all the benefit. The wounded men from the Dardanelles, and Turkish prisoners from the same place, being distributed throughout the country, also assist railway revenue.

The Egyptian State Railways are in the market for their annual coal requirements, and tenders will be received up to July 22. They require 360,000 tons of Welsh or American coal, and it is freely stated in Cairo that a very large portion of the order will, once again, go to America. North Country or Scotch coal, so largely in use on British railways, will apparently not be considered here.

Public works generally are at a standstill, but some little work is being done on the new State Railway station at Alexandria, while it has also been resumed on the improvements to the Helouan line. The State Railways are advertising the usual summer reduction in the rate for the transport of quarry stone; but in the absence of public and irrigation work and house building, there is little or no stone traffic. As showing how the war has affected goods traffic generally, it may be mentioned that the earnings from this source of the Egyptian Delta Light Railways during the year 1914-15 are stated to have been about £E75,000, as against £E103,000 during the previous year, a decrease of over 25 per cent. On the other hand, this company has, owing to careful management and judicious nursing, probably been comparatively less affected by the conditions consequent upon the war than any of the other three systems in the country, the State Railways, the Basse Egypte Railway, and the Fayoum Light Railway. At the recently held general meeting of the Cairo Electric Railway and Heliopolis Oasis Company it was announced that the net profits for last year were 485,306 frs., but the dividend is passed.

Following up the resumption of week-end tickets between Cairo and Alexandria and Cairo and Port Said, the State Railways have now reintroduced the same facility, at reduced rates, between Cairo, Tanta, and Damietta, the latter the Mediterranean port at the mouth of the right arm of the Nile.

The *Cyprus Gazette* announces that the bank notes issued on March 2 have ceased to be current and legal tender after June 30, 1915.

NATIONAL BANK OF GREECE.

ESTABLISHED IN 1841.

CAPITAL - Dr. 20,000,000. RESERVES - Dr. 13,500,000.

Head Office: ATHENS.

BRANCHES.

Aegion, Agrinion, Almyros, Amalias, Amphissa, Arta, Atalante, Calamata, Calavryta, Céphalonia, Chalkis, Corfu, Corinth, Cythère, Dimitzana, Gythium, Ithaque, Janina, Karditza, Kyparissia, Lamia, Larissa, Lévadia, Mégalopoli, Messina, Missolonghi, Naupacta, Nauplia, Patras, Paxos, Piræus, Poros, Pylos, Pyrgos, St. Maure, Salonika, Santorin, Sparta, Syra, Thèbes, Trikkala, Tripoli, Volo, Zante,

Every kind of Banking Business Transacted. **Correspondents in all Parts of the World.**

FOREIGN COMPANIES IN TURKEY.

(From Our Special Correspondent.)

Athens, July 3.

The Turkish *Official Gazette* publishes a list of foreign companies operating in Turkey who have not complied with the provisions of the new Companies Law. The notice states that these companies, not having accepted the law, are temporarily prohibited from transacting new business in Turkey, but no restriction will be placed on the accomplishment of transactions and contracts entered into anterior to the date of the official notification. The list is as follows, no orthographic corrections having been introduced :—

Alleanza Agrippina of Cologne, Assureurs Maritimes Français, Anatoly d'Athenes, Atlas, Austro-Americana Steamship Co., Achaia Steamship Co., Alleanza de Gênes, Alliance Insurance Co., Avzania, Anglo-Syrian Trading Co.

La Bâloise à Bale, British Dominions, British and Foreign Marine Insurance Co., Berolina at Berlin, the British Re-Insurance Co., Banque Franco-Turque, Banque Française.

Campania Société Anonyme d'Assurance; Colombo Société Anonyme d'Assurances, Comité des Assureurs, Compagnie d'Assurances Generales Maritimes, La Célérité; Compagnie Viennoise, Caisse Paternelle; Confiance.

Deutsche Ruk und Mitt, Dresden, Compagnie Generale Dusseldorf of Dusseldorf.

El Dia, Essex of London, Eastern Telegraph Co., Limited.

La Foncière de Pesth, Fortuna, Foscolo Mango Co., Limited, La Federale of Zurich, Francfortoise of Frankfurt.

Generala de Bucarest, "Gauthoid," Germania of Berlin, General Life Insurance Co., George Chisnell and Sons Co., Limited, Gebr Turting, Société Anonyme Grin of Mannheim.

L'Industrielle, International Consortium of Dusseldorf, International Insurance Co.

Liverpool and Globe Insurance Co., London and Lancashire, La Securité Generale, L'Equité, La Liberale, Leslie and Godwin, Limited, Liguria de Gênes, Lloyd Allemand of Berlin, Lloyd's, Lloyd Sabendo, London Salvage Association, London and Provincial Marine and General Insurance Co., La Mondiale, La Perseverante, La Sicurita, Le Monde, S. Laprevot and Co., La Fontaine Brothers, Limited.

Yacht Club of France, Yorkshire Insurance Co.

The shipping agencies are, of course, entirely closed down, and nearly all the insurance offices are simply attending to inquiries in connection with unexpired policies, claims, etc.

The British insurance agents are rather perturbed just now in connection with claims arising out of the recent conflagration, as under the Royal proclamation they are debarred from making any payment in Turkey. Probably the majority of the claimants are Turks, who would have no difficulty in getting a favourable judgment in the Turkish courts, and the execution of such judgments might have very serious consequences for the agents. If the funds collected by an agent since the outbreak of the war are sufficient to meet the company's liabilities, and this the authorities can ascertain from the agents' books, it will probably be a very difficult matter to refuse to pay the claims. Such refusal might involve the confiscation of the agent's own private property.

EGYPTIAN HOTELS.

In the House of Lords, on July 9, a considered judgment was given by Earl Loreburn and Lords Parker of Waddington, Sumner, and Parmoor in an appeal by Mr. James Mitchell, surveyor of taxes, against an order of the Court of Appeal in favour of the respondents in this House, the Egyptian Hotels, Limited.

The company was registered in England, and carried on business from England in Egypt, where it owned certain hotels. In 1908 resolutions were passed that the company's affairs in Egypt should be managed exclusively by a local board of management. They were to retain the profits in Egypt and remit to England what might be necessary to pay dividends to shareholders here and for expenses incurred by the London board. The London board were to keep accounts, recommend dividends, and control the capital.

The Court of Appeal, reversing the decision of Mr. Justice Horridge, held that the powers still exercised by the London board were only powers to deal with profits after they were made, and did not refer to the trade of the company; that no part of the trade was carried on in the United Kingdom; and that the company was not assessable to income-tax since 1908 except in respect of profits remitted to this country, the liability as to which there was no dispute.

From that decision the Crown appealed.

Earl Loreburn said he felt great difficulty in this case, and if any point of law had been involved he should have desired a re-argument. But the law had already been laid down in two cases by this House, and the only question was whether or not the case came within the principle. For himself, he agreed with Lord Parmoor, whose judgment he had had the advantage of reading, that it did, and that the appeal of the Crown should be allowed. He added : "It is a question of fact, and I think it is very near the line."

Lord Parker and Lord Sumner both gave judgment expressing the contrary opinion, and were for affirming the Court of Appeal.

Earl Loreburn : The House is equally divided in opinion, and I ought to say that the rule in such a case is that the appeal stands dismissed, and that no costs are allowed to either side.

Accordingly the decision against the Crown stood, no order as to costs.

The *Morning Post*, on Wednesday, published the following comment from a legal correspondent :—"The decision is of the greatest importance to hundreds of companies operating outside the United Kingdom. But very few, if any, of these companies will be able to claim the benefit of the decision, and, unless they alter their constitution, they will continue to be assessable on the whole of their profits. The reason why the Egyptian Hotels Company succeeded in having their assessment reduced was that their articles of association had been specially altered so as to leave the control and direction of the business solely with the local directors. Hence Lord Parker was able to say that 'in the absence of any act done or directed by any person resident here in participation or furtherance of the business operations in Egypt,' the trade was carried on wholly outside the United Kingdom. When the case was argued in the first instance before Mr. Justice Horridge the then Attorney-General observed that the articles of the company were ingeniously contrived, though legitimately, for the purpose. Accordingly, having regard to the fact that the Law Lords were equally divided, companies which desire to avail themselves of this decision will have to alter their articles so as to follow as closely as possible the regulations of the Egyptian Hotels Company, and in particular the London directors must be careful not to control or direct the business operations of the directors resident abroad."

COMPANY MEETINGS.

"FLOWER" MOTOR SHIP CO.

The second annual general meeting of the members of the "Flower" Motor Ship Company, Ltd., was held on Tuesday, June 29, 1915, at Winchester House, Old Broad Street, London, E.C., under the presidency of Sir Marcus Samuel, Bart, the chairman of the company.

The Chairman said, inter alia : Gentlemen, it is disappointing to your directors that they are unable to submit to you any trading account, the company having derived its income during the past year from interest on capital.

The motive for the founding of this company having been to encourage the building of internal combustion engines in the United Kingdom, it is something to record and even to be proud of, that we have succeeded in enlisting the interest of two of the most prominent and enterprising of our shipbuilding firms, namely : Messrs. Swan, Hunter and Wigham Richardson, Ltd., and Messrs. Sir W. G. Armstrong, Whitworth and Co., Ltd., who are known, not only for their enterprise, but for their fair dealing, and both have been proved in this venture, as I shall show to you. The motor vessel Arum had already been delivered to us when I last addressed you, and she had made, up to that time, satisfactory demonstration of the practicability of the design of her engine. She proceeded from London (where she then was) to Newport, and thence to the Persian Gulf. Her engines worked quite satisfactorily up to her arrival in Port Said, but subsequently many adjustments had to be made. She loaded in the Persian Gulf, where she unfortunately grounded, and thence returned to discharge her cargo in London.

After her repairs the Arum proceeded from London to Newcastle-on-Tyne, loaded a full cargo of coal for Port Said, and thence she went to Alexandria and loaded a cargo of cotton seed and onions to Hull, where she has now discharged. Constant troubles were developed with the engines.

The motor ship Arabis only commenced working on February 1. Owing to the orders of the Admiralty, she was not able to run a trial trip, and as a compromise, we arranged that she should do a trip from Newcastle-on-Tyne to Port Said, loading at Alexandria a cargo of cotton seed and onions, and this voyage she duly fulfilled. Defects also developed in the engines of the Arabis, and I am glad to say that Messrs. Swan, Hunter and Wigham Richardson, Ltd., meeting us in a broad and liberal fashion, have agreed to accept the running of these two vessels as for their account, taking over all the risks and paying to the "Flower" Company four per cent. per annum on instalments which we have paid them. They will run the boats, if necessary, for a certain period, when we shall have the option of taking them over, if (as they are confident) they make them thoroughly satisfactory. I need scarcely say that, not only do I hope they may, but from the running of the boats in the latter part of their voyages (after temporary repairs had been made at Gibraltar and Malta), there seems a good possibility of their confidence being justified.

Many very valuable lessons have been learned from the experience that we have had with these ships. In the first place, it is conclusively demonstrated that the waste heat from the engines can be profitably utilised in helping to raise steam on the donkey boilers. In the second place, the consumption of oil in the main engines has surpassed the most sanguine anticipations of economy under that head. I am convinced that the two-cycle engine will be developed from this beginning to a thoroughly practical and useful unit. The two boats carried very large quantities of onions from Egypt, and onions are perishable, but both vessels turned out their freight in splendid condition, notwithstanding the somewhat protracted voyages which they made, thus proving that for perishable cargoes these ships, having no boilers which can heat perishable goods, are a great advantage over steamers.

The Abelia, the vessel which we contracted for with Messrs. Sir W. G. Armstrong, Whitworth and Co., Ltd., for delivery in 1914, is not yet completed, and when she is, she will not be allowed by the Admiralty to make a trial run in accordance with the terms of the

Digitized by Google

contract. I am happy to say that here, too, the builders have met us most fairly, and have agreed that the first voyage shall be considered a trial trip, and shall be run entirely at the builders' risks, they paying five per cent. on the money which we have only just paid them in anticipation of getting the ship delivered to us. The engines of this ship, built by the Wallsend Slipway and Engineering Company, Ltd., have run a satisfactory trial at moorings, and, we hope, will demonstrate their entire efficiency in working.

As you can well understand, your directors have had great difficulty in employing your funds profitably, because we never knew when the ships would be delivered, and we had to keep our money ready in a liquid form. Under the circumstances, you will appreciate that we are doing well in being able to pay you a dividend of four per cent. for the period ended December 31, 1914, more especially seeing that £75,000 of the capital of the company was not called up until March, 1914. The dividend will be payable on July 7.

It is due to the directors and managers to again call your attention to the fact that no fees of any kind have been debited to the accounts.

NORTH CAUCASIAN OILFIELDS.

Mr. Francis Allen presided on Wednesday at the meeting of the North Caucasian Oilfields, and in moving the adoption of the report explained that the output of oil for the year, at over 22,000,000 poods, had fallen short of the estimate of 25,000,000 poods, for reasons mainly connected with the war; a large portion of their staff had been mobilized. The average price realized, at 35.04 kopecks per pood, was, as he had warned them at the last meeting, a little less than that for the previous year, but it was a very remunerative price, and one which he thought could be counted upon for the current year. As, so far, they had produced more oil than for the corresponding period of last year, while the average price still kept up, the outlook could be described as extremely satisfactory. Indeed, they were in a position to announce that an interim dividend of 1s. per share would be distributed on October 1 next. They had £200,000 on this side, or sufficient for the dividend about to be distributed, and for the interim dividend in October, with a margin to carry the company on until they paid another dividend at about the corresponding time next year. In Russia they had about 2,000,000 roubles in the bank at Petrograd, to which 260,000 roubles were being added each month. Accordingly, when they met a year hence they should have, at the normal rate of exchange, if it had been restored by then, something like half a million sterling in Russia. For the purposes of the payment of the dividend next year they would have to draw upon that sum, and no one could forecast what the rate would be then, but with the opening of the Dardanelles it would undoubtedly come down. The report was adopted.

COMPANY NOTES.

Anchor Line.

The report of the Anchor Line (Henderson Brothers), Limited, states that the various services of the company have been well maintained, considering the exceptional circumstances which have prevailed. The Indian passenger business has been seriously dislocated owing to the outbreak of war. The cargo business to the East has been rather better than usual, whilst homeward rates of freight, at a low level previous to August last, have considerably advanced since that date. The Atlantic passenger trade in both the Glasgow and Mediterranean services shows a decrease from last year's business. Since the outbreak of war the numbers carried have been small, except westbound during August. Freight earnings on both Atlantic services show an advance on last year's totals, especially on eastbound business. A large number of the company's steamers have been requisitioned for Government work, and several vessels are still thus employed. To maintain satisfactorily both the Indian and Atlantic services it has been necessary to charter tonnage, for which the company has had to pay high rates. The profits for the year amounted to £307,272, to which is added £86,962 brought forward, making £394,235. Out of this sum there has been written off for depreciation £125,866, placed to reserve account £100,000, and there has been paid debenture interest £19,121 and dividend on preference shares £16,334, leaving a balance of £132,913. The directors recommend payment of a dividend on ordinary shares at the rate of 10 per cent. and a bonus of 5 per cent., both free of tax, which will absorb £37,500, leaving £95,413 to be carried forward.

Suez Canal Company.

The Suez Canal Company has issued a denial of the report emanating from an Italian source that navigation through the canal has been reopened after a momentary interruption due to the sinking of a ship, which necessitated considerable work. The company declares that navigation through the canal has never been interrupted, as is shown by the publication of the daily receipts.

Roumanian Companies.

According to the *Curierul Financiar* (Bucharest) of May 23, the Bureau of Statistics of the Roumanian Ministry of Commerce and Industry has published statistics of the joint stock companies operating in Roumania at the end of 1913, from which the following particulars are taken:—

Since the creation of the National Bank of Roumania in 1880 there have been 197 banks formed; most of them have been established since 1900. Their subscribed capital at the end of 1913 amounted to an aggregate of 240,042,460 fr., of which 215,803,825 fr. was paid up. At the end of the 1912 working year the total funds of these banks amounted to 2,273,005,585 fr.

At the end of 1913 the industrial companies numbered 168 with a total capital of 435,967,951 fr.

There were 53 commercial companies operating in Roumania at the end of 1913 with a total paid-up capital of 40,561,992 fr. Bucharest was the headquarters of 36 of these companies with a total paid-up capital of 35,996,145 fr.

Two assurance companies were established in 1892 and five others in the following year. Their total subscribed capital amounts to 14,350,000 fr., of which 13,038,255 fr. was paid up at the end of 1913. The premium fund amounted to 80,650,217 fr., and the reserve funds to 27,576,200 fr.

Up to the end of 1913 the number of foreign companies which had obtained permission to operate in Roumania was 44; their capital amounted to 251,938,055 fr., only a portion of which was employed in Roumania. The larger number of these companies are interested in the petroleum industry, the remainder being engaged in various industries such as mining, forestry, electricity, etc.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for week, 231 tons (last week 284 tons). Hurgada production for week, 240 tons (last week 274 tons).

BANK OF EGYPT.—On July 20 a fourth return of £1 per share will be made, making a total return of £7 per share.

EGYPTIAN DELTA LIGHT RAILWAYS.—Total receipts for the ten days ended June 20 amounted to £E3,689, as against £E5,468 for the corresponding period of last year.

PRIVILEGED COMPANY TO PROTECT PRODUCTION AND TRADE IN CURRANTS.—The numbers are announced of bonds of the 5 per cent. sterling loan drawn for redemption at par on 1st prox., payable in London by Messrs. Emile Erlanger and Co., 8, Crosby Square, E.C.; also at the offices of the Bank of Athens and its branches.

SUEZ CANAL.—Traffic receipts for the 11th and 12th inst. amounted to 700,000 fr., against 590,000 fr. for the corresponding days last year.

NOTES OF THE WEEK.

The opening of the Greek Chamber has been adjourned by Royal decree to August 16. There would seem to be little doubt in Greece itself that the Government, in thus proroguing Parliament, has acted *ultra vires*, but the state of King Constantine's health is put forward as sufficient justification for violating the Constitution. Outside Greece the incident will only receive attention as an indication of the Government's determined attitude of hostility to M. Venizelos. On behalf of his party, which represents a working majority of the Chamber, M. Venizelos undertook that, if Parliament were summoned within the constitutional limit of time, he would agree to an adjournment in order that the necessary time for the re-establishment of the King's health should be given before the Cabinet resigned. M. Gounaris ignored this offer, and preferred to take advantage of King Constantine's illness. Whether the adjournment is a preliminary to the dissolution of the Chamber with a view to seeing whether fresh elections, possibly under more judicious control, would give more favourable results to the present Government, remains to be seen. M. Venizelos does not consider a dissolution probable, as he refuses to believe that the Government would go so far in flouting the wishes of the people.

It is apparent from the resignation of M. Zographos, the Foreign Minister, that M. Gounaris has not been able to carry his whole Cabinet with him in his present policy. No reasons are assigned for the resignation, but as M. Zographos was known to be sympathetic to M. Venizelos, it may be inferred that he refused to be a party to the Government's high-handed action. In this domestic quarrel the higher interests of Greece are in danger of being overlooked. It may suit the Government's purpose to maintain that it stands for the integrity of Greece, which would be jeopardised by the return to power of M. Venizelos, who was prepared to surrender territory to Bulgaria, but the contention will no longer deceive anyone. Since M. Venizelos recommended King Constantine to come to terms with Bulgaria in order that Greece might take possession of a large extent of territory in Asia Minor, much water has flowed down the Dardanelles. In resuming office the ex-Premier would in no way be pledged to the course he recommended six months ago, but his presence at the head of the Government would be a guarantee that Greece's policy would be dictated solely by the interests of the country, and not in any partisan spirit.

Before long M. Gounaris may find that, while his attention has been wholly engrossed in an attempt to outmanœuvre his political opponent, circumstances have stolen a march upon him. Although M. Venizelos is not necessarily committed to war on the side of the Quadruple Entente, M. Gounaris has used the allegation to such an extent that he has virtually bound himself to a policy of no-war-under-any-conditions. In the meantime, however, the Greek population in Asia Minor is suffering terrible hardships at the hands of the Turco-German authorities, and their wrongs are crying out for redress. In keeping with the system under which the Germans require the Turks to carry on the war, it would seem to have been decided that the whole Greek population of the coast line of Asia Minor has to be removed into the interior. The manner in which such an order is likely to be carried out by the Turks and Germans can be imagined, as well as the sufferings of the Greeks, when a town of twenty-five thousand inhabitants has to be evacuated. Moreover, the fact that the military exigencies of the measure are apt to be lost sight of in the eagerness of the Turkish civil population to possess themselves of their Greek neighbours' property adds to the bitterness of the victims. How, then, does M. Gounaris propose to deal with the problem? Diplomatic remonstrances are not likely to avail much at this juncture. They were tried before the European war broke out, when the policy of expatriating Greeks was started on a comparatively small scale, and proved a failure, in spite of the apparent goodwill of Talaat Bey. If war with Turkey becomes inevitable, how will Greece appreciate the prospect of waging it under the Gounaris Government, with the Commander-in-Chief still incapacitated by illness?

The Greeks have not been slow to point the moral of the Turkish persecution of their fellow-countrymen in Asia Minor. Germany's action in allowing her ally to exterminate the Greeks, it is remarked in the Press, prove her true feeling towards Greece, and it is asked: How can Greece count on the support of the Central Powers? She can certainly not count on any such

Digitized by Google

support, for the reason that she is of little or no use to them. Germany derives a moral advantage from the maintenance of Greek neutrality, and the Emperor has a convenient medium in Queen Sophie for issuing his threats to neutrals. But with Greek aspirations and Greece's interests Germany has no sympathy; still less are they worth the bones of a single German soldier. The lavish distribution of German money in Greece has contrived to hide this elementary fact from some Greek politicians; but the sufferings of their fellow-countrymen in Asia Minor, whose potential value to Greece has hitherto been rated lower than that of two thousand square kilometres of territory in Macedonia, has had the effect of removing the scales from their eyes.

The issue in Bulgaria of a Ministerial order definitely suspending railway communication with Turkey may prove a more important step than would appear at first sight. Negotiations between the Bulgarian and Turkish Governments on the subject of the Dedeagatch railway have been in progress for a long time. The line in question forms a portion of the European trunk line to Constantinople. After crossing Bulgaria it enters Turkey and, following the course of the Maritza, runs to Adrianople and eventually re-enters Bulgaria where the Maritza forms the boundary between the two countries. The line to Constantinople leaves this railway at a point some twenty-five miles south of Adrianople. There is, therefore, plenty of opportunity for the Porte's authority over the section of the railway in Turkish territory to clash with Bulgarian interests. The exigencies of the war have multiplied the occasions for misunderstandings. From the Bulgarian point of view the Turks have acted in an unnecessarily high-handed manner in commandeering rolling stock and delaying the transit of Bulgarian goods, often to the detriment of the goods themselves. The Turkish officials are no doubt able to plead military necessity, but whether deliberate or unavoidable their action has proved a very serious matter to the Bulgarians.

The position of the Dedeagatch railway, as the Bulgarians recognized at the time of the Treaty of Bucharest, is a hopeless one, and would probably entail friction if angels instead of Turks administered Turkey. In the hope of making sure of Bulgarian neutrality for the duration of the war Germany has been urging the Turkish Government to meet Bulgarian wishes in regard to the railway. Unfortunately, the transfer of the line to Bulgaria entails the surrender of territory as well, and, if all difficulties are to be avoided, concerns the future status of part or the whole of the town of Adrianople, through which the railway runs. This sacrifice has proved too much for the Turks, in spite of lengthy negotiations, during which the German Government has done its best to make the Turks give way, while the German Press has assured its readers at regular intervals that there was no doubt that an amicable agreement would be reached by the two parties. If German reports are to be believed, the Turks were prepared to meet Bulgaria on every point, except the surrender of the suburb of Adrianople in which the railway station is situated. But as the retention of this area in Turkish hands would mean that Bulgarian control of the line would be broken, the Bulgarian Government has refused to give way.

It remains to be seen whether the suspension of railway communication with Turkey represents Bulgaria's trump card for bringing the negotiations to a successful conclusion, or whether it stands by itself as the first move on Bulgaria's part as the result of the collapse of the negotiations. The distinction is important. Turkey's offence has been interference with Bulgarian traffic on the line, and in particular the commandeering of Bulgarian railway trucks for her own purposes. By suspending all traffic across the frontier, Bulgaria avoids losing any more of her rolling stock, and at the same time isolates Turkey. If the action is not the prelude to a declaration of war on Bulgaria's part, it might well be a *casus belli* for Turkey, if she were able to indulge in the luxury of adding to the number of her enemies. Mr. Asquith, in asking the House of Commons on Tuesday for a supplementary vote of £150,000,000, hinted at the possibility of some of the money being required for the assistance of countries that were not yet reckoned among our Allies. It is at least fair ground for speculation whether Bulgaria intends to be the first to qualify for a share of that vote.

British confidence in Russia's ability to turn ultimately to her own advantage the fiercest assaults of the Austro-German forces is not likely to be abated by the long retreat that her armies are now required to execute. The effect of this retreat on the attitude of the Balkan States is, however, a question that forces itself upon us. It would occasion little surprise to find that Russia's difficulties had created considerable uneasiness in quarters which before were all eager for war. But this is not the case in Roumania. The "Interventionists," who must now represent a large majority of the people, have been able to view the military situation in its right perspective. Meetings continue to be held in favour of an immediate declaration of war. The risks are not ignored, but the issues at stake are realized. M. Take Jonescu has recently declared that a victory of the Entente Powers without the participation of Roumania might save Roumania material loss at the moment, but it would not save her future. If Italy had not intervened, Italy would be dead. Separation from their brothers in Hungary must no longer continue. Either they must unite and defeat Austria, or they would become vassals of Hungary.

Another Roumanian speaker touched on an equally important aspect of the situation when he reminded his countrymen that they were in danger of evading a war of salvation only to indulge in fratricidal strife and civil war. It would not be difficult to imagine what would happen in Roumania if the country were one day brought up against the stubborn fact of a Hungary at peace with the Quadruple Entente, and confirmed, under new and suitable conditions, in her possession of Transylvania. A third spokesman of the Interventionists drew attention to a point which has repeatedly been insisted upon in these columns. He accused the Government of allowing the faint-hearted among the population to be intimidated, and of handing the country over to be the prey of meddlers and intriguers. If war rarely fails to weld a nation together, the Balkans have certainly been an object-lesson of the disintegrating influence of the neutrality which Mr. Roosevelt has characterized as a timid and selfish neutrality between right and wrong.

Credit must be given to the Roumanian Government for the frankness with which it now divulges the course of the negotiations with Russia. Readers of our Bucharest Correspondent's letters can hardly fail to be struck with the remarkable way in which each step of the negotiations is apparently recorded at once in the Bucharest Press. It would seem as if the Government, having realized the mistake it made in not taking the Opposition into its confidence at the very beginning of the European war, was now anxious to make every amend in its power. While there is no need to doubt the general accuracy of these disclosures, we shall perhaps do well to remember that the Government is not likely to divulge more than suits its purpose. It would be strange if Roumania, with the experience of a year's war before her, had not learned the advantage of allowing enemies or potential enemies to know only what it is desirable they should know.

The political situation in Bulgaria is still obscure. Fortunately, the German Press has left no room for doubt that the German Government sets great store on the elimination of M. Gennadieff from Bulgarian politics. Whether its anxiety on the subject is due to righteous indignation over M. Gennadieff's alleged dealings with bomb-throwers or is in some way connected with the activities of the Gennadieff party is not stated.

Digitized by Google

A majority of the members of the party in the Sobranje have called upon their supporters to help them in preserving unity and avoiding a split at the present moment, when Bulgaria has need of all her sons. The warning is salutary in the face of the example set by Roumania and Greece at the same time. M. Gennadieff and his party have abandoned the Russophobe tendencies they were formerly credited with, and are now warm supporters of the Quadruple Entente. M. Radoslavoff has to rely upon them for a majority in the Sobranje, and the Austro-German agents in Bulgaria seem to have made up their minds that M. Gennadieff exercises an undesirable influence over the Prime Minister's foreign policy.

Although there has been no announcement of further operations at the Dardanelles, we need not suppose that the week has passed in complete idleness there. Our present advantage over the enemy—his shortage of ammunition and increasing concern for his heavy casualties—is too valuable to be weakened by any relaxation of our efforts. But pressure on the Turkish line can be exercised effectively without giving rise to *communiqués*, and we may be content with the reflection that reinforcements will not have been sent out to the Dardanelles for no purpose. Reports of an attempt on the part of the Porte to feel its way towards a separate peace are now finding confirmation in various quarters. Turkish delegates are said to have been sent to Switzerland with a view to initiating *pourparlers* with the Quadruple Entente. There is nothing improbable in this move on the part of the Turkish Government. At the same time, it does not imply that the Turks will necessarily abandon the struggle in the near future. They are past-masters in the art of turning negotiations of this nature to their own advantage. The best arguments the Allied Powers can use will be still to hit as hard and as unintermittently as they can in Gallipoli Peninsula.

The situation in the eastern theatre of the war necessarily engrosses public attention. Of the capacity of the Austro-German forces to strike hard we have had abundant evidence, but the degree to which these terrific efforts can be sustained depends on a variety of circumstances. At the present moment they are attempting a double thrust north of Warsaw and against Lublin. The whole Russian salient resting on Warsaw is thereby threatened, and its danger may be measured by the fact that the enemy is within five or ten miles of the Lublin-Kholm railway, which runs from the Polish capital to South Russia. But even if the whole salient had to be abandoned, Germany would still be as far off as ever from disposing of the Russians, provided their line remains unbroken. The next few days will decide whether the retreat must be continued on even a bigger scale than hitherto, or whether the Austro-German forces have now pressed back the Russian spring as far as their strength enables them, and are to find that with the first relaxation of their pressure the spring starts back to recover its former position.

Private advices received from Persia as we go to press report that the Government of that country continues to observe a correct attitude in regard to the war. German agents are still actively engaged in intrigues of the kind to which the world is now quite accustomed, but in the opinion of competent judges on the spot there is no prospect of Persia being inveigled or bullied into taking any part in the hostilities. Moreover, the work of depriving the German agents of the power to do further harm appears to be going forward steadily.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 5.

Egypt and Munitions

Outwardly things are very quiet here, but there are indications that the somnolent aspect that always comes over the country during the summer season will not be so evident this year. Some administrations will, of course, adhere to their habit of estivation, amongst them the Ministry of Education, which has just concluded its examinations and will close its schools until the early autumn. (Its staff has been allowed to take foreign leave, and it is expected that a good proportion of the masters will avail themselves of the opportunity and join the new Army.) But others of the administrations will have their time fully occupied during the next two or three months by questions of first-rate importance. Thus the Ministry of Finance will, amongst other vital matters, have to take up the question of the moving of the next cotton crop, and will have to study ways and means of assuring an adequate increase in the revenues. The Ministry of Agriculture, which has elaborated very extensive measures for the cotton-pest campaign, will be called upon for very energetic action almost immediately, as the cotton and boll worms have already commenced their attacks; in addition, it will have to study and follow up the cereal crops with a view to ascertaining how best the country can use its productive powers. Moreover, although Egypt has no European industries proper, there is evidence that she will have to take her part in the manufacture of munitions of war of one kind or another. Already she is supplying the Dardanelles Expeditionary Force with some of its hand-grenades, and, considering the number of model workshops in the country, there is no reason why the quantity should not be greatly increased. Indeed, from what I hear, there is every intention of making Egypt fulfil in this respect her duty to the Empire whose protection she now enjoys. Thus, with the attention required by all these matters, together with the provisioning of the Dardanelles Expeditionary Force, the tending of the wounded, and the settlement of the hundred and one new questions that the war conditions are daily calling into being, the summer of 1915 will certainly not be a slack season, but will stand out prominently as one of great all-round activity.

The New British Loan.

Much interest has been evinced out here in the new British Loan, full details of which were published through the Residency. It has, however, been a great disappointment to many to find, on enquiry at the Post Offices, that nothing was known as to facilities to be offered to small subscribers. Out here, there are not many Britishers who can to-day afford to commit themselves to the payment of £100, which is the minimum subscription that can be put through the local banks, and it is much to be regretted that arrangements have not been made to extend to the Anglo-Egyptian community the same facilities as are offered at home to the small subscribers, thus enabling its members to show their patriotism. There are also many Egyptians who would like to subscribe in a small way, and whose assistance would be welcome from the moral point of view, and it is to be hoped that the attention of the authorities will be drawn to this omission before it is too late.

The Progress of Education.

A law has just been promulgated, fixing the payment of an annual fee of £E15 by every student admitted to the Sultanieh Training College. This may be regarded as a distinct sign of the times. Time was when education in this country carried with it no obligation

to pay fees, when, in fact, pupils were fed and generally supported by the State. That was in the days when the masses did not realise the benefits of education and could only be persuaded to send their children to school if that did not entail any expense on their part, and if, in addition, they were relieved of some of the cost of the maintenance of their offspring. Considerable progress has been made since then—as is evidenced by the fact that 1,074 candidates sat for the secondary certificate in 1914, as against 447 in 1905—and the number of students desiring admission to the various schools has increased to such an extent that the system of gratuitous education has been abolished and gradually replaced by one under which fees of varying amounts are exacted.

But, while the benefits of education became more appreciated those of higher and technical education took longer to dawn on the general public. In turn, however, the higher schools, such as the Polytechnic, and those of Law and Medicine, all attracted students, with the result that, if only to keep down the demands for admission, the system of fees had to be introduced. Unfortunately, the training colleges did not follow suit, which was a great pity, as the State was very much in need of Egyptian masters of every grade. When, in 1903, the payment of fees was laid down as a condition of admission to the various professional colleges, it was stipulated that students entering the Khedivial (as it was then known) Training College should be exempted if they undertook to devote themselves to a teaching career for seven years after their graduation. Even that did not attract candidates—in 1905 the college had scarcely any students—and monthly subventions had in addition to be offered. The reason for this was that a professional career held out very meagre prospects. The progress of education in other branches has since enabled the position of Government teachers to be vastly improved, and a good future now lies before all who decide to follow a teaching career. The effect of this is to be seen in the number of students entered at the college—232 as against 69 in 1909—and in the fact that, although as a measure of economy the monthly subventions were suppressed last September, this did not affect the number of candidates for admission, 137 presenting themselves for the 72 vacancies in the college. This prompted the Ministry of Education to decide on introducing the system of fees referred to; and, setting aside the financial advantage to the State, one cannot help thinking that it has taken a very wise step; for now that the flow of candidates has been assured by the good prospects offered of employment by the State, it is the duty of the latter to see that it recruits its teaching staff from the best elements of society, and to take steps to raise the prestige of that staff by putting it on a level with the graduates from the other professional colleges. This the new law has done, and the innovation seems to have given general satisfaction.

CAIRO, July 12.

The Attempt on the Sultan's Life.

For the second time since his accession last December, and almost three months to the day since the first occasion—April 8—an attempt was made on the life of Sultan Hussein on Friday last as he was driving Ras-el-Tin Palace to perform the customary weekly prayer at the Sidi Abdel Rahman Ben Hermez Mosque. The Sultan's carriage was proceeding down the Ras-el-Tin Street, and had got to within a hundred yards or so of the mosque when, suddenly, from the first floor of a three-storeyed house there was hurled at it a bomb, which hitting, some say, one of the horses, others, the pole, fell to the ground without exploding. His Highness continued his way to the mosque, performed his devotions there, and returned to the Palace, where after lunch he received the congratulations of his family, the Ministers, Sir Henry McMahon, Sir Ronald Graham, and many others. The Sultan subsequently went for his usual afternoon drive, during the whole of which he was acclaimed by the crowd. Both immediately after the attempt and during the rest of the day his Highness displayed the most remarkable fortitude and coolness.

Immediately after the attempt the police seized the bomb and raided the house from which it had been thrown. But no one was to be found on the premises; the would-be assassin had managed to escape. Numerous arrests were made, mostly of people at or near the scene of action, and an inquiry was at once opened by the Procureur-General. From the information now available it would appear that the attempt had been carefully prepared. The criminal, whose full description is in the hands of the police, and who is understood to be a young Egyptian of about twenty-five years of age, came down to Alexandria on four occasions, the first being on June 20, and the last on the eve of his attempt. He evidently studied the topography of the neighbourhood of Ras-el-Tin, and, finding that the house from which he committed his crime was well suited for the purpose, he, on his penultimate visit to Alexandria, signed a contract for two months with the proprietor, to whom he paid the full rent in advance. The house was unfurnished, and in response to the landlord's inquiry, Mahmoud Hilmy, which was the name he assumed, stated that his furniture would come down later on with his family. Further to disarm suspicion—if any, indeed, existed at the time—he had the inside of the house whitewashed. Evidence has been forthcoming that the assassin effected his escape by way of the roof, which, as it happened, had some steps which facilitated access to the adjoining roof—another feature that no doubt prompted the choice of this building. He appears to have climbed over a couple of houses and then come to earth, for four native women who were visiting a house further down the street testified that they met on the staircase a young Egyptian whose description corresponded with that given of Mahmoud Hilmy by the landlord, and who greeted them so politely that they thought he was a relative of their friends.

The inquiry is proceeding apace, and the authorities are confident that they will very soon be able to produce the culprit. Various arrests have been made—those persons taken into custody immediately after the attempt have been released on bail—mostly of students, suspicion lying, for obvious reasons, on the students of the Law School who were expelled some little while back. A notorious extremist, named Ismail Hilmy, has also been arrested in Cairo, as he could not satisfactorily account for his movements on the night preceding the attempt and the day thereof. From the evident care with which the whole coup was planned, and from the fact that a new weapon—a bomb—was used this time, the authorities seem disposed to think that this is no individual and isolated act, and that others are implicated therein; but it is, of course, impossible to say anything definite either way at the present juncture, although, from what I can gather, there has for some time been reason to fear that some attempt on the Sultan's life would be made in Alexandria.

That the Sultan had had a narrow escape from being blown to pieces was shown when the bomb was tested in the laboratory. It proved to contain a most deadly explosive, and his Highness owed his life solely to the fact that the fuse was not well set before the projectile was thrown, and so became extinguished during its progress through the air.

Deep sympathy, accompanied by intense indignation at the odious form of the attempt, is expressed in all Egyptian—and, of course, European—circles with the Sultan, whose complete devotion to his country and his subjects is freely attested to, and who, it is agreed, deserves better of his people than to be harassed in this manner. His courageous bearing in these trying circumstances is but what one might expect from a man of his temperament, and it has aroused the profound admiration of all classes. On the occasion of the first attempt I explained the attitude which certain elements had assumed towards the new régime; but, hostile as they might be to it, they would scorn to countenance the adoption of extreme measures as a means to obtain a return to the *status quo ante*, and the result has been once again to draw the Sultan nearer to his people and to the very elements who previously looked upon him with disfavour. The attempt on the Sultan's life is by no means symptomatic of the feeling of the Egyptians towards him—the spontaneous outburst of relief when

Digitized by Google

the news of his escape was published proves that—but it is solely the act either of a misguided *exalté*, who believes he has a holy mission to perform, or of unfortunate victims to influences from without the country.

Female Enemy Subjects.

This week the G.O.C. issued a notification to the effect that German and Austrian female subjects must not change their registered address or move outside the town or village in which they are registered unless they first obtain the permission of the police. That this action should be taken in regard to female enemy subjects may appear strange, but to those acquainted with the circumstances the necessity for some such step has been apparent for some time. The enemy women still domiciled in this country, especially the Germans, have throughout been every whit as dangerous and as active in the interests of their *Vaterland* as their men-folk now interned at Malta and elsewhere. In fact, there is every reason to believe that some of them, who in normal times proved most capable managers of the businesses of their husbands and male relatives, have during the latter's enforced absence carried on an insidious anti-Entente propaganda, and conveyed information in a manner that no man could ever have contrived. So patent and notorious has been the danger that action has repeatedly been called for. The authorities will now be better able to control this dangerous element, but so bitter and so active are these women that nothing short of internment would meet the situation. That step may come in the near future, or in its stead may come expulsion, which would be just as effective. It is to be hoped that the above notification may be regarded as an indication that the authorities are at last awaking to the fact that enemy women, owing to the peculiar temperament of the sex, are even more to be feared than enemy men, and that a good deal of the mischief done hitherto, both here and at home, and attributed to the latter, must in reality be laid at the door of the former.

Prisoners of War in Egypt and Syria.

The manager of the Imperial Ottoman Bank in Beyrout, who is a Swiss, has been paying a visit to this country. It is stated—though officially no confirmation can be obtained—that he has been entrusted by Djemal Pasha with the mission of arranging with the British military authorities for the exchange of some of the Allied subjects arrested in Syria with an equivalent number of Turkish prisoners interned at Meadi. One of the conditions is to be that those of the latter who are sent back to Syria are not to be called upon to fight during the duration of the war. It is to be hoped that the mission will prove successful—although it is doubtful whether any reliance can be placed on the fulfilment of the above-mentioned condition by the Turks—as, according to all accounts, the Allied prisoners in Syria are suffering great privations.

Apropos of the Turkish prisoners in Cairo, one of the officers succumbed to his wounds at the Red Crescent Hospital this week. He was accorded full military honours, the body being placed on a gun-carriage covered with the Ottoman flag, a religious service being held in the Saida Zenab Mosque, and an escort of Egyptian cavalry and infantry, with a band, being provided. Three volleys were fired over the grave after the interment. The action of the military authorities has made a most excellent impression on Egyptians of every shade and denomination.

NOTICE TO SUBSCRIBERS.

Subscribers to "THE NEAR EAST" who have left the Ottoman Dominions since the war will oblige by notifying the Manager of their new address as early as possible, so that the supply of the paper should not be unduly interrupted.

"THE NEAR EAST" has largely increased its circulation in the United Kingdom since the war, and the Management is convinced that there are many people still who would be glad to know of its existence. Specimen copies will be forwarded post free if the names and addresses of friends are sent to the Manager, at 16-17, Devonshire Square, E.C.

NEWS OF THE LEBANON.

(FROM A CORRESPONDENT.)

ALEXANDRIA, July 11.

The news of the resignation of the Mutessarif of Mt. Lebanon has been confirmed. As stated in the first reports, this resignation was due to the pressure brought to bear upon him by the Turkish military authorities. Ever since Turkey's declaration of war, the privileged Mountain has been invaded by Turkish troops, and most of its privileges were thus annulled. Most of the towns dominating the sea have been converted into military stations, where batteries were installed, trenches dug, and defensive preparations made. Aley, the well-known summer resort, has been turned into the Army Headquarters.

The members who now constitute the Administrative Council have been appointed by the Turkish Commander-in-Chief, with the result that the Council has to conform to military instructions. Naturally, such a step, which is utterly subversive of the prestige and dignity of the Governor-General, provoked resentment and disgust amongst the Lebanese, and I have been informed that on two previous occasions Ohannes Effendi had tendered his resignation, but that in view of Italy's neutrality and the fact that Italy is a signatory to the Lebanon protocol, the Turks did not deem it advisable to accept it. This barrier has now practically disappeared.

THE LEBANON HOSPITAL FOR MENTAL DISEASES.

In a circular letter issued on behalf of the Lebanon Hospital for Mental Diseases, the General Secretary, Miss A. M. Gooch, writes :—

"The Committee of the Lebanon Hosptial have postponed the usual annual report and meeting until the autumn, owing to the difficulty of getting necessary details from Beyrout earlier. The work at Asfuriyeh has gone on without interruption through these trying months of war conditions. Although one pavilion has been closed to reduce expenses there has been an average of 110 patients under care and treatment. The British doctor and matron have been allowed to remain in charge, and the hospital is flying the Red Cross flag by permission of the Turkish authorities, who have shown much kindness and consideration. Provisions are an exorbitant price in Syria, and difficult to get, but they have been obtained, and it is a matter for great thankfulness to God that in the midst of so much distress the hospital has been able to keep its doors open.

"In making up the income and expenditure account it is found that there is a deficit of about £400. This is largely brought about by the decrease in patients' payments, and the increasing cost of provisions, both of which are attributable to the war. The Committee appeal to your generous help to enable them to meet the largely increased demands on the funds of the institution."

To meet the need of making the hospital and its work more widely known and suported, a booklet has been prepared, of which copies may be obtained on application to the office of the institution, 35, Queen Victoria Street, E.C.

MILITARY TRAINING IN SERBIA.

Speaking at Reading on Tuesday, M. Miyatovitch, the former Serbian Minister at the Court of St. James, said that in Serbia every man passed through military training. Out of a population of four millions of men Serbia could put a fully-equipped army of four hundred thousand in the field. If Great Britain had followed that example they might have had six millions in the field.

SUDAN NOTES.

(From a Correspondent.)

Dr. Andrew Balfour's New Appointment.

On Thursday last, the 15th, Dr. Andrew Balfour, C.M.G.—now become Lieutenant-Colonel—left England for the Dardanelles, a member of a strong Sanitary Commission charged with the important task of providing against eventualities among the troops engaged in that part of the fighting area. So far, our brave fellows have only been troubled with malignant malaria; but there is the possibility that worse diseases may soon have to be met and overcome. No better choice could have been made than in the case of Colonel Balfour, who has already seen service as a civil surgeon in the South African War, 1900-1901. In connection with his work then, he obtained the medal with three clasps. It was, however, in connection with his splendid services at the Wellcome Laboratories at Khartoum that Dr. Balfour won the esteem and admiration of the scientific world; and he is now recognised as one of the foremost authorities on tropical diseases and sanitation. For twelve years he devoted himself to the direction of the Khartoum Laboratories, and it was during his régime that the institution achieved the success which has made it so famous. At the same time Dr. Balfour filled the position of Medical Officer of Health at Khartoum and Sanitary Adviser to the Sudan Medical Department. In 1913, to the great regret of the Sudan Government, Dr. Balfour retired from the directorship of the Wellcome Laboratories, and was appointed Director-in-Chief of the newly founded Wellcome Bureau of Scientific Research (in Henrietta Street, London). It is said by competent authorities that there has now been got together at this institution one of the most remarkable and valuable scientific collections in the world.

One of Dr. Balfour's most successful innovations in connection with scientific research work in the Sudan was the Floating Laboratory, suggested and designed by him. It is fitted with wire-screened living-rooms on the upper deck to protect the staff from mosquitoes and other insect pests. The barge upon which it is erected, and a steam launch to tow it from place to place, were provided by the Sudan Government. Members of the staff are now enabled to cruise upon the Blue and White Niles and their various tributaries, including the Bahr-el-Ghazal and Sobat Rivers, and thus penetrate the most deadly regions to obtain valuable information and to study and deal promptly on the spot with specimens and materials collected, and thus carry the war into the enemy's camp. Thanks to his skill and the thoroughness of his methods, Dr. Balfour was enabled to exterminate malaria-carrying mosquitoes at Khartoum, just as Surgeon-General Gorgas did at Panama, by means of a thoroughly organised system for searching out the breeding-places and destroying the larvæ. The sleeping sickness researches, conducted both in the Khartoum laboratories and in the field, have also proved of immense value in checking that dread disease.

Slavery Repression.

The post of Inspector, Repression of Slave Trade Department, of the Sudan Government, vacant since the lamented death of Captain the Hon. Maurice Patrick Macnaghten, which occurred last May, has been filled by the appointment of Captain D. S. B. Thomson, formerly Second Inspector at Roseires, in the Sennar Province. The appointment dates from January 1 last. The Repression of Slave Trade (known as Horrieh) remains an important branch of Government, under the administration of the Civil Secretary's Department. It formerly had a staff of a director and three inspectors; this year, however, the post of director was not filled, but a fourth inspector appointed. The remaining three officials are:—Mr. A. N. Wilkinson, who has been in the service of the Government since the early days of 1911, but who is now on leave upon medical grounds; Mr. F. Atterbury, who is stationed in Egypt; and Captain H. E. Dumbell, formerly Senior Inspector, under the governorship of Captain C. H. Townsend, at Kassala. Captain Dumbell is stationed at Khartoum. The Department maintains representatives at El Obeid, Suakin, Roseires, and Khartoum.

Three Government Inspectors—two from the Upper Nile Province, and one from that of Mongalla—have just been retransferred to the Army. They are Captain C. H. F. Cox, Second Inspector, stationed at Abwong, and Captain J. L. F. Tweedie, stationed at Khartoum, from the Upper Nile Province; and Captain C. W. Spinks, stationed at Amadi, from Mongalla. Both Captain Cox and Captain Spinks have been two years in the Government service, while Captain Tweedie joined at the end of 1909. Another officer who has rendered very valuable services to the Administration in connection with the Veterinary Department, and who also has been retransferred to the Army, is Captain F. Roche-Kelly, formerly stationed at Khartoum, but whose headquarters were at Wad Medani, in the Blue Nile Province. He has just completed two years' service.

CYPRUS NOTES.

(From a Correspondent.)

Cyprus, July 10.

A Proclamation has been published under date of the 6th inst. prohibiting the exportation of all goods whatsoever to Bulgaria. The reason for this is not generally known, and is naturally being much discussed.

Fever Outbreak.

Some thirty to forty cases of typhoid fever are reported in Nicosia. These annual outbreaks reflect discredit upon the water supply, which may not inaptly be termed "a running sore." Water rights are a perennial fount of litigation, to which there seems to be no finality, and from which no satisfaction is ever gained, least of all by that great body of outsiders, the water consumers. There has lately been an important case before the Supreme Court, which it was hoped might eventuate in some practical result of public benefit. But the summer vacation has "intervened," and the case stands adjourned till November, by which time a hundred circumstances may easily arise to render it necessary to begin the proceedings *de novo*.

Our Wounded Soldiers.

Some 160 fresh convalescent soldiers arrived yesterday and proceeded to Mount Troodos, and fifty to sixty left to return to the front. In order to spare them the hot and tedious rail journey from Famagusta the last batch was landed at Karavostassi, a small port at the southern end of Morphou Bay, on the west of the island. There they were at once placed in motor ambulances, which quickly conveyed them out of the heat zone and, we hope, enabled them to accomplish the journey in comparative comfort. The port is exposed, and landing there will very much depend upon the state of wind and sea.

Lady Clauson, as representative of the Red Cross Society, has appealed for comforts for the convalescents, such as tobacco, cigarettes, razors, combs, slippers, stationery, books, newspapers, etc., and considerable quantities of these have been contributed by various residents. We understand that a sum of £400 has been placed by the Red Cross Society at the disposal of the authorities here for the benefit of the wounded warriors.

The Mails.

The mails from as well as to England are now being delivered in eight days, as before the war. This is a great boon, as news is more than ever eagerly looked for, and for many months past it has been a sore trial to receive letters and papers a fortnight old.

SEDITION IN EGYPT.

Reuter's Cairo correspondent telegraphs that the following proclamation was issued on July 18 by General Sir J. G. Maxwell:—

"Every person who has knowledge of the existence of any plot against the established order of the Government or who has knowledge of the identity of any person or persons concerned in such a plot or guilty of any offence directed against the established Government, is hereby required to communicate without delay to the nearest civil or military authority the information in his possession. Failure to comply with this order renders persons liable to be dealt with under martial law, as does harbouring the persons concerned or aiding them to escape justice."

FRANCO-ROUMANIAN FRIENDSHIP.

On the occasion of the National Fete (July 14) Mons. G. Diamandy, Deputy of Bucharest, President of the Franco-Roumanian Friendship Committee, who was chief of the Mission sent to Paris in January last by Mons. Bratiano, addressed the following telegram to the Franco-Roumanian Committee at Paris:

"On the occasion of your National Fete, I transmit the most sincere wishes for the glory of France and the victory of her arms. Have confidence! We have very clear feelings of our responsibility as well as of our patriotic and international duties. I can only ask you to believe in the good will and conscience of the Roumanian people. Long live great and noble France! In our hearts we are with you."

In response to this message, the Franco-Roumanian Committee sent the following telegram:

"We thank you very sincerely for the wishes you express for the success of our arms. We have full confidence that Roumania, as you say, is conscious of her destiny and her responsibilities. The Allies are fighting in the name of right, for liberty and justice. The Latins of the Orient cannot disinterest themselves from the sacred cause, closely bound up with the realisation of their national aims. That soon, in victorious Latinity, France may have the pleasure of saluting great Roumania."

BULGARIAN LETTER.

(From Our Own Correspondent.)

Sofia, July 6.

The Negotiations with the Entente.

The Entente Powers have not yet given a reply to the Note of the Bulgarian Government delivered on June 15 by Dr. Radoslavoff himself to their representatives here. Consequently the negotiations are at a standstill. Some politicians here ascribe this to the circumstance that the contents of the Bulgarian reply were telegraphed from Berlin to the Greek Minister at Rome one day before its delivery. This diplomatic scandal, it is said, has caused much annoyance to the Entente Powers, and the present deadlock is the result. Moreover, it is alleged that some war materials for Turkey are passing through this country, which creates great dissatisfaction.

British Minister's Departure.

The British Minister, Sir Henry Bax-Ironside, K.C.M.G., gave a farewell dinner last Saturday, at which there were present: The Prime Minister; the Chief of the King's Personal Cabinet, M. Dobrovitch; the Court Marshal, General Savoff; the Russian, French, Italian, Serbian, and Greek Ministers, and some of the leading Bulgarian statesmen. Sir Henry and Lady Bax-Ironside are leaving on Thursday, the 8th inst., and will travel to London by way of Nish and Salonika.

The Death of the Exarch.

Last Saturday, July 3, the death occurred here, at the age of seventy-five, of his Beatitude the Bulgarian Exarch, Joseph I., who since 1877 had been head of the Bulgarian National Church and leader of the destinies of the whole nation. His Beatitude had been suffering from weak heart and kidney complaint, but he was able to attend to business up to five days before his death, and his last hours were tranquil and free from pain. Surrounded by his nearest relatives and ecclesiastics, he dismissed his physicians, who had tried by all available means to strengthen the action of his heart, and asked to have the Holy Communion administered. On Saturday, at 1.30 p.m., in the presence of all the bishops and members of the Holy Synod, his Beatitude donned his sacerdotal garments, took the Communion, and said the prescribed prayers. Immediately afterwards all those present kissed his hand and received his last exhortations. He declared himself perfectly happy before the end, and after conversing calmly for some forty minutes, he breathed his last, quite peacefully, at half-past three.

His death has plunged the whole nation into deep mourning, and Sofia is draped in black. The Lying-in-State, at the Chapel of St. Synode, is being attended by great crowds of the public as well as by representatives of King Ferdinand and by the Cabinet Ministers. The funeral will take place on Thursday, and the body will be laid in a special tomb at the Cathedral Church of Sveta Nedelia.

A Great Patriot.

All the newspapers devote much space to the life and work of the Exarch. Dr. Gennadieff, the former Minister for Foreign Affairs, who was on terms of intimacy with his Beatitude, published yesterday in his journal, the *Volya*, a leading article upon his career, from which I extract the following passages:—

The instalment of his Beatitude at Constantinople was a political act, the ultimate object of which was the liberation of Macedonia. Joseph I. was pre-eminently of a political bent, and hesitated not a moment, but went to the Turkish capital; and there for thirty-six years he personified the unity of the Bulgarian nation.

His position was extremely delicate: as a Turkish State functionary he owed loyalty to the Porte; as representative of the Bulgarian nation it was his duty to stand for the national interests, to work in harmony with the Government at Sofia; and, furthermore, as representative of Orthodoxy he was called upon to maintain good relations with Russia, protectress of Orthodoxy in Turkey. In addition to all these requirements, he had to steer a course amidst the storms that raged in the early years of the Bulgarian State.

Placed by his position and his intellect outside parties and over them, he pursued his object untiringly. The foundation-stone of his policy was: "Be strong in Bulgaria, have a strong army and a bold diplomacy, and I will be strong in Constantinople." The strong man who, like him, understood the interests of Bulgaria, and, like him, was entirely devoted to the national cause, appeared in Sofia in the person of Stambuloff. Although they had sharp conflicts, the two worthy sons of Bulgaria understood one another, and co-operated in complete fashion. . . . Later, in 1908, the late Exarch stated to prominent politicians that in 1897, during the Greco-Turkish war, he felt the need of a mind to understand him and of a hand to support him. But, alas! Stambuloff was no more.

In 1903, during the great insurrection in Macedonia, the Exarch was summoned to Yildiz, and Tahsin Pasha, in the name of the Sultan, demanded that he should issue a circular to his flock, as the Greek patriarch had done, counselling them to be peaceful and obedient. Then Joseph I. was sublime. He said: "Tell His Majesty that I will not issue any circular. Whom shall I invite to be obedient? The priests whom your authorities are persecuting, the schoolmasters whom you have cast into dungeons, or the peaceful population who, exasperated by the injustice, the abuses, and the arrests for which your agents are responsible, have raised their heads?" The same evening an aide-de-camp of the Sultan brought to the Exarch a high Order and the expression of the Sultan's gratitude for this frankness.

This giant, self-exiled in Constantinople, as a guardian of the national interests, firm in the execution of his duty, felt for a transient moment supreme happiness. On November 17 and 18, 1912, the thunder of Bulgarian guns was felt in Constantinople. But it was only for a fleeting moment. Representing and personifying the generation that maintained the most formidable struggles without tasting the fruits of victory, he dies without seeing his work crowned by success. His spirit departs in the bright ray that heralds the liberty and union of the Bulgarian nation.

The Death of Colonel von Leipzig.

A distinguished traveller who arrived here yesterday from Constantinople relates that the German Military Attaché in that city, Colonel von Leipzig, whose death was officially announced as a case of suicide, was actually assassinated, in the following circumstances:—On June 28 he left Constantinople on his way to Sofia, to succeed the German Minister here, and it is stated that he was the bearer of some documents by which Turkey was voluntarily ceding to this country the territory up to the Enos-Midia line. Enver Pasha, it seems, had consented to this course, but Talaat Bey and others were strongly opposed to it, and they despatched an emissary to assassinate Colonel von Leipzig. When the train arrived at Uzun-Keupru station someone asked the Colonel to come to the buffet to hear a message. He consented, but hardly had he stepped from the train when two revolver shots rang out, and he fell instantly, shot through the chest.

HOSPITAL WORK IN MONTENEGRO.

A member of the Sanitary Commission recently sent to Montenegro by the Wounded Allies Relief Committee has lately written as follows to the committee concerning its two typhus units despatched at the request of the Montenegrin Government. "I left Cettinje at 6 a.m. for Niksitch, where . . . . I chose the buildings for our work, the schools for the hospital and the gymnasium for the staff. I arranged with the local authorities thoroughly to whitewash out both buildings and to put them both into repair. I asked for 20 Austrian prisoners to act as orderlies, and arranged for a camp disinfecting apparatus to be erected in the courtyard. There was no kitchen belonging to the schools, so one is being built. They also promised to provide six large wooden barrels, which are to be cut in half to be used as baths for the patients and washing tubs for the laundry. . . . From Niksitch I went by motor to Podgoritza, some 80 miles distant, and there I agreed to take over the schools, which are already a hospital, and will be handed over to us on our arrival. I also chose a house for the staff. . . . It is devoid of furniture, as also is the gymnasium at Niksitch . . . . so we shall have to make shift with packing cases. . . . The Montenegrin authorities will give us free of charge rations for every patient in hospital, and also one kilo of bread and half a kilo of meat per head of the personnel. . . . They will give us two interpreters for each hospital."

The writer then proceeds to give an account of an exciting escape from death. "The path was hardly 12 inches wide, and one wondered how the ponies found a foothold, especially as the wet clay was like glass. At these places a precipice ending in a broad, fast-flowing river was on one side of the path with nothing between you and it, while on your other side your leg brushed against a towering cliff. . . . At one of these places both I and my interpreter were very nearly killed by the fall of a gigantic rock, which, luckily, fell down between us."

SERBIAN LETTER.

(From Our Own Correspondent.)

Nish, July 10.

The Weather and the War.

There has been a sudden change in the weather. Constant rains and floods are followed by bright sunshine and dry, hot, tropical days, the temperature yesterday rising to a higher degree than it has been at for many years. If the Austrians and Germans intend to attempt to invade this country, as they lately again threatened to do, the weather will no longer be an impediment to them, but it is considered here that they cannot spare the forces from the other fields of battle to enable them to do so.

Austrian Activity.

However, on July 4 the Austrians showed signs of activity, making demonstrations in the neighbourhood of Shabatz, the point at which they entered Serbia at the time of the last invasion. The latest effort appears to have been little more than an attempt of the enemy to feel his way, or it may have been intended to show that his troops are prepared to meet any offensive movement on the part of Serbia.

The official account is that at about half-past ten o'clock on the night of July 4 the enemy attempted an attack against the fortress of Shabatz. The Austrians at first opened a violent cannonade against the fortress and the island Micharska Ada, and afterwards, under the protection of their firing, made an attempt to disembark troops, one body being directed to the island Micharska, and another towards the fortress. Prevented from carrying out their designs, the enemy kept up a brisk fire until early the next morning, to which the Serbian infantry replied feebly.

The State of Albania.

The Minister of the Interior, M. Luba Iovanovitch, returned a few days ago from a trip in the interior, and it is said that at a given point, which I am not at liberty to mention, he had a meeting with Essad Pasha, whose family is supposed to be residing in Serbia. Serbian troops do not appear to have entered Durazzo, but are stationed at a point from which the sea coast can be seen. On the whole, all appears now to be quiet in Albania.

In Montenegro the crops promise to be good. It is related that when the Montenegrin soldiers occupied Scutari, the commander of the troops on their entry at once sent a note to the Austro-Hungarian Consul demanding that he and his staff should leave the town.

The Consul protested, and answered that he would only leave if forced to do so, adding that he had no instructions from his Government. Thereupon the Commander sent a categorical order that the Consul, with his family and suite, should immediately leave Scutari, and that he would be conducted by the shortest way to the Austrian advanced posts. The Consul without opposition was then conducted by a Montenegrin guard to the frontier.

Relations with Bulgaria.

The Serbian papers daily publish articles attacking Bulgaria, so that it does not appear that an understanding with the Bulgarian Government is considered probable. In Sofia there has been a meeting of the Bulgarian National Committee, which placed on record the Bulgarian demands, and at which a resolution was passed declaring the Committee in accord with the answer the Bulgarian Government gave to the Quadruple Entente, and which the Committee regards as the true expression of Bulgarian feelings and national wishes.

Balkan Socialists and the War.

The Serbian *Odjek* states that, under the leadership of the Bulgarian Socialists, the Balkan United Socialists have issued a manifesto in favour of peace, in which they declare that the creation of a Balkan republican confederation is hindered in its realization on account of the present differences between the people of the Balkan States, and add that whilst English and French Socialists seek the definite conquest of the enemy, the Balkan Socialists demand peace.

Whilst the Socialists are thus seeking to demoralise untutored peasants, and the susceptible public are depressed by the unfavourable news from the Russian front and the slow progress of the Allies on the western battlefields the semi-official *Samouprava* endeavours to raise the tone of the public mind and publishes an article in which it says: "Germany in declaring war in 1914, before her adversaries were prepared for it, neglected to take certain things into consideration. Germany forgot, or did not consider the unshaken and iron energy of England, the energy and industrial capacity of France, the indisputable resources and the mighty resistance of Russia, important facts which all have an influence on the continuation of the war. We must remember the capability of England to furnish herself and her Allies with munitions, that in France the same efforts are made, and that even if Russia has fewer factories, she nevertheless employs many hands in the manufacture of ammunition and weapons."

Danube Navigation.

The administration of the Serbian Steamship Company, whose head office is now at Radujevatz, has given notice that in a few days traffic will be opened between Radujevatz and Kladevo and the intermediate stations, and that the steamers will also call at Turnu-Severin, in Roumania. The service will be for passengers and merchandise, and the steamers will run three times weekly.

A BIT OF TURKISH LORE.

A thief tried to get into Karakushy's house one night, and in getting over the wall was caught by a hook, which put out one of his eyes. The thief took the matter at once to the Kadi, or judge, and demanded the punishment of Karakushy for having the hook in the wall and for the injury it had inflicted on him. The Kadi considered the case long and profoundly, and finally decided that Karakushy was at fault for having the hook there and for the thief's misfortune; and that he must give an eye in return for the eye lost by the thief. Karakushy tried to defend himself by saying that the hook was in his own wall, placed there for holding his clothes line, and that the thief had no business to try to enter his premises by climbing the wall in the middle of the night. But the Kadi remained firm in his decision. "This man," said he, "lost his eye on your ground, and you are responsible for it: you must suffer the loss of one in return for his."

Two weeks were given Karakushy in which to prepare for the removal of his eye. He became very despondent, and pondered mournfully over his approaching misfortune. Suddenly, the day before his prospective ordeal, a happy thought came to him, and he hastened at once to communicate it to the Kadi. "I am a poor tailor and have a large family to support, and it is absolutely necessary that I should have two eyes with which to pursue my calling. But I have a neighbour, a hunter by profession, and I have noticed that when he uses his gun he always closes one eye. Now if you will take his eye in the place of mine you will be relieving me and at the same time doing him a favour as it will save him the trouble of closing his eye." "Just the thing!" exclaimed the Kadi. "This will help us out of the whole difficulty! You cannot afford to lose your eye and let your business suffer and your family starve. We will take this man's eye in place of yours, for he does not need it. It will serve the ends of justice quite as well."

(At the present time, when a peculiar decision is rendered in the courts of Constantinople, people are wont to shrug their shoulders and call it a "Karakushy decision.")

THE BALKANS, 1912: EUROPE TO-DAY.

A COMPARISON FROM A NURSE'S POINT OF VIEW.

By Katherine H. Wheatley.

In contrasting the Balkan campaign of 1912 with the present war, the differences of race in the nations engaged, between the countries forming the theatre of war, in the numbers of men in the field, in the weapons employed and in the organization of troops, are so great that it is far from easy to institute any comparison at all. In addition, the great issues at stake in the present war, and the enormous number and high fighting value of the combatants, the vast extent of the battlefields, and the power and importance of the neutral States should be borne in mind. The Balkan campaign was a war between several small, chiefly Christian, European States, all more or less in process of civilization, against an Eastern, Moslem Power. The campaign of 1914 is a war of giants, Britain, France, Russia, and Italy being determined to prevent the imposition of the yoke of Prussian militarism on Europe.

The extent of the Turkish frontier, though great, was as nothing compared with the length of the fighting lines of to-day, and the enormous number of well-trained men at present under arms is infinitely greater than that of all the combatants engaged in the Balkan War. Turkey's fighting force was composed mostly of her Regular Army, for though she called up her Redifs (Militia) very few of these troops were put into the field; and though a considerable force of Kurds was brought up from Syria and stationed at the Sidimir Barracks (which stand partly on the site of Florence Nightingale's hospital), they did not take any active part in the fighting. Their chief duty was to line the route at the Selamlik—the religious ceremony which the Sultan attends at the public mosque every Friday morning. Every man of fighting age was called upon to enlist or to pay his exemption fee, but often the matter ended there. This may be taken, I think, as a proof of the absence of the death-grip in the struggle for supremacy, though, of course, the reorganization and most of the actual Turkish Army existed only on paper.

The country over which the fighting took place was without proper roads and with few railways. To carry her troops and munitions Turkey had but one line of rail in Europe running from Stamboul, via Sofia and Belgrade, to Vienna. On the Asian side there were three lines of railway—the unfinished Haidar Pasha to Baghdad, the Panderma to Smyrna, and the branch line from Smyrna connecting Afium Karahissar and Konia. During the war these lines were periodically blocked for weeks at a time by the passage of troops from the interior; and as trains did not run at night much delay was caused in getting the men to the front. The troops were not fed by the State, but bought what food they could at halting places, and consequently arrived in a poor condition. There is a great difference between this and the way in which British troops are rationed and conveyed to the front by rail and motor-'bus. The transport was so badly organized that there was a great scarcity of food at the front, and no shelter was provided against the heavy rains. The men often fought without even sufficient bread. Most of them, when starting from Stamboul, were so overloaded with all kinds of unnecessary equipment that they were obliged to throw away rations and other things after a few miles on the march.

It was a very sad sight to see a regiment march through Pera on its way to the Chatalja Lines, and to realize that scarcely a man had a chance to survive the terrible conditions under which he was expected to fight. They marched slowly, to the accompaniment of plaintive native music, men of magnificent physique but much overburdened with equipment, and marching with difficulty in their new boots.

The weapons employed by the various armies were so varied in pattern and often so obsolete as to be of little use. In many cases the soldiers were ignorant of how to handle their rifles. There were, too, few long-range guns: had there been more perhaps the history of the fall of Adrianople had been different. The fighting was often, as at Kirk Kilisse, a hand-to-hand encounter, the men using their native knives and inflicting terrible wounds on each other.

This shortage of modern weapons and unskilled handling of what weapons they possessed existed in spite of the fact that the Turkish Army had been reorganized by Germany in 1909. These reforms existed chiefly on paper, and up to the present day have not been fully carried out. For instance, when Turkey commenced to mobilize on August 3, 1914, the Army Service Corps and transport were in the same confusion as of old. Every man called up was required to bring five days' rations. The Government promptly confiscated all the flour, the bakers were unable to obtain any and could not supply the needs of the recruits, so that, although the order existed on paper, the men actually had not even one day's provisions.

It was rumoured in the Balkan War that there were German officers in the Turkish ranks, but this was a mistake, and probably arose from the Turkish officers relapsing into the language in which they had received their military training. German was obligatory in all military schools throughout the Turkish Empire, and a great many of the officers had been sent to Germany to complete their education.

The contrast between the loss of life in the Balkan campaign and the present European War is very great. In the former the enormous loss of life, the extent of which will never be fully known, was due primarily to want of skilled medical assistance in the field, and, secondarily, to disease caused by the neglect of the most ordinary sanitary rules. Such diseases as cholera, dysentery, and typhoid accounted for the majority of deaths in the different armies, whereas to-day by far the larger number of men are put out of action by the very highly developed and scientific weapons of destruction employed in modern warfare, the sick rate being abnormally low.

In the former the lack of field hospitals and ambulances, the absence of efficient medical help, and often of medical aid of any kind, left numberless wounded men to die on the field who might otherwise have recovered. They died where they fell, unable to get away. I did not see any abdominal wounds brought in amongst the wounded, nor could I obtain records of any admitted to the other European hospitals. One Turkish officer assured me that as men wounded in the abdomen were sure to die, it was useless to bring them in. The men were not provided with first field dressings. There did not appear to be many Turkish surgeons on the field, and, for obvious reasons, those of any other nationality were not permitted within a certain distance of the battlefields. Indeed, the roads to the latter were quite bad enough, strewn as they were with the corpses of refugees and cattle, fallen from starvation, exhaustion, and cholera on their flight from Thrace and other parts to Stamboul.

The Turkish doctors gathered at the native hospitals in Stamboul and neighbourhood. Every school and likely building was used for the wounded, and wooden huts were run up in all existing hospital grounds. Turkey abounds in hospitals and incomplete buildings intended for hospitals, but the authorities are contented with the most wretched administration. I have been over hospitals fitted with every modern appliance—hospitals that surpassed our own in the magnificence of their equipment—but the expensive apparatus was lying idle and rusty from the want of knowledge of how to use it. But this is a Turkish characteristic, and applies to nearly everything in the country. Nothing is thoroughly carried out, interest soon flags, and fresh projects are started.

The wounded were attended by male so-called *infirmiers*, men brought in at random from the streets and paid at the rate of two liras (£1 16s.) per month. The amount of care they gave the patients depended almost entirely on the amount each individual could afford to pay. There were no trained nurses, no orderlies, and no stretcher bearers.

Apart from the European efforts to nurse the sick and wounded, there was one hospital that was an exception to the state of affairs described above. This was at the hospital and medical school at Haidar Pasha. There, in one building, some French nuns strove against an almost overwhelming task. One nun had 200 patients. In the other building there were three or four German nurses, the regular staff of the hospital. They had been there some ten or twelve years, and instead of training probationers had descended to the level of those they had come to teach. The rule of the harem permitted no Turkish woman to nurse any men other than her husband or sons. The joy of service is a thing still practically unknown to the women of the East, where it is generally considered derogatory to use the hands for work of any sort. When I left Constantinople this rule was in process of being relaxed, however. One or two of the most advanced doctors were lecturing to large classes of Turkish ladies in first aid and sick nursing. Little by little they hoped to overcome the barriers hedging the women in from taking their share in the care of the sick. But, as usual in the East, where everything is begun in the wrong way, these ladies, without any previous experience, either theoretical or practical, were at once invited to study the most advanced and skilled nursing, medical, and sanitary matters. Without knowing how to make a bed, to feed a patient, or even a baby, they learnt by books and lectures of the most complicated dry sterilizers and steam pressure gauges.

Thanks to the courtesy of the presiding doctor, I was admitted to these lectures, which were delivered in Turkish to some sixty ladies, all of whom seemed very interested, and all of whom passed the required examination and were presented with a very gorgeous diploma, amidst the acclamations of the Press. I wonder to what use their knowledge is being put now that their country is in bitter need of them!

Compare this with our trained nurses at home and at the front, and with our voluntary workers. I suppose that every woman in England and the colonies to-day is doing her share of work for the men engaged in the war! Compare, too, the organization of our field ambulances, our motor ambulance convoys, our hospital trains and ships, and our well-run hospitals. And, above all, consider the skilled medical help which is available to every man as soon as he can be reached on the battlefield.

NEAR EAST BOOKSHELF.

SOME PORTRAITS FROM THE NEAR EAST.*

This volume, one of the latest additions to the excellent "Wayfarers' Library," contains a score of sketches and studies in the style that "Prophets, Priests, and Kings" and "Pillars of Society" have accustomed us to expect from Mr. Gardiner's practised pen. Of the twenty, only four are concerned with subjects that fall strictly within the purview of THE NEAR EAST: "Francis Joseph—and the Spirit of Serbia," "King Nicholas," "King Ferdinand—and the Tragedy of the Balkans," and "M. Venizelos." It is strange that in a gallery with such a title there should be no portrait of Enver Pasha. Perhaps Mr. Gardiner could not make up his mind to give the trouncing he so richly deserves to one who has done more than any other living man to hasten the break-up of Turkey. And Enver, one supposes, must still be regarded as filled with "a genuine Liberal enthusiasm." But while this omission is to be regretted, still more regrettable is the inclusion of the paper on King Ferdinand. It would have been injudicious to publish it at any time during the past six months: to have done so at the present juncture is a glaring indiscretion. One wonders what the Censor's views on the subject may be! And there, probably, it will be wiser to leave the subject.

Unfortunately, the three other papers mentioned, to which our criticisms must be confined, are by no means among the best in the book. They convey the impression that in writing them Mr. Gardiner was not always quite sure of his ground, and that he sometimes yielded to the temptation to try to force facts to fit in with his own theories. Certainly they serve to show his prejudices up in strong relief, and readers who do not share those prejudices will be likely to find them more than a little tiresome. Mr. Gardiner is usually more happy—from the reader's point of view—when he is praising than when he is blaming, or finding fault; and for this reason his appreciations of M. Venizelos and of King Nicholas make more agreeable reading than his study of the Emperor Francis Joseph. The latter is not unjust to the Emperor, and its praise of the Serbian spirit is certainly merited, but it would have been improved, we venture to think, had some of the prejudices referred to above been less in evidence.

The picture of M. Venizelos is excellent. That of King Nicholas is hardly less good, being done with the sympathy that we should expect to find evidence of in the portrait of such a good Democrat; though, to be sure, we are reminded that he once lapsed so far from grace as to run counter to the will of his people or—worse still, one supposes, in Mr. Gardiner's sight—of their parliamentary representatives. Prince Danilo, however, is hardly so conventional or "denationalised" as the unwary reader might be led to suppose by what is written of him here; and again, to write of "the young Princes Danilo and Mirko" at tennis is, though quite pretty, possibly misleading, in view of the fact that the former is forty-four and the latter thirty-six. Nor can we believe that King Nicholas ever made such a mistake as to say, however "indignantly": "No exports from Montenegro . . . how about my daughters? One is married to the King of Italy . . . and the fourth is Queen of Serbia." For, unfortunately, the wife of King Peter died in 1890, thirteen years before he was proclaimed King of Serbia; while the Princess Elena was not married till 1896, and did not, of course, become Queen of Italy till 1900. These are small points, but such things are apt to create the impression that a writer is more concerned about his phrases than about his facts. And, to be frank, that is the feeling with which one puts down the book after reading it.

A UNIT OF EMPIRE.†

It is considerably over a century and a quarter since the Seaforth Highlanders sprang into existence as a regiment owing to the efforts of Kenneth Mackenzie, Earl of Seaforth, who recruited it from members of his clan and estate. Since that day the regiment has had frequent opportunities of distinguishing itself—opportunities which it has never failed to grasp. In the book under review Mr. F. W. Walker has set out to place a record of the great deeds of the regiment before the public in convenient form. Published in the famous Wayfarers' Library by the house of Dent, the "Story of the Regiments" is a series which is predestined to success, and the volume which tells of the Seaforths may be said to be worthy of its subject.

The regiment has served in all quarters of the Empire, and it fell to one of its members to discover that Sebastopol had fallen. The author records this incident in simple sentences which lack nothing of dramatic effect:—

> The British attack on the Redan had not succeeded, . . . and we were obliged to retire with heavy losses. But the Russians were done. They slipped away, and a Highlander, noticing the stillness in the Redan works, scaled up on hands and knees. He peered over the parapet.
> The works were empty.
> Sebastopol had fallen.

At a later date the famous regiment was selected to form part of the Indian contingent which was ordered to Egypt at the time of Arabi's insurrection. It played a very important part at the Battle of Tel-el-Kebir, and to it fell the honour of completing the rebel rout when they drove the defeated foe before them to Zag-a-Zig.

The regiment was also engaged through the Sudan campaign, fighting at Atbara and again at the great triumph of Khartoum. The book contains many interesting intimate passages concerning these and other campaigns. In the Battle of Kerreri particularly the tide of the Seaforth Highlanders' glory ran high, and it was for services on this occasion that Sergeant-Major M'Kay, who has subsequently served the Sudan so faithfully and well, received his commission.

Such books as these are always good to read, especially so at the present time, when the traditions of British fighting men are being upheld, at one point or another of the gigantic line of combat, in each hour of the twenty-four. The man who is forced to remain at home while all his kin are in arms stands sorely in need of tonic in moments of depression. The most effective tonic is that which strings the nerves to a knowledge of what Britons have been on the battlefields of the past and of what they are to-day.

This little book tells us of the past; the Seaforths themselves are to-day preparing history for the future, and after reading Mr. Walker's book we are more than ever confident that no page can possibly be tarnished.

HELPING OUR ALLIES.

A report just issued by the Wounded Allies' Relief Committee (Sardinia House, Kingsway, W.C.) gives some interesting information concerning the good work done by the committee since its inauguration shortly after the outbreak of war. In addition to its labour of love for the Belgian refugees and Belgian and French soldiers, it has, our readers know, been very active on behalf of the suffering Serbs and Montenegrins. At a time when the Serbian Red Cross organisation was in such straits that even bandages were lacking, the committee immediately despatched £500 by telegraph. Later, the Serbian Government requested the committee to equip and send out a typhoid hospital, with the result that at the end of March doctors, nurses, a hundred beds and full equipment left for Kragujevatz, the headquarters of the Serbian Army. Owing to the disappearance of the epidemic, the unit is now adapted for the reception of the wounded. When the appalling conditions in Montenegro came to light, the committee despatched thither a Sanitary Commission to advise on the best means of help. The report of this commission voiced the urgent desire of the Montenegrin Government for two self-supporting units of one hundred beds each, to combat typhus in Podgoritza and Nikshich. These units, which, owing to the state of Montenegro, had to be accompanied by over £2,500 worth of stores and food, sailed on June 2. It will thus be seen that the committee's work, which was inaugurated with the approval and endorsement of the War Office and the Admiralty, and has the support of the official representatives of the Allied Powers, is both useful and patriotic, and is, moreover, constantly demanding expansion. The hon. treasurer is T. O. Roberts, Esq. (Manager), London County and Westminster Bank, 217, Strand, W.C., who will gratefully acknowledge all subscriptions sent to him.

THE ART OF IVAN MESTROVIC.

On Saturday Mr. Ernest Short delivered to the Home Counties Archæological Society an address on the Serbian sculptor Ivan Mestrovic and his work. The address was followed by a visit to the exhibition of Mestrovic's work at the Victoria and Albert Museum. Mr. Short said that the sculptures of Mestrovic embodied the agony of a nation. The greater part of Serbian folk-lore was concerned with the heroes of the battle of Kossovo, which in 1389 brought about the downfall of the first Serbian Empire. Mestrovic had translated them from folk-poetry into stone. He had based his art upon these epics. His conception of the Temple of Kossovo originated in the Serbian and Jugoslav national songs, which express the destiny, the desires, the hopes, the poetry of Slav mysticism and its ardent aspiration towards justice and human liberty. On the other hand, in respect of craftsmanship, Mestrovic was a cosmopolitan. From the "Fragments of the Temple of Kossovo" of Mestrovic could be learned how to bear suffering with fortitude and to view it with a deeper sympathy.

Part 48 of "The Times History of the War" gives a full account, illustrated with many photographs, of the Turkish Attack on Egypt. A large and very clear map is a particularly valuable feature of the number.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE FUTURE OF CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—Mr. George L. Houston, of Kyrenia, Cyprus, writing in your paper on the question of the union of Cyprus with Greece, says that before the outbreak of the war it was possible to admit that there was something to be said for this question, but now that position must be altogether abandoned.

It is hardly necessary to explain my own and my fellow-countrymen's astonishment at this idea. I think that it is obvious that before the Balkan War and before the European War some arguments might have been found against the idea of the fulfilment of our national aspirations, but since these wars the position is altogether changed, for the following reasons:—

1. After the Balkan War the Greek kingdom, with whom we are united by the ties of blood, of language, of common history, and common traditions, became much stronger and extended its sovereignty not far from our seas.

2. After the outbreak of the present war England proclaimed to the world that the only object of this war is to protect the rights of nationalities against Prussian militarism and other oppressions.

3. After the beginning of the Anglo-Turkish War the only link which existed between Turkey and Cyprus, viz., the Anglo-Turkish Convention of 1878, had been cut off; and consequently England is now free to do what she considers right as to the future fate of Cyprus. I am one of those who signed several memorials addressed to the Home Government with regard to the national aspirations of the people of Cyprus, and I was amongst the Cyprus Committee who visited London in the summer of 1912. The main argument given to us, officially and unofficially, with regard to the idea of our national emancipation was that England could not meet our wishes on account of its obligation and respect towards the Anglo-Turkish Convention of 1878. Fortunately for us—and I hope for England, too—that Convention does not now exist.

I cannot follow the curious ideas of Mr. Houston with regard to the Queen of Greece, and I must say that I did not expect to hear the hints put in his letter; but I think that Mr. Houston, as well as every Englishman, knows thoroughly well what are the ideas of our nation, and to whom our sympathies turn. Common ideals of liberty and freedom placed us from the first moment of the outbreak of the present war on the side of England and France, and there is no nation so sincerely wishing the triumph of France and England as our own nation.

If England wants the ports of Cyprus for the protection of its interests, it is also our own wish that the interests of England should be protected everywhere; and I am sure that all Greek ports are at the disposition of England for the protection of its interests. I do not express a personal opinion; for that is the opinion of the whole nation, and it is also the view of all political circles in Athens. Is it necessary to mention the support given now to the English fleet by the Greek ports and the Greek population everywhere?

England and Greece have common interests in the Mediterranean, common political ideals, common love for liberty and freedom. All these are strong factors to inspire the English and Greek Governments to seek a solution of the Cyprus Question in accordance with those principles for the domination of which England and Greece have suffered so many sacrifices.—I remain, etc.,

DR. NIC. KL. LANITIS,
Member of the Legislative Council, Member of the Central Board of Education, etc., etc.

Limassol, Cyprus,
July 10, 1915.

HELP MONTENEGRO!

THE SMALLEST AND POOREST OF OUR ALLIES.

THE MONTENEGRIN RED CROSS AND RELIEF FUND

Donations can be sent to her Grace the DUCHESS OF RUTLAND, 16, Arlington Street, S.W.; or to the Hon. Treasurer, LADY ROPER PARKINGTON, 58, Green Street, Park Lane, W.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Dardanelles Operations. July 19.

Mr. MACNAMARA (Secretary to the Admiralty), replying to Mr. Joynson-Hicks, said Admiral de Robeck's despatch dealing with the landing operations at the Dardanelles would be published shortly.

Mr. ASQUITH, replying to Mr. Joynson-Hicks, said: The total casualties sustained by both naval and military forces in the Dardanelles is as follows:—Killed—officers 541, men 7,543; wounded—officers 1,257, men 25,557; missing—officers 135, men 7,401; total—officers 1,933, men 40,501. The total casualties, therefore, amounted to 42,434.

Mr. JOYNSON HICKS: That is up to the end of June?

Mr. ASQUITH indicated assent.

Parcels for Dardanelles. July 20.

Mr. NEVILLE asked the Postmaster-General whether he was aware that dissatisfaction was being felt by our troops in the Dardanelles at the delay in forwarding parcels from the base; and whether he could take any steps to accelerate their delivery?

Mr. HERBERT SAMUEL replied: The arrangements for the transmission of the mails are made by the military authorities, and not by the Post Office; but I am calling for a report on the question and of the time occupied in the transmission of letters and parcels between this country and the Mediterranean Expeditionary Force.

FOR OUR WOUNDED SOLDIERS.

Readers of THE NEAR EAST who subscribed to the fund for purchasing bedsteads for use in No. 3 Casualty Clearing Station will read with pleasure the following extracts from a letter just received from Nurse Wheatley—whose address, it should be noted, is now: No. 3 General Hospital, British Expeditionary Force. Her letter is dated July 17, and she writes:—

The beds arrived quite safely and were put into use immediately on arrival. They have given the greatest satisfaction and pleasure, both to the patients and staff. Everyone is delighted with them. The patients find them very comfortable, and are very grateful for the kind thoughts of the givers.

It is difficult for anyone who has not actually seen a clearing station to realise what a difference a bed makes. But we know, and I can only tell you the gift has given ease and comfort to some of our men. I wish you could all see them. As to the staff, we find them so light, so easy, and taking up so little room that in all probability the idea will be represented to the proper authorities, and a certain number allowed to each clearing station.

The Commanding Officer wished me to thank you in his name, as well as in that of the patients.

I have also to acknowledge another parcel of books. We have quite a library now, thanks to THE NEAR EAST. The men are most amusing in their remarks about what they read, and so interested. . . . Gifts of books will be just as welcome to the men here.

C.M.S. WORK IN PERSIA.

The Mohammedans of Persia apparently are strangely inconsistent. For some months there was great opposition in Ispahan to the educational work of the Church Missionary Society. The missionaries were forbidden to open the new school premises (the Stuart Memorial College, as the school is now called), and yet when it was opened the Deputy Governor was present to give away the prizes. Parents and boys were threatened to such an extent that the number of boys attending the college dwindled from eighty to twenty, and then one day in May the chief Mohammedan mullah of the city addressed a crowded congregation in one of the chief mosques and declared that the English had come to stay, that they were doing a good work, and the people had better not interfere! During all the time of ugly rumours and a certain amount of uncertainty, the staff of the C.M.S. medical mission in Ispahan received numerous evidences of respect and kindness and assurances, even from the mullahs, that nothing would be allowed to happen to them, whatever should take place in the town.

SERBIA'S WORST FOE.

The following has been received by Reuter's Agency from a well-informed Serbian source:—

"The Serbians, who for some time past have been engaged in fighting a more insidious foe than the Austro-German Army, have succeeded in combating disease and to a considerable extent preventing its spread. The army, after a necessary period of rest and recuperation, is now in splendid condition physically and morally, and is well equipped with every necessity of war. It is now ready to take the offensive whenever this may be deemed necessary. Thanks to the valuable assistance received, the inconvenience occasioned by the activity of Austrian monitors on the Danube has been considerably reduced, the Serbian shells being now sufficiently powerful to pierce the armour of the enemy's ships. By this means the danger to the Serbian trenches along the Danube has been considerably lessened."

27	14	Tuesday	15	16
28	15	Wednesday	16	17
29	16	Thursday	17	18

Sunday is the birthday of H.M. the Queen of the Belgians.

Prince George and Princess Marie of Greece passed through Rome on Sunday on their way to Paris.

Lady Wingate passed through Cairo on the 12th inst. on her way to Port Said, where she embarked for England.

H.E. the Persian Minister and H.E. the Roumanian Minister were among the callers at the Foreign Office on Monday.

Lady Willcocks has arrived in England from Egypt. Sir William Willcocks is still in Bucharest.

The War Office announces that in view of the large number of Church of England Chaplains now serving with the troops under Field-Marshal Sir John French's command, and of the increases which are in course of being made to the British forces in France, the Secretary of State for War, with the concurrence of the Archbishop of Canterbury, has appointed the Bishop of Khartoum to represent the Chaplain-General at the front, and to be his deputy there for all purposes connected with the Church of England Chaplains and Church of England troops.

Bishop Gwynne's long service in the Sudan has brought him into intimate touch with soldiers, and his appointment as Chaplain-General at the front is a well-deserved recognition of the zeal and energy with which he conducted his work at Khartoum. It is perhaps not generally known that when he first left England for Africa it was with the intention to establish a mission in the Southern Sudan. He had no idea at that time of remaining in Khartoum, and it was only his strong sense of duty that eventually decided him to abandon his cherished project in order to remain to minister to the spiritual needs of the white men of the Sudanese capital. Personal inclination urged him to carry out his original plan and work among the heathen tribes, but duty insisted that "charity begins at home," and that men of his own race in Khartoum were sorely in need of spiritual guidance. We know that duty triumphed, and the young clergyman took up his residence in the city of which he is now first bishop. From the first it was evident that he possessed all the essentials necessary for the sort of work which he was called upon to perform. Earnest and hardworking as he was, he never permitted his religion to dominate his humanity, and the soldiers were quick to see that in their *padre* they had found a friend whose sympathies were always at their disposal. In appearance, indeed, Bishop Gwynne suggests the soldier rather than the priest. His popularity in the Sudan has never been questioned. The great triumph of his career occurred a few years ago, when Khartoum Cathedral was consecrated by the Bishop of London. During his long service in the Sudan he never lost sight of his original project, and mission stations have been formed in various parts of the country. His lordship has been for some months at the front, where his gifts of sympathy have been greatly appreciated by the soldiers. His appointment as Chaplain-General will meet with unqualified approval by all ranks.

The *London Gazette* contains the announcement that the King has been graciously pleased to make the following promotion in, and appointment to, the Royal Victorian Order: To be Knight Grand Cross—Admiral Hon. Sir Stanley Cecil James Colville, K.C.B., C.V.O.

The new K.C.V.O., it will be remembered, took part in the Egyptian campaign of 1882, the Nile expedition 1884-85, and the Dongola expedition 1896. In the last-named operations he was severely wounded, and for his services he received the C.B. and was promoted Captain. For his services in the Egyptian campaigns he was given the medal and bronze star; and he also holds the medal with clasp for his services in the Zulu war (1879).

Lieutenant-Colonel the Hon. C. G. Bruce, M.V.O., commanding the 1st Battalion 6th Gurkhas, who was severely wounded in both legs at the Dardanelles, is making good progress, and will shortly be sent home from Alexandria.

Viscount Errington, who is gazetted a lieutenant in the Grenadier Guards, is the son and heir of the Earl of Cromer. He married Lady Ruby Elliot, a daughter of the fourth Earl of Minto.

Mr. E. N. Corbyn, of the Sudan Finance Department, has arrived in England on leave.

Mrs. Warnock has arrived in England from Cairo on a short holiday.

We are glad to learn that Mr. Walter Whittall, who is in hospital at Bury St. Edmunds, suffering from wounds received in Flanders (not at the Dardanelles, as erroneously stated last week), is doing very well.

The latest list of casualties in the Mediterranean Expeditionary Force contains the name of Sub-Lieutenant James S. La Fontaine, R.N.V.R., Hawke Battalion, who is reported as having been wounded on June 16.

The name of Mr. Lionel Vedova, whose death at the front we announced last week, wrongly appeared as Bedoda.

The engagement is announced between Major C. W. Spinks, Royal Artillery, attached Egyptian Army, younger son of J. C. Spinks, of Victoria (B.C.), and Marguerite Stuart, younger daughter of R. H. Coleman, of Toronto, Ontario.

Judge Lionel Sandars, President of the Mixed Court of Appeal, Alexandria, has been granted three months' leave, which he will spend in England. He arrived in London on Saturday.

The Rev. A. Lee Warner, who has been attached to a hospital ship with the Dardanelles Force, was expected back in Khartoum on July 11.

Mr. R. F. Le Bailly, who was for twenty years resident in Smyrna, and whose name will be familiar to many of our readers, has been granted a commission as Lieutenant in the R.N.V.R., and is now recruiting officer for the Royal Naval Air Service.

Mr. F. G. Lowick, Secretary of the British Chamber of Commerce, left Alexandria on the 7th inst. for England, on very short notice, to join his Majesty's Forces.

Mr. and Mrs. John Ross, of Alexandria, and Miss Ross were among the passengers by the P. and O. s.s. Kaiser-i-Hind, and have arrived in London.

Among the other passengers who came to Marseilles, en route for England, by the P. and O. steamer Kaiser-i-Hind were Bishop and Mrs. MacInnes, the Hon. Mrs. Lindsay, Mrs. Little, Mr. McKillop, Mr. A. Alderson, Mrs. and the Misses Liddell, and Mr. Chinn.

Mr. Frank Romer has returned to London from the Dardanelles.

Mr. Rowland Snelling, Managing Editor of the *Egyptian Gazette*, has arrived in London from Egypt, and leaves again next week on a visit to Spain.

Mr. G. H. Ward, of the Egyptian Ministry of Education, who received a commission as a second lieutenant in the 7th Manchester Regiment, is reported missing from the Dardanelles.

Mr. C. W. Anderson, of the Scavenging Department of the Public Health, Cairo, who was gazetted second lieutenant in the 5th East Lancashire Regiment, is now in Alexandria suffering from shock. He had a miraculous escape from death, being blown up fifty yards into the air by a shell, but descended unhurt save for bruises.

Captain James G. L. Ranking, of the Indian Political Department, who was British Consul at Ahwaz and assistant to the Political Resident in the Persian Gulf, was, we regret to learn, killed in action on the 12th inst., while taking part in the operations at the head of the Gulf. Born in 1883, he was the elder surviving son of Lieutenant-Colonel George Ranking, I.M.S., and Mrs. Ranking. He joined the Army in 1903, was appointed to the Indian Service the following year, and promoted to captain's rank in January, 1912.

Lieut.-Colonel Godfrey E. Matthews (Pasha), Royal Marine Light Infantry, who has been wounded at the Dardanelles, has had a long and distinguished career. From January, 1897, to 1910 he was seconded for service in the Egyptian Army, took part in the Nile operations of 1897, and was mentioned in the Sirdar's despatch on the battle of Atbara, in which he served with a Sudanese battalion. He also took part in the battle of Khartoum and in the 1899 Nile Expedition, including the first advance against the Khalifa, receiving the Egyptian medal with four clasps. Subsequently he was decorated by the Khedive with the Order of the Medjidieh, Third Class, and received from the Sirdar the thanks of the Sudan Government for his action with regard to the Mek of the Shilluks in 1903. He was made a C.B. on the Coronation of King George, and when he left Khartoum in September, 1913, the following order of the day was published:—"On the departure of El Lewa Matthews Pasha, C.B., on relinquishing command of the Khartoum district, the Sirdar desires to express his appreciation of the valuable service rendered by this officer in the responsible and onerous appointment. By his untiring energy and devotion to duty Matthews Pasha has brought the troops under his command to a high state of efficiency."

The *Mokattam* reports that Dr. Omar Bey Nolan is among the British subjects detained by the Turkish authorities at Aleppo. Dr. Nolan was formerly employed in the Egyptian Ministry of the Interior, but resigned in order to enter the service of the Turkish Government, when he changed his nationality and became a convert to Islam.

According to a mesage received from Sofia by the *Frankfurter Zeitung*, a change in the representation of Turkey at Berlin is expected shortly. It is considered probable that the former Grand Vizier, Hakki Pasha, will be the future Turkish Ambassador.

It is announced that the Greek Foreign Minister, M. Zographos, has resigned, and that M. Gounaris, the Prime Minister, will, for the present, act as Foreign Minister also.

A dinner was given by Sir Henry MacMahon, the High Commissioner for Egypt, at the Residency, Alexandria, on the 8th inst., at which the following guests were present: Sir Mohamed Said Pasha, G.C.M.G., Sir Ismail Sirri Pasha, K.C.M.G., Ahmed Sarwat Pasha, Sir Alexander Baird, Sir Mark Sykes, M.P., Captain Borton Pasha and Mrs. Borton, Archdeacon and Mrs. Ward, Judge Grain, the Italian Consul-General, Mr. and Mrs. van Zeller, Colonel Chenevix-Trench, the Hon. Mervyn Herbert and Mr. Coote.

Digitized by Google

A Reuter's message from Sofia, dated July 17, but delayed in transmission, states: Prince Hohenlohe-Langenburg, the German Ambassador Extraordinary, who is replacing Baron Wangenheim at the Sublime Porte, arrived in Sofia by special train to-day on his way to Constantinople. He was received this afternoon by the King in private audience.

A German wireless from Berlin, issued on Monday, says: Prince Hohenlohe, the temporary Ambassador at Constantinople, has arrived in Bucharest, where he resides in the Royal Castle as the guest of his brother-in-law, the King of Roumania. Immediately after his arrival he had a long conversation with the King.

The death has occurred at Plymouth of Mr. Thomas A. Rawlins, a Crimean veteran. He served with the naval brigade at the battle of Inkerman, and fought in the trenches during the siege and capture of Sebastopol. He held the Crimean and Turkish medals, also the Burmese and Chinese medals.

Mrs. Drower, better known to our readers as Miss E. S. Stevens, the well-known writer, who gave birth to a son a few weeks ago, is at present in Southampton. Her husband, who obtained a commission in the Army at the beginning of the war, is adjutant to a Hampshire battalion.

Lord Kitchener paid an official visit to one of the Indian hospitals at Brighton on Tuesday last. His lordship expressed himself as being very gratified at the treatment the Indian soldiers were receiving.

The *Egyptian Mail* of the 9th inst. says:—On Wednesday morning the general officer in command of the French base of the Mediterranean Expeditionary Force, in Alexandria, decorated Lieutenant Timm with the Cross of the Legion of Honour, for gallant behaviour in the Dardanelles. The ceremony, which took place at Victoria College, was witnessed by M. de Reffye, the French Consul, and a number of members of the French colony in Alexandria, as well as by some of the superior officers of the British Army. Lieutenant Timm, who was seriously wounded, has only just left hospital.

APPOINTMENTS, PROMOTIONS, etc.

Colonel Milivoyé Nicolaijevitch, of the General Staff of the Serbian Army, who has been appointed Military Attaché to the Serbian Legation in London, has arrived and entered upon his duties.

It is rumoured in native legal circles, says the *Egyptian Gazette*, that the transfer of Mr. Sheldon Amos from the Sultanieh School of Law to be Councillor at the Native Court of Appeal is only a prelude to his nomination as Vice-President of the Court, as soon as the present holder of this post leaves the service of the Egyptian Government.

Captain John J. M. Soutar, Army Veterinary Corps, has been taken on the strength of the Egyptian Army, with the rank of Bimbashi, and posted to the Sudan Government.

El Bimbashi H. T. C. Jones-Vaughan has been appointed Second Inspector, Mongalla Province.

The Rev. H. C. Robins, of Khartoum, has been granted leave as from July 8.

Mr. C. Constantinidi has been given an appointment (temporary for the period of the war) as acting paymaster in the Army Pay Department, and is at present fulfilling duties at the Royal Dockyard, Woolwich.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

LE BAILLY.—On July 18, the wife of Lieut. R. F. Le Bailly, R.N.V.R., Mem.Inst.C.E., of a son. 14, Cheyne Court, Chelsea, S.W.

WHERE TO STAY.

UPPER EGYPT.

Luxor.

The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.

The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.

Are the Finest on the Nile.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

Alexandria.

MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Cyprus.

THE CYPRUS HOTEL CO.

Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(Proprietor of the Army and Navy Stores).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

CROWN AND PEOPLE IN THE BALKANS.

It is a commonplace that the war is changing the world's outlook upon many things. In the face of a real crisis values are subject to modifications which remained undreamt of in more normal times. In the Balkans, for instance, it has always been accepted that those countries alone were well advised which imported their dynasties from abroad. It was the custom to point to Serbia as the fatal example of the policy of seeking to vest with royal dignity a family selected from among a peasant population. Rival claimants to the honour are encouraged, and the country is inevitably committed sooner or later to civil war. That Montenegro should apparently be an exception to this rule is due to the fact that the Petrovitch dynasty, which dates from 1696, originated in the system of ecclesiastical overlordship by means of which the country was saved from the fate of Serbia and Bosnia. To-day there is, perhaps, reason to revise our views of the advantages of a foreign dynasty for a country that is still engaged in carving out its own destinies. In Serbia, as in Italy, Belgium, and, we may add, Holland, where the Sovereign is of the same race as the people, we have the spectacle of the whole resources of the State mobilized in support of a national policy. In Roumania, Bulgaria, and Greece, on the other hand, we find divided counsels and national paralysis, and we are tempted to ask whether it is only a coincidence that each of these countries should have a foreign dynasty. Constitutional government, it is true, obtains in all three States, and in no case has the Sovereign deliberately sought to override the Constitution. But the fact remains that, while the majority of the nation inclines towards a certain policy, a minority, which enjoys in each instance the support of the Throne, is opposed to that policy, and so far this support has proved sufficient to override what must be regarded in a democratic country as the national wish. In Roumania and Greece the cleavage of opinion between the Crown and the people is most marked. At the outbreak of the European war the late King Carol proposed that Roumania should take her place in the field side by side with the Germanic Powers. The country would not tolerate such action, and neutrality was proclaimed as a compromise. Although King Ferdinand is believed not to be such an ardent supporter of Germany and Austria-Hungary as his uncle was, he remains a Hohenzollern, and can have little desire to declare war against the head of that House, if by any means Roumania can remain neutral. In Greece the nationality of Queen Sophie and the personal sympathies of King Constantine have played a more conspicuous part. Here, if we ignore for the moment the regrettable interlude of the King's illness, we have the monarch taking upon himself to revoke the decision of the representatives of the majority of the nation, and maintaining his attitude through the agency of the present Premier, even in the face of the verdict given by a general election.

Public opinion in Roumania, Bulgaria, and Greece can hardly ignore the similarity of the dynastic conditions existing in the three countries. There can be no question of impugning the loyalty of the Sovereigns to their adopted countries. The fact that their point of view finds support in the country, albeit in restricted circles, is sufficient proof that different interpretations of the policy required by the country's interests may be given in all honesty. But, without the support of the Throne, at least in the case of Bulgaria and Greece, there can be little doubt that long before this the wishes of the nation would have been translated into deeds. As far as Roumania is concerned, there is certainly no evidence to show that King Ferdinand is doing otherwise than awaiting the opportunity of ratifying the decision of the Government, which commands a parliamentary majority. But in regard to the encouragement which the dynastic relationships give to intrigues in a direction hostile to the national policy all three ruling Houses are on common ground. Here it is that the danger to the country's interests is in each case most pronounced. It may be possible to show that it is of little importance whether Roumanian intervention is delayed a few weeks or months, or whether Greece prefers to avoid material loss now at the expense of the future. But in each country signs are not wanting that this crisis in its history is not to be solved by academic discussion. As the period of national paralysis continues, feeling in each State becomes intensified, and may ultimately lead to most unfortunate results. If King Constantine were to persist in flouting the verdict of the Greek nation, there can be little doubt that the country would soon find itself on the verge of civil strife. In Roumania the bulk of the people may be less politically inclined than are the Greeks, but the demonstrations in the towns and the outspoken utterances of the Opposition leaders indicate that the policy of drift pursued by the present Government is meeting with growing resentment. The Bulgarians may be left to solve the riddle which their King's policy is likely to remain to his own subjects and to foreign Powers. If, since the outbreak of war, his attitude has been equivocal, the country will have suffered in the bitterness which a divergence of aim carefully fostered by German intrigue has engendered between political parties.

There will be no desire to minimise the difficulties of the position in which the rulers of Roumania, Bulgaria, and Greece find themselves. They feel responsible for the destinies of their countries, and the dilemma with which they are confronted may well tax the capacity of the ablest statesman. In the military situation they can discover little to help them in making their choice between the Central Powers and the Triple Entente. They see what a mighty effort the former have already made; they can hardly be blamed for not understanding how the intentions of the latter can be more potent than accomplished facts. Politically the choice may present less difficulty; but over all hangs the terrible knowledge that a mistaken decision spells destruction from without or from within, while even neutrality has its dangers. From this dilemma there can only be one method of escape. The sovereign must take his stand on the strict letter of his constitutional rights, and merely hold himself ready to ratify his people's decision. Advice it is his duty to offer, and he may interpose in order that public opinion may have time to mature. But deliberately to oppose the nation's wishes or to seek to thrust upon the country his own views before the national will has been made known is liable to prove as disastrous as it is unconstitutional. The wiser policy is the one which there is reason to believe King Ferdinand of Roumania is following; it is to be hoped that King Constantine and the King of Bulgaria will ultimately adopt it. In due course the present difficulties of the Balkan rulers will be eliminated to a large extent, even if the present situation in Europe were to repeat itself. In the second or third generation the foreign dynasty will be so completely merged in the adopted nationality that differences of opinion between Crown and people on racial lines will be almost impossible. While King Ferdinand is less of a German than King Carol, his son, Prince Carol, is wholly Roumanian; Prince Boris will hardly prove less a Bulgarian, while we may trust that no untoward influence will prevent the son of King Constantine and Queen Sophie from feeling himself a Greek of the Greeks.

THE KHEDIVIAL WAKFS SCANDALS.—III.

(By Our Cairo Correspondent.)

The inquiry into the Seif ed-Dine Daira has elicited, in addition to such minor irregularities as that of the placing of the funds at interest and the appropriation of that interest by the trustees, other even more glaring and, because of the amounts involved, even more serious irregularities. The more important are the purchase by the Daira of what is known as the Sharnub estate for £E150,000 and of two buildings in Alexandria for £E160,000, as also the exchange of the latter for two agricultural properties costing £E396,000. It should be mentioned that the Daira is an exceedingly wealthy one. Its revenue amounts to about £E40,000 per annum, of which only £E5,000 is spent on Prince Seif ed-Dine, who, ever since he attempted to kill Prince Fuad Pasha, has been confined in an asylum in England. As a result, the revenues of this estate accumulate, and are periodically invested in land.

The Sharnub estate deal really covered another transaction in which the Daira Khassa was interested. It appears that Aly Pasha Galal had borrowed in 1910 from the Daira Khassa a sum of money repayable at certain dates. He did not pay his instalments, and this somewhat annoyed Abbas Hilmi Pasha, who, as usual, was in want of cash. He accordingly ordered an area of about 1,500 metres in Cairo belonging to the Galal family to be sold up. His Highness and his confederates knew that the Seif ed-Dine Daira had a substantial sum of money uninvested, but such a simple deal as selling direct to it would not have suited the book of these gentlemen, who liked to confuse issues as much as possible. Accordingly they looked around, and found that a, to them, profitable combination might be made if the Daira purchased the Sharnub estate, whose owner was ready to sell, and might be persuaded to take the Cairo plot in part payment. After negotiations an option was obtained from him at £E95 per feddan in favour of Galal Bey. Thereupon Abbas Hilmi Pasha ordered the Daira Seif ed-Dine to obtain the usual authority from the Meglis to acquire the property, but at £E120 per feddan—the price at which a certain Osman Bey Moharram, engineer of the Wakfs, had condescended to value them.

In due course the Meglis authorised the purchase, £E50,000 to be paid at once and the balance in three annuities without interest, the revenues in accordance with custom to accrue to the Daira from the day of purchase. The vendor was then asked to sell direct to the Daira, Galal having ceded his option to the latter at the higher price. Being quite unsuspicious of what lay behind it all and the transfer of an option at a higher price being quite a customary feature, he agreed. The deed of sale contained various infringements of the decision of the Meglis. The vendor received an advance of £E8,000; two delegations, one for £E17,000 and the other for £E28,000, on the Daira's bank were handed him; the Daira undertook to pay off in two equal instalments a mortgage of £E55,000 which the Crédit Foncier held, and, instead of the balance being payable simply at certain dates, bills for varying amounts due at intervals of one year were given him; whilst on the day the deed was registered the trustee signed another deed under private seal undertaking, in consideration of the Daira's enjoying the revenues from the day of purchase and of the vendor waiving an instalment of £E2,500, to pay during 1912-15 to the Crédit Foncier the sum of £E6,767, interest due to it.

It has not been possible to ascertain the real reason for this last arrangement, nor for the acceptance of payment of the mortgages, which, although they were mentioned by the vendor, were omitted in the petition to the Meglis. Both of these were in direct violation of the decision of the Meglis. The motives underlying the other irregularities are perfectly clear, however. Galal had succeeded in persuading the vendor to purchase the 1,500 metres which the Daira Khassa wanted to realise (it is permissible to assume that the larger deal would have fallen through if he had not consented to buy the smaller property). The price fixed was £E16 per metre, and two of the bills represented the exact amount of the purchase price. It was only by giving the vendor bills, which he could hand over to the Daira Khassa and which the latter could discount, that the liquidation of any part of Galal's debt to the Khassa could be effected. Secondly, the giving of two delegations of the amounts in question was explained by the fact that the difference between the purchase price as per deed and that of the option, less the final instalment waived by the vendor, came to approximately £E28,000, wherefore one of the delegations was handed over by the vendor to Galal, who promptly cashed it.

Thus the Daira Khassa obtained payment of a sum of £E23,000 odd in settlement of what was partly a bad debt; the vendor, as far as he was concerned, quite honestly got rid of all his obligations on his estate, and received what was certainly a good price for it; whilst the Daira was saddled with a property, on which it assumed obligations far in excess of the real value. In short, its loss on the deal is roughly represented by the delegation of £E28,000 cashed by Galal. The Daira is, it is true, wealthy, but it did not dispose at the moment of the funds justifying such a purchase, and in point of fact Khairy Pasha had to persuade the Crédit Foncier to permit a variation of the conditions of payment laid down in the new contract and to agree to payment in twenty-eight annuities, as had been provided for in the original mortgage contract signed between that bank and the vendor.

The purchase of the two houses in Alexandria was effected in even more outrageous circumstances. A report was submitted by an expert—as before, Osman Bey Moharram, who as it happened was no relation of the trustee—to the effect that the property was worth £E160,000, and an application was made to the Meglis by Hussein Pasha Moharram and Saddek Bey for permission to effect this purchase with the surplus funds at the disposal of the Daira. The Meglis had a separate valuation made by Alexandria notables, who actually confirmed the valuation of Osman Bey. It accordingly authorised the purchase on the following terms:—£E35,000 cash down, and the balance, £E125,000, in five equal annual instalments, the revenue, as usual, to go to the Daira from the day of the purchase, but the trustee was not to sign the deed until he had received the usual certificate that the property was unencumbered. In the meantime, it had been arranged with the vendor that he would sell the houses for £E137,000, but that he should sign the contract with the Daira for £E160,000, on the understanding that the difference should be paid over by him to the intermediaries, *i.e.*, Moharram Pasha and Saddek Bey. But for fear that he might play them a trick the vendor was required to sign an undertaking to sell the property at £E137,000 to a man of straw.

Prior to the completion of any formalities even, the vendor received £E33,800 in cash; from his books it appears that of this sum, £E25,000 was paid to the man of straw, whose name was used by Saddek Bey to disarm suspicion. It is to be presumed that the reason that this money was paid in advance in this manner was that Saddek Bey wanted to make sure of his profit before anything was done. It is interesting to note that although the difference between the two prices was £E23,000, Saddek Bey received £E25,000; this was explained by the fact that Saddek Bey demanded a brokerage of £E2,000 in addition from the vendor, who, obviously anxious for future favours, did not like to refuse. On the deed being signed, a further £E1,200 was paid to the vendor, and, in addition, the balance was stipulated payable in five equal instalments, starting from November, 1913. In this deed it was declared that there were two mortgages, of a total of £E95,000, and it was laid down that the first instalment, due November, 1913, should be paid to the vendor, that the others should go direct to the banks interested in the mortgages, and that the final £E5,000 should be paid to the vendor, who undertook to produce certificates certifying that these were the only mortgages existing on the property, and to obtain from the banks a formal acceptance of the new arrangement.

But whilst in the request to the Meglis and in the latter's authority no mortgages figured, and in the preliminary deed of sale only mortgages for £E95,000 in favour of two banks were mentioned, the Mixed Court certificates produced, before the deed was registered, showed other mortgages amounting to over £E24,000. Yet, notwithstanding this discrepancy and the non-production of the acceptance of the arrangement from the banks, the trustee proceeded with the registration.

The tale of his iniquities did not, however, stop here; even worse was to follow. The instalment due November, 1913, was ceded by the vendor to the Banco di Roma in June, 1913, but it appears that he was in urgent need of money, and that he persuaded Moharram Pasha to help him. The latter, ever willing to accommodate, gave him a signed declaration that no seizure on, or cession of, the property had been made, that he had arranged with the vendor to defer the 1913 instalment until 1914, and that he had agreed to pay £E15,000 of it to a well-known bank. To cover himself the trustee took from the vendor a declaration that these statements were false! With this document in hand the vendor managed to get his bill for £E15,000 on the Daira discounted. A week later he drew two bills, each for £E5,000, on the Daira and got Moharram Pasha to accept them for the purpose of discount. In the meantime, not content with this illegally acquired money, the vendor had the audacity to present a petition for compensation of the loss of £E52,000, which he alleged he had sustained through the Daira taking the revenues from the day of the sale and paying no interest on the instalments. The Khedive ordered £E27,000 to be paid him, and in due course this was done. The vendor's books show that of that sum Saddek Bey and Moharram Pasha received £E13,700, so this probably explains why his claim for compensation was entertained.

As a result of this deal and its combinations, the Daira has had to pay off £E7,000 to two of the banks, a third has started expropriation proceedings, and action has been taken by the holders of the bills for £E20,000, whilst the Daira has not the satisfaction even of being able to draw the revenues, for it has transpired that part of them are also mortgaged. In other words, the Daira, which purchased for £E160,000 property that was notoriously valued at £E115,000, but was worth on the basis of the net revenue only £E80,000, has already paid over £E103,000 in hard cash, and still has to pay £E123,000, plus interest at £E800 per mensem, to meet all the engagements thrust upon it by its trustees. It stands to lose on the deal about £E200,000.

TANGIER TO TEHERAN.

According to a gentleman who has just returned from Salonika, the Turks in that city have earned for their countrymen a new sobriquet, "The Gentlemen of the Balkans." This will probably surprise many people in England who have been accustomed to regard the Turk as "unspeakable" merely because they have never taken the trouble to question this popular statement. Yet to anyone who has come in contact with the average Turk in the days of peace, his new title will be no surprise at all. In many of the essential things of life, the Turk, being an Oriental, is different from the peoples of the West, but perfect manners and an unchanging affability in his dealing with foreigners have always been among his most prominent characteristics. Salonika to-day is an open neutral town where Christian and Turk, British, French, Austrian, and German meet. It is not difficult to imagine a more amicable community than this, for human nature is human nature, and it seems impossible for Briton and German, for instance, to hob-nob over the small table of a café while they read the latest news from the front. If open conflict is avoided and passions are restrained, it is only because necessity compels it, but, as a rule, the members of each community cling together, the Briton with his ally in the field, the German with the Austrian. Only the Turk is left, and, suave and impassive, he knows no foe, though the guns of the Allies are almost at the gates of his beloved capital. Perfect in his courtesy, he has made friends all round, a gentleman, cool and supremely indifferent to the small embarrassment of war. Seeing him, it is hard to understand how the nation of diplomats to which he belongs came to fall victims to the heavy bluster of German intrigue. But such surprises are, I suppose, the essence of diplomacy after all. The Turk is suffering, and must suffer further, because of his mistake, but I hope that the hand of retribution may be laid more heavily still upon the Teutonic schemers who led him to his doom.

***

The following extracts from a letter written from Braila about a month ago, are interesting as illustrating how valuable to the Allies is the service rendered by Roumania in preventing munitions of war for the Turks from passing through her territory, and at the same time how anxious is her position in view of the Russian reverses.

> I manage to keep fairly busy, which is a god-send, as our own good business is dead for as long as the Dardanelles remain closed; and as far as I can judge it is impossible to say when the Straits will be forced, unless the Turks capitulate and make peace with the Allies—an eventuality which is not altogether excluded. There is a note in the papers this morning saying that a Military Commission left Constantinople for Berlin to put before the General Staff the urgent necessity of the Turks withdrawing from the German *bloc*, owing to lack of munitions, etc.
>
> The Russian reverses and severe blows they had in Galicia and Bukovina have rendered Roumania joining the Allies a most difficult question, and I understand that we are not going to move until the fall of the Dardanelles, unless something quite unexpected happens in the meantime. Everything is ready now in the country for immediate action. —— has been appointed to the Braila corps, so will have to serve during the war, as will everybody else, in whatever capacity his years and personal aptitude will permit.

This, I think, bears out what I wrote last week regarding the difficulties of the Roumanian position. The attempted hectoring on the part of Germany confirms my opinion that Roumania is running straight enough in the matter of not allowing any smuggling of war material, and her firm refusal to be bullied or bluffed is greatly to her credit.

***

Apropos of Roumania's difficult position, it is interesting to learn from a trustworthy and very well-informed correspondent that the German Jews in Roumania are playing a very active part in endeavouring to keep that country from joining the Entente. One of the most active of these gentry, I am informed, is a man who, in the past, has received many kindnesses at the hands of our countrymen, and has actually held an appointment under the British Government. Which shows once more the advisability of avoiding at all costs employing anyone tainted with German blood or German sympathies in any position whatever in which he may be able to do harm to our interests.

***

In connection with this subject it may not be out of place to point out that Greece, also, appears to be suffering considerably from the alien pest and the influence of suspect parties in high places.—No, I am not referring to Queen Sophie! A Greek friend tells me that at the last election the agents of the Young Turks played an extremely active part, and that, as a result, Drama has the misfortune to be represented by a deputy who is the brother-in-law of Talaat Bey; while Vodena's Deputy is a Turkish bey, who can speak neither Greek nor Turkish, but only Bulgarian. The latter case strikes me as more amusing than annoying. But Drama has my sincere sympathy!

***

It seems as if Hajji Wilhelm has been rather overdoing it in the matter of victories in Turkey. At the beginning of the war he got into trouble with the Christians by referring to his Maker as a sort of lieutenant to the Crown Prince; more recently he has put his foot in it by forgetting that another even greater than he once guided the Moslem hosts in war. According to a writer in the *Sunday at Home*, a Turkish peasant, commenting upon the constant victories of the German Army and Navy, remarked that he could not understand it. "Mohammed in his wars did not always meet with success; is the Kaiser greater than Mohammed?" he asked. This question may seem to be a little wanting in gratitude, considering that all the best liars in Germany have been working overtime for weeks past in order that the Turk might be comforted, but it was only the utterance of a poor, uneducated peasant, after all. It is too much to expect that such a creature could appreciate the difference between the liarless reports of the Prophet and the wireless distorts of the Kaiser. But even such as he is susceptible to the influence of education, and one day knowledge will be his. It may not be until the shadows of our fleet darken the city of Constantinople, but sooner or later he will appreciate the difference between Prophet and Kaiser. And although I do not love the Germans, I had rather not think of those who remain in the doomed city when, borne upon the shells of our naval guns, their lies fly home to roost.

***

In an address on the subject of the Work of the Scottish Women's Hospital Unit, which she delivered at the King's College summer meeting last week, Miss Kathleen Burke told some good stories of the Serbian patients. One of these was to the effect that, observing a suspicious bump in one of the patients' pillows the nurses investigated—with the result that there was revealed a small roast sucking pig, which the man's wife had smuggled in to him, and which he was reserving until he felt equal to tackling it! I am not prepared to vouch for the truth of this tale, and I have my doubts whether Miss Burke would do so. In fact, I suspect that it was probably concocted somewhere in Serbia for the express purpose of annoying the Huns, who, now that they are reported to be short of pork, will probably be frantic when the yarn reaches them.

***

The military party in Serbia is, as the letters of the Belgrade correspondent of THE NEAR EAST show clearly, not exactly eager to bridge over the gap that divides their country from Bulgaria. This is unfortunate; for if M. Pasitch were left free to handle the matter it seems not improbable that a marked improvement in the relations of the two States might be brought about in a very short time. For, though circumstances have not, perhaps, been quite so favourable to him as they have been to M. Venizelos, the Serbian Prime Minister is not unworthy to be mentioned alongside the great Hellene. He is a statesman of no mean order; and—what might be even more valuable at the present crisis—he is really, one suspects, well disposed towards Bulgaria. Unless I am much mistaken, he has more than once found safety over the frontier when the turn of the political whirligig made Serbia temporarily an unhealthy place of residence for him; and, I am told, by one who ought to know, that he speaks Bulgarian remarkably well. In fact, it is even said that in moments of excitement he has been known to lapse into Bulgarian when speaking in the Serbian Parliament, and has only been brought up by repeated cries of "This is the Skuptshina, not the Sobranje!"

***

Ornithology is not the strong point of the good people of Salonika. At least, that is the impression left on my mind by the following story, which was told me a few days ago. A certain British Consul in the Balkans had an Albanian kawass, who bore on his cap an heraldic representation of an ostrich, that being the Consul's crest. On one occasion, being in Salonika, accompanied by his kawass, the Consul was not a little surprised to find that he was everywhere taken for the representative of a certain large oil company, an American concern. Puzzled to account for this fact, he at last inquired point blank of one of the natives what was the reason for the mistake. The native, in his turn, looked surprised, too. "But, *Effendi*," said he, "surely there is no mistake at all! Your servant wears in his cap the representation of a stork, which, as we all know very well, is the mark of the great American oil company." If Stork and Ostrich could only *understand the* story, I wonder which of them would be *the more upset.*

THE PRESS ON THE NEAR EAST

German Intrigues in Asia.

In an article contributed to the *Daily Mail* (July 19) Mr. Lovat Fraser deals with the important and little understood question of German intrigues in the Middle East. He enumerates the various aspirations which animated German policy in the Near and Middle East when she was planning the present conflict, and emphasies the importance of Persian support to their successful issue:—

As military allies the Persians would have had little value, but the moral effect of their participation in the war might have been great. For example, Persia is still to Northern India very much what ancient Greece is to this country. Indian art, literature, and architecture, and still more the principal Indian language, have for centuries been profoundly under Persian influence. Moreover, if Mohammedan schisms had been so far healed that the Persian Shiahs had thrown in their lot with the Turkish Sunnis the result throughout the whole world of Islam might have been disturbing.

In commenting upon the activities of German agents in Persia Mr. Fraser pays a tribute to THE NEAR EAST for the manner in which the importance of the Persian question has been kept before the public. He notes with satisfaction that in the holding up of Dr. Pugin's expedition by the Persian Government and the recall of Herr Wassmuss, the Consular agent at Shiraz, the German propaganda in Persia has received a severe check, and the return of the British Minister, Mr. Marling, to the Persian capital is also of good augury.

But our greatest safeguards probably are that the Persians know a great deal about their near neighbours, the British and the Russians; that they know peace will pay them a great deal better than participation in fruitless strife; that Germany seems to them a very long way off; and that they have no reason to love the Turks. In Asia men look at the lessons nearest at hand. Persia has seen the Turks driven out of Lower Chaldea by a powerful British Expedition, and she will probably prefer to run no risks. Yet the East is a region of sudden changes, and the Persian question will continue to require anxious scrutiny for a long time to come.

The writer regards the British position throughout the Middle East as sufficiently secure at present, although "never entirely free from danger, and needing constant vigilance." He concludes:—

The real clue to the question is that parts of the Middle East might be stirred by a great Turkish victory, but never by a Turkish repulse. In the same way, the most certain solution of the whole Balkan problem lies in an Allied victory at the Dardanelles.

The Attitude of Roumania.

Dr. E. J. Dillon, in his concluding article on the above subject in *Land and Water* (July 17) sums up his conclusions in the paragraph which we quote below:—

Roumania for the time being is M. John Bratiano. And this idol of the nation is embarrassingly conscious that his shoulders are supporting the whole weight of the present Roumanian realm and also of the greater kingdom yet to come, and is resolved to fashion the latter as far as possible without trouble or expense to the former or risk to his own great name. He has thus set the national problem on the lowest grounds conceivable, and it depends on him to keep it there. For, with the exception of the enlightened and courageous band of young Roumanian patriots led by Take Jonescu and Filippescu, the only public opinion with which he is concerned is that of the classes whose main interests keep them closely linked to Austria and Germany. So long, therefore, as the Allies continue to table the problem on the lines heretofore adopted they can confidently anticipate no change except by far-resonant military success. But is it indispensable that they should continue their efforts on these barren lines?

Balkans and the Federal Principle.

In the *Asiatic Review* (July) Mr. A. Schopoff prefaces his article on "The Balkan States and the Federal Principle" with an allusion to that of Dr. Platon E. Drakoules which appeared in the February issue of the *Asiatic Review* under the title of "Peace and Brotherhood among the Balkan Peoples." This article, Mr. Schopoff refers to as "excellent," but has published his own to add important information and to examine Dr. Drakoules's "rights and reasoning." The contribution, in fact, treats the same subject from a Bulgarian as opposed to a Greek point of view. The writer shows that the idea of "a Balkan Confederation, on condition that the nationalities preserve the ethnical frontier, has for years past been the guiding principle of the greater part of the Bulgarian educated classes." His opinion on the necessity for Balkan unity may be gathered from the following paragraph:—

The Balkan nations and States may preserve themselves from invasions only by forgetting their mutual wrongs and persecutions, in patiently discovering a means to bear with each other, and in agreeing to decide all the differences among themselves by arbitration. . . . Serious fears exist in many circles that at the settlement of the general European War the Entente will fail to put in force its plan based on the principle of nationalities. Should it so fail, it will mean a complete defeat of the Allies and a triumph for the interests of the Central Powers. The volcano will not be extinct, and will cast up as before the most serious motives for conflicts among the European States. German and Austrian influence will increase in the Balkans, and the differences cleverly incited by these States will become more acute, and will be a constant menace to peace.

Mr. Schopoff goes very thoroughly into the Macedonian question, and quotes an imposing array of statistics in order to prove the validity of Bulgarian claims in that area. He concludes an interesting article in the following words:—

There is not in history a more favourable opportunity than the present European War for consolidating the compact masses of the Greek population living on the European and Asiatic seaboards of the Near East. But at the same time a similar national entity must be accorded to the Bulgarian people.

An American Opinion.

The *Christian Science Monitor*, of Boston, Mass. (June 30), contains a long article, contributed by its special correspondent in Athens, concerning the possible intervention of the Balkan States. The writer's remarks concerning the attitude of King Constantine are especially interesting:—

King Constantine, to the writer's personal knowledge, has never doubted, either that the Allies will emerge victorious from the war, or that the interests of his country run parallel to those of Britain and France, and, if ever the telegrams exchanged between him and the Kaiser in the first days of the war come to be published it will be found that he therein not only laid down Greece's position, on clear and unmistakable lines, but scornfully declined to entertain the German proposal that Greece should stand by the while Bulgaria attacked Serbia.

The correspondent regards Roumania's statement that she cannot march while Bulgaria's intentions remain in doubt as little more than a mere excuse for inaction, as Greece would attack Bulgaria if she moved against Roumania; but he nevertheless considers that the principal cause of Greek neutrality lies in the menace of a flank attack by Bulgaria.

The attitude of Bulgaria is endowed with an importance out of all proportion to the actual military assistance which she is in a position to render to either side, and, unless very serious arguments can be advanced in her favour, she lays herself open to a charge of having acted in a manner distinctly at variance with the interests of the entente Powers.

The remainder of the article is devoted to an examination of Bulgarian claims in Central Macedonia, which, with the personal interest of King Ferdinand and the "incompetency of Bulgarian diplomacy," the writer regards as the sticking point which prevents Bulgaria throwing in her lot with the Allies in the war.

Articles to Note.

Egypt and the Sudan

At the Imperial Institute.

On Wednesday last Professor H. B. Gray concluded the course of interesting lectures that he has been giving at the Imperial Institute on the products of the various colonies and dependencies of the British Empire with an address on Egypt and the Sudan. The lecture was illustrated by lantern slides and followed by a tour through the Sudan Court, where various products are exhibited.

Professor Gray said that from the earliest times Egypt had been divided into two unequal parts—Lower Egypt, stretching southwards from the mouths of the Nile to Cairo, and Upper Egypt, which anciently extended only to the first cataract at Assouan, but now reached to the second cataract at Wadi Halfa. Egypt had been said to be the gift of the Nile, and this was true. The Nile was the life-giver; wherever the mighty stream extended to east and west there was life; beyond that lay desert and death. The strip of cultivated land had been irrigated for five thousand years by primitive appliances. Of these one was the *sakieh*, a large wheel turned by cattle or buffaloes, camels or asses, fitted with scoops of wood like a dredging machine; another was the *shaduf;* this could be set in motion by a man and drew water up in buckets. Several *shadufs* could be used as a substitute for a *sakieh*. Since 1882, however, irrigation had taken place by means of trenches and counter-trenches to so great an extent that the strip of fertile land had increased beyond all knowledge.

Beneficial Damming.

The Nile was fed chiefly by rainfall on the Abyssinian mountains and the melting of snows there in the hottest season. In June the river began to rise, then more quickly in July. The process was arrested in September, but resumed, and the river reached its greatest height in October, in which month it began to fall, until in February and March the fields dried up.

The great dam at Assouan, 550 miles from Cairo, held back a body of water amounting to 234,000,000 gallons. It had cost £2,000,000 to construct, but was calculated to enrich Egypt to the extent of £3,000,000 per annum, having irrigated lands once beyond the range of cultivation. There was another dam at Assiout, lower down the river, and a third barrage fifteen miles below Cairo. The damming of the Nile had had an immense effect on the industries of the country.

There were few great industries; cotton and sugar were two of the principal. Cotton required very little moisture. and sugar a great deal, and various tracts of land were irrigated more or less according to the crop intended to be grown. Both the crops named tended to exhaust the soil, so that, wonderfully fertile though the Nile mud was, the fields often had to lie fallow or else be manured. Egypt was second on the list of the world's great cotton-producing countries, the order being, first, U.S.A., then Egypt and the Sudan, India, Brazil, and Peru. The manufacture of cotton was a complicated process, but its cultivation was a very simple one. Cotton was produced by a plant which, after flowering, displayed a large boll or capsule. This, as it ripened, opened with three or five valves exposing seeds densely covered with a coating of fibre or wool. The seeds were separated from the cotton by means of a saw gin or roller gin; they were half husk, half kernel. From the kernel oil was extracted, the residuum being cotton cake, which was used for food for cattle. The cotton was put into bales, which were highly compressed for shipping, and thus packed it was ready for export to the countries of manufacture.

Egypt's Three Seasons.

There were three agricultural seasons in Egypt. First, a winter crop was sown in October. The ground was not ploughed for this, but the seed was scattered over the soft mud and pressed down by a wooden roller. The crops grown in this way were chiefly wheat, barley, and beans; they were harvested in March. Summer crops, among them rice and cotton, occupied the land from April to August. The autumn season from August to October lasted only seventy days; but short as the period was, it was long enough for a crop of maize or millet to be raised. Dyes, like indigo and henna, were other products, as also were oils, among them the tropical sesame and the saffron. Sesame oil to the value of £144,000 was exported annually. Besides these, leguminous plants, such as beans and lentils, were grown in profusion, and vegetables, including onions, cucumbers, melons, and tomatoes.

There had been a great increase in the number of trees since the British occupation and consequent extension of irrigation. Among these trees were the acacia, mulberry, sycamore, date palm, and dom palm. The last-named furnished nuts from which an oil was extracted, and which could also be used for making vegetable ivory buttons.

Professor Gray touched but lightly on history and archæology, for these were not his theme. But some interesting slides showed the ruins of Karnak and Philæ, colossal statues, pyramids, and other reminders of Egypt's wonderful past; and, speaking of the present, he gave an amusing account of the methods of bargaining prevalent in Egypt as in other Eastern lands. "There are no fixed prices in the East," he said, "and least of all in Cairo. If a tradesman declares an article at 18s. he is not offended if you offer him 2s. 6d. He then tells you that this will not buy bread for his children. Then you begin to bargain by the aid of a friendly cup of coffee, and you probably get the article for 4s. 6d."

The Sudan's Commerce.

Turning to the Sudan, he said it could not have developed any external trade without the line of railway which had been constructed since the country came under British rule. This has linked up Khartoum with Port Sudan and Suakin on the Red Sea and with Sennar on the Blue Nile, Kosti on the White Nile, and beyond with El Obeid. The change produced was almost miraculous. From 1906 to 1913 imports had grown from £1,222,527 to £2,109,776; while exports during the same period had increased from £264,096 to £1,185,186. The native cotton of the Sudan used to be very inferior, but now in the district round Tokar cotton was grown to the value of £300,000. In the Gezira district the land was being irrigated, and it was predicted that in twenty years crops would be raised to the value of £1,350,000 per annum.

Climatically the Sudan was divided into two parts—a northern part, where irrigation was necessary, and a southern part, where agriculture depended on rainfall. Wheat was grown only on irrigated land; it was a winter crop reaped in April. Maize was grown on islands and flooded slopes; but the staple grain and food of the country was a kind of millet called dura. This was grown on all lands. The principal article of export was gum; forty-six varieties were found of this. In the dry season, in December and January, the villager would split upwards a piece of bark and tear it off. In seven days the gum had exuded, hardened in the sun into what was called a tear, and the native returned and removed it; £370,000 worth of gum were exported annually. Another industry which might some day be developed with great results was the production of papyrus. This was still the best paper-making material in the world. In the sudd or swamp where it grew it was found in such quantities that a pathway had to be cut through it for the passage of steamers going up and down the rivers.

Speaking of another opportunity that the Sudan presents, Professor Gray said that one of the most prized openings for well-educated young men was in the Sudan Civil Service; but no one had any chance of acceptance unless he was a leader of men as well as a reader of books.

In a subsequent stroll through the Sudan Court various exhibits were pointed out enforcing or illustrating points in the address, the gum exhibit being especially valuable and interesting.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The most interesting statement of the week is Mr. Asquith's speech in the House of Commons on Tuesday in support of the Vote of Credit for £150,000,000. That part of it concerning Great Britain's financial advances to her Dominions and Allies is important inasmuch as it shows to what an extent (£43,915,658) we have given to the good cause. More striking, however, was the Premier's plea that the Government should not be tied in future to the granting of loans *only* to our Dominions and Allies. For, Allies-to-be are not Allies *de facto*, and it might be necessary to come to the aid of the former before they had acquired the status of the latter. The circumstance that such powers have been asked for and granted points to pending happenings—perhaps not foreign to the Near East. But, as Mr. Asquith hinted, this was not the opportune moment for going into details.

***

The meeting of the Anglo-Egyptian Oilfields held last week was far from being satisfactory. The 214,000 "B" shares originally given for the Egyptian Oil Trust's property seem to be lost, the property having been proved worthless. The deepest boring seems to be one of 1,670 ft. at Hurgada. The third salient feature of the chairman's speech was a statement to the effect that the company had scarcely received from the Government the help which pioneers should be able to look for.

***

My opinion anent the Anglo-Egyptian Oilfields' methods has already been ventilated in these columns. I now venture to state that I differ, and on good authority, from the assertion that the Egyptian Oil Trust's property has proved valueless. It is quite possible that it is valueless as regards shallow oils, but what about deep oils? Has any attempt been made to strike them? And what is the deepest boring on that property? The Hurgada 1,670 ft. well cannot be regarded as a "deep" boring, so that admittedly the Hurgada field has not been "proven" either. As for the grumble against the Government, I maintain that the Government should oblige the company to make one or two serious trials, *under expert advice*, to reach the lower geological strata instead of merely tapping shallow oils wherever they are to be found. The Government must realise that, unless deep oil is struck, Egypt's future as an oil-producer is nil. If deep oil, as some experts maintain, is forthcoming, well and good; if not, the "oil in Egypt" illusion will burst like a bubble. But to say that a field has been "proven" because it contains no shallow oil is inaccurate.

***

In connection with the 1,650 ft. well in Hurgada, mentioned by Sir Marcus Samuel as showing to what great depths the company had drilled, the following statistical information from the *Financier* will be read with interest by those who argue that the fields already tapped have been "proven," and that Egypt is a perplexing proposition. The depths mentioned are almost five times that of the Hurgada well, and can aptly be termed "deep" borings. The deepest well in the world, says the paper referred to, is in Upper Silesia, in the German Empire. It is a diamond drill-hole in a coalfield, and is 7,350 ft. deep. A well in the United States which may go deeper, according to the United States Geological Survey, is four miles north-west of McDonald, Pa., and about fifteen miles west of Pittsburgh. This well, which is being sunk to the Medina sandstone—a bed that elsewhere contains oil and gas—is now 7,174 ft. deep. Some gas and oil were struck in the upper part of the well. Between the depths of 6,830 and 7,100 ft. rocks bearing rock salt and salt water were encountered. The temperature in this well at the depth of 6,775 ft., as recently determined with great accuracy, is 145.8 degrees Fahrenheit. At Derrick City, Pa., there is a well 5,820 ft. deep, which is probably the second deepest well in the United States. Another deep well is on Slaughter Creek, Kanawha County, W., Va.; it is 5,595 ft. deep. Near West Elizabeth, Pa., there is another well 5,575 ft. beneath the surface, penetrating into a black shale. According to experts, deep oil should be struck in Egypt at depths varying from 2,000-3,000 or even 4,000 ft. Why not make the trial?

***

We publish on anothes page the text of two Cyprus finance laws, the Budget Surplus Appropriation Law and a supplement thereto, the latter covering the last financial year and the former the current year up to May, 1916. The total of the two does not amount to £25,000, but more disappointing is the fact that agriculture is not provided for to the extent desired by most Cypriots. Thus a correspondent writes: "I feel strongly on the question of agriculture in Cyprus, and consider that a liberal policy is needed. It would not fail to be remunerative, in a reasonable time, if wisely directed. In the past the nature of our tenure has been some excuse for parsimony, but now? . . ." Another correspondent emits similar views: "The laws do not, in my view, show that expenditure is provided for on the lines of a decided and systematic policy. In agriculture, admittedly the life of Cyprus, we should face the situation (created by centuries of misrule and neglect) boldly and decidedly. . . . Expenditure has not hitherto been on lines of relative importance as regards island interests. Things have been carried out, or attempted, by fits and starts and in a too half-hearted way. . . . Take, e.g., the first item of Law IV., 'Malarial Campaign.' This is excellent, and £3,000 is voted. But can it be said that £3,000 would not be more wisely spent in other directions. The campaign in itself is a worthy undertaking, but other things should not, on that account, be left undone."

***

The *Evening News*' howler last Monday, when it called General Sir John Maxwell the High Commissioner of Egypt, finds a counterpart in the supplement to the Chamber of Commerce *Journal*, treating of "Trade Products of the British Empire." This supplement is in every way a useful and handy compilation, excepting in so far as it persists in placing Egypt among foreign countries. This is hardly fair. Even the financial papers continue to classify Egyptian shares among the foreign ones, and surely it would not be a costly undertaking to alter the classification once and for all. The fact is we do not realise the change that has taken place in the land of Egypt. We are terribly insular, and the Empire can wag to the right or to the left of us for aught we care so long as it does not directly affect the United Kingdom. Even the highest in the land are at times unable to "think imperially." Take, for instance, Mr. Asquith's recent speech at the Guildhall, in which he urged a reduction in the consumption of imported articles. He cited tea and sugar, among other articles, without realising for a moment that over 90 per cent. of the tea imported into the United Kingdom comes from British possessions, and that a goodly percentage of the sugar comes from British possessions (the output could be greatly increased if foreign sugar were penalised). The fact is, Mr. Asquith, like so many thousand Britons at home, unconsciously classifies as imported goods all goods coming to these shores, regardless of their origin. This is a very narrow view to take, but I admit that it is unconscious, for we do not think imperially. If we did, Preferential Tariff, that bugbear of old-fashioned Cobdenites, would soon find a prominent place on our statute-book.

***

The Egyptian Post Office is about to inaugurate a service of inland postal orders similar to that obtaining in Great Britain. The *Egyptian Gazette* gives the following particulars concerning the new orders, which, in view of the monetary conditions prevailing in Egypt, will be heartily welcomed by the community. It will be possible, says the paper alluded to, to purchase in the near future from any post office postal orders which, after the name and occupation of the addressee have been filled in, may be despatched through the post like a banknote. Though the office of payment may be left blank, the filling in of the name of the payee is obligatory, and not optional, as in the system adopted in England. The design of the new orders is based on the British ones, and is "neatly executed." The values range from P.T.5 to P.T.100, and fractional amounts may be made up by means of stamps. Orders from P.T.5 to P.T.25 are printed in red, and the poundage is four milliemes; orders from P.T.30 to P.T.50 are green (poundage 7 mm.); from P.T.55 to P.T.75 blue (poundage 7 mm.); and from P.T. 80 to £E1 brown, and poundage P.T.1.

***

I congratulate those responsible for bringing out the Egyptian *Journal Officiel* (why not give it an English name now, such as the "Official Journal" or "Gazette"?) on its improved appearance. Hitherto the "Adjudication" pages consisted of a rambling lot of paragraphs delightfully full of repetitions. This has all been changed, and what the *Journal* gains in tidiness it likewise gains in labour and expense.

Egyptian Trade During May.

(From Our Own Correspondent.)

Cairo, June 23.

From the bulletin for May issued to-day by the Egyptian Customs Administration it is evident that the trade depression from which Egypt, together with other countries, has been suffering is continuing unabated. Both exports and imports show a falling off during the past month. The figures are:—Imports £E1,578,769, against £E2,455,957; and exports £E1,378,206, against £E2,029,875 during the corresponding month in 1914. It is to be noted that the increases recorded in February and April have not been maintained by the exports, and the decreases in imports and exports since the beginning of the year are now £E5,140,788 and £E1,578,785 respectively.

Imports.

Imports of livestock and of construction wood and other woodwork were practically at a standstill, for of the former only 57 head, as against 38,551 in May, 1914, were imported, and the imports of the latter amounted to but £E4,844, as compared with £E125,227 a year ago. Skins and worked hides fell off by £E24,179, for £E10,694 of which the Triple Alliance, as now constituted, is responsible, the balance being accounted for by Great Britain and France. Rice imports increased by £E16,953 to £E54,958, practically all of which came from India, but flour fell from £E153,323 to £E47,127. Coffee more than doubled to £E66,334, Brazil accounting for £E59,775 and India for the balance. Only one ton of refined sugar was imported, as compared with 1,060 tons in May last year, when the whole of this trade was in the hands of Austria. Petroleum is up by £E50,642 to £E110,341, all of which came from the United States, who have taken in this matter the place which Roumania held. Coal was stationary, the figures being but £E682 less than in May, 1914; in reality, 102,692 tons less were imported, the statistics being kept up purely owing to the high prices created by difficulty in obtaining freights. Matches increased by £E8,407 to £E17,419 during the month, but as, since the beginning of the year, imports of this article had fallen off by £E5,223, this increase, comparatively speaking, only balances matters. Sweden is now the only source from which Egypt can draw her supplies, as Italy, which had taken the place of Austria, hitherto the chief purveyor to this country, has now entered the war arena, and has prohibited exports. Cotton piece goods and the rest of the textile category, with the exception of sacks, which came principally from India, show a decline of £E150,138 on the month, whilst ironwork and machinery of every description have fallen off by £E292,748.

Exports.

Turning to exports, we find that eggs again have increased by £E29,213 in value and 14,215,000 in number; by comparison with 1914 the egg trade has improved immensely. Skins are down by £E10,131, but practically the whole of the cereal category shows an increase, the maize, lentils, and beans exports having evidently profited by the recent permission to export freely. These cereals amount to £E53,980, as against £E2,205 in May, 1914. As almost all these cereals went to France, Italy, Greece, and Montenegro, there should be every prospect of this country being able to profit by the present situation, and thus derive some compensation for what it may lose from the restriction of the cotton area. Sugar continues to maintain its position; an increase of £E16,344 is recorded on the figures of May, 1914—since the beginning of the year the exports have increased by no less than £E307,104—and over half of the total quantity went to Morocco, the balance going to France and various parts of the British Empire. Onions still continue to improve, 8,293 tons more, with an increase in value of £E14,859, having been exported last month. Cotton is down £E786,772—186,494 cantars less—but cotton-seed, cotton-seed oil, and cotton-seed cake show increases, the latter of £E34,261. Natural phosphates have fallen off by £E13,511, whilst benzine and liquid fuel have increased by £E16,257. Gold, bullion and gold and silver articles show an increase of £E39,923. The depression in the cigarette trade continues; exports amounted to £E14,400 less in May, and the quantity decreased by 18 tons, Germany, Austria, and Belgium accounting for nigh upon the whole drop.

Specie imports would have been but £E119 if it had not been for the import of £E108,600 new silver and nickel for the Ministry of Finance. Exports amounted to only £E7,080, of which £E5,039 went to Jaffa for the American Jewish Relief Society.

Imports from the United States, Brazil, Greece, Spain, and Norway all increased, those from the first-named by as much as £E104,215, or over 160 per cent. on its share in May last. Whilst the imports from England remained to all intents and purposes stationary, the difference being but £E791 in favour of last year, those from the Empire as a whole show a slight improvement. It is interesting to note that the Triple Alliance account for £E539,627 of the decrease in Egypt's import trade last month, and that those countries stand for about half of the total shrinkage since January 1.

Great Britain's share of exports improved by £E74,017, and that of the Empire by £E85,822. The most striking increases amongst the other countries were United States, from £E219,065 to £E307,543; Morocco, by £E11,386 (sugar); and Japan, from £E16,763 to £E52,156 (cotton). For the first time for many months Italy and Switzerland show a falling-off in their purchases from this country, in both cases the shrinkage being considerable.

Trade with the Sudan.

During the month Egypt purchased goods to the value of £E46,175 from the Sudan, to whom she sold £E78,923 worth. Imports from the Sudan included livestock £E7,399—to counteract the decrease in foreign imports—gum £E2,605, cotton £E14,587, and cereals £E11,989. Exports to the Sudan comprised leather goods £E3,026, flour £E2,713, sugar £E27,596, cotton tissues £E16,666, and coffee £E2,170. The total trade between the two countries since the year started amounts to £E480,339.

SOMALILAND'S RESOURCES.

The *Bulletin of the Imperial Institute*, to be published to-day, contains the following paragraphs on the salt and coal resources of British Somaliland:—

Coal.

A sample of coal, stated to have been obtained from a locality fifty-three miles east of Berbera and thirty miles south of Karam, was received from his Majesty's Commissioner in Somaliland in February, 1915.

It consisted of lumps, varying from about ½ lb. to 5 lbs. in weight, of black and fairly compact coal of the sub-bituminous type. The coal had a specific gravity of about 1.3.

Streaks and nodules of iron pyrites were present in some of the lumps.

The coal was examined with the following results:—

	Per cent.
Moisture (on drying at 110° C.)	13·01
Volatile matter	35·16
Fixed carbon	39·78
Ash	12·05
Sulphur	0·64
Calorific value	5,661 small calories.*

The coal burnt freely, without caking, and gave a light cream-coloured ash which did not fuse. The calorific value was about 75 per cent. of that of Welsh steam coal.

The coal much resembled certain samples from Nigeria which have been examined at the Imperial Institute, but was not so good as the better qualities obtained from the Udi-Okana coal field of that country.

The sample was somewhat shaly in appearance, but the ash appeared to be fairly uniformly disseminated through the coal. The proportion of sulphur present could probably be substantially reduced by rough hand-picking.

If the sample now reported on is freely representative of the coal obtainable from this deposit, the latter can be of no immediate value except for local use, as the coal could not compete even in the nearer Mediterranean and East African markets with better coals available from other sources.

The deposit may, however, be of great economic value to Somaliland later on, and it ought to be thoroughly examined in order to ascertain its extent and the general quality of the coal.

* A small calorie is the amount of heat required to raise the temperature of 1 gram of water from 0° to 1° C.

Salt.

The samples of salt dealt with in this report were received from his Majesty's Commissioner in Somaliland in August, 1914. They were described as follows:—

No. 1.—"Specimens picked up from foot of Dagah Der Hill, twenty-five miles east of Berbera, thirty-five miles north-east of Dagah Shabel."

No. 2.—"Pieces chipped from block in Dagah Dor Hill through exposed orifice."

No. 3.—"Piece chipped from block in Darroboh Hill through exposed orifice."

The material in each case consisted of compact crystalline salt, which was analysed with the results given below:—

	No. 1. Per cent.	No. 2. Per cent.	No. 3. Per cent.
Sodium chloride NaCl	84·98	94·78	91·30
Sodium bicarbonate $NaHCO_2$	0·29	0·15	nil
Calcium sulphate $CaSO_4$	2·17	0·69	3·10
Calcium chloride $CaCl_2$	0·24	0·47	0·24
Matter insoluble in water†	11·87	4·05	4·62
Moisture	0·23	0·19	0·28

† Consisting mainly of calcium carbonate ($CaCO_2$).

No soluble phosphates, borates, nitrates, iodides or bromides, or ammonia, were detected in the samples.

The soluble portion of these three samples of salt from Somaliland is very similar in composition to most rock salts, except that a small percentage of sodium bicarbonate is present in Nos. 1 and 2. For comparison the following analyses recorded for typical European rock salts may be quoted:—

—	Cheshire.	Tyrol.	Stassfurt.	Marennes (red).
	Per cent.	Per cent.	Per cent.	Per cent.
Sodium chloride NaCl	98·30	99·43	94·57	95·78
Calcium chloride, $CaCl_2$	—	0·25	—	—
Magnesium Chloride, $MgCl_2$	0·05	0·12	0·97	0·68
Magnesium sulphate, $MgSO_4$	—	—	—	0·60
Calcium sulphate, $CaSO_4$	1·65	0·20	0·89	1·09
Alumina and ferric oxide Al_2O_2, Fe_2O_3	—	—	3·25	0·85
Water, H_2O	—	—	0·22	—

Refined salt of good quality could be prepared, if desired, from these crude Somaliland salts, by a process of re-crystallisation from water. With reference to the small quantities of sodium bicarbonate present in two of the samples, experiments were made in order to ascertain whether this impurity could be eliminated easily by re-crystallisation. For this purpose equal proportions of samples 1 and 2 were taken and dissolved in 2½ times their weight of water. The solution was allowed to stand, and the clear liquid was then decanted from the insoluble matter and allowed to crystallise at a temperature of about 40° C. Examination of the successive crops of crystals thus obtained showed that if the process was stopped when about 80 per cent. of the total quantity had been recovered, a refined salt was obtained free from sodium bicarbonate, and containing only about 1.2 per cent. of calcium sulphate as impurity.

The refined salt thus prepared was of good colour, and did not deliquesce on exposure to air. Such a salt would be quite suitable for culinary purposes.

The Opening of the Dardanelles

Turkey's Coal Supplies.

The following extracts are from an article which appeared in *Syren and Shipping* (June 30). Attention may here be drawn to the figures of the Heraclea (Zoungouldak) coal mines output. It will be remembered that THE NEAR EAST has always insisted on the necessity of effectively stopping all transport of coal from these mines in the Black Sea to Constantinople :—

The importance of British trade to the port of Constantinople may be gathered from the fact that out of 1,568 vessels, of 3,357,844 tons, which were entered at the port in the year 1913, 304 vessels, of 669,318 tons, were from the United Kingdom; 442 vessels, of 1,043,212 tons, were from Egypt; and 92 vessels, of 165,853 tons, were from Malta. Against these figures may be put those of Germany, which had but seven vessels, of 19,689 tons.

The war with Italy did not make so great a difference in the trade of Turkey as might at first have been expected. But it must be remembered that the figures which we are examining are those of commerce with Britain. Thus, though the total trade of Constantinople no doubt suffered a serious restriction on account of those hostilities, Britain probably benefited to a large extent by the complete interruption of Turkey's trade with Italy, since that share of the trade formerly done by Italy which came our way filled to a large extent the gap which would otherwise have been left owing to the general restriction of commercial enterprise. On the other hand, it must be remembered that as the result of this war, and of the earlier one with the Balkan States, the Turks lost much territory in Europe. This region had previously been largely served with imports through the port of Constantinople, and it seems probable that this part of the trade will be within the reach of our merchants and manufacturers through Black Sea ports as soon as the Dardanelles are forced and the passage is open to our ships.

The Zoungouldak coal mines have been in evidence during the last few months, as Russian naval interference has rendered it difficult for supplies to be forwarded to the Turkish and German vessels in Constantinople. Figures regarding them are, therefore, of interest :—

OUTPUT OF HERACLEA MINES.

	1912.		1913.
Ottoman Co. (bunker coal)	217,672	....	166,570
Constantinople	186,415	....	160,585
Salonika	17,254	....	2,311
Dedeagatch, Beyrout, Panderma, Diridja, and Karabournou	2,528	....	24,874
Smyrna	64,445	....	56,720
Foreign countries, Roumania, Greece, and Hungary.....	25,585	....	*14,813
	513,899	....	425,903
Other Heraclea mines.....	220,000	....	400,000
Total	733,899	....	825,903

* Roumania only.

The relative prices of the Ottoman Company's coal, washed, screened, and delivered f.o.b. at Zoungouldak, show a great difference in the two years under review, for whereas the average price in the former period was 12s., it rose to as much as 16s. in the year 1913. But, in spite of this local production, Constantinople took 174,000 tons of foreign coal in 1910, and 230,000 tons in 1911, the total imports being 346,846 tons (of which 326,486 tons came from Britain) in 1910, and 421,779 tons (of which 369,611 tons came from Britain) in 1911. The enormous difficulties under which the Turks must be labouring through the shortage of the coal supply is, therefore, apparent. This must have its effect on the fortunes of the war, for coal is not only the breath of the steam engine, in conjunction with oil fuel, on board ship, but it is needed for troop trains and a thousand and one other military purposes. We know, for example, how the British naval coal bill has increased since August, 1914. Now, as the hot weather has come upon us and disease threatens armies, the need for water for sanitary purposes in cities near the seat of war is pressing indeed. Yet it is said that Constantinople is faced with the probability of a water famine owing to lack of coal.

We come now to consider briefly the probable results of the reopening of the trade with Russian Black Sea ports. According to the returns given by the Foreign Office in May, 1915, the latest available figures of Russian population are those of the census of 1897. At that period, it appears, the Odessa consular district contained a population of 32,975,484 persons, and, allowing for the natural increase in the seventeen years that have elapsed, it is estimated that the area now contains over 40 millions of inhabitants—a population not far short of that contained in the United Kingdom. The purchasing power of these people, as it has been pointed out by those who know the country, is almost entirely bound up in the success of the crops. A high price of foodstuffs—if, of course, there is a good surplus for export—means almost unbounded prosperity for such a community, and, of course, what, for them, is large purchasing power. The year 1912 was a bad one for South Russia; spring frosts damaged the fruit crops, and continuous rain from July onwards ruined the cereals, which it had been hoped would have furnished a record supply. The failure of the beet industry was estimated to have meant a loss to the community of five millions sterling, as the roots could not be shifted to the factories in consequence of the sodden state of the roads. This same factor prevented the transit of the cereals from the farms to the usual markets, and there were accordingly accumulations of produce left up country. The marketing of these stocks no doubt helped to swell the figures for the year 1913, which are reported as having been very satisfactory, both as regards quantity and quality. But the low price realised by the produce kept the purchasing power of the farmers down. In the Consul-General's report, published recently, reference is made to the growing demand for agricultural machinery, and satisfaction is expressed—though only issued a few weeks ago, the report was evidently written in pre-war days—that British manufacturers have fallen into line with the Germans in the matter of giving credit extending over three years to their customers. This, it was hoped, will give an impetus to British sales. But, at the same time, it is remarked that the United States retains the bulk of the trade in such articles as self-binders and reapers. The credit facilities afforded by the agricultural implement firms have not yet been adopted by the motor-car companies, with the result that German, French, and American makes are chiefly in evidence, though attention is directed to the fact that there is in Odessa a splendid market for strong, medium-priced cars if facilities as to stocking spare parts and as to terms of payment can be provided. The Germans were evidently pushing their way in here, as elsewhere, for not only had the Hamburg-American Line established a monthly service of passenger and cargo vessels between Odessa and New York, but in 1913 the Rickmers Company, of Hamburg, started a new line of steamers to trade from Odessa to Lisbon, Antwerp, and Hamburg. These activities have been interrupted by causes which are hardly likely to allow of their resumption, at all events in our time. . . . We may fairly conclude that the opening of the Dardanelles, quite apart from its military importance, will be of great commercial advantage. Not only is there a huge volume of trade accumulated and waiting to be let loose, but there are great possibilities of development and of extension. Britain has already her place in the Black Sea trade. She will assuredly improve it in the future to the mutual advantage of herself and her Allies. The British consumer will find the advantage of the restoration to the world's markets of the South Russian grain supplies, and the freight market will welcome the tonnage which is now lying idle in Black Sea ports. The military reasons which prompt the intention to force the Dardanelles are of themselves assuredly sufficient. But it is well not to forget that there are other advantages to commerce which, if not so striking as the political arguments, have their weight and will bring their reward.

NEWS FROM TURKEY.

In view of the impossibility for our Consuls to report on the state of trade in Asiatic Turkey, and in continuation of a similar report published recently in THE NEAR EAST from the the U.S. Consul at Smyrna, we reproduce to-day extracts from the U.S. Consular report on Jerusalem :—

The year 1914 opened with bright prospects for the commercial future of Palestine. The country recovered rapidly from the disasters of the early months of 1913 and made the remarkable progress in the last half of that year of an increase of 20 per cent. in imports and 6 per cent in exports over 1912. The first six months of 1914 were fully justifying great expectations when suddenly the war in Europe upset all calculations. It was hoped that Palestine would not suffer further than from the general depression, but this hope was soon dissipated, and special conditions affected the district in every part. The economic condition suffered greatly through the financial crisis resulting from the European war, but was also aggravated by the general mobilization of the army early in August and the great military activities and preparations since Turkey became involved. The stocks of merchandise of all classes hav been reduced in the whole district and will have to be replenished as soon as the routes of commerce are open. However, the buying power has been considerably diminished, and it is questionable whether a fair trade can be expected, unless liberal credit is extended by the European houses which may wish to dispose of their stock on hand.

Financial Conditions.

Early in August some of the banks in the district suspended general operations entirely, and others are paying only a small percentage weekly on their current accounts. This factor has an important bearing upon the financial condition of the district and aggravates the slackening of trade. The moratorium regulations in Europe are applied to Turkey, and bills payable during the period are dealt with in the same manner—by monthly payment of the percentage stipulated in the regulations. The bank rate at once jumped from the level of 6 to 7 per cent. to that of 9 to 12 per cent. In cases where 12 per cent. was charged by local banks the supercharge over the legal rate —9 per cent.—was disguised as "extra commission."

The closing of the banks came simultaneously with the grain crop marketing season. Quantities of grain were brought in for sale, but since speculators had their money tied up the banks which made a business of lending out funds for such investments were obliged to withhold them. Imported provisions and foodstuffs, such as rice, potatoes, sugar, coffee, etc., immediately took an upward turn in prices, but before long came down again, and remained about at normal until the Ottoman Empire entered into the hostilities. Local products, such as wheat and other grains, on the other hand, instead of going up came down very much in price. The fear of Government seizure, combined with the lack of cash among the purchasing public and the hesitation of dealers to sell on credit, kept the imported staples for a considerable time slightly above

DELICIOUS COFFEE.
RED WHITE & BLUE
For Breakfast & after Dinner.
Wholesale, of Hanson's, London, England.

Digitized by Google

normal, in spite of the fact that nothing was or could be imported. When, however, Turkey declared war all these articles and many others went up by leaps and bounds. For a while coffee beans were about as scarce and unprocurable as rice, sugar, and petroleum, but later a supply came from Jaffa and was sold openly in the market. While much above the average price, the cost was still far below what it was previously. Undoubtedly the lack of cash and the impoverished state of the inhabitants forced the local speculators to come down in the price of coffee, as it was not among the absolute necessities. Flour prices increased, but again lowered slightly, and while this commodity advanced as high as 30 per cent. above the prices obtaining at the outbreak of hostilities, it did not go as high as was feared. Nevertheless, considering that in general the poor man was unable to earn any money, the price was felt very keenly.

Lack of Transport.

Jerusalem depends on the Hauran and the plateau east of the Jordan for its grain. Quantities are said still to be there, and prices might be normal in Jerusalem but for the lack of transportation facilities, every good mule, camel, or horse having long since been called into service for military purposes. The only substitutes are the scrawny little donkeys of the peasants and Bedouin, and some poor camels.

Luxuries, cloth, lumber, iron, and other necessaries, not foodstuffs, which are imported did not advance in price. This is accounted for by the impoverished state of the people. Aside from foodstuffs a few imported articles greatly advanced in price, notably matches, which reached six times their normal value; brass, which doubled; and some kinds of hardware and cotton cloth which made high records.

Grain Crop Prospects

The outlook for the grain crop is extremely dark. First of all, so many men have been called to the colours and so many animals are required for military purposes that a large percentage of the land has remained uncultivated.

The scarcity of rain, too, is causing much concern. The most appalling apprehension, however, is caused by the appearance of locusts, which are now seen in large numbers on the plain of Sharon and in the neighbourhood of Jaffa, as well as in the valley of the Jordan. They will not only eat up the crops, but will destroy leaves and blossoms on the trees, thus affecting the summer fruits. This danger calls for the most determined action.

BRITISH TRADE WITH RUSSIA

At last week's meeting of the Advisory Committee to the Board of Trade on Commercial Intelligence it was reported that the number of written and personal inquiries received at the Commercial Intelligence Branch in the first half of this year was 28,500, as compared with 9,400 in the corresponding period of 1914, whilst the number of firms on the special register at the end of June was 3,128, against 1,645 at the same date in 1914. The Committee unanimously approved the decision of the Board of Trade to organise a second British Industries Fair next year. Among other matters before the Committee were the question of steps to be taken to promote British trade with Russia and questions arising out of the work of the Commercial Intelligence Branch.

Larnaca will soon have a house for its poor, thanks to the generosity of a well-known philanthropist, Mr. Costa J. Pierides, who had presented a large house for the purpose, and has made provision for its maintenance. As soon as this institution is in full working order, Mr. Pierides hopes to erect in his native town a building to serve as an elementary school for boys.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.

MANUFACTURERS OF

"LALIMLI" WOOL WEAR

Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .

CONTRACTORS TO GOVERNMENT

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.

Army Boot and Equipment Manufacturers.

CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.

THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.

Tanners and Curriers, Leather Goods Manufacturers.

Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.

CONTRACTORS TO GOVERNMENT.

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.

Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.

Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

New Egerton Woollen Mills Co., Ltd.
DHARIWAL, PUNJAB, INDIA.

Sole Manufacturers of the Famous . .

Dhariwal
Long Life Wool Wear

Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c., &c.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Cyprus. July 10.

The price of wheat is high and tending to rise. The villagers are hoarding their stocks in the expectation of getting 8s. and even 10s. per kile (bushel). The price of bread has risen to 3½ cp. (a fraction under 4¾d.) per oke (2¾ lbs). The stock of petroleum seems to be exhausted, or nearly so.

SUDAN CROPS.

The May report of the Commercial Intelligence Branch of the Sudan Government states that gum continued to come in well in Kordofan Province during the month under review.

The total amount sold in El Obeid market was 45,281 kantars of 120 rottles (54 kilos), of which 2,083 kantars were from Nahud. This is very nearly the record for a month's sale in El Obeid, the only month which ever beat it being May, 1913, in which 46,869 kantars were sold in the market.

The amount sold at El Obeid this season to date is already within 13,000 kantars of the total amount sold in El Obeid last season.

The price of gum has been rising steadily lately, and from P.T. 57 a kantar at the beginning of the month it has risen to P.T. 71.

From White Nile province it is reported that it is now clear that island crops have practically failed owing to the late appearance of the islands. The wheat crop is unusually small, as it was too late to sow, and the only ones which promise fairly well are bamia and Indian corn. The area under cultivation, however, is insignificant compared with former years. The fall of the river was almost one month too late to admit of good island cultivation. The same applies to the late foreshore crops.

One of the features of the year is the large quantity of barley in the Berber Province. Wheat, on the other hand, has been in some districts affected by pest.

A recent arrival from Sennar Province, who is *au courant* with the state of the natives there, and the condition of the crops, etc., informs us, says the *Sudan Times* (July 7), that dura from last year's crop is very plentiful, the natives in some cases not knowing what to do with it. At Singa the price has fallen as low as P.T. 20 per ardeb, and there are some localities on the Dinder where one could easily buy dura at P.T. 10 per ardeb.

This shows that all the alarmist rumours which were spread by interested parties some two or three months ago about the scarcity of dura were entirely without foundation.

EGYPTIAN COTTON CROP.

The following report on the state of the cotton crop was issued by the Alexandria General Produce Association on July 2 :—

Lower Egypt.—The temperature during June has been favourable, and under its influence the crop has made satisfactory progress; the backward condition previously noticed has all been practically made up. The condition of the plants is satisfactory; everywhere the plants look healthy and vigorous. Water for irrigation purposes continues to be sufficient. Worms and egg masses are reported in all districts. The cultivators are destroying them under Government supervision, and the damage caused, up to the present, is of little importance. In some districts only, locusts have been seen in flight; there are no eggs.

Upper Egypt and Fayoum.—Temperature has been very favourable to the crop. The plants are healthy and well developed. The water supply is quite sufficient. There have been no reports of worms. Locusts, with the exception of a few flights, may be said to have disappeared entirely.

ROUMANIAN EXPORTS.

A Braila correspondent, writing about a month ago, said :—

Hardly anything is passing the borders in the way of foodstuff at present, and it is well nigh impossible to get any wagons for Austria or Germany even for non-prohibited articles. The Government, in order to render such export impossible, has applied a tax of 3,000 fr. in gold on beans and 500 fr. in gold on maize, in addition to 1,000-1,500 fr. per wagon for the Red Cross. Consequently export by rail into the above-named countries has almost entirely ceased.

Crops Idle.

On the other hand, the stocks here are enormous, and the new crop is very promising, too, so that nobody knows where on earth it will be stored. Every store in Braila, Galatz, and all Danubian ports is already full. Every lighter is chartered for another year (the majority of the lighters are fully laden with old crop grain), and rent prices for lighters have risen to 11 fr. per kilo, July 1 to July 1, 1916. Grain prices are, therefore, bound to drop considerably, and I am really afraid that part of the crop will simply be left to rot in the fields! There is only one hope, that of the opening of the Straits, which will enable us to effect some shipments to get rid of at least part of the old and new crops.

TRADE WITH HEJAZ.

According to the *Monthly Journal* of the Sudan Chamber of Commerce, the following proclamation was issued by the Sudan Government on May 22 :—

"In February last the British Government, hearing that there was considerable distress among pilgrims and the inhabitants of holy cities on account of lack of food, despatched through the medium of the Egyptian Government a large consignment of grain to Jeddah for distribution among the pilgrims and poorer inhabitants of the holy cities. On arrival at Jeddah the consignment was seized by the Turkish military authorities and held by them for the use of the Turkish garrisons.

"In consequence of this high-handed action the British Government was reluctantly compelled, in accordance with the usage of war, to stop the export of food supplies from India, Egypt, and the Sudan to Jeddah. It has recently come to the notice of his Majesty's Government that this stoppage of supplies to the Hedjaz is causing distress not only among the pilgrims but to innocent residents of the holy places.

"His Majesty's Government, therefore, in view of the fact that they have no hostile intentions towards the Arabs, with whom they had always maintained most friendly relations, and in spite of the risk of such supplies being again misappropriated by the Turkish authorities, have decided once more to authorize the export of supplies to Jeddah sufficient to meet the needs of the innocent inhabitants and pilgrims."

The Board of Trade are in receipt of information from H.M. Consul-General at Tunis to the effect that the local Government have authorised the exportation to France of wheat (in any quantity), of 25,000 tons of oats, and of 50,000 tons of barley, of this year's crop. In the case of barley, a quantity up to, but not exceeding, 25,000 tons may be sent on to the United Kingdom.

PRODUCE REPORT.

London, July 22.

Currants.

The market has been quiet this past week, and prices have declined. Owing to the unsatisfactory condition of the last arrivals of Pyrgos fruit sales of same were effected at much lower prices. Bags are offered at 24s. to 24s. 6d., and quarter cases at 27s. to 27s. 6d. Vostizza is quoted 37s. to 40s., Patras 31s. to 32s., while Amalias and Zante were sold from 28s. to 31s. New fruit, in bag, to arrive, first and second steamer, and September shipment, sells at 21s. 3d. to 21s. 9d. c.i.f.

The Liverpool market has also been quiet, with a few sales of Zante and smalls at 28s. to 32s. Pyrgos is quoted 26s. to 26s. 6d., Patras 28s. to 31s., Zante 28s. to 32s., and Smalls 28s. to 33s.

Sultanas.

There has been only a moderate demand, with a few sales, of Smyrna fruit at 58s. to 59s., and fine at 60s. to 61s. No arrivals are expected at present, and as for new Smyrna fruit there is little hope that any will be saved, most of the growers having been driven into the interior left their vineyards to the mercy of the soldiery.

In the Liverpool market there is very little doing in sultanas; prices are higher, and nothing is known of any further arrivals.

Onions.

Egyptian are selling at 3s. to 4s. 6d. with very little demand; while Valencias are moving better at prices from 5s. to 6s. 9d.

Seeds.

Linseed has been quiet but fairly steady. London-Calcutta, spot, is quoted 55s.; afloat and July-August, also 55s.; and August-September 55s. 3d. Rapeseed is generally quiet, brown Cawnpore quoted, June-July, 49s. 6d., and Guzerat, ditto, 55s. 6d. Cottonseed is firm but inactive; London-Egyptian, spot, is quoted £9 2s. 6d., and July £9 13s. 6d. per ton.

Oils.

Linseed oil is steady, but quiet, spot pipes £25 5s., barrels £26 15s., August £27, September-December £27 7s. 6d. Rape oil remains quiet. Ordinary brown, naked, spot £36 to £37; English refined in barrels £38 to £40. Cotton oil is steady, ordinary pale refined, spot, pipes, £31 5s., sweet edible £36 to £37.

Oilcakes.

Cotton cakes.—There has been a further improvement in prices, especially of Egyptian makes, which are selling freely at £6 15s. per ton, ex quay; while English are also dearer at £6 15s. to £6 17s. 6d. Bombays cannot be obtained.

Linseed Cakes.—Some parcels of foreign makes have met with a ready sale at an advance over last week's quotations, while English makes are 5s. per ton dearer this week. Best London made sell freely at £10 7s. 6d. to £10 10s. Greek of fine quality in bags are quoted at £10 10s.; and East Indian, pure, sold at £10 5s. ex steamer afloat.

Locust Beans.

In spite of the continued scarcity, prices are unchanged at £8 for whole and £8 5s. for kibbled, and there is no prospects at present of any further supplies.

Tobacco.

There has been a fair business in all grades of tobacco, and prices are ruling very firm. Turkey is quoted at 8d. to 15s., Greek 5½d. to 3s. 6d., Latakia 6d. to 2s.

DATES.

SPHINX BRAND.

PRODUCE OF BASRAH.

Selected from the famous Gardens.

Only superior qualities of

Hallawees, Khudrawees, Sayers and Zehdi

are packed.

In cartons of one to four pounds, small boxes, ordinary cases, baskets, tins, and skins.

SPHINX competes with all other brands in quality, packing, and is guaranteed to be clean, sound, fresh, and free from disease.

Sole Proprietor:

BAHJET S. FORAGE, BASRAH.

Engineering Notes.

Modern Munitions of War.

"Shells and their Concussive Effect" was the subject of a very interesting lecture given by Professor Vivian B. Lewes last week at the Royal Society of Arts. Shells were divided by the lecturer into two classes, shrapnel and high explosive. The former were most effective against advancing troops, since one 6-in. shrapnel shell carried 375 bullets, and when the shell burst these bullets were scattered over an area of 300 square yards, or more than one bullet to every yard. High explosive shells, Professor Lewes explained, were of two main kinds, those used for armour-piercing as in the Navy and for attacking steel cupolas, and those employed in modern trench and siege warfare. Of the former we had an adequate supply. The shortage was of the latter, which were invaluable in the kind of warfare now in progress. The special merit of the high explosive shell lay in its concussive effect. The enormous blast of the gases instantaneously resulting from detonation of the charge of high explosive, combined with the high-pressure air displacement, was a sufficiently disruptive force to tear down wire entanglements and massive fortifications independently of the work done by shell fragments. The blast, moreover, had a deadly concussive effect on men in its vicinity. It was that which left men standing dead in the trenches or elsewhere without any visible wound. Cases were on record where the concussion had caused a heart displacement of as much as two inches. Many of the deaths, said Professor Lewes, popularly supposed to be due to poisonous fumes evolved from bursting shells had a purely concussive origin. The reason why enormous craters were created by high explosive shells bursting on the ground, the lecturer explained by describing the downward effect of high explosives. If a large quantity of nitro-glycerine be placed upon a rock, and then be fired by detonation, the rock would be smashed to atoms because of the recoil of the gases against the down-pressing atmosphere. The gases are generated so rapidly and in such enormous volume that they find it impossible to push aside the surrounding air sufficiently quickly; they, therefore, take the path of least resistance, which in the case stated lies in the direction of making a downward displacement of matter, which is instantly done, even though it mean the pulverisation of a mass of solid rock.

Naxos Emery.

Owing to the misapplication of the name "Naxos" to a variety of emery preparations and tools that are being used for various purposes in engineering, munition, and other factories, it should be known that often articles bearing that name have not a particle in them of the real famous substance. Naxos emery (smiris), which comes from an island of that name in the Ægean Archipelago, is practically a monopoly of the Greek Government, the profits being employed to pay off public debt. Direct exportation from Naxos itself being subject to great difficulties, a depot was established at Syra a few years ago. The shipping from there is carried out with greater ease and the quality is also better, as all the stuff is carefully looked through and treated before it is put on board. Until recently the selling price remained the same as before, viz., about 85s. per ton measurement, and probably it still continues to be the same. There is a permanent stock of about 2,000 to 3,000 tons always kept at the Syra depot, and nearly 6,000 tons of the goods are exported every year, representing a total value of nearly £25,000. Of the entire quantity exported, over 2,000 tons go to Holland, 1,500 tons to the United States, 1,000 tons to France, and nearly the same quantity to the United Kingdom. Smyrna emery is of an inferior quality to that of Naxos, but competes with it keenly. The two kinds are often mixed and sold as pure Naxos emery. The same happens with another kind of emery of American origin, which contains not an atom of Naxos emery, although it is sold as such.

New Railways in Asia Minor.

The *Morning Post's* Berne correspondent says that the *Official Gazette* of Constantinople publishes a decree according to which the Ministry of War is granted a credit of one and a-half million Turkish pounds to build and work four main and two branch lines, all under military control. The chief of these lines are from Angora to Erzeroum, from Erzeroum to a point on the Black Sea, from Muradli to Rodosto, and from a point on the Erzeroum railway to the Black Sea.

Munitions at Malta.

Reuter's Agency reports from Malta that the question of munitions has been taken up seriously. Up till now only the dockyards and the military departments had been engaged, and these have been turning out a fairly large quantity of munitions, but apparently the resources of the island are now about to be organized with a view to increasing the output. There are several private firms at Malta besides the civil Government Departments possessing the necessary plants for making munitions, and willing to co-operate in any scheme aiming at providing the men in the firing line with what they need. There is no doubt that the output will be considerably increased when such organisations are effected. It is probable that a local committee will be formed for that purpose.

Reapers in Baghdad.

An attempt has been made (says the U.S. Consul at Baghdad) to introduce light American reapers and plows, but this has been attended with little success so far. When larger areas of land come under cultivation, however, modern methods and implements will become imperative, and the most suitable reaper for use upon lands intersected with small irrigation ditches fed from large canals is undoubtedly the "Light American." Hoeing, mowing, and threshing machinery also in the course of time will become a necessity. Owing to Government prohibition, there was practically no export of wheat during 1914. In addition to growing wheat, barley millet, sesame, and similar grains, a portion of the increased area of cultivation probably will be devoted to the production of cotton.

TRADE NOTES.

Egypt.

Tenders are invited by the Economat Central, Cairo, for the supply of articles of stationery required for the Government Departments during the year 1915-1916. August 5.

Tenders are invited by the Ministry of Education, Cairo, for the supply of clothing for the pupils of the Bulac Elementary Training College for Women Teachers. July 31, 1915.

The Egyptian *Journal Officiel* of June 28 contains certain tariff valuations for hides, skins, sesame, flax, wool, ivory, wax, onions, eggs, cotton seed, oil, caustic soda and various other products exported from Egypt, which are to remain in operation from July 1 to September 30, 1915. The list of valuations may be seen by the British traders interested on application at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

The following information is from the report by H.M. Vice-Consul at Alexandria (Mr. A. B. Geary) on the trade of that district in 1914, which will shortly be issued: "The number of cash-on-delivery parcels despatched from Alexandria to the United Kingdom in 1914 decreased by 206 and the number received at Alexandria from the United Kingdom decreased by 2,140. Up to the end of July, however, increases of 11.9 and 21.1 per cent., respectively, were recorded in this branch of the service. It is hoped that British exporters are fully alive to the present opportunity afforded them of securing a representative share of this trade. Much might be accomplished by judicious advertising of specialities in the local press. When dealing with reputable firms, the service of many facilities to purchasers with a minimum of risk."

Persia.

H.M. Commercial Attaché at Petrograd reports that the *Torgovo-Promyshlennaya Gazeta* (Petrograd) of June 9 publishes the following information:—

The free passage in transit through Russia to Persia of foreign parcels, increasing in number from year to year, is a serious danger to Russian trade interests in Persia, as in the guise of small parcels foreign goods, mostly German and Austrian, were thus despatched in enormous quantities. With a view to diminishing this traffic, the Council of Ministers in 1913 empowered the Minister of Finance to take the necessary steps to close the Julfa and Askabad Customs against such parcels despatched in transit through Russia. These measures, however, were not carried out in consequence of certain difficulties of an international character. At present, owing to the war, the despatch of parcels from Germany has ceased altogether, while the number of similar parcels from Sweden and Norway, containing presumably German goods, and following the same route, has increased very largely. In view of the above, the Ministry of Commerce has found it desirable to submit once more for consideration the question of closing the Julfa and Askabad routes for such transit parcels for which purpose an Inter-Departmental Conference will meet in the near future at the said Ministry.

Bulgaria.

H.M. Vice-Consul at Sofia reports that at the end of 1912 there were 1,388 miles of railway completed in Bulgaria, the number of passengers conveyed being 3,342,000. The weight of the merchandise transported annually averages 2,000,000 tons. The construction of the following lines should be taken in hand during the present year:—Radomir - Dupnitza - Gorna - Jumaia, with extension down the Struma Valley to the Greek frontier, Plevna-Lovetch, Dupnitza-Bobov-Dol, and Gabrovo-Sevlievo. Work is progressing on the survey and preparation of the Mikhailovo-Haskovo-Porto Lagos line. As to Porto Lagos itself, where the construction of a large port is contemplated, the harbour is to have an area of from 3,000,000 to 3,500,000 square metres, and will be protected by a breakwater 1,500 yards long.

Greece.

The Board of Trade are in receipt, through the Foreign Office, of telegraphic information from H.M. Minister at Athens to the effect that a notice was published in the Greek *Official Gazette* of July 9 prohibiting the exportation from Greece of cotton as from July 1.

The British Vice-Consul at Cephalonia reports that with regard to imports from Germany, those goods which, it would seem, are made expressly for the markets of the Levant, have established a hold on the market in Cephalonia owing in great measure to their cheapness, though they are inferior in quality to similar articles from other markets. Cheapness is a matter of no small consideration with small markets, especially those where consumers of slender means and others from habits of economy prefer, as a rule, the cheaper to the dearer article. This hold on the market is also due, in some cases, to easier terms of payment and to the activity of travelling agents who are furnished with samples and price lists based on the metric system. Their goods also are faultlessly packed. These agents know one or two languages, besides possessing a knowledge of the market, and are thus in a position to treat with buyers direct. Orders given to German concerns are promply executed and forwarded at c.i.f. prices to their destination, through the Piræus.

The British Vice-Consul at Zante reports that many articles, such as woollen and cotton goods, haberdashery, hats, gloves, butter, perfumes, cards, etc., are now manufactured in Greece, and although comparing unfavourably with foreign goods, are superseding them to a considerable extent owing to the heavy import duties imposed in Greece. Notwithstanding this fact German and Austro-Hungarian competition, which is now temporarily stopped, has been very keen of late. On

Digitized by Google

inquiries recently being made why German goods, such as cotton and woollen stuffs, silks, hempen goods, cordage, crockery, hollow enamelled ware, hardware, paper, etc., were so much in evidence in the market, the general reply was elicited that although the superiority of the British article, of whatever kind, is universally acknowledged, it is found difficult to deal with British firms owing to the fact that the trade facilities offered by German firms are altogether discountenanced by the former. These are long terms of payment, prompt despatch of goods c.i.f. Zante, compilation of price lists in the Greek language, and terms (both as regards money and weights and measures) made in accordance with Greek customs. Representatives of German firms know exactly the requirements of the market and not infrequently the Custom House duties in force, which they take into account in regulating orders with their customers. It must be owned that the Germans have the ascendancy in the way of securing orders, however small, by offering such facilities and endeavouring to satisfy their clients in every possible way.

H.M. Consul at Piræus reports as follows: The articles which were formerly obtained from Germany and Austria-Hungary and are now being obtained from the United States, especially since Italy declared war on Austria, are cotton, jute, wire, machinery, paper, textiles, yarns, sugar, coffee, rice, motor cars, cloth, oils (lubricating, petrol, etc.), cheap cotton and woollen goods (half cotton, half wool), horses (formerly from Hungary), electrical goods, military boots, colours, soda, acids, sulphur, and chemical manures. The terms offered by American exporters are confirmed credit in New York, for cash against documents on shipment.

GREEK NATIONAL STEAM NAVIGATION COMPANY.

Considerable interest has been aroused in New York export circles (says the U.S. *Daily Consular Reports*) by the arrival in America and departure for Greece of the steamship King Constantine, the new passenger steamer of the National Steam Navigation Company. The present company is a combine of the old National Steam Navigation Company of Greece and the Hellenic Trans-Atlantic Steam Navigation Company. The King Constantine, which is completing its maiden voyage, has a displacement of 18,000 tons. It is 490 feet long and has a beam of 58 feet. The boat was built by Cammell Laird and Company, of Birkenhead, England, and is capable of developing a speed of 18 knots. It has accommodation for sixty saloon, 550 second-class, and 1,950 steerage passengers. In about two months the company expect to have another new steamer ready, the Queen Sophia, of 20,000 tons, and this vessel will be put on the Piræus-New York service.

This company runs a service outward from New York to Naples and Piræus, calling on the return voyage from Piræus to New York at Patras and Palermo, and maintains both a passenger and a freight service. Besides the two steamers mentioned, they have the following passenger boats: Athena, 12,000 tons; Themistocles, 11,000 tons; Iaonina, 9,000 tons; Salonica, 8,000 tons; Patras, 8,000 tons.

BAGHDAD EXPORTS.

Under normal conditions, says the U.S. Consul at Baghdad, large quantities of wheat and barley are exported every year from the Baghdad and Busreh *districts*, to places along the Persian Gulf and to India.

The only manufactured articles which leave Baghdad in any considerable quantities are Persian carpets and opium. The variety and beauty of the Persian carpets are well known to American connoisseurs, who pay fancy prices for the genuine vegetable-dyed rugs. The introduction of aniline dyes of German manufacture has, however, seriously jeopardized the carpet industry, and, while enhancing the value of antique rugs, has robbed the modern article of artistic and lasting value.

Opium is also of Persian origin. The manufactured paste is exported in cases of two tins, each containing seventy bricks of one pound each. India and China were formerly large buyers of this article, but owing to legislative measures the trade has greatly diminished, and London has assumed the position of principal buyer for the world.

CINEMA THEATRE IN TEHERAN.

The only cinematograph theatre in Teheran (says the U.S. Consul) has a seating capacity of 200, is open each day from 8 p.m. to 9.30 p.m., and is well patronised. Electric power is used. The reels used contain 800 to 900 ft., and are changed every third day. There are no film agencies in Teheran, and the theatre obtains its films from dealers in Russia, all films being second hand. French, German, and Russian pictures are being shown at present. The most popular pictures are comic, tragic, war, and chases with amusing falls. Explanations are generally printed in Persian and French, although English, German, and Russian are sometimes used. Films are imported in tin boxes, the duty charged being 5 per cent.

NATIONAL BANK OF GREECE.

ESTABLISHED IN 1841.

EGYPTIAN FINANCES DURING APRIL.

(From Our Own Correspondent.)

Cairo, July 9.

Close on the heels of the final figures for the financial year 1914-15, there have now been published those for the first month of the new account. As these are too early days for any extensive analysis to be of any utility, I shall only deal very succinctly with the figures. The revenue during April amounted to £E1,064,598, as compared with £E1,360,825 a year ago, whilst the expenditure came to £E1,470,743, as against £E1,726,046 in the preceding April. At this period of the account there is always an excess of expenditure over revenue, and the amount of that deficit is £E40,924 more than it was at the end of April, 1914.

The chief decreases in revenue appear under Direct Taxes, £E6,116—Land Tax, it may be pointed out, is £E6,560 better and Urban Tax £E12,857 worse than in April last year—Customs, £E53,582; Port Dues, £E28,736; Legal Dues, £E9,593—the receipts from the Native Courts are, however, some £E3,000 up—Railways, £E50,617; Post Office, £E3,489; Investment of Funds, £E37,489; Sales of Land, £E15,768; Extraordinary Receipts, £E91,838. Tobacco Duties increased by £E8,976 and Domains Receipts by £E5,338.

It should be borne in mind that in the Budget for this year reductions varying between 10 per cent. and 75 per cent. were made on the estimates for 1914-15. In every case, with the exception of the proceeds from the Investment of Funds and the Extraordinary Receipts, the figures for the month show a diminution of less than the reduction allowed for.

The reduction of £E255,303 effected in the expenditure of the month compared with April, 1914, is represented by Mixed Courts, £E16,517; Irrigation Department, £E47,213; Drainage, £E8,592; Railways, £E80,426; and Ministry of War, £E63,885.

A slight innovation has been made in the form in which the accounts are presented. Instead of adding to the month's figures the bank and other balances showing the operations effected during the month and leaving the public to work out the exact position of the State's finances up to date, the difference between the revenue and expenditure is clearly shown in the monthly account, and an entirely separate summary of the month's operations is given. The innovation, since it tends to clarity, is certainly an improvement.

BANKS AND CREDIT.

In connection with The Near East's continuous appeal for the creation of British banks in the Near East in order to serve as a useful link between the cash (Western) and credit (Eastern) systems, it is interesting to find the U.S. Consul at Jerusalem pleading a similar cause. He says :—

"A banking organization would solve the problem to the satisfaction of all concerned. As the result of the new banking law in the United States such a scheme is more practicable than ever before, and a branch of one of the home national banks could be situated in Athens, Constantinople, or Alexandria. This organization would be in a position to handle all the banking operations of the Near East with the United States. The trade of Turkey alone with the United States is about 30,000,000 dols., and, including the neighbouring countries, it will surely be double or treble that figure. It is apparent that this volume of business is worth the attention of a big banking concern. Such a central institution, with correspondents in all the large cities of the Near East, would reduce the high rate of exchange which London and Paris banks are charging for the same service. The nationality of the bank would inspire more confidence among the home manufacturers and merchants, and it would be to the interest of the bank to advise business men at home as to the best methods of handling such a business or entering such a market, and to furnish confidential information as to the standing of local businessmen."

CYPRUS FINANCE LAW.

The *Cyprus Gazette* of July 2 contains a supplement giving the text of two finance laws—the Surplus Balance Appropriation Law, 1915, and the Surplus Balance Appropriation (Supplementary) Law, 1915.

The preamble of the first law, dated June 12, 1915, states that "whereas it is expedient to make provision for certain expenses of the Government of Cyprus which are not already lawfully provided for, or shall not hereafter be provided for by any law" . . . "there shall be issued and applied during the period of twelve months ending March 31, 1916, to the services enumerated hereunder an additional sum not exceeding the sum of £21,550 for defraying the services herein declared.

"The said amount shall be appropriated as follows :—

	£
Medical—	
Malarial campaign	3,000
Agriculture—	
Purchase of breeding stock	300
Olive trees, pruning of	800
Forest—	
Construction of forest roads	500
Special tree planting	1,500
Railway—	
Railway extension and rolling stock	1,100
Purchase of locomotives	6,000
Railway improvements	300
Public works—	
Construction of new bridges	500
Grain stores	450
Improvements, Limassol customs	825
Building of law courts	375
Water supplies and culverts	1,500
Motor roads	2,500
Extended sanitary works	400
Miscellaneous—	
Museum, building and fittings of	500
Relief of distressed Cypriots abroad	1,000
	£21,550

The preamble of the second law, dated likewise June 12, states that "whereas it is necessary to make additional provision for the service of the twelve months ended on March 31, 1915" . . . "there shall be issued and applied to the service of the twelve months ended March 31, 1915, an additional sum not exceeding the sum of one thousand nine hundred and fifty pounds thirteen shillings and five piastres for defraying the charges of the Government of Cyprus for such period. The said amount shall be appropriated as follows :—

	£	s.	cp.
Agriculture—			
Carob cultivation, improvement of	50	13	5
Miscellaneous—			
Purchase of quay and sheds at Famagusta Harbour	1,500	0	0
Relief of distressed Cypriots abroad	400	0	0
	£1,950	13	5

PERSIA'S INDEBTEDNESS.

A correspondent writes to the *Economist* :—

In view of the request by Persia to Great Britain and Russia for a three years' moratorium for both sinking fund and interest, it is worth quoting from official sources exactly what the indebtedness of the country is. Here are the figures :—

Indebtedness of Persia to England.

	£
Loan	300,000
1911	1,250,000
1912	140,000
1913	300,000
1914	50,000
	2,040,000

The annual charges payable on the above loans by the Persian Government on account of interest and sinking fund are £226,406 2s. per annum.

Indebtedness to Russia.

	£
1900-1902 Loan	3,250,000
Consolidated Kran loan	980,628
1913 advance	200,000
	4,430,628

Of the above amounts, after the payments already effected, there remains about £3,666,666. The annual charges for sinking fund and interest on this amounts to, approximately, £348,017 per annum, and the annual charges on British loans, as seen above, are £226,406; on Russian loan, £348,017; total for both, £574,423 per annum. These charges are payable out of Customs, the net receipts of which, according to the Estimates of 1912-13, were, approximately, £640,581, but owing to the present war, they have depreciated. That is why the Persian Government is now asking Great Britain and Russia for postponement of all payments on account of interest and sinking fund of the above for three years from June, 1915.

U.S AND GREEK EXCHANGE

The U.S. Consul at Patras writes :—

"The export trade from the consular district of Patras, Greece, to the United States amounts annually to some £400,000. Of this amount, 60 per cent. is currants and 30 per cent. is olives, oil, and cheese. Practically the entire business is done upon the basis of confirmed letters of credit. The banking element involved in this trade presents an anomaly. The letters of credit, instead of being opened by the American buyers through American banks direct to sellers in Greece, are opened through American banks viâ London to sellers. Moreover, the letters of credit are opened in pounds sterling for currants and in francs for most other articles—very rarely in dollars for either.

"The result of this practice is to impose a threefold handicap upon the trade. In the first place, it imposes a double banking expense, since both the American and the London bank will charge for service in handling the transaction. In the second place, it imposes a double cable expense since the American bank must cable its London correspondent that the credit is opened through it, and latter must then cable the seller in Greece authorizing him to draw. In the third place, the transaction is carried on in a currency foreign at once to both buyer and seller, and consequently more or less inconvenient to both. This practice had its origin in a condition of trade which prevailed between the United States and Greece in former times. Years ago communication between the two countries was difficult. There was little import trade from the former country. As a consequence the American dollar had no substantial exchange value on the Greek market. Moreover, the currant trade, then practically the only trade from this district to the United States, was handled largely by London houses having correspondents in Greece. It was not unnatural under such conditions that the banking business involved in the trade should go viâ London and be in terms of pounds sterling.

"To-day, however, the conditions of this trade have entirely changed. Communication between Patras and New York, by either freight or post, takes little more time than communication to English centres. Cable communication is also direct and inexpensive. There is a fairly large and growing import trade from the United States to Greece, and the American dollar has come to have an exchange quotation on the Patras market practically as stable and as favourable as that of the pound sterling or the franc.

"From conferences with leading men in local banking and export circles it appears that there is now no sufficient reason why banking business with America might not be done directly and in dollars. Such business is done directly with England, Belgium, France, and Germany, and with each country in terms of its own currency. Exchange on New York is at present in good demand, and the dollar now holds a permanent and favourable position on this market. This is evidenced by the fact that for more than two years before the outbreak of the European war the exchange as between the dollar and the pound sterling on this market did not vary in favour of the latter more than one-seventh to one-half of 1 per cent. American importers interested in Greek products might find it advantageous to take up with correspondents in this district the matter of issuing future letters of credit direct and in dollars. Already a beginning seems to have been made in this direction, for some invoices certified through this consulate recently have been drawn in dollars. A number of responsible export merchants have indicated to the consul their readiness to adopt such a change in their banking, and there is little doubt that all would fall in with such a suggestion if American buyers would make a point of it when negotiating future transactions. Exporters suggest that such letters of credit might best be opened direct to sellers instead of through local banks here, thus leaving the seller free to negotiate his paper to the best advantage. This would be in keeping with the practice of London banks, which open credit direct to the seller."

COMPANY NOTES.

Anglo-Roumanian Petroleum Co.

The report for the year ended December 31 shows gross profits amounting to £20,039. After deducting London expenses and commissions, writing off £11,880, as against £5,636 the previous year, on account of depreciation, and providing £762 for debenture interest, the net profit amounts to £4,424 (against £22,670). This, with the balance brought in of £3,973, makes a total of £8,397, which amount it is proposed to carry forward. The production of crude oil for the year 1914 was 13,585 tons. The war considerably hampered the operations of the company, as in addition to the shortage of labour the Roumanian Government prohibited the export of oil products, thus rendering the sale of crude oil extremely difficult. Some of the company's wells had accordingly to be closed down and the production curtailed to the quantity that could be disposed of.

Egyptian Hotels, Limited.

The directors' report for the financial year ended April 30 states that, after charging all expenses in connection with the working of the hotels, the profits of the hotels were £6,284 17s. 5d., as compared with £30,651 12s. 8d. in the previous year, the decrease being due to the war as referred to hereafter. After providing for the charges payable in London the accounts show a profit of £3,965 7s. 3d. The balance of undivided profit brought forward from last accounts, after providing for the dividends declared on July 8, 1914, is £2,711 14s. 1d., giving a total of £6,677 1s. 4d. From this has to be deducted—(1) debenture interest, £3,553 9s. 4d.; (2) one-fifth of the debenture expenses (reducing the balance carried forward on this account to £1,724 19s. 8d.), equal to £574 19s. 10d., or a total of £4,128 9s. 2d., leaving a balance to carry forward of £2,548 12s. 2d. During the year the sum of £3,429 has been expended out of revenue on maintenance of buildings, gardens, plant, fixtures, and furniture at the company's hotels. During the season there have been practically no visitors in Cairo, and Ghezireh Palace Hotel and the Semiramis Hotel have remained closed. The charges for food and hotel accommodation have been reduced very considerably, and the local board in Egypt have felt it to be their duty to place the conveniences of Shepheard's Hotel at the disposal of the officers and men of the Expeditionary Force, and this has been much appreciated. The net expenditure on capital account during the year has been on land and buildings, £1,605 2s. 7d.; less amounts recovered at Ghezireh Palace for plant sold, etc., £648 12s.; or a total of £956 10s. 7d. In accordance with the company's articles of association, two of the directors retire and, being eligible, offer themselves for re-election. The directors retiring are the Lord Claud Hamilton, M.P., and Mr. E. A. Harrison.

COMPANY MEETING.

ANGLO-EGYPTIAN OILFIELDS.

Sir Marcus Samuel presided last Thursday at the meeting of the Anglo-Egyptian Oilfields (Limited), and in moving the adoption of the report and accounts, said that in Egypt they were confronted with geological features differing in almost every particular from conditions in other fields. They had not yet been able to arrive at any definite opinion as to the value of their several territories beyond that the Zeitieh property, acquired from the Egyptian Oil Trust, had proved valueless, so that the consideration of 214,000 "B" shares originally given for it was lost. The hope of obtaining a paying production on the Gemsah Fields was not definitely abandoned, and at Hurgada a well carried down to 1,670 feet had given for a time a large production. That well was not yielding at the moment, but their experts did not think that the supply of oil was exhausted, and steps were being taken to see if they could recover it. They had many rigs at work over all the concessions; any strikes of oil would be communicated immediately to the shareholders. He thought that they had scarcely received from the Government the help which pioneers should be able to look for, especially when they realised how great an asset it would be to Egypt, and, indeed, to the British Empire, if they could successfully develop supplies of fuel. Almost every ton now used in Egypt had to be imported. They could only hope that in more settled times the Government would assist them in obtaining a market for their oil, should they obtain it, by inducing the Egyptian railways to substitute it for coal. Unless there were a material increase in production the available funds would be quickly exhausted, and they would have to call on the shareholders to provide additional capital. The report was adopted.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah: Production for the week, 260 tons (last week, 231 tons). Hurgada: Production for the week, 266 tons (last week, 240 tons).

ANGLO-ROUMANIAN.—Productions for weeks ended the 3rd and 10th inst., 403 and 664 tons respectively. Several wells shut down owing to lack of storage.

COMPAGNIE IMMOBILIERE D'EGYPTE.—The annual general meeting of shareholders will be held in Cairo on July 31.

EGYPTIAN DELTA LIGHT RAILWAYS.—Dividend of 2½ per cent. for the year ended March 31, 1915, on the preference shares. Receipts for ten days ended June 30 amounted to £E3,880, as against £E5,367 for the same period last year.

EGYPTIAN HOTELS.—The eighteenth annual general meeting will be held at the registered offices of the Company, No. 11, Ironmonger Lane, London, E.C., on Thursday, July 29, at 2.30 p.m.

MALTA AND MEDITERRANEAN GAS COMPANY.—An extraordinary general meeting of this company will be held at the company's offices, No. 59 and 60, Gracechurch Street, on Tuesday, August 3, 1915, at one o'clock p.m. precisely, for the purpose of submitting the following resolution:—"That the payment of the directors' remuneration as at present authorised, and as hitherto paid, free of income-tax, be confirmed, and that until otherwise determined the directors' remuneration shall continue to be paid free of income-tax."

ROUMANIAN CONSOLIDATED OILFIELDS.—Total production for year ending June 30, including Chiciura oilfields, was 103,968 tons, as compared with 66,232 tons last year.

SOCIÉTÉ CIVILE DE L'IMMEUBLE DE LA BOURSE DU CAIRE.—An extraordinary general meeting was held in Cairo on July 16.

CORPORATION OF WESTERN EGYPT.—An extraordinary general meeting will be held at 208, Gresham House, Old Broad Street, on Monday, July 26, at eleven o'clock, for the purpose of considering and if thought fit of passing as an extraordinary resolution the following resolution, that is to say: "That the company be wound up voluntarily and that Mr. Harry Meredith, of 208 and 209, Gresham House, Old Broad Street, in the City of London, chartered accountant, be and is hereby appointed liquidator for the purposes of such winding-up." A further extraordinary general meeting of the company will be held at 208, Gresham House, Old Broad Street, on Wednesday, August 11, at eleven o'clock in the forenoon, for the purpose of receiving a report of the proceedings at the first above-mentioned meeting, and of confirming, if thought fit, as a special resolution the above-mentioned resolution.

August Pasha Adib, Director-General of Accounts of the Egyptian Government, arrived in Paris last week from Cairo with his two daughters, having been granted leave of absence for three months. On the expiration of the leave he will retire on pension. At a farewell meeting held by the employees in the Finance Department, many eloquent speeches were delivered in praise of the work of Adib Pasha in the past. The employees presented the Pasha with a beautiful tea-service and a landscape picture by Philip Marouni, the Lebanese artist. This picture was a prize-winner in the Paris Exhibition.

NOTES OF THE WEEK.

Recent news from the Dardanelles has been confined to accounts of minor engagements. In all of these, however, success has rested with the Allied troops. The Turks continue to attack our lines, but the official statements indicate that the fierceness that characterized the earlier assaults has gone, and that the Allies have little difficulty in holding their ground. Reports from Constantinople to the effect that the shortage of coal and ammunition is assuming serious proportions are becoming more insistent. We shall do well not to lay too much stress on the enemy's difficulties; but we cannot fail to note them with some satisfaction, and it will be remembered that two semi-official Turkish representatives have been reported to be in Switzerland on a mission of inquiry regarding possible terms of peace for Turkey. Russia's naval forces in the Black Sea have recently been strengthened, and she ought to be able to carry out a more effective blockade of the Bosphorus. The Turks will have relied for some time past on sailing vessels and small steamers for their trade with Black Sea ports. Gradually the Russian Fleet has taken the measure of these blockade runners; but if it be true that the Breslau has again been damaged in the Black Sea by mine or by torpedo, it is evident that there is still room for drawing a tighter cordon round the entrance to the Bosphorus.

Turkish resourcefulness under German inspiration is again shown by reports of a recrudescence of trouble for the Italians in Libya. The pacification of the interior could never be said to have been completed, but the Italians had made sufficient headway to be able to regard the situation with equanimity. With the first attempt to relax their efforts, however, they have found the Arabs quite ready to assert their independence. In all probability the Italian Government had its hands too full with European complications to pay much attention to North Africa, and instead of re-establishing its authority at once it seems to have overlooked the earlier manifestations of restlessness among the native population. The result, if we may believe the Italian Press, is that the situation in Libya has suddenly become grave. The Italian Government is said to have evidence that the Arabs are being instigated by the Turks, in spite of the fact that Italy and Turkey are not yet at war with one another. As long ago as last March Enver Pasha is supposed to have sent his brother, Nuri Bey, to Cyrenaica to foment a rebellion. A number of Turkish officers, as well as ammunition, supplies, and money, were also dispatched to the Arabs at the same time, and the latter are thought to be in a favourable position to carry on a rebellion. The Italians may console themselves by reflecting that they lose little by relinquishing their hold on the interior, while it will be an easy matter to defend the coast line against all attacks.

The Turkish raid into the Aden hinterland is not going to have things entirely its own way. After falling back on Aden, the British Movable Column has again advanced against the enemy, and Sheikh Othman, which lies between Aden and Lahej, has been reoccupied. According to the official statement it is now securely held, and the civil population is rapidly returning. The Turks were easily expelled and driven back five miles, but they are still reported near Lahej, which is twenty-one miles from the "Barrier Gate" of Aden.

Further successes have been gained by the British forces in Mesopotamia. Three weeks ago we mentioned a Constantinople report which stated that a British force advancing up the Euphrates Valley had been defeated by the Turks and forced to retire. No mention has been made in any British official statement of the engagement referred to in that report, but we know now that there has been considerable fighting extending over several weeks in the Euphrates Valley. After being driven back from Busreh in the second week of April the Turks retired on Suk-es-Sheyukh and Nasiriyeh, on the Euphrates. Here they proceeded to entrench themselves in a series of positions covering these places and the entrance of the Shatt-el-Hai. A British force followed towards the end of June, but before it could reach the Turkish positions a passage had to be forced along the waterways, which had been mined and closed by obstructions. These were removed early in July, and in spite of a very determined resistance on the part of the Turks, the *communiqué* adds, the British column, skilfully supported by extemporized

Digitized by Google

gunboats and launches, forced its way to the Euphrates. On one occasion a regiment, by dragging its boats overland, was able to outflank the enemy's gun position on the right bank. Driven from Suk-es-Sheyukh, the Turks retired on Nasiriyeh. Our troops pressed on, but the main position of the Turks proved a formidable barrier. A series of Turkish counter-attacks were repulsed, and then on July 24, in spite of a stubborn resistance, we drove the enemy from the ground they held. The same day the gunboats with the force advanced up the Euphrates and shelled Nasiriyeh, with the result that during the night the Turks retreated towards the north, and the town was occupied the next morning.

In a statement to the House of Commons the Secretary of State for India, Mr. A. Chamberlain, gave some interesting details regarding the advance up the Euphrates. The operations, which extended over twenty days and culminated in an attack on a series of entrenched positions, were carried out in a shade temperature of 113° F. under the most difficult and onerous conditions, the country being a network of marshes and canals. No complete reports of the captures made or of the enemy's losses have yet been received. Our own casualties are estimated to be between 300 and 400 of all ranks. In spite of the great heat, the health of the troops in Mesopotamia is good. Among the efforts made by the authorities to minimize the effects of the heat Mr. Chamberlain mentioned the supply of spine protectors and goggles, mosquito nets and veils, ice, mineral waters, and fresh vegetables from Bombay.

Of the Mesopotamian campaign it is enough to say that sufficient unto the day is the progress it makes. Whether we shall be led on to make further advances, as we have been from Kurna to Nasiriyeh, remains to be seen. Much will depend on Turkish strategy and the nature of the opposition encountered. It is recognized that for the future satisfactory administration of the Busreh vilayet it is essential that the Baghdad vilayet should not only be out of Turkish hands, but should itself be under the influence of an enlightened form of government. In their operations against our Persian Gulf Expedition the Turks have met with far more success in inducing the Arabs of Mesopotamia to join them than was to have been anticipated. There is, therefore, an additional inducement to show Great Britain's strength wherever the native population has been misled by Turkish threats and German intrigues.

A regrettable incident is reported from Bushire. The presence of hostile tribesmen in the vicinity had been indicated to the Residency, and it was decided to send out Major Oliphant, 96th Regiment, and Captain Ranking, Assistant Political Officer, with a mixed patrol of infantry and sowars, to reconnoitre. While returning the patrol was ambushed, and both British officers were killed. We can but hope that the lesson will be taken to heart, and that, if the forces at Bushire are not strong enough to provide large reconnoitring parties, they will be reinforced without delay. The hostility of the tribesmen tends to confirm the reports of successful German propaganda in this region.

Greek representations to the Porte on the subject of the persecution of the Greek population in Turkey have elicited the reply that the removal of a number of Greeks from their usual place of residence to other parts of the Empire is a measure taken from purely strategic reasons dictated by the safety of the State. The measure was not to be interpreted as one of oppression or persecution. If the Greek Government rests satisfied with this explanation, it might have saved itself the trouble of making representations to the Porte. M. Gounaris, however, is placed in an awkward position. If he were to pick a quarrel with Turkey at this juncture, he would find himself committed to war entirely on Greece's own behalf, and could, therefore, not count on even the promises which the Entente Powers held out to M. Venizelos.

The view hazarded in these columns that we should do well not to take the threatened prosecution of M. Gennadieff too seriously has been justified by the course of events. A statement issued by the semi-official News Agency in Sofia now declares that the whole matter has been greatly exaggerated. The decision of the court-martial which dealt with the Casino outrage, it continues, was dictated by a desire to elucidate certain points which were still left doubtful by the trial. There is no question of the arrest of M. Gennadieff, who is not even under observation.

For the time being the result of the negotiations between Bulgaria and Turkey remains an enigma. In the first place some doubt is expressed in many quarters whether the negotiations have actually been brought to a conclusion. If, however, we accept as correct the statement that the Porte has agreed to cede to Bulgaria that portion of the Dedeagatch railway which runs through Turkey and with it all territory lying to the west of the Maritza, the question arises whether this agreement implies a *quid pro quo* on Bulgaria's part. For reasons which are set forth elsewhere we incline to the belief that the situation at the Dardanelles has given Bulgaria her opportunity, which she has used to the full. Turkey knows that she has little to hope for if she antagonizes Bulgaria, and has accordingly thrown up her hands as soon as the Bulgarian pistol was pointed at her head. The Bulgarian Government is doubtless proud of its achievement; but there is one question which it is obliged to ask itself, that is: In the event of the Central Powers and Turkey winning this European conflict, what chance has Bulgaria of being allowed to keep the territory which it has wrested from Turkey, virtually by force?

We regret to see that the Montenegrin Government has found itself obliged to publish an explanation or justification of its military acts. So many reasons could be adduced for the occupation of Scutari that it seemed almost impossible that Montenegro's action in this matter should be misunderstood. A candid avowal of her plans to the Allied Governments, it would have been thought, was all that was required. But the criticism of "certain foreign newspapers" has given umbrage at Cettinje, and we are left to infer that some of the Allied Governments have failed to make it understood in their own countries that they are entirely satisfied with the correctness of the Montenegrin attitude. In these pages it has never occurred to us to doubt that Montenegro was pursuing the best course, always presupposing that she was keeping her Allies informed beforehand of her intentions. But we welcome the straightforward declaration, reproduced elsewhere, in which the Government sums up the position.

In this issue we publish the last of a series of articles on the Khedivial Wakfs scandals from our Cairo correspondent. The story unfolded in these articles will help the reader to realize what abuses went on in the Public Wakfs Administration prior to its conversion into a Ministry. Lord Kitchener did not intervene a moment too soon when he removed it from the pernicious influence of the ex-Khedive. Abbas II. is known to have reduced the values of many of the public wakfs by the exchange of property which he initiated, and judging by what he achieved in the case of several Dairas and of the "Aukaf" during the last two years of his reign, would have committed irreparable ravages in the Public Administration if it had not been taken away from him just prior to that period. The revelations made in the course of the Seif ed Dine inquiry come as a timely confirmation of what the Judicial Adviser, Sir Malcolm McIlwraith, said in his last report on the subject of the unsatisfactory position of orphans, minors, and interdicted persons under the existing law. It is to be hoped that the publicity afforded to the abuses committed will create in Moslem circles a current of opinion favourable to the change advocated, and that thus the hands of the Government will be strengthened, and its task of cleansing the Augean stables on behalf of the Moslem masses will be thereby lightened.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, July 15.

The Government Crisis.

After the publication of the list of the Venizelist deputies who have been elected, numbering 184 out of the total 316 members of the Chamber, the Government apparently lost all hope of remaining in power or of effecting a second dissolution, seeing that it could not bring over to its side the other groups of the Opposition, with the exception of the Theotokists. Consequently it is now doing everything in its power to defer the Ministerial crisis. The King's health has been an excellent pretext for putting off the opening of the Chamber, which was to have taken place on July 20. The Venizelist papers report on the one hand that after the Cabinet Council M. Gounaris announced that the Chamber would reassemble without fail on the above date, and, on the other, that as a result of frequent conferences between the President of the Council and some of the King's doctors, the latter decided to hold a consultation with all the other doctors last Sunday. It was then agreed that, as the heart was not yet normal, it was absolutely necessary for the King to avoid all fatigue, all emotion, and any sudden movement for some indefinite time. The doctors further stated that they would meet in consultation again next Sunday—two days before the opening of the Chamber—to consider whether the King was able to take part in politics at the present crisis. If they decided that he was not, as seemed certain, then the Chamber would be again adjourned for thirty days by Royal Decree.

Nevertheless, the fact remains that since the date of my last letter the King's health has improved so rapidly that he has already resumed most of his Royal duties. His Majesty has frequent conferences with the President of the Council on all the affairs of State, he signs decrees and reads the newspapers.

Foreign Policy.

The Ministerial papers reply that the King would be perfectly well able to proceed to a change of Cabinet if it were merely a matter of the formal signature of decrees and receiving the oath. But as the present change involves the reinstatement of M. Venizelos, with whose foreign policy the King has disagreed, his Majesty would be drawn into new and exciting discussions, which would be certain to prove injurious to his health.

These discussions would be the more difficult, the above papers add, as it seems certain that England is preparing to make new proposals to Greece, to be handed to her as soon as M. Venizelos returns to power. England will ask permission to land ten divisions of troops at Salonika, to be joined by a large Greek force of 250,000 men, and to march on Turkey through Thrace and Bulgaria, Bulgaria being obliged either to co-operate with them or to allow their passage through her territory, as the Gounaris Cabinet proposed three or four months ago. The dangers to which such a step would expose Greece, not only from Bulgaria, but also from Roumania, whose attitude is suspicious, says the *Nea Himera*, would certainly give rise to most fatiguing discussions. Needless to say, there is in the meantime no fear of any such step being suggested, as the negotiations of the Entente with Bulgaria have really only begun. It would seem that this report has been spread abroad in order to frighten the public, and to alienate them from the cause of M. Venizelos by attributing to him such anti-constitutional designs.

On the other hand, it seems certain that the King still favours neutrality, and the Ministerial Press states that the adjournment of the Chamber for a month is expedient, as it will give more time for the King and the Government to see on which side victory lies. The same journals go so far as to state that the question whether M. Venizelos and his party shall return to power is not one to be settled by the preponderance of one party or another in the Chamber, but depends on the possibility of an agreement between the King and the head of the Government on the question of foreign policy.

M. Venizelos has categorically denied a statement made by the anti-Venizelist Press that he had announced his determination to abandon neutrality as soon as he came into power. Thus the situation remains uncertain, and it is impossible to make any kind of prediction.

Allies Search Greek Vessels.

The Ministerial Press considers that the strict measures taken by the Admiral of the Allied Fleets against Greek merchant vessels, in order to prevent their trade in contraband of war and their carrying supplies to German submarines, as had been done in several cases, are aimed at the Government, which is thought to be Germanophile. At the same time these newspapers do not seem to realize that it is not surprising in such circumstances if the Entente Powers have no confidence in the vigilance of the present Government.

Græco-Italian Relations.

The altercations between the Greek and Italian Press have lately become more and more violent. Greek journalists, ignoring the altitudes at which the Italian armies are fighting in the Trentino, made fun of the bulletins of General Cadorna, in which he speaks of the difficult atmospheric and meteorological conditions; and in a comic *revue* at one of the Athens theatres the corps of Bersaglieri was ridiculed with mordant wit. Then in both countries rumour had it that the other was about to occupy Berat (in Albania). But neither has done so, and the *status quo* is maintained.

Meanwhile, there occurred the incident of the small Italian warship Giannicolo, which, flying a Greek flag, cruised about in the waters round Corfu, and pretended to wish to buy benzine at Parga, so as to find out whether the responsible Greek authorities were vigilant in the matter of contraband of war, and whether the German submarines were being supplied by the Achilleion (the Kaiser's estate at Corfu), as had been reported. But thanks to the tact and the friendly dispositions of the two Governments and their respective diplomatic representatives, explanations were given on both sides, and the good relations of the sister countries do not appear to have been disturbed.

(Note.—The Giannicolo was captured by a Greek destroyer and taken to Corfu, where it was released on revealing its identity and proving itself to be a warship.)

Persecution of Greeks in Turkey.

The continued and increasing persecution of the Greeks in Turkey is causing much anxiety to the Government. Protests have again been formulated and presented to Turkey, especially against the forced evacuation of Greek villages on the Marmora coast and the coast of Asia Minor. It appears that the inhabitants of the latter have been turned out of their homes at the suggestion of General von Sanders, in conformity with the German plan of supplanting them after the war.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, July 12.

Persecution of Armenians.

One of the most distressing consequences of the war, and one of which little has been heard, is the renewal of the persecution of the Armenians by their old enemies, the Turks and Kurds. The news which leaks through from Armenia presents an appalling picture of massacre, torture, pillage, and all the other horrors that the Armenian race has from time to time suffered at the hands of the Turks. In the Erzeroum district the people have been driven to desperation, and there have been wholesale conversions to Islam as a means of deliverance from torture and persecution. At Mardin, it is reported, massacres on a large scale have occurred; the Armenians have been driven out of Zeitoun, and those who survive take refuge wherever they can. Since the alleged discovery of an Armenian conspiracy the Armenians have everywhere been treated very harshly. They are now being driven from the towns on the Marmora coast; Armenian officials are being dismissed from Government employment, and on the railways they are being replaced by Jews.

The American Ambassador appears to have spoken to Talaat about this state of affairs in Asia Minor. But the extermination of the Armenian race is part of the policy of the Young Turks, and in their present frame of mind they are not to be deterred either by remonstrances or by threats. "We stand or fall," they say. "We have no thought of the future. If we win, as we believe we shall, we shall dictate our own terms to England, France, and Russia. If we lose, the future of Turkey does not affect us!"

Turkish Confidence.

Such is the spirit of the men who, under the dictates of the Germans, are now in power at Constantinople, and they will not be divested of that power so long as they have any control or influence over the army. How much longer the army will follow them it is impossible to say, but it is fairly certain that only a crushing defeat and the presence of the Allied Fleet in the Marmora will have any serious effect on the situation. The Turks generally, who obtain their information only from the Turkish newspapers, have acquired the conviction that the Dardanelles cannot be forced by the Allies, and they are equally convinced of the final triumph of Germany; and this opinion, which prevails in Constantinople in spite of the discontent and distress, will only be changed by inflicting a severe defeat on the Turkish forces at the Dardanelles.

Practically two-thirds of the Turkish officers are *hors de combat*, and once the Turkish soldiers become demoralised it is highly improbable that the German officers will be able to maintain any command or discipline. In any case, the Germans are doing their utmost to prepare a warm reception for the Allies when they reach Constantinople. Defences have been prepared all round the capital, mines have been laid off Seraglio Point, and at least four or five German submarines are at Constantinople waiting to attack the Allied Fleet.

Men and Munitions.

According to reports received here large quantities of ammunition are now being manufactured in Constantinople, and hundreds of men from Krupp's have organised factories at Chichli, Beicos, Galata, Macrikeuy, in the Arsenal, and other places, where work goes on night and day.

Raw recruits continue to arrive in Constantinople from Anatolia, men up to the age of fifty being called up. In one district the Vali appears to have remonstrated at this measure, as no labourers will be available for harvesting the crops, which are reported to be very good in most parts of Anatolia. Wheat is even now still plentiful; sugar, rice, and bread are cheaper in Constantinople than they are in Athens.

Mr. Sellar Released.

Mr. Alfred Sellar, who was brought before the Court-Martial on the charge of supplying benzine to the British submarines, was released after five days' detention. He says he was well treated by the authorities.

According to the latest newspapers from Constantinople, the health of the Sultan was satisfactory, his temperature being normal.

There appears to be no change in the situation in Smyrna.

Athens, July 19.

Effects of the War.

To outward appearance, the situation remains unchanged at Constantinople, and the daily routine of life in the city goes on much as usual. A correspondent writes that everything seems to be going on normally, and no one would say on seeing the crowded streets of Pera that war was waging at the doors of the capital, and it is only when the long string of carriages carrying wounded is seen that one is brought back to realities. Large numbers of German officers are to be seen, and the German language predominates; the place teems with spies to an infinitely greater extent than in the Hamidian reign, and inquiries for the latest news are made to one another in whispers.

Stamboul and Galata, however, have lost their busy appearance. The "Bridge of Nations," which spans the Golden Horn, no longer presents a scene of activity, and when the eye is cast over the harbour one sees an unusual sight: apart from a few idle Bosphorous steamers and some rowing boats, the port is almost denuded of shipping. One is amazed by the transformation from bustle and noise to silence and idleness. Constantinople harbour is one large blank, ominously, even painfully, silent.

Recently a further clearance has been made by the removal of a large number of the harbour buoys, which, it is said, have been taken to the Dardanelles for the purpose of some contrivance with which it is hoped to entrap British submarines in the Straits.

Turco-German Difficulties.

From a political point of view, the situation is probably more disconcerting to those in power. There are reports of revolts amongst the troops at the Dardanelles, and some Turkish officers have been brought to Constantinople in chains. New formations of troops drawn from different parts are being prepared for the Front, and are replaced by raw recruits. The gendarmerie from places in Anatolia have been brought to Constantinople, and are to be sent to the Front, armed with out-of-date rifles.

There are said to be nine German submarines inside the Dardanelles, which apparently cruise in the Marmora and in the Black Sea, and five others are reported to be near Smyrna. What truth there may be in these reports I cannot say.

Baron Wangenheim's Departure.

The papers announce that the German Ambassador, Baron Wangenheim has left Constantinople on account of his health; but the real reason of his departure is said to be friction with Liman von Sanders, who had disapproved of some plan of attack at the Dardanelles suggested by the late Military Attaché and agreed to by Berlin through Wangenheim. The plan was a failure and entailed enormous losses on the Turkish forces, whereupon the Military Attaché committed suicide and Wangenheim was recalled.

Reference was made in a recent article to the new regulation in Constantinople respecting signboards. An Iradeh has just been issued promulgating a special law on the subject, the main points of which are the following:—

1. All theatres, hotels, *appartements*, boarding-houses, restaurants and pharmacies, must have a signboard with the name in a place visible night and day. 2. The inscription must be in Turkish. 3. The use of other languages is permitted, but the space occupied by the foreign language must not exceed half the size of the Turkish inscription, which must always be on the top or in the most conspicuous position. 4. This regulation also applies to placards and handbills. 5. The same measure applies to shops, offices and all commercial establishments. 6. The public must conform to these regulations before the end of August, failing which offenders will be prosecuted. 7. From the date of the promulgation of this law until the end of hostilities, the use of the language of the enemy is prohibited.

FOR THE DARDANELLES WOUNDED.

In a letter to *The Times*, Sir Francis Elliot, H.M. Minister at Athens, writes:—

For some weeks past the members of the Anglo-Hellenic League, assisted by generous subscriptions from Greeks and British outside the League, have been sending weekly consignments of comforts to the wounded from the Dardanelles. These comforts, consisting more particularly of such little luxuries as vegetables, fresh honey, etc., which cannot be procured on the spot or sent out so well from England, but which we can buy here fresh and get to the wounded within twenty-four hours, have been much appreciated. . . . Indeed, I understand that the hospitals would gladly make use of a good deal more than we have so far been able to send. Unfortunately, local resources are limited, and without further help it will be impossible to continue sending the parcels for many weeks longer. That being so, I hope I may be forgiven if I venture to address one more appeal to the generosity of the public at home, who, I know, are anxious that our brave wounded out here, as in France, should have the advantage of any little luxury that can alleviate their sufferings or hasten their recovery. A properly constituted committee, under my presidency, will administer the funds received, and, in addition to the formal receipts which will be issued, it is hoped to publish the names of donors in the columns of *The Times* under the heading of "Fund for the Sick and Wounded at the Dardanelles." Subscriptions for the above object may be paid in to the Ionian Bank, Limited, 25, Abchurch Lane, London, E.C. (marked "Dardanelles Fund"), or cheques may be sent direct to the honorary secretary, Lady Montgomery Cuninghame, British Legation, Athens.

SUDAN NOTES.

(From a Correspondent.)

Kassala of To-day.

To-day, July 30, marks two memorable events in the history of Kassala, one of the smaller but more important of the Sudan's fourteen provinces. It was on the 30th of this month in 1885 that the town fell to the Mahdists, after having been beseiged since November, 1883, the gallant garrison having been starved into submission; while, on July 17, some nine years later, the town again fell, only this time into the hands of the Italians. Since the province was transferred to the Anglo-Egyptian Sudan there has been a marked improvement in the commercial conditions. Kassala province now has a population of about 84,000 and an approximate area of 44,200 square miles. Under the governorship of Captain C. H. Townsend, and especially under that of his predecessor, Major A. Cameron (now Governor of the Sennar Province), there has grown up a good trade in agricultural products, among which dura occupies first place. Among cattle, camels form the most prominent feature, while the trade carried on in cotton, butter, seeds, and skins has also become considerable. Were it not for the continual smuggling that goes on, almost entirely across the Abyssinian border, the commercial prosperity of Kassala might easily become twofold. At the frontier town of Gallabat an appreciable loss is sustained by the Government in Customs dues owing principally to the lack of police or coastguards. One instance alone shows how heavy the loss in the Customs Department can be. A large amount of silk thread is imported into the Sudan annually, for resale to the Abyssinians; but out of some 26,415 pieces received in the course of six months only 1,364 pieces paid duty, so that over 25,051 were smuggled out of the country. When Captain Hobart was acting as Inspector at Gallabat he once sent out a small patrol along the frontier, and during the fifteen days this patrol was out 3,035 pieces of silk paid duty to the Customs, which is equivalent to saying that in this short period the quantity paying was more than double that for the six months when there was no patrol. It may be estimated that the annual loss to the Sudan Administration from this cause alone exceeds £E1,000. Why, therefore, it may be asked, is there not a more numerous and more efficient police patrol maintained in this district? The present Inspector at Gallabat (called by the Abyssinians "Matemma"), and which has been in the possession of the Anglo-Egyptian Sudan since September, 1898, finds his task of supervision no less difficult than did his predecessor.

Distress in Dongola.

Considerable distress among a section of the poorer people of the Province of Dongola still continues, notwithstanding the heroic attempts made by the Governor, Colonel H. W. Jackson, to afford relief. It is not too much to say that but for the humane attention shown by the local administration there would have been many deaths from starvation among the women and children. Free meals have been distributed since the middle of last May, as many as 500 applicants being dealt with at one time.

Unfortunately, there is a great deal of usury prevalent in Dongola, as well as in some other of the Sudan provinces, and apparently no amount of governmental supervision can stop it. The improvident people of this province, hard pressed by the failure of the autumn dura crops during the past three years—caused by visitations of the asal fly—resorted to the old system of borrowing from money-lenders, offering as their only security their future wheat crops, and thus leaving themselves, when they have discharged their indebtedness, practically nothing upon which to subsist until the harvesting of the summer crops. When these fail, also, nothing but starvation stares them in the face. The utmost kindness and sympathy are shown by the Government authorities to the unfortunates who, through no fault of their own, become the objects of their charity; and there can be no doubt that the recipients themselves are deeply grateful, not alone for the assistance rendered, but for the compassionate manner in which it is usually tendered. Colonel Jackson pointed out in his last report that the outlook for the province generally was "gloomy and discouraging"; it has since proved so to an even greater extent than feared, for the asal fly—one of the greatest pests known to agriculturists, and which no scientific experiments have as yet succeeded in overcoming—has destroyed food and fodder over a widespread area, while the cattle disease has decimated *sakieh* cattle.

It is understood that Dr. Harold H. King, the distinguished and capable Government Entomologist, and one of the most brilliant members of the Association of Economic Biologists, is pursuing his studies of the asal fly, and much may be hoped from his investigations. A considerable amount of time has already been expended upon studying the life history of this so-called fly and endeavouring to devise some method for controlling it, but up to the present all endeavours have failed of success.

CYPRUS NOTES.

(From a Correspondent.)

The Price of Bread.

Complaints are made in all districts of the high price of bread—viz., 3½ piastres (over 4½d.) the oke (2 4/5 lbs. av.)—during the present time of poverty and unemployment. The native papers submit that the price should not be allowed to exceed 3 piastres (4d.) the oke, and call upon Government to deal with the matter by restricting exportation of grain, or by importing flour, in order to secure on a calculated basis the quantity needed for the purpose.

There have, however, been very considerable consignments of wheat to Larnaca and Limassol at prices not exceeding 6s. the bushel. The quality is excellent, but loud complaints are made that bread made from it is inferior to that made from native flour, showing that adulteration is practised locally to a large extent. All Cypriots, including villagers, are very particular as regards their flour and bread, and take great pains in cleaning and grinding their corn when the bread is home-made. Unfortunately, Cypriots are no more exempt than traders elsewhere from practices of adulteration, and in some industries are great adepts. The Government Analyst, Mr. Francis, is indefatigable in dealing with numerous samples of many kinds that are constantly submitted to him, and the published returns show the importance of his Department, which the Government wisely established some years ago.

Protecting the Children.

Strong approval is accorded to Government action and to the proclamations by Commissioners to the effect that children under fourteen years will not be allowed to leave the island unless they can show to the satisfaction of the authorities that they are proceeding to the homes and care of relatives. This meets a need which has claimed attention for several years, in consequence of information received from Egypt that young persons of both sexes have come to harm while seeking their fortunes in that country.

The Cyprus police have lately called up youths who have no occupation, and warned them that they must take to some trade or honest means of livelihood. The local Press strongly approves this step, and indeed calls for even more stringent measures, recommending that in cases where police warnings are unheeded further systematic action should be taken. This shows a commendable spirit, which has not been lacking on several occasions in the chief towns, when the youth of the period have shown an excessive propensity to gambling and other accompaniments of a new civilization.

The condition and treatment by the Turks of Greeks at and near Smyrna is bitterly resented. The local papers continue to devote much space to Hellenic politics, the health of King Constantine, the Balkans, and, of course, to the war in all areas.

Convalescents at Troodos.

The splendid and invigorating air of Mt. Troödos is greatly appreciated by convalescents. It is expected that at least 1,000 will be landed altogether.

GERMAN SPY'S ARREST.

Baron Otto von Gumpenberg, the German spy, has been arrested on board a steamer in the Mediterranean and brought to Alexandria, where he is now detained by the British military authorities, says the *Egyptian Gazette*.

It appears that a British warship, while cruising in the Mediterranean, sighted a large sailing vessel flying a neutral flag. An officer who was sent on board to look at her papers found that one of the passengers had what was palpably a false passport. The passenger in question was immediately arrested and sent to Alexandria, where he was quickly recognised as the famous Baron von Gumpenberg. He is now in the Hadra prison awaiting an inquiry into his case by the military authorities.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, July 3.

The Conservative Party : New Leader.

The funeral of M. Jon Lahovary and the election of M. Filipescu as leader of the Conservative Party are the only happenings of importance in an otherwise uneventful week. In order to take up his new position, M. Filipescu had to resign that of President of the Conservative Club, and M. Mishu Contacuzino has been elected to fill the vacancy thus produced.

Heavy Storms.

The week has seen the capital visited daily by a thunderstorm, and there has been almost continual rain, quite torrential in character at times. Some of the lower parts of the city are inundated, but generally speaking no great damage has been done. Similar heavy falls are announced from Oltenitza and some other parts, and in some places in the provinces the train services were much delayed, the lines being damaged in more than one spot. But the rain, much needed for the young maize crop, does not appear to have been general by any means, and there are quarters where it is still badly wanted. Although so heavy, it has not damaged the wheat crop at all. The wheat and barley crops in Transylvania are, by the way, reported to be very poor.

Grain and Cattle Smuggling.

The prohibition against the export of wheat, etc., from this country has led to many attempts at smuggling across the frontier into Transylvania, as grain is much needed there, and a substantial profit is to be made on any successful "run." The Roumanian frontier guards have, however, been extremely vigilant of late, and more than one smuggler and his load of grain have been surprised and arrested in the mountain paths of the Carpathians. The patrolling of these mountains, covered with nearly trackless forests, falls to the lot of men of the Regiments of Frontier Guards, who are generally accompanied by trained dogs; and these canine assistants have been found very useful in detecting smugglers by scent alone, when the soldier patrols, with only their eyes and ears to depend on, would have been at fault.

Attempts have even been made to take small numbers of cattle across the frontier, but, as far as is known, with scant success. Only a few days ago two smugglers, Petre Svichi and Vasile Ciorni, of the village of Adancata, were surprised near the point known as Poiana, close to the frontier, by a corporal and a private of the frontier guards, when trying to cross into Transylvania with four head of cattle. They were detected just at the moment when their Austrian buyers were handing over the price of the cattle, 1,300 fr. At the sight of the gendarmes the Austrians took to flight without the cattle, which were later confiscated. The Roumanian guards pursuing them, some Hungarian frontier guards fired on them on their approaching the frontier. The Roumanians replied, but no casualties are reported on either side.

Near Dorohoi, the most northerly town of Moldavia, some smugglers with grain, ignoring a summons to halt, were fired on, and one, a Transylvanian Roumanian named Josub Vonioschi, was shot dead.

Queen Marie's Movements.

The officers of the 4th Brigade of Roshiori (Red Hussars) having organised some riding competitions at the town of Tecuci for to-day, Queen Marie has accepted an invitation to be present. Her Majesty, who will be accompanied by the Princesses Elisabeth and Marioara, will afterwards pay a visit at the estate of Mme. N. Cinco, one of her Ladies-in-Waiting.

Passport Regulations.

Some newspapers have announced that the restrictions regarding passports, imposed about a year ago, when partial mobilization took place, have been withdrawn. This is incorrect. Only men over forty-six years of age can leave the country; those between the ages of seventeen and forty-six cannot obtain a passport without the authorization of the Minister of War.

M. Maiorescu's Foreign Visit.

The disturbing reports published in several papers regarding the object of M. Maiorescu's visit to Austria prove to have had no foundation at all. The real reason of M. Maiorescu's journey was a wish to visit the village of Bucerdea-Granoasa, near Blaj, in Transylvania, the birthplace of his father.

Signs of the Times.

It is announced that the Italian Red Cross Society has opened a subscription for Roumanian soldiers who may be wounded in battle, and that an Italian Red Cross hospital is to be opened in Bucharest. More than 20,000 fr. have already been subscribed.

The railways are not putting on any extra trains or running any excursions this year as they usually do during the holiday season.

ATTEMPTED SMUGGLING OF MUNITIONS OF WAR.

To the Editor of The Near East.

Sir,—One of our friends has called our attention to a paragraph with the above heading, which has been published in your esteemed journal (Roumanian Letter) on July 2, and we have heard from our Bucharest house on the subject, by circular issued to all our branches, in which they distinctly state that the great brewery firm of Pschor handed over to them seven truck-loads of beer in casks, with instructions to forward one direct to Bucharest and the other six to Bulgaria, and to see especially that the ice in the refrigerators was renewed at certain points.

We may remark that not only the firm of Pschor, but a great many other breweries have been employing our firm as transport agents during the past quarter of a century, and that the breweries are in the habit of using their own specially constructed beer trucks. These contain a kind of refrigerating chamber which, in summer time, is filled with ice, and it has always been the duty of our Continental houses to see to the repacking of ice because, owing to the great heat, the ice provided at Munich melts very quickly.

Now, these seven trucks of beer were handed to our Continental house in the same way and with the same instructions as they have had in the past, and we had no reason to doubt the declaration given by the senders, that the casks contained nothing but beer; and it would be impossible for us to carry on our business, with the enormous number of transactions that pass through our hands daily, if we had to verify the contents of each parcel or consignment.

Therefore, as far as our firm is concerned, no intentions of smuggling munitions of war can be attributed to us, as we were simply made the tools of the brewers, as they in turn were no doubt made the tools of the German Government. It is evident that the German Government used two well-known names to cover up their deeds.

It goes without saying that had we known that munitions of war had been placed in some of the beer casks we would have refused to have anything to do with them, as we would not allow our name to be mixed up with scandalous proceedings.

We shall be greatly obliged if you will kindly publish in your next issue a few lines mentioning our standpoint in the matter.—Yours faithfully,

Schenker and Co.

91 and 92, Bishopsgate, London, E.C.

July 28, 1915.

GREECE'S REPRESENTATIVE IN TURKEY.

Under date of July 27, Reuter's Athens correspondent telegraphs:—In view of Dr. Streit's hesitation to take up the post of Greek Minister at Constantinople, the Government proposed to transfer M. Gryparis there from Vienna, but the latter has refused on the ground of ill-health. M. Gryparis was Minister at Constantinople for many years, and considerably strengthened Greece's position in Turkey, but all that he did has since been undone, and it is quite comprehensible that he is not anxious to return at the present juncture.

PERSIAN NOTES.

(From Our Own Correspondent.)

Meshed, June 30.

An Epidemic of Murders.

In my letter of April 10 I spoke of the murder of a Babi mullah in the bazaar in broad daylight. A few days later the following report was current in the bazaars.—Twelve Moslems covenanted together to kill twelve specified Babis, and each of them deposited four hundred tomans to form a fund for the protection or escape of any of their number who commit a murder. If one of them sees one of the specified Babis and does not kill him, the other eleven are to kill that one. It was said that the mullah who was killed in the bazaar was murdered by one of these twelve men. Since then there have been a number of murders, but not apparently committed by any of the twelve.

The son of the "Tajir Boshee," a Turk Russian subject, was murdered in cold blood just outside the city one afternoon. The murderer was a well-known highway robber by the name of Kakkah. He disappeared for a few days, but was finally caught and brought in one evening. The next morning he was paraded through the city accompanied by a brass band, taken to the quarter called the Naugan Gate, and hanged. The rope broke, and he fell to the ground alive, and was immediately riddled with bullets. There are few cases of such summary justice here, and it is possible that in this case Russian influence assisted justice.

Another murder was committed late one night near the house of one of the leading ecclesiastics, and it was said that the victim was mistaken for the ecclesiastic, whom the murderer meant to kill. The criminal escaped. The Chief of Police was deposed from office.

Just at the same time the Prince Governor-General resigned, probably for other reasons, and for a couple of days the city was under martial law, with Salar-i-Ashraf in control. Meshed thought it was having, or was going to have, some excitement; but about fifty of the leading merchants demanded that the resignation of the Prince Governor-General should not be accepted, the matter was arranged, the Prince Governor-General again took over the administration, and the excitement did not come off.

The Russian Cossacks.

The Russian Cossack regiment stationed here and at Kuchan and along the military road to the frontier has been exchanged. The First Semirechie Cossack Regiment has been replaced by the Second Regiment of the same name. On the morning of the departure of the First Regiment an interesting ceremony took place in the public square. At 8 a.m. the First Regiment was drawn up in line in the street on the east side of the public square, while others of the garrison, officers, and friends had their position just inside the square, and a religious service was conducted by the garrison priest. Then followed the expression of good wishes by the Commandant and by the Russian Consul-General. During all this time about 250 Persian infantry were drawn up in two lines inside the square on the north side. When the Cossacks were ready to move the Persian band played the Russian National Anthem, and the Cossacks wheeled into the square and rode past the Persian ranks while the Russian band played the Persian National Anthem. Then the Cossacks wheeled, and were drawn up facing the Persian soldiers. Salutes were exchanged by the Cossacks and the Persian soldiers, and the Russians rode off with band playing and colours flying. Colonel Haig and his staff rode with the Commandant of the Cossacks, the procession being led by the Indian escort of the British Consulate-General, to a point outside of the city, where final farewells were exchanged.

"The Anglo-Russo-Persian Entente."

The night before the departure of the Cossacks, Colonel and Mrs. Haig gave a farewell party at the British Consulate-General to the Commandant and officers of the First Regiment. It was a brilliant function, as all functions at the British Consulate-General are, and was attended by a large number of people. The Anglo-Russo-Persian Entente is "going strong" in Meshed.

The Russians frequently hold a public religious service and review of the regiment in the public square. Recently, St. George's Day and the Tsarina's Name Day, the Tsar's birthday, the Tsar's Coronation, and the Tsarina's birthday have thus been celebrated in the presence of a large crowd of people. On these occasions the flags of all the Allies are hung on the tent in which the religious service is conducted, and each one of the Allies is prayed for and saluted in turn by name.

Persian Celebrations.

On the fifth anniversary of the Constitutional Government of Persia the Prince Governor-General's palace, the post office, and the artillery barracks, all facing on the public square, were illuminated, as was also the park. The Russian Cossack band and three Persian bands furnished music. In the artillery barracks Salar-i-Ashraf entertained invited guests with *ballat* dancers.

The Persians made a showy display on the occasion of the birthday of Ali. The artillerymen, gendarmerie, and the police, each headed by their brass band and all clothed in their new uniforms, marched to the Prince Governor-General's palace and saluted. The showy part of the ceremony consisted in the display of their uniforms and the noise made by their brass bands.

'Music—Hath Charms?"

There is one thing yet to be desired in Meshed, and that is a civilised method of developing brass band music. There are three of these brass bands, whose headquarters are very near the public square, and the daily practising they indulge in for several hours, beginning very soon after daylight, is most excruciatingly painful to people who live within reach of their sound. When we bear in mind that the Persian is not musical by nature, and that the brass band musicians are selected from among villagers and others who have no natural idea of music or musical instruments the degree of proficiency which they attain is really wonderful. But if they would go outside the city to do their practising they would, on the whole, make a much better impression on a large part of Meshed's population.

King's Birthday Celebrations.

King George's birthday was celebrated by the usual garden-party given at the British Consulate-General. The music was furnished by the Russian Cossack band. The flags of all the Allies and of some of the neutrals were displayed in profusion. The garden was at its best. This garden is probably the most beauitful spot in all Persia. Trees, walks, flowers, and lawns are always kept in perfect condition, and the premises as a whole are an object-lesson to the Persians of the attainment in artistic culture which has been reached by British. This might seem a matter of little real importance; but the Persians are great lovers of the beauties of nature, and the people of Meshed greatly admire this beautiful place, and by it their admiration for the British people is increased.

The guests were received in the big tent pitched on one of the lawns, where refreshments were also served. The first day the 150 guests were officials and foreign civilians. There was a gorgeous display of uniforms and jewels. On this day the Indian Attaché of the Consulate-General was publicly presented with the gold medal of the Order of Khan Bahadur, and the Indian assistant-surgeon of the Consulate-General Hospital with the silver medal of the Order of Khan Sahib. The second day the guests were about the same in number, and consisted of the Persian civilian classes, largely merchants.

All the Austrian prisoners who escaped from Turkistan and were interned here have gone to Teheran.

How to Deal with Intriguers.

Some months ago I wrote about the murder of a German shopkeeper by one of the Russian Cossacks, the cause being that the German had told the Cossack that in a short time the Russian Tsar would be cleaning the boots of the German Kaiser. After the shopkeeper's death his business was taken charge of by one of his wives and a grown-up son. The shop became a meeting-place for pro-German Persians, and was a menace to the safety of the city. The Persian Government took no steps to stop it. A few evenings ago fifteen Russian Cossacks walked into the shop, cocked their rifles, and arrested the young man, and early the next morning he was on his way to Russia as a German spy.

GERMAN ACTIVITIES IN PALESTINE.

(From a Correspondent.)

Dr. Hardegg.

Many prominent and capable persons figure amongst the members of the German community in Palestine. But the German Consul at Haifa, whose efforts for the Fatherland have been referred to more than once by "Corsair," and whose residence was bombarded by a French warship not long ago, heads the list. Dr. Hardegg is a diplomat of no mean ability. He is "cultured," and consequently charming and entertaining. He has done much to promote his country's political and commercial interests and aspirations in Palestine; and particularly attempted to attract the natives' sympathy towards Germany, but, it may be added, the people were and continue to be markedly Anglophile. The Consul even approached the editors of various papers and other Press representatives with the view of their adopting a friendly attitude towards his Fatherland, and offered them money—but unavailingly. He was formerly an attaché at the Imperial Embassy at Constantinople, and speaks Turkish fluently and is conversant with the Arabic, French, and English languages. He made great efforts to achieve popularity among the Moslem section of the population. The son of an influential Pasha was appointed as his dragoman, and he himself fraternised freely with the Mohammedans, and is even reported to have visited their coffee-shops to announce Germany's "glorious victories." He also made a special point of spreading all sorts of nonsensical reports about Britain, accusing the English of the meanest of intentions on every opportunity.

An Illustrious Engineer.

The notorious Herr Schumacher comes next in order of importance. At one time he was American Consular Agent, but, being of German extraction, his nationality was restored to him by the Kaiser on his famous visit to Palestine, and he then relinquished the American consular post in the hope of becoming German Consul. His aspirations were not fulfilled, however.

A German Naval Base.

Dr. Schumacher is an engineer by profession; and an extremely interesting incident in his career is his connection with the ill-fated British enterprise for the Haifa-Damascus Railway. It is very generally believed that he was the person chiefly responsible for the failure of that project. It is understood that the Kaiser made prodigious efforts with the view of securing a naval base on the coast of Palestine. He negotiated with his (then) personal friend, the Sultan Abdul Hamid, in order to secure possession of Tantoura, a tiny port near Haifa; and emphatically pointed out that if Britain was allowed to carry on the construction of the railway line to Damascus, Germany must have Tantoura as "compensation." Dr. Schumacher acted as his local agent, and kept the Wilhelmstrasse posted as to the development of the railway construction. Finally, in order to debar the Kaiser from realising his ambitions, Great Britain had to oblige the unfortunate group interested in the project to abandon it entirely. Schumacher was awarded an Imperial decoration on the occasion of the Kaiser's tour in Palestine.

The Khedivial Mail Agent.

Herr Lange, who has also received attention from "Corsair," has been the Khedivial Mail agent for a long time. He was also Belgian Vice-Consul. He is a turbulent person, and he recently trampled the Belgian flag under foot and destroyed the consular flagstaff. He is a staunch German propagandist, who has made untiring efforts in spreading news of the kind that is "made in Germany."

Pastor Schneider.

This reverend pastor did not confine his energies to preaching Christianity. He delegated agents to distribute, free of charge, the correct version of a new Koran, the object of which was to arouse the fury of the Moslems against their Christian fellow-countrymen, and, particularly, against Britain, who was called "the traditional enemy of Islam." On the outbreak of war he sent native emissaries to distribute these dangerous pamphlets, written in Arabic.

THE COMMERCIAL INTELLIGENCE OFFICE OF EGYPT

23, Sharia Soliman Pasha, Cairo.

Commercial Information supplied by arrangement to British Firms dealing with Egypt and the Near East. Correspondence invited.

F. W. CUMING & CO., Ltd., General Managers.

The Hejaz Railway Director.

Herr Dickmann is an active and energetic German. He is responsible for the recent improvements in the Hejaz railway organisation, and it is believed he is at the head of directors charged with the construction of a railway line to Egypt. It is also believed that he has an inexhaustible stock of railway and building materials at his disposal.

Dynamite and Explosives.

Another significant fact which may be emphasized is the existence in Syria of considerable quantities of dynamite and explosive materials. I well remember the arrival in Haifa, a short time before the outbreak of war, of a large consignment of dynamite, which was said to be destined for the Jewish technical school—under German auspices. The arrival of this material created a panic in the town, and indefatigable efforts were made by the German Consul to secure its discharge. On the other hand, the event did not stir the unsalaried British Vice-Consul at Haifa at all. Probably he never furnished a report on the subject. Another German ship loaded with explosives and dynamite arrived in Beyrout immediately before the outbreak of war. Despite the united remonstrances of the Allied Consuls, the dangerous cargo was discharged and safely removed to Damascus.

MONTENEGRO AND SCUTARI.

Sir J. Roper Parkington, Consul-General for Montenegro, has received the following official telegram from Cettinje:—

Certain foreign newspapers have accused Montenegro of abandoning the Herzegovinian frontier, and thus permitting the Austrian troops stationed there to proceed to the defence of the passes in the Italian Alps. Similar charges have been made against Serbia. In addition to this accusation, the utterly false suggestion is revived that Montenegro has occupied Scutari at the instigation of Austria. To silence these calumnies, we wish to make the following statement:—

Montenegro, from the very commencement of the war, has willingly endeavoured to perform her duty, and even to take upon herself much heavier burdens than could reasonably be expected, especially as our country was terribly impoverished by the two Balkan wars, in which our only gain was a few miles of additional territory of no special interest, as Scutari, so valuable a possession for Montenegro, was denied us. Quite unrecovered from these severe trials, we were confronted by the much more difficult and dangerous task of opposing Austria. Montenegro, who had lost in the Balkan conflicts thousands of dead and wounded, at once faced with renewed enthusiasm this formidable adversary, powerful in all respects and unweakened by recent wars. The call to our manhood met with a glorious response, and our efforts were crowned with success; for the enemy, though greatly outnumbering our troops, were repeatedly driven back from our frontiers with heavy loss. At Gradowa, Montenegro is successfully accomplishing as difficult a task as our ally Serbia so resolutely carries out at Belgrade. Should the enemy force these two gates, they could strike at the very heart of the two kingdoms, Serbia and Montenegro, and not only should we be placed in a most critical position but Germany and Austria would find an open road, which they have for so long coveted, through the Balkans, and thus be placed in direct contact with their ally Turkey. Montenegro, therefore, has concentrated the larger portion of her forces on this important position.

We could not, however, regard with indifference the repeated incursions on our Albanian frontier; these attacks were incited by the agents of the Austrians and Young Turks. It was quite as much in the interest of our Allies as of our own country that we should be placed in a position of safety on our southern frontier during the continuance of the present war. This was the dominant reason which compelled Montenegro to undertake measures to enforce the security of this portion of our country, and by so doing, our chief front in the north is greatly strengthened. It was also imperative that effectual means should be at once adopted to prevent the continual pillage of our food supplies by the Albanian bandits on the Boyana. Evidently it was greatly to the interest of Austria that Scutari should not be in our power, as our means, both offensive and defensive, are materially strengthened now that we are in occupation of the town. It is clear, therefore, that Germany and Austria should be the only Powers aggrieved by the fact that Montenegro has been compelled to take peaceful possession of Scutari, for now we can concentrate our attention on the northern frontier; though, of course, it is quite untrue that these positions were even temporarily abandoned. These facts are evidently appreciated by the enemy, for attacks on our positions above Cattaro and in others directions have become much more frequent of late. To sum up the position, we are now ready, being reinforced by troops set free from guarding the Albanian frontier, to undertake the offensive in any direction, and only await instructions from our Allies to direct our attack. Our record during past ages should assure our Allies that no sacrifice on our part will be considered too great to lead our united armies to victory.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

Armenian Massacres. July 28.

Viscount BRYCE asked whether the Government had any information regarding the massacres of the Christian inhabitants which were reported to have been committed by the Turks in the districts of Zeitoun, Mush, Diarbekir, Bitlis, and elsewhere in the region inhabited by the Armenians; and regarding a reported wholesale deportation of the inhabitants of some districts into Central Asia Minor and the desert parts of Mesopotamia; and whether if these reports were well founded, there was in the opinion of the Government any step that could be taken to save what remained of the Christian population of Armenia. He said information had reached him that very grave massacres had occurred. It was reported that in one district all the male population were shot, and the women and children, to the number of 9,000, were thrown into the Tigris and drowned.

The Earl of CROMER, while fully appreciating the difficulty of knowing what could be done in this matter, hoped his Majesty's Government would do what they could by representations through the American Ambassador to mitigate these horrors.

The Archbishop of CANTERBURY said he had received letters describing the fearful crimes which had been perpetrated by the Turks in districts, some of which were now being occupied by the Russians. The most pitiable part was the feeling which prevailed in these districts that nobody in Europe either knew or cared anything about these atrocities. He hoped that our Allies would be told of the indignation that was felt at the indescribable horrors which had been perpetrated in these districts previous to their occupation by the Russian troops.

The Marquess of CREWE grieved to say that the information in the possession of the Foreign Office on this subject was entirely in accordance with the facts as stated by Lord Bryce. On May 24 his Majesty's Government, in concert with the Governments of France and Russia, made representations with regard to the massacres which had been perpetrated up to that time to the effect that members of the Ottoman Government and all those who had instigated or actively participated in these crimes would be held personally responsible. Since then the outrages had increased in number, and, if possible, in atrocity. There had been wholesale murders, wholesale deportation carried out under the guise of the necessity for the evacuation of particular districts, and a series of other outrages. Information had been received by his Majesty's Government that these crimes had been encouraged by German officials, whose presence had been an unmitigated curse both to Christians and Moslems, with a sinister disregard of the welfare of the country and its inhabitants. Obviously no immediate steps could be taken for the suppression of these outrages, but there was a fixed determination that when the time came that the facts could be proved those who had been responsible, either directly or indirectly, for the commission of these crimes or for their inspiration should be punished and all the more severely the higher the positions that they occupied.

HOUSE OF COMMONS.

English Officials in Egyptian Government. July 22.

Mr. JOYNSON-HICKS asked what was the position of English officials in the Egyptian Government who had joined the Army in regard to pay and pension; and how that position compared with similar officials in the Indian Government.

"I have no information on the subject, but will inquire," was Lord ROBERT CECIL's answer.

Parcels for Mediterranean Fleet.

Col. WHITE asked the Postmaster-General whether parcels addressed to troops serving in the Dardanelles were charged for at the rate of 1s. 4d. for 7 lb., and 1s. 7d. for 11 lb., whereas parcels for the Fleet serving in the Mediterranean were charged 1s. 9d. and 2s. 6d., respectively; and, if so, whether he would arrange that parcels for the men of the Fleet should be placed on the same basis as those for men of the Expeditionary Force there.

Mr. HERBERT SAMUEL: The postage rates on parcels for the Mediterranean Expeditionary Force are the same as on parcels for H.M. ships in foreign waters (including those in the Mediterranean), namely, 1s., 1s. 9d., and 2s. 6d. for parcels not exceeding 3 lb., 7 lb., and 11 lb. respectively.

In reply to Col. YATE, Mr. SAMUEL said he was afraid it was impossible to arrange to send a 1 lb. parcel for 4d., in view of the fact that payments had to be made to other countries for costs involved in transmission.

Col. WHITE: Will the right hon. gentleman arrange that parcels to the Mediterranean Fleet shall be placed on the same basis as those for the Expeditionary Force?

Mr. SAMUEL: That is already done. I stated in my answer that the arrangements are the same for the men serving with the Fleet, and the men with the Mediterranean Expeditionary Force.

Col. WHITE: But are the rates for the Fleet the same as those for the Expeditionary Force in France? I understand they are higher.

Mr. SAMUEL: That was not the question. The question was whether the parcels for the Expeditionary Force in the Dardanelles and the Mediterranean Fleet were on the same basis.

Persian Gulf Operations.

Mr. T. M. HEALY asked the Under-Secretary of State for War why no dispatch or official report of the operations in the Persian Gulf had been published. He also wished to know whether it was intended to publish any report dealing with the operations which commenced in November, 1914; and, if not, whether the services of the officers and men of the Forces so engaged were to be left without recognition.

Mr. TENNANT: Dispatches regarding the operations in Mesopotamia were published in the *Gazette of India* on February 28 last, and further dispatches have been received, and are being considered by the Government of India, with a view to publication. I am discussing with the Admiralty and the War Office the desirability of reproducing these dispatches or their substance in the *London Gazette*. In any case, I hope to take steps to ensure due recognition of the services of the officers and men whose work has been commended.

Allowance to Troops in Egypt. July 26.

Mr. TOOTHILL asked the Under-Secretary of State for War if he was aware that troops of the Expeditionary Force awaiting embarkation for the Dardanelles were refused Colonial allowance, while troops of the Army of Occupation, Egypt, stationed in the same camp, were receiving it. Would the Under-Secretary state why this distinction was made, and would he take immediate steps to effect a satisfactory adjustment?

Mr. FORSTER (Financial Secretary to the War Office): Colonial allowance is designed to meet the extra cost of residing regularly in Egypt for prolonged periods. It is issued to all whose stay there exceeds fourteen days, but not to those who are landed for shorter periods.

Captured by Moors.

Mr. HINDS asked the Foreign Secretary if one lieutenant and three seamen belonging to H.M. Navy, together with two officers of the British Merchant Service, had been captured by Moors in Almanza Bay and had been held to ransom since May 13; and, if so, what steps had been taken for their release.

Lord ROBERT CECIL: According to my information, Sub-Lieutenant Kent, R.N.R., and three seamen from the armed merchantman Richard Welford, together with seven seamen from the British merchant steamer Eburna, are in the hands of the villagers of Ain Deshisha, in the Anjera, having been captured on May 13. H.M. Agent at Tangier entered into communication with the tribes immediately after the capture. A ransom was demanded, which it is not considered advisable to pay. I can give no further information at the moment as to the steps which will be taken in the future, but meanwhile I am informed that the captives are being well treated, and that there is no reason for anxiety as to their safety.

Anglo-Persian Pipe Line. July 27.

Sir EDWARD GREY, answering a question put by Commander BELLAIRS, said that the Anglo-Persian Oil Company's pipe-line was damaged in the first week in February, and that the necessary repairs were finally completed in the second week in June.

Dardanelles Casualties.

At the request of Mr. MOLTENO, Mr. ASQUITH has furnished a return of the total casualties among the British forces in all the fields of operations up to the latest date available. The figures given for the military casualties in the Dardanelles operations, including Naval Division losses, are as follows:—Killed: Officers, 567; men, 7,567. Wounded: Officers, 1,379; men, 28,635. Missing: Officers, 198; men, 10,892. Total: Officers, 2,144; men, 47,094.

Dardanelles Wounded. July 28.

Mr. TENNANT, replying to Mr. Joynson-Hicks, said there was a certain amount of enteric fever and dysentery among our troops in the Dardanelles. The Director-General of the Army Medical Service had received from the General Officer Commanding in Egypt a letter in which he said: "I wish you could see what is being done. . . . There were difficulties which were enormous. There was some want of organisation, but it is all now remedied or in process of being remedied. I have gone on the principle of asking you for everything I want, and here I have spared no expense to improvise. With regard to nurses and doctors you have already responded, and we have never been really in want."

CABINET CRISIS IN PERSIA.

Letters received from Teheran state that a Cabinet crisis had broken out as a result of a stormy sitting of the Mejliss. It is announced, Reuter's Agency learns, that a considerable number of Austrian prisoners, mostly wearing new uniforms, had arrived in Teheran, after making their escape from the Caucasus. They were originally taken prisoners by the Russians and sent to the Caucasus to be interned.

BRITISH PRISONERS IN TURKEY.

Under date of July 28, Reuter's Malta correspondent telegraphs:—Lieutenant-Commander Stoker, who was in command of the submarine A.E. 2 when she was lost in the Dardanelles on April 30, and is now a prisoner of the Turks, writes to a friend in Malta:—"I am very fit, and you need not worry about our treatment, which is quite as good as can be expected. It is splendid being back with the others and being allowed daily exercise. We are now six Russians, two Frenchmen, two Australians, and six English."

THE BALKANS, 1912: EUROPE TO-DAY.—II.

A COMPARISON FROM A NURSE'S POINT OF VIEW.

By Katherine H. Wheatley.

On one occasion, taking over a school temporarily turned into a hospital, we found it full of wounded lying eight deep, some living and some who had been dead several days, huddled together, with their ghastly and invariably gangrenous wounds untended. Practically all were suffering from dysentery of a malignant kind. They had received no attention but the daily visit of a soldier carrying two pails, one of water and one of native soup, the latter consisting of a handful of rice in a large quantity of water, with fat, usually buffalo butter, floating on the top.

Fortunately, the Turkish peasant is a stout fellow. The physique of the Asiatic, his hard outdoor existence from babyhood, on the scantiest of diets, and his immunity for many generations from alcoholism enabled him to endure hardships and fatigue that would have killed an ordinary European. It also enabled him to throw off septic conditions and to recover from what would in a European have been considered a fatal wound. The staple diet of the average Turkish peasant is maize bread, very coarse, sour and yellow, cheese, onions, and a preparation of sour milk called *yaourt*. His drink is water, and his day's work is from sunrise to sundown. At such times as the great fast of Ramadan this work is carried out without food, water, or tobacco passing his lips between sunrise and sunset, and often under the most tropical sun.

Anti-tetanic serum was not used, perhaps not known, by the Turkish doctors, although there were a large number of tetanus cases. As far as I could ascertain, in the native hospitals there was no special treatment, and men who might in favourable circumstances have recovered died in numbers in an exhausted condition. In the British Red Cross hospital and the British Red Crescent hospital the proportion of tetanus cases that recovered was about 65-70 per cent. of those admitted.

No precautions were taken by the authorities against typhoid, either by inoculation or sanitation. It is interesting to note that they have not reformed in this direction, and that when typhoid broke out amongst the troops as lately as last October the typhoid isolation camp was pitched beside the Derkos water, which is the sole supply of the city of Constantinople, thus seriously endangering the health of the inhabitants.

As a result of exposure to wet and cold without adequate shelter, there were a number of pneumonia cases. The Asiatic is particularly prone to all chest troubles, and is a bad subject for them, owing to the lowering of his resisting power by poor food and insufficient clothing.

The fact also that the men were compelled to wear new, hard, and badly fitting boots, when they had been accustomed to native slippers, produced many injuries to the feet, by means of which the infection of gangrene gained access to their system. This disease and cholera were the two greatest causes of mortality of the war. It is impossible to estimate the number of men who lost their limbs from gangrene, and nothing seen so far in the European War has equalled their appalling state. Feet, and even legs, came away as the men were undressed, and an average day's work in the theatre was twenty-eight amputations of leg, mostly at the thigh. Many men lost both hands and feet.

The outbreak of cholera was so violent that any other diseases were lost sight of. In the army in Thrace alone men died at the rate of 1,000 a day. Recovery could be expected if the patient was able to reach warmth and food, but in the malignant cases, which were fewer in number, death usually occurred within twenty-four hours. The thousands that perished of the milder variety lost their lives from want of care and proper food. Such terror was caused by the disease that if a soldier was even suspected of having cholera he was left to die. There was no native hospital for infectious diseases built until after the outbreak had subsided, and suspected cases were thrown out of the trains and deserted by the roadside. Miss Alt was the first to make an effort to go to San Stefano to their rescue, and gave great assistance by supplying hot soup, etc.

When any attempt at all was made to bury the dead they were thrown into uncovered pits, more often than not situated close to a well or stream. This contaminated the drinking water of hundreds, and it was quite usual to see men on the march crowded round a polluted well, trying to draw water with a tin mug tied to a string, which was perhaps all they had between them; and this must have greatly facilitated the spread of disease.

There was great difficulty in identifying a body or even a wounded man. Regimental numbers did not exist, no lists were kept of the killed and wounded, and no attempt was made to estimate the numbers of troops engaged in or surviving after an action. This led to great hardship and misery among the relations of the soldiers, none of whom were informed of the death of their relatives. The men simply did not come back. It also made matters very complicated for a soldier to trace his family amongst the refugees in Asia Minor. Often, if found, the only means of identification was the woman's word, and if during her husband's absence she found she was better off, or he returned to her a cripple, she frequently and very vehemently denied all knowledge of him. As a means of identification, names in the East are of small value, as, for instance, when in one village there are several families of Ali, the son of Ali.

If the state of the men was bad, that of the animals was much worse. There were no veterinary surgeons and no existing organization for the care of wounded and sick animals. The horses were in an appalling condition. I have seen several hundreds of these worn-out, wounded creatures, full of sores, landed at Panderma, being driven into the interior of Asia Minor, dying on the road. At one khan where they were resting for the night I could not sleep for their screaming; and in the morning out of two hundred there were but twenty living. Why anyone took the trouble to bring these useless animals nobody knows; the most humane act would have been to shoot them where they stood.

In the present war our sick and wounded animals are cared for as if they were human beings, having their own carefully trained surgeons and attendants and fitted horse ambulances to convey them to their hospitals. In the event of an animal being too severely hurt to recover it is put out of pain in the most merciful manner.

Whereas in this war but a comparatively small part of the countryside has suffered from the invasion, and the farmers for the most part are able to follow their usual occupations, in many big districts, especially in Thrace and Macedonia, the harvest was not gathered in or the crops sown, and farming was entirely at a standstill owing to want of labour. Most of the owners of the farms and all their men had gone to the war, leaving only their womenfolk behind.

In those days every paper was publishing long lists of fearful atrocities, but the evidence was manufactured, and I can say on the highest authority, as well as my own experience after working amongst the refugees for twelve months, that in reality there were very few atrocities committed on either side. A Commission, composed chiefly of Englishmen, went thoroughly into the matter, with the result that they came to the conclusion that the Turkish peasants fled in fear of being ill-treated, and that the Greeks in particular amongst the opposing armies got a bad name for committing atrocities, but that with two exceptions, viz., at Kavalla and Drama, none took place.

I wish we could say as much for our opponents in the present war.

There were, of course, but few ancient cities with historic buildings on the route of the invading armies, but the Bulgarians spared the beautiful old mosque in Adrianople, which is very precious to the Turks for old associations' sake.—What of the smoking ruins in France, Belgium, and Flanders?

The omission on the part of the Turkish authorities to supply transport for food and for wounded men was not from cruelty or indifference, but from want of knowledge, want of organization, and disregard of the value of human life. None of the races engaged—the Serb, the Bulgar, the Montenegrin, or the Turk—possessed the means of organizing or of directing an organization for the maintenance and care of troops in the field.

Anyone who went through the campaign on either side, and with whatever feelings of friendship toward the people they helped, must own, like myself, that it was war under very primitive conditions, and that there can be no real comparison between the civilization and knowledge of the twentieth century and that of the thirteenth, to which period most of the combatants, and particularly the Turks, may be said to have attained.*

Comparisons cannot be instituted. I have attempted only to set down a few statements of what actually took place in one army in the Balkan War, which may be contrasted with the care of our troops in health and in sickness in the European War.

THE PUBLISHER
would be obliged if Readers would inform him if they experience any difficulty in obtaining copies of the paper.

FROM UIST TO GALLIPOLI.

The antics of a Uist pony at the seat of war in Gallipoli are a source of delight to a Tobermory lady, who owned the animal before it was commandeered, says the *Morning Post*. She knew Polly to be acute enough, for she often watched her as she robbed certain hen roosts of newly-laid eggs. The pony stalked likely hens while pretending to be busy gathering her usual food close by. At the Dardanelles, to the intense amusement of certain sections of the transport service, Polly lies down when she hears the scream of a shell coming in her direction, stretches out her forelegs, puts her head to earth, and shuts her eyes. She is apparently dead, but she leans to one side, making a hiding place for her rider till the danger has passed. Then Polly rises again and takes her Tobermory gunner on her broad chestnut back.

* Since this article was written the Germans, as all the world knows, have been using poisonous and asphyxiating gases, a refinement of cruelty and barbarism which the Turk would never have thought of employing.

NEAR EAST BOOKSHELF

THE SIGN OF THE CRESCENT.*

In making public the reasons which prompted him to embrace the religion of Islam, Lord Headley has gone far towards the removal of many false impressions and beliefs which are current in Europe regarding the teaching of Mohammed. It is well that this is so. As guardians of the interests and wellbeing of thousands of loyal and devoted Moslem subjects it is the least of our duties to meet their religious outlook with understanding. The present war, with its ramifications penetrating to the very heart of Islam and showing it resolutely superior to the illegal but alluring proclamation of a Jehad by the hoodwinked Sultan, has undoubtedly served to awaken public and sympathetic interest in England; Lord Headley's book will supply much information to the inquirer who wishes to carry his sympathies and his interest to the point of complete understanding.

With the controversial basis of Lord Headley's plea for Islam we will not attempt to deal. The writer may be said to be sufficiently sound in his reasonings as a whole to ensure the attention of his reader, without, however, having produced a single paragraph of sufficient strength to give the professing Christian "pause to think" concerning the validity of his own views. One criticism we would, however, advance at the outset. The author would have been better advised had he omitted altogether any reference to bitternesses existing between Christian and Christian as argument in favour of the abandonment of Christian belief in favour of Islam. The conditions of the adherents of the two beliefs, Christian and Mohammedan, are too dissimilar to justify the drawing of any such parallel. Speaking broadly, the latter religion is only now entering upon the present measure of trial through which religions, like men and nations, pass—higher education. The soul of religious belief lies in simplicity, and the much-quoted maxim that "a little knowledge is a dangerous thing" is now more true when applied to religious bodies than to individuals.

Again, in writing a book of this description Lord Headley should have been more careful to avoid the inclusion of broad statements liable to the immediate questioning of any considerable body of the religion he seeks to discountenance. Take, for instance, the following paragraph:

> For many hundreds of years there have been no miracles, and men's minds have become used to ordinary every-day happenings, but if suddenly a Divine Message were revealed they would be so much surprised and upset that they would refuse to give any credit to the manifestations, and would probably try to make away with the medium as an uncanny and dangerous person.

There are thousands and thousands of Christians who to-day find the chief comfort of their spiritual life in the recognition of Divine intervention in daily life. To quote two instances of recent date: there is the recovery of the King of Greece, a recovery implicitly believed by the majority of Greek people to have been directly due to miraculous intervention, and again there is the argued question of the angelic hosts after Mons.

On the other hand, Lord Headley has stated his case for Islam in a manner that, as we have intimated, throws the necessary light of sympathetic knowledge upon many points that were growing obscure or grossly misrepresented in England. He is especially observant in his efforts to destroy the prevailing ideas regarding the position of women under the Moslem law. Here, again, however, he draws invidious comparisons between East and West, forgetting that the "Woman Movement" here is a growth of the latter part of the centuries of Christianity, and that if various sympathetic women writers on Turkey are to be relied upon, the Moslem women of that country bade fair to emulate the methods of their Western sisters after only twelve centuries of Mohammedanism. We do not personally subscribe to this belief, but in fairness to Christianity we must remember the temptations of an almost universal education and its effect upon the mind.

* "A Western Awakening." By Lord Headley. (London: J. S. Phillips.)

NEAR EAST BOOK NOTES..

Our Cyprus Correspondent writes (July 11):—A "Report on Plantation Work in Cyprus from 1879 to 1914," by A. K. Bovill, Principal Forest Officer, has just been published (price 7s. 6d.). It gives an interesting *resumé* of the work done during the period of the British Occupation in the matter of re-afforestation.

Messrs. G. Harrap and Co. have just published "Serbia: Her People, History and Aspirations." The book is written by M. Woislav M. Petrovitch, of the Serbian Legation in London, well known to our readers through his book of Serbian folk-tales. The price of the new book is 3s. 6d.

A book on Roumania, which, though not new, may be commended to the notice of our readers, is "La Vivante Roumaine," written by Paul Labbe, and published by Hachette (4fr.).

We have received from Messrs. Raphael Tuck and Sons copies of six photogravure portraits of members of the Royal Family, which they have just published. Reproduced from copyright photographs, in a style worthy of Messrs. Tuck's high reputation, these pictures should—and, we doubt not, will—prove extremely popular, especially at the present time, when we are all beginning to realize that we need not feel in the least ashamed of being patriotic—and showing it. There are two portraits of the King—one in naval and one in military uniform—and one each of the Queen, the Prince of Wales, Princess Mary, and Prince Albert. All are pleasing, that of the Princess Mary especially so; and the price at which they are issued (1s. each net, or 2s. 6d net hand-coloured; India print edition 1s. 6d. net, or 3s. net hand-coloured) is certainly low enough to place them within the reach of the poorest of his Majesty's subjects, even in these "hard times."

War and Diplomacy in the Balkans. By H. Charles Woods. (Horace Cox. 6d. net.)

THE MONTENEGRIN FORCES.

Sir J. Roper Parkington, Consul-General for Montenegro, has received the following official telegram from Cettinje:—

"The statement published in the foreign Press that Montenegro had withdrawn her troops from the Herzegovinian frontier is absolutely false. Following the occupation of Scutari, a large number of Montenegrin troops, which had been guarding the Albanian borders since the commencement of the war, have been sent to the front, and more than 3,000 men have thus been added to our army opposing the Austrians on the Bosnia-Herzegovina frontier."

SERBIA'S CRY FOR HELP.

PITIFUL PLIGHT.

"The air is full of farewells to the dying and mournings for the dead."—(Last Friday's *DAILY MAIL.*)

2	20	Monday	21	22
3	21	Tuesday	22	23
4	22	Wednesday	23	24
5	23	Thursday	24	25

Monday is the birthday of H.R.H. Prince Alexander of Greece, second son of King Constantine, who was born at Tatoi in 1893.

Tuesday is the birthday of H.M. King Constantine, who was born at Athens in 1868.

A Reuter's message dispatched from Athens on Tuesday says:—The health of King Constantine has been improving during the last fortnight, and his Majesty is regaining his strength. The King may now be regarded as convalescent.

Lord Kitchener and Colonel O. A. G. Fitzgerald arrived at Windsor Castle on Tuesday as the guests of the King. They left on Wednesday.

Sir Henry and Lady Bax-Ironside have arrived at Heronden House, Eastry, Kent, from the British Legation at Sofia.

Lord Oranmore and Browne left London on Wednesday for Castle Macgarrett, County Mayo.

Viscount Milner has been elected Chairman of the General Council of the National Service League, in succession to Lord Newton, who resigned on taking office as Paymaster-General.

H.H. the Aga Khan left London for the Continent on Wednesday.

Sir Roper Parkington, the Consul-General for Montenegro, and Lady Parkington left London for Harrogate a few days ago.

Captain Matila Costiesco-Ghyka, of the Roumanian Legation, has returned to London from Paris.

M. Radovitch, the ex-Prime Minister of Montenegro, has left London for the Continent.

Captain W. D. Kenny, A.D.C. to the Sultan of Egypt, who has been doing duty in Gallipoli, has returned to Cairo.

Professor Alexander van Millingen and Mrs. and Miss van Millingen arrived in London last Friday. Their address while in this country will be c/o The Imperial Ottoman Bank.

Mr. F. G. Lowick, of Alexandria, has arrived in England, and has joined the A.S.C., to which he has been posted as lieutenant.

Among Anglo-Egyptians staying at the Regent Palace Hotel are Mr. W. R. Carruthers, Mr. J. E. Cornish, Mr. Rowland Snelling, Mr. F. G. Lowick, and Mr. Cumming.

Mr. Robert Hyde Greg, whose appointment as a First Secretary in his Majesty's Diplomatic Service is gazetted, has seen much service in Egypt. Born in 1876, he entered the Foreign Office in 1899, and was promoted Assistant Clerk ten years later. In 1911 he was attached to the Agency at Cairo as Acting Second Secretary. He acted as Chargé d'Affaires for a short time in 1912, and again in 1914, having meantime (1913) been appointed Acting First Secretary. He rejoined the Foreign Office in August last year, but was reappointed to Cairo the same month, and remained there till last January, when he again returned to the Foreign Office.

Lieutenant Ian Ross, son of Mr. and Mrs. John Ross, of Alexandria (who are staying for the summer at Hindhead), has been gazetted a temporary captain in the 4th Battalion of the King's Liverpool Regiment. He is at present at the front, having returned there last week after a few days' leave.

A correspondent writes:—Cecil Rice, who is mentioned in your Roll of Honour as one of the British subjects from Turkey in H.M. Forces, was wounded on the 8th inst. somewhere in Flanders, and, unfortunately, died on the 11th inst. Acting-Corporal Rice, who came over to England last October with a party of sixteen other British subjects from Smyrna, was the son of Mr. Percy Rice, of Rice Brothers, engineers, Smyrna. He, together with the others, joined the Rifle Brigade, and they belong to the 7th Service Battalion. Other members of this contingent who have been killed are Mr. Lionel Vedova, whose death you reported in your last week's issue, and Mr. Burns, who was accidentally shot some four or five weeks ago. Amongst the wounded are Mr. E. Vedova and Mr. Walter Whittall.

On July 19, at Tullow Church, Carrickmines, the marriage took place of Major C. W. Spinks, R.F.A., attached Egyptian Army, with Miss Marguerite Stuart Coleman, the younger daughter of Mr. R. H. Coleman, of Toronto, Ontario. As reported in last week's issue of THE NEAR EAST, Major Spinks was recently retransferred to the Army, having been serving for some time as Government Inspector, Mongalla Province, Sudan.

Messrs. Housden and Preece, late of the staff of Victoria College, Alexandria, have just completed their period of training in the Officers' Training Corps at Cambridge, and have joined their battalions.

On July 12, at All Saints Church, Cairo, the marriage was solemnized of Ernst R. Matthaei, Egyptian Civil Service, son of the late Mr. Ernst Matthaei, The Boltons, S.W., and of Mrs. Matthaei, 113, Clifton Hill, N.W., with Edith, daughter of the late Mr. J. Lucas, of Wormleighton, Leamington, and of Mrs. Lucas, of Eastwell Lodge, Melton Mowbray. Miss Lucas is a sister of Lieutenant W. R. Lucas, A.S.C., who in times of peace belongs to the Egyptian Ministry of Education, to which Mr. Matthaei also belongs. The wedding was a very quiet one. Mr. Risdon Bennett was best man.

The wedding of Mr. C. A. A. Douglas-Hamilton, of the Egyptian Civil Service, and Evelyn Addison Chater, only daughter of Mr. and Mrs. T. A. Chater, of 25, Addison Road North, and The Caboose, Chesham Bois, Bucks, will take place in Egypt. Miss Chater will leave for Egypt early in October.

The O'Mahony, who is known to readers of THE NEAR EAST as an able and eloquent champion of the rights of Bulgaria, and in Bulgaria as a philanthropist who has established one of the largest and best organised orphanages in the country, has lately been very actively engaged in addressing recruiting meetings in Ireland. Since Whit Sunday he has addressed over forty such meetings, and has motored considerably over 2,000 miles in moving from point to point of his campaign. Judging by the big crowds he attracts, we feel justified in hoping that his appeal to his fellow-countrymen will result in securing a large number of recruits.

Lieutenant-Colonel Stewart MacDougall, of Lunga, 10th Battalion Gordon Highlanders, who is reported killed in action in Flanders on July 21, was born in 1854, and was the second and only surviving son of Mr. John MacDougall, of Lunga. He entered the 93rd Highlanders in 1876, with whom he saw service in the Egyptian campaign of 1882. He was seriously wounded at Tel-el-Kebir, was mentioned in despatches, received a medal and clasp and the Khedive's Star. He was adjutant of the 4th Battalion Argyll and Sutherland Highlanders 1884-89, and retired with the rank of major in 1892. Lieutenant-Colonel MacDougall was appointed Gentleman-at-Arms in the Household of Queen Victoria in 1900, and received the Coronation medal. He was appointed temporary lieutenant-colonel in command of the 10th (Service) Battalion of the Gordon Highlanders on September 4 last year.

Our Special Correspondent at Athens, in forwarding us news of Constantinople, under date of July 19, writes:—

Mr. Newman Mumford, Surveyor to Lloyd's Register at Constantinople, has proceeded to Mudros on his Majesty's service.

Mr. Arthur Cumberbatch, Chief Cashier of the Tobacco Regie, has also proceeded to Mudros.

Archdeacon Ward, chaplain of St. Mark's, Alexandria, and Archdeacon in Egypt, is leaving that country to take up work in England, having been offered, and accepted, the benefice of Sturminster Newton, Dorset. He was appointed to the chaplaincy at Alexandria in 1902. Two years later he was made an honorary canon of St. George's, Jerusalem; in 1907 he became Archdeacon of the Church of England in Egypt, and the next year he was appointed Bishop's Commissary.

Commenting on his departure, the *Egyptian Gazette* says:—"Archdeacon Ward has played a prominent part in the affairs of the British community throughout his thirteen years of work here, and he will be greatly missed. An outstanding event of his chaplaincy was the restoration of St. Mark's Church, both inside and out, which was completed about six years ago."

We regret to learn, from the Egyptian papers, of the death of Mr. Charles Orr Campbell, M.I.C.E., of the Egyptian State Railways. He joined that service nine years ago, having previously served with the North-Eastern Railway, the South Indian Railway, and in the Sudan, where he was largely responsible for the town and harbour works of Port Sudan. In Egypt he supervised, as executive engineer at headquarters, the construction of the more recent railways, the Marg-Shebin-El-Kantara, Barrage-Ashmun, and Zagazig-Zifta lines being the most important. He died at the Anglo-American Hospital, Cairo, after a short illness, on the 10th inst.

The Islamic Society is giving an "At Home" at the Hotel Cecil on August 7, in honour of Mr. Chaudhrie Abdul Haq, the retiring hon. secretary of the society.

A demonstration will be given at the Royal Society of Medicine, 1, Wimpole Street, today, at 5 o'clock, by Lieutenant-Colonel Leiper, who will illustrate, by means of living specimens and lantern slides, the successful researches recently made in Egypt which have made it possible experimentally to transmit to animals the Egyptian bilharziosis.

Mrs. Laidlay, widow of the late artist, W. J. Laidlay, is exhibiting many of the smaller of his paintings at 50, Circus Road, St. John's Wood, with a view to their disposal in aid of the Red Cross Fund. Most of the paintings are of the East, and include "A Corn Boat on the Nile," which is a characteristic example of the artist's skill.

Reuter's Paris correspondent telegraphed on Saturday: M. Deville, the French Minister at Athens, has, at his own request, been relieved of his post. M. Guillemin, Minister Plenipotentiary and French delegate on the Danube Commission, has been appointed Minister in Athens. M. Legrand, Minister Plenipotentiary, has been appointed French delegate on the Danube Commission.

Mr. L. E. Barrington-Ward, F.R.C.S., on his return from Serbia, has been appointed visiting surgeon to the King George Hospital.

The death took place on Wednesday at his residence in Portland Place of Count Otto Stenbock, G.C.V.O., at one time

Digitized by Google

Councillor of the Swedish Legation in London, and has been Swedish Minister at Lisbon and Constantinople. Count Stenbock, who was 77 years of age, was married to a daughter of the first Baron de Reuter.

Lord Cromer's brother, Mr. Walter Baring, who used to be Britain's Minister in Uruguay, left £47,727.

Mark Axe, a Crimean veteran, of Montacute, Somerset, formerly in the Black Watch, who is eighty years of age, is now acting as recruiting officer for the Somerset Light Infantry. Besides the medal with clasps for the Alma, Balaclava, Sevastopol, and the Turkish medal, he has the Mutiny medal carrying the bar for Lucknow.

Our Bucharest Correspondent writes, under date of July 3:—

M. Psychas, the Greek Minister at Bucharest, accompanied by his military attaché, paid a visit at the beginning of the week to the Greek Colony at Braila, and then made an excursion into the Delta of the Danube.

Her Highness Princess Vera Ypsilanti has passed through Bucharest en route for Petrograd from Athens.

King Ferdinand has conferred on General C. Barozzi, one of his aides-de-camp, the First Class of the Order of the Resplata Muncei (Labour Recognition) on his completing the fortieth year as Vice-President of the Royal Geographical Society of Roumania.

M. Derussy, Roumanian Minister to the Bulgarian Court, who has been in Bucharest for a few days on private matters, returned to his post yesterday.

Princes Troubetzkoi, wife of the Russian Minister at Belgrade—or at Nish, as one must say at present—has passed through Bucharest on her way to Serbia.

Baron von Wangenheim, the late German Ambassador in Constantinople, arrived in Sofia on Saturday. He had a conference with the Prime Minister, M. Radoslavoff, and an audience of the King while in the Bulgarian capital, and left for Bucharest on Sunday.

APPOINTMENTS, PROMOTIONS, etc.

The appointment of Hakki Pasha as Turkish Ambassador at Berlin has been confirmed.

The Egyptian papers announce that his Highness the Sultan has been pleased to approve of the following promotions:—El Kaimakam (temporary Miralai) A. W. Jennings-Bramly Bey, Governor and Commandant Sinai Peninsula, to be Miralai; El Bimbashi (temporary Kaimakam) S. S. Butler, Sudan Government, to be Kaimakam.

Captain William McConaghy, M.B., Royal Army Medical Corps, has been taken on the strength of the Egyptian Army with the rank of Bimbashi, and posted to the Medical Corps.

Dr. Cyril H. Goodman has been appointed Assistant Director-General of the Public Health Department, Egyptian Government.

Mr. Frank Cole Madden, M.D., F.R.C.S., has been appointed operating surgeon to the British Forces in Egypt and attached for duty to a military hospital in Cairo.

Captain Wilfred F. L. Bright, Army Veterinary Corps, has been taken on the strength of the Egyptian Army with the rank of Bimbashi and posted to the Sudan Government.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

DEATH.

CAMPBELL.—On July 10, at the Anglo-American Hospital, Cairo, Charles Orr Campbell, M.Inst.C.E., Egyptian State Railways, of typhoid fever. Aged forty-two years.

DARDANELLES DISTINCTIONS.

A further list of awards for distinguished service in the field was issued last Saturday. From it we take the following items:—

VICTORIA CROSS.

Second Lieutenant George Raymond Dallas Moor, 3rd Battalion The Hampshire Regiment.

For most conspicuous bravery and resource on June 5, 1915, during operations south of Krithia, Dardanelles. When a detachment of a battalion on his left, which had lost all its officers, was rapidly retiring before a heavy Turkish attack, Second Lieutenant Moor, immediately grasping the danger to the remainder of the line, dashed back some 200 yards, stemmed the retirement, led back the men, and recaptured the lost trench. This young officer, who only joined the Army in October, 1914, by his personal bravery and presence of mind saved a dangerous situation.

No. 465 Lance-Corporal Albert Jacka, 14th Battalion Australian Imperial Forces.

For most conspicuous bravery on the night of May 19-20, 1915, at "Courteney's Post," Gallipoli Peninsula. Lance-Corporal Jacka, while holding a portion of our trench with four other men, was heavily attacked. When all except himself were killed or wounded, the trench was rushed and occupied by seven Turks. Lance-Corporal Jacka at once most gallantly attacked them single-handed, and killed the whole party, five by rifle fire and two with the bayonet.

D.S.O.

To be Companion of the Distinguished Service Order.

Lieutenant-Colonel James Thomas Rankine Wilson, 1st/5th Battalion the Royal Scots (Lothian Regiment) (Queen's Edinburgh Rifles), Territorial Force.

For conspicuous ability and resource on June 19, 1915, during operations in the neighbourhood of Krithia, Dardanelles, where he reorganised and carried out the recapture of a Turkish trench from which the troops of another division had been forced back. The success gained was due to Lieutenant-Colonel Wilson's skilful and bold leading and his prompt assumption of responsibility.

THE MILITARY CROSS.

Lieutenant Oscar Taunton, 1st East Lancashire Field Company, Royal Engineers, Territorial Force.

For conspicuous gallantry on June 4, 1915, during operations south of Krithia, Dardanelles, when he held back the enemy from advancing along a trench on the left flank, which was much exposed. By means of bombs and hand grenades he personally held his position for over two hours. He picked up several of the enemy's bombs and threw them back before they exploded.

Second Lieutenant Francis Arthur Sutton, Royal Engineers.

For conspicuous gallantry during operations west of Krithia, Dardanelles, on May 22, 1915, when attached to the Royal Inniskilling Fusiliers. During a counter-attack, which he led, he picked up and threw back into the enemy's trenches, at great personal risk, a number of bombs, thereby probably saving many lives. He threw six bombs, and the seventh exploded in his hand.

Second Lieutenant Thomas Wallace, 3rd Battalion the Border Regiment.

For conspicuous gallantry on the night of June 10-11, during operations S.W. of Krithia, Dardanelles, when he volunteered to lead a party to clear the enemy out of a trench in which they were constructing a sap. He advanced under a heavy fire, and rushed the trench at the head of his men, bayoneting some and driving the remainder away. He afterwards led his own men down a communication trench, showing great coolness, and remained there until the enemy evacuated it. The success of this enterprise was mainly due to his personal bravery and gallant leading.

WHERE TO STAY.

UPPER EGYPT.

Luxor.

The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.

The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.

Are the Finest on the Nile.

FRIDAY, JULY 30, 1915.

BULGARIA AND TURKEY.

According to the well-informed correspondent of *The Times* in the Balkan Peninsula, a convention ceding to Bulgaria the Turkish portion of the Dedeagatch Railway was signed in Constantinople on July 22. By the terms of this agreement Bulgaria is said to have obtained the whole extent of the line traversing Turkish territory, together with the stations Karagatch, Demotika, and Kuleli Burgas. The Bulgarian frontier is to coincide with the course of the Maritza, all territory to the west of that river becoming Bulgarian. Although this convention is said to have been signed last week, no confirmation of the fact has been received, and it is noticeable that in spite of its optimistic forecasts of a satisfactory issue to the negotiations between Bulgaria and Turkey, the German Press declared up to a few days ago that no agreement had been reached. It is unlikely, however, that *The Times* correspondent has been misinformed. The negotiations between the Bulgarian Government and the Porte had been in progress for some months, and it will be remembered that last week we cited the Bulgarian order stopping all railway traffic with Turkey as an indication that a crucial stage had been reached in the relations between the two countries. Such action on the part of Bulgaria left Turkey the choice between acquiescing in the Bulgarian demands and a declaration of war. For the Turks look to the Bulgarian railways to forward them not only munitions of war but also some of the necessaries of life. To be cut off from all communication with the Central Powers would render any further resistance at the Dardanelles practically useless. Confronted with this dilemma, Turkey has made up her mind very rapidly. She has not only abandoned an untenable attitude in regard to the management of the Dedeagatch Railway, but she has surrendered without an armed struggle the portion of territory west of the Maritza secured to her by the Treaty of Constantinople. Bulgaria had been granted certain rights in regard to her traffic over the portion of the line running through Turkish territory. Even before war broke out between Turkey and the Entente Powers the Turkish authorities had contrived to encroach upon Bulgaria's rights; but under the exigencies of military requirements technical violations gave place to forcible interference with Bulgarian traffic and to the commandeering of Bulgarian rolling stock.

With the announcement of the concession it is insisted that the agreement with Turkey implies no engagement whatever of a political character on the part of either country; that Bulgaria neither binds herself to remain neutral nor to permit the passage of contraband of war to Turkey. The same claim was made when the Bulgarian Government at the beginning of the year obtained advances from German and Austrian banks. The loan convention, it was stated, carried no political obligations with it; but the fact remains that Bulgaria since that time has continued to observe a neutrality which favours the Germanic Powers alone, even if the Bulgarian authorities have not actually connived at the transport of contraband of war to Turkey. For Bulgarian neutrality has not been, as far as the Triple Entente was concerned, of a sufficiently benevolent character to satisfy Roumania that she would be safe from all complications on her southern frontiers, if she engaged in military operations in the north. Bulgarian neutrality, therefore, has demobilised Roumania without imposing any proportionate embarrassment on the Germanic Powers. It may be that a similar state of affairs will repeat itself as a result of the new agreement with Turkey. Bulgaria may have avoided any treaty commitments, but the result of the negotiations will hardly allow either party to the contract to contemplate the possibility of an immediate rupture of diplomatic relations. On the other hand, the Bulgarian disavowal, taken in conjunction with the fact that negotiations are actually in progress with the Entente Powers, asks us to believe that Bulgaria is perfectly ready to attack Turkey to-morrow, if she could have her aspirations satisfied by the Allies. If this be the case, we must suppose that the negotiations which have been taking place in Constantinople were by no means as amicable as the German Press represented them, but that Bulgaria threatened Turkey with an immediate declaration of war, if her demands were not satisfied. The Turkish surrender, which was virtually forced upon the Porte by its German allies, would thus be eloquent of the position in which it finds itself as a result of the operations at the Dardanelles. Bulgaria, at the same time, will not have exposed herself to the charge of double-dealing. She will merely have taken advantage of Turkey's predicament to redress certain malpractices of the latter in connection with Bulgarian rights on the Dedeagatch railway. Her action would have to be viewed in a very different light, if she had accepted the surrender, let us say, of territory up to the Enos-Midia line as a possible settlement of her claims against Turkey, while simultaneously carrying on negotiations with the Triple Entente, having Bulgarian co-operation in the war as a possible objective.

For the present Bulgaria must have the full benefit of the doubt. We can accept her assurances that the convention with Turkey carries no political obligations with it, and that she is free to carry on *pourparlers* with the Triple Entente in regard to her attitude towards the war. It is understood that the Bulgarian Government is now awaiting a reply to its last Note, in which it informed the Allied Powers of the terms on which it was prepared to abandon neutrality. Thus the Balkan situation has not yet made any actual advance beyond the stage which it might be said to have occupied at any time since the outbreak of the European war. Bulgaria's terms for abandoning neutrality have been well known, even though the Allied Governments may not have received official notification of them. They affect, unfortunately, Serbia, Greece, and Roumania as well as Turkey, and until the Entente Powers have brought the first three States into line, Bulgaria will have little inducement to change her attitude. The illness of King Constantine, together with the political paralysis of the country brought about by the maintenance in power of a Government which has not a majority of the Chamber or the electorate behind it, prevents any headway being made in regard to the unwillingness of Greece to consider concessions to Bulgaria. But the determining factor, it has to be admitted, is now the forcing of the Dardanelles, coupled with the general military situation in Europe. Until the Balkan Governments are confronted with the elimination of Turkey and some definite success for the Allied arms, they can one and all shield themselves behind their military advisers, who have in nearly every instance received their military training in Germany. Their information comes from German sources, and they regard the course of the military operations in the light in which the German official reports affect to regard it. In these circumstances the Balkan Governments find abundant justification for adhering to a neutral attitude. They do not believe in burning their fingers from altruistic motives, and they are not unnaturally anxious that they should gain the maximum results with the minimum effort. The Turkish concessions to Bulgaria cannot fail to have cleared the ground to some extent for the Entente Governments. If they are satisfied with the assurances of the Bulgarian Government, they will know that it has not shrunk from using the Dardanelles operations as a lever against Turkey; if, on the other hand, they are *not satisfied*, they will have no excuse for continuing their negotiations at Sofia on lines that are foredoomed to failure.

THE KHEDIVIAL WAKFS SCANDALS.—IV.

(By Our Cairo Correspondent.)

Whether the complications and obligations in which the purchase of the two houses mentioned in the preceding article had involved them had disquietened all concerned, and had impelled them to seek some relief from their embarrassments, or whether one and all had become indifferent to all considerations, and were obsessed with the idea of bleeding the Daira to the fullest extent, it is impossible to say. The fact remains, however, that, whilst the trustee was still conspiring with the vendor of the two houses to obtain funds on the strength of certificates delivered in the name of the Daira, he had already commenced negotiations for another deal that was destined further to aggravate the financial position of the Daira.

A petition to the Meglis informed it that two agricultural companies were ready to effect an exchange, which was recommended because the two houses, which had been considered such an acquisition when their purchase was first proposed, were urban property, possession of which was always risky, whereas the property offered in exchange was agricultural land, completely reclaimed and fit for cultivation, which was always a more permanently remunerative investment! Needless to say, the deal was not a pure exchange; as is usual in such cases, there was a difference to be paid. And, also needless to say, it was not the society's property that was the lesser in value, and that, as usual, the Daira was called upon to pay out.

The combination was quite an ingenious one. The Meglis was informed that the societies agreed to value the two houses at £E180,000—be it noted that this was £E20,000 more than the exorbitant price already paid, in itself a sufficiently suspicious feature—and to reimburse the two banks for the amount of their mortgages—viz., £E95,000, plus interest, the net sum to be credited to the Daira being £E85,000. In exchange the Daira was to receive two estates of 4,200 feddans, valued by an expert at £E95 per feddan, but which the societies magnanimously deigned to cede at £E93 per feddan, or in all £E396,000, including machinery, etc., valued at £E33,000. The Daira was to pay the balance of the money—i.e., £E311,000—in six instalments, without interest, and was at once to enter into possession of the estates, which were declared to be returning an annual rental of £E27,000. In due course the Meglis signified its approval of the proposed exchange on the conditions mentioned, merely insisting that before completing the purchase the trustee should make sure that the land was unencumbered.

The parties proceeded to draw up the deed of sale. But, again, as in the case of the first purchase, it contained various serious divergencies from the conditions approved by the Meglis. Thus the Daira had to undertake certain works of improvement which were necessary to the whole scheme of which the estates formed a part; this indicated that the land was only in process of reclamation. Next it was stipulated that the banks' mortgages of £E95,000 were to be paid by the Daira and not by the societies, who would credit the Daira with the full value of the houses—viz., £E180,000. This was a subterfuge to put on the shoulders of the Daira the payment of the interest and to relieve the societies from the responsibility of meeting the mortgage instalments in hard cash when they fell due. Machinery valued only at £E17,000 was to be handed over to the Daira, which would only receive the revenues in proportion as it had paid the price; on the other hand, the rents of the two houses were to accrue at once to the societies. Moreover, it was declared that the estates bore a lien of £E260,000, plus interest, in favour of the debenture-holders, and that the societies undertook to liberate them of the sum actually due on them—£E93,000—before the two last instalments had been paid, and to obtain the debenture-holders' acceptance of the arrangement at once. Further, although no certificates of freedom from encumbrances had been produced, three bills for £E86,000, representing the two first and part of the third instalments, were handed to the societies, and it was laid down that all the fees, amounting to £E8,000, should be borne by the Daira.

It would have been bad enough if, under these circumstances, the Daira had been able to obtain clear possession of the property and if all the certificates stipulated for had been produced and found satisfactory. To this day, however, no acceptance from the trustees of the debenture-holders has been obtained, and the Daira has not been able to obtain possession, as the societies refuse to allow the survey preliminary to handing over, and the Government, it appears, claims part of the area. As matters stand, the Daira has already paid £E18,000 in cash, and has given £E86,000 in bills to the vendors, and it has assumed all the liabilities in connection with both the Alexandria properties and the agricultural estates. The effect of this second deal has merely been to double the net loss to the Daira. It has, in fact, spent, or will be called upon to spend, in connection with the two deals £E600,000, and all it has to show for the money are two estates valued by the new trustee—Mohammed Pasha Said, the late Premier, than whom no better man could have been chosen for the task—at £E200,000—just half that put on them in the exchange deed—and which have turned out to be far from remunerative, seeing that between November, 1913, and July, 1914, they were worked at a dead loss. The whole business has been shameful from start to finish, and the contract with the societies is so obviously irregular and unjust that the new trustee has not hesitated to take action for the cancellation of the exchange, for the refund by the societies of all moneys expended by the Daira, and for the payment of damages.

The incidents related in the foregoing articles throw lurid light on the manner in which the management of Wakfs property and that belonging to minors and interdicted persons has been conducted in the past. The instances quoted are admittedly few in number, but they are typical of the discreditable motives that actuated those who controlled, directly or indirectly, these matters.

It is, of course, natural that all those implicated should try to throw off responsibility by imputing the blame for the irregularities and the origin of the deals to Abbas Hilmi Pasha, who was the supreme head, and was generally known to be dabbling with the various funds. No documentary evidence is to be found to prove that the instructions were ever given by his Highness. Nevertheless, in face of the facts, it is quite impossible to give the absentee the usual benefit of the doubt. Everyone, including those who have no interest whatsoever to lie, agrees that he never gave his orders in writing, but always verbally or by telephone. Moreover, many substantial sums have been traced to have been utilised on his behalf; the placing of the funds at interest was done with his cognizance, and he would never have permitted the withdrawal of the interest and of the administrative expenses, which were his peculiar perquisite, had he not been closely interested in the operations on the Wakfs funds that they were intended to cover up. Many things may, it is true, have gone on, and many thefts may have taken place, without his being aware of them, but the sale of his Ragdia and Sabarbay estates to the "Aukaf," the transactions of the Daira Khassa, and the land deals of the Seif-ed-Dine Daira were all matters of his cognizance, of which absolute proof exists.

But while there is no doubt in anyone's mind that Abbas Hilmi Pasha was at the bottom of all this scandalous work, that does not excuse those who are to-day being held to account. Their plea that they were subservient to the will of his Highness—that, as one put it, "to question his orders or to ask for them in writing would have been an act of discourtesy and of disloyalty"—cannot exculpate them. With but one exception, they were all men who had held high posts in the past, who, therefore, should have known the very grave nature of their actions, and who, since they drew good pensions from the Government, could have afforded to resign if called upon to execute orders that they knew to be illegal or for which they, as the executive head of their respective administrations, did not wish to be responsible.

THE "S.P.C.," BEYROUT.

The 48th annual report of the Syrian Protestant College (Beyrout) tells the story of much good work done and progress achieved. Among other things, it chronicles "the completion and occupation of three new buildings for the use of the Preparatory Department; the completion and occupation of West Hall, the home of the College Young Men's Christian Association; the purchase of two desirable pieces of land . . . an addition to the plant of the institution unparalleled in any single year of its previous history," and refers to "the magnificent gift from the Jesup Estate, constituting a sum in excess of any amount heretofore received at any one time by the institution." These are points on which the College is to be warmly congratulated. On the other hand, the resignation of his professorship by Dr. Porter Harvey is a loss which the College has to deplore; though, happily, he remains an active member of the Faculty.

All departments of the College have been busy, the School of Medicine especially so. In this particular school, we read: "Good work is being done, with the standards higher than ever. . . . But we are not satisfied. Already there is very great pressure for more time. The five years' course recommended last year by the Faculty to the Board of Trustees must eventually come in one form or another. The measure of ability of the College to be a civilising, up-lifting power in the Near East is to a very large extent determined by the kind of doctors we send out. We ought not to send out men who are inadequately trained. The call for a five years' course, the call for a new laboratory, the call for two or more professors, are based upon the conviction that an adequate training demands enlargement in these three directions." The Schools of Pharmacy and Dentistry and the Nurses' Training School continue to train men and women whose services prove of great value throughout the Near East.

A postscript to the report, written on October 29, 1914, states:—"At this date 680 students have entered the different departments of the College as over against 933 last year at this time. The total enrolment last year was 961."

TANGIER TO TEHERAN.

So, after all, M. Ghenadieff has not been arrested, there was never any intention of his being arrested, and he "is not even under observation." No wonder the semi-official Bulgarian News Agency characterises the reports and rumours that have been set afloat regarding him as "fantastic." To me at least, the whole business has the appearance of having been engineered by our friend the enemy, who, realising that M. Ghenadieff is a power to reckon with in Bulgaria, and that the weight of his influence is not going to be thrown into the scale on the side of the Turco-Teutonic alliance, has been indulging in much mud-slinging. The attention bestowed upon him by the German Press shows how glad the Germans would be to believe the most "fantastic" of the stories set about regarding his arrest and his suicide. It is a case of the wish being father to the thought. But let us hope that the wish will not be gratified, and that M. Ghenadieff may long live to laugh at the Huns.

***

I have never met M. Ghenadieff, but friends who have done so unite in describing him as a gifted orator and a particularly able man, very unlikely to fall into any snare set for him by the German agents. He is of quite a different calibre from the Enver and Talaats. A Macedonian by birth, he is a Stambulovist by conviction. For years he was Petkoff's right-hand man, and he was with the Premier when the latter was assassinated, being in fact, fired at himself, and wounded in the arm. Afterwards, at Petkoff's funeral, he delivered a very fine oration on his chief, in the Cathedral.

***

The more I learn about the present state of Roumania the more sorry do I feel for the inhabitants of that beautiful country, who are suffering from a plague of Germans almost as badly as the Egyptians must have suffered from the plague of flies and the plague of lice.—Apologies to both insects for instituting any comparison between them and the Huns!—One French lady in Bucharest, writing to a friend in this country, says:—"Je connais une dame qui a dû quitter l'Hotel —, tant elle etait irritée d'entendre parler l'Allemand du matin au soir," and other letters tell the same tale. In fact, Bucharest, which has always plumed itself on being a Paris in miniature, appears to be in some danger of becoming a kind of Berlin.

***

The German visitors are, of course, as active as can be in the interests of the Vaterland, and are spending money very freely. But they do not find every one ready to sell his soul for a price. For some reason they approached one lady with a proposal that she should purchase for them all the old copper she could; and so liberal were their terms that she stood to make a profit of £4,000 on every truck-load she secured. She, however, drew their attention to the tri-colour ribbon she was wearing, and informed them, with quiet contempt, that she would not supply metal to kill her own people. "Whereupon" (says the correspondent who sends me the story, which is a true one) "they were greatly surprised; for, as you know, there is a class here that does not understand such a sentiment."

***

Yet another correspondent, a lady whose position lends considerable weight to what she writes, says:—"All would go well for us if there were fewer German Jews here. It is all a network of intrigue and bribery . . . —— is working hard to keep Roumania from joining the Entente; and my husband, who is becoming bitterly anti-Semitic these days, fears the Jews are going to win. Of course, the feeling of the people is heartily on our side."

***

Pasted across the flap of the envelope of a letter received from Italy this week I found a neatly printed label, with the inscription:—

Italiani! non parlate di notizie militari. Guardatevi dalle spie e denunziate ogni individuo sospetto.

This, I take it, means "Italians! do not speak about military matters. Be on your guard against spies, and denounce all suspicious individuals." Both the sentiment and the idea of the label strike me as quite good, and I should not be sorry to see something of the kind put on the market in this country. Not that anybody who really knows anything worth mentioning about military matters is likely (I hope) to "blab" about them. But one does get somewhat weary of the amateur strategists and of the superior persons who know just what our generals *ought* to do. And perhaps if we were heartened up a bit by English versions of this Italian label we might pluck up courage and —denounce these bores as "suspected persons." Most of them ought certainly to be shut up.

***

The capture of Suk-es-Sheyukh by our forces has apparently caused a good deal of bother to conscientious sub-editors who have tried to get the "proper" spelling of the name; for I have seen at least half-a-dozen different renderings of it; though that of the official communiqué is certainly the most satisfactory. The place is hardly worth so much trouble, being a very ordinary little village, like scores of others in the district, with mud-built houses and reed hovels, and little else besides. Its name, which is pronounced by the local Arabs "Sook esh-Shay'ookh," means "The market place of the Sheikhs." Nasriyeh is—or was when I knew the district—a more important place, but even so its chief interest lies in the fact that it is the nearest inhabited spot to Tel Mugheir, the ruin mound that marks the site of Ur.

***

In the *Daily Telegraph* I read lately of scores of starving, homeless cats having been adopted by a kindly Turk, and being nourished and housed at his expense. The case of their former owners must have been hard indeed to lead them to the abandonment of their favourites, because the Turks' regard for animal life is notorious throughout the world. But in looking back upon days spent in the Orient it is a curious thing that nowhere can I find any dominant recollection of cats, whereas every incident of daily life seems in some manner or other to be associated with dogs. A few stray and haunted-looking cats I remember, but they were gaunt members of their race, and seemingly had no part in the scheme of things as they are. And yet of all creatures one would imagine that the cat would command most reverence in the Orient, or, at least, in Egypt, where once they were sufficiently important to merit mummification.

***

At first sight it might almost seem as if the Egyptian had lost one of the chief characteristics of his ancient superstition, but personally I am inclined to think that this is very far from being the case. The cat is everywhere recognized as possessing a special gift of psychic vision, and is accredited also with an indiscriminate love of spiritual manifestation, good or evil; and to its perspicacity in these matters may, I think, be traced the disinclination of the average Egyptian to harbour it in his homestead to-day. It is one thing to be merely inwardly conscious of the presence of spiritual beings at one's side; it is quite another to be constantly reminded of them by the action of a material animal which, with arched back, rubs against the legs of an invisible presence, or with bristling hair and dilated eyes backs towards you spitting angrily into the empty air. And so, acting upon the principle that "where ignorance is bliss 'tis folly to be wise," the Egyptian has shown his distaste of this spiritual barometer by persistently refusing to encourage it as a household companion.

***

But the dog is the friend of man, and has no dealings with lurking beings of the underworld. And, therefore, everywhere in the Orient his kind have increased and multiplied until at last his numbers were almost as great a source of embarrassment to the Turks as rabbits to the Australians. Their name is legion. Any visitor to Turkey, Arabia, Egypt, or Persia will remember the packs of lean, hungry pariahs which scour the refuge heaps of the cities in search of food. Although the majority of them belong to no man, and are a nuisance to the entire community, they are safe from death at the hands of the natives, for to spill their blood would be to court disaster.

***

In many country towns of England the shops are now closing for a full hour or more at mid-day; shortage of labour is responsible for this change, but during the hot season through which we passed some time ago one might almost have imagined oneself in the East, so sun-struck and silent were the empty streets at noon. By the time that this war is over it is possible that midday closing will have become a habit so congenial that we will not seek to throw it off, and England, like Egypt, will pause to rest when the sun is at its height in the broad days of summer. We are not usually supposed to be an adaptive people, but in the exigencies of existing circumstances we seem to be accepting the many changes so suddenly thrust upon us with an almost Oriental passivity. The Germans are making a boast of their superiority, and say that we are only now learning what is already natural to them; they point to our campaign of thrift as evidence of a canker of fear. But the more terrible thing is the fear of being thought afraid, and, thank Heaven, we have none of that. If we have come unprepared upon the hard necessities of war-time, it is not because of weakness, but because of the strength that is in us. It is the small things that count, and while we cheerfully put up with the inconvenience of closed shops at mid-day, and accept other pin-pricks of fortune in the spirit that made heroes of our Indian soldiers in the frozen trenches last winter, we may rest assured that all is well with England. It is not in the Englishman's character to sit down and say Kismet until he has fashioned circumstances to his own liking, but a leaven of Oriental patience will do us no harm for all that.

CORSAIR.

THE PRESS ON THE NEAR EAST.

Bulgaria's Deal.

In a leading article on the Turco-Bulgarian deal over the territory traversed by the Dedeagatch Railway, the *Daily Chronicle* (July 27) remarks that "in the light of Bulgaria's previous German war policy we cannot feel unconcerned." On the other hand it is recognised that, taken by itself, the deal may have no great political importance.

The terms imposed by Turkey on Bulgaria by the Treaty of Constantinople, after her prostration in the second Balkan war, left Dedeagatch to the Bulgarians as their Ægean port, but by withdrawing this section of railway from them gravely hampered the port's use. . . . A fortnight ago it was announced that Bulgaria had suspended all railway traffic of every kind with the Turkish lines. This drastic step, coupled perhaps with other threats, may possibly have supplied the final motive for the Turkish concession.

Remembering that free Bulgaria was a Russian creation, while Turkey was for centuries the arch-oppressor of the Bulgar people, the *Chronicle* hesitates to believe that Bulgaria should have cemented an alliance with the latter nation, although Bulgarian policy is admittedly "obscure and 'materialistic.'" The article concludes with a reference to the actual benefits that may accrue to the Allies as the result of the change of territory.

It will facilitate sea export of Bulgaria's surplus wheat crop, and perhaps that of Roumania's, too. This is important, not only because it will increase our wheat supply, but it will diminish that of Austria and Germany and save Bulgaria and Roumania from depending on those countries for markets. In lands where agriculture is almost the sole source of the national wealth, such a consideration may have considerable influence in shaping the ultimate course of foreign policy.

The Euphrates Success.

The *Birmingham Daily Post* (July 27) devoted a leading article to our recent successes on the Euphrates, and includes an interesting *resumé* of the campaign up to its present stage. The article continues:—

It is clear that the operations have been conducted with great ability. It is equally clear that great demands are being made on our troops. The force engaged is, we believe, largely Indian. Two British Regular regiments have figured in the casualties, and one communiqué has mentioned good work by a Territorial battery. But whether the troops are British or Indian, they have had a most arduous task. The temperature is round about 113 degrees in the shade; the flanking movements have involved hard work in swamps and marshes; the frontal attacks have usually been across plains devoid of cover from fire or shade from the sun. The enemy, finally, has fought with great tenacity. Even with our imperfect knowledge of what has happened, it is easy to see that this campaign will, for good management and good fighting, rank very high in the list of the campaigns on the edges of the Empire. And it would be sheer ingratitude for the public to forget or neglect the men who, from no wish of their own, are occupied on the outskirts rather than in the centre of a world-war. After all, most of our Empire has been won by similarly "small" campaigns.

Italy and Turkey.

In a dispatch devoted to the consideration of feeling in Italy after two months of war, the Rome correspondent of the *Morning Post* (July 27) expresses the opinion which we quote below regarding the chances of war between Italy and Turkey:—

As for Turkey, I am informed on very good authority that opinions were divided about the desirability of sending an Italian contingent to the Dardanelles. The King, General Cadorna, and the military authorities generally, as well as Baron Sidney Sonnino, the Minister for Foreign Affairs, were opposed to the idea, believing that Italy's true policy was to concentrate all her available forces against Austria. The Foreign Office, however, for political and diplomatic reasons, desired the appearance of Italy at the Dardanelles, in order to "peg out claims" in Turkey. The Foreign Minister and the Foreign Office, be it observed, bear much the same relation to one another that the Pope does to the Vatican. They may be, but are not always, of the same opinion in politics. While, therefore, Italy will scarcely go to the Dardanelles, she may attack Turkey, if the latter continues to stir up the natives against her in Libya, where the situation is described as not roseate.

Germany and Roumania.

According to the *Westminster Gazette* (July 23) the German papers show an increasing anxiety about the attitude of Roumania. The *Frankfurter Zeitung*, which is particularly well informed about the Balkans, wrote as follows in a recent issue:—

And now the critical moment may arrive, and perhaps it is not far distant, when a balancing of interests will no longer remain possible, and this will decide whether the German point of view is shared by Roumania, and whether Bucharest is inclined to draw the necessary consequences. So far as we know, Germany attaches less importance to the military co-operation of Roumania. The decisive factor is how far Roumania wishes a share in the results of this war. For Germany, the most important point is that Roumania should accept that interpretation of neutrality which rules among our enemies and among neutrals of the first importance—namely, the United States and Sweden—that is to say, that she should allow the transport of munitions and arms to take place over her territory without any difficulties. . . . We are confident that Roumania will come to the conclusion that fits in with her interests.

The Greek Parliament.

A recent number of *Truth* regards the decree postponing the opening of the Greek Parliament on the ground that the King's health will not allow him to receive M. Venizelos as a "mendacious subterfuge," discreditable to all concerned.

If the King can receive M. Gounaris, he can receive M. Venizélos. The King's unconstitutional action has brought M. Venizélos back to the place which he ought never to have left as leader of the Liberal party in Greece, and it now remains for the people, who voted him into power, to see that he gets it, and that the puppet placemen who have usurped office during the past five months are sent to the right-about.

Balkan Neutrals.

The *Nation* (July 24) in its notes on the Balkan situation remarks that the position is extremely critical, but thinks that the Balkan drama is fast moving to its climax. It concludes:—

All the Balkan States, in short, are up for action, and it is the more flexible and determined diplomacy which will secure them.

Bulgaria and Serbia.

The correspondent of the *Morning Post* (July 26), writing from Budapesth on the 18th, announces that the rumours of a meeting between the Kings of Roumania, Bulgaria, and Greece are still insistent in Sofia, and that it is now said that the Serbian Prime Minister is also to take part in the conference. As such a meeting would mean a *rapprochement* between the Balkan States, it is naturally regarded with great anxiety. In the following paragraph reference is made to the unfortunate attitude of the Military party:—

Private advices from Sofia also state that the negotiations between Serbia and Bulgaria are proceeding very satisfactorily, for both Governments are showing a spirit of compromise on the question of Macedonia, and only the military party of Serbia, under the influence of Prince Alexander, is still hesitating, though M. Pashitch and M. Radoslavoff are in agreement in principle already. According to this agreement a certain section of Macedonia, on the Serbian-Greek frontier, would remain in the possession of Serbia. Political circles and the Press are again very uneasy as to the Balkan situation, and great attention is being paid to the Balkan diplomatic movements.

The Case of Bulgaria.

In a leading article entitled "The Rebuff in the Balkans," the *Evening Standard* (July 26) deals with the recent Turkish concession to Bulgaria. After a review of the various reasons which make the possession of the ceded territory essential to Bulgarian aim, the article continues:—

That Bulgaria has committed herself to a definite pledge of neutrality we do not believe. The strip of land across the Maritza is only one of the territorial acquisitions at which she aims, and it is clear from her previous declarations of policy that she is prepared to go to war with Turkey as the price for the recovery of regions at present in the possession of Roumania, Serbia, and Greece. On the other hand, it is equally clear that with the Dedeagatch railway in her possession she is able to put up her terms with regard to her share of disposable territory in Thrace. In a word, the transaction has strengthened her position vis-à-vis the Entente, while her neighbours may well feel that she has again become a potential adversary and must be conciliated. That she has definitely decided to take the Austro-German side is, in our view, most improbable in spite of the recent visits of her emissaries to Berlin.

Articles to Note.

"L'Istruzione Pubblica in Egitto," by Aurelio Stoppoloni, in *La Vita Italiana* (July 15).

"The Military and Naval Strength of Peace." By H. Charles Woods, in the *Field* (July 24).

"The Levant Company in Smyrna," by Geo. Jeffery, F.S.A., in *Notes and Queries* (July 24).

"Will They Cross the Balkans?" Dispatch from G. Renwick, in the *Daily Chronicle* (July 29).

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

I read in the *Mercantile Guardian* that the British Engineers' Association seems to have been "none too fortunate in the impressions created in China." The reason, according to the same source, is that "something has been heard from China of the alienation of Chinese sympathies by the too open attempts to force British goods upon the Chinese." I hope that there is no truth in the—to call it by a mild word—suspicious rumour. We talk about Germany's aggressive commercial policy, and have come to the very silly conclusion that the Huns force their goods "aggressively" on their would-be victims. In this we are wrong. There is much more of the insinuating grace, of the slimy oiliness of the eel about the German trader than there is of jaguar-like aggression. And that is why they have been successful. Which brings me, in a roundabout way, to the question of travellers.

***

My experience in the Near East has been that the British-born traveller for a British firm insists rather on the nationality of the goods he is working than on their quality. The Hun-born traveller, on the other hand, leaves nationality quite out of the question, and points out quality and favourable terms—trying to make them appear favourable even if they are not so. The "you-must-take-this-because-it's-English" argument is one that does not appeal to anybody who is not British-born. Opposed to this is the German traveller's argument: "Take it, because it is good, and you cannot get better terms elsewhere." Personally, I am of opinion that this difference in methods goes a long way to explain why so many well-known firms prefer to employ travellers who have no nationality or who successfully cast it aside like a worn-out garment when necessary.

***

But to return to the British Engineers' Association. The idea which promoted it was an excellent one (a similar organisation on a smaller and less ambitious scale was started in the Near East, but of this more anon), but from the start they were up against two immovable obstacles: lack of official backing and lack of financial backing. Not that the firms represented in the Association are not amongst the most wealthy in the country, but it is one thing to be a rich manufacturing firm, having to devote all available capital to the improvement of particular interests, and another thing is to be backed by a financial group (as German firms working abroad are by the hydra-headed Deutsche Bank), which directly obtains concessions for its affiliated groups and—incidentally only—is backed throughout the negotiations by the winning, not necessarily aggressive, ways of the Kaiser's ministerial and consular representatives. The British Engineers' Association went into the field—practically speaking, a new field—without any such powerful backing, with the unfortunate, the very unfortunate, precedent of the Crisp failure to encourage them. The dream they had was a noble one, the aim one worthy of our mettle, but the ideal and the object were bigger than the backing at their command.

***

Which brings me to the somewhat similar organisation of engineering firms in the Near East. The aims of this group were more modest, but the corresponding possibilities of realisation were greater. Offices were opened in the Balkan capitals and in Constantinople with, considering the short time between the Balkan and Europeans wars, commendable results. Local men were engaged in each of the various countries who knew what was wanted, and who, being in touch with firms able to supply the wants, were able to place orders. They did not push the "British" article, but the good article, after the manner of the 'cute German traveller. The war has, of course, knocked this (among so many other schemes) on the head, but it is to be hoped that when all is over, when the atmosphere has been cleared, the project will be re-started with renewed energy. With a little official and financial backing—financial in the sense used before—it ought to do well. What the official backing will be Heaven only knows, but this matter was commented on in last week's issue of THE NEAR EAST. It is a matter on which I feel very strongly, and, as stated, I shall analyse it again on some future occasion.

***

I have so frequently insisted on the necessity for the creation of a British commercial bank in the Balkans that no further comment is needed to explain my views. But a circumstance of more than ordinary significance has come to my notice, and I feel it incumbent on me to mention it. For the past few months no consular report from a United States consul in the Near East has been published without a serious and emphatic appeal being made for the establishment of an American commercial bank in the Near East. It is pointed out that, unless United States trade in that part of the world is to remain stationary, such a bank *must* be created. The argument applies to us also. It would be disappointing indeed if the United States consuls succeeded in doing for the American trader what our consuls have never (or rarely) attempted to do for us. The fact, however, that the demand for an American foreign commercial bank is being dinned into the ears of the United States public at a time when financiers in New York dream of turning their country from a "borrowing" into a "lending" State—i.e., into one placing its investments abroad—is significant, and should do much to open our eyes as to the future.

***

Another point emphasised by the U.S.A. consuls is the necessity for the creation of an American Mediterranean steamship service. Here, again, we are on familiar ground, as I have urged, again and again, that we should do likewise. We are in a better position to do so than the Americans, because we have the ships; it only means organization. Nevertheless, I should not be surprised to see the American line created before we decided to organize a regular service out of the material already at our disposal.

***

The opinions expressed by a correspondent in THE NEAR EAST of July 2, anent the wheat problem in Egypt, would seem to have been well justified, to judge from the contents of the latest number of the monthly return published by the Statistical and Agricultural Departments in Cairo. I understand, however, that the amount of leeway which Egypt would have to make up before attempting to export wheat is even greater than the article in question stated to be the case. In a table showing the "Production and Consumption of Wheat in Egypt," I find that the wheat imports ranged from 25 per cent. to 16 per cent. of the total consumption of the country during the last six years, that of 1915 being nearly the highest of all. Egypt has thus to grow some 200,000 tons more wheat, of a quality which will make European bread, before she can become self-supporting, much less a wheat-exporting country.

***

Another table in the same return gives the imports and exports of the principal agricultural products for the last three years, which shows that the export of beans has jumped from 4,379 and 2,345 ardebs up to 40,011 ardebs in 1915, as our correspondent foretold. Similarly, while the import of wheat has remained unchanged, that of wheat and maize flour and of maize has dropped to a fraction of the usual amount, and the export of maize has leapt up from less than 1,000 ardebs to 207,039 ardebs already.

***

The *Egyptian Gazette* to hand as we go to press announces that the Cyprus Government has accepted the Cairo Motor Company's tender for the transport of mails and the passenger service in the island, commencing from September 1 next. The journal then says:—"It appears that the late contractors were not so successful as they might have been owing to the design of their cars being unsuitable for Cyprus roads. The cars to be used in the new service will be a radical departure from those at present employed. A regular service is to be maintained between the four important towns of Nicosia, Larnaca, Limassol and Famagusta, and Larnaca has been chosen as the headquarters of the Cairo Motor Company in the island."

***

The above item of news is the first of its kind to reach us. Of course, I congratulate the Cyprus people on the maintenance of their motor-car service, but before committing myself to an analysis of the working arrangement between the Government and the Cairo Motor Company, I must know the conditions. These are, however, not public property as yet.

The Sudan Court at the Imperial Institute.

The new Sudan Court in the Exhibition Galleries of the Imperial Institute at South Kensington, contributed by the Sudan Government, is a valuable representation of the present condition and resources of the Sudan. The exhibits are provided with descriptive labels and comprise examples of every important product exported from the Sudan, and, in addition, samples of a number of products of probable importance. The court, therefore, should be of interest not only to merchants and manufacturers and others engaged in the development of the country, but to the general visitor and student of the resources of the Empire.

The most important export of the Sudan is represented by complete series of commercial grades of Hashab (Kordofan) gum sold in the British, French, and German markets. Samples of less important gums are also shown—*e.g.*, Gedaref, Talh and Chiriya (Da) gums. The exhibit is accompanied by photographs illustrating gum gardens, methods of collection, preparation for the market, and export.

The cotton-growing industry is illustrated by an extensive series of samples including the following varieties (ginned and unginned) :—Mitafifi, Abassi, Yannovitch, Nubari, Gallini, American, native and "wild" cottons. Samples of cotton-seed and cotton-seed cake are also shown. The most important oil-seed of the Sudan is sesame (sim-sim), in which there is a large export trade. Good samples are shown.

The date industry is represented by a series of samples of named varieties.

Dura, an important cereal, is illustrated by a fine series of samples, the grain in the ear being also shown. The principal varieties exhibited are Fatarita, Gassabi, Wad-el-Fahl, Safra, Hegairi, Balhag, Wad Masnad, Wad Akr, Shelsheli.

The samples of senna comprise both leaves and pods of Tripoli and Alexandrian sennas, in different commercial grades.

Samples of hippopotamus ivory are exhibited.

The important industry in hides and skins is represented by exhibits of leather and finished leather articles. The leather shown includes tanned goat and sheep skins—natural colour, dyed, glazed and unglazed. The leather articles comprise saddles, boots, shoes, water skins, and scabbards.

The exhibits referred to above illustrate the leading exports of the Sudan. Other resources of the country are represented by a large number of additional exhibits of which the following are the more important :—

Cereals.—Dukhn, wheat (Sudan, Egyptian, Indian), barley, maize (Egyptian and native varieties), rice, represented by samples both in the grain and ear.

Legumes.—Beans, peas, lablab, lentils, fenugrec.

Condiments and Spices.—Chillies, East African cardamoms, African peppers, coriander seeds.

In addition to sesame, the following oil-seeds are shown :—Castor seed (Sudan, Indian, and Java varieties), ground nuts, shea butter nuts, senna seed, sunflower seed, safflower seed.

Several tanning materials are of local importance. The more important exhibits are sant bark, pods and grains; "alimu" (bark of *Ximenia americana*), "mudus" (bark of *Parkia filicoidea*), and "abu surug" (bark of *Prosopis oblonga*).

The principal rubber exhibits are sheets and biscuits of Cerea and Landolphia rubbers respectively. Botanical specimens of rubber-producing plants are also shown.

In addition to senna, samples of "sakran" (*Hyoscyamus muticus*), a valuable source of atropin, are exhibited, together with specimens of certain native drugs.

Dum palm nuts, used as vegetable ivory, are represented by specimens in the husk, shelled, and cut in section.

A good collection of timbers illustrating the resources of the forests in the southern part of the country is available. About 30 different timbers are represented.

The Red Sea pearl shell fishery is one of long standing, and a biological investigation of the marine resources of the Red Sea littoral has been undertaken by the Government. The exhibits, accompanied by explanatory photographs, comprise a series of specimens illustrating stages in the life history of the oyster, shells below the official size-limit, typical shells, diseased and abnormal shells. Among other marine exhibits are sponges (bath and cup).

Ostrich feathers, beeswax, tamarinds, jute, teel fibre, bowstring hemp, Ushar floss, and papyrus reeds are among other products exhibited.

The following native industries are represented :—Pottery, weaving (cotton cloth), leather work, matting and basket work. A native loom is exhibited.

Photographic illustrations form a special feature of the court. A series of large framed pictures occupy the north and south walls, and some striking photographic transparencies are shown in the windows. A special fitting carries a collection of photographs, diagrams, and plans of the towns of Khartoum and Omdurman; and series of photographs illustrate the construction of the Suakin-Atbara Railway and the dredging work of the Sudan Irrigation Service respectively. Native types, customs, industries, are also represented.

A new large-scale map has recently been prepared for the Court, and statistical diagrams recording the development of the leading industries are being added. An important feature of the Court is a large model of Port Sudan, which conveys a vivid picture of the place. With the further additions now being made, the Sudan Court at the Imperial Institute will provide the finest illustration of the resources of the country which has yet been seen.

EGYPTIAN COTTON AND GERMANY.

By W. Lawrence Balls.

The statistics for exports of cotton from Egypt up to June 26, 1915, which have just been received in the monthly return of the Statistical Department, are interesting with respect to the controversy which is now raging around the question of contraband cotton.

In 1913-14 Germany imported 696,336 cantars of Egyptian cotton. In 1914-15 she nominally imported none at all, but Switzerland took 831,666 cantars in place of 249,711 in the previous year, and Italy 420,734 in place of 256,141. The excess thus obtained adds up to 746,528 cantars, which is about the normal consumption of Germany.

The Austrian consumption was normally about half that of Germany; it was 361,476 cantars in 1913-14, and this does not appear to have been made good, unless the half-million cantars which went to America, over and above the normal U.S.A. consumption, were in part re-exported.

The total export of Egyptian cotton to the enemy countries in the year before the war was just over one million cantars, out of a total of seven millions. It seems a pity that the export to neutral countries during the war could not have been limited by the authorities in Egypt before three-quarters of this amount, at least, had got through to the enemy, considering the importance of this kind of cotton in the making of pneumatic tyres and the wings of aeroplanes.

NEWS FROM TURKEY.

(From Our Own Correspondent.)

Athens, July 19.

The Treasury bonds to the value of £T6,583,094 to which reference was made in a previous letter are apparently being put into circulation, and the Turkish papers again congratulate the Ministry of Finance on this sound method of raising funds. They say the Turkish Treasury possesses large sums of gold, deposited partly in the Reichsbank at Berlin and partly in Vienna with the Austro-Hungarian Bank.

These notes, which are, therefore, fully covered by their equivalent in gold, offer greater security (they say) than bank notes which are only partially covered. A special article in the *Hilal* states that the funds in question have been transferred to the name of the Council of Administration of the Ottoman Public Debt, represented in Berlin by Bleichroeder, and at Vienna by the Crédit Anstalt, in virtue of which transfer the President of the Debt Council signs the following declaration on the back of the notes :—

"La contrevaleur en or de ce bon etant intégralement remise à l'administration de la Dette Publique Ottomane, celle—ci s'engage à le rembourser, en or, à Constantinople à vue et au porteur six mois après la conclusion de la paix."

Until the time comes for the bonds to be redeemed the gold will remain in the name of the Public Debt in cases sealed by this Administration, and deposited in the vaults of the Reichsbank and the Austro-Hungarian Bank.

Alexandria Prize Court.

Claims for Release of Cargo.

Three judgments were delivered by Judge Grain on May 26 in H.B.M.'s Supreme Court for Egypt, sitting at Alexandria in prize, in regard to claims for the release of cargo found on the German steamers Barenfels and Derfflinger. The following are extracts from the three judgments:—

Judgment I.

The first case was a claim by the Chartered Bank of India, Australia, and China for the release of chiffon, frilling, bridal veils, elastic belts, etc., of the value of £66 16s. 9d.

"In this matter Mr. Booth appears on behalf of the Chartered Bank of India, Australia and China and claims the release of certain goods on board the s.s. Barenfels on the ground that the ownership of these goods has passed to an admitted British firm, Messrs. Diethlem and Co., carrying on business in Colombo, Ceylon. The Procurator opposes the claim for release on the ground that the property in the goods has not passed to Messrs. Diethlem and Co. and consequently the ownership remains with the consignor, an admitted enemy firm in enemy country.

"The facts are as follows:—The goods in question were shipped on board a German ship, the s.s. Barenfels, by Messrs. E. G. Kistenmacher and Co., of Leipzig (the sellers) at Hamburg on July 9, 1914, consigned to Messrs. Geo. Diethelm and Co., of Colombo, Ceylon (the buyers), to the order of the shippers, 'documents against acceptance.' A bill of exchange for £66 16s. 9d. was drawn on Messrs. Diethelm and Co. on July 22, 1914. This draft was duly discounted with the Chartered Bank of India, Australia and China on the same date, July 22. On August 11, 1914, the bill of exchange was accepted by Messrs. Diethelm and Co., and the documents handed over. The s.s. Barenfels has already been dealt with by this Court, and an order made for 'detention and restoration after the war.' The Procurator argues that the acceptance of this draft on August 11, after the outbreak of war with Germany, comes under the Law of Trading with the Enemy, consequently the contract between Kistenmacher and Co., the German firm, and Diethelm and Co., the British firm, has never been completed and is void, and the property in the goods has never passed to the British firm, but remains in the German firm, and quotes in support of his arguments Proclamations concerning trading with the enemy of August 5, September 9, Westlake's International Law, Part II. War, Griswold and Waddington, Small and Lumpkin, Kershaw and Kelsey, Scotts' cases, the 'Hoop' E. P. C. Vol. 1, p. 104, and the 'Panariellos' and the 'Odessa' cases decided by Sir Samuel Evans in the English Prize Court. . . .

"I am satisfied beyond a doubt that the transactions in this case bring it within the Law of Trading with the Enemy. The acceptance of the draft by Messrs. Diethelm and Co. was an essential part of the commercial undertaking between the German firm, Kistenmacher and Co., and the British firm, Diethelm and Co. The German firm agrees to ship and sell the goods, and the British firm to buy and pay. The real contract is between those two firms, and therefore the acceptance is part of a commercial undertaking with the enemy, although the actual benefit to the enemy may be remote. The Chartered Bank of India are merely intermediaries who, to assist the German firm, advance money on the security of documents placed in their hands, and consequently are merely pledges whose claims under the 'Odessa' case cannot be taken into consideration. As the contract in this case was one of 'Documents against acceptance,' the property in the goods does not pass until the acceptance has taken place, and as I am of opinion that the acceptance which took place after the outbreak of war is an act of trading with the enemy and is consequently illegal and void, I hold that for the purposes of this case no acceptance has taken place, and the property in the goods still remains in the German firm and has not passed to the British firm, Diethelm and Co.

"I therefore hold that the goods in question are enemy goods, viz., the property of Messrs. E. G. Kistenmacher and Co., of Leipzig, and strike out the claim of Messrs. Diethelm and Co., and refuse the release to the Chartered Bank."

Judgment II.

The second case was a claim of Frederick H. Van Stade, New York, for the release of fifty cases of bristles of the value of £928 2s. 6d., part of the cargo of the Derfflinger.

"Mr. Booth appears on behalf of the claimant, and asks for the release of fifty cases of bristles which were on the German s.s. Derfflinger when she was seized as a prize of war. The s.s. Derfflinger has already been dealt with by this Court, and an order made against her of confiscation and delivery to the Crown. The Procurator appears, and on behalf of the Crown opposes the release, and asks for confiscation of the goods as enemy cargo.

"The facts are as follows:—On or about June 2, 1914, Fred. H. Van Stade, an American citizen of New York, bought from a German firm, Eduard Meyer and Co., of Tsingtau, China, fifty cases of Tsingtau bristles, which, on June 23, were shipped on board the s.s. Derfflinger at Tsingtau, consigned to Van Stade at New York. A bill of exchange for £928 2s. 6d. was drawn on Van Stade's account against London Joint Stock Bank, London It was accepted, July 22, and bills of lading were handed over, and the bill of exchange was paid on October 31, 1914. The contract of purchase, dated June 2, 1914, between the sellers and Van Stade, the buyers, contains the following provisions:—'Terms.—This contract is contingent upon strikes, floods, fire, pestilence, riots, war, rebellion, and other causes, beyond control. No arrival no sale. Insurance to be effected by buyers.'

"The sole point to be decided in this case is how the passing of the property is affected by the words 'no arrival no sale' in the terms of the contract. The Procurator, on behalf of the Court, argues, that these words constitute a special conditional contract, and until the conditions have been fulfilled the property in the goods does not pass; that as these goods have not arrived at New York the sale is cancelled and the property in the goods remains in the sellers, the enemy firm at Tsingtau. Mr. Booth, on behalf of Frederick Van Stade, urges that the phrase 'no arrival no sale' is merely for the protection of the seller against an action for 'non delivery' if the goods by any mischance do not arrive. And in support of this view he puts in an affidavit by the claimant in which he states that the said contract was made in the City of New York, and the said words 'no arrival no sale' have the following well accepted meaning among merchants engaged in the Chinese trade in this city; that 'if goods are shipped under the contract, the contract is to be regarded as fulfilled and the title is in the purchasers whether the goods arrive at their destination or not, so that if goods are lost after shipment, the shipper is not bound to make a new shipment,' and he attaches to his affidavit statements to the same effect from six other business firms in New York. . . .

"It appears to me that in coming to a conclusion in this case one is thrown back on the intentions of the parties to the contract. If it were not for the words 'No arrival no sale,' there would be no doubt that the property in the goods passed from Meyer and Co. (the sellers) to Van Stade (the buyers), on July 22, when the draft was accepted and the bills of lading handed over. Have these words 'No arrival no sale' affected this passing of the property? . . . There are some American cases in which the words 'No arrival no sale' appear in the contract, viz., Harrison v. Fortlage, 161 U.S. 57, and others, but they all appear to be connected with actions for 'non-delivery,' and as I am not able to read the reports, but merely find them cited in text books, I cannot get much assistance except what from the meagre details given, they do appear to support the theory of the American firms which I have before referred to, viz., that these words are used to relieve the seller on the non-arrival of goods from making another shipment of goods on the same contract.

"In this case there appears to me to be no intention whatsoever on the part of the sellers to retain in themselves the property in the goods which were comprised in the bill of lading handed over on the bill of exchange being accepted. And in using the words 'No arrival no sale,' he merely intended to protect himself from further responsibility in case of non-arrival; that is, he would not be called upon to ship another consignment. And I am of opinion that in using this phrase the seller had no intention of reserving any property in the goods. Nor, according to the facts placed before me, has the buyer in any way suggested that the property had not passed to him or that there was any intention in his mind that if the goods did not arrive he had either a right to another shipment or repayment of the money paid. Under these circumstances I find that it was the intention of the parties that the property in these goods should pass from seller to buyer on July 22 when the bill of exchange was accepted and the documents handed over, and that, in fact, it did then pass, and that therefore these goods are the property of Frederick Van Stade, an American citizen of New York, and that he is entitled to a release."

Judgment III.

The third case was a claim by the Chartered Bank of India, Australia and China for the release of earthenware, ironware, lead pencils, and lamp parts, of the value of £127 6s. 4d., part of the cargo of the s.s. Barenfels.

"The facts in this case are as follows:—The goods were shipped by Messrs. Kistenmacher and Co. from Hamburg on July 9, 1914, to Messrs. Darley, Butler and Co., a British firm at Colombo, Ceylon, on the German s.s. Barenfels. A bill of exchange for £127 6s. 4d. was drawn on Messrs. Darley, Butler and Co. on July 16, which was discounted with the Chartered Bank on July 16, accepted on August 3, and paid after the outbreak of war on August 6.

"The only difference between this case and the first is that while in the other case the contract was 'documents against acceptance,' in this case it was one of 'documents against payment.' And it is obvious that if, as I have held in that case, the acceptance after the outbreak of war was trading with the enemy, and being an illegal act, prevented the passing of the property, then payment for the purpose of acquiring the property in goods must also come under the same stigma and equally prevent the passing of the property in these goods. These goods are therefore enemy goods, the property in them being in Messrs. E. G. Kistenmacher and Co., of Leipzig, and the claim of Messrs. Darley, Butler and Co. must be struck out and release refused."

Trade Notes.

Sudan.

The *Sudan Government Gazette* of June 30 contains copy of "The Customs (Tombac Duties) Amendment Ordinance, 1915" (No. 10) of 1915), which amends the rates of duty leviable on tombac under the Customs Ordinance of 1913 on importation into the Sudan. The Ordinance states that the new duties shall apply to all tombac which is not cleared through the Customs on or before the date of the publication of the Ordinance in the *Government Gazette*, viz., June 30, 1915.

The Board of Trade have received copy of "The Customs Transit Regulations, 1915," which came into force on July 1.

Under the new regulations, goods may be conveyed in transit through the Sudan from a place of departure outside the Sudan and Egypt to a destination outside the Sudan and Egypt free from import and export duties on import into and export from the Sudan, and, as regards goods upon which royalties are collected in the Sudan, free also from royalties. Goods in transit must be exported finally from the Sudan or Egypt within six months from the date on which the transit advice note (*elm khaber*) was issued at the Customs station of entry into the Sudan or Egypt.

A certificate showing the nature of the goods for transit outwards and the marks, numbers and weights of the packages signed by the proper official of the country from which they come, and showing of what country they are the produce or manufacture, shall be presented with the declaration on the entry of the goods into the Sudan, and shall be retained by the chief Customs officer. If such certificate is not produced the chief Customs officer may refuse to accept the goods as goods in transit.

Ivory entering the Sudan from the Uganda Protectorate or the Belgian Colony of the Congo shall not be accepted as goods in transit unless it is proved by the production of official documents that export duty has been paid in respect thereof. Except as specially provided for, no ivory shall be accepted as goods in transit unless the consignor signs a certificate to the effect that no part of the consignment consists of tusks of female elephants or of tusks less than 10 lbs. in weight. Provision is also made for the import and export of goods through Egypt.

The Customs Transit Regulations of 1908 and 1910 are repealed.

The Board of Trade have received a copy of the Customs Stations on Inland Waters Regulations, 1915, which came into force on July 1. Under these regulations, which repeal the Customs Stations on Inland Waters Proclamations of 1908 and 1911, provision is made regarding manifests, and the discharge, removal, loading and examination of goods on inland waters.

The *Sudan Government Gazette* for June 30 contains a notice stating that the rates at which Customs duty will be collected on goods which cross the frontier between Abyssinia and the Sudan on the import thereof into Abyssinia, and the export thereof from Abyssinia, respectively, will be the same as are chargeable, from time to time, on the import and export respectively, on similar goods into the Sudan. The duty on the import of the natural produce of either country into the other intended for consumption there and not otherwise chargeable at a lower rate of duty, and except also tobacco and tombac, will be collected at the rate of 5 per cent. *ad valorem*.

The *Sudan Government Gazette* of June 30 contains copy of an order stating that the

Customs (Tobacco Duties) Ordinance, 1914, and the Customs Ordinance, 1915, would come into operation on the following day.

The *Sudan Government Gazette* of June 30 contains copy of the Customs Regulations, 1915, which have been issued under the Customs Ordinance, 1915. These Regulations, which came into force on July 1, relate, *inter alia*, to storage, overtime charges, porterage charges, supervision charges, as well as the miscellaneous fees for permits and certificates.

Egypt.

The *Journal Officiel* of July 1 contains a notice giving revised tariff valuations (No. 2) for use in assessing Customs duties on coal and coke imported into Egypt, with effect to September 30.

The *Journal Officiel* of July 1 contains revised tariff valuations (No. 7) for petroleum on importation into Egypt, which are to remain in force until the end of this month.

The *Journal Officiel* of July 5 contains a notice giving the tariff valuation for cinematograph films imported into Egypt.

Greece.

The Board of Trade are in receipt, through the Foreign Office, of telegraphic information from H.M. Minister at Athens to the effect that the exportation from Greece of raw and calcined magnesite was prohibited by a Royal Decree of July 7.

Bulgaria.

The Board of Trade are now in receipt, through the Foreign Office, of telegraphic information to the effect that the exportation from Bulgaria of photographic apparatus, lime, and pocket electric batteries and bulbs has been prohibited, and that the exportation and transit of the following articles is at present prohibited:—All metals and metal goods, worked brass for harness, etc., rubber goods, including indiarubber washers for bottles, wooden material for building, wooden sleepers, tanning extracts, money, blankets, preserved fish, window glass, corks, sulphur, phosphorus, and gold.

Persia.

H.M. Consul-General at Meshed reports that at present very little trade is done in Persia by means of catalogues, as the Persian trader either does not understand or mistrusts them, and prefers samples. As retail traders become more enlightened, however, catalogues will undoubtedly play a more prominent part in business, and British firms should therefore consider the advisability of preparing catalogues in both French and English for the Persian market.

LIFE IN TEHERAN.

The U.S. Consul at Teheran, writing on May 20, reports:—

"In normal times Teheran is one of the most expensive cities in the world in which to live. Coal sells for £4 per ton; apples, 16s. per bushel; cheese, 60 cents (2 cents equals 1d.) per pound; ham, 65 cents per pound: butter, 50 cents per pound. These high prices are largely caused by the lack of transportation facilities. Coal is transported to Teheran from the nearest mine (a distance of 50 miles) by donkeys. Goods imported through the Persian Gulf are transported from Mohammerah or Bushire to Teheran (a distance of 800 miles) by mules and camels, and are usually from 6 to 12 weeks in transit. Goods imported through Russia are subject to a heavy transit duty, and are transported across the mountains from Enzeli to Teheran (a distance of 250 miles) by pack animals and wagons.

"Upon the breaking out of hostilities in Europe last August importations into Persia practically ceased. Articles of foreign production have, therefore, greatly increased in price, while increases in price of articles produced locally have been slight. Among the articles of local production that have not increased in price are mutton, beef, Persian flour, chickens, eggs, and fruit. Rice, which is grown on the lowlands along the Caspian Sea, has increased in price from 5 cents to 6 cents per pound. The price of sugar has increased from 8 cents to 10 cents per pound; coffee, from 30 cents to 50 cents per pound; tea, from 48 cents to 80 cents per pound; European flour, from 7 cents to 12 cents per pound.

Near East Markets.

ROUMANIA'S NEW CROP.

(From Our Own Correspondent.)

Bucharest, July 3.

The question of finding storage room for Roumania's new crop has been engaging serious attention. The Minister of Domains has been studying it closely of late; and as he considers this to be the only feasible solution of the difficulty, he has appointed a Commission to go into the figures in a practical manner and to supervise the construction of the necessary stores. The first question is, of course, as regards the quantity, and to obtain a just estimate of this Dr. Colescu, the Director of the General Statistical Department, was requested to give figures that would allow of this being arrived at.

Dr. Colescu has been obliging enough to see me, and put before me his calculations as regards the new crop.

For this season, he told me, wheat was planted over a surface of 1,950,000 hectares. Taking into consideration the extremely favourable state of the wheat crop to-day, a crop may be expected of, approximately, 20 hectolitres to the hectare, which will give a total of 39 million hectolitres. Taking the weight of a hectolitre of wheat as 77·78, a fair average, we have a crop of 300,000 wagons, or 3,000,000 tons. The quantity required for home consumption is about 1,340,000 tons, which includes seed for next year's crop. It therefore follows that there would remain for export, were this possible, 1,660,000 tons of wheat.

As regards barley, the area planted was 550,000 hectares, which it may be assumed will yield, at an average of 18 hectolitres to the ton, 9,900,000 hectolitres. If we take an average weight of 62 kgs. to the hectolitre, the barley crop this year represents a total of 610,000 tons. From this one must subtract the wants of the country, about 183,000 tons; so that 427,000 tons remain for consideration.

Oats were planted over 410,000 hectares. Reckoning an average production of 20 hectolitres, we have a crop of 8,200,000 hectolitres. At a weight of 43 kilog. to the hectolitre the oat crop is approximately 350,000 tons. Again subtracting the country's needs for fodder, seed, etc., 161,000 tons remain for storage.

Thus it appears that there will remain:—

	Tons.
Wheat	1,660,000
Barley	427,000
Oats	161,000
Total	2,248,000

Of this, no doubt, a large part will remain in the warehouses of the producers, as is the custom with the larger proprietors, who have their own stores. Actually, therefore, only about one-third of the whole crop—that is to say 675,000 tons—will require storage room, for which the State proposes to provide.

The warehouses to be constructed will occupy a surface space of 440,000 square metres. The State railways have at their disposal but a third of this, so that depôts over a space of 300,000 square metres will have to be constructed. The Committee is now considering the best model of warehouse to be adopted, and in which manner their use can best be put at the disposal of merchants, etc. They will be constructed with the credit of ten million francs voted by the Ministry of Domains.

ROUMANIAN RAINFALL AND CROPS.

The weather in Roumania was unfavourable for the crops at the end of June and early July, and, according to the Roumanian newspaper *Universul*, torrential rains have been falling in the country for some time, some farms having been flooded, and considerable damage and destruction having been done to live stock, crops, and property. The following is the bulletin of the Meteorological Bureau at Bucharest of July 4:—

During the last twenty-four hours intermittent rain has continued all over the country, the rainfall at different towns being as follows:—

39 mm.	Bucharest
44 ,,	Ciochina
49 ,,	Caracal
51 ,,	Focsani
52 ,,	Tirgu-Ocna
64 ,,	Ramnic-Sarat
65 ,,	Odobesti

PRODUCE REPORT.

London, July 28.

Currants.

Only small transactions have taken place this past week, and prices remain unchanged except for lower grades, which in some instances are easier. It has been reported from Greece that the weather is very unfavourable, and there is uneasiness in all the currant districts.

In Liverpool the market is firmer, with a slight advance in provincial. Zante and smalls are also in better demand, but very little business has been done in either.

Sultanas.

The market is very quiet, only small business passing at unchanged prices.

In the Liverpool market, owing to the small compass of available supplies, only small transactions have taken place at full prices.

Dates.

There is no demand, but prices are well maintained.

Seeds.

Linseed.—The demand is very quiet, and with a drooping oil market sellers of seed show more disposition to meet buyers. London-Calcutta spot is quoted at 55s. 3d. in any position. Cottonseed is firm at full prices, owing to the absence of any seed afloat from Egypt. London-Egyptian, spot, is quoted at £9 15s. per ton. Rapeseed has been inactive all the week. Guzerat, July-August, is quoted at 56s., Toria ditto 50s. 6d., and brown Cawnpore ditto pure 50s. Mustard is steadily held at late rates. Rangoon beans have further advanced, and £18 per ton is now asked for spot lots, whilst for forward shipment quotations are also higher.

Oils.

Linseed oil is dull and 2s. 6d. to 5s. dearer. Spot pipes £26, barrels, month and August £26 10s., September-December £26 12s. 6d., January-April £27 15s.

Cotton oil is quietly steady. Crude spot in pipes £29, refined pipes (pale) £31 5s., and barrels (sweet) £36 to £37, as to makes. Rapeseed oil continues quiet. Ordinary brown naked spot £36 to £37, English refined (barrels) £38 to £40.

Oilcakes.

Cotton Cakes.—The market is quiet, and only a very limited quantity of Egyptian remains in store, for which holders ask £7 10s., while July-August shipments are quoted at £6 18s. 9d. to £7 ex ship, with English makes offered at £7 to £7 10s. per ton.

Linseed Cakes.—The market is unsteady, and prices generally are irregular, while the small quantity available for immediate delivery makes extreme prices as compared with last week. Best London-made are quoted at £11 5s., fine seedy La Plata £11 5s. to £11 10s. Japanese sells £10 15s. to £11 per ton. Greek is scarce at present.

Locust Beans.

The scarcity continues, and prices are maintained at £8 5s. for whole and £8 10s. for kibbled.

EGYPTIAN COTTON.

Liverpool, July 29.

Messrs. Reynolds and Gibson report that Egyptian spot has been in improved demand this week, more especially for the higher grades of Sakellarides, chiefly for export, and a good business has resulted. Quotations show an advance of 10 points. Estimated sales, 3,600 bales, against 3,100 last week.

Manchester Market.—The week again passed with nothing of particular interest to note. We still hear complaints regarding trade generally, but our view is that there is more business doing than is generally admitted.

The cotton crops have reached maturity in certain provinces of Upper Egypt, including Assiout. The first crop, says the *Egyptian Gazette*, is expected to be picked during the first days of the coming month.

HUNGARIAN METAL INDUSTRIES.

Reviewing the Hungarian metal industry in 1914, the *Honi Tpar*, the official organ of the Hungarian employers, says:—

"The first half of 1914 was, on the whole, unfavourable, the mills operating with a reduced force, owing to the financial crisis. Orders were few, and all efforts to improve the conditions failed, on account of the uncertainty of the situation. The difficulties were aggravated by the moratorium decree issued at the beginning of the war, which postponed payments for goods already delivered. It was expected that after the excitement of the first months of the war the situation would improve through the need of arms and equipment for the army, but the improvement was rendered impossible by the lack of raw materials, the lack of workmen—large numbers of whom had been called to the colours—and the limitation of transportation facilities.

"The foundries suffered the most. In the last quarter of the year orders for cast-iron grenades were received, which will keep the mills busy for three or four months. The mills producing heavy goods were altogether idle.

"The machinery industry profited by army orders, but only toward the end of the year, when the lack of workmen in that branch of the industry became serious. The steel-tool industry flourished in the second half of the year, but the electric branch suffered. Army orders were of some help, but there was a pronounced shortage of skilled workers. The steel-working mills suffered from a lack of orders during the first half of the year and from high prices of raw materials during the second half, when army orders were received.

"The lamp and chandelier industry had a satisfactory year, owing to good exports to the Balkan countries in the first half of the year and army orders in the second.

"Factory workers in the Hungarian metal industries are under military orders."

OLD SCOTS WHISKY.

The current issue of *The Scottish Review* contains a vigorous article from the pen of Mr. P. Jeffrey Mackie, upholding the much-maligned Scots national industry, namely, the distilling of Scotch whisky, and combating the proposed Prohibition measures. He points out that whisky is the national drink in Scotland, as beer is in England, and asks whether it should be condemned? Here are some pungent arguments:—

"The medical faculty is largely responsible for the popularity of Scots whisky. As a rule, the family doctor is our trusted friend. . . . The doctor's recommendation, therefore, necessarily carries great weight, and, as I have already remarked, it is largely due to the advice tendered by the medical faculty, that persons suffering from gout, rheumatism, and other bodily troubles which arise from excessive acidity of the blood, have been accustomed to drink old Scots whisky, plentifully diluted with some sound still water, in preference to liquors which are more or less acid in their nature. Those who have followed this advice have had no reason to regret it. It is sound, and it holds just as good at the present day as it did at the time when our medical friends first began to tender it. . . . When a doctor recommends a patient to drink whisky, it is to be presumed that it is good old whisky which he wishes him to take."

From which the natural deduction is that the "new grain whisky that is sold in the less reputable sort of public-house, and whose sole recommendation is its cheapness," ought to be condemned. But not for this should the old be condemned along with the new. As Mr. Mackie points out, "the proper way to protect the consumer is by stopping the sale of the cheap and nasty rubbish now on the market. No spirits under two years old should be offered for sale. Reform is really a perfectly simple matter. There is nothing on earth to prevent it. Reform the public-house! Charge, too, a higher duty on new spirits than is charged on old, and thus put a premium on genuine old liquor."

NEWS FROM ALL SOURCES.

A Vienna telegram states that the Director of the Bulgarian National Debt, Dr. Styanow, arrived this week in Vienna, where he came in touch with the principal financial institutions. He left later for Berlin.

Cotton demonstration farms in 1914 furnish the leading and bulk topic dealt with in the latest *Agricultural Journal of Egypt*, allied to which are notes on large scale experiments against the pink boll worm in cotton seed, embodying information on a mechanical cleaning apparatus made in England. An apparatus for the fumigation of cotton seed has been built by Messrs. Thos. Cook and Son at their Bulak workshops. The mechanical cleaning apparatus referred to was built by Messrs. Wm. R. Dell and Son.

The war has done a very great deal to further English commercial interests in Egypt, both in Cairo and Alexandria, says the *African World*. Firms like Davies, Bryan and Co., and Roberts, Hughes and Co. are doing better business than at almost any period of their career; and much the same might be said of all engaged in equipment and catering lines.

A British agent who has been forced to leave Constantinople has settled for the time at Volos, Greece. If any of my subscribers, says the *Mercantile Guardian*, desire representation in Greece I shall be pleased to place them in communication with the gentleman referred to. He is already engaged for trade in beer and spirits.

In accordance with a decision published by General Sir John Maxwell in the *Journal Officiel*, Mr. R. E. Moore, of the firm of Messrs. Price, Waterhouse and Peat, has been appointed as sequestrator of the business and property of the German firm of Messrs. Finck and Baylaender, better known as Diemer's, of Sharieh Kamel, Cairo.

Engineering Notes.

The "Caterpillar" Tractor.

It is very probable that the average reader of the war-news is often puzzled over the allusion that is, at times, made in same to the remarkable efficiency of the "caterpillar" tractor, or the "caterpillar" motor-wagon, in transport-service over certain grounds at the front; and, perhaps, he wonders in what way an, evidently, powerful traction-engine or vehicle can be associated with that creeping coloured and often hairy larva of the *lepidopterous* insect. It is, we believe, an American nickname given to a vehicle running on its own tract, which, latter, is formed by articulated pedal attachments resembling, in a way, the caterpillar's feet. Everybody is familiar with the traction-engines, or tractors, or motor-wagons, but not many with the "caterpillar" tractor, which forms a type that is decidedly original and distinctly different from all others. The "caterpillar" does not run on wheels, in the ordinary acceptance of that term, but, instead, is provided with its own iron or steel track, which might be termed self-laying and li'ting. Owing to this system the traction is greater than can be obtained by any other means, so that there can be no slipping, either in soft or on hard ground, while it will work equally well in sandy, wet or stony soils, and will travel with ease across country and over soft soils that could not possibly be negotiated by ordinary traction-engines or wagons. The superiority of the "caterpillar" type of tractor is due to its great grip upon the soil, which gives it much more traction than can be delivered by wheels. In Flanders, Poland, and other places it has been of great service to our Allies, especially when the ground was very soft and often impassable to other vehicles. The greatest number of "caterpillar" tractors employed now on the battlefields, East and West, are of American origin, although some excellent types designed and constructed in England have proved to be far superior to the American types.

The British "Caterpillar."

The object of the "caterpillar" type of vehicles was, generally, to displace wheel friction, which causes the destruction of the road, by endless tracks, whereby the load is spread over a much greater area, and as the tracks are simply laid down and support the road, their effect upon the road surface is rather beneficial than otherwise. The system, moreover, permits of vehicles so arranged travelling over soft or sandy soils, which ordinary vehicles could not do. In one of the latest "endless rail" type of vehicles of British construction the foot carriers run on endless roller chains, whereby friction is reduced to a minimum. The central frame, mounted on leaf springs, carries a steel rail, on which travels an anti-friction roller chain, consisting of three lines of rollers, those running in the centre being vertical, while the rollers on the two side lines are placed alternately horizontally and vertically. The object of this arrangement is to prevent side motion and flange friction, and provide plenty of contact for the foot slipper. Above and below the frame are suspension rails, joined by vertical channels. These suspension rails carry the chains, to which are attached the foot carriers, these chains being rotated by one of the peculiar-shaped spoked wheels which bring round the foot carriers and place them horizontally, and at a perfectly equal distance from each other on the ground. This is a special feature of what is known as the Pedrail system, and one that is regarded as of the greatest importance, since by this is obtained a perfectly smooth and vibrationless motion. The foot carrier is articulated on the slipper running on the anti-friction chain, and it is under compression by two vertical springs, of which the force is calculated to allow of the feet mounting any obstruction on the road. In the absence of explanatory diagrams this description is necessarily incomplete, but it is sufficient to give an idea of the principle of this excellent system. This type of vehicle is particularly suitable for transport over rough country, and can be run on sandy or marshy land where other means of transport would be impossible.

The "Caterpillar" in Agriculture.

The many purposes for which a "caterpillar" tractor can be used successfully include rooting up trees, pulling stumps, ploughing, harrowing, harvesting, threshing, and running flour or sawing mills, or it can be attached to a number of wagons, which it will haul over any kind of ground, even or uneven. In fact, one of the great merits of this machine is that it appears to make little difference how rough the surface of the ground may be as it has no wheels to sink in, and the track upon which it runs enables it to cross ruts and hollows of considerable width and depth, or to surmount small ridges and hills.

The Disc Cultivator.

The introduction of the disc harrow and cultivator in the Near East is due to the American manufacturer and his energetic representative. The latter, by a methodical and persevering energy, and by practical displays of the merits of the implement during the last two or three years, has succeeded in persuading the Oriental farmer to adopt it and use it effectively on his field. A firm—American, of course—has booked several orders for the coming season, and it is probable that a large-size power disc cultivator will be at work this year in Macedonia, where the American traveller has been very busy since the war began, while we here have been satisfied merely with reading the Board of Trade bulletins and the names of the "probable" buyers of our manufactures. The disc harrow has been found useful especially in parts where new land is being broken up, its peculiar construction giving particularly satisfactory service when used for pulverizing heavy sods or clayey soils. The concave discs, unlike those of the ordinary harrow of this class, have serrated or scalloped edges, which are claimed to cut and turn the ground much more effectively than straight edges, leaving the soil in better condition, with less strain on the horses. These implements are constructed in many different styles, and in sizes from the small one-horse affair to the immense machine that can be pulled only by a traction engine; but the most popular design is the one intended for the use of the average farmer. This harrow, which can easily be drawn by a team of horses or oxen, cultivates a strip of ground between five and six feet in width. There are two rows of serrated discs, one being placed in front of and working between the other. A comfortable seat is provided with every machine, and the discs are arranged in such manner that the occupation of the seat by the operator places no extra weight on the neck of the animals which are pulling the machine. This form of harrow has been found very easy to work in the East, and British makers of such implements should try now to introduce them into the Eastern markets while the Americans are rousing the interest of the farmers and landowners in the merits of the implement.

Motor Boats in the Sea of Marmora.

Although Turkey is not usually considered to be in the forefront of naval construction, at least she is employing, during the present war, says *The Motor Ship and Motor Boat*, some motor craft for naval work, having thus taken advantage of the latest means of propulsion. At the present time the waters of the harbour of Constantinople and the Dardanelles are being controlled by motor boats. They are 28 ft. in length and are designed for a speed of nearly 15 knots. The motor installed is a 20-35 h.p. medium-duty Sterling machine, and is fitted forward under the half cabin. The engines for these boats have a curious history. Before the outbreak of the war the Sterling Company received an order by cable from their Turkish representatives for four 20-35 h.p. medium-duty motors. These were intended for use in some new boats which the agents (the Chantiers Constructions Navales de Phanar) had under construction for the Police Administration of Constantinople. They were shipped to their destination, but war broke out whilst on the way, and upon arrival at Constantinople they were confiscated and put to the use indicated. They were installed by the engineers of the Turkish War Department. The Police Department appear to have made every effort to get hold of the motors, and the Sterling Co., through the United States State Department, also endeavoured to get the engines returned to the consignees. One was apparently returned to the Customs for a time, but finally they were evidently put to use for naval work.

It is needless to say that the island suffers in various ways from the commercial crisis, which threatens to be of long duration.

ROUMANIAN PETROLEUM.

The Roumanian production of petroleum has again lately suffered another set-back owing to more restricted working by several concerns. The daily output is given as about 450 wagons. Export conditions, about which the industry has been complaining for months past, have improved a little since transport by tank-wagons was resumed nearly a month ago. At present 70 to 80 tank-wagons are moving out of the country daily, which is equal to about 100 ordinary wagons. The despatch by barrels could not be resumed, as there are no railway trucks available. On account of the scarcity of tank-wagons good prices are obtainable for illuminants for export, but contracts are still awaiting execution which were booked at much lower prices. The German demand continues for illuminants, but prices are easy, though satisfactory for good quality oil. For prompt delivery of crude oil of the Bustenari and also certain Bordessi light types the price has been retained at 3.50 fr. per 100 kilos (says the *Morning Post*), but demand is rather poor, and an improvement is hardly expected, although some refineries have purchased from stocks on the basis above named. Other descriptions of crude oil are difficult to quit even at lower rates. The low level of values is out of proportion with the increased costs of working, and some concerns are already thinking of stopping working since actual costs are now barely covered. There is now, however, some talk of the Government affording relief.

COMPANY MEETINGS.

NATIONAL BANK OF ROUMANIA.

In presenting their annual report and balance-sheet to the general meeting of the shareholders of this Bank, held on February 15/28 last, the directors recall that, from the economic point of view, the year 1914 opened under the most favourable auspices. Following upon the two Balkan wars, and especially since the treaty of Bucharest, a period of calm had been enjoyed by the Roumanian business world; trade was improving, and the outlook for agriculture seemed good. By the middle of 1913, indeed, an enormous amount of money had been deposited in the Roumanian banks generally, much of which formed part of advances made by foreign financial concerns, who also offered to lend to private individuals in Roumania. There were, in short, signs of a plethora of money, indicative of widespread and exceptional prosperity. The National Bank was, however, very cautious, and abstained from encouraging anything of the wild-cat order. It maintained the rate of discount at 6 per cent., lowering it to 5½ for one month only, in the belief that the year 1914 should be devoted to the liquidation of outstanding liabilities.

Then came the unforeseen event that has upset all calculations, and brought the whole world face to face with a situation unparalleled in history—nine European States, including five of the most considerable, involved in a terrible war, with millions of men in battle array, prepared for a fight to the death. And this upheaval affects not only the belligerents, but also neutral countries like Roumania, especially as the bloody strife is proceeding at her very doors, making it necessary for neutrals also to prepare for possible eventualities. In Roumania business has been almost entirely suspended, owing to the virtual closing of the highways of communication for imports and exports. Then, as though this were not enough, the wheat harvest was scanty, thus reproducing much of the suffering with which the nation had had to contend during the preceding two years.

Such an exceptional situation could only be met by exceptional measures on the part of the National Bank. In a word, its operations have shown a total exceeding anything in its previous history. Owing to the state of panic amongst the public, there was a general run upon the banks throughout the country. Foreign financial institutions in particular were asking for cover in respect of their advances, so that the National Bank had to undertake a large discount business as well as granting direct loans on securities. As regards discounting—which constitutes the bulk of the transactions between the National and the other banks—the turn-over amounted to some 1,246 million lei, with a balance at the end of the year of 246 million lei. Loans upon public securities, which showed a balance at January 1, 1914, of 77 millions, rose by 313 millions in the course of the twelvemonth to 390 millions, including the first loan granted to the Government on approved security, leaving at the end of the year a balance of 81 millions, without taking into account the sums advanced to the Government, which had been carried forward to the account of the new loan, of 200 million lei, on the basis of 4 per cent. Treasury gold notes.

The Bank rate remained but slightly above the normal figure, varying between 5½ for two and a-half months and a maximum of 7 per cent. for one month, and the rest of the year at 6 per cent. This figure the bank was bound to maintain, seeing that similar rates were adopted in countries having an older and more substantial economic organization, although in certain of these the rate rose to 8 and 10 per cent. on occasion. Interest, however, ruled much higher in the country at large, reaching in general as much as 12 per cent.

In order to facilitate the payment of bank deposits, the National appealed to its colleagues in the provinces, asking them to pay their depositors by means of cheques on the National Bank. In this way, public confidence was restored, with the result that many people offered to deposit their money without interest in the hands of the National Bank, while others handed back to their local bankers the sums but recently withdrawn. Again, in order to assist the agriculturists, who could not sell their produce (and two-thirds of the Bank's business is done with the farming interest), the National Bank opened a special credit for the benefit of the smaller banks to the tune of twenty million lei, fixing the interest on advances granted either on the security of produce deposited or on personal guarantees given by members of the various boards of directors at 2 per cent. over and above the National Bank rate, the other banks not to demand a higher rate than 8 per cent. And here it is pointed out that the year 1914 passed without any emergency measures like the moratorium, etc., which were adopted in other countries. In view of these transactions, however, and the uncertainty as to the value of the forthcoming harvest, the directors of the National Bank decided to establish a reserve of one million lei, so as to meet possible losses while not actually anticipating any.

As regards the shares of the National Bank, there were at December 31, 1913, 24,000, about half being inscribed and half to bearer. The nominal value of the public securities representing the Bank's capital was at the above date 14,363,400 lei. The reserve fund amounted then to 39,402,565 lei.

In connection with the rise in the rate of discount in 1914, it is pointed out that 40,959 more bills were dealt with than in the previous year, representing a value of 226 million

lei. The balance at the end of the year exceeded its predecessor by upwards of 64 million lei.

In the period reported upon the Bank bought bills and other remittances on foreign countries for 27,700,000 lei in excess of the purchases in 1913, and the profit accruing was 750,717 lei.

The balance from the discounting of coupons in 1914 was 232,156 lei, as against 148,411 lei in 1913.

Advances made upon public securities represented a sum of 313,425,000 lei, as compared with 77,216,800 at the previous accounting. Allowing for reimbursements, the balance was 81,039,800 lei.

At the end of the financial year under consideration, the real property held by the National Bank was valued at 6,719,000 lei, with an amortization fund in respect thereof amounting to 5,078,420 lei. More land has been purchased in the provinces for the extension of the Bank's activities.

The notes in circulation in 1914 represented a sum of 480,681,934 lei, or some 57 millions more than in the preceding year, while the corresponding metallic basis varied from 51 per cent. in February to 36 per cent. in October.

The gross profits of the National Bank in 1914 were 17½ millions, so that, allowing about 6,600,000 lei for expenses and amortisation, the net profit amounted to 10,922,913 lei. Of this sum the Board of Directors decided to carry forward a million lei, leaving 9,922,913 for distribution as follows :—Six per cent. as a first dividend, 720,000 lei; 20 per cent. to reserve, 1,840,582 lei; leaving a balance of 7,362,330 lei, of which 30 per cent. went to the Ministry of Finance, 2,208,699 lei; 7 per cent. to the Board of Directors and the Auditors, 515,363 lei; 1 per cent. to the employees' pension fund, 73,623 lei; and 62 per cent. to the shareholders as a second dividend, 4,560,000 lei. This, added to the first dividend of 720,000 lei, made it possible to distribute a total dividend of 220 lei per share. Of this 50 lei had been paid on account, leaving a balance of 170 lei.

The report contains a feeling reference to the loss sustained by the National Bank through the death of M. Antoine Carp, its highly respected Governor. Nominated a Director by the Government in 1881—only some six months after the foundation of the institution—he was successively appointed temporary Governor on the resignation of M. Campineano, the first Governor, in 1882, then Vice-Governor, and finally Governor in 1910. He was thus largely responsible for the conduct of the Bank during a period of thirty years, and in 1913 a demonstration was held in his honour by the shareholders, with whom were associated many prominent men belonging to the political, economic, commercial, and industrial circles of Roumania.

M. Jacques Negruzzi having completed his term of office as auditor, to the entire satisfaction of his constituents, has been succeeded by General N. C. Constantinesco, nominated by the Government for a term of three years.

ANGLO-ROUMANIAN PETROLEUM.

Presiding at the meeting of the Anglo-Roumanian Petroleum Company, Limited, on Tuesday, Mr. J. C. Williamson stated that the production of crude oil for the past year was 13,585 tons, and would have been considerably greater were it not for the difficulties which beset oil enterprises in Roumania during the past year. Apart from the shortage of labour in consequence of the war, the Roumanian Government prohibited the export of all oil products. This led to large accumulations of stocks in the refineries and storages, with the result that it was extremely difficult to dispose of crude oil, even at the low market prices which prevailed. Consequently some of the company's wells had to be closed down, and several others, which had been drilled to within a few metres of the deeper prolific sources, were not brought into production. They had a good and proved property, and it was extremely vexatious to find that when they had an increased output of oil they were unable to dispose of it satisfactorily. It was, however, solely owing to the war that their operations had not resulted in large profits.

EGYPTIAN HOTELS.

The eighteenth annual general meeting of the Egyptian Hotels, Limited, was held at the registered offices of the company, 11, Ironmonger Lane, London, on the 29th inst.

Lord Claud Hamilton, who was in the chair, said :—The accounts for the year ended April 30, 1915, are in your hands, and while the results shown constitute the lowest on record in the history of the company, they give no occasion for alarm, and, indeed, are better than might have been expected under the circumstances. Since we last met the world has been convulsed by the most disastrous war in history. With five of the great European Powers and some of the smaller ones at war, and with the bulk of the manhood of military age of these nations in arms, it is not to be wondered that the profits of our hotels are small, but rather that there are any profits at all. Such profits as have been made would have been impossible but for the presence in Egypt of large numbers of his Majesty's Expeditionary Force, which were drafted there from home and from the Australasian Colonies and India at the outbreak of war. It must not be supposed, however, that no business has been transacted at our hotels. It is true that the Ghezireh Palace Hotel has been closed, but a constant stream of traffic has flowed through Shepheard's Hotel, entailing a vast amount of work, though yielding very little profit. Our *clientèle* now consists almost entirely of the military element, and we have in consequence largely modified our charges. We felt it our duty to do so because we owe our security and freedom from invasion to the British Army in occupation. There never was a greater military fiasco than the attempt of the Turks to invade Egypt, thanks to the rapidity with which we were able to transport troops in large numbers to that country, rendered possible by our command of the sea. Turning to the accounts, I have little to add to what is stated in the directors' report. In spite of the expense of keeping up the gardens and the buildings at Ghezireh while closed, we have succeeded in obtaining an excess of receipts over expenditure at the hotels of £6,284 17s. 5d., as compared with £30,651 12s. 8d. in the previous year, while we are able to carry forward £2,548 12s. 2d., as compared with £2,711 14s. 1d. The directors have thought it right to reduce their fees during the war by one-half, and this arrangement took effect as from July 1, 1914. While the capital expenditure of the current year has been small, we have expended a good deal on Ghezireh Palace within the past two years, and have for a comparatively small outlay greatly improved and modernised the hotel, providing new bathrooms and sanitary arrangements instead of following out a programme of rebuilding as at one time contemplated. Our subsidiary investment in the Swiss Egyptian Hotels has not been remunerative, as in common with many other hotels the Semiramis has been closed during the war. In conclusion, the best thanks of the board and of the shareholders are due to Mr. Baehler and his staff, who have had a very trying season owing to the changed conditions, and to the loss of staff through mobilization. The local board, too, have shared in the stress and anxiety which have marked this period. I think it is due to our energetic manager, Mr. Charles Baehler, and to his wife, to say that they have worked untiringly to assist our wounded soldiers in every possible manner. I now move that the directors' report and accounts for the year ended April 30, 1915, as submitted to the shareholders, be received and adopted.

This was seconded by Sir W. Peat, and agreed to.

Sir W. Peat then moved that Lord Claud Hamilton and Mr. E. A. Harrison should be reappointed directors of the company, which, having been seconded by Mr. Alfred Wright, was carried unanimously.

The auditors having been re-elected, a resolution was passed to Mr. Charles Baehler for the able manner in which he had conducted the hotels.

A vote of thanks to the chairman concluded the business of the meeting.

CORPORATION OF WESTERN EGYPT.

A meeting of the shareholders of the Corporation of Western Egypt, Limited, was held at their offices in Gresham House, Old Broad Street, London, on Monday. A resolution was passed to the effect that the company be wound up voluntarily, and that Mr. Harry Meredith, accountant and secretary of the company, be appointed liquidator. A confirmatory meeting will be held on August 11.

CAIRO EXCHANGE.

The annual meeting of the shareholders was held on Tuesday, the following report of the directors being read and adopted:—"The accounts for this period show a loss of £E1,428,521, and, owing to the circumstances that now exist, there does not seem any probability of improvement in the near future. In the meantime, the company's expenses are being kept at the lowest possible figure. A large proportion of the call of 5s. per share, made in 1912, is still unpaid."

COMPANY NOTES.

British Cotton Ginning.

The report of the British Cotton Ginning Co., Limited, for the year ended June 30, 1915, states that the balance at credit of profit and loss account, after charging directors' remuneration and secretarial and other expenses, is £7,000. There have already been paid dividends at the rate of 7 per cent. per annum on the paid-up capital. During the year the sum of £15,000 has been received from the British Cotton Growing Association (making, with the £83,282 received as per last balance-sheet, the sum of £98,282) to provide a fund for the repurchase of the company's properties on June 25, 1916, and for the extinction of the preliminary and formation expenses on that date.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN.—Gemsah production for the week, 199 tons (last week 260 tons). Hurgada production for the week, 233 tons (last week 266 tons).

ANGLO-EGYPTIAN COMMERCIAL COMPANY.—Resolved on June 24, and confirmed on July 9, that the company be wound up.

ANGLO-ROUMANIAN PETROLEUM.—Production of crude oil for week ending 17th inst., 411 tons.

BANQUE EGYPTIENNE DE COMMERCE (IN LIQUIDATION).—The annual general meeting will be held in Cairo on August 2.

BRITISH COTTON GINNING.—Annual meeting of shareholders at 15, Cross Street, Manchester, on August 3.

BULGARIAN GOVERNMENT FOUR-AND-A-HALF PER CENT. GOLD LOAN, 1907.—Messrs. Stern Brothers publish the numbers of 675 bonds which have been drawn for repayment at par on and after August 1. Drawn bonds duly bearing the English stamp will be paid by them at their counting-house on and after August 3, 1915, so far as the funds remitted to them will permit.

EGYPTIAN MARKETS (week ended July 22), £703; increase, £44. Total from commencement of year, £30,409; decrease, £45.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—The half-yearly ordinary general meeting of the shareholders will be held at Winchester House, 50, Old Broad Street, London, E.C., on Tuesday, September 28, at twelve o'clock noon.

SUEZ CANAL RECEIPTS.—The traffic receipts of the Suez Canal for the 25th inst. amounted to 140,000 frs., against 420,000 frs. for the corresponding day last year.

THE PERA FIRE.

(From Our Own Correspondent.)

Athens, July 19.

The conflagration in Pera does not appear to have hit the British insurance offices very hard. Their losses are said to be as follows:—

	£
Sun	4,600
Central	2,750
Western	2,380
Patriotic	725
Royal Exchange	600
Commercial Union	400
London and Lancashire	400
State	330
Norwich Union	200
Phœnix	165
General	150
Union	150
National Benefit	75
Lancashire	50

BULGARIAN DEBT SERVICE.

Messrs. Stern Brothers announce that funds have been remitted to them from the Bulgarian Government to pay the coupon No. 17, due August 1, 1915, of the Bulgarian Government Four and a-Half per Cent. Gold Loan 1907, belonging to English holders and bearing the English stamp. These coupons will be paid on presentation at the counting house of Messrs. Stern Brothers on and after August 3 (Saturdays excepted), less income-tax at 2s. 6d. in the £, so far as the funds in their hands will permit.

BULGARIAN FINANCE.

During the year 1914 (says the *Echo de Bulgarie*) a number of new banking establishments have been started. Among them we may mention the Bulgarian Discount Bank of Sofia, with a capital of £80,000; the Bank of Burgas, with a capital of £40,000. Two insurance societies have been formed, one of them with a capital of £40,000, and the other with a capital of £80,000. Almost all the other banking establishments have increased their capitals during the year by issuing new stocks. The Commercial Bank of Bulgaria, the loan bank "Girdap," and the Industrial and Commercial Bank of Plovdiv have increased their capital by £80,000 each. The General Bank has raised its capital from £200,000 to £600,000, and the Balkanic Bank from £240,000 to £400,000. The Bank "Nopredak" (Progress) of Plevna has issued new shares for the amount of £40,000. The Discount Bank of Rustchuk and the Bank "Progress" of Varna have increased their capitals by £16,000 and £10,000, respectively.

The industrial development of the country, slacked by the Balkan war, resumed its normal course during 1914. The new sugar factories of the Rustchuk and Burgar have increased their output. Industrial activity has been especially marked by the creation of new industrial companies and by the increase of the capital of those already existing. Among the former may be mentioned a company for the production of carthenware (vases, pitchers, etc.), another for tiles and bricks, a third for the production of carbonic acid, with capitals varying from £8,000 to £12,000; while two building societies have increased their capital by the issue of new shares for £20,000 and £12,000, respectively.

GREEK DEBT.

The Council of Foreign Bondholders issues the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to May 31, 1915 (New Style: January 14 to June 13, 1915):—

The Secretary of State for Foreign Affairs announced in last Friday's *London Gazette* the reception from the British Ambassador at Rome of a translation of a Royal Decree, under which the blockade declared by the Royal Government on May 26 and 30 is extended to the whole zone of the Adriatic Sea to the North of the Otranto-Aspri-Ruga (Strade Bianchi) line. The navigation of the Adriatic Sea to the north of this line by merchant ships of any nationality is forbidden, but the Minister of Marine, or the authorities delegated by him, may grant, after necessary inquiries, special safe-conducts to merchant ships desirous of proceeding to ports belonging to or occupied by Italy or Montenegro.

NOTES OF THE WEEK.

The report that a convention ceding to Bulgaria the Turkish portion of the Dedeagatch Railway was signed in Constantinople on July 22 remains unconfirmed. It is difficult to suppose that *The Times* correspondent in the Balkans was misinformed on the subject, but it is possible that the announcement was made earlier than the Bulgarian Government wished. The reception accorded to the news of the agreement has not been of a nature to encourage it to lay much stress upon its diplomatic achievement. In Russia comment has been in a marked degree adverse. The *Bourse Gazette* states that the Allies would not object to Bulgaria's possession of the Enos-Midia line, if acquired as a reward of conquest, but would object if it was received as a gift from the foe. Even in Germany, where a satisfactory issue of the negotiations between Turkey and Bulgaria has been continually prophesied, the report of the convention, if not actually doubted, is received without enthusiasm. But the reason for their attitude may have to be sought in the reflection that Turkey would not have yielded so much unless she had been hard pressed.

In view of the fact that *pourparlers* are passing between Bulgaria and the Entente Powers, the acceptance of this "gift from the foe" would only be justified if made with the full knowledge and consent of the Allied Powers. Whether the Bulgarian Government kept the latter fully informed of the negotiations with Turkey is not yet known; but this course is one which we may expect it to have adopted. There are many indications that German threats and intrigues in the Balkans have definitely overreached themselves. In a recent interview, accorded to the correspondent of the *Petit Parisien*, the Bulgarian Prime Minister, we are told, "expressly denied that Bulgaria was ready to march at the side of Austria and Germany or to lend to Turkey the co-operation of Bulgarian arms." For the rest, however, Dr. Radoslavoff could only repeat the declaration that the Bulgarian Government wanted to be paid for its services before they were rendered. "The Quadruple Entente," he said, "can obtain our assistance, if it secures from Serbia the restitution to us of that part of Macedonia which is our land and our property, which is the flesh of our flesh and the blood of our blood, and thus close the open wound in our side." We have always favoured a settlement of the Balkan question on the lines of an equitable redistribution of territory, which would entail the cancellation of the Treaty of Bucharest; but there are obvious difficulties in the way of Bulgaria receiving her compensation before the other Balkan States receive theirs.

It would be of interest to know how it comes about that Roumania has to turn to Germany for the disposal of the surplus of her harvest at this juncture. The closing of the Dardanelles prevents the passage of large quantities of grain which in normal times find their way to Egypt and Western Europe; but it ought to have been possible to arrange for the holding in Black Sea ports of whatever amount Roumania has this year for export. Nominally she maintains an attitude of neutrality in regard to the war; but the fact that she has accepted loans from the Allied Powers since the outbreak of hostilities must predispose her to favour the latter as potential purchasers of her grain surplus. There can be little doubt that the Allies ought to have made a point of securing all the cereals Roumania had for disposal abroad, if only to prevent them entering Austria-Hungary and Germany. Their failure to do so has not only helped to increase our enemies' powers of resistance, but has placed Germany in a position to bargain with Roumania. As the number of wagons owned by the Roumanian State Railways is not sufficient for the enormous quantity of cereals available for export, Germany has been asked to supply the deficiency. This request the German Government is now using in order to extract from Roumania as a *quid pro quo* an undertaking to transmit munitions to Turkey.

The Roumanian Government is hardly likely to strike a bargain so prejudicial to its own interests. Fresh explanations are forthcoming, or old explanations are revived, to show why Roumanian participation in the war is still delayed; but few Roumanians hold now that the national aspirations in Transylvania can be realized unless the country is prepared to draw the sword. Sooner or later, therefore, we may expect to find the Roumanians making common cause with the Entente Powers, and it would be a suicidal policy to allow further supplies of ammunition to reach Turkey,

Digitized by Google

whose prolonged resistance is not without effect on Roumania's own actions. There can be little doubt that for some time German ingenuity has defeated Roumanian watchfulness in regard to the transit of war material to Turkey. Not only have there been significant discoveries on the part of the Roumanian Customs officials to show the lengths to which the German authorities were prepared to go in order to forward contraband goods to the Turks, but recent phases of the fighting at the Dardanelles have proved that by way of either Roumania or Bulgaria the Turkish army was still capable of receiving fresh supplies. In the absence of large consignments of ammunition, however, sustained artillery fire can only be indulged in after long periods of quiescence. The Turks are passing through this experience, and it is only necessary for closer supervision to be exercised in Roumania and Bulgaria to ensure that their present stocks should become exhausted in a comparatively short time.

A small advance on Gallipoli Peninsula was recorded on August 2, when on the right of the position held by the Australian and New Zealand Corps a successful attack was carried out against a network of Turkish trenches, which were beginning to threaten the safety of one of our advanced posts. After the bombardment of neighbouring works, mines were exploded under sections of trench, and these were occupied at once. Another section was rushed with the bayonet. These advances brought our troops to the crest of the ridge, and, in the words of the official report, have materially improved the position on that section of the line.

A few months ago it was reported that the Emperor William had sent an open telegram to his sister, the Queen of the Hellenes, in which he used the expression: "Woe to him who dares to draw the sword against me." The threat, if it was actually uttered, was made at a time when intervention on the part of one or more of the neutral States of the Balkans seemed imminent. According to a Bucharest newspaper Queen Sophie has now received a further telegram from her Imperial brother. In this message the Emperor refrains from threats, but indulges in such foolish braggadacio that even those who have no cause to feel respect for him will hope that the telegram is apocryphal. "My destructive sword," the Emperor William is reported to have said, "has crushed the Russians. They will need six months to recover. In a short while I will announce new victories won by my brave soldiers, who have shown themselves invincible in battle against nearly the whole world. The war drama is now coming to its close." If it be true that this message was sent to Queen Sophie, its despatch can only imply that the Emperor is again anxious lest the action of the Balkan States should weight the scales against him. On this point German diplomacy is probably well informed.

King Constantine's recovery appears to be so well maintained that his present advisers can have no justification for any further adjournment of the opening of the Chamber. It is reported that M. Venizelos has been received in audience, and we may hope that the meeting will have laid the foundation for a permanent understanding between the two men who are so essential to Greece's welfare at this time. Both will have allowed the logic of actual events to influence any policy which may have appealed to them seven or eight months ago. King Constantine is confronted by the emphatic expression of the nation's wishes given in the result of the general election. On the other hand, M. Venizelos, while he may be as convinced as ever of the soundness of his former advice, will recognise that a different set of circumstances govern the situation to-day, and he will know how to keep abreast of Greece's real interests while carrying public opinion with him.

If the German Emperor made up his mind that his destructive sword had crushed the Russians, he must have counted upon something more than a mere triumphal entry into Warsaw. But even this satisfaction has been denied him for a longer period than he could have anticipated, when he expressed his *jubilation* to the Queen of the Hellenes. Warsaw has *not yet* fallen. The German armies, it is true, are very near to the city, and a few days ago they had some justification for supposing that they held it in their grasp. But all along the line the Russians have developed an even more heroic defence than they have opposed hitherto to the German advance.

References in the House of Lords to events in Armenia leave no room for doubt that terrible atrocities have been perpetrated in that unhappy province. In answer to a question whether the Government had any information regarding the massacres of the Christian inhabitants in the districts of Zeitum, Mush, Diarbekir, Bitlis, and elsewhere, Lord Crewe could only confirm the reports that had been quoted. There had been, he said, wholesale murders, wholesale deportation carried out under the guise of the necessity for the evacuation of particular districts, and a series of other outrages. "Information had been received by his Majesty's Government that these crimes had been encouraged by German officials, whose presence had been an unmitigated curse both to Christians and Moslems, with a sinister disregard of the welfare of the country and its inhabitants." Lord Crewe added: "Obviously no immediate steps could be taken for the suppression of these outrages, but there was a fixed determination that when the time came that the facts could be proved those who had been responsible, either directly or indirectly, for the commission of these crimes, or for their inspiration, should be punished, and all the more severely the higher the positions that they occupied."

When we compare the reports of what has happened in Armenia with statements to the effect that the Turks at the Dardanelles have shown scrupulous regard for the sanctity of hospital ships within range of their guns, it is apparent that there are two voices of command in Turkey. We know, too, that a timely remonstrance on the part of the British Government sufficed to secure satisfactory treatment for British subjects within the jurisdiction of certain Turkish provincial authorities. But when similar representations were made to the Turkish Government in regard to the excesses in Armenia, we have it on Lord Crewe's authority that the outrages have subsequently increased in number and, if possible, in atrocity. The discrepancy between the two sets of conditions in Turkey may be susceptible of a twofold explanation. In the first place, it will be recalled that Kurds are likely to be the chief offenders in the case of atrocities in Armenia. Secondly, we cannot overlook the significant statement that the crimes "had been encouraged by German officials." The accusation is not levelled without good authority, and we are left to the tragic reflection that Germans have deliberately egged on their allies to the massacre of a defenceless Christian population.

We can only hope that the British Government has weighed well the serious undertaking given by its spokesman. Lord Crewe has announced that those who can be proved responsible, either directly or indirectly, for the commission of these crimes or for their inspiration will be punished, and all the more severely the higher the positions they occupy. The ultimate responsibility rests with the one man who brought about and ratified the alliance between Germany and Turkey. To force Turkey into war with the Entente Powers, to inspire the declaration of a *jehad* and to launch the Kurdish hordes on the war-path constitute as deliberate an instigation to massacre the Christian population in Armenia as if the outrages to be committed had been specified by Imperial announcement in Berlin. There will be intermediate agents of German and Turkish nationality; but wittingly or unwittingly the British Government would seem to have pledged itself to mete out personal punishment to William the Butcher after the manner in which a hundred years ago Napoleon was made to expiate an insensate ambition.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, July 19.

The Attempt on the Sultan.

The inquiry into the attempt on the life of the Sultan continues, but as yet it has produced no definite result. A reward of £E500 has been offered to any person giving information that will lead to the arrest of the individual who threw the bomb, and the country has been plastered with placards to this effect, which give his full description. The authorities are conducting their investigation with the greatest secrecy, and the local Press is being given no information as to the progress made, for fear that clues, other than those known to be in their possession, may be covered up by the plotters. There is absolutely no doubt now that there was a conspiracy, and it is possible that the investigation may reveal further and hitherto unsuspected ramifications.

Another examination of the missile has shown that it was not a bomb in the strict sense of the word. Its contents were pieces of thread, about 180 nails, a piece of newspaper, and a quantity of nitro-glycerine, the whole being done up in a piece of oilcloth. The newspaper was dated "Alexandria, July 8," so that the "bomb" must have been put together within about eighteen hours of the commission of the crime.

Despite the Sultan's express wish that the provincial population should remain at home and not send deputations to congratulate him on his escape, a great numbers of notables have gone down to Alexandria to express their sympathy with his Highness, who has been the recipient of telegrams from all parts of the country, from the Sudan and from Europe. One of the earliest messages received came from H.M. King George, and was couched in warm terms. The vernacular Press, without exception, condemns the attempt in most scathing terms, not only because of the patriotic character of the Sovereign, but also because such an act may prejudice the Egyptian name in the eyes of the civilized world. Indeed, wherever one goes amongst thinking Egyptians one finds the same fear, that a repetition of this act—and failure to bring the culprit in this instance to task will certainly encourage other misguided malcontents or adventurers—will hasten "annexation" and put an end for all time to what hopes there exist of the setting up of an "Egyptian nationality," the recognition of which the maintenance of the Protectorate regimé would in time have facilitated. Of the accuracy of this view there can be no doubt, and it is beyond question that had the recent attempt been successful annexation would at once have followed, and the revised Sultanate of Egypt would have ended with the death of its first Sultan.

Enemy Establishments.

One by one the enemy establishments are being brought under control, and the latest to have a receiver appointed is the well-known firm of booksellers, Messrs. Finck and Baylaender ("Diemer's"). Apropos, is it not a reflection on the enterprise of our numerous publishing firms at home that after thirty years of British occupation the only bookselling establishment of any standing in Egypt should be a German one? There is, it is true, one local English firm selling English newspapers, but surely it should be worth the while of one of our home establishments of repute to establish a branch in this country!

Capture of Notorious German Agent.

The authorities made an interesting capture this week in the person of one Baron Otto von Gumpenburg. This gentleman is a German artillery officer, who became the intimate friend of Enver Pasha when the latter was Ottoman Military Attaché at Berlin. When the Tripoli war started he obtained permission from the German War Office to go to Cyrenaica, where he received a small command in the Turkish forces. He came to Egypt several times, and on these occasions met and had close intercourse with many prominent Egyptians. Whilst in Tripoli von Gumpenburg became a convert to Islam, and greatly assisted Enver in training his troops; he especially devoted himself to instructing them in the gentle art of riding motor-cycles! Eventually, when Enver returned to Constantinople, the Baron accompanied him, but returned to Egypt several times, notably in 1913. He then made several trips to Solloum viâ the Siwa Oasis, and went on at least one special mission to the Senussi. He was lost sight of by the local authorities just about the time the European war broke out last summer, and active endeavours have been since made to trace him. He is most fluent in Arabic, and could successfully pass the closest scrutiny in Arab garb. There is little doubt that the Baron is one of the type of political agitators whom the Wilhelmstrasse has employed of late years for the purpose of furthering, under the cloak of diplomatic, scientific, and other apparently innocent enterprises, its anti-English propaganda in the Near East. The Anglo-Egyptian authorities, who had never regarded von Gumpenburg's activities in Egypt and Cyrenaica with a favourable eye, were, in the circumstances, fully justified in viewing with acute suspicion his "sudden disappearance" at the peculiar juncture at which it occurred. It would appear that the Baron had found that he could do no further work in these parts, and decided to try to get back to Constantinople; for he was captured in the Mediterranean on board a Turkish sailing vessel, which was proceeding towards the Syrian coast. It is interesting to note that the commander of the warship which stopped the sailing vessel had no idea of the importance of his capture. His suspicions that all was not as it should be were aroused by the fact that one of the passengers had an "American" passport, which seemed somewhat out of place in the circumstances, and he accordingly decided to bring all on board to Alexandria, where the "American citizen" was at once identified.

The Law School.

Since the regrettable incident at the Law School last March that institution has in one way or another been the subject of much discussion in the vernacular Press and in semi-official circles. It was stated amongst other things that this school, which had only a couple of years ago been attached to the Ministry of Justice, was about to revert to the Ministry of Education, from which it had depended in the past. That report has, however, proved to be untrue, and the school will for the present continue to be directed by the Ministry of Justice. It would appear that the circulation of this report was prompted by the feeling that the Administrative Council of the Law School, as at present constituted, is by its very composition inclined to look too much at the legal, and to neglect the administrative and disciplinary, aspect of breaches of discipline brought before it; and that the Council constituted under the Ministry of Education would deal more effectively with such matters. Attention has been drawn to this point in previous correspondence, but it would seem that a transfer of authority such as that mooted would be highly undesirable, seeing that one of the motives for attaching the Law School to the Ministry of Justice was to enable the latter to direct the preliminary training of those from whom its *personnel* would have to be recruited, The case could easily be met by appointing an Administrative Council consisting of men who have had experience in the management of schools and students, and who would thus be better able to judge and deal

with the breaches of school discipline, etc., submitted to them.

A change has this week been made in the directorship of this institution. Mr. Maurice Sheldon Amos, who succeeded Mr. W. H. Hill when the school was attached to the Ministry of Justice, has returned to the Native Court of Appeal, and has been succeeded by Mr. F. P. Walton, hitherto lecturer in civil law. It should be mentioned that Mr. Amos, who accepted the Law School post under pressure, had some months ago expressed his wish to return to the Courts at the earliest possible moment, and a vacancy having occurred in the Court of Appeal, and other promotions being contemplated in the very near future in those tribunals, it was decided to allow Mr. Amos to attain his desire.

July 20.

Since writing the above, information has reached me which gives me every reason to expect that the inquiry into the bomb outrage will be completely successful, and that an announcement on the subject may be made very shortly.

CAIRO, July 26.

Sympathy with the Sultan.

H.H. the Sultan's statement to the editor of *El Mokattam*, of which I sent a translation last week, has created an excellent impression. The note of sadness which was evident in his reference to the misinterpretation of the motives that prompted his acceptance of the throne and to the moral decadence which these attempts made noticeable in the character of the nation rekindled the lively sympathy which at the very outset had gone out in full measure from all well-intentioned Egyptians and from all foreign residents to the Sovereign who before everything is a model Moslem and a patriotic Egyptian. There is general agreement that he spoke worthily as the descendant of Mohammed Ali, when he declared that nothing would deter him from carrying out his intention of saving his subjects from themselves and from the insidious machinations of the country's enemies, and of bringing them "to the path of true happiness"; and that his decision to eradicate "the germ of evil" is deserving of the whole-hearted support of the population, It is assumed from the definite nature of the Sultan's statement that strong action is about to be taken in regard to the Turcophil and intriguing element. If one might offer a suggestion, it is that every person, no matter of what position, whom the authorities have any reason to suspect, should be turned out of the country. In Egypt, where back-stair influence and protection from high quarters still come so much into play, only a general measure of this description can have any salutary effect; any measure that allowed for exceptions would most certainly defeat its own ends. It is because we have been too lenient with enemy subjects that most of our troubles have arisen; it is because we have been too tolerant with the reactionary Egyptians and with the Turkish emissaries that Egypt has witnessed within three months two attempts on the life of the best Sovereign she could possibly have. The Egyptians as a whole are neither a bellicose nor a trouble-seeking race; but, like children, they respond to any influences with which for the time being they may come into contact. Remove the evil influence of the reactionary and intriguing element, and the sons of Egypt will give no further cause for anxiety; leave the "canker of intrigues and plots" to eat its way into their heart, and you will continue to have incidents, such as these attempted assassinations, to mar the history of the country. The time has come for clearly defined but drastic action.

Arrest of an Accomplice.

Meanwhile, the inquiry continues at Alexandria. Since last week the authorities have secured a man, who, they have every reason to believe, is an accomplice. Indeed, it is not so certain that he is not the actual thrower of the bomb, as there appears to be some discrepancy in the various witnesses' evidence of the descriptions of the man they saw, and it is now thought that the man who threw the bomb may be quite a different person from the one who rented the house from which it was thrown, and whose definite description the authorities have. The man in custody is Neguib Helbawi, a master in the Alexandria School of the Moslem Benevolent Society, and there are several circumstantial pieces of evidence against him. On him were found cigarettes that were identical with those found in the room whence the bomb was thrown; a cigarette dealer has identified him as the man who purchased these particular cigarettes from him. A few days before the attempt he wrote to his father a letter, wherein he asked for his forgiveness, saying that a good Moslem and patriot had at times to execute certain deeds, and that he would probably not see him again; at the same time he enclosed his photo, which he had had taken in Alexandria just previously. The photographer has identified him, and stated that at the time he was accompanied by another young man, who cannot be traced. Moreover, Helbawi was seen unlocking the door of the house on the afternoon preceding the attempt, by one of his pupils, whose evidence led to his arrest. This pupil had passed down Ras-el-Tin Street that afternoon, and meeting his master had saluted him, but to his astonishment the latter, who was opening the door of the house, turned his back on him. The incident evidently rankled in the boy's mind, and when he heard the details of the outrage he at once remembered that he had seen his master at the very house, and reported it to the police. Helbawi, who, it appears, vacated his ordinary domicile at about the time the contract for the house was signed, and spent his nights with various friends, gives no information, and maintains a stolid and indifferent attitude; but there is no doubt that he knows a good deal about the plot, and that he is at least an accomplice. The police are now actively searching for the young man who went with him to the photographer. On being pressed, after first denying that he had been accompanied to the photographer's, Helbawi finally admitted the accuracy of the latter's information; but he repeatedly gave wrong information as to who his companions were. Helbawi endeavoured to prove an alibi in regard to his movements on the day of the attempt, but it appears that so far he has been unsuccessful.

The Protection of the Railway.

A military court assembled at Tanta has just sentenced to one year's imprisonment, to be followed by a long period of police supervision, a native charged with knowingly having in his possession certain tools for an unlawful purpose. It appears that one evening about two months ago the *ghaffirs* of Biela, a place in north-eastern Gharbia, and rendered historical owing to Lord Kitchener's first model farm having been created there, met at intervals three men, who were carrying what they said was "iron" on their shoulders. The *ghaffirs'* suspicions were aroused, and they took them in charge. The "iron" proved to be five T-spanners—such as are used to turn the screws that hold railway rails on the sleepers—and nine fish-plate keys—such as are used for turning the nuts of the bolts of the fish plates that keep the ends of the rails together—which these men said they had been asked by a certain Abdel Rahman Minshawi to take from a field, where they had been hidden, and convey to a certain point on the agricultural road. Abdel Rahman Minshawi could give no satisfactory explanation of his possession of these tools and of the use to which he intended to put them; and the circumstances being altogether suspicious and there being every reason to believe that the tools were ultimately destined for criminal purposes on the railway lines near by, he was awarded the above-mentioned sentence. As far as is known this is the first case of this description which has come before the authorities, and on which they have been called upon to take definite action. This is exceedingly remarkable, for in a country like Egypt, where a road-system is for all practical purposes non-existent, and the railway, as a sole reliable source of communication between the capital, the ports, and the districts, becomes a factor of paramount importance, it would naturally be expected that serious and repeated attempts would be made by hostile agents to damage

Digitized by Google

this vital link in the country's system of defence. This immunity is undoubtedly due in great measure to the action of the authorities in having all the bridges and important sections guarded by soldiers. It is, however, obviously impossible to protect in this manner every yard of the permanent way, even on the main lines, and reliance has to a certain extent to be placed on the activity and watchfulness of the provincial authorities and of the railway staff. It is, therefore, to be hoped that the opportunity will be taken to give a suitable reward to the *ghaffirs*, through whose alertness the intentions of Abdel Rahman Minshawi were thwarted, as this will encourage those who are not directly concerned in the protection of the railways to exercise vigilance.

A Case of Thought Transmission?

Anglo-Egypt, when it wants to be instructed on the trend of current events, always has recourse to the *Egyptian Gazette*, which has acquired quite an unique reputation for the originality of its leaders and for the special articles it periodically publishes from the pen of well-known publicists. On Monday last (19th), when Anglo-Egypt picked up its *Gazette* from the breakfast-table and turned, as is its wont, to the second page, it was not disappointed, for there it found a leader on "Progress in Gallipoli." But on reading the article Anglo-Egypt felt puzzled. At the back of its mind it felt somehow that the phrases it had just read were familiar. Cudgelling its brains awhile as to what was the matter, Anglo-Egypt sought respite in the bundle of *The Times*, which had arrived on the 17th inst. Soon the solution to the mystery appeared, for turning over the pages Anglo-Egypt lighted upon the number of the 7th, which, as it contained Sir Ian Hamilton's dispatch on the Mediterranean Expedition, had been read immediately on arrival. There it saw a leading article headed "Sir Ian Hamilton's Dispatch," which coincided almost entirely with the leader on the same subject, but under different heading, that had appeared in the *Egyptian Gazette* of the 19th. Closer comparison showed that but for a short introduction, a score of words in the middle and half a dozen lines at the end, the rest of the latter article was identical with what *The Times* had said on the subject!

Anglo-Egypt is sorely distressed to account for this curious case. Unthinkable thought! did *The Times* crib the article from its Alexandria contemporary? No, that was out of the question, for the latter's leader was printed twelve days after *The Times* article had appeared in London. Did the *Gazette* then copy *The Times?* That theory also could scarcely hold water, for nowhere does mention of that origin appear in the *Gazette* of the 19th. What, then, is the explanation? Can it be, as a vernacular organ suggests, that this is another illustration of the saying that great minds sometimes think alike, and that we are in the presence of one of those phenomenal instances of thought transmission which occasionally arise to astonish the world and provide an absorbing theme for psychologists?

THE WOUNDED AT PORT SAID.

(From Our Own Correspondent.)

Port Said, July 27.

About four hundred wounded are at present being cared for in Port Said in various Government buildings taken over for the purpose. Many are in tents and huts, hastily thrown up on the seashore and in open spaces of the town. The Red Cross are shortly taking over the new building of the Lady Strangford Hospital, and further arrangements are in progress to receive another batch. It is said that preparations are being made to accommodate in Egypt a further twelve thousand wounded, of which number about five hundred are expected at Port Said.

A special commission of bacteriologists arrived in the P. and O. steamer Maloja on the 22nd. They are mostly eminent Harley Street men, bearing the honorary rank of colonel. A large number of nurses also arrived in the same steamer for Alexandria.

THE SULTAN AND THE BOMB OUTRAGE.

(From Our Own Correspondent.)

Cairo, July 20.

Amongst those who went down to Alexandria to present their loyal congratulations to the Sultan on his miraculous escape was Dr. Faris Nimr, the well-known and talented Syrian journalist. His Highness accorded him an interview, which appeared this morning in *Al Mokattam*—the organ which Dr. Nimr, with his colleague, Dr. Y. Sarruf, has directed for many years with such signal ability—and of which the following is a translation:—

You doubtless wish to know, doctor, the effect of this attempt on myself and on my intentions, as regards the country and its inhabitants, as well as my future resolutions. I will explain it to you at greater length than you would expect, and allow you to publish the facts, so that all, whether they be near or far, should know them. Before I proceed, let me tell you that I firmly believe that nothing can happen to us unless it is written by God. Such attempts, therefore, do not frighten me, with the grace of God. Had I been sure that these attempts were being made by individuals who are *exaltès*, who are driven to commit such crimes by their evil nature and mean character, my concern would have been much less than it is now. (In my opinion the ruler who has no other object but caring about himself cannot occupy himself in the interests of his subjects. I need not give you examples of this.) But when it is proved that the crime has been committed by the concert of a party of evildoers, it proves the existence in the country of a germ of evil which injures society, and this germ must be eradicated in order that the whole society should be clean and sane.

This is what concerns me very much. I am pained beyond measure to find that these people cannot distinguish between good and evil. I am very much pained to see that they judge matters according to their sentiments and not according to their reason. Why should they not stop a little to consider the reason which prompted me to accept the Sultanate? Had they had the least knowledge of politics they would have thanked me for my acceptance. Had there been among them a person who reasons or who thinks, they would have ascertained that my being on the throne does not reflect any advantage on my person, but that the advantage is to the country (with the help of God!).

I do not propose now to dwell at length on the political side of this question, but time will teach them what they do not know now. I do not wish to boast, but I will say this in all plainness, in all frankness, that there are very few persons who know the real condition of my country, its defects, and the requisite remedies as well as I do. I accepted the throne in these critical circumstances not because I desired it, not because I had striven for it, but because the conditions of the country necessitated my acceptance; and God is my witness that nothing so strengthened me in my acceptance as my conviction that my countrymen already knew the amount of my love for them and for the country, and appreciated my great solicitude for their and its prosperity. The responsibility of this post is not a light matter, even during a period of rest and calm. Unfortunately, I have had these attempts, which had not been foreseen.

My cause for regret, though, is owing to what I notice in the moral decadence which, if not remedied at once, may have very serious consequences. But these attempts will not deter me from carrying out my intentions of making a perpetual effort, with the help of my Ministers and the high functionaries who assist them, to cleanse the country of its canker of intrigues and plots, and to develop the character of the people and raise it until I shall have brought them to the path of true happiness. I am convinced that the majority of the people resents the acts of these evildoers, and I have no doubt that the nation will do its best to help in removing all the causes which disturb the public tranquillity and prevent development, and I trust that I shall have the happiness of seeing my country and the people thereof in as good a state of prosperity as I desire for them.

And be sure, doctor, a small company of mean, despicable evildoers, who try to injure the country, will never succeed in preventing me from reaching the goal so near my heart. I shall continue, with the help of God, to carry out my intentions, and I repeat to you that I do not despair—I shall do all this, if God so wills.

Considerations of space and time prevent me from commenting this week on the utterances of his Highness, which in the dignity and spirit that they breathe are in every respect worthy of the man, and which I may say foreshadow important and firm action on the part of the Government in the very near future.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, July 25.

Relations with Turkey.

The renewal of the persecutions and deportations of the Greek population in certain districts of Turkey has been engaging the serious attention of official circles during the past fortnight, and has caused much general irritation. According to reports—official and otherwise—some doubtless exaggerated, the province of Marmara has been cleared of its Greek population, and the deportation of Greeks from Konia and Broussa is imminent. The official reports state that orders have been issued to transfer all the Greek inhabitants of Aïvali to the interior, and this it is that has caused the greatest alarm in competent circles. According to newspaper accounts, the women and children of the deported families have been lodged in prisons and stables, and the men, not excepting the priests, forced to enlist in the Turkish army.

As I have previously indicated, the general conviction here is that the chief object of these deportations is to change the ethnological composition of these Asiatic shores, to remove the Greeks from the coast of Asia Minor, and to introduce a Turkish population in their place. This plan is said to be dictated by General Liman von Sanders with a view to securing for the Germans the long-coveted influence on this seaboard, by removing the more or less formidable rivalry of the Greek element.

The Operations of the Young Turks.

On the other hand, a refugee, a man of note and most trustworthy, who arrived here a fortnight ago, states that at one of the recent meetings of the Committee of Young Turks, attended by the Vali of Adrianople (an implacable enemy of the Greeks) and by Hajji Kaltzell and Toufexieff, the following resolutions were passed:—

That Turco-Bulgarian relations should be strengthened and the other nationalities deliberately suppressed; that the Turco-Bulgarian Committee should be reconstituted and a Turco-Bulgarian commercial society formed to capture the Greeks' trade; that a Turkish commercial agent should be appointed to supervise the import and export of goods destined exclusively for the Mussulman members of the society, so as to do without the Greek middlemen; to limit the privileges of the Patriarchate, especially in respect of the marriage laws, transferring his powers to the Turkish Iman; to limit the teaching of Greek in schools, and ultimately to suppress it altogether. It was resolved, in fact, to Turkicise the Greek element by creating a mixed population, the majority of the men being Mussulmans and of the women Greeks. If this be the case, it is not improbable that the recent deportations form part of the above plan.

The Steps Taken by the Government.

The Greek Government, seeing that its repeated friendly protestations produced no effect, has at last intimated to the Porte, through the Greek representative at Constantinople, that "the continuation of the persecutions would gravely compromise the peaceful relations of the two countries." As it is equally in the interests of Germany and Austria to avoid a conflict between Turkey and Greece, the Government thought it wise to communicate this step to Berlin and Vienna. The two Central Powers replied that they would use their influence with Turkey, but explained that this could not go far, as Turkey would resent their intervention as an interference with her internal politics.

Turkey's Reply.

After delaying her reply for a week, Turkey first sent a *communiqué* couched in unfriendly terms, and then a letter addressed by Ghalib Bey (who is at present at the Loutraki Baths) to the President of the Council, and finally made a verbal communication yesterday to the Greek Minister at Constantinople to the effect that there was no question of persecuting or oppressing the Greeks, but that it was simply a case of transferring the Greek population of certain localities, for military reasons, to places of greater safety.

Needless to say, this reply from Turkey was regarded as far from satisfactory. If her statement were sincere, why should it be only the Greek inhabitants who were removed to the interior, and not also the Turks, Jews, Armenians, and Germans? Nevertheless, the Government has accepted the reply, and awaits events in the hope that the persecutions will cease.

German Propaganda.

The agitation against German propaganda has recently become more and more violent. The Venizelist Press has revealed its machinations. The *Patris* has just published a photograph of a compromising letter addressed by the editor of a small paper in Canea to Baron Schenck, who conducts the German propaganda in Athens. The latter has tried to clear himself by publishing a statement that he has indeed paid for the insertion, in certain newspapers, of telegrams and *communiqués*, and also of leading articles, of which the German source was indicated. The *Patris* points to the insulting tone of the above statement, and further asserts that Baron Schenck keeps paid agents at the theatres, and particularly at a current "Review," where they applaud specially inserted Germanophile couplets.

The Political Situation.

The motion for the postponement of the opening of the Chamber until August 16, on account of the King's state of health, was carried in an arbitrary and unconstitutional manner, in spite of the statement made by M. Venizelos as leader of the majority that his party would be prepared to co-operate with the Government, until such time as the King's health should be re-established, in the legal and constitutional way, which would mean either the convocation of the Chamber or, at least, the establishment of some understanding with the leader of the majority.

The Ministerialist papers continue to assert that the King will not call M. Venizelos to power unless the latter promises to give up his idea of abandoning neutrality, and that there will be a second dissolution of the Chamber. Little importance is attached to these statements by the opposite party, who regard them but as the *pium desiderium* of the present Cabinet, which hopes to remain in power, and the Venizelist Press considers it wrong even to suspect the King of wishing to commit such a violation of the Constitution to disregard the express wish of the people. "The King," says the *Ethnos*, "cannot but call to power the illustrious statesman to whose efforts he owes the happiest period of his life; and if their views are still at variance and the course proposed by M. Venizelos is not in accord with the will of the people, then the King could proceed to a second dissolution of the Chamber. But now everything tends to show that the two great constructors of a greater Greece will work in harmony, the more so as, under the present conditions, M. Venizelos will probably be obliged to maintain a neutrality favourable to the Triple Entente."

Recall of French Minister at Athens.

M. Deville, French Minister at Athens, has been recalled, and has been succeeded by M. Guillemin, member of the Danube Commission. The recall of M. Deville is attributed to the fact that in the course of a speech to the French Colony on July 14 he congratulated the Greek people on "having proved at the recent elections the firmness of their political spirit." This remark gave offence to the Greek Government, and the matter was officially reported to the French Government. Immediately M. Deville was recalled, his position having become very difficult, especially in relation to the King. By his sincere devotion to the cause of Hellenism, and the influence in this direction which he exercised in the most trying and critical times, M. Deville had secured the sincerest sympathies at Athens, and his work for Greece has earned the gratitude of our country.

GREECE AND THE ALLIES.

A Reuter's message from Athens, dated August 4, states:—It is semi-officially announced that the Ministers of the Entente Powers yesterday made collective representations to M. Gounaris, the Prime Minister and Acting Minister for Foreign Affairs. It is understood that these representations had for their object the settlement of the Balkan situation.

CYPRUS NOTES.

(From a Correspondent.)

The Cost of Living.

Great satisfaction is expressed that Government is disposing of tithe wheat at 58 piastres (about 6s. 6d.) the bushel, in limited quantities, to bakers, subject to the condition that they will not charge more than 3 piastres (4d.) the oke for bread. M. Theodotou, a Greek member of the Legislative Council, recently had an interview with the High Commissioner on the subject at Troödos. To add to the grievance of high prices, there have been numerous complaints as to short weight on the part of bakers.

The Government is also selling tithe barley at about 2s. 10½d. the bushel, on condition that purchasers will not re-sell at a price more than 2 piastres over cost price; or charge more than 2 piastres the oke. The Greek papers continue to urge strongly the need of relief works to alleviate poverty and unemployment; and they specify various public works, including improvements in connection with the harbour of Kyrenia, on the north coast, and work at the "ports" on the south coast.

On the Trail of the Forgers.

With a view to tracing the operations of persons who have been placing in circulation counterfeit Government notes, Mr. S. Televantou and Mr. W. Greenwood, of the police, have been called to the capital from Limassol and Larnaca respectively. Mr. Televantou has rendered excellent service in the department on many occasions, in connection with detective work, and Mr. Greenwood has had a long experience in different districts of the island.

An Opening for Enterprise.

Several visitors have gone to take the waters at Kalopanagiotes, in the picturesque heights of the Nicosia district, on the northern slopes of Troödos, not many miles from the camp. The waters, which are sulphurous, have an excellent reputation in the island; and the place would be more widely known if there were better accommodation at the village which overhangs the springs and neighbouring villages. A small hotel, which could be enlarged according to needs, would probably attract visitors in increasing numbers.

Greeks Fighting for France.

Interesting accounts are given by the *National Herald*, a Greek newspaper, of the fighting of the Greek section of the Foreign Legion in France, especially during the forward movement at Arras. The Greeks were engaged chiefly in the tedious trench warfare during the winter months. The number originally was only about 100, but it was gradually increased to about 600. Like other contingents of the Foreign Legion, they did some excellent service, including a good deal of night work with bombs and hand grenades.

SUDAN NOTES.

(From a Correspondent.)

The Companionship of the Order of St. Michael and St. George has been conferred upon Lieutenant-Colonel G. F. Clayton, the Sudan Agent at Cairo, who has been in the service of the Government, in one capacity or other, since the end of 1902. In addition to being Sudan Agent, Colonel Clayton is also Director of Intelligence. The pay received is considerable, namely, £E1,200, together with an extra allowance of £E144 for services as Intelligence Director. The total cost of the Agent's Department to the Sudan Government is in the neighbourhood of £E4,000 per annum.

The recent earthquake in the Sudan, the effects of which were particularly felt in the Province of Mongalla, appears to have caused more alarm than actual damage. The two towns of Mongalla and Rejaf seem to have suffered the most. Fortunately, there are very few houses or other buildings constructed of more than one storey, so that the damages occasioned, such as they were, can be repaired without much difficulty. The whole of the surrounding country is, perhaps, the most beautiful, from the scenic point of view, to be found in the Sudan. Rejaf has become the last port of call on the White Nile steamer route, since Gondokoro has been abandoned owing to the prevalence of sleeping sickness, and the appearance of the place reminds one forcibly of an enormous and very beautiful park. The high, rocky hills a few miles distant slope away in beautiful undulations to the river's bank. Thousands of handsome ornamental trees are dotted about the surface, while in the summer both Rejaf and Mongalla are carpeted with millions of exquisite flowers and various coloured grasses which would rejoice the heart and delight the eye of the botanist. At Rejaf, also, is to be seen a very remarkable natural rock supported upon a pedestal that forms a gigantic table. This great slab of syenite is one of the many that have become detached and fallen as the original mountain decomposed.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, July 25.

The Dardanelles: Hopeful Outlook.

The situation at the Dardanelles is said to be excellent for the Allies, who have acquired a complete ascendancy over the Turks; and if progress is slow, the reason must be attributed to a desire to reduce loss of life as much as possible rather than to any military deficiency. There are indications that the Turkish army is becoming seriously demoralised, and an attempt is being made to raise their *moral* by sending priests and poets to the troops at the Dardanelles. There have been indications of dissatisfaction amongst the soldiers; officers have been brought to Constantinople in chains; and it is said there is serious friction between Enver and Liman von Sanders. The soldiers are reported to have complained that their officers did not accompany them in the firing line, whereupon an order was issued that they should do so, with the result that in a subsequent fight 700 officers were placed *hors de combat*.

Recruits from Anatolia continue to arrive, and are sent to Thrace, the soldiers from there being withdrawn to replace losses at the Dardanelles. Many of the men now being sent to the front are without uniforms and are supplied with Martini rifles. Hundreds of Germans continue to arrive, being artillerymen or for special work.

British Wounded Well Treated.

It is satisfactory to learn from private letters from the front that English wounded have been found in captured Turkish trenches with their wounds dressed and water by their side. This is the Turkish instinct of humanity uncorrupted by contact with the Germans. Turkish prisoners are surprised at the treatment they receive from the Allies, and there is ample evidence to show that the Germans have done their utmost to convince the Turkish soldier that fearful consequences await him if he falls into the hands of the enemy. To a certain extent this has probably deterred a large number from deserting; but the Germans show no mercy on any signs of surrender or desertion. It is a lamentable spectacle to see these unfortunate Turkish peasants being led to slaughter in a cause in which they have absolutely no heart.

There are no incidents of any importance to report from Constantinople this week, with the exception of the visit of an English submarine to Constantinople Harbour. More Turkish steamers, sailing vessels, and lighters have been destroyed. The Breslau, it is reported, made a trip to the Black Sea, and struck a Turkish mine in the Bosphorus, and has received serious damage.

The month of Ramazan commenced on July 14. The Sheik-ul-Islam has decreed that the soldiers at the front need not observe the fast.

Moratorium Extended.

An official notice has appeared extending the moratorium for a further three months—*i.e.*, until the end of September. A provisional law is announced authorising a credit of one and a-half million pounds to be added to the Budget of the Ministry of War for the construction of new railways from Angora to Erzeroum; from Erzeroum to a point on the Black Sea coast; from Muradli to Rodosto; and from a point on the Angora-Erzeroum line to the coast of the Black Sea. Considering the impossibility of putting into execution any works of this kind, the promulgation of such a law seems just as incomprehensible as the departure, on a mission of peace, of Nedjmeddin Mollah and Sassoon Effendi. The rulers in Constantinople are certainly in no mood to entertain peace proposals at the present time, and the men mentioned are hardly qualified for the mission with which they are credited.

The Sultan's health is reported to be satisfactory, and Prince Youssouf Izzedin, it is announced, has gone to the Dardanelles to visit the troops.

Shortage of Benzine.

The Turks are evidently short of benzine, for a notice has appeared in the papers requesting all holders of benzine to notify their stocks to the military authorities, and those who fail to do so will have their stocks confiscated. The stock of coal in Constantinople is said to be about 30,000 tons. Wheat is plentiful. There is no confirmation of the statement that there was a shortage of water; but it is not an improbable event if coal is not available for the waterworks at Dercos.

Good News of British Hospital.

It is satisfactory to announce that the Government has decided to carry on the British Hospital in Constantinople.

Very little news comes through from Smyrna, and the only excitement there appears to be the occasional visit of British aeroplanes, dropping bombs on munition works, petroleum and other depots, and other military establishments. There is a great shortage of bread there, and coal and petroleum practically do not now exist.

SERBIAN LETTER.

(From Our Own Correspondent.)

Nish, July 17.

The War in the Air.

Although Belgrade may be said to be within the war zone, the town has been left almost undisturbed for a long time. The chief reminders of the existence of war have been the flights of aeroplanes. On July 12 two of the enemy's aeroplanes flew over the city and dropped some bombs, one of which fell in the middle of a street without doing any damage, while another destroyed a house, but without causing any loss of life. Two other bombs were thrown on Bagnitza, where is a military camp.

On July 13, at 5 p.m., an aeroplane flew over Belgrade in the direction of Mali Mokri Lug. Fired at by Serbian artillery, it retired towards Pantchevo, a town on the Danube in Hungary, near Belgrade. One of our aviators was sent in pursuit and reached the enemy aeroplane high over Pantchevo, where an encounter took place, our aviator opening fire with machine gun and rifle. The enemy aeroplane escaped, flying into the interior of Hungary.

Serbian Troops Impatient.

The Serbian troops, which are held prepared for action, are beginning to complain of their inactivity. They dislike being obliged to remain on duty when they think they might have been doing work in the fields, if their services are not yet wanted. They evidently do not understand the necessity of being prepared for an emergency, and the long absence from home, where their presence is required, makes them impatient and fretful. The fact that Serbia is also at war falls into the background.

Balkan Alliance Outlook.

Judging from all one hears, there appears to be but little probability of an immediate renewal of the Balkan Alliance. An agreement between Serbia and Bulgaria is the stumbling-block. If Bulgaria, as it is said, demands the immediate granting of concessions in Macedonia, at present occupied by Serbia, there is no chance of arriving at an understanding, as it is hardly likely that Serbia would agree to give up possession of any territory until after the termination of the war. The extent of the Bulgarian demands is also a hard nut for the Serbians to crack. The Serbian Press pleads for the continuance of a good understanding with Greece, and calls upon the latter country not to be misled by unrealisable projects with other countries.

King Peter's Name-day.

July 12, St. Peter's day, was King Peter's name-day. In Serbia very little attention is paid to one's birthday, but the name-day is of importance and a day of festivity. On the King's name-day, therefore, the Cabinet Ministers, who had been holding a council at Kragujevatz, the seat of the Military Headquarters, motored over to Topola to congratulate his Majesty. Prince Alexander, the heir to the throne, also paid him a visit.

It is reported that the King's health is greatly improved, and that he will now leave Topola and go to a bathing resort, as is customary at this time of the year, probably to Ribarska Bagne.

The Serbian Bathing Resorts.

This year the Serbian public will not enjoy the Serbian bathing resorts as usual. The season is already far advanced, the weather has become excessively hot, and it is a great deprivation not having the free use of the bathing towns as in ordinary times; and to go to foreign baths is at present quite out of the question.

There are many very fine bathing resorts in Serbia, such as the Ribarska Bagne, Bagne Kovilyatcha, the Vrnatchka Bagne, Vranjeska Bagne, Soko Bagne, Nishka Bagne, etc., etc.

Bagne Kovilyatcha, often patronised by the King, is near to Shabatz, and was destroyed by the Austrians at the time of the invasion. The hotels and large buildings in the other bathing resorts have been converted into hospitals and convalescent homes for the reception of the sick and wounded soldiers, and for prisoners of war, and the remaining houses in these resorts are packed with refugees. Take the case of Nishka Bagne, a small bathing resort about an hour's carriage drive from Nish. Last year there were two restaurants and one hotel there, but to-day neither hotel nor restaurant exists; they are converted into homes for the wounded and for war prisoners, and visitors going there can get no accommodation. This is to be regretted, as the Nishka baths are much patronised, and the waters enjoy a high reputation. The place is now crowded with war prisoners and wounded soldiers.

Living at Nish.

Nish, the present seat of the Government, is still overcrowded, and living here has become very expensive. The authorities are seriously considering the advisability of ordering all refugees to seek a domicile in other parts of Serbia, so that living in Nish may be restored to something approaching its normal state, and the inhabitants of the town be rid of the overcrowding of their houses.

An Albanian Fight.

The *Odjek* reports that 3,000 Albanian insurgents, led by Hajji Jamil, were totally defeated in a battle against the Serbians. Essad Pasha held a Court at Durazzo, before which several insurgent leaders were tried. Eight of them were condemned to death, and were immediately hanged, and the remainder were sentenced to imprisonment. This severity has produced a great effect on the population.

Nish, July 24.

The Austrian Peace Proposals.

With respect to Austrian proposals to Serbia to conclude a separate peace, two declarations of the Serbian Prime Minister are explicit. In an interview with the correspondent of the *Novoe Vremya* M. Pashitch said: "Much is said about the dishonest intention of Serbia to conclude a separate peace with Austria. I beg you to deny this energetically in your paper." In another interview, with the correspondent of the *Petit Parisien*, M. Pashitch said: "Yes, it is true that Austria proposed a separate peace to Serbia. It was during the month of November last year for the first time, afterwards in April and in May of this year. To all of these proposals we replied that we remain faithful to our Allies."

Proposed Minister in America.

With the march of time Serbia's needs increase. In 1882 the Serbian Press was opposed to the opening of a Consulate in the United States of America, and at that time it was even thought that Italy and England being far distant, it was unnecessary to have a Serbian Legation in those countries; but to-day the Serbian Press advocates the appointment of a Minister Plenipotentiary for the United States of America. In support of this view it is said that there are one and a-half million Serbians, Croats, and Slovenes residing in the United States, employed in industrial and agricultural pursuits; and also that since the beginning of the war immense help has been received from the United States of America, including doctors, nurses, and sanitary requirements.

Precautions against Cholera.

It may now be said that we are almost entirely free of typhus, but hardly have we got rid of one epidemic when it behoves us to take every possible precaution to avoid another. Summer is on us, and with the increasing heat cholera is said to be developing in the near Austro-Hungarian regions—namely, in Bosnia, Slavonia, Syrmia, and Banat. Sanitary precautions in Servia are more necessary than ever, and especial attention has to be given to preventing the spread of the scourge through the army, the prisoners of war, or through the interned returning to Serbia from Austria and from Hungary.

The Roumanian civil and sanitary authorities have decided that the interned Serbians returning from Austria and Hungary shall undergo a quarantine in Roumania, for which special arrangements are being made. Further, the Serbian interned shall not traverse Roumania, but take a water route, by way of the Danube. The Serbian interned now returning from Austria-Hungary consist of women and children of all ages, and of men between eighteen and fifty years old.

SERBO-BULGARIAN RELATIONS.

PRESS AMENITIES.

(From Our Own Correspondent.)

Nish, July 24.

The *Politika* asserts it has reliable information from Sofia stating that the centre of the Bulgarian bands organisation has been transferred from Stroumitza to Kustendil. The bands are lodged in neighbouring villages. This change has been effected because it is thought in Bulgaria that the Serbians devote their entire attention to the Stroumitza district, and more especially because the Germans and Austrians desire such a change to enable them more easily to contribute to the operations and control them.

The Serbian Press frequently publishes notices of the movements of Bulgarian bands, and the tone of the irresponsible Serbian papers is one of continuous complaint and of accusations against the Bulgarian people and Government. In conversation one constantly hears bitter expressions concerning, and becomes cognisant of poignant aversion to, Bulgarians; while the semi-official Press pursues an erratic course, exposing the misdeeds of Bulgarians towards Serbia, and at the same time offering to Bulgaria the hand of peace and amity. The semi-official *Samouprava* published on eight consecutive days long articles upbraiding Bulgaria for its reprehensible conduct towards Serbia at various times, and mentioning at the same time their various good joint actions. This manner of proceeding does not appear, however, to have any good effect on the Bulgarians, and does not necessarily tend to bring a good understanding between the two countries any nearer.

In reply to retorts in the Bulgarian Press, the *Samouprava* writes on the 22nd of this month:—

Serbia is ready on her side to improve the relations with Bulgaria. We have made some serious complaints about the conduct of Bulgaria, but, however disagreeable this was to us, we could not avoid doing so, as we hoped that the bitter truth would heal the wounds. In this expectation, however, we have erred. Honest words on our side, in which we avoided using terms denoting a strong qualification of Bulgarian conduct, have produced opposite results to what we hoped to attain. The Bulgarian papers, instead of well considering what they write about Serbians and Serbia, and showing at least a little good-will in order to repair past errors of the Bulgarian Press, find it preferable to continue making accusations and attacking Serbian people and their Government, in so much so that we are compelled by facts of this kind to reply. Take one of many false statements. Among other things, the Bulgarian papers state that the Serbians in Durazzo have hanged a great number of Albanians, and that among the men executed there were many Bulgarians, but the whole world knows that the Serbians are not in Durazzo, and that Essad Pasha governs Durazzo.

M. Pashitch, Serbian Prime Minister, in an interview with a foreign correspondent, said:—

At the commencement of the war, and especially at the moment when the Turks attacked Russia, Serbia by means of an entente with Bulgaria, was ready to facilitate Bulgaria's entry into action. But Bulgaria did not accept any of the proffered conditions. On the contrary, she replied to Serbia's friendly proposals by an attack of Bulgarian bands. After the incidents of Valandova, who could venture to counsel Serbia to make concessions to Bulgaria?

Despite this speech of the Prime Minister and the opposition of the irresponsible Serbian Press, it would appear from the statements in the semi-official *Samouprava* and in the *Odjek*, a paper devoted to the Young Radicals in the Cabinet, that within certain bounds there might be prospects of an understanding being come to between Serbia and Bulgaria; hence the Serbian semi-official Press does not give up all hopes of its accomplishment. The *Odjek* states:—

In spite of the unfriendly behaviour of the Bulgarian Press, in spite of the unexpected conduct of the Bulgarian Government, which cause uneasiness to the true friends of Serbia and Bulgaria, nearly all political parties in Serbia were always, and always will be, sincere partisans of an understanding between Serbia and Bulgaria. All important, highly placed persons and all serious politicians agree that an upright and sincere alliance would be the only political combination to promote in the best manner the interests of both countries, and ensure to both a brilliant future. Mutual concessions dictated by a correct conception of the interests involved would promote this understanding. For this purpose Serbia has hitherto always shown goodwill, but Bulgaria does not respond in the least to the advances made. And whilst Serbia was prepared to consider any proposals which could ensure an honourable alliance, Bulgarian bands were formed on Bulgarian territory and crossed into our territory at Stroumitza and Valandova, perpetrating cruel deeds amongst our peaceful population, which awoke feelings of horror in the whole civilised world. Nevertheless, for the sake of the general Balkan and Slav interests, and in the interests of our Allies, *Serbia is to-day still ready* to come to an understanding with Bulgaria. But it is high time that this should be done with. Bulgaria should show herself worthy of her great task, and on her side should at least show herself disposed to be as conciliatory as Serbia is disposed to be. Unhappily, not only is there no good-will shown in Bulgaria, but she seeks also to make the conditions in Serbia worse than they are. The Bulgarian Prime Minister, in an interview with the correspondent of the *National Zeitung*, on July 7 of this year, said that the moment will soon be at hand when the neutral States will be obliged to enter into action, and Serbia's destiny is sealed. Serbia, after three wars, is exhausted, and so weak that it can no longer be counted on.

"PUNCH'S" TRIBUTE TO SERBIA.

This week Mr. *Punch* publishes the twenty-fifth of his series of "Unwritten Letters to the Kaiser," which is signed "Peter of Serbia." We quote the first and last paragraphs:—

Sir,—Between you and me there cannot, I suppose, be any comparison. You have great possessions; I am but a poor man. You are vigorous and age has not yet set its mark upon you; I am broken by sickness and am bowed down by years. You command the allegiance and the resources of a great and mighty Empire; I am the chief of a race of peasant folk living a life of toil and hardship in a corner of Europe. In every point of wealth, power, and comfort you seem to have the advantage so manifestly on your side that your superiority over me cannot be brought into controversy or doubt. Yet, when I reflect, I feel bound to tell you that, old and poor and broken as I am, I would not for all your riches and all your power and all the adulation of the parasites who surround you and acclaim your Olympian magnificence, change years and stations with you and be even as you are now.

. . . . . .

So far Serbia has been able to defend herself with success. She is determined to do her utmost in the future, because, poor as she is, and small as are her resources, she has a burning love for freedom and a bitter hatred of oppression. Germany and Austria may do their worst. They will find our people ready both to fight and to endure. Great material forces are against us, but we shall oppose them in proud reliance on the justice of our cause and on those great spiritual forces which have more than once turned weakness to strength and have beaten tyranny down into the dust.—Receive, Sir, this my salutation,

Peter of Serbia.

SERBS REPULSE AUSTRIANS.

Reuter's Nish correspondent telegraphs the following official statement, which has been issued there:—"On July 30, at 2.30 a.m., the enemy, with the aid of two pontoon boats, attempted a landing on the island of Skelanska, but were forced to retire by the fire of our infantry before they had time to reach half-way across the stretch of water which separates the island from the left bank of the Save."

SERBIA'S PRISONERS OF WAR.

Under date of the 3rd inst., Reuter's correspondent reports that the following semi-official statement has been issued at Nish:—

There has appeared in the foreign Press a mischievous article on the state of prisoners of war in Serbia, particularly Austro-Hungarian and Croatian officers, and an alleged letter from one of these officers was published.

We will not discuss or repeat the baseless accusations and falsehoods therein contained, but will confine ourselves to saying that, as every officer and representative of a foreign country and the foreign Press know, officer prisoners are placed in a barracks of which the special fitting up cost more than 100,000 fr., and which are situated on the outskirts of a town. Further, that each group of three officers has an orderly, that there are special German, Hungarian, Czech, and Croatian kitchens, that the officers make excursions in groups of one hundred for days at a time, that they have at their disposal studios, a recreation ground, an orchestra, and a choir, and that even the censorship of letters is conducted by Austro-Hungarian officers.

BULGARIAN LETTER.

(From Our Own Correspondent.)

Sofia, July 13.

Funeral of the Exarch.

The funeral of the Exarch took place last week. The King and Queen were represented, and the Crown Prince Boris attended personally. The diplomatic body was fully represented, and on this melancholy occasion the representatives of the belligerent Powers came into contact and exchanged salutations. There were also present many high ecclesiastics, civic and military dignitaries, deputations from various municipalities and societies of all kinds, and a great crowd of the public. The streets, even in the poorest quarters of the city, were hung with black. The great services rendered by the late Exarch to the United Bulgarian Church were emphasized in all the speeches delivered on the occasion.

The British Legation here has addressed a letter to the Bulgarian Government, offering condolences on the great loss the country has sustained, and Dr. Radoslavoff has also received a telegram to the same effect from the (British) Foreign Office. Similar messages have been received from the Pope and the heads of other foreign churches.

The New British Representative.

Last Wednesday night the new British Chargé d'Affaires, Mr. O'Beirne, arrived here from Petrograd, having travelled by way of Bucharest. The morning after his arrival he was introduced to the Prime Minister, Dr. Radoslavoff, by Sir Henry Bax-Ironside, and he also signed his name in the Palace visitors' book.

Last Tuesday Sir Henry Bax-Ironside, the departing British Minister, was received in farewell audience by King Ferdinand, and Lady Bax-Ironside was received by Queen Eleonore. On Friday Sir Henry and Lady Bax-Ironside left for London, travelling viâ Nish and Salonika. They were seen off at the station by the Staff of the British Legation, the Ministers of the Entente and neutral Powers, and representatives of the Palace and the Government.

The Political Situation.

The negotiations between the Entente Powers and this country are still at a standstill, the former not having replied to the Bulgarian Note of June 15. The Germans are very active here, and they are working with feverish energy at Constantinople, and exercising great pressure to bring about an agreement between the two countries for the rectification of the Turco-Bulgarian frontier and the cession of the Turkish portion of the Dedeagatch railway to Bulgaria. So far nothing has been achieved in this direction, and competent political circles here are very pessimistic regarding the prospects of success for these negotiations. I gather that the postponement of the Entente's reply is to some extent due to the existence of these other negotiations, and that the reply will not be delivered until their result is known.

The Casino Outrage Trial.

On Saturday the Court Martial concluded the trial of the anarchist band which last February perpetrated the bomb outrage at the Casino. The leader of the gang, Vikenti Pop Anastoff, and the man, Itzo Santoff, who threw the bomb, were sentenced to death by hanging; four others were condemned to various terms of imprisonment; while the seventh member, Todor Dobrinovitch, was acquitted, owing to lack of proof in the evidence against him. Further, the Court decided upon the prosecution of the wife of Vikenti, the lawyer Simeonoff—who refused to give evidence—and Dr. Gennadieff, with the view of finding out in what way they were connected with the band, and what was the measure of their responsibility for the crime.

The idea of the institution of proceedings against Dr. Gennadieff is seriously perturbing his political adherents, many of whom have already arrived here from the provinces. They all express great surprise at the resolution of the Court Martial, and declare their determination to resist all attempts to compromise Dr. Gennadieff. The Minister of Justice, M. Popoff, in discussing the subject with some friends, declared that reports that the prosecution of Dr. Gennadieff had been desired by the Government were absolutely without foundation.

Liberal Gathering.

Last night the annual gathering of the Liberal Party was held, and a banquet was given at the Casino. Dr. Radoslavoff presided, and the 450 guests present included the Cabinet Ministers, the Mayor of Sofia and many prominent members of the party.

THE STATE OF SYRIA.

(From Our Correspondent Lately at Beyrout.)

Cairo, July 21.

The Arab Nationalists.

News that filters through from Syria confirms the reports of a recrudescence of activity on the part of supporters of the "Arab movement" which was organised and led by the Reform Committee in Syria, and supported by the Decentralisation Party abroad. The Arab Nationalist leaders only dared raise their voice and formulate their claims when Turkey was distracted by the Balkan War and had to concentrate all its forces at the gates of the capital; and now, with the same position reproduced, Syria again depleted of troops, and with the chances of outside help even better, they thought the opportunity too good to be missed. The dismissal of the Vali of Beyrout and of the President of the Municipality, to whom he had shown favour, and who was one of the most prominent members of the Reform Committee, leads one to suppose that this high official's sympathy, if not his actual support, had been won over by the Arab Nationalist leaders. But a national movement, set on foot by a few intellectuals, and lacking the impetus given by the support of the mass of the population, is doomed to failure unless it is backed by military co-operation, as was proved by the case of the Young Turks. The fact that Djemal Pasha has lately shown himself less irreconcilable towards the Jews, and that there were some hopes of securing his favour for the Lebanese, may have led the Arab Nationalists to count on eventual military support, especially in view of the friendship said to exist between the General and Bekir Sami Bey.

However these things may be, Bekir Sami Bey has been replaced by Suleiman Nazif Bey, ex-Vali of Busreh and an influential member of the C.U.P. Nazif Bey is said to have been given instructions to repress the movement mercilessly. Several Moslem notables accused of complicity are reported to have been imprisoned, and it is even stated that a Moslem notable of Sidon, an ex-deputy of the Ottoman Chamber, has been hanged.

Lebanon Affairs.

The Christian Armenian Mutessarif of the Lebanon Ohannes Kouyoumjian Pasha, who has left for Constantinople overland on three months' leave, is said to have been replaced by Riza Pasha, commanding the troops in the Lebanon. This, together with the reported appointment of new members to the Administrative Council, and the re-election of only two of the old members, is an indication that the administration of this so-called province is to be run on purely Turkish lines, and we shall not be surprised to learn shortly that the Lebanese have at last been subjected to military service, when a new source of revenue may be created in the shape of the exoneration tax.

Some political significance attaches to the order which is said to have been given by the Commander of the French squadron in the Eastern Mediterranean to the commanders of the various units. The order requires that care should be exercised in ascertaining the nationality of vessels stopped, and that if the owners be Lebanese, they should be treated as French subjects.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, July 17.

Roumania and the Dardanelles.

Prince Hohenlohe-Langenburg, the new German Ambassador to the Porte, arrived on Thursday at Predeal and proceeded thence by motor to Sinaia. It had been reported that he would remain there for a time as the guest of Queen Marie, his sister-in-law, who had gone there the day before, but he only remained at Castle Pelesh a very short time, and proceeded, accompanied by Queen Marie, to Bucharest, where he was the guest of the King and Queen at Cotroceni. On Friday he had a long interview with Baron von dem Bussche-Haddenhaussen, the German Minister, and he left this afternoon for Constantinople, viâ Sofia.

The Prince was also received by M. Bratiano, and is said to have had long consultations with the King. Probably he has not been able to see many persons, otherwise he would have been in a position to note how very "pro-Entente" the general public as a rule is. Doubtless the question of permitting the passage of munitions to Turkey has been mentioned; but it is recognized by every Roumanian of any sense that the opening of the Dardanelles is of vital economic importance to the country, and any step tending to retard that event might have serious consequences. Not only is the opening necessary for Roumania to dispose of her crops, this year unusually plentiful, but she is in serious want of coals and other commodities, which, except in small quantities, can only reach her viâ the Dardanelles.

A Mysterious Explosion.

On Monday night there occurred at Cernavoda a terrific explosion on board a lighter loaded with 540 tons of petroleum, intended for the Serbian Government, and another lighter lying alongside, having on board 250 tons of benzine, also destined for the Serbian Government. The petroleum drums blown into the Danube floated blazing down the river for some kilometres, but, thanks to there being but little wind, the shipping escaped damage. The crews of both lighters were blown to pieces.

The cause of the fire is unknown, but there is a story about a mysterious airship having been seen crossing over Roumania and flying so low that (although it was night) persons could distinguish that there was one man only on the machine, who was seen to throw something as he passed over the lighters! The official inquiry instituted gives no credence to this story, but attributes the explosion either to natural causes or to one or other of the crews having broken the regulations relating to smoking.

One lighter was still burning yesterday, in spite of all attempts to extinguish the flames. The loss is reckoned at about half a million francs.

Summer Exodus.

For about eight days now Bucharest has been suffering all the trials of a real Roumanian summer, with tropical heat such has not been experienced for some years. In spite of the dubious political situation, which had hitherto kept back most of those who make a regular point of visiting one or other of Roumania's many summer resorts, there is now a general exodus, and during the last few days the Gara de Nord has presented a scene intensely interesting to those who are not acting a part. As most of the summer resorts only provide rooms with little but the barest furniture, the goods and chattels taken by the various departing parties are varied and often comic.

Bucharest's upper four hundred is now conspicuous by its absence, and the Chaussée is almost deserted; but those of the middle-classes who remain try to make life bearable by keeping indoors all day and patronizing the open-air cafés and cinema shows at night. The latter especially seem to do good business, and are crowded till midnight. In fact, Bucharest in its present broiling state does not seem to go to bed much before 3 a.m.

NEAR EAST BOOKSHELF.

THE EASTERNS OF THE WEST.*

Anyone who has travelled by the desert pathways of the East, where the nomad Arab lives and moves and has his being, will forgive us for noticing in this paper a book, by the author of "The Veil," which deals solely with the West. More readily still will they forgive us if anything we write induces them to read Miss E. S. Stevens's latest and most charming book on the nomads of the New Forest, because in it they will find something of the broad, clean freedom of their former travels.

We approached the work with mixed feelings. Miss Stevens, as author of "The Veil" and other books on the East, was one thing; the same writer as author of a novel dealing with gypsy life in our own country might be quite another. And books of this description can only be written by specialists. But from the moment that the low, husky voice of Mary James advised "Allward" to lie still, and we read the description of his surroundings, we knew that all was well: this was not the book of a writer who had travelled in search of "copy"; it was the work of one who knew.

Miss Stevens begins her story with the awakening to consciousness of her hero, a man of genius and position, who, in sudden and uncontrollable desire for the peace and simplicity of the forest, had jumped from his car as it passed through, and was found unconscious by the gypsies. A mistake in his identity seems to offer him an opportunity of escape from the chains of convention and ambition which had formerly galled him; he decides to remain with the nomads. Miss Stevens has treated her subject admirably. We have seldom read a book wherein divergent types of character are so faithfully portrayed. As we have said, only a specialist can write attractively of such peoples as the gypsies. Lack of intimate knowledge destroys interest; over-emphasis of the good and the bad that is in them leads to results even more deplorable. The author of "Allward" has combined her knowledge with the restraint of genius, and while her characters live, they are at no time permitted to masquerade. And the reader who follows the story of these wanderers of England can hardly fail to be struck with the similarity of temperament which binds their mixed race with the Eastern peoples from which they once sprang. In all quarters of the East we are familiar with the low brown tents which from time to time dot the face of the desert as their owners call a brief halt in their travels. We have seen the small column of smoke rise straight to the blue of the heavens from the camp fire, as, content with the companionship of a silent traveller, we have gazed unblinkingly into its glow. Here in England, albeit the wind-blown smoke is more fragrant, the surroundings necessarily more confined, we have found the soul of the people the same.

Nationalism and War in the Near East. By a Diplomatist. Edited by Lord Courtney of Penwith. (Published for the Carnegie Endowment for International Peace by the Clarendon Press, Oxford. 12s. 6d. net.)

Serbia: Her People, History, and Aspirations. By Woislav M. Petrovitch, Attaché to the Royal Serbian Legation to the Court of St. James's. (Harrap. 3s. 6d.)

THE BALKAN PROBLEM.

Sir Arthur Evans, the well-known authority on the Southern Slavs, has prepared, and Messrs. Sifton, Praed, and Co. have published, for the Balkan Committee, a diagrammatic map of Slav territories east of the Adriatic, which is of extreme usefulness. Two salient characteristics of the region covered by the map—namely, from the Adriatic as far north as Trieste and as far south as Scutari, and eastwards to the Drave, Danube, and Morava—are:—(1) The terrible complexity and admixture of nationalities and religion, and (2) the railway construction problems from the Adriatic to Belgrade and Nish. Regarding the former, even a cursory glance at the map shows that, if a pole were erected in the centre of a district inhabited by, let us say, a Mohammedan population, the shadow thrown in the morning would reach a district inhabited by Roman Catholics, and at sunset one populated by Orthodox Slavs. The intricacy of the whole Balkan problem thus becomes evident, and Sir Arthur's map should be studied by many of our notorious theorists, who declaim merrily and blandly on the "nationality" solution of the Balkan problem. They would, with the map as a friend and adviser, hesitate before indulging in rhetorical generalities.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1915. August	1915. July		1333. Ramadan	5675. Ab.
6	24	Friday	25	26
7	25	Saturday.....	26	27
8	26	**Sunday**	27	28
9	27	Monday	28	29
10	28	Tuesday	29	30 Ellul
11	29	Wednesday	30 Shawwal	1
12	30	Thursday	1	2

Sunday is the anniversary of the wedding, in 1889, of Princess Militza of Montenegro to H.I.H. the Grand Duke Peter Nicolaievitch of Russia.

Wednesday is the birthday of H.R.H. Prince Christopher, youngest brother of H.M. the King of the Hellenes.

Thursday will be the anniversary of the wedding, in 1883, of H.M. the King of Serbia to the late Princess Zorka of Montenegro.

To-day, being 25 Ramadan, is the birthday of T.I.H. Kadrie Sultana, sister to Fatima Sultana, and also of Saliha Sultana, daughter of H.I.H. Vahid-ed-Din Effendi and niece to the Sultan of Turkey.

The engagement is announced (says the *Egyptian Gazette*) of Prince Ismail Daoud, a cavalry lieutenant in the Egyptian Army, and Princess Samiha, daughter of the Sultan. Ismail Bey is the son of Prince Mohamed Daoud Pasha and Princess Sanieh, niece of the Sultan. He left the Military School in 1914 and served in the Sudan, where he became exceedingly popular with his superior officers and all with whom he came in contact. He is only 23 years of age.

The Egyptian War Office announces that his Highness the Sultan has conferred the Grand Cordon of the Order of the Nile upon his Excellency El Ferik Sir F. R. Wingate Pasha, G.C.B., G.C.V.O., K.C.M.G., D.S.O., Sirdar and Governor-General of the Sudan.

Prince Alexander of Battenberg is staying at Ramleh, at the Summer Palace.

A telegram from Constantinople, viâ Berlin, states that the Sultan has completely recovered from his illness.

Mme. Defrance, the wife of the French Consul-General, Cairo, was the victim of an accident while driving at Port Said on July 19. She sustained slight injuries, but has now practically recovered.

Arrivals at Alexandria from Europe on July 20 included Sir James Porter, K.C.B., M.D., the distinguished medical officer who has been called back to service in the Navy since the beginning of the war and will, the *Egyptian Gazette* understands, have charge of all the medical arrangements on the transports between Alexandria and the Dardanelles. He served as a doctor in the Egyptian War (1882) and the Sudan (1884 to 1885) and became Surgeon-General in 1907.

Mrs. C. M. Marling, wife of the British Minister at Teheran, gave birth to twin daughters on Sunday last.

Judge van Horne, of the Mixed Court of Appeal, and Mrs. van Horne left Egypt for Europe on July 27, viâ Port Said.

Judge N. G. Davidson and Mrs. Davidson left Khartoum on July 15 for England, where they will pass the remaining part of the summer.

Judge G. W. Williamson, Chief Registrar of Khartoum Province, left Khartoum on July 15 on leave.

Our Correspondent in Serbia writes (July 24):—Lady Paget, who has entirely recovered her health, has arrived at Uskub, accompanied by her husband, Sir Ralph Paget.

Mr. and Mrs. Abbas Ali Baig have left for North Wales, and will be away from home until the middle of September.

Miss Ethel McCaul has been invested by the Serbian Government with the Serbian Red Cross decoration for services rendered in connection with the organization of relief to the Serbian sick and wounded in the present war.

The Distinguished Service Order has been conferred on Captain C. Riding, formerly of the Egyptian Army, for gallantry and devotion to duty in connection with the operations at the Dardanelles.

The *Egyptian Mail* (July 20) announces:—The Rev. Father Nash, Army Chaplain of the 2nd Class, ranking as a Lieutenant-Colonel, has arrived in Egypt to assume the position of Senior Roman Catholic Chaplain to the Forces out here. Father Nash has come directly from France, where he has been doing good work for over seven months with the British Expeditionary Force. He fills the place of Monsignor Keatinge, who, it will be remembered, left Cairo as long ago as last July and has not been permanently replaced until now.

Major Alec Gardiner, Royal Engineers (formerly reported missing and now reported killed in action before Givenchy, on December 20), was the elder son of Lieutenant-Colonel R. Gardiner, R.E. (retired), and of Mrs. Gardiner, of 28, Barkston Gardens, S.W., and was born at Ulwar Rajputana, India, in June, 1873. After leaving Woolwich he was gazetted to the Royal Engineers on July 24, 1891, being then under eighteen years of age. Having completed the usual courses at Chatham, he was ordered to India, and, after a short period in the Military Works Department, joined the Railway Branch of the Government of India, in which he continued to serve up to the outbreak of the present war, with a short interval of war service at Suakim. (British and Egyptian medals.) In August, 1914, Major Gardiner was officiating Agent (Chief Administrative Officer) of the Oudh and Rohilkhund State Railway, and was Lieutenant-Colonel Commanding that railway's Volunteer Rifle Corps. He placed his services at the disposal of the Military Department, and was ordered to England, but was intercepted in the Mediterranean and sent straight to the front, where he was appointed a field engineer.

An engagement is announced between Edward Cyril Bowden-Smith, Egyptian Civil Service, second son of the Rev. F. H. and Mrs. Bowden-Smith, of Careys, Brockenhurst, Hants, and May Gladys, youngest daughter of the late Colonel Sir Alexander and Lady Moncrieff, of 21, Kensington Park Gardens, and Bandirran, Perth, Scotland.

On July 26, at Mombasa, British East Africa, the marriage took place of Dr. Alexander Macrae, of Sheikh Othman, Aden, with Louie, daughter of the late Mr. R. B. Bryce, of Greystone, Prestwick. The Bishop of Mombasa officiated.

The Times announces that a fresh name has to be added to those devoted English men and women who have given their lives in the cause of Serbia. The Hon. Richard Cecil Frederick Chichester, who died on July 31 at Nish, of typhoid fever, was the youngest son of Lord Templemore, and was in his twenty-sixth year. He went out to Serbia last November as acting honorary secretary to the first hospital unit of the Serbian Relief Fund, of which his cousin, Lady Paget, was the administrator. During the desperate situation created by the outbreak of typhus in the town of Skoplje he showed great capacity for organization, and contributed materially to the success of the unit in stamping out the epidemic. Later he was planning a scheme of relief for the civil population of Southern Serbia. His relations with the whole staff, and, above all, with the Serbian authorities, were of the most cordial kind; and he had been granted honorary rank as captain in the Serbian Army.

El Miralai Elderton Bey, Deputy-Assistant Financial Secretary, Sudan Government, has returned to Khartoum from the Dardanelles and Egypt.

Captain Ralph Micklem, Royal Engineers, who has been wounded while on service with the Mediterranean Expeditionary Force, was formerly attached to the Egyptian Army. He was born in 1884, and, joining the Royal Engineers in 1912, was promoted to his present rank eighteen months ago.

Lieutenant Richard Bowen Woosnam, 2nd Worcester Regiment, who is reported killed in action in the Gallipoli Peninsula, was formerly Game Warden in East Africa. He served through the South African War, but resigned his commission at the end of the war. In 1905 he accompanied Colonel Bailward on a journey from the Persian Gulf through Western Persia to Armenia, and on to the Black Sea. Two years later he accompanied Colonel Bailward on a second journey to the Caspian Sea and the Elburz Mountains. He rejoined the Army a few months ago.

In addition to the casualties in the Smyrna Contingent which we mentioned last week, we learn from a correspondent that Mr. Vivian H. Hadkinson, also of Smyrna, and also belonging to the 7th Service Battalion Rifle Brigade, was wounded on July 8 at Hooge, near Ypres. He is now in hospital slowly recovering from wounds, which were caused by shrapnel. We hope he may soon be fit for active service again.

Mr. McKinnon, who for some years resided at Alexandria, has been killed in action. He held a commission at the time in a Scottish regiment.

Miss Lillian Davies, daughter of Mr. Walter Davies, the well-known Cairo contractor, is making her début as leading lady at the Garrick Theatre in the "Girl in the Taxi."

The death at the front is announced of M. Edmond Barany, an employee in the Alexandria Municipality. The deceased was seriously wounded in Artois, and after some weeks in hospital died as a result of his wounds.

Mr. John Edelmann, of Cairo, is now in an officers' training corps in England.

Our Bucharest Correspondent writes (July 17):—

The Baroness von dem Bussche-Haddenhaussen, wife of the German Minister at Bucharest, has arrived with her children. After being received in audience by the Queen, the Baroness proceeded to Curtea de Argesh to pay her respects to Queen Elisabeth.

Herr von Kahlenberg, who was formerly attached to the Austrian Legation here, has just been appointed Councillor.

Herr von Rheinheben has been appointed Second Secretary to the German Legation.

The Baroness von Neurath, wife of the German Councillor at Constantinople, has been staying a few days at the German Legation here whilst *en route* for Constantinople.

M. C. Nano, Secretary-General of the Ministry of Foreign Affairs, has returned from leave and resumed his duties.

M. Arditti, Italian Consul-General at Roustchuk, accompanied by his daughter, is taking the waters at Slanic (Moldavia).

The death took place on July 20, at the American Hospital, Assiut, of Mr. R. P. Keene. Mr. Keene was on the Censorship of Telegraphs, and only recently went to Assiut. He was well-known in Tanta and the Delta generally, and was formerly headmaster of the school at Shebin-el-Kom, and for some time Assistant English Master at the School of Arts and Crafts in Boulak. He had spent nine or ten years of his life in Egypt, and was about forty years of age.

A British hospital with 200 beds, sent out by the Wounded Allies' Relief Committee of London, has been set up at Podgoritza, says a Cettinje telegram. The authorities and people gave the hospital staff a splendid reception.

FRIDAY, AUGUST 6, 1915.

THE WAR AND THE BALKANS.

The anniversary of the outbreak of hostilities in Europe offers a convenient opportunity for stocktaking in the Balkans. War has not violated the frontiers of all the States; but none has escaped its influence, and for every one, whether belligerent or neutral, there will be a disposition at this time to inquire into the position in which the close of the first year of the great struggle finds it. Much regarding the actual conditions in each country is hidden from outside observers and, indeed, from the people themselves. There are some Government secrets which it would be of particular interest to have revealed. Without the knowledge which they would give us, we are handicapped in arriving at the frame of mind in which the position is viewed officially. But from the information accessible to the general public we are able to form a fairly clear opinion of what is likely to be the verdict of history in regard to the situation in which the several Balkan States find themselves at the beginning of August, 1915. Of all those States none is more easily read by the contemporary historian than Serbia. She has long since placed all her cards on the table, and awaits judgment without fear or affectation. Before the outbreak of war the only country in Europe which appears to have formed a correct estimate of Serbia's potentialities was Austria-Hungary. It was the realization by the Government of the Dual Monarchy of what two successful wars had achieved for the Serbian people that brought about the Armageddon. Other European questions were closely bound up with the capacity of a strong Serbia to thwart Austro-German designs; but both in Vienna and Berlin there would have been a readiness to postpone those issues if it had been possible to deal with the Serbians alone. Germany and Austria-Hungary did not realize the close connection between all these questions until they had taken up a position from which retreat was impossible. Accordingly they cried Havoc, and let slip the dogs of war. By the irony of fate one of the first things they demonstrated to an unobservant Europe was the strength of Serbia, of which they alone had had any inkling. The Serbians have been saved by the efforts of their Allies, but their own prowess won the day for them within the limits of the task which they were set. They have provided a splendid example of national unity and devotion, and have proved themselves the formidable foes which Austria-Hungary feared to see them become. If their statesmanship has not been equal to their military valour, we must look for an explanation in the history of the Balkans. The end of the first year of war finds Serbia with her military reputation established, but unable to adopt the far-sighted views in her dealings with her Balkan neighbours which her own interests and those of the Peninsula as a whole would prompt.

Lack of statesmanship is the rock on which all the Balkan ships of state contrive to split. But while other Governments through shortsightedness sacrifice the future for the present, it has been left to the Turks to sacrifice both present and future without the least prospect of compensation at any time. When the Great Powers went to war the Triple Entente guaranteed the Porte the integrity of Turkish territory as a return for the maintenance of neutrality. Before two months had passed this guarantee was brushed aside and Turkey picked a quarrel with Russia and Great Britain. No attempt has ever been made by the Porte to explain its action in the light of the undertaking given to it by the Entente Powers. It was incensed, we know, by the unfortunate way in which the British Government took possession of two men-of-war building in British yards for the Turkish Navy. But that act, the consequences of which were neutralized by the guarantee of territorial integrity, did not justify a declaration of war; nor was there the least foundation of truth in the ostensible cause of the outbreak of hostilities, the menace to Turkish interests. The rewards promised by Germany to the Porte in return for its military co-operation will, without doubt, have been numerous; but not one would have stood the scrutiny of enlightened statesmanship. Compensation in Europe could only have been obtained at the expense of Bulgaria, a country at that time on friendly terms with Turkey; the question of the Ægean Islands could only have been settled favourably to Turkey at the expense of Italy, a country actually in alliance with Germany. If German promises concerned Egypt and the Persian Gulf as well, we can only wonder at the simplemindedness of the Turkish Government in imagining that the nation which aimed at the hegemony of the world would accept as a final solution of the world's affairs the substitution of Turkish for British rule in those spheres. Thanks to the fighting qualities of their army, the thoroughness of German methods of warfare and the mistakes of the British authorities, the Turks have put up a splendid fight at the Dardanelles, and have withstood the Allies' attacks for more than three months. Elsewhere, in Egypt, Mesopotamia, and the Caucasus, disaster has overtaken all their military efforts, and the Porte is probably aware for how long a time defeat can yet be staved off from the Dardanelles. That it should still possess the confidence with which it entered upon the war is out of the question. Germany has rendered it valuable assistance; but as Turkey's need increases, German help, both in men and munitions, diminishes.

Between the two extremes of Serbia and Turkey stand the neutral States of the Balkans. If a final judgment cannot be passed upon them, it is because their present attitude of neutrality is liable to be changed at any moment. We are, however, able to appreciate what the maintenance of neutrality for twelve months has meant for each country. It has meant in the first place, if war is subsequently declared, the curtailment of the campaign by so many months and the corresponding increase of the national resources. Until the event belies us, we may refuse to contemplate the possibility of Roumania, Greece, or Bulgaria joining the Central Powers. For each one the alternative has been and will remain neutrality or co-operation with the Triple Entente. Different considerations have swayed the different countries this way and that. For Roumania alone the issue appeared to be altogether straightforward. Her kinsfolk under Hungarian rule look to her for liberation, and she can only free them by force of arms. The opportunity now presenting itself to the Roumanians is never likely to recur; but the Bucharest Government still hesitates to commit itself. It prefers to see the country divided against itself and to risk its own reputation. Military considerations are known to be strong, and in the face of the Russian withdrawal from Galicia may be all-powerful. But, if that be the case, the Cabinet has been amiss in not taking the other leaders of the people into its confidence. The Roumanian Government has strained the loyalty of the nation and the patience of its friends abroad. Bulgaria's neutrality, on the other hand, has the merit of being consistent. She has declared herself for sale, and in the absence of any firm offer is prepared to grant options to either party. So far only the Central Powers and Turkey have accepted an option, but this fact does not deter Bulgaria from negotiations with their enemies. Her final choice between the belligerents will soon have to be made; for even if she has no occasion to fight, her equivocal attitude must be changed for a more benevolent neutrality. With Greece our review closes. Her national policy is determined by personal considerations. If she is inclined to congratulate herself on keeping out of the war, she must know that, as far as her reputation for statesmanship is concerned, she has lost ground in the Balkans and in Europe; not because she has refused to fight, but because she does not know her own mind.

AT KARS IN 1855.

Through the kindness of Mr. Arthur Baker we are permitted to reproduce the following extracts from letters which were written by one of his forebears who, under General Williams, took part in the glorious defence of Kars. They describe the grand assault made by the Russians on September 29, 1855—an assault which was repulsed with a loss of over 6,000 men to the enemy force. The defending force numbered about 15,000 men, the attacking force about 50,000. The city fell, it will be remembered, on November 18, the garrison being worn out by sickness and want of food, and it is pleasant to-day to recall the handsome tribute paid by the Russian General to General Williams and his heroic men. "You have," he said, "made yourself a name in history, and posterity will stand amazed at the endurance, the courage, and the discipline which this siege has called forth in the remains of an army. Let us arrange a capitulation that will satisfy the demands of war, without disgracing humanity." The writer of the letters, it will be noted, pays a tribute to the fighting qualities of the enemy; so that each side evidently appreciated the courage of the other. It is also interesting to note what is written (in the second letter) about the untrustworthiness of the Turkish officers; while the incident of the "party of Cossacks" robbing—but apparently not killing—the writer's servant shows how superior, even in those days, was the much-maligned Cossack to the civilized and much-vaunted Uhlan of to-day. But undoubtedly the greatest interest of the letters lies in the fact that they help us to realize more clearly the change that has come over the scene, not only in regard to methods of warfare, but also in the grouping of Allies, since they were written.

Both letters are dated from Kars, the first September 30, 1855, and the second October 9, 1855.

I.

I send you the account of the attack on our position yesterday. The enemy were reported to be advancing at four o'clock a.m., and at half-past four we opened fire upon the head of the columns as soon as they became visible. The attack on the Sackmash front was composed of three columns, the first directed on Sackmash Tabia, the second on Yeuksek Tabia, the third on the breastwork called the Rennison lines. The attack commenced with all the three columns simultaneously. Column No. 1 succeeded in turning the left of the breastwork attached to Sackmash Tabia, and was thus enabled to attack the redoubt both in front and rear, while three guns, being put in position behind the breastwork on the right, kept up an incessant fire on Yeuksek Tabia, with the view of keeping down the fire which might have annoyed the rear attack of Sackmash. Column No. 2, favoured by the nature of the ground and the darkness, carried the small breastwork B, turned the flank of Yeuksek Tabia, and stormed the salient to the right rear; but the first attack, not being in sufficient force, was repulsed by a musketry fire, and, a gun being got in position in the angle, a column which was forming among some tents in rear was dispersed by a heavy fire of grape. Column No. 3 stormed the Rennison lines, but, being coolly received by the riflemen of the Guard, they were at once repulsed and the column nearly destroyed. All further attempts to attack this point were prevented by the artillery fire along the line from C to E.

Our right being thus disembarrassed, General Knietz led four companies of the Foreign Legion against the point B, occupied now in force by the enemy, who were warmly engaged with Yeuksek Tabia. The position was carried with the bayonet and the enemy driven out with loss.

The fighting was now confined to Sackmash Tabia, all attempts to storm by advancing under cover of the right flank were defeated by the fire from B and C, and, finally, the column there engaged was driven from its position by a company of rifles; and a battalion coming up with support, being intercepted by our reserves, had to retreat across our rear from A to F under a heavy fire at Chakmak Tabia. It encountered the two guns that arm the breastwork and its garrison, and was so warmly received that the whole dispersed. There now only remained the column in front of Sackmash, which, after heavy losses, still obstinately tried to carry the redoubt from the left flank, and was powerfully supported by a regiment of Chasseurs, who had effected a lodgment behind some rifle pits in its front. These were turned and the enemy in part dislodged by an attack from B, and the garrison of Sackmash, making a sudden sortie, attacked the enemy on its flank with great vigour. The column wavered and broke, and was pursued by our troops to the road at the foot of the position with great loss. All the batteries being now disengaged, a heavy fire opened on the retreating enemy, all attempts at re-formation were prevented, and the affair thus ended in the total defeat of the enemy at every point.

While these events occurred in our front, the English Tabias in our rear were attacked by two columns, and the garrison, being only composed of about 460 men for the whole line, were overwhelmed by the masses of the enemy, and retired to the new work in the rear of the lines. There they made good their ground. Reinforcements arrived from the Carras Dagh, and a heavy fire from Fort Lake and Arab Tabia having seriously annoyed the enemy, they were at length driven with the bayonet from the positions they had carried, and retreated towards Chakmak under the fire of the whole line.

The engagement lasted from 4.30 to 11.30 a.m., a period of seven hours, during which the fire was incessant. The enemy left on the field about 6,000 dead and about 12,000 muskets and rifles. Our loss in killed and wounded does not amount to 1,200 in all.

II.

I write these few lines to inform you I am quite well after the battle of September 19, which lasted for seven and a-half hours. The Russians left on the field upwards of 6,000 dead; our loss in killed and wounded does not amount to 1,200. I was in the battery in the midst of the firing. The officer who I am with was struck on the leg by a spent grape shot. My trousers was ripped across the instep by a musket ball, which just grazed my boot, but luckily did me no harm, which I am very thankful for. I am sorry to say that I lost all my clothes. My servant packed them all in my saddle-bags, and in taking them down to the town for safety he was met by a party of Cossacks, who came round in our rear. They knocked him down and took everything from him. Since the battle I have been up every night keeping watch in the redoubt, expecting every moment a fresh attack of the enemy. I am now more like an officer than an interpreter, for the officer who I am with is rather poorly, so that General Williams, who was very pleased with the way in which I behaved myself in the last action, has given me a post to defend and to receive his orders, so that I may send the troops to any point where they may be wanted, for there is no dependence to be put on any of the Turkish officers. I am likewise aide-de-camp to General George Knietz, an old Hungarian General who speaks English.

In the redoubt where I was during the battle the Russian rifles turned our flank, and several leaped the ditch and scaled the rampart. Three fell dead close to my feet. The officer leading them charged the officer who I am with, but one of our soldiers asked him, "Is that a Russ?" He answered "Yes," when the soldier discharged his musket and he fell dead in the ditch. The total loss of the enemy is supposed to be about 14,000 or 15,000 killed and wounded. They did not fight like men, but like demons. The action commenced at 4.30 a.m. I and Major Teesdale had just returned from our patrol, which we make every night. I had dismounted close to my tent when an officer came to report that the enemy was close upon us. I directly mounted and rode off to the redoubt. I had hardly mounted when the first gun was fired, and the whole hillside was filled with the cries of the Russians and our Turks, the Russians crying "Hurra Boga!" and our troops crying "Allah! Allah!" Our men received them with a volley of musketry and grape. In one spot, where there is a flanking line of works named Rennison Works, they left 850 dead, besides the wounded which they carried off. The Turkish Commander-in-Chief has promised me a medal and also a nishan of the Order of Medjidieh, which I think will be something to boast of in after-time. I suspect I shall stop in Kars all the winter with one of the officers. The General and the rest of the officers will return to Erzeroom till spring, as soon as the enemy raises the siege, which I think will be in a few days, as he is sending off his heavy baggage as fast as he can. . . . I received your letter dated May 22 on September 9. I do not know how it was delayed so long. Excuse me not writing before.

So accept this from your affectionate son,

J. R. RENNISON.

Excuse this scrawl, as it is very cold where I am. This is written in a tent some 8,000 ft. above the level of the sea. The mountains around us are all covered with snow. I have got some Russian relics, which I will send home as soon as I am able.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE FUTURE OF CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—May I venture to trespass upon the valuable space in your columns to correct a misconception which appears to exist with regard to our newly annexed Island of Cyprus, now again become British after a little more than seven hundred years have elapsed since Richard Cœur de Lion set foot upon its shores? I am astonished to see that there are a few persons actually advocating that Cyprus should be ceded to Greece, and, as any such suggestion can only be made by those who are ignorant of local conditions, and have never visited the island, I feel it my duty, as one who has an intimate acquaintance with Cyprus, to raise my voice in protest against any proposition of the kind.

Those who raise this feeble cry maintain that Cyprus is a purely Greek island, whereas this is not in reality the case. Far removed from the Ægean, and situated at the extreme end of the Mediterranean, Cyprus has always been linked to Asia rather than to Europe, and its destinies have been bound up with those of Syria or Egypt, and not with those of Greece and the Archipelago. In ancient times the power holding Egypt has almost invariably held Cyprus also, and our protectorate over the former and annexation of the latter is a striking example of how history repeats itself.

Cyprus cannot be regarded as a true example of an Hellenic island. It is far less Greek than Rhodes, which Italy holds, and bears no analogy to Corfu, which we relinquished, including as it does a large Moslem element among its population, some 60,000 souls, who are steadfast in their loyalty to Britain. Indeed, no sooner was the island annexed than their leaders, in a memorial to the Home Government, expressed their satisfaction at the change of status and desired an assurance of the permanence of British rule. Great Britain is the greatest Mohammedan power in the world. In view of the magnificent loyalty of her Moslem subjects, she cannot even contemplate the abandonment of those of Cyprus, who have as much right as any other section of their co-religionists to claim the protection of the great Empire of which they form an integral part. Such an action on her part would be incompatible with her position as a champion and upholder of Islam.

The other element of the population of Cyprus, who belong to the Orthodox Church, are an industrious and law-abiding people content with British rule, and any agitation for union with Greece is fomented by self-seeking demagogues towards whom our tolerant Government has adopted a far too lenient attitude.

Apart from these considerations, Cyprus from its very position must always remain British. Its situation over against Cilicia, commanding Alexandretta, and in close proximity to the Syrian coast, gives it a strategic value which cannot be too highly estimated, now that the Turkish Empire is upon the verge of disruption and many of its Asiatic provinces likely to be divided among the powers of Europe.

Cyprus has been called the key to the Levant, just as Heligoland was the key to the open sea-board of Germany. Surely we have paid too dearly for our unconsidered cession of the one island, to repeat the mistake!—I am, etc.,

VIATOR.

July 16, 1915.

FOR ARMENIAN SUFFERERS.

To the Editor of THE NEAR EAST.

Sir,—The following telegram, signed by Ayvadian, Archbishop of Van and Aram, Governor of Van, reached me on the 27th ult.: "Besides Van, the provinces of Chatakh, Moks, Sparkert, Mamertank and Khizan are saved; the rest are ruined and devastated. Men, women, and children have been massacred. Twenty thousand people are homeless. Famine and infectious diseases prevail. Many volunteers are sick and wounded. Notwithstanding assistance from the Russian Government and from Armenians in the Caucasus, there is great want of doctors, drugs, ambulances, provisions. The situation in Bitlis, Moush, Diarbekir is most terrible. We beg urgently for immediate help."

In another appeal, issued at Tiflis, the Governor of Van mentions that 8,000 people are down with typhus and dysentery on and beside the lake of Van, and that they have not even enough bread, let alone all other necessaries of life. Our Hon. Treasurer at once cabled the sum of £400 to our Consul-General at Moscow for relief of these sufferers. Our fund amounts to a little over £2,000, of which £1,400 has been cabled out for relief; the rest has been, and is being, spent in drugs to send to Tiflis. Our resources are nearly exhausted. Will the generous British public enable adequate help to be sent?

Viscountess Bryce is President of the Armenian Red Cross and Refugee Fund, which counts among its Vice-Presidents Lady Henry Somerset, Lady Frederick Cavendish, Viscount Bryce, and many others. The Fund was organised by the Armenian Society, and no deductions are made from contributions for working expenses.

I shall be thankful to receive and acknowledge any sums sent me in response to this appeal.—I am, sir, yours faithfully,

EMILY J. ROBINSON,
Hon. Secretary, Armenian Red Cross and Refugee Fund.
35A, Elsham Road, Kensington, W.

PATRIOTIC BRITONS ABROAD: GIFT TO THE NAVY.

To the Editor of THE NEAR EAST.

A movement to unite British subjects resident in foreign countries and enable them to take their part in the defence of the Empire was announced in the Press shortly before Christmas.

This movement originated among a number of patriotic British subjects resident outside the Empire, who were stirred by a feeling of intense loyalty to the motherland and a desire to help her in her time of need. It was felt by many of them that it was not fair that the whole cost of the war should be borne by the inhabitants of Great Britain and her Overseas Dominions, and that British subjects in foreign lands should take their part.

This feeling was soon translated into action, and a league known as the Patriotic League of Britons Overseas was the result. His Majesty the King is Patron of the League, and an influential Central Committee, with Lord Selborne as chairman, has undertaken the necessary organisation.

Large numbers of Britons who were resident abroad at the outbreak of the war have come home to serve with the colours. Many had, perforce, to remain abroad, and it was considered that the most appropriate contribution they could make towards the fighting forces of the Empire would be a gift to the Royal Navy. Never before has the value of our sea supremacy been so fully recognised as it is to-day, never before has such an opportunity occurred for our fellow subjects abroad to show their appreciation of the protection which the British Navy affords them.

Public meetings have been held in every part of the world to advocate the proposal. It is too early as yet to forecast the ultimate result of the appeal. It is, however, very satisfactory to be able to report that no less than 105 branches of the League have been established within the short space of six months—probably a record in organisation—and upwards of £35,000 has already been received.

After consultation with the Admiralty, it has been decided to purchase with this money immediately a squadron of ten large seaplanes of the latest and most approved type. The placing of the contract has been left to the Admiralty, and a cheque for £35,000 has been handed to the First Lord, who has acknowledged the gift in the following letter:—

Admiralty, Whitehall,
July 23, 1915.

My Dear Aldenham,—On behalf of the Board of Admiralty, I have to acknowledge, with our hearty thanks, the receipt of the cheque for £35,000 which you have sent me in the name of The Patriotic League of Britons Overseas.

This practical manifestation of the loyalty of the King's subjects outside his Dominions will equip the Royal Navy with a squadron of seaplanes of the latest type, to be named "Britons Overseas." In this manner the aim of the League will be realised and expression given to the spirit of helpful loyalty to the Empire which your report of progress shows to be shared by Britons all over the world.—Yours very truly,

ARTHUR JAMES BALFOUR.

It is the hope of the founders of this League that every British subject resident outside the Empire may be given an opportunity of helping the mother country at this crisis, and no doubt when the news of the progress of the League becomes widely known, many new branches will be formed.

The subscription lists for the seaplane fund will be kept open until further notice, and additions to the squadron will be made as funds permit. This fund is quite independent of the aeroplane fund which is being organised *within* the Empire by the Over-Seas Club, an association with which the League is working in close and friendly co-operation.

British subjects abroad who are anxious to further this movement are requested to put themselves in touch with Mr. W. Maxwell Lyte and Mr. Evelyn Wrench, Joint Hon. Secretaries of the League, General Buildings, Aldwych, London, W.C., who will be pleased to forward full particulars.—I am, etc.,

ALDENHAM,
Vice-Chairman and Hon Treasurer.

July 30, 1915.

Any newsagent or bookstall in the United Kingdom can supply copies of "THE NEAR EAST," which are on sale early on Friday morning. Should any difficulty be experienced in obtaining the paper, the Manager would be glad to receive a post card giving particulars, and he will take steps to rectify the matter.

TANGIER TO TEHERAN.

It is good news that the British Seamen's Hospital in Constantinople is not to be sacrificed, and I congratulate all those who have worked hard to achieve the satisfactory result. Another pleasing item of news that reaches me, by a very indirect route, from Constantinople is that the Turks most scrupulously respect our hospital ships. There have, of course, been some ugly tales about the way our wounded have been treated in the Gallipoli Peninsula; but these things are, I imagine, the rare exception, and if traced to the source would probably be found to be the work of Kurds—or Teutons. On the whole, the real Turk appears not to have disgraced himself, though the company in which he finds himself to-day certainly does disgrace him.

***

The appointment of Hakki Pasha as Turkish Ambassador at Berlin reminds me of a remark made about him by a friend who has known him for many years. It was when Hakki was over here, in connection, I think, with the negotiations carried on between this country, Turkey, and Germany regarding the so-called Baghdad Railway and the Persian Gulf region, and my friend had to see Hakki frequently at his hotel. Meeting him one day on his way to the great man, I remarked that he appeared to be in no hurry. "No," he replied, "I am not. Nor is Hakki. He doesn't mind how long the negotiations drag on. In fact, the only difficulty is to get him to attend to business at all. You see, he is drawing fifteen pounds a day for expenses, and he is quite enjoying his stay in London." "But," I ventured to ask, "is he actually drawing that sum, or is it what he is supposed to receive?" "Well, he is still here!" said my friend, and smiled.

***

Hakki, by the way, might very well pass for a German as far as outer appearances go. Bearded, broad-featured, spectacled, rather arrogant-looking, he looks far more like a rather-too-prosperous Hamburg merchant than a real Turk. As a statesman he has not a brilliant record. He was Grand Vizier when the Turco-Italian War broke out, and probably he was more surprised than anyone else by that event; for he had been boasting to his intimates that he held the Italians in the hollow of his hand, and he was convinced that they did not mean business. The Italian ultimatum was handed to him as he was playing bridge at his club, and it took him some time to realise that it was not "a joke." Afterwards he blamed the Germans chiefly for the war—therein showing greater perspicacity than usual. Now he goes to Berlin as the representative of his country's interests.

***

I cannot claim to be a philatelist myself, though I did at one time very nearly yield to the fascination of collecting in earnest. But I know that many readers of THE NEAR EAST are keenly interested in the hobby, and for their benefit I have pleasure in reproducing the following extract from a letter, written from Constantinople on July 8 and kindly forwarded to me by a valued correspondent:—

> As the 10- and 25-piastre stamps have been used up, the Post Office authorities have recently surcharged the 100- and 200-piastre stamps. The latter, which bears the Sultan's portrait, has been surcharged for 25 piastres, and has also received the superscription "El Ghazi." The stocks of both of these denominations only amounted to a few thousands, and they were quickly bought up by speculators. It seems likely that very few will reach the stamp dealers in London or Paris excepting through Berlin or Vienna. I have already seen some in the shop windows of dealers, marked 30 piastres.

This will probably prove tantalizing reading to ardent philatelists in this country. But I hope they will resist the temptation to try dealing with the enemy.

***

My note about the transliteration of the name Suk-es-Sheyukh has led a correspondent to write to the editor, who has passed the letter on to me. I have read it with much interest, and wish I could print it just as it is written; but, unfortunately, the writer has in places introduced Arabic lettering, which cannot be reproduced here. Omitting the Arabic, however, his letter runs:—

> I apologise to "Corsair" for venturing to differ from the "official communiqué" quoted by him on page 360 of your issue of July 30 as giving the most satisfactory spelling of the name of the village recently captured by our forces on the Euphrates. The "proper" spelling is "Sooq-ush-shu-yookh." It is just as easy, or uneasy, for "the man in the street" to write and pronounce sooq-ush-shúyookh, which has the virtue of being correct, as it is for him to write and pronounce "Suk-es-sheyukh" or "sook-esh-shay'ookh," both of which are incorrect. Suk = a goad; sook = a corner (of an angle); sooq = a bazaar or a market-place of shops. Shaikh (not sheikh) = an old man; shuyookh is the plural of shaikh.—Yours, etc., SHOOKH.

I hasten to assure the writer of this friendly criticism that there is no need whatever for him to offer any apologies. It is a very real pleasure to me to receive such communications, and I am sincerely grateful for them. But as to the English rendering of this particular name I am afraid we must just agree to differ.

***

The transliteration of Arabic words—and, for that matter, the rendering of hundreds of names of places in the Near and Middle East—is an extremely difficult matter. If only "Shookh" could hear the forcible way in which certain editors, who shall be nameless, express themselves on the subject, he would be surprised—and perhaps shocked! Without the introduction of a lot of diacritical signs and accents, it seems to me it is a hopeless job to make the average reader, who has never been in the East, get anywhere near the correct pronunciation of many Arabic and Turkish names and words. And I am tolerably certain that the introduction of such signs will never "catch on" with the "man in the street," to whom "Shookh" refers. For serious students it may, and probably will, do so eventually. In fact, I believe the R.G.S. and other bodies are even now tackling the question seriously, and, of course, there are already a good many systems of the kind more or less familiar to everyone who has ever studied Arabic at all. The trouble is that there are so many of them, instead of one standard system.

***

Without attempting to go into this question at length, I may illustrate some of the difficulties attending it by giving the results of a comparison I have just been making, after reading "Shookh's" letter. He says that suk = a goad; sook = a corner; and sook = a market-place. On turning to Catafago's English-Arabic Dictionary I find that he gives only *mihmaz* as the Arabic for "goad"; *zawiyat* for "corner"; and *suk* for "market or market-place; while Steingass, in *his* English-Arabic Dictionary, gives *minhaz* for "goad"; *zawiyat* and *qurnat* for "corner"; and *sauj* for "a market." Again, Catafago gives us *shayk* and *shayukh* for the words we usually (though quite wrongly, I admit) write "sheikh" and "sheyukh"; while Steingass gives *saih* and *suyuh* for the same words. I have not ventured to ask the printer to reproduce the diacritical marks and accents even of Catafago, far less those of Steingass!

***

I may return to this subject on some other occasion, but for the present I must content myself with pointing out that, however incorrect it may be from the scholar's viewpoint, the spelling "Sook-esh-shay'ookh" has the merit of tempting the "man in the street" to make some attempt to pronounce it; while the substitution of the "q" for the "k" in "sook" would probably alarm him, and lead him to ask what on earth the q was doing without the support of its customary u. But I am not sure that "shuyookh" is not a better rendering than "shayookh." I heard the name pronounced both ways by the local Arabs, and could never be quite sure whether the sound was an "a" or a "u." And, by the way, it may be worth while to add that I never once heard any Arab in that part use the word "zawiyat" for "a corner" or "angle"; sometimes it was "qurnat," but much more often "rookhn," if my memory serves me aright.

THE PRESS ON THE NEAR EAST.

The Dardanelles.

Dr. Walter Leaf contributes to the (July) *Quarterly Review* an historical study, "The Dardanelles," which is of much interest. Comparing the present war with the Trojan war, he remarks that the "Turks and Germans are fighting for the same object as Trojans and Lycians . . . to keep the ships of the west from commerce with the Black Sea." The King of Troy, we are reminded, "was able to close the Straits to ships if he chose," and to convert his fortress, so to say, into an exchange:—

That was the source of his wealth and power. But it was a power intolerable to the enterprising Greeks, just as it is intolerable for us that all the world should be cut off from the rich granaries of Russia and the Danube plains. The Achaians fought, and we are fighting, to insist that this all-important waterway shall not be closed against the needs of the human race.

The Black Sea trade has been important to the well-being of mankind from the very earliest ages. The shores of the great inland sea are to us, as they were already in pre-historic days, the birthplace of raw materials of the highest importance. Though the oil of Baku must not be forgotten, it is as one of the great cereal areas of the world that we think of the plains that surround the northern and north-western shores. From Sulima, Galatz, Braila, and the other ports of the Danube, from Odessa and Nikolaieff, from Varna, Burgas, and Kustendje, come vast quantities of wheat, maize, barley, and oats. It is by cutting off these supplies that Turkey struck her worst blow at the west before she had fired a single shot. The only outlet for these immense supplies is through the Dardanelles; and the power which is able to close the Straits can throttle at once an important part of the food of the world.

Balkan Ambition.

The *Morning Post* (August 3) published an interesting despatch from its correspondent at Budapest, who quotes from *Az Est* concerning an interview given to its Sofia correspondent, Dr. Alex, by M. Radoslavoff, the Bulgarian Premier. The journal remarks that Bulgaria's intention of joining in the war is now plain, and continues:—

In any case, M. Radoslavoff is resolved to realize the national aspirations of the Bulgarians, with whom or against whom he does not care. The winning over of Bulgaria or the losing of her help will be the greatest diplomatic success or blunder of the century. A Roumanian statesman said a few days ago that the Balkan situation will be all ripe in August, and that by that time Roumania and Bulgaria will have decided as to what course to follow. The crisis is at its height, and it remains for European diplomacy to show who will win in this most interesting combat.

The *Morning Post* correspondent adheres to the opinion that Bulgaria recognizes that her ambition can only be realized by an understanding with the Entente Powers, and says that her intervention has only been delayed by the Austro-German successes in Russia.

Great efforts are being made in Sofia to reconcile the two Ghenadieff factions, and the Government being behind this movement, it is clear that M. Radoslavoff would like to see M. Ghenadieff reinstated. All these minor events and sayings of M. Radoslavoff and a thousand other seemingly trifling details are, to my mind, most important, for they carry in themselves the seeds of great issues, and may yet decide the future of the Dardanelles and Constantinople and lead to Balkan unity.

Our Prospective Allies.

Commenting upon Mr. Asquith's recent reference in the House of Commons to the possibility of financial advances being necessary for the support of further allies, "A Diplomatist," writing in the *World*, concludes that the Prime Minister could only refer to one or other of the Balkan States. He regards the delay on the part of these States as being due to the disinclination of the "two parties to the bargaining to express their views in concrete form," but points out that this is hardly the time for long-drawn-out negotiation:—

The point which is of crucial importance is whether in this give-and-take business the interests of all the nations concerned are readjustable. There is no reason whatever why they should not be. Greece could look for very extensive compensation in Asia Minor, as well as in those parts of Epirus which she does not already hold. If Serbia has to make concessions to Macedonia, there is always Bosnia-Herzegovina. Roumania has but few interests in Macedonia, since the existence of the Kutzo-Vlachs has never been made a pretext for territorial aggression. Her interests lie almost exclusively in Transylvania and the Bukovina, and if she could be assured of the possession of Czernowitz, the problem, so far as she is concerned, would be adjusted. There only remains Bulgaria. Her interests lie solely in Macedonia, and not in Thrace, although even there the Entente Powers would have no objection presumably to her progress.

The writer considers that our policy in respect to the Balkan peoples needs to be more exactly defined, and thinks that it may be so with the return of Sir Edward Grey to the Foreign Office.

Bulgarian Opinion.

L'Echo de Bulgarie (7/20 July), in a leading article, entitled "Mentalité Dangereuse," is much concerned at the attitude of Greece and Serbia towards the Allies. The paper says that the Greeks, who are frequently lauded in the French Press for their sympathies with the Allies, have now revealed their true policy in their attitude towards Russia in her bid for Constantinople. In summing up the first portion of his article the writer says:—

La Russie, qui aspire à Constantinople, et l'Italie, qui garde le Dodécanèse et veut s'étendre sur la rive opposée de l'Adriatique, ne sont pas les seules à recevoir des menaces ou des imprécations; l'Angleterre, dont la flotte cherche a refréner la contrebande de guerre dans les îles et les côtes du Levant, n'est pas plus ménagée. Reste la France, mais son tour viendra aussi et l'on trouvera bien des motifs pour lui faire la leçon.

In returning to the question of the activities of our fleet, in its next issue, the same paper says:—

La police rigoureuse que la flotte britannique exerce dans la Méditerranée pour enrayer la contrebande du guerre continue de soulever en Grèce une très vive agitation. Les journaux d'Athènes font un vacarme assourdissant contre ce qu'ils appellent une atteinte à la liberté du commerce et le blocus des côtes helléniques. Pour se décider à exercer une surveillance sévère sur les eaux grecques et disperser ainsi leurs efforts, les Anglais ont eu, sans donte, d'excellentes raisons, et les cris qui partent d'Athènes ne sont nullement les protestations de l'innocence.

The paper points out that, although Bulgarian commerce by way of Dedeagatch is sensibly affected by our naval measures, it is accepted as an act necessary to war, and is not regarded as unfriendly to the nation.

Germany and Constantinople.

The *Manchester Guardian* (July 30) devoted a leading article to the consideration of Germany's next move, dealing with it in connection with Enver Pasha's alleged promise to his troops that Germany was shortly undertaking a campaign against Turkey. After enumerating the alternative attacks that may be contemplated by Germany should she be able to release a large body of men from Russia, the *Guardian* continues:—

In Athens, whence comes the story about Enver Pasha, they think that it is Serbia that would feel the first shock, and it is not impossible that they are right. If the Turks are becoming, or should at any time become, really short of munitions, the Germans might well attempt to crush Serbia in a rapid campaign in order to break their way through to Thrace and save Constantinople.

This would mean crossing Bulgarian territory, but the Germans might be prepared to leave to chance the difficulties in that connection until it became imperative to demand a passage for her troops.

As yet these are but speculations, and they will remain such as long as Russia maintains her stubborn fight, but if things went really ill with Turkey and well with the German campaign against Russia, another attack on Serbia would be not unlikely.

That some such intention on the part of the authorities is suspected in Germany is evident from the following paragraph quoted from a despatch of Mr. Stanley Naylor, special correspondent in Serbia to the *Daily Chronicle* (August 4), who recounts the opinion of a young German airman who was forced to descend in Serbian territory:—"I assure you we Germans would not have left Belgrade as easily to the Serbians as the Austrians did; and when operations break out with Serbia afresh it will be found that our first line of defence is entirely German. Already German troops are massed up in readiness across the Danube, as some of you have been able to see through your binoculars. The Austrians are to be entrusted with no more vital work."

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

THE NEAR EAST reported last week that Dr. Stoyanoff, of the Bulgarian Ministry of Finance, had left Sofia for a *tour de finance* via Budapest and Vienna to Berlin. According to the *Koelnische Zeitung* (says a Central News message from Amsterdam), an important group of Austro-German banks under the presidency of the Disconto Gesellschaft has obtained an option upon the first issue of 250,000,000 frs. of the Bulgarian 500,000,000 frs. loan. My personal impression is that the *Koelnische Zeitung* is trying a gigantic game of bluff—as per usual. Bulgaria contracted a loan in Germany last July for 500,000,000 lewas. This was before the war broke out. The Diskonto Gesellschaft was one of the contracting banks, and through it and its partners a sum of 120,000,000 lewas, the first *tranche* of the loan, was duly paid. Since then there have been difficulties in getting the German banks to fulfil their part of the loan bargain. Dr. Stoyanoff, if, as it is alleged, he is travelling to Berlin and Vienna with a financial object in view, is, to all intents and purposes, bent on exacting from the defaulting banks the further instalments of the loan long since fallen due, so that, to speak of the Diskonto Gesellschaft having obtained an option upon the first issue of 250,000,000 frs. is a blatant distortion of facts. The bank is merely being asked either to pay up, as per its agreement, or to cancel it. On the other hand, the *Koelnische Zeitung*, in trying to paint Bulgaria as about to contract a loan with our enemies, intentionally aims at harming Bulgaria in our eyes. This she cannot do, because we have complete faith in King Ferdinand's people. Besides, the Cologne paper's assertion by no means implies that it is truthful—on the contrary. But should German banks really see their way, in the climax of their financial glory, to hand over 250,000,000 frs. to Bulgaria, be sure that it will be done in such a way that Bulgaria never sees a penny of the money, but, nevertheless, owes the whole sum to her altruistic bankers. It will not have been the first time that Germany has acted thus faithlessly.

***

Take Turkey, for instance. Our Athens Correspondent last week reported at length the issue of, roughly, £T6,000,000 in bank notes, covered in its entirety by gold deposited in the Reichsbank. I have gone to some pains to examine this wonderful financial operation, due to the genius of Djavid Bey, and though the full details cannot be published at the present time, the following will serve to show how the deal was worked:—Turkey, being in need of war funds, attempted to issue bank notes guaranteed by the surplus of certain tithes collected by the Ottoman Debt. This scheme fell through, and then Djavid Bey had one of his luminous inspirations. Travelling to Berlin and Vienna, he obtained a loan of £T6,000,000 in gold, which was deposited (so it is said) in the Reichsbank and accredited to the Ottoman Debt Administration. Thereupon Djavid returned to Constantinople, and banknotes to the value of £T6,000,000 were issued, guaranteed by the Ottoman Public Debt Administration. Naturally, the British and French delegates of the bondholders objected to this guarantee being given, but for political reasons, at a time when Italy had not as yet thrown in her lot with us, they were not sufficiently backed by their Governments. So the scheme was carried out, and the Ottoman Debt's guarantee was given—how could it be otherwise when only the Austrian, the German, the Turkish, and the Italian delegates were present to vote in Constantinople, and the first three were only tools in the hands of Berlin? This brings us to the consideration of the scheme as such. Turkey issues bank-notes to the tune of £T6,000,000, covered by gold deposited in the Reichsbank, and guaranteed by the Foreign Bondholders. In all probability there is no such gold, only a credit in favour of Turkey, but even if the gold were really there it will have been used up long before the war is over. So that the banknotes will have become worthless, and will have to be met—theoretically, anyway—by the Public Debt Administration, and in reality by Turkey, the catspaw of German financiers. In other words, a scandalous swindle, and an illegal manipulation of an international organisation.

***

But the Germans are, unfortunately, capable of many things that cannot be countenanced in civilised countries. I have referred to the *Koelnische Zeitung's* insinuating remarks concerning Bulgaria, and my attention has now been called to a paragraph which appeared on July 23 in the *Norddeutsche Allgemeine Zeitung* of Berlin, the *official* paper of the Prussian Government. The paragraph says:—"In their financial report, No. 339, of July 5, 1915, written in French, Messrs. A. Ruffer and Sons, an English firm of bankers, devote the following paragraph to the Balkans:—'Quant aux Roumains et Bulgares, ils feront d'abord leurs récoltes les vendront et ne feront probablement rien. Peuples dont la moitié slave et l'autre moitié ne se lave pas, a dit un boursier.'" The German paper's comment is that "it will be of interest to the Roumanians and Bulgars to hear how they are regarded by the English."

***

I cannot let the above insinuating paragraph be circulated in Roumania and Bulgaria without making some comment. The German paper calls the firm in question "Ruffer and Sons," deliberately omitting the German diæresis on the "u" so as to make it appear English. The firm is Rüffer and Sons, bankers and merchants, of Lombard Street, and, I have been given to understand, they are of Swiss origin. I have also been given to understand that the sentence in question (which certainly cannot be taken as an expression of British opinion) was contained in a private report circulated among the bank's clients, and that whosoever gave the information to the German Press was guilty of a gross breach of faith. This notwithstanding, the firm stands by its statement, and "hopes that it will do some good."

***

I do not share their optimism. In a time of great diplomatic tension and political uncertainty, semi-humorous statements such as those issued by Messrs. Rüffer and Sons are entirely out of place and can do no good. They give the enemy, ever on the look-out for possible statements which can be so turned and twisted as to discredit Great Britain in neutral countries, an opportunity for acting in deliberate bad faith. In this particular case, moreover, I can state definitely, for the benefit of the German Foreign Office gramophone, that the opinion of Messrs. Rüffer and Sons, as expressed, is the opinion of that firm alone. I do not think that any "British-born" firm would at the present moment have committed itself to any such impolitic utterance, of advantage only to our enemies if they came to hear of it. As for the *Norddeutsche Allgemeine Zeitung*, its procedure is beneath our contempt.

***

News from Constantinople during the past week is most conflicting—and certainly not hopeful. A Sofia telegram says that the Galata Bridge has been blown up. There is, of course, no confirmation of this report. Another message from the same source says that advices from Constantinople state that another large fire broke out there on July 26, eighteen houses near the German Embassy and the German Hospital being destroyed. The German Hospital was threatened. It is estimated that upwards of 1,500 houses have now been destroyed by fire.

***

These Constantinople fires are one of the curses of the country, as I have already pointed out, and are a source of continual anxiety to insurance companies. The list we published a few weeks ago of the companies who suffered as a result of the last conflagration showed that British companies were not heavy losers. Let us hope that the same will be true of the fire alluded to above. Even so, however, Constantinople is not out of the wood yet, and many happenings are likely to take place unless we get through the Dardanelles or before we get to the Porte. It will be most necessary for steps to be taken, and at all costs, for the prevention of incendiarism, pillage, looting, and crimes pending the arrival of the allied army. A destroyed Constantinople, in spite of its filth and dirt, would be a calamity to be mourned over.

***

Other news from Turkey—not from Turkish sources—says that the Russians have sunk further coal transport vessels in the Black Sea. They have, moreover, given Zunguldak another bombardment. This was most necessary. It would appear that after the recent bombardment of the place steps were immediately taken to reconstitute the harbour, mine, and transport arrangements, and with such success that the supplying of Constantinople with coal was merrily renewed. This has now been stopped again—not temporarily, I hope, but permanently. For it is essential to our success in the Dardanelles that Constantinople should receive no coal (and no ammunition) supplies. As regards ammunition, the *Morning Post* correspondent in Rome announces that news has reached the Italian capital that Turkey has only one month's stock of ammunition. It is, therefore, believed in Rome that the Allies will take the Dardanelles in a relatively short time if Bulgaria and Roumania act energetically against contraband.

***

Oil News states, with what authority I do not know, that a movement is on foot for the disposal of the properties or undertaking of the Roumanian Consolidated Oilfields, Limited, to one of the important Roumanian oil companies. The names of both the Astra Romana (Royal Dutch and Shell control) and the Romano-Americana (Standard Oil control) are mentioned in this connection.

COMMENTATOR.

Abyssinia in 1914.

The following information is from a U.S. Consular report (Consul-General John Q. Wood, Adis Ababa) for the year 1914 :—

Abyssinians and Foreigners

The Abyssinians are generally poor and their wants are few. Only in a few towns is there any demand for such articles as shoes, underwear, and furniture. The universal demand, however, is for cotton goods. The land provides sufficient food material for the people, and such alimentary articles as are imported are to supply the wants of the foreigners who have come to Abyssinia in the interests of trade. Most of these are Greeks, Armenians, Syrians, Indians, and Arabs. They are the shopkeepers. Although there are some English and French branch houses in the capital, the managers are selected from one of the above-named nationalities. There are probably 400 French citizens engaged in the construction of the French-Ethiopian Railroad, living in the different towns along the line, and the Italians may number 100. In all, however, there are not over 2,000 foreigners in the kingdom, and the large percentage of these are in Adis Ababa, Hawash, Dire Dawa, and Harrar, all towns along the railroad, with the exception of Harrar, which is located 35 miles south of Dire Dawa.

The Abyssinians may be separated into four groups, the Gallas in the south and south-west, the Shoans in the centre, the Tigres in the north, and the Danklis in the east. The Gallas comprise one-half of the entire population, and are a pastoral and agricultural people. The Shoans number 1,500,000 and furnish the ruling class. Everyone is a soldier, and the present ruler depends upon them to maintain his sovereignty. The Tigrians are a lighter coloured people and show their Semitic descent. They formerly furnished the rulers of Ethiopia. The Danklis are Mohammedans, and on account of the inaccessibility of their country preserve a sort of independence, merely paying an annual sum to the Emperor as a tribute.

French-Abyssinian Railway.

The development of trade with Abyssinia received its first impulse with the commencement of the railroad project of the French to connect Jibuti with Adis Ababa. This was directly due to the encouragement of Menelik II., who gave a concession for the construction of this road. He foresaw the advantage to his country in the development of its natural resources. He also encouraged foreigners to build houses in the capital by granting free tracts of land. The British, French, Russian, Italian, and German Governments, taking advantage of this offer, erected fine houses for their diplomatic representatives. In 1896, the date of the treaty of peace with Italy, by the terms of which was recognised the absolute independence of the Ethiopian Empire (Abyssinia), the French Government established the colonial administration of its Somaliland possession at Jibuti, then an insignificant port with about 5,000 inhabitants. Cable connections were made with Perim. The Messageries Maritimes made it a port of call and established an agency there with a coal depot. A regular postal service was established with Abyssinia.

In 1897 work was begun on the French-Abyssinian railroad, and after many vicissitudes, necessitating the aid of a subsidy by the French Government, the first section of the road reached the town of Dire Dawa, a distance of 187 miles, in the year 1903; then followed a period of inactivity due to political and financial difficulties. The old company was liquidated and a new one, entirely French, entitled La Compagnie du Chemin de Fer Franco-Ethiopian de Jibuti à Adis Ababa began in 1909 the second section of the road, completing the same on December 31, 1913, a further distance of 144 miles. From this point, called Hawash, to Adis Ababa, there remains 156 miles, and over half the distance had been completed by the last of July, 1914. Since then construction work has been pushed forward slowly, so that on March 1, 1915, the line would be within 25 miles of Adis Ababa. This railroad, when fully equipped, will represent an investment of £4,000,000.

Aden as a Trade Centre.

For years Aden has been the strategic centre for the trade of Abyssinia. The principal commercial houses in Aden had agents in the most important towns of Abyssinia for the purchase of Abyssinian products and the sale of foreign goods. This has been a most lucrative business for a few firms. Aden became the centre for the sale of Abyssinian coffee, hides, and skins, which constituted two-thirds of the total Abyssinian exports. The French colonial administration has been active to encourage the erection of banks, buildings, business blocks, hotels, and private houses. Attractive municipal buildings have been constructed, and an attractive governor's residence has been completed. Jibuti has now a population of over 20,000, including about 800 Europeans, 150 of whom are French, and it has an efficient city administration.

Shipping.

In normal times regular service is maintained between Jibuti and Marseilles, Naples, Trieste, Odessa, and Hamburg by the following companies :—Compagnie des Messageries Maritimes, Marittima Italiana, Lloyd Autrichien, Compagnie Russe de Navigation et de Commerce, and the Hamburg-American Line.

There are occasional arrivals of British and Dutch steamers. In 1912 there were 374 steamships arriving at the port, with a total tonnage of 756,721, compared with 379 of 692,188 tons in 1911. The total freight landed in 1912 amounted to 69,775 tons, compared with 78,242 tons in 1911; the amount loaded was 44,706 tons in 1912, compared with 42,880 tons in 1911. The excess of tonnage landed at the port in 1911 over that in 1912 was due to the larger tonnage of construction material for the railroad in 1911. There was an increase in freight tonnage in 1913 over that of 1912 due to the activity of railroad extension in Abyssinia. In 1912 only 25 per cent. of the inward freight came in French bottoms, while over 80 per cent. of the outward freight cleared under the French flag. This is explained by the fact that most of the Abyssinian exports are shipped to Aden by a French subsidised line that maintains a bi-weekly service between those ports.

Since August 1, 1914, there has been a most pronounced decrease in the Abyssinian trade due to inability of the Abyssinians to sell their products; consequently they are not purchasing cotton goods. Furthermore, railroad construction was curtailed, throwing out of employment many labourers. The shopkeepers, practically all foreigners, report that business has not been so unsatisfactory for many years. The cessation of regular shipping facilities, the banking difficulties in financing shipments, and the departure for European countries of several important business men, have temporarily interfered with the steady development of Abyssinian trade.

Trade Routes.

The principal artery of Abyssinian trade is the French-Ethiopian Railroad. It, however, runs through an unproductive country, and it seems quite impossible for this venture to be remunerative, at least for many years. At Dire Dawa the French have established repair shops for this railroad; they have opened schools for the children of foreigners as well as their own. An attractive hotel, several cafés, stores, modern houses, a branch of the Bank of Abyssinia, and clean streets indicate the influence of European methods. Here is established the first Abyssinian Custom House. Dire Dawa was for several years the terminus of the railroad, and all of the caravans for Adis Ababa started here. Only thirty-five miles to the south is situated the city of Harrar, with a population of 50,000. It is an important trade centre. It is the most important centre in Abyssinia for the cultivation of coffee, which is largely exported to the United States viâ Jibuti and Aden. Harrar has a branch of the Bank of Abyssinia, and is the residence of British, Italian, German, and Turkish Consuls. During 1914 the first Chamber of Commerce for Abyssinia was established by the leading merchants of Harrar.

Gambella, in the western part of the country, 361 miles from Adis Ababa, is the terminus of a line that begins at Port Sudan on the Red Sea. From this port goods are transported by rail to Khartoum, thence by steamer during the months of June to September up the Nile, then east on the River Sobat to Gambella, a total distance of 880 miles by water. To the north are the two towns of Gallabat and Roseires, situated near the Abyssinian-Sudan boundary. The latter town is connected with Sennar, on the Blue Nile, by a weekly service from June to December. The former is thirteen days' journey to the terminus of the railroad line running to Khartoum, ten hours by train.

Through Massowah, in the Italian Province of Eritrea, on the Red Sea, and Assab, another small port, the Italians have built up a considerable trade in the northern part of Abyssinia. A short railroad line runs from the port of Massowah beyond the town of Asmara, and from this point caravans transport goods across the Abyssinian boundary.

Caravan routes also extend from Mogadishu, in the Italian Somaliland, to the south-eastern part of Abyssinia, and there is also considerable trade by caravan between British East Africa and the southern provinces of Abyssinia.

Cotton Sheeting.

Unbleached American cotton sheeting represents the largest item in the trade—almost 70 per cent. of the cotton imports. This business has been for many years largely monopolized by Aden houses that handle American cotton sheeting. A large New York exporting firm has had one of its branches in Aden for at least twenty-five years with an American citizen at its head. It has done a large trade with Aden importers, who have branches scattered throughout Abyssinia. With the changed conditions due to the development of the port of Jibuti following the construction of the French-Abyssinian railroad and the opening up of Abyssinia to foreigners, a large number of small traders settled in the towns and in Jibuti. They have made business connections with other merchants than those who controlled this trade.

The Indian traders in Abyssinia naturally favour Indian and British goods. Among the articles listed in one of their stores located in Adis Ababa there were counted 138 articles —75 from Great Britain, 29 from Germany, 12 from Austria, 8 from Belgium, 5 from Switzerland, 4 from France, and 5 from all other countries. This particular trader sold British, Indian, and Belgian cottons. Another Indian trader sold an Austrian sheeting—a good imitation of the best American brand with the same camel trade-mark.

During the Balkan War Austrian mills were caught with large supplies on their hands that they disposed of in Africa at prices below cost of production. One Austrian house operated in Abyssinia, giving long credits to importers. This house was strongly financed by Austrian banks and has been able to get a good start in the strong competition for this valuable trade. Their sales, however, did not keep up in 1914, and it is doubtful if they succeed in recovering what must necessarily be lost on account of the war. The Austrian Lloyd Steamship Company greatly assisted this trade by making Jibuti a port of call in its regular monthly service from Trieste to the Orient.

With the removal of Austrian and Belgian cottons from Abyssinia, American trade should be greatly benefited unless shipping facilities are cut off. The lack of American ships is one of the weakest factors in the contest for markets in Africa and India. The United States purchase large quantities of Indian and African goods and could sell double the amount if there were direct shipping connections. American cotton sheetings are the best in the market, but there are no interested parties to push their sale in this country. All of the shopkeepers in Abyssinia are under the protection of some other country than the United States. They will sell American goods only when they can make more profit. British interests have the Indian merchants and the Arabs of Aden to assist them Armenian and Syrian agents in Abyssinia buy from their countrymen, who

Digitized by Google

are largely engaged in the export business in Manchester.

Trade via Gambela.

In the western part of the country the Sudan Government has been particularly active in making Gambela a trade centre. A British report gives 15 per cent. of the cotton trade to America at this point, with the Italian goods most in demand, but of inferior quality. Here Manchester sheetings are not in favour as yet. In 1912 a British consular report stated that most of the cotton stuffs entering Abyssinia from the south were of American and Italian manufacture. For 1910 it is stated by a good authority on this subject that 50 per cent. of the Abugedid (American sheeting is the name common among the trade) came from Manchester, and 30 per cent. from the United States. In 1911 the British Consul at Adis Ababa stated that 30 per cent. came from Manchester and 50 per cent. from the United States. In 1912 large quantities of Italian sheetings were imported on account of being shut off from the Turkish market. In the early part of 1913 it was reported that American cotton sheetings made up 60 per cent. of the imports into Jibuti, with only 20 per cent. from Manchester. Later in the year large importations of Austrian and Belgian cottons brought the American percentage down to 40 per cent. It would appear that in spite of the vicissitudes of the trade American sheetings have held their own. Their value for the entire country amounts to about £200,000 yearly. Practically all the other cotton goods imported into Abyssinia come from Manchester, which has catered to this trade, supplying all the cotton shawls (the outer garment worn by men and women), head bands, girdles, blankets, and yarns.

Abyssinia and the United States.

In explaining the reason for the success of American sheetings in this market, great stress should be laid upon the presence in Aden of a genuine American house that has handled a standard grade of cotton sheeting for many years, which is most favourably known in Abyssinia for its unchangeable quality and exact measurements and weight. Honesty has been the best policy in the maintenance of the American trade in this country. It has been brought to the attention of the consulate that other American cottons have been introduced during the last few years that do not measure up to the high American standard. This is most unfortunate, as it will inevitably destroy the strong position enjoyed among not only the retailers, but the consumers, who are scattered all over this vast country. In every market place one is sure to find American sheetings, which are used for tents as well as for clothing. American manufacturers should be concerned not so much in increasing their sales of sheetings as in conserving what markets have already been won. Too many American firms competing against each other to share this trade would inevitably bring about the sale of a lower grade of goods. It would be well to have one American house in every strategic centre for the distribution of American products, and this house could carry a large line of non-competing articles. It may be a debatable question whether Aden is most conveniently located for this trade in Abyssinia; in the writer's opinion it is not. Jibuti is the natural gateway to this country, and the trade can be more effectively controlled from this point, especially in view of the railroad and telegraphic connections available, and the excellent shipping and cable facilities with Europe and banking accommodations.

Navigation and Commerce on the Lower Danube in 1914.

From Our Bucharest Correspondent.

On account of the European War, trade on the Lower Danube dropped in 1914 as compared with the previous year. The war almost completely paralysed Roumania's markets. Her international traffic being dependent on the liberty of navigation through the Bosphorus and the Dardanelles, the entry of Turkey into war last autumn cut off her lines of communication both with the East and West. At present there are only the routes via Salonica and Dedeagatch open, but they only offer Roumania a very restricted means of pursuing her trade with the outer world.

Shipping.

In 1914, the number of vessels passing up and down the Danube was registered as 718 vessels, of approximately 1,356,000 tons, against 936 vessels (1,656,090 tons) in 1913. In comparison with 1911, a normal year as regards navigation, the restriction of the number of vessels passing the mouth of the Danube is over 50 per cent., as in that year (1911), 1,532 vessels, of a tonnage of 2,710,000 passed up and down the river.

From 1912 the navigation has diminished considerably on account of, first, the Italo-Turkish and then the Balkan war, followed by mobilisation in this country in 1914, and the present conflagration.

Of the vessels going and coming last year 37 were sailing vessels, reckoned at 4,080 tons, and the remainder (1,349,846 tons), were steamers. As regards the size of the latter: the largest was an Austrian boat of 4,043 tons, followed by a German of 3,684 tons; ten Greek steamers totalled 38,688 tons; nine British 33,637 tons; three Hungarian 11,355 tons; five Roumanian 17,875 tons; and one Russian 3,675 tons.

The number of vessels, according to nationality, which passed up and down the river in 1914, together with total tonnage, was as follows :—

British.....	187	steamers of	461,810 tons
Greek	157	,,	333,030 ,,
Italian.....	69	,,	96,958 ,,
Russian	68	,,	60,395 ,,
Austrian.....	46	,,	106,178 ,,
Roumanian	40	,,	71,919 ,,
Hungarian.....	36	,,	55,449 ,,
Cttoman.....	34	,,	4,719 ,,
Belgian	26	,,	46,786 ,,
German	21	,,	59,630 ,,
French	14	,,	26,173 ,,
Swedish	6	,,	13,235 ,,
Bulgarian	6	,,	2,829 ,,
Danish.....	4	,,	7,539 ,,
Dutch	2	,,	5,250 ,,
Norwegian.....	2	,,	4,140 ,,

As regards previous years, though the numbers are decreased, the actual amount of tonnage is increased.

Of the above, 270 of 601,534 tons loaded part cargo at Sulina and part outside; the rest loaded up-river at Braila and Galatz, with a smaller quantity at Tulcinea.

The vessels belonging to lines running regularly to the Danube were 124, of 177,196 tons, as below :—

"Cie Russe".....	Russian..	44	Odessa—Galatz
Lloyd Antrichien..	Austrian..	23	Const'ple—Braila
Cie Maritime Italienne	Italian....	23	,, ,,
Hungary - Levant Line	Hangari'n	21	,, —Galatz
Freyssinet Co.	French ..	13	Marseilles—Braila

The taxes paid by the above to the European Commission of the Danube amounted to 1,881,136 frs.

Trade.

The grain exported in 1914 amounted to 25¼ million hectolitres, against 33 millions in 1913, 37 millions in 1912, and 59 in 1911. The majority of this grain was exported to Holland, Belgium, Great Britain, Germany, France, and Italy. Smaller portions went to Denmark, Austria, Spain, Greece, Hungary, Norway, Turkey, Algiers, and Tunis.

Industrial produce exported through the mouth of the Danube included flour, bran, benzine, petroleum, mineral oils, rice, sugar, and timber. Flour amounted to 24,702 tons, of which 9,335 tons went to Turkey, 3,360 tons to Greece, 3,086 tons to Germany, more than 1,000 tons to Egypt, and 2,110 tons to Great Britain.

Timber ran to 278,256 metres of planking and 2,100 tons of oak. Egypt is Roumania's best customer for construction timber, taking annually about 60,000 metres; Turkey holds the second place with 57,000; then Italy (49,000), Greece (39,000), Holland (29,000), France (22,000), etc. Oak is bought exclusively by France and Belgium.

The live animal trade comprised : Oxen, 4,297, and 100 sheep. Italy took about half the cattle, the rest going to Great Britain. Until quite recently England only purchased live animals in insignificant quantities in Roumania.

As regards imports, the only figures to hand concern coal and petroleum. Of the former 244,923 tons were imported, which came almost entirely from Great Britain. The small balance came from Germany and Russia. As compared with 1913, the quantity imported from Great Britain was about 70,000 tons less than in former years.

It is strange to hear of petroleum being imported into Roumania, herself such a large producer. Nevertheless, 4,580 tons of the finest quality of lampant was exported from Russia to Roumania.

Lighter Companies.

Some useful statistics have been collected and published by M. C. J. Baicoïano, from which it is possible to estimate the number of lighter companies and their fleets. The largest company trading on the Lower Danube is the Austrian Society, known as the Donaudampfshiffsgesellschaft, which has always been subventioned by the Austrian Government, and is to-day, properly speaking, a State concern. The company possesses 134 passenger and goods steamers and tugs, and 854 lighters, of a total capacity of 436,264 tons, and valued at nominally 90 million francs.

The Russian Navigation Company, subventioned by the Russian Government to the extent of 315,000 roubles per annum, is the second on the list, with a fleet of twelve tugs and 120 lighters, of which latter eighteen are petroleum tanks.

The Roumanian Navigation Company (Navigatiune Fluviala Romana) possesses a park, valued at 15 million francs, eleven tugs, thirteen passenger steamers, and 108 lighters, representing 80,000 tons, and fourteen tanks. This is a State enterprise.

In 1913 there was founded by private enterprise the "Soc. Romana Dunariana," with a a capital 7½ million francs. The property of various private owners was merged into it; it thus possesses four grain elevators, sixty-six lighters, and four tugs.

The Hungarian Navigation Company was created, although the above-mentioned Austrian company already existed, with a capital of 12 million francs. Subventioned by the Hungarian Government, it has fourteen passenger steamers, thirty-four tugs, and 250 lighters, totalling 120,000 tons.

Apart from the above, there are on the Lower Danube 603 lighters, of a tonnage of 486,995 tons, belonging to 320 private owners.

The Roumanian flag is the most usual on the Lower Danube, both as regards tugs and lighters. In 1911 the total entries and departures at Lower Danubian ports was 12,364 Roumanian, as against 9,099 Austrian, 3,805 Greek, 3,023 Russian, 4,866 Hungarian, 1,642 Turkish, and 1,270 Bulgarian.

In normal times the Austrian and Hungarian passenger steamers ply daily from port to port on the Lower Danube, going as far down as Galatz, whilst the Roumanian passenger steamers ply between the principal stations on the Roumanian banks, and between Braila, Galatz, and Sulina. The Russian steamers trade between Galatz and the ports of Reni, Kelia, and Ismail, on the Russian branch of the river.

Trade Notes.

Egypt.

Tenders are invited by the South Division, State Buildings, Cairo, for water and sanitary installations at the Director's house, Assiut Secondary School. Conditions of tender may be obtained against payment of 65 milliemes, August 10.

Gibraltar.

In the annual Colonial report on Gibraltar it is stated that trade in that Colony rapidly recovered after the temporary set-back caused by the outbreak of war. The total revenue for 1914 was only £7,949 less than the estimate. The position at the beginning of August, 1914, was one of some difficulty. Spain, on which the Colony had hitherto relied for food supplies, had placed an embargo on the export of such commodities. There was an immediate rush to withdraw deposits from the Government Savings Bank and from the Savings Bank of the Anglo-Egyptian Bank. The Bank Note Ordinance was therefore enacted, and the issue of currency notes of values ranging from 2s. to £50 restored public confidence. Arrangements were made for procuring food supplies from Portugal and other sources, and a Committee was formed to deal with the question of market prices and control the operations of speculators. In only a few instances did the Committee recommend the fixing of maximum prices, and then only as a temporary measure. The various measures rendered necessary by the war, the ceaseless patrol of the Straits, the examination of all ships passing through the Straits, the arrangements for the removal of contraband, the internment of enemy reservists, and the institution of a Prize Court at Gibraltar have severely taxed the local naval and military establishments. At the same time the work of the civilian officials has also, as was natural, been largely increased, especially in the case of the Port, Police, Customs, and Law Departments. From all sections of the community the Government received loyal and enthusiastic assistance, and though military law was of necessity declared, it was not found necessary to suspend the Courts or interfere with the civil administration. A movement to raise a local Volunteer Defence Force was initiated by private enterprise, and a corps has subsequently been embodied under an Ordinance enacted during the present year.

Somaliland.

The Board of Trade have received, through the Colonial Office, copy of Proclamations, dated March 20 and May 24, 1915, which prohibit the exportation of various articles to certain destinations from the Somaliland Protectorate, as follows:—

(A)—To all destinations, other than the United Kingdom, British Possessions and British Protectorates:—

The list of articles included under this heading is the same as that shown under heading (B) of the Notice for Cyprus, except that "cresol (saponified)" is not included in the Somaliland list.

The following additional articles are, however, included under this heading by the Proclamation of May 24.—Raw wool, wool tops, and noils and woollen and worsted yarns; tin, chloride of tin, tin ore; castor oil; paraffin wax; copper iodide; lubricants; hides of cattle, buffaloes, and horses; skins of calves, pigs, sheep, goats and deer; leather, undressed or dressed, suitable for saddlery, harness, military boots, or military clothing; ammonia and its salts, whether simple or compound; ammonia liquor; urea, aniline and their compounds; and tanning substances of all kinds, including extracts for use in tanning.

(B)—To all foreign ports in Europe and on the Mediterranean and Black Seas, other than those of France, Russia (except Baltic ports), Belgium, Spain and Portugal:—

The list of articles included under this heading is the same as that given under

heading (C) of the Notice for Cyprus, except that the following articles are excluded from the Somaliland list:—Railway material, both fixed and rolling stock; rosin; and seeds, clover and grass.

The following item is, however, amended, as indicated in italics, by the Proclamation of May 24:—

Foodstuffs and feeding stuffs, and the raw materials thereof, including all *animal and* vegetable oils *and fats* (other than linseed oil, boiled and unboiled, unmixed with other oil and not including essential oils) and *all* (instead of "the following") oleaginous nuts, seeds and products, *including* (instead of "viz.") castor beans, coconuts, copra, cotton-seed, ground nuts (arachides), linseed, palm kernels, rape seed, sesame seed, soya beans.

(C)—To ports in Denmark, the Netherlands and Sweden:—

Tinplates; including tin boxes and tin canisters for food packing.

All previous Notices and Proclamations respecting prohibited exports are cancelled.

CYPRUS NOTES.

(From Our Own Correspondent.)

July 16.

The Asbestos Mining Company at Amiandos, Mount Troodos, has discharged, according to the local Press, 500 to 600 of its hands. The war must, doubtless, have weighed rather heavily upon the company, the bulk of whose business was, we understand, with Austria.

Several merchants are now arranging to import wheat from Egypt. The price of wheat here remains very high, and villagers keep back their stocks as much as they can in the expectation of still higher prices being realised. It is hoped that this action on the part of the merchants will tend to lower them, and thus also bring down the present extravagant price of bread.

The following are to-day's prices in Nicosia of some of the principal articles of consumption. They are, in some instances, higher at other district towns. (A kile=bushel; 1 oke =2¾ lbs.)

Wheat	per kile, 8/-
Barley	per kile, 2/9
Oats	per kile, 1/9
Potatoes	per oke, 1½d. to 1¼d.
Broad beans	per oke, 2½d. to 2¾d.
Linseed	per oke, 3½d. to 3¼d.
Cotton seed	per oke, 2d.
Sugar	per oke, 7½d. to 7¾d

The carob crop is estimated as likely to be considerably larger than last year. The olive yield, on the other hand, is expected to be less.

ROUMANIAN TRANSPORT PROHIBITION

Reuter's Agency reports that the report from Bucharest, that orders have been issued to all frontier stations to conduct the strictest examination of all goods vans from Austria and Germany en route for Turkey, and to prevent the passage through Roumanian territory of arms or munitions, is officially confirmed by the Roumanian Legation in Paris. Some exceedingly clever attempts have already been made, and for this reason the Roumanian Government has asked the Allied Powers to lend experienced Customs examiners and detectives to assist in enforcing the prohibition of the transit of war material.

PROHIBITED EXPORTS.

A supplement to the *Board of Trade Journal* gives a complete list of the prohibitions of export introduced in the United Kingdom, the Allied countries, and neutral European countries. The latter include Bulgaria, Greece, and Roumania, and the Allied countries include Serbia, Russia, Italy, and France. To be complete the list should have included the Empire—Dominions, Colonies, and Protectorates.

Near East Markets.

SPECIAL REPORT.

(From Our Own Correspondent.)

Sofia. July 13.

Nine-tenths of the harvest are already gathered and last week the thrashing of the grain commenced. Within ten days there will be new flour from this year's crops on the market.

The Times Bucharest correspondent, under date of July 26, reports that the harvest has been completed almost everywhere in the country and is very abundant. As a result, the Government will probably remove the embargo on grain exports, which has existed since the beginning of the war, and as the Dardanelles are closed some three million tons will go to Germany.

MALTA'S WHEAT SUPPLY.

The Times Malta correspondent, under date July 23, reports that complaints having been made by local merchants regarding the prohibition of the export of wheat and flour from England, Lord Methuen has issued an official intimation that, as a result of inquiries made by the Malta Government, his Majesty's Government explains that it considers it desirable to maintain the general prohibition, but that there is no intention to interfere with the normal supply of Malta, and that no further delay is likely to arise in granting the necessary licences.

SUDAN COFFEE IMPORTS.

(From a Correspondent.)

The gum season having come practically to an end, attention is now being devoted in the Sudan to the large importations of coffee. Coffee is imported almost entirely from Abyssinia, the greater part of the supply coming in through the frontier port of Gambela. Egypt, India, and other countries, however, also contribute to the supply. To what extent the trade in this one article has grown in years past may be seen from a glance at some recent figures. In 1908 the total trade in coffee from all parts amounted to £E37,763; in 1909 it had increased to £E45,247; by 1911 to £E55,364; by 1912 to £E64,532; and by 1913 to £E67,545. Of this last-mentioned amount more than £E40,000 came from Abyssinia. This season's supply of coffee has already commenced to arrive in the Sudan, two steamers from Gambela, each loaded with several thousand cantars, having been received, with the result that the market price has fallen considerably. Abyssinian coffee is of a delicious flavour, and realises ordinarily about P.T.70 per 100 lb. Quite a substantial trade in the article is carried on through Gallabat, which port rivals that of Gambela in regard to imports.

BULGARIAN CROPS.

Reuter's agency reports from Sofia as follows:—

Bulgaria, being a pre-eminently agricultural country, it is only natural that at the present moment she should be chiefly preoccupied with the question of the disposal of her crops, which were excellent this year, being estimated at seventy million tons, to which must be added forty million tons of the reserves from last year. In normal times the export of grain took up nine months of the year, three hundred wagon loads being got off daily, two-thirds of the whole going to Varna and Burgas on the Black Sea. Neither of these ports is now available, owing to the closing of the Dardanelles, so that only two routes are open, *viâ* the Danube, utmost capacity eighty wagons daily, and *viâ* Dedeagatch, thirty wagons daily. But these routes are also dependent, one on Roumania and the other on Turkey.

In view of the serious situation to which the export of grain is thus exposed, certain Bulgarian economists have drawn up and handed to the Prime Minister a memorandum, suggesting various urgent measures which the Government is recommended to adopt. These proposals provide for the opening of credits upon warrant by the banks and the issue of a loan of £2,000,000 to provide, for this purpose, the organisation of a syndicate to prevent speculations and contend with possible depreciation in prices; and the conclusion of special conventions with neighbouring States permitting an increased export, up to 150 wagons daily, and free trade in cereals. It is argued that these, and other measures, would, if the difficulties in the way can be overcome, bring much gold to Bulgaria, a circumstance which would result in a fall in the rate of exchange, now as high as 35 per cent., and a corresponding increase in Treasury receipts.

PRODUCE REPORT.

London, August 5.

Currants.

Owing to the holidays the market has been very quiet this week, but spot prices were well maintained. The unfavourable reports from Greece, of damages caused to the fruit, and the prospects of a shorter crop this year had the effect of an advance in the price of fruit to arrive although no business was done in the latter, either this or last week. Provincial is quoted 26s. to 27s., Patras 29s. to 33s., Vostizza 34s. to 40s. Zante 28s. to 31s., Smalls 28s. 6d. to 35s.

The Liverpool market has also been very quiet this week, and no change in prices to report.

Sultanas.

There is a moderate demand for all grades, and this with an apparent shortage of stocks caused prices to advance again.

In Liverpool there is also a shortage of stock and a further advance in prices.

Dates.

There has been only a small demand, and late prices are well maintained.

Onions.

Egyptians are in better demand, but prices are still low. Some "heavy weights" perfectly sound, changed hands at 5s. 6d. per cwt.

Seeds.

Linseed has been quiet and easier. London-Calcutta spot is offered at 54s. 2d. afloat, and July-August quoted 54s. 2d., August-September sold at 54s. 3d. Rapeseed continues quiet, but is held for full rates. Cawnpore brown, pure, July-August quoted 51s., Guzerat ditto 56s. Cottonseed is firm but with little business doing. London-Egyptian spot £9 15s., and August shipment £9 17s. 6d. per ton.

EGYPTIAN COTTON.

Liverpool, August 5.

Messrs. Reynolds and Gibson report:—Egyptian Spot.—Owing to the holidays this has been a short week. There has been only a moderate inquiry, but quite fair business has been done at hardening prices. Quotations were raised 10 points. Sales are estimated at 2,000 bales against 3,600 last week.

Manchester Market.—The cotton trade generally finds itself in a much better condition than could have been imagined even by the greatest optimist. We think that trade as a whole is quite as good as it might have been, even if there had been no war. Some markets have been closed, but other outlets have opened up. No doubt a quite fair general business is going on, and prices are fully maintained.

DATES.

Engineering Notes.

A Timely Wood-Working Machine.

To-day labour-saving machines are fully appreciated, and more so when such machines can turn out perfect work even when handled by unskilled labour. Such good properties can justly be claimed by the "Diagonal and Universal Wood-working Machine," the invention of a man hailing from the Near East. This machine, since its first appearance, has drawn more than ordinary attention, and has been described by competent journals as a machine that will effect an important influence in the wood-working industry.

Principal Features.

The novel and chief feature of this machine is that the untrained operator can produce at the first attempt a perfect joint at the precise angle he requires, without the usual risk of over- or under-treating his work, which so often results in rendering the material useless. The required angle is adjusted on the machine to a fraction of a degree by a special patent angle-adjuster. The machine consists of two tables and two spindles, in a horizontal position, the one under the other. On the top is a fixed table, served by the circular saw only, for cross-cutting and for cutting angles intended for joints of flat objects. Under this table is the upper spindle, at the extremity of which the circular saw only is worked. Immediately under and parallel with the fixed table is the second spindle, the principal use of which is to make mortices and grooves for tenons, which are necessary in order to make firm and strong joints. The second or lower table is hinged at the extreme end of a slide, so that in canting it describes a quarter circle, and travels backwards and forwards with the movement of the slide. This table can also be raised or lowered as required, and is served by both spindles; by the higher or circular saw spindle the interior or secret angles and panels are cut. By the second spindle the mortices and grooves are made. This spindle, being parallel to the saw-spindle, will cut a vertical groove along the angle produced by the circular saw, thus the grooves for the tenons are always true and the angle will not be strained. Co-ordinate double angles may also be cut in one operation. Another great feature of this machine is the ease and rapidity with which it can be transformed and used as fret saw, boring, grooving or routing, slot morticing or recessing, moulding, dovetailing, carving, tenoning, and turning. The lower table being constructed to describe a quarter circle, any of the above processes, except turning, may be operated at any angle. Altogether, its capacities are so various that it would appear that artistic craftsmanship has met with one more powerful competitor, seeing that the work of hand, in this instance, is not merely imitated but improved on by mechanical means.

Compound Angles and Adjustment of Angles.

The inventor of this machine, after having worked and experimented over five years, has invented the Angle-Adjuster, and produced angle tables, by means of which the worker, however inexperienced, cannot help producing accurate work. The angle-tables will indicate the exact angle at which he has to work, and the adjuster will regulate the machine, so as to produce the angle at the degrees indicated by the angle-tables. The Angle-Adjuster (an instrument in the form of two bars hinged together at one end, and with a movable smaller adjusting bar connecting the so-formed two legs), is the basis of infallible accuracy in the production of joints at the proper angle. It is placed on the protractor (another instrument of semi-circular form) in a position specially prepared, so that the inner line of one of the bars rests on the zero, while the centre of the hinge finds the centre of the protractor; the second bar is then drawn out to the required degree, and the bars are then fixed by screwing a bolt, which is attached to the end of the movable connecting bar, and which slides in a slot in one of the hinged bars. The adjuster is then lifted from the protractor and placed on the machine, one bar flat against the saw, while against the other bar the fence is brought flat and fixed in that position; thus the machine becomes set at the required degree. In the same way the hinged table is fixed, so as to form the required angle with the saw or any other tool. The adjuster will further find and transfer to the machine the angle of any object without the assistance of the protractor. It is thus clearly shown that the machine can work at any angle between zero and 90 degrees, and that the angle can be found at once. The prosecution of the experiments having thus far been completely successful, the inventor was encouraged to face the problem of determining the angles when dealing with angles not bearing the standard degrees. We all know that three pieces of equal length will join if cut at 30 degrees, four pieces at 45 degrees, five at 54 and so on, with the standard joints for producing flat objects or enclosures with parallel sides; but if it is needed to form joints other than those bearing the standard degrees for the formation of objects of raised or hollow centres, or pyramid shaped, the joiner in such cases has to consider the exterior as well as the interior angle, an operation absolutely impossible to perform without great loss of time and material. Persistent study has resulted in producing diagrams indicating the variations of angles, and these were reduced ultimately to tables, which are supplied only with the machine. Table A indicates what the interior angle should be to every variation of the exterior angle. Table B indicates at what angle an object departed from its level will present against a level surface. By reference to thse tables any object of straight lines can be made, even a sphere with a great number of flat surfaces.

Decorative Stamped Metal.

Decorative stamped metal for ceilings and walls is now so generally appreciated that it is being widely used for that purpose in practically every part of the world. While its undoubtedly superior sanitary qualities are sufficient in themselves to recommend its use, it also possesses the advantage over plaster (or other kinds of finish for the interiors of dwellings, stores, churches, halls, theatres, and similar buildings) of being moderate in price, practically fire-proof, attractive in appearance, easy to apply, and absolutely unaffected by changes in temperature, dampness, or the attack of insects. At one time the metal supplied for the covering of walls and ceilings and similar purposes was extremely plain, but during recent years its increasing popularity and steadily expanding use have encouraged the manufacturers to go to the expense of engaging artists of great reputation whose designs have been faithfully reproduced. Notwithstanding the greatly increased attractiveness of this metal sheathing, the employment of special machinery and dies for stamping the designs has enabled the manufacturers to place their products on the market at a lower price than ever before. The designs are so arranged that they are interchangeable, which results in a perfect fit and appearance of completeness that make them extremely attractive wherever they are used. There are Greek and Roman designs suitable for every interior where classic styles are most suitable for church interiors and many other places Gothic and Romanesque designs are available. There are also some excellent artistic designs of Louis XIV., Louis XV., Empire, etc , which have a beautiful effect for interiors. Architects in the Near East ought to introduce the use of decorative stamped metals. For, apart from their artistic effect, they are very suitable for semi-tropical climates.

Bucharest-Craiova Line.

The construction of the new line from Bucharest to Craiova is shortly to be commenced (says our Bucharest correspondent). The new line not only shortens the journey between the two towns, but passes through a rich grain-growing country. It is expected that the line will be opened to traffic in about eighteen months.

The Constantza Pipe Line.

The construction of the pipe line from Baicoi to Constantza, begun some time ago, has had to be left in suspense on account of the war and its attendant difficulties (says our Bucharest correspondent). The State Railway direction, not having the necessary funds placed at its disposal by the Government, has received from six of the largest petroleum companies—the "Steaua," "Romana Americana," "Creditul Petrolifer," "Aquila Romana," and "Columbia"—a joint offer of 2,750,000frs. in order that the undertaking may be completed. The offer has been accepted and work has re-commenced. It is hoped that the line will be completed by the end of this year. The sum advanced by the companies will be paid back within five years, and bears interest at the rate of 5 per cent.

Six Months' Trade in Egypt.

(From Our Own Correspondent.)

Cairo, July 21.

The June Customs returns just published show that the diminution in trade continued during that month. The falling off in imports was £E754,238, and in exports £E473,588, as compared with June, 1914. The total decrease during the past six months is, therefore, £E5,895,026 and £E2,052,373 respectively, the imports during the period amounting to £E8,073,419 and the exports to £E13,300,157, as compared with £E13,968,445 and £E15,352,530 a year ago.

The following table shows the share taken by the principal countries, and the progress made by them during the six months under review :—

Country.	Imports.		Exports.	
	Total for six months.	Difference 1914-1915.	Total for six months.	Difference 1914-1915.
	£E.	£E.	£E.	£E.
Great Britain	3,730,081	− 708,414	6,592,156	+ 594,003
British Possessions	900,213	+ 57,835	263,185	+ 197,661
Germany	21,700	− 994,335	—	− 2,076,461
America	579,979	+ 344,030	2,078,036	+ 289,979
Brazil	240,800	+ 88,581	—	—
Chili	219,137	+ 156,971	—	—
Austria	4,750	− 922,904	—	− 848,223
Belgium	18,406	− 591,118	—	− 57,152
Bulgaria	33,697	− 34,006	5,052	+ 3,187
Denmark	4,332	+ 2,807	2,659	+ 2.157
Spain	30,850	− 17,032	297,381	+ 46,905
France	383,624	− 835,805	731,115	− 547,263
Greece	531,336	+ 205,999	239,048	+ 208,394
Holland	56,660	− 18,583	12,396	− 56,816
Italy	643,793	− 244,217	815,259	+ 299,078
Morocco	—	—	145,529	+ 144,758
Montenegro	—	—	9,121	+ 8,816
Japan	33,126	− 9,138	219,779	− 58,925
Rumania	3,795	− 512,817	3,717	− 6,325
Russia	28,962	− 329,138	475,500	− 777,615
Serbia	3,048	+ 1,169	7,760	+ 7,760
Sweden	62,146	− 23,022	13,427	+ 5,132
Switzerland	84,407	− 8,093	1,230,908	+ 850,228
Turkey	105,538	− 981,513	3,797	− 313,844

It is interesting to note under imports that the enemy countries have each lost trade to about the same extent, *i.e.*, nigh on £E1,000,000 per head, and that a very small part of the diminution in the share falling to Great Britain is compensated for by the improvement made by the British Possessions. The latter have increased their sales of, amongst other things, coffee, rice, cotton thread, and sacks. The whole of the increases in the imports from Brazil and Chili was due to coffee and chemical manures respectively. For obvious reasons our Allies have lost leeway considerably. This is due partly to embargo on exports from those countries and also to the local economic situation. The marked reduction in imports from Roumania is accounted for by the closing of the Dardanelles, the United States filling the consequent gap in the oil supply. Under exports the enemy countries show a falling off of over £E3,000,000. The Empire has more than held its own, and has increased its share by £E791,664, or over 10 per cent. America, too, has purchased more. The increase in the exports to Greece and Switzerland, in the first instance by over 600 per cent., and in the second by over 200 per cent., is decidedly suspicious, and there exists no doubt whatever that the former has been importing for Turkey viâ Dedeagatch, and that the other has been acting as transit house for her northern neighbour. The increase in the trade done with Morocco, on the other hand, is a most satisfactory feature, for it has consisted entirely of sugar, which has commanded a very high price there.

Turning to categories, the decrease in imports is mainly represented by cereals, £E1,154,622; cotton goods and textiles, £E1,332,644; construction wood, £E606,359; and machinery and worked iron and steel, £E1,435,114. It is to be noted that the only important increases have been in frozen meat, £E226,094; coffee, £E79,344; and beer, £E35,552. The increases in exports during the six months are :—Eggs, £E154,535; cereals, £E241,541; sugar cane, £E355,475; cotton-seed oil, £E64,928; benzine, £E62,460; natural wool, £E54,752; and gold and silver bar, £E401,956. Cotton, however, swamps whatever improvement may have been made by other products, and with a diminution of £E3,359,455 in value of the quantity exported—which is as a matter of fact 288,853 cantars more than that exported during the first half of last year—it is responsible for the final decrease on the half-year's working.

Cigarettes show a falling off of over 88 tons, or £E70,684, Germany and Austria being responsible for almost the entire amount. It is, however, curious to note that Holland, Denmark, and Switzerland all increased their purchases. Specie movements during the half-year have been very slack, as might well be expected. Only £E295,882 was imported, as against £E1,078,871 in 1914—practically all this was new silver and nickel coins for the Egyptian Treasury. Specie exports amounted to £E86,678, as compared with £E5,558,983 in the previous year. This diminution was, of course, due to the fact that no gold had been imported the previous autumn for moving the cotton crop.

The Sudan trade table shows that Egypt purchased from the Sudan to the value of £E2,203,394 during the six months, and that she sold to that province goods valued at £E391,302. The principal articles imported from the Sudan were :—Livestock, £E30,336 (over 20,000 head); cereals, £E69,432; gum, £E10,435; cotton, £E53,841; whilst the exports in the opposite direction were :—Refined sugar, £101,382; cotton tissues, £E93,527; flour, £E9,300; and common soap, £E11,926.

ROUMANIAN OIL NEWS.

Austria-Hungary is taking 90 to 100 tank wagons of oil products—say 1,100 to 1,200 tons—from Roumania every twenty-four hours, those consignments crossing the frontier at Predeal and consisting principally of illuminating oil (says *Oil News*).

The Anglo-Continental Oil Co., Limited, which has an issued capital of something over £24,000, has, through its Roumanian representative, Mr. Arthur V. Morris, requested the Roumanian Government to permit it to establish a secondary office in Bucharest. The company owns the "Speranza" petroleum refinery at Ploesti, and has leases of oil lands in Prahova and Dambevitza.

The liquidators' report of the First Roumanian Drilling Co. (Prima Societate de Foraj) has been approved by a general meeting of the company. The balance-sheet to December 31, 1914, was adopted, and the liquidators' remuneration, 3,500 fr., directed to be paid out of the 13,880 fr. profit of the 1914 period, the balance, 10,380 fr., being carried forward.

EGYPTIAN STATE ACCOUNTS DURING MAY.

(From Our Own Correspondent.)

Cairo, July 27.

The State accounts for the month of May, published last evening, show that the revenue at the end of that month amounted to £E2,308,090 and the expenditure to £E3,407,501, as compared with £E2,560,420 and £E3,965,038 respectively at the same date in 1914. The total decrease in revenue for the two first months of the new financial year is £E252,330 and the reduction introduced in the expenditure £E557,537.

The principal decreases during the month were Customs by £E48,661, tobacco dues by £E56,056, port dues by £E23,257, railway receipts by £E32,445, and legal fees by £E15,019. On the other hand, direct taxes increased by £E166,849, land tax being entirely responsible for this, investment of funds by £E39,627, rent of Government land by £E5,742, domains receipts by £E3,988, and sales of land by £E8,515.

On the expenditure side the chief reductions were :—Ministry of Finance Central Administration, £E80,969; Ministry of Education, £E12,155; Irrigation Service, £E70,904; Railways, £E59,307; War Office, £E20,714.

It is interesting to note that the excess of expenditure over revenue, which at the end of April was more than it was the previous year, had been considerably reduced by the end of May—that is to say, by comparison with what it was on May 31, 1914. At that date the excess was £E1,404,618, whereas at the close of the account under review it was only £E1,099,411. In other words, the accounts recovered no less than £E346,131 in May. This, it is satisfactory to note, was due not only to reduction in expenditure, but also to a net increase in revenue collected of £E43,897, as compared with May, 1914.

SUDAN SHIPPING.

(From a Correspondent.)

Reference was made in these columns recently to the falling off of shipping entering Port Sudan, and it was pointed out that the last twelve months' returns were certain to show a heavy decline both in regard to the number of vessels and the gross tonnage. Statistics have just been received which abundantly justify the gloomy forecast. Between the year 1913 and that of 1914 an encouraging advance in the Protectorate's shipping had been noted. Thus, while between July 1 and December 31 of that year the number of vessels entering the port was 115 (of these 89 were British), representing a gross tonnage of 407,737 tons, by the end of June, 1914, the number of vessels had increased to 145 (of which 111 were British), while the gross tonnage amounted to 605,666, thus showing an advance of nearly 50 per cent. From July 1 to December 31, 1914, however, the decline commenced to manifest itself, the heaviest being, of course, within the last five months—August to December—of that year. From the above mentioned total of 145 vessels there was a fall to 92, and from a gross tonnage of 605,666 tons a relapse to 293,481. British vessels declined from 111 to 82, and "other vessels" from 35 to 10. The returns for the first half of 1915 were—as might have been anticipated—even more unsatisfactory. The total number of vessels entering the port fell to 71—and all but one of these were British. The gross tonnage declined to 210,615 tons.

If we glance back before the year 1913 we see that the international tonnage of vessels visiting Port Sudan had, over a period of seven years, made remarkable progress, as the following figures will prove :—

Year.	British.	Foreign.	Total.
1907	248,833	63,937	312,770
1908	269,626	64,625	334,251
1909	293,507	90,185	383,692
1910	350,455	81,109	431,564
1911	489,499	211,611	701,110
1912	527,198	173,115	700,313
1913 (to Nov. 30th only)	485,377	188,454	673,831

The main cause of the present depression in Sudan shipping could not have been anticipated this time last year. Notwithstanding the grievous disappointment experienced, none can doubt that Port Sudan will emerge from its present troubles in due time and realise the high hopes that have always been held of its economic importance.

SERBIAN WAR CREDIT.

(From Our Own Correspondent.)

Belgrade, July 24.

The Skuptchina has voted a War Credit of 250,000,000 fr.

COMPANY NOTES.

National Bank of Roumania.

At a special meeting of shareholders, held on February 28, the following resolutions were adopted:—(1) The ratification of the decision of the Board on August 13 to issue 5 lei banknotes to a maximum value of 25,000,000 lei; (2) the approval of the Convention of September 24, 1914, whereby the bank granted the Government a loan of 100,000,000 lei; and (3) the approval of the Convention of January 2, 1915, whereby the bank granted the Government a loan of 200,000,000 lei.

Societe du "Yaourt" d'Orient.

Pursuant to Section 188 of the Companies (Consolidation) Act, 1908, a meeting of the creditors of the above-named company will be held at 16, Regent Street, Pall Mall, London, S.W., on Saturday, August 14, at ten o'clock in the forenoon. Any person claiming to be a creditor, and desiring to be present, should at once inform the liquidator, Mr. James MacConnell at his address, 16, Regent Street, London, S.W.

COMPANY RESULTS, &c.

Anglo-Egyptian Oilfields.—Gemsah production for the week, 390 tons (last week, 199 tons). Hurgada production for the week, 228 tons (last week, 233 tons).

Anglo-Roumanian Petroleum.—Production of crude oil for week ending July 24, 373 tons.

Banque Egyptienne de Commerce (in liquidation).—The meeting of shareholders will be held in Cairo on August 9.

Corporation of Western Egypt.—Confirmatory meeting of liquidation proposal, August 11, at the Company's offices in London.

Egyptian Delta Light Railroad.—Receipts for the ten days ended July 10 amounted to £E4,470, against £E5,732 for the corresponding period of 1914.

Suez Canal.—Receipts for the 28th ult. amounted to 290,000fr., against 280,000fr. for the corresponding days last year.

ANGLO-PERSIAN OIL CO.

July 28.

On July 28, Commander Bellairs asked the Prime Minister in the House whether he was aware that the Anglo-Persian Oil Company ordered seven tank steamers before the end of the last financial year, 1914-15, and that these steamers would cost over a million sterling and take two years to build; and, in view of the pledge given by the then First Lord of the Admiralty, on July 7, 1914, that the £2,200,000 authorised by Parliament would be exclusively employed in developing the oilfield in Persia, whether he could state the circumstances under which this expenditure had been authorised on steamers without Parliament being informed, seeing that the Anglo-Persian Oil Company had no other funds.

Dr. Macnamara (Parliamentary Secretary to the Admiralty): I would refer the hon. and gallant member to a statement made by the late First Lord of the Admiralty on June 15, 1914, in reply to a question. In that reply the general heads of expenditure intended to be covered by the Government participation in the share capital of the Anglo-Persian Oil Company were explained. The portion of the contemplated expenditure by the company on tank vessels, which will be defrayed out of Government shares, has reference to the special type of vessels designed mainly for the transport of oil to suitable deep-water loading berths. The balance of the expenditure on tank vessels will be financed by the company otherwise than from the Government capital. The company is, of course, entitled to own and employ tank vessels to whatever extent may be commercially necessary and profitable. I am informed that the aggregate expenditure on both descriptions of tank vessels will fall far short of the figure named in the question, the contract having been placed on far more favourable terms than the hon. and gallant member has evidently assumed.

Commander Bellairs: Is it not the case that whatever way the company raise money, by mortgage or otherwise, the interest, loss, and depreciation will have to fall on the Admiralty contribution? Was not an absolute pledge given that the expenditure would be confined to developing the oilfield in Persia, and for such tank steamers as were required the Admiralty would own or charter them?

Dr. Macnamara: The hon. and gallant member is confusing two things. The Admiralty money is spent on the oilfield, but the company were free to buy and own tank steamers.

NEWS FROM ALL SOURCES.

According to a Cairo telegram, a military court has fined Nestor Gianaolis, the cigarette manufacturers, £500, and their manager £100, for trading with the enemy.

The first instalment of the 40,000 tons of coal ordered in Austria-Hungary has arrived in Roumania (writes our Correspondent, under date July 17). The rest is expected shortly.

The Skuptchina has passed a law facilitating the expropriation of property in Serbia held by enemy foreigners (says our Belgrade Correspondent).

A new telegraph line has just been completed between Bucharest and Sofia (says our Bucharest correspondent). So great is the amount of telegraphic correspondence between the two capitals that a third line will probably be constructed.

Mr. Spiro Capato, of Khartoum, is in England on a business trip.

Messrs. R. J. Moss and Co., in their report dated Alexandria, July 23, state that the freight market is quiet, and cargo scarce. Spot rates for parcels of cotton-seed for London or Hull, 25s. per ton of 20 cwt. In the coal market local prices are a bit higher, owing to paucity of coal in stock. Stocks ashore and aboard steamers in port discharging, 12,500 tons. It is reported that a considerable quantity has been bought for July shipment from the United Kingdom.

SUDSLAVISCHE BANK.

Head Office: 9, KARAGEORGE STREET, BELGRADE, SERVIA.

Branches: USKUB and MONASTIR, SERVIA.

NOTES OF THE WEEK.

Sixteen weeks have elapsed since the Allied forces landed on Gallipoli Peninsula. The configuration of the country and the unexpected strength of the enemy's positions soon showed that the task of forcing the Narrows would be as formidable from the land side as by sea. Thanks to the valour and grit of the British and French troops, supported by their respective fleets, the work of wearing down the Turkish resistance and driving back the defenders yard by yard has been carried on by a force which would never have been called upon to face such an undertaking, if the magnitude of it had been realized at the outset. But after the success of the landing operations there could be no withdrawal, and for four months the Peninsula has witnessed as grim a struggle as has been taking place at any point in the vast theatre of the European war. The news published this week justifies the hope that at last preparations commensurate with the stupendous character of the enterprise have been completed, and that the Allies are now in a position to see the thing through within a reasonable period of time.

From Sir Ian Hamilton's reports of the operations at the Dardanelles we learn little more than that as a result of fighting at several points substantial progress has been made. In the Anzac zone, the first report continues, a footing on the Chunuk Bair portion of Sari Bair has been gained, and "elsewhere a fresh landing was successfully effected and considerable progress made." An official *communiqué* from the Turkish headquarters is more explicit than the British statement. New forces, it states, were landed at two points north of Ari Burnu, which lies to the north of Gaba Tepe, the original landing place of the Australasian contingents, and a third force at Karachali, north of the Gulf of Saros. The Dardanelles, it is true, is a minor theatre of war, but the importance attaching to the forcing of the Straits has made it essential that the Allies should put an end as soon as possible to the condition of stalemate which the strength of the enemy's positions and the impossibility of deploying more troops in a restricted area have brought about. The landing at the head of the Gulf is a significant development of the Allies' strategy. Karachali is only five miles from Choja-cheshme, which, with Kavak, five miles beyond, commands the approach to Gallipoli. By stopping the land avenues of supplies and reinforcements for the Turkish troops on the Peninsula, while their communication by water is rendered precarious by the activities of British submarines in the Sea of Marmora, the Allies are striking a serious blow at the enemy's capacity for a prolonged resistance. Experience in the south of the Peninsula, however, warns us that troops may be landed and yet be prevented for a long time from carrying out their main object. For this reason, as well as owing to the geography of the Peninsula, there can be no question for the present of the Turkish positions being turned by the landing of a fresh force virtually in their rear. But if the forces at Karachali succeed in working their way to the neck of the Peninsula, the operations at the Dardanelles will rapidly assume a very different complexion.

Simultaneously with the renewal of "liveliness" on Gallipoli Peninsula, the Allies are taking steps to clear up the situation in the Balkans. The negotiations with Bulgaria have been advanced a stage by the delivery of the Allies' answer to the Bulgarian Note of July 14. Although the terms of this reply are kept secret, the resolve of the Quadruple Entente to bring matters to a head among the Balkan States is shown by the fact that collective *démarches* have also been made to the Serbian and Greek Governments. According to the Serbian official statement "the communication, of an entirely friendly nature, is made with a view to dissolve causes of misunderstanding between the Balkan States, and to establish an accord between them in order to hasten the end of the war." As Bulgaria, Serbia, and Greece have made no secret of the "causes of misunderstanding" between them, it is not difficult to imagine the lines which these communications from the Allied Powers will follow. The questions at issue are the readiness of Serbia and Greece to make certain concessions: if not actually all those which Bulgaria demands, at least those to which she may be held to be entitled. If the Allied Powers are merely taking the first step in negotiations which ought to have been begun a year ago, they will be told that circumstances over which the respective Governments have no control prevent Serbia and Greece from making any concessions at all. There the matter will rest until the Entente Powers decide

Digitized by Google

to cut the Gordian knot by recommending to the Serbian and Greek Governments, in a manner which precludes refusal, the course of action that they are expected to adopt, and to the Bulgarian Government the territorial readjustment which will conform for all practical purposes with the principle of nationality.

Neither the present nor any future *démarches* at Nish and Athens need imply that the whole of Bulgaria's aspirations will be realized. The action of the Entente Powers will be determined by the interests of the Balkan Peninsula as a whole, for the steps which they are taking only incidentally have reference to the operations at the Dardanelles. If the war were to come to an end to-morrow, the Balkan question would remain a menace to the peace of Europe. It is true that a settlement of the question is calculated to have an immediate effect on the course of the struggle at Gallipoli; but if the Turkish resistance suddenly collapsed and there were no question of Bulgaria or Roumania taking any part in the war, the Allied Powers would still have on their hands for adjustment the "causes of misunderstanding between the Balkan States." Everything, therefore, points to the wisdom of settling by the agency of *force majeure* a question which is not susceptible of amicable arrangement on the initiative of the parties concerned. At the same time, it cannot be ignored that the present indeterminate situation is derogatory to the diplomacy and prestige of the Allies.

It is one of the anomalies of the situation in the Balkans that the adoption of a strong attitude by the Entente Powers would be welcomed by the countries concerned, and would not be regarded as an unjustifiable encroachment upon their independence. In regard to Serbia there is reason to suppose that only the hostility of a military clique prevents the Government from falling into line with the wishes of the Entente Powers. Greece, again, has its antagonism between a Cabinet which represents a minority of the electorate and the bulk of the people who are ready to trust to the statesmanship of M. Venizelos. The intentions of the Allied Powers, we may feel confident, are that justice should be done to Bulgaria. Her present demands not unnaturally represent the maximum she aspires to; but there is room for a compromise which will still conform with the principle of nationalities without imposing too great a sacrifice on Serbia or Greece. When the three countries—there would appear to be little difficulty in adjusting the differences between Bulgaria and Roumania—are confronted with a solution which will not only exercise an important influence on the war, but promises to eliminate all causes of misunderstanding in the future, they can be relied upon to accept it, if not eagerly, at least with resignation. Its imposition from without precludes the possibility of capital being made by political opponents out of the settlement; and by the time the whole settlement arising out of the war has to be carried into effect each Balkan State will find itself too busy with its new possessions and a new set of conditions to lament the alienation of some small strip of territory to its neighbour.

An explanation of the two versions given of the course of the negotiations between Turkey and Bulgaria is provided by a further despatch from the correspondent of *The Times* in the Balkans. When, as the result of protracted negotiations, the Turkish Government determined to make the concessions demanded by Bulgaria, a protocol was signed embodying a preliminary arrangement. But with the discussion of details difficulties presented themselves. Among these may be mentioned the question of the construction of a new railway from Adrianople to join the Kirk Kilisse branch and the Bulgarian demand for the possession of a zone of three kilometres round the station at Karagatch. On the other hand, the Turks have been encouraged by the Russian reverses to demand political obligations, which Bulgaria refuses. The negotiations, therefore, remain at a standstill, and coming events may prevent them from being renewed except under very different conditions.

If it be true that the fall of Warsaw has encouraged the Turks to raise their terms in their negotiations with Bulgaria, they appear to be the only people who have allowed themselves to be impressed to any considerable extent by events in Poland. The superiority of Germany's preparations for war is admitted, and she is now reaping to the full the advantages which she had hoped to enjoy at a much earlier period of the war. But in the absence of any signal defeat of the Russian armies it is recognized that the German Emperor's claim to have crushed our Allies has not yet been made good. In Roumania and the other Balkan States there has been little tendency to regard the fall of Warsaw as even marking the close of a chapter in the history of the war. The masterly manner in which the Russian retreat is being conducted in the face of superior numbers and an almost overwhelming supply of guns and munitions makes the evacuation of the Polish capital only another incident in the long withdrawal from the Dunajec. That chapter can only be said to be closed when the Germans have placed another Sedan to their credit, or the Russians reach a line which will play the part of the Marne in the retreat of their western Allies from Mons.

The supply of rolling stock promises to be the deciding factor in the amount of grain that will find its way into Germany and Austria-Hungary this year from Roumania. The Bucharest Government has decided to permit the exportation of wheat as soon as an amount of maize purchased after last year's harvest by the German Government but still detained in Roumania has been sent across the frontier. As Germany refuses to send wagons into Roumania, and the latter will not allow her own wagons to go beyond the frontier, the work of transporting the maize is proceeding slowly. On account of the delay arising at the frontier it is expected that the total export of grain into or through Hungary this year will be of small dimensions. There is, therefore, still an opportunity for the Allied Governments to assist Roumania in the disposal of her harvest, which can return to its main channel of export as soon as the Dardanelles are opened.

Another Turkish battleship, the Hairredin Barbarossa, has fallen a victim to a British submarine. Her disappearance has little effect on the naval situation for the purposes of this war, as the Turkish Navy is not likely to play any great part when once the Dardanelles have been forced. The loss of the vessel, however, may serve to remind the Turkish Government of the time not very long ago when it rejected the offer of a guarantee of the integrity of Turkish territory in return for neutrality. In those days the Turkish Navy vied with the Greek fleet for superiority. It had to forgo temporarily the acquisition of two first-class ships building in Great Britain; but their places would have been filled at the end of the war, and Turkey would have been at no disadvantage in regard to her rival owing to the British seizure of the ships. As things are to-day, in spite of the meteoric careers of the Goeben and Breslau, the Turkish Navy stands little chance of surviving the war.

Very little news of Persia finds its way into the Press, but it would be unwise to infer from this that Persia is entirely tranquil. We publish elsewhere an article by a very well-informed correspondent, which shows how far from the reality any such optimistic picture would be; and what our correspondent writes is unhappily confirmed from other trustworthy sources. German *agents-provocateurs* are extraordinarily active in the Shah's dominions; and though the responsible Government, we are glad to believe, is alive to the dangers of the situation, and sincerely desirous of maintaining its present correct attitude, there can be no assurance that the mischief makers will not succeed in their congenial task until they are all laid by the heels.

LETTER FROM CAIRO.

(From Our Own Correspondent.)
Cairo, August 2.

The Bomb Outrage Inquiry.

The inquiry into the recent attempt on the life of the Sultan continues, but as yet it has produced no further development; the Prime Minister is taking a very active part in the investigation, and perquisitions and arrests are the order of the day. The evidence against Helbawi, as at least an accomplice, is accumulating, but the police are still searching for the men who accompanied him to the photographers.

Receiver for Estate of Ex-Khedive's Companion.

This week General Maxwell, by proclamation, appointed a receiver of the property in Egypt of Mohammed Pasha Kamel Yeghen. The latter is a wealthy landowner, and a member of the Legislative Assembly. He posed always as a supporter of the Government, and endeavoured to form what was to be called a Government party in the Chamber. Cairo still remembers the sensation which was caused by his holding a meeting of members on his dahabia on the Nile, and the accusations of playing a double game that were levelled at him. Evidently those charges were not ill-founded; for he is one of the ex-Khedive's most devoted companions in exile, and is repeatedly journeying to Berlin and Vienna from Switzerland on his behalf. It is because of these journeys that a receiver has been appointed so as to stop the remittance of funds from his estates in Egypt. Yeghen Pasha was never a person of any political weight in this country, though undoubtedly he was in with the ex-Khedive, who was pleased to use him, as he was wealthy and did not mind spending money when it brought him into favour at Court.

The Ministry of Finance.

This past week the Ministry of Finance has lost the services of one of its most capable officials—Mr. Henry Higgs, C.B., who came out to Egypt three years ago to advise on various points, and for whom the post of Inspector-General was created. Mr. Higgs has done invaluable work during his stay in this country. His deep knowledge of economics, and of many other scientific branches which financial experts do not often study, has stood him in good stead, and the Egyptian Government has derived incalculable benefit from his experience and advice. He has sat on numerous departmental and general commissions, the most recent being the Budget Economies Commission, and has presided over several others, notably the Supplies Commission, which has had to look after the provisioning of Egypt since the outbreak of the war. As a result of his recommendations many reforms have been introduced, and it is understood that he has had a prominent hand in sketching the lines on which the future fiscal policy of the country will be based. Mr. Higgs will resume his post as Chief Clerk to the Treasury at the expiration of his leave. The Anglo-Egyptian financial authorities are sure to feel his loss very acutely, but they will derive some compensation from his return to London; for that will mean that henceforward there will be some one at the Treasury who thoroughly understands the intricacies of Egyptian finance, and, while sympathising with the man on the spot, is able materially to assist in the solution of the problems that are bound to arise in the near future.

The Ministry of Finance is also losing the services of H.E. Auguste Adib Pasha, who has ably filled the post of Director-General of Accounts, and who, on the expiration of his leave this autumn, will retire after having completed thirty-five years' loyal service. Mr. T. B. Etherington-Smith is at present acting as Director-General, but as yet nothing is known as to who is to fill the two high posts now vacant. It is quite possible that the Inspector-Generalship will be abolished, and that a rearrangement of the Accounts Department will be made, so as to allow of more importance being given to the auditory section.

By the bye, nothing more has been heard of the report of the Budget Economies Commission which was presented some months back, and to which the Government attached so much importance. Very great interest is evinced in the conclusions and recommendations of the Commission, and it is to be hoped that so valuable a document, drawn up by such prominent men, will not be left to languish in the dusty archives of the Ministry of Finance.

The Mecca Pilgrimage.

As the conditions in the Hejaz have not improved, and communication between Egypt and the Holy Places is even more difficult than it was last year at this period, the Egyptian Government, on the advice of the Grand Mufti, has issued a circular, similar to the one published last September, pointing out that the pilgrimage will this year be fraught with many almost insurmountable difficulties, and advising those who contemplated performing this religious obligation to postpone it for the time being. The Government does not prohibit its subjects from proceeding on the pilgrimage—it cannot do so without a *fetwa* from the Mufti, and the Koran does not permit the latter to accord this dispensation—but each person who wishes to visit Mecca and Medina must make a substantial deposit, so as to cover the expenses of repatriation if and when that becomes possible. It is exceedingly doubtful whether anyone will proceed on the pilgrimage this year, as apart from the question of the heavy deposit required, there is no direct means of conveyance to Jedda, and the only route open is by *Sambuk* from Kosseir or Suakim.

Egyptian Students' Absurd Petitions.

The examination period has come to a close, and, as usual, the Ministry of Education has been the recipient of countless letters, telegrams, and petitions from unsuccessful candidates praying that another examination may be held before the new scholastic year opens, so that they may be given another chance, and may not be forced to lose seniority through their first failure. This year one notes with surprise that some of the vernacular organs have supported these students by publishing articles urging the Government to grant their requests. Evidently the object of examinations is still not understood in this country—the championing of the petitions of the organs in question would seem to point to that—and the Egyptians continue to labour under the delusion that it is the duty of the examiners to pass the examinees, not for the latter to be able to pass any test the former choose to set them within the limits of the syllabus! The Egyptians have yet to learn that examinations are held as a test of knowledge, and that diplomas are granted as a guarantee that the holder is versed in the subject or subjects referred to. Apart from the heavy extra expense attaching to the holding of fresh examinations whenever students saw fit to ask to be re-examined—and the series would never end once the principle was admitted—the effect of acquiescing in the requests that are annually proffered after the examination lists are out would be so to "popularize," so to say, the certificates in question that their value would be reduced to vanishing point, since the possession of one of those certificates would be

NORTH BRITISH AND MERCANTILE INSURANCE CO.

no guarantee that the holder had attained a certain standard of proficiency. Instead of encouraging them in a train of thought, which is as stupid as it is detrimental to their studies, the local Press should impress this aspect of the question on the students who have solicited, and for some incomprehensible reason have obtained, their sympathy.

PORT SAID NOTES.

(From Our Own Correspondent.)

Port Said, August 4.

Port Said for the past three months has been crowded with Anglo-Egyptians from Cairo and the provinces, who have been prevented from taking "home leave" this year by stoppage of leave, by difficulties of travel, and, above all, by the necessity for economy. In many cases the wives and families are living here and the husbands run down for a few days' fresh air and sea bathing as opportunity affords. Many officers of regiments stationed near by, others sent down wounded from the Dardanelles, and some of them from transports afford a liberal leavening of khaki to the civilian visitors.

The Eastern Exchange and Casino Hotels have every room taken, and the former has opened an annexe near by for the overflow. The Savoy Hotel, which was closed shortly after the outbreak of war, the proprietor being a German, has recently re-opened under Italian management, and is rapidly filling up. Many flats have been taken by summer visitors, and it is impossible to hire a bathing box on the beach at any figure.

Sea bathing is the principal attraction, and large crowds may be seen daily enjoying a gambol in the surf. A cheery feature is to be found in the bathing parties of British troops from transports in harbour. The men are marched down through the streets to the water several hundred strong, and for an hour or two are to be seen swimming and splashing to their heart's content. Then they swing back to the ship, whistling the latest "rag," singing merrily, and waving cheery replies to the many salutes from fair ones on balconies and verandahs.

A number of troops have recently been brought down from "Somewhere up-country" for a short stay, and are accommodated in rush huts on the beach. These are mostly men who have suffered from the severe summer heat of the interior, and from their appearance the sea breezes and bathing appear to have a remarkably good effect on them.

THE GERMAN HOSPITAL, ALEXANDRIA.

The *Nottingham Daily Express* quotes the following letter written to Sir Arthur Markham, M.P., from Giza, Egypt, by Mr. H. Anstruther Mackay:—"I see it reported that Sir A. Markham has found yet another complaint against the Government, in that the wounded from the Dardanelles were sent to the German Hospital in Alexandria. If Sir A. Markham is sincere, and not only trying to find some loophole through which to shoot at the only possible Government, it must be that he knows nothing about the German Hospital. It may be well to tell him that it is one of the largest, and by far the best-equipped, hospitals in this country, and in normal times is attended by all the English doctors in Alexandria. Lucky are those wounded soldiers whose good fortune it has been to be sent there. The military authorities have taken over the hospital."

ENGLISH SCHOOL,
NICOSIA, CYPRUS.

Preparation for Public Schools and for Commerce.
Modern Languages. Turkish and Arabic if desired

ENGLISH GAMES.

Complete charge taken. Very healthy climate. Boys remaining for the summer holidays are taken to the Mountains. Moderate Terms.

Apply REV. CANON F. D. NEWHAM, B.A.Cantab., Director.

ALEXANDRIA SEAMEN'S HOME.

The Committee of the Alexandria Merchant Seamen's Home, in their annual report for the financial year ended March 31, 1915, state:—

No special reference need be made to the ordinary routine work of the Home during the summer months following the report up to the end of March, 1914; that period representing the usual slack season of all concerns in Egypt. The Committee records, however, with sincere appreciation, the labours of Rev. A. J. Oliphant, as acting manager of the Home, during the absence on leave in England of Mr. W. O. Endacott from early May to end September. During those and the intervening months Mr. Oliphant maintained the activities of the home with unfailing energy and conducted the domestic finances with gratifying results on all points.

Since the outbreak of the Great War, in August, 1914, the Committee have no concerts, Christmas or New Year treats to record, no efforts of the kind having been attempted. The entire resources of the Home have been occupied to the fullest extent in coping with the ordinary demands made upon them by merchant seamen, the additional requirements of the military authorities for boarders, and the daily and at times almost overwhelmingly numerous applications for rest and refreshment by soldiers employed on and about the quays on transport work. As far as the somewhat limited accommodation and equipment has permitted, the Home, in common with other institutions and members of the British communities all the world over, has performed, and is still performing, an eminently useful and important part in the strenuous times now existent.

THE ISLAMIC SOCIETY.

Indian, Egyptian, and other members of the Islamic community of London assembled with their friends on Saturday last at the Hotel Cecil to bid farewell to Mr. Chaudhrie Abdul Haq. Mr. Haq has been honorary secretary of the Islamic Society for some time past, while studying law in England, and now, having been admitted to the Dublin Bar, is returning to India to practise his profession. Dr. John Pollen was the urbane and genial chairman, and on behalf of the Society decorated Mr. Haq with a garland of flowers. In the course of some remarks accompanying the gift, he said that the present was not the time for a political speech, but he would not be trespassing into politics by acknowledging the splendid way in which the members of the great community of which his friend, Mr. Haq, was a member, had responded to England's call in this disastrous war.

Mr. Edward Delgado, Mr. Horace Douglas, Mr. Syed Abdul Majid, and the O'Donnell of O'Donnell also made complimentary speeches, to which Mr. Haq replied.

A lengthy musical programme occupied the greater part of the evening, and was much enjoyed by the auditors. Among many very interesting items were the reading of some poems in her own language by an Armenian lady, who translated them into English, the recitation of "Al-Amin," by Dr. Pollen, and the singing of some Italian songs, and a hymn in praise of Mohammed, by Professor Inayat Khan's friends.

THE "CLEAN-FIGHTING" TURK.

In the course of a most interesting despatch describing the fighting on the Gallipoli Peninsula, one of Reuter's special correspondents at the Dardanelles pays a compliment to the Turks which, we have reason to believe, is well merited. He writes:—

He would be a faithless chronicler of this war who failed to do justice to the methods of the enemy. I have been struck by the unanimous tribute paid alike by the British and Australasian forces to the clean fighting of the foe.

His courage and humanity have gained for him a respect which the Germans might well covet. His stoicism when wounded is on a par with these characteristics.

The Turk is putting up a sturdy fight, and maintaining his traditions as a soldier with splendid spirit. He is sorry to be fighting the English, who have so often stood his friends, and is honestly puzzled at a policy which he has been taught to believe has for its sole purpose the betrayal of his country.

TURKS' EXAMPLE TO GERMANS.

The *Daily Express* says: "According to a letter to his former congregation in Edinburgh from the Rev. Dr. Ewing, now a chaplain with the Mediterranean Forces, the Turks are setting examples in humanity to their allies, the Huns.

"On the whole, he says, they are dealing very kindly with our wounded and prisoners who fall into their hands. He has heard of many cases where they carefully dress injuries, give food and water to the wounded, and then leave them with a blanket in a place where they can be found by friends.

"As for the Turks who fall into British hands, nothing would persuade them to go back to their own lines. Many are ready to surrender whenever they can elude their German officers."

THE STATE OF SYRIA.

(From An Occasional Correspondent.)

Alexandria, July 25.

A New Vali for Beyrout.

Further news regarding the development of the situation in Syria has reached me through the kindness of one of the latest arrivals from Beyrout, who travelled on board an American collier that conveys coal to the cruisers stationed there. The removal from office of Sami Bekir Bey, the popular Vali of Beyrout, has been confirmed, thus enabling the commander-in-chief to assume absolute control, to exercise his military powers more drastically, and to pursue a more vigorous military policy.

It must be remembered that Djemal Pasha and the Vali in question were rivals, and it is alleged that the great popularity the Vali enjoyed, coupled with the policy of co-operation with the leading notables of Beyrout which he had pursued, provoked the dissatisfaction of Djemal, who sought his removal from office. It is stated that a supporter and friend of the Pasha, in the person of Nazmi Bey, the ex-Vali of Baghdad, has been appointed to the Vilayet of Beyrout, where he has already arrived and assumed charge.

Unrest in the Lebanon.

A possibility which was at first considered to be remote and improbable is beginning to show serious signs of becoming a fact. The prevalence of unrest in the Lebanon is a significant circumstance. The general discontent of the Lebanese consequent upon the Government's insistence on obligatory military service is assuming alarming proportions. A Lebanese is determined to sacrifice all that is dear to him rather than submit to an unjust demand; and there appears to be, therefore, considerable likelihood that the tension between the population of Mount Lebanon and their rulers may lead to lamentable results, the more so as there are persistent reports of Turkish threats to bring about a massacre similar to the famous one of 1860. It is understood that the Lebanese have sent a message to the French Government saying: "Simply arm us and we will settle with the Turks." In point of fact, it appears to be somewhat strange that, engaged, as they are, in a stern struggle with the Turks, the Allies do not seek to engage him in another part of his empire, and thus create a diversion in their favour.

The Maronite Patriarch.

A trustworthy informant tells me that the Maronite Patriarch has again been summoned to Damascus on the pretext of conferring with the military authorities upon the situation in the Lebanon, but really with a view to his arrest and confinement there. The Patriarch has hitherto succeeded in evading the unpleasant invitation. The Lebanese have advised his Beatitude that, come what may, he should never comply with the Government's orders, and have informed him that they are ready to defend him and their country to the last.

The Dardanelles and Syria.

The comparatively tranquil state which Syria was lately enjoying has been disturbed, and conscription, requisition, and commandeering have again been resumed. In order to replenish their reserves, the Turks have again ordered general conscription, which embraces all men between the ages of 18 and 47. Meanwhile requisitioning with its attendant evils has again been resumed with feverish activity. The Turks have not confined their commandeering to carriages and horses only; they have lately, it is said, discovered the important *rôle* that a donkey can play in war time, and donkeys have, therefore, been added to the requisition list, and a general registration is feverishly proceeding. The methods of donkey registration are amusing. They are divided into two classes—those on active service and reservists—viz., *Brinji* and *Ikinji*. The impression of donkeys' hoofs are taken, so that proprietors may not be able to conceal them in future.

Depression in the Lebanon.

Mount Lebanon is at this time of the year usually overcrowded with visitors, upon whom a great part of the inhabitants depend for their living. This summer, however, the mountain is in a desolate and pitiable condition. Hotels and private residences are closed, and there are no signs of life. A gloomy impression prevails everywhere. The Government is even prohibiting the transport of wheat from the interior to the coast.

The prolonged inactivity of the Allies and the lack of attention hitherto conspicuously displayed towards the inhabitants is the cause of extreme disquietude and uneasiness among the people. Depressed and exasperated by many privations, the Syrians yet realize the tremendous task on which the Allies are engaged. But this, it is maintained, need not prevent them from sparing a couple of warships to convey arms to the anxious people. The Allies have waited too long, and it is generally held that the time has arrived when effective action should be embarked upon.

UNREST IN THE HEJAZ.

(From a Correspondent.)

Alexandria, July 19.

Unrest prevails in the Hejaz, where Turks and Arabs are apparently struggling for predominance, the Arabs refusing to respect the ascendancy of their rulers. The neighbourhood of Mecca has lately been the scene of some slight skirmishes between Government troops and the Arabs. It appears that while *en route* to Mecca the Governor-General and his military escort were attacked when a little way from Mecca. The engagement resulted in the death of two Turkish officers and a large number of Turkish soldiers.

The Sherif of Mecca is reported to be disgusted with Turkey's conduct in the present war, and his anger is shown by the strained relations that exist between him and the Governor-General. The Arabs are naturally strict adherents and supporters of their Sherif, and in reality they recognize no master but him. Thus the position of the Turks in the Holy Land is becoming more and more untenable, and they may finally be compelled to evacuate the country and seek safety elsewhere.

The Arabs' abhorrence of the Germans is great. A party of fifty Germans, with a couple of guns, attempted to reach Jeddah, but the Arabs at once attacked the unwelcome visitors. The son of the Sherif, however, came to the rescue, and succeeded in restoring peace for the time being.

PARCELS TO GALLIPOLI.

Several letters complaining of the non-delivery of parcels forwarded to members of our forces at the Dardanelles have been published in *The Times* recently. The subject certainly appears to call for prompt investigation. Thus "Captain, R.F.A.," writes:—"I have just returned, wounded, from the Dardanelles after a number of weeks' fighting there, and my object in writing to you is to vent a grievance regarding the manner in which the postal authorities of the British Mediterranean Expeditionary Force carry out their work. During the entire period of time I was out I did not receive a single parcel, although each week my tobacconist sent me cigarettes from home and my wife forwarded parcels of cakes, etc., on an average twice a week. Letters were delivered regularly, and newspapers never failed to turn up, but, as I have already said, not one parcel. Mine was by no means an isolated case, as on all hands the complaints from officers and men on the non-appearance of their parcels were constant and very bitter."

Another correspondent writes from Wimbledon:—"I have been sending parcels every week by parcel post for the last eight weeks, and my son writes, under date of July 24, that not one single parcel has reached him. I have also sent large quantities of cigarettes and tobacco to his men with a like result. . . . The sooner someone is made personally responsible for this wilful mismanagement the better it will be for our soldiers."

"C. A. M." has been more fortunate than either of these correspondents. He writes: "I have a son, a 2nd lieutenant, also in the R.F.A., who has been in the Dardanelles from the start; he, too, has had numerous parcels sent to him regularly, frequently up to the limit of 11 lbs. in weight, and never registered; but of these not one has miscarried, and only one has been looted! Occasionally some parcels have been delayed, but on the whole they have arrived with wonderful regularity, and my son has repeatedly expressed his admiration of the parcel postal service. In his battery at least there is nothing to complain of."

"Captain, R.F.A.," gives the following advice to relatives and friends sending parcels to soldiers fighting in the Peninsula:—"(1) Keep parcels as small as possible. (2) If parcels can be reduced in size to the limits of letter post, always register them. (3) Observe carefully that there are no outside advertisements on the parcels showing that the contents probably consist of tobacco, confections, or food. In conclusion, let me urge all those who have relatives or friends fighting against the Turks to write frequently to their 'men' and to keep on sending small personal gifts, especially of sweets, thirst-quenchers, and cigarettes. If those at home could only witness the delight and joy of all ranks when the postman turns up—all too seldom—with a well-filled bag they would grudge no sacrifice of time or money in order to provide that pleasure as frequently as possible to these splendid chaps who are putting up such a gallant fight in the Gallipoli Peninsula."

BULGARIAN LETTERS.

(From Our Own Correspondent.)

Sofia, July 20.

A Bulgarian View of the Situation.

The Ministerial *Narodni Prava* has published in a leading article the following important statement regarding the situation, which has produced a great sensation throughout the country:—

The Bulgarian Government is constantly reminding those whom it is necessary to remind that the dispute left by the war of 1912 is by no means settled, and that the Bulgarian nation will on no account permit any further violation of the principle of nationalities in the Balkan peninsula or the abandoning of a million Bulgarians to a foreign yoke. . . . Feelings are over-excited, the atmosphere is obscured, and the future is not brightened by any ray of peace and tranquillity. The sparks flying from the gigantic European conflagration cannot, it appears, be extinguished in the Balkans, and the more so because on August 9, 1913, an enormous amount of highly inflammable material was piled on the Balkan Peninsula.

Events are developing in accordance with an ineluctable destiny, and do not depend upon our desires. The Bulgarian nation rallied to the cry, "Union of all Bulgarians." The nation awaits with perfect coolness the moment when it will cry, "Give me my own." The people are gathering in an excellent harvest; the grain stores of the villages and towns will be replenished; the nation will have no fear for its food supply, it will not ask for alms. It will do its duty to itself, to its future, to the supreme national tasks pointed out by the great apostles of Bulgarian regeneration—Boteff, Levsky, Karadjata—one Bulgaria for all Bulgarians. Bulgaria is prepared for all events. She will *not* embark upon adventure, but she will demand her own.

The effect produced in the country by this publication is very marked. Already the mayors of many villages in the Tirnova district have sent a collective telegram to the Prime Minister, assuring him that, having gathered in their crops, they are now ready to respond to the call of the Government for the realization of the national ideal—the union of the Bulgarian people.

Prince Hohenlohe's Visit.

Last Saturday Prince Hohenlohe arrived here from Bucharest, by special train, on his way to take up the post of German Ambassador in Constantinople. He was met at Podvein, the Royal station, by General Savoff, representing the King, by M. Gratko Kosseff, Secretary-General of the Foreign Ministry, and by the German, Austrian, and Turkish Ministers. At 5 p.m. he was received by King Ferdinand, who was accompanied by Queen Eleonore and the Crown Prince Boris. The audience lasted two hours, and at half-past eight the Prince dined privately with the Royal family at Vranya, the King's summer residence. On Sunday an entertainment in his honour was given at the German Legation, at which Dr. Radoslavoff and M. Tontcheff were present. He left on Sunday night for Constantinople.

Commenting on this visit, to-day's *Duma* says:—

It seems that Prince Hohenlohe has not been quite satisfied with the results he attained at Sofia, as it became necessary to meet the Vice-President of the Chamber and to announce through him how great is the German sympathy for Bulgaria. Prince Buelow acted in the same way at Rome, when he discovered that he was not achieving much success in responsible quarters. The statement of the *Mir*, that the Prince expressed a desire to see Bulgaria's attitude defined early, before the Austro-German troops reach the Bulgarian frontier, is true.

Sofia, July 27.

The Political Situation.

There has been no change in the political situation this week. The Entente still delays its reply to the last Bulgarian Note of June 15. Last Friday Baron Wangenheim arrived here on his way from Constantinople to Berlin. He visited M. Tontcheff, the Minister of Finance, and Dr. Radoslavoff, the Prime Minister, and was received in audience by King Ferdinand. It is reported that in conversation with Bulgarian Germanophils the Baron said that the German armies would be in Paris by October 1; that Germany and Austria have delivered an ultimatum to Roumania, demanding the free transit of munitions sent from Germany to Turkey, and giving her till August 10 to define her position; and that should Bulgaria range herself on the side of the Entente, Germany will immediately withdraw her troops from Russia and dispatch them to this country!

Turkey and Bulgaria.

The Turco-Bulgarian negotiations regarding the frontier, which were at a deadlock, were pushed forward after the arrival of Prince Hohenlohe in Constantinople, and according to trustworthy information an agreement was last week signed at Constantinople. By this agreement Turkey cedes to Bulgaria all that portion of the Dedeagatch railway line in Turkish territory, including the stations at, and the towns of Ourli, Demotika, and Kuleli Bourgas, only a strip of three kilometres in the neighbourhood of Kara-agatch station remaining open for discussion. From the best Government source I learn that in connection with this concession Bulgaria is left free to act *vis-à-vis* Turkey and the Central Powers.

Casino Outrage—Prisoners Executed.

The sentence of death passed by the Court-Martial upon Vikenti Pop Anastasoff and Itzo Santoff was confirmed by the Military High Court of Cassation, and last Thursday it was submitted to the King, who confirmed it the following day. The sentence was carried out yesterday in the courtyard of the Central Prison. Two gypsies acted as hangmen, and the military and civil authorities were represented. A crowd of several thousand people gathered outside the building, and about 500 of the public were admitted. Amongst the latter was General Boyadjieff, the former Minister for War, and the father of Lieutenant Boyadjieff, who was one of the victims of the bomb outrage. After the execution the crowd outside and inside the prison struggled hard to obtain pieces of the ropes used, possession of which is supposed to bring good luck and health to the owners!

BULGARIA AND THE ENTENTE.

Mr. P. M. Mattheeff writes from Sofia (July 19):—Enclosed is an article from an authoritative Roumanian Bucharest paper. It gives the point of view on the Bulgarian situation of a Roumanian statesman. The statement is clear and frank; it has attracted considerable attention here in Sofia. The references to Constantinople are, however, unfounded. The Bulgarians have never aspired to the possession of Constantinople; they consider it far beyond their capabilities.

My own opinion on the subject is—the Entente Powers have never taken up Bulgaria seriously; they have trifled too long, and now, whatever they decide to do, they have to fight against the influence of the recent uncontested events on the battlefield. Far too much care has been taken of Serbian susceptibilities, and not enough appreciation of Bulgarian wrongs, with the result—the present impasse.

It is a pity. Great Britain's intentions have invariably been the best for the consolidation of the Balkan nations. All Bulgarians know this; but Great Britain has proved herself repeatedly weak in action, yielding her principles for the sake of the interests of allies or for avoiding small personal trouble. Once only did she put her foot down and grandly helped Bulgaria out of the greatest danger. The occasion was the final settlement of the Union of East Roumalia to Bulgaria. The indomitable courage of Sir Wm. White, Ambassador in Constantinople, exalted Great Britain's reputation and saved Bulgaria. The situation then was very complicated, but good will and strong resolve carried the day. The present situation is, of course, far more serious, and necessarily demands stronger good will and greater resolve to solve it; but what do we witness—trifling with matters of life and death, with the existence or the suppression of States! The diagnosis of the disease has been made; there can be question of one instrument only, the lancet. But the interested Allies cannot agree as to the hour for the operation, and the gangrene is setting in! If Serbia is a hero in Great Britain to-day, so was Bulgaria two years ago and for

Digitized by Google

the world at large. Bulgaria succumbed before shameful odds, and has grievously suffered and is still smarting. Is it not time for someone else to make the necessary sacrifice that will enable Bulgaria again to draw the sword for justice and civilization? No Government in Bulgaria could think of calling a mobilization of the country's forces without something substantial in hand. The Bulgarian demands are not preposterous, as are those of Roumania, Serbia, Greece, or Italy. They are such as have been recognised by international conferences and treaties.

[ENCLOSURE.]

Translation from a Roumanian paper, the organ of Marghiloman, a prominent leader of the Roumanian Conservatives:—

The European War found Bulgaria smarting from severe wounds subsequent to the second Balkan War and the Bucharest Treaty. Her faith in Russia's protection measured out equally to the Balkan States for the sake of Slavdom and Christianity met with a bitter disappointment. The Bulgarians were praised and encouraged until they vanquished the Turks and reached Chatalja. No sooner, however, was the question of Constantinople raised, and that of the realisation of her ideal, than Bulgaria was abandoned, and Russia stopped at no means in order the more to humiliate her. Russia encouraged Roumania and pushed her across the Danube, although she was considered as the natural enemy of the Southern Slavs. In this manner Russia gave a flagrant proof that she was, above all, interested in the Serbians to be used against Austria.

Such were the conditions under which Bulgaria laboured when the European War broke out; this is why the case of Russia and her Allies has failed to move Bulgaria, although represented as that of civilization and the small nations. Bulgaria has not concealed her animosity towards Serbia, and has shown it indirectly towards Russia. The Bulgarians have met with coolness the cause of international justice and civilization so loudly proclaimed by the Entente. The geographical position of Bulgaria is in the road of Russian expansion, and her unhappy recent experience forced upon her a policy specially her own; this policy dictated distrust of Russia and the acquisition of Macedonia. This guiding policy necessarily, not to speak of sympathy or inclination, has led Bulgaria to the side of the Central Powers.

Russian influence, very strong up till 1912, has been followed by deep distrust, not to say hatred, Russia now being accused of unjust, partial treatment of Bulgaria in favour of Serbia for the purpose of imposing the deepest humiliation upon a nation which had but just covered itself with glory.

The sympathy of Bulgaria towards the Central Powers has not led her to active operations; her neutrality is explained rather by her great sufferings and the dark dealings of Russia than by her disinterestedness as to the results of the present war.

Bulgarian neutrality has, however, been benevolent towards the Austro-Germans, from whose victories Bulgaria expects the correction of the injustice of 1913, and the acquisition of Macedonia. The endeavours of the Entente Powers to draw Bulgaria into action against Turkey have been without effect; the Bulgarian Government has, so far, given one and the same answer: In the first place, Macedonia, "de jure" and "de facto." The Midia-Enos line, the only acquisition which would fall to Bulgaria should the Entente triumph, is insufficient temptation, because it would virtually be a renouncement of Macedonia. The acquisition of Constantinople alone can draw the Bulgarians into action against Turkey, but such an acquisition is bound to be followed by a permanent danger from Russia, and this precludes their proposing it even as of a second-class importance.

The above considerations explain why the Bulgarians have not changed their disposition during one whole year of war, notwithstanding the constant endeavours of the Entente Powers to win them over. They have not wished, and do not wish, to profit by the difficulties in which the Turks have been placed—isolated and attacked as they are by sea and by land by great armies. All the Bulgarians demand of the Turks is a rectification of the frontier. They contributed to the fall of Venizelos, and by their enigmatical and threatening attitude stopped the Greeks from operating against Turkey. They have always been, and are today, the greatest impediment to inconsiderate Roumanian intervention.

The entrance of Italy into the war on the side of the Entente, with the understanding that Italy should take the place of Austria-Hungary in the Balkans, and this with the consent of Russia, further confirmed Bulgaria in the line of conduct she had adopted. It also opened new prospects for her diplomacy.

Were Austria to accept or to take no notice of the Serbian and Greek occupation of Albania, both Greeks and Serbians could be induced to give up Macedonia to Bulgaria. In this manner a new equilibrium would be created in the Balkans, but with the help and under the control of Austria. The Balkan League, so much desired by Russia against Austria, would thus have been realised as soon as Austria had resolved to sacrifice Albania. This league may not develop into an alliance, but it will exist, in fact, as the result of the established harmony in the Balkans, but under the influence and guidance of Austria.

This is why the events themselves impose the revision of the decisions of the London Conference and the Bucharest peace, which is not in the interest of the Entente Powers, and, in particular, of that of Russia and Italy. The events themselves and the economical and national interests of the Balkan nations positively demand such a solution. A rapid and full triumph of the Entente Powers can alone give a new direction to the affairs in the Balkans, and the conduct of their nations.

LONDON TO PORT SAID.

(FROM A CORRESPONDENT.)

In normal times the Overland route to the East is so well known as to be about as interesting as a run through a London tube. At the present time, however, although the familiar Marseilles route has been reopened, the journey is not without thrills, in particular as far as the run to Paris is concerned.

Traversing the Garden of England, through interminable lanes of hops, one catches glimpses of women haymaking in the fields, while at many points men in khaki are busy loading fodder into trucks. The train is full of silent, thoughtful officers returning to the front after a brief spell at home. Some little delay at Folkestone for passport examination, and then one drops out into the Straits, leaving the Old Country in its ring of clouds.

The passage to Boulogne is, to say the least, extremely interesting, but that, perhaps, is the most that should be said! Boulogne these days is to all intents and purposes a British town. It reminds one forcibly of a large military centre in England. Many of the big five-story buildings are now used as hospitals; khaki cars drop down the old pavé streets with harassed staff officers; Red Cross cars are seen everywhere; while "Tommy" abounds in all stages of development.

The run to Paris takes about five and a-half hours. This is also a journey crammed with excitement, for here is seen a striking blend of khaki and the light blue of our Allies' uniforms. Of the train-loads of men, material, and munitions, and the parks and encampments passed on the way, much could be written that would go far to lighten the load that appears to have settled on the hearts of some of our home critics—but prudence forbids. The run from Boulogne to Paris takes about two hours longer than the normal time.

From Paris to Marseilles all is easy going. After a comfortable dinner at the Lyons Station one drops into the 8.5 p.m., has a whisky and soda in the *wagon-lit* while the attendant is converting the seat into a cosy bed, and sleeps soundly until Avignon is reached at about seven the following morning. A breakfast car is here attached, and fragrant coffee and dainty rolls command attention while the train slips through the hilly, poplar Rhône Provinces.

Marseilles is practically a hospital town, and the many maimed soldiers afford a sad reminder of the horrors in progress a few hundred miles north. The Indian camp not far away affords a remarkable picture of the friendly Eastern invasion of Western soil. A number of German prisoners—Hamburg dockers for the most part—are employed on the quays at Marseilles working out cargoes.

There is something reassuring in the sight of a big P. and O. liner in dock with the Blue Peter flying, and breezy officers superintending the Eastern mail. The familiar black and chocolate lines afford ample evidence, if any were needed, of Britain's command of the sea. With mails aboard, the steamer swings out into the Gulf of Lyons, and interest in the fading French coast is diverted by the lunch bugle.

Malta these days is a seething hive of industry. Armies of workmen are busy refitting and effecting repairs to every variety of Government craft. The French Navy is also much in evidence there, and as our boat leaves the port after a short stay the French tars line the rails of their vessels and give us hearty cheers.

Many strange stories were adrift in Malta, some of which bore a resemblance to truth. Of these may be mentioned one concerning the recent escape of one of our largest transports—a well-known Atlantic steamer—from being struck by an enemy torpedo. It is said that the torpedo, which was discharged by a submarine, passed about twenty yards from the crowded troopship, and it was only by clever manœuvring that disaster was avoided.

Thanks to our Silent Fleet, the passage through the Mediterranean was as uneventful as in normal times, and four and a-half days after leaving Marseilles the lights of Damietta and Port Said were blinking us a cheery welcome to the East.

IN STRICKEN SERBIA.

We published a short time ago (June 18 and July 2) some extracts from letters written by Dr. Lauwens of the Wounded Allies' Relief Hospital in Serbia. The following passages are extracted from further letters of Dr. Lauwens, and serve to give some idea of life and conditions at Kragujevatz.

Dr. Lauwens is a distinguished Belgian surgeon. His presence with a British mission in Serbia is an interesting illustration of the readiness to combine in any way to help on the good cause that animates the Allies the world over.

KRAGUJEVATZ, June 4.

We have been at work here for a fortnight, and already 200 patients have passed through our hospitals. . . . Here we see little or nothing connected with the army. True, I have seen some howitzer batteries and pontoon sections drawn by bullocks, but that is all. We do not know whither they were bound, but even if we did, we should not be allowed to write about it.

The epidemics are dying out rapidly, and if the typhoid (*not* exanthematic typhus) and cholera do not make their appearance, the hospitals for infectious diseases will be able to close their doors in a few weeks.

June 12.

The heat is terrible. For the exanthematic typhus this is a good thing, and the number of cases is further and further reduced.

On June 9 we had a visit from Austrian aeroplanes. They aimed at the Palace of the Crown Prince and the Arsenal, but only succeeded in killing some peasants. . . . One of the enemy aeroplanes was brought down by one of the French aviators serving with the Serbian army. Its two occupants were killed, and the machine itself caught fire.

We have just made acquaintance with a curious custom of the country. The landlord of our house, who lives in one wing, yesterday lost a son, and last night, at 3 a.m., we were aroused from our sleep by loud lamentations, uttered by "mourners," who, I believe, are hired; and this went on till morning. Now they are preparing for the funeral—they are expeditious in this country.

July 5.

The work of the hospital becomes less each day, but in all the Serbian hospitals preparations are being made for the reception of numbers of wounded. . . For the past ten days we have had torrential rains, and as a result the river Lipitza has overflowed, flooded the lower part of the town, swept away several bridges and foot-bridges, and damaged the railway line. . . . Since yesterday evening the river has fallen five metres.

We have just taken part in a sad ceremony, the funeral of one of the nurses of the Stobart Mission, who died of fever. She came here two months ago, and had been ill about three weeks. Eight other nurses of the same mission are down with the same illness. . . . Four nurses and we two doctors represented our mission, and besides the entire staff of the Stobart Mission, there were present representatives of the Russian and Scotch missions, the Serbian military authorities, the French, English, Russian, and Italian military Attachés, and many of the inhabitants of Kragujevatz. The procession was headed by the band of the King's Guard; the hearse was surrounded by Serbian soldiers, wearing on their backs strips of white stuff, which, I suppose, were "mourning bands"; next came the clergyman of the Mission, and then the various delegations. It was an interesting thing to note that a Protestant service was held in the Orthodox Cathedral. Afterwards we proceeded to the cemetery, where the last prayers were offered, but no address was given. We left feeling very sad.

Yesterday Kragujevatz was the scene of a congress of Serbian surgeons. I attended the meetings and the reception at the residence of the Crown Prince, and found it all very interesting.

LA GRÈVE DES SERBES.

Under the above heading the *Journal de Genève* (July 30) deals with the attitude of Serbia at the present crisis. After referring to the months of inaction which have followed the last Austrian retreat from Serbia, and to the wonderful results which attended the efforts of French and British doctors and nurses, when the little country was stricken with disease, the article continues:—

Les Serbes sont inquiets et mécontents. Pour s'assurer le concours des Bulgares, la Quadruple Entente a promis à ceux-ci les territoires macédoniens conquis en 1912 et 1913. Les Roumains réclament, d'autre part, comme prix d'une intervention de plus en plus éventuelle, le banat de Temesvar, en grande partie peuplé de Serbes actuellement sujets hongrois. L'Italie est entrée en campagne avec le projet déclaré de s'approprier les côtes dalmates et peut-être même croates, dont la population est en majorité serbe. Tous ces projets ont mis en défiance le cabinet de Belgrade. La victoire même va-t-elle le dépouiller de certains territoires qu'il possède pour les avoir arrachés aux Turcs et aux Bulgares par des combats sanglants, tandis que d'autres territoires qu'il considère comme faisant partie de son héritage légitime lui échapperaient à jamais? La Serbie sera-t-elle l'éternelle sacrifiée? Elle se met en défiance et fait la sourde oreille aux demandes répétées qui lui viennent de ses alliés. Si cette grève d'un nouveau genre se perpétuait, elle aurait ses inconvénients et ses périls, non seulement pour la Quadruple-Entente, mais pour la Serbie elle-même.

DIPLOMACY IN THE BALKANS.

The *New Statesman* (July 31) devoted a long article to the consideration of the Balkan deadlock and its effect upon the war as a whole. The chief military importance of Greece's intervention is shown to have passed when our troops once became firmly established in Gallipoli; the value of assistance from Bulgaria or Roumania would still be high. In searching for diplomatic methods which would settle the question of Balkan neutrality once and for all, the paper says:—

There are some of our counsellors who urge that we could solve everything by exchanging the negotiatory for the imperative mood, and peremptorily ordering each of the other Balkan States to give Bulgaria what she desires. The plan is simple—too simple. One need not point out the natural objections to it. Yet its advocates have at the back of their heads two sound ideas. One is that the spoliation of Bulgaria under the Treaty of Bucharest must be undone in principle, if the disunion and consequent paralysis of the Balkan States is to end. The other is that Balkan statesmen sometimes prefer the orders of Great Powers to their requests, because obeying the former entails less personal responsibility on them than complying with the latter. . . A diplomatist who should know just when to solicit and when to command might sway all the Balkan capitals, but such diplomatists are born, not made, and they are not born very often.

THE SITUATION IN PERSIA.

(From a Correspondent.)

The Wolff Agency telegraphed from Stockholm, under date of July 11:—"A Russian diplomatist, in speaking of the situation in Persia to the *Novoye Vremya*, declared that the Government will probably be confided to Mustaufi-el-Mamalik. This appointment would prove that the anti-Russian tendencies were increasing, and that it would not be easy to overcome them." If this news be true, as seems quite likely in this instance, the young Shah will have his fourth Ministry in less than a year—the Cabinets of Mustaufi-el-Mamalik, of Mushir-ed-Dowleh, of Prince Ain-ed-Dowleh, and of Mustaufi-el-Mamalik.

It really seems that the dangers of the situation brought about by the war are not appreciated in Teheran. Under the pretext of profiting by the chance of the European conflagration, to free Persia from the fetters that bind her, certain deputies, constituting a kind of Committee of Public Safety, attack Great Britain and Russia, and advocate war on the Turco-German side. It would be impossible more lightheartedly to bring about the final break-up of Persia, while pretending to save it from that fate.

It is certainly easy enough for the Germans to dangle before the eyes of the Persians the prospect of the end of the Anglo-Russian control in Persia, and to promise them the help of Turco-German armies for the deliverance of the country. Persian journalists in the pay of official and semi-official agents of Germany proclaim openly that the day of vengeance has come, and that the country ought to take advantage of the weakness of the Anglo-Russians (!), to rise *en masse*, and to induce the Persian tribesmen to co-operate with the Turkish Army and to clear the land of its hereditary enemies. From Constantinople a bureau, subsidized by Germany, is flooding Persia with pamphlets containing gross attacks on Russia, Great Britain, and—France! Under such titles as "What is Our Duty?" and "Who are the Barbarians?" these productions openly urge the Persians to take up arms.

What does Germany hope to gain by egging Persia on to fight? Does she really imagine that the Persian Army is capable of co-operating to any good purpose with her and the Turks? Or rather, does she not hope by working there to throw the country into a state of ferment, as she is working elsewhere without rest or respite, to add to the embarrassments of the British and the Russians? In any case it is Persia and Persia alone who stands to suffer and to pay!

But it is not to be believed that the oligarchy which rules at Teheran can allow itself to be hoodwinked so easily, that it should be so little concerned about the unfortunate position of Persia as, by its manœuvres, to push the country on to its ruin; for amongst these men there are certainly some ardent and sincere patriots. German gold, however, is an irresistible argument to those unscrupulous men who, under the guise of purest patriotism, exploit the noblest feelings of their fellow-countrymen and incite them to attack Great Britain and Russia. And it is this band of irresponsibles who to-day give its laws to Persia! The Wolff Agency is quite right in saying that anti-Russian tendencies are on the increase, and that it will not be easy to counteract them. Clearly, the Wolff Agency is paid to know!

The Persian Government so long ago as last November proclaimed its neutrality, and has done everything in its power to maintain a correct attitude. Its task is all the more difficult because it has to struggle against the feeling of the people, who, ignoring facts, and stirred up by the paid agents of Germany, loudly proclaim their hatred of Russia.

This sentiment is not difficult to explain. Many Persians will tell you that Persia has suffered too much at the hands of Russia not to feel a deep-seated hatred against her. But even if the feeling be legitimate, we may still ask whether it is good policy to show it so violently, and whether it be within the bounds of possibility to give it a concrete form by declaring war on Russia; and to that query the Persian Government, rightly mindful of its duties and responsibilities, can only answer bluntly, "No." For it has neither money, nor munitions, nor an army—nor any chance of obtaining them. And thus it comes about that sooner than yield to the behests of the Teheran oligarchy one Cabinet after another prefers to retire from office.

But this course, which may appear to a Persian Minister as a solution of the difficulty, is one only for himself, not for the nation. Each Cabinet that comes into office finds itself faced by the same situation, the same difficulties, the same lack of money, munitions, and troops; and after a longer or shorter time it has to make way for another Cabinet. This will go on until the day when, having spent its strength in struggling against the German emissaries, the Government will no longer be in a state to oppose any rising of the people. Then, probably as the result of some trivial occurrence, the fateful cry *alea jacta est* will reverberate across the destinies of Persia.

But, it will be asked, what is the remedy for a state of affairs that seems so hopeless?

The solution we recommend is certainly a radical one; but when a matter so important as the existence of a nation is at stake there is no liberty of choice. We ask that the Shah, exercising his constitutional prerogative, should dissolve the Parliament, proclaim a state of siege throughout the country, and call to power those men whose principles, experience, and wisdom would be a source of strength and stability to the Empire and the Throne. These men might, imitating the example that has been set in Europe, lay aside for the time being their political differences and the personal rivalries that poison their political life, and, taking as their single motto "*Salus patriæ suprema lex*," unite their endeavours and bend all their energies to bringing the Persian ship of state, already leaking in many places, safe to port. These men are: The Ain-ed-Dowleh, Mustaufi-ed-Dowleh, Saad-ed-Dowleh, Mushir-ed-Dowleh, Mutamin-el-Mulk, Vossukh-ed-Dowleh, Firman Firma, Samsam-es-Saltaneh, Siphadar-Azam; and we should not fear to add to this list the popular leaders, such as the Taghizadeh, Hussein Gholi Khan Nawab. The spirit of pure patriotism which animates these men is a guarantee of their desire to work, under the responsibility of power, for the welfare of their country, and to save it from the cataclysm that threatens us. And if, inspired by patriotism, they agreed to act in harmony and to unite in order to rule the country and save it from its enemies, external and internal, they would have deserved well of their fatherland.

We are convinced that Great Britain, who has done so much for the establishment of a constitutional régime in Persia, would be glad to help the Shah in the perilous situation in which he finds himself with his people, by advising him to form a Cabinet as above set out; and that she would be willing to assist such a Government financially, *with the sole object of enabling it to govern in the true interests of the country.*

It is fortunate that Great Britain is now represented at Teheran by a man of marked ability and worth. Mr. Marling has a perfect grasp of the situation, and his knowledge of Persian affairs affords a further cause for hoping for an era of reason and of sane policy.

TANGIER TO TEHERAN.

It has been decided, I see, to accept volunteers from Turk's Island for service at the Front. Presumably they will be sent to the Gallipoli Peninsula—if only they arrive in time!

***

Sir A. Mond's recent address on our neglect of the sciences has reminded a correspondent of a fine specimen of a sword which he came across in his wanderings in the East. "It was," he writes, "in the outskirts of Damascus, in a private house into which my guide took me; and there I saw the finest example of an inlaid Damascene blade that I ever set eyes upon. It bore the following inscription:—

Science taught me to make thee.
With thee I conquered. With thee I hold.

The names of the owner and the maker, together with the usual prayer and date, were added, but I have not my notes by me, and cannot remember them." We might do worse than borrow yet another hint from the East, it seems. Our soldiers are too busy wielding their swords—or the modern equivalents thereof—to bother about any "inscriptions." But what about those of us who cannot, for one reason or another, get to the Front?

***

The mails from the Near East continue to arrive in a rather erratic fashion, as regular readers of THE NEAR EAST have no doubt observed for themselves by comparing the dates of the various Correspondents' letters. But, for some reason I cannot quite make out, Bulgaria and Roumania seem to be even more behind in this respect than their geographical position would lead one to expect. This must be my excuse for referring to a successful celebration that took place in Sofia nearly a month ago. On Sunday, July 18, I learn from a letter received on Monday, the Bulgarian capital presented an appearance that would certainly have led any Londoner who had been suddenly dropped down there to imagine that he had arrived on the local "Queen Alexandra's Day." For the streets were alive with pretty girls carrying baskets of roses, which they were selling as fast as possible to the passers-by, and nearly everyone was wearing one of the beautiful flowers. Then in the evening there was a procession of motor-cars, carriages, and vehicles of all kinds, decorated with roses, which passed along the principal streets, between crowds of interested spectators. This was followed by a distribution of prizes amongst the participants in the procession; and, finally, at the Municipal Gardens, there was a *bal champêtre*. The whole was organised by a society that was formed a year or so ago, if I remember aright, for the purpose of carrying on a campaign against that dreadful disease, tuberculosis, and I am glad to learn that the proceeds of the rose sale amounted to 15,000 *leva*.

***

The interesting alien who succeeded in persuading Darlington to elect him as its Parliamentary representative—I am sorry I cannot recall any of his aliases at the moment of writing, but he had so many of them—was, I learn, last year "interested in some oil business in Roumania." I hope this report has not been set about with a subtle idea of making trouble between this country and Roumania. The Roumanians, I feel sure, are no more anxious to claim him for their own than is—Darlington.

***

Some time ago I received a letter from a correspondent who is now serving with our Forces on the Gallipoli Peninsula. It was headed, "Anzac Cove," and I sought in vain on every map and in every gazetteer for the name, of which my correspondent vouchsafed no explanation. A few weeks ago, when Sir Ian Hamilton's despatch was published, I found the name marked on the excellent map that appeared in the *Morning Post*. Unless I am much mistaken, the cove to which it is attached is also known as "Jove's Cove," but that is by the way. I was satisfied, and in my innocence concluded that the name was a Turkish one. Now, of course, I learn, from the message sent last week by one of Reuter's special correspondents, that I was wrong again. He writes:—

> You may search any map in vain for the name "Anzac," yet it is a word bound to prove imperishable in the annals of the British Empire.
>
> The name needs explaining; it is arrived at by piecing together the initial letters of Australian-New Zealand Army Corps. Let every Englishman add it to his memory of the undying glories of his race. The Australian and New Zealand Divisions landed here, and dug themselves into an environment quite without parallel in the whole story of military achievement.

As to the map, the correspondent is wrong. But as to the glorious exploit of the Australians and New Zealanders he is well within the mark.

After all, too, I learn from the same correspondent that my mistake in taking the name for a Turkish one was at least excusable. For he writes: "A captured Turkish officer has just pointed out a quaint coincidence about the word 'Anzac.' The name, he says, is actually a Turkish word signifying 'only just.' Having regard to the conditions under which our gallant overseas divisions effected their landing and made good their footing upon this precarious bluff, the applicability of the word is somewhat striking."

***

If a report published in one of our great London dailies is to be relied upon, it has been left to Enver Pasha of all people to make public new and glorious achievements on the part of our troops at the Dardanelles. It appears that the curiosity of the Turks in Constantinople was excited by the fact that the British guns and bayonets continued to execute the functions of wounding and killing Turkish soldiers long after the owners of these weapons had been driven into the sea. A report has now been published by Enver which throws light upon the subject and speaks highly for the tenacity and endurance of our sorely-tried troops. It will be remembered that the Pasha issued an order that the British were to be driven into the sea, and, later, a report that this had been done. Enver now explains that the British had as a fact been driven into the sea very much, but, thanks to their aquatic training, they invariably swam ashore again and took up their old positions. Rule Britannia!

***

Ever since that disappointing young man, the Mpret, alias Prince Wilhelm of Wied, fled from tumultuous Albania to the more peaceful scenes of the War in Western Europe, the Land of the Shkypetars has been in a state of simmer; and none of us, I imagine, expected to come across the heading "Peaceful Albania" over a news paragraph for a good many months to come. But in point of fact such a heading did actually appear in the *Morning Post* of Monday. And, what is more, the telegram that it headed quite justified it. The *Post's* Berne correspondent it was who sent the message, and he stated that "a subject of a neutral State, who has just arrived from Albania, where he has lived long, says that never has that country been so peaceful as now." The miracle has been wrought, it seems, by policing the country with Austrian Croats captured by the Serbians at the beginning of the war. These men have taken the oath of allegiance to Serbia, and clearly they are proving themselves not only loyal, but singularly useful subjects also.

***

A quaint story of a criminal trying to persuade himself—or perhaps he only tried to persuade the magistrate!—that he was doing his country a service when he was, in fact, merely carrying on his profession of burgling is reported from Khartoum. For some months that city had suffered from a series of thefts, more or less serious, and at last these were traced to an individual named Abdul Aziz Mohammed, who in due course made his appearance before a magistrate. He then pointed out that he had confined his unwelcome visits to unmarried people, whose houses he was accustomed to enter during their absence; and pleaded that he had removed their property, not for his own gain or benefit, but as a punishment to them for avoiding the blessed state of matrimony. Unfortunately for him, the magistrate failed to recognise the excellence of his intentions, or to appreciate the originality of his plea, and he was fined 150 piastres and sent to prison for four years. The fate of his novel experiment in the way of a matrimonial agency is hardly likely to encourage imitation.

***

Apropos of the Turks' attempts to stir up the Senussi against the Italians, it may be of interest to quote what Mr. Wyman Bury writes, in "Arabia Infelix," about the founder of the sect. Referring to Sheikh Idris, he says that he is the great-grandson of a Moor, a native of Fez, who bore the family name of Idrisi, and adds:—

> The great-grandfather studied theology at Mecca, where he formed a new *tarikah*, or sub-sect of orthodox Sunni. He had two prominent pupils at Mecca towards the close of the eighteenth century: one was the original Senussi, and founder of that sect, and the other Hassan-ibn-Murgân, who established the Murgâni doctrine in the Sudan.

Apparently the great-grandfather had the knack of teaching men to think for themselves. And that, in view of all the circumstances, is upon the whole an unfavourable omen for the success of the Turks' plans. If the present Senussi acts, I feel fairly confident he will do so in his interests, not in those of the Turco-German combine.

NEAR EAST BOOKSHELF.

STORM-DRIVEN SERBIA.*

These are stirring, warlike times in which we are living, so let me tell you a long-forgotten tale. It happened centuries ago, and the scene was laid to the south of the Rhine, just beyond the spot where, careering out of the Lake of Constance, the river rushes over the falls which bear its name, and enters the region of plains and woods that belong, geographically speaking, to the so-called Black Forest. Here, on a hill overlooking the most picturesque river on the Continent, stood a feudal castle, the *Stammschloss* of the Hapsburgs, a family as old in years as the Hohenzollern are young in heraldry. Rudolph was the name of the Hapsburg count who founded the dynasty. He left the Rhine for the Danube, and, with passing excursions, mostly unfortunate, to the east and to the west, the fortunes of his imperial descendants have been linked up with the great river of Eastern Europe.

The body of the arrogant Rudolph was still warm in its grave when, in the central vales of the Alps, the people rose to a man against the despotic feudalism of the Hapsburgs. An army was sent to quell them. Read history, and you will see how, in the vales and gorges of the Central Alps, the flower of Austrian chivalry was annihilated by the peasantry whose dells were invaded by "punitive" armies. The birth of Switzerland was the outcome of the campaign.

It is a far cry from those days to the present, and from the Lake of Lucerne to the Save and the Drina; but a certain degree of similarity bridges over the gulf between yesterday and to-day, between Sempach and the Jardar, and never was this brought more forcibly to the reviewer's notice than when reading M. Petrovitch's history of Serbia. We can pass over the chronicles of the early days when the Slavs first appeared in the Balkans; we can pass over their struggles with and against the Emperors of Byzantium and the Osmanli Turk; we can pass over the tyranny and malevolent acts of the long-lived Hapsburg dynasty, for ever bent on crushing the small nationalities within or just beyond the pale of its orb. Nevertheless, and in spite even of these omissions, we come face to face in the twentieth century with another inglorious defeat of the Hapsburg house in the vales and gorges of a mountainous country inhabited by liberty-loving peasants. The lesson learnt in Central Europe was forgotten. Again we see an Austrian army, hundreds of thousands strong, slowly penetrate from the plains into the hostile hills; they advance, secure in their ignorance, invincible in their pride. Suddenly the scene changes: the hills become alive with hostile forces; death and destruction are hurled down on the arrogant "punitive" host of the Hapsburgs, and they break and run, leaving behind in those cursed hills their baggage and wounded, the whips with which they had intended to scourge the insolent peasants and their fame as soldiers and fighters. Merely a repetition of history, you will say; but it is a wonderful one: the young Hapsburg dynasty was rapped across the knuckles near the shores of Lake Lucerne; the old, exhausted, dying dynasty of the Hapsburgs, having learnt no wisdom and forgotten the lessons of youth, receives a stunning blow—perhaps even its death-blow—in the hills to the east of the Drina. . .

M. Petrovitch, in the book under review, has given us a valuable compendium of Serbian history, and one that ought to be read extensively. He has wisely glossed over much that is controversial, realising that by overstating his own case (I refer principally to the unfortunate feud between the Serbs and the Bulgars) he would harm rather than do it good. However, not on that account does he deny himself the right to state the Serbian case, and only once, I think, does he forget the wisdom of being cautious in his criticisms. I refer to his remarks anent Bulgarian atrocities. It is so easy in war to commit acts that are, to call them by a euphemism, reprehensible, that the careful historian dare not accuse one belligerent of "atrocities" unless he can prove a clean sheet in favour of the other belligerent. Besides, in this, the eleventh hour of events in the Balkans, such a public reference to a debatable subject by an attaché to the Royal Serbian Legation to the Court of St. James might well have been omitted—nay, even censored. And, in defence of the Bulgars—without wishing, however, to impugn the good faith of any other people—I must be allowed to state that among no Balkan people can Turks and Moslems live with greater security and freedom from persecution than in Bulgaria.

With the above reservation, the book under review is deserving of praise. So very little is known in these islands of the chequered history of the Serbian people, of their intensely democratic nationality continuously fighting for liberty, now against some unworthy prince, now against the enemy from without. The wave of the East overwhelmed the Balkan Peninsula and swept through the plains of Hungary and up the Danube to the very walls of Vienna; it then receded, little by little, before the advancing wave from the West. It held Serbia in its clutches, but never was it able to extinguish the Slav nationality. Just as in Spain we have the mythical Pelayo escaping from the Arab invasion into the hills and fastnesses of Asturias, where was born the new Spain which eventually drove the last Moor from Malaga across the Straits, so in Serbia of yore the Haiduks and Uskoks "withdrew into the least accessible recesses of the mountains and became practically outlaws. . . . They formed a nucleus round which Serbia was once more to grow into a political body." The result was inevitable: the new-born Serbia joined the invasion from the West, formed its vanguard, and from its geographical position was a strategic key of no mean importance. Eventually the Turk was driven through Macedonia back into Thrace, in a corner of which he still holds on to the last shred of his European Empire. If there were such a thing as finality in political movements, the Serb would now have been able peacefully to till his plots, sheathing the sword and wielding spade and hoe; but there is no such finality, and Serbia was no longer a useful buffer State between the Austro-Hungarian pot-pourri and the Osmanli Turk. So Austria, the immediate Power behind the brave Serb, coveted his trade routes along the Morava and Vardar, leading to Sofia and Constantinople on the one hand, and to Salonika on the other. To such an extent did the autocratic grasping Hapsburg, from time immemorial the arch-foe of all national movements, covet his small neighbour's heritage, that he was even willing to hurl the whole of Europe into war, regardless of its bloody consequences, if by doing so he could conquer and enthrall New Serbia. Hence, no sooner had the Serb freed her land from the Turk, than she was ruthlessly attacked from behind, and thus was born the great European War of 1914, to Serbia's participation in which M. Petrovitch devotes the concluding chapter of the historical section of his book.

* "Serbia: Her People, History and Aspirations." By Woislav M. Petrovitch. (Harrap. 3s. 6d. net.)

NOTICE TO SUBSCRIBERS.

Subscribers to "THE NEAR EAST" who have left the Ottoman Dominions since the war will oblige by notifying the Manager of their new address as early as possible, so that the supply of the paper should not be unduly interrupted.

"THE NEAR EAST" has largely increased its circulation in the United Kingdom since the war, and the Management is convinced that there are many people still who would be glad to know of its existence. Specimen copies will be forwarded post free if the names and addresses of friends are sent to the Manager, at 16-17, Devonshire Square, E.C

NEAR EAST BOOK NOTES.

Messrs. Hachette have published "L'Alliance Balkanique," by Iv. E. Gueshoff. If only because M. Gueshoff was formerly Prime Minister of Bulgaria, the book is sure to be in great demand. As a matter of fact, however, it is of considerable interest and value on its own merits.

Messrs. Sidgwick and Jackson have published, for the Folk-lore Society, "Roumanian Bird and Beast Stories," translated by M. Gaster. The price is 10s. 6d. net.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian (New Style).	Julian (Old Style).	—	Moslem.	Jewish.
1915. August 13	1915. July 31	Friday	1333. Shawwal 2	5675. Ellul 3
14	August 1	Saturday.....	3	4
15	2	Sunday	4	5
16	3	Monday	5	6
17	4	Tuesday	6	7
18	5	Wednesday	7	8
19	6	Thursday	8	9

Wednesday is the birthday of H.I.M. the Emperor Franz Josef of Austria, King of Hungary.

Wednesday is the birthday of H.R.H. Prince Nicholas, second son of King Ferdinand of Roumania, who was born at Castle Pelesh in 1903.

Lord Kitchener, accompanied by Lieutenant-Colonel O. A. G. FitzGerald, arrived at Windsor Castle on Monday, and left the following day.

A correspondent informs us that Djemal Pasha is now occupying the Bishop's House, at Jerusalem. The Cathedral and the Library were untouched at the end of April.

H.E. the Bulgarian Minister called at the Foreign Office on Wednesday.

H.E. the Roumanian Minister and H.E. the Serbian Minister were amongst the callers at the Foreign Office on Monday.

A Reuter's telegram reports the return to Athens on Wednesday of Mr. Venizelos. It is officially announced that the Greek Parliament will meet on Monday next.

The Turkish Minister at The Hague has left, to visit Berlin and Vienna.

Canon A. S. Hichens, of St. George's, Jerusalem, is now serving as Chaplain to the Forces at the Dardanelles.

Dr. Dearmer wishes to thank all the friends who have written him such kind letters of sympathy.

Miss Violet Asquith is making satisfactory though slow progress. She is now able to go out for drives, and as soon as her condition permits she will leave town.

Mrs. MacDougall, of Lunga, sincerely thanks the many friends who have expressed their sympathy with her in her great sorrow. She is unable to answer their letters at present, but hopes to do so soon.

Mr. Hugh E. C. Whittall has been appointed Lieutenant in the R.N.V.R. for service abroad, and has left England.

Dr. H. Thwaites, of the Jerusalem and the East Mission Fund, who joined the R.A.M.C. last year, is at present serving in France.

Mr. Gandon, who before the outbreak of the war with Turkey was manager of the Smyrna Gas Company, has arrived in London from Athens.

On Monday, at Coventry, the wife of Dr. E. W. G. Masterman, gave birth to a daughter. Dr. Masterman is head of the work carried on in Jerusalem by the London Society for Promoting Christianity amongst the Jews, and is also a prominent and active member of the Palestine Exploration Fund and a well-known writer on Palestinian archæology. He is at present in charge of the Coventry and Warwickshire Hospital.

The marriage of Captain James Pryce Lloyd Mostyn, Norfolk Regiment, and Miss Alix Inigo-Jones, younger daughter of the late Major-General Inigo-Jones, of Kelston Park, Somerset, took place quietly at Cairo on August 6.

An engagement is announced between Lieutenant Robin C. Carver, attached Royal Flying Corps, of Benha, Egypt, youngest son of the late Mr. H. C. Carver, of High Meadow, Wilmslow, and Rose Caroline, third daughter of the late Charles Henry Ashton and of Mrs. Ashton, The Grange, Ellesmere.

An engagement is announced between Thomas Symonds Tomlinson, Resident Magistrate at Zanzibar, and Diana, only daughter of Mr. P. J. and Mrs. Hibbert, of Hampsfield, Grange-over-Sands, and granddaughter of the late Right Hon. Sir John Hibbert, K.C.B. The marriage will take place quietly in September at Lindale in Cartmel.

To Rifleman M. Gallia, 7th (Service) Battalion Rifle Brigade, falls the honour of being (we understand) the first of our countrymen from Smyrna to be distinguished by mention in Battalion Orders for gallantry, when working with a party of bomb-throwers on the 31st ult. in an attack near Ypres.

We regret to learn that Acting-Corporal Ralph M. Warren, of the same Battalion, has been killed in action, having fallen while leading his section in an assault on the enemy's position on the 30th ult. He, with the majority of the Smyrna contingent of volunteers, joined the Rifle Brigade in October, and, after being in various camps in this country, was sent to the front about the middle of May. He was taking his second spell in the first-line trenches at the time he met his death. The late Mr. R. M. Warren was the sixth son of Mr. Amos Warren, for many years Telegraph Superintendent of the Ottoman Railway Company, Smyrna, and was himself Assistant Storekeeper to the same company until he resigned his post and came to England to join H.M. Forces.

Rifleman V. H. Hadkinson, another Smyrna member of the 7th Battalion Rifle Brigade, who, as reported last week was wounded at Hooge on July 8, and is now in Graylingwell War Hospital, Chichester, is, we are glad to learn, now able to be about again. Though still suffering from a bullet in the chest, he has offered himself for service at the Dardanelles.

Lieutenant F. Fisher, 13th Batt. King's Royal Rifles, who before he joined H.M. forces was on the staff of the Imperial Ottoman Bank, has been promoted captain.

Second Lieutenant H. N. Lyster, another member of the I.O.B. staff, has been transferred from the 4/3rd City of London (Royal) Fusiliers) T.F. to the Coldstream Guards.

Mr. H. C. Green, another member of the London staff of the I.O.B., who has been serving as a gunner, H.A.C. 2nd B. Batt R.H.A., has been granted a commission as 2nd Lieutenant R.F.A.

Second Lieutenant C. J. Moss, who is serving with his regiment (the Suffolks) at the Dardanelles, is yet another member of the Ottoman Bank staff.

Another member of the staff of the I.O.B., Mr. G. Hughes-Roberts, who joined the 1/12th County of London (the Rangers) as a private, has been missing for some two months. No news of him can be obtained, but two hundred men of the Rangers were taken prisoners at the same time, and it is hoped that he is amongst the number.

Mr. Cedric Séfi, the younger son of Mr. Alexander Séfi, has joined the Artists' Rifles O.T.C.

Under date of August 8, Reuter's Paris correspondent reports:—

"General Bailloud, temporary Commander-in-Chief of the French forces at the Dardanelles, has issued an order of the day in which he states that Lieutenant-General Hunter-Weston, commanding a British Army Corps, has informed his troops that illness compels him to leave them and has expressed his gratitude to all the British Army Corps and the French troops and their commanders. General Bailloud expresses the hope that the General will soon return to help in the completion of the joint task in which he has already played such a glorious part."

Lieutenant-General Hunter-Weston, who was originally in command of the 11th Brigade of the Third Corps on the Western front, commands in the Dardanelles the 29th Division, composed almost wholly of Regulars.

Major Acerby, Commissaire of Haute Uele District, Belgian Congo, with headquarters at Niangara, and Dr. Simonini, of the same station, arrived at Khartoum from Rejaf on July 17. Both are Italian reserve officers, who were employed by the Belgian Government. On behalf of the Governor-General, Major Pearson met them at the steamer and drove with them over the town, showing them the various places of interest. They left the following morning for Cairo on their way to Italy.

Louis Paulhan, the well-known aviator, who went to Serbia as a lieutenant, has, says the *Petit Parisien*, been promoted captain for having brought down an Austrian aeroplane, after an exciting pursuit, and for having dropped bombs on the enemy's hangars at night, causing the explosion of a large petrol depôt.

Colonel Neville Manders, Army Medical Service, who was killed in the Dardanelles on August 8 or 9, was the youngest son of Major Thomas Manders, 6th Dragoon Guards, and was born at Marlborough, Wilts, in 1859. He was educated at Marlborough, and after qualifying as F.R.C.P. and M.R.C.S. entered the Army Medical Service in 1884. He served in the Suakin Campaign of 1885 (medal with clasp and Khedive's Star), in the Burmese Expedition of 1887-89, in which he was severely wounded (medal with two clasps). In December, 1913, Colonel Manders was appointed Deputy-Director of the Medical Service in Egypt, a position which he retained until last January, when as A.D.M.S. he was, by special request, attached to the Headquarters Staff of the Australian and New Zealand Forces.

The British Red Cross Hospital to Montenegro, which is under the direction of Dr. Clemow, formerly Physician to the British Embassy at Constantinople, has just received a very welcome consignment of blankets, clothing, drugs, etc., sent from London by the Red Cross.

Amongst the closest friends of the Roumanians of Austria-Hungary (writes our Bucharest Correspondent) must be reckoned the Abbot Zavoral, the Father Superior of the Convent at Strahov, near Prague, who has been an untiring worker among the Rouman soldiers under arms in Transylvania. Feeling the need of a knowledge of the Roumanian language, he has actually managed to learn it in his few moments of liberty away from the wounded, and that so well that he is able to read aloud to them in their national tongue.

The Bishop of London, as president, and Lady Whitehead and Mrs. Masterman, as members of the Executive Committee of the Serbian Relief Fund, are making an appeal on behalf of the Children's Branch of the fund which has been formed with the object of founding in Serbia a British orphanage for the children of Serbian soldiers who have fallen in the war. They wish the orphanage to be "a free gift from the children of Britain to the children of Serbia, as a thank-offering for Serbia's heroic defence of the common cause, and as a permanent proof of British sympathy with a young and vigorous Slav nation in its fight for freedom and unity." Leaflets and collecting cards will be sent on application to the Secretary, Children's Branch, Serbian Relief Fund, 55, Berners Street, London, W. Cheques should be made payable to Sir Edward Boyle, the hon. treasurer, at the same address.

Digitized by Google

After a period of service as aide-de-camp to Lieut.-General Sir J. G. Maxwell in Egypt, the Marquis of Anglesey has gone to the Dardanelles. The Marquis is a lieutenant in the famous "Blues." The Marchioness is staying with her mother, the Duchess of Rutland.

Judge Fleming and Mrs. Fleming left Khartoum for Cairo on July 29 on their way to this country, where they will pass the remaining part of the summer.

Recent departures from the Sudan on leave include Mr. Hewins, Kaimakam Thomson Bey, and Mr. and Mrs. Dennet.

An engagement is announced between Captain Edward Maitland Hutchinson, Royal Field Artillery, attached Egyptian Army, fourth son of Lieutenant-Colonel J. B. Hutchinson, C.S.I., Indian Army, and Mrs. Hutchinson, of Jhandra Ghat, Camberley, and Phyllis Maud, fourth daughter of Andrew and Mrs. Motion, of Upton House, Warwickshire.

Mr. F. C. Parsons, I.C.S., retired, who left Madras last year, is now in Serbia, where he is administrator of the second British hospital. Before leaving England Mr. Parsons was offered a commission in the Territorials, but, as he had made all his arrangements to go to Serbia, he was unable to accept it.

The British Farmers' Red Cross Fund has lately remitted £10,000 for hospital work in the Dardanelles. Offers of help should be addressed to the Fund at Room 5, Tower Bridge Flour Mills, Bermondsey, S.E.

As the result of two entertainments given on "Serbian Day" in Southampton a sum of close upon £30 was added to the flag sales.

An interesting war trophy sent over to New Zealand from the Dardanelles is one of the pontoons carried over the desert by the Turkish soldiers and launched on the Suez Canal during the enemy's unsuccessful effort to cross. The Minister for Defence has decided that since the Nelson (a South Island) company of the Expeditionary Force captured the pontoon, it is to be presented to that town.

The proprietors of the *Egyptian Gazette* have recently presented to the War Office in England a new 20-h.p. "Ford" motor-car for the use of the army in Egypt.

Mr. Sydney Moseley, formerly editor of the *Egyptian Mail*, is now acting as Central News correspondent with the Dardanelles Expeditionary Force.

Professor Israel, who recently operated on the Sultan of Turkey, in an interview published in the *Berliner Tageblatt*, says that when he arrived in Constantinople on June 16 he found the Sultan in a very bad condition. The professor took a week to consider whether he would venture on an operation, not only on medical, but also on political grounds, for, in the event of the operation being unsuccessful, "a change on the Throne at the present moment would have great significance for Turkey." As, however, the Sultan could have lived only for a very short time if not operated upon, and in view of the great pain which his Majesty was enduring, Professor Israel decided to operate, and succeeded in removing from the bladder two large stones, with the result that the Sultan's cure may now be considered complete. The professor said there were no visible signs of the war in Constantinople, save in the movements of innumerable trains with troops going to the front or returning with a stream of wounded and in the crowding of the hospitals.

A Syrian correspondent writes :—The new Vali of Beyrout is Azmy Bey, ex-Vali of Konia, who is said to be quite different in character and principles to his predecessor.

The *Egyptian Gazette* is informed by a refugee from Beyrout, a student of the Syrian Protestant College, that Dr. Howard Bliss, the headmaster, left Beyrout for Constantinople some time ago by land with the object of discussing with the Ottoman authorities at the Sublime Porte certain matters connected with his institution. It is believed that he will ask for permission to transform the college into a University on the occasion of its fiftieth anniversary, which will be celebrated next year. Most of those foreign students who are either unable or unwilling to leave Beyrout under the present circumstances (according to the *Gazette's* informant) have been transferred from the college to a temporary summer school established at Shueir, Lebanon.

A correspondent writes :—

Mr. J. B. Barron, who has lately been gazetted to the 3rd Battalion Worcestershire Regiment, is well known to all Jerusalem readers of THE NEAR EAST, having been for seven years a master at St. George's Boys' School, under Bishop Blyth. Mr. Barron was in Canada at the beginning of the war, and, like so many others, threw up a good post and enlisted in the Divisional Mounted Troops of the First Contingent. He was attached to the Cyclist Company, acting as despatch rider and scout. He was all through the battles of Neuve Chapelle, Ypres, Festubert, Aubers Ridge, etc. He gained his sergeant's stripe for a piece of work successfully carried through, and he was thanked by the General of his Division; and ten days later, for other service in the field, he was offered a commission in the Regular forces. Mr. Barron has had many singular escapes : once, whilst riding along a road exposed to the enemy's fire, his cycle was smashed under him by the bursting of a shell and he himself was blown fifty feet away into a ditch; his cap has been shot off his head, and his cigarette out of his hand; at Ypres he was in the famous 10th (Canadian) Division which fought back to back, repulsing the Germans on two sides, and after fighting many hours through the gas he was finally rendered unconscious by it, escaping by some miracle the worst effect of the poison; his last remembrance of this is rolling into a ditch and feeling the air sweet about him, while the gas passed over him like a heavy yellow cloud. On another occasion, whilst he was in charge of a detachment guarding an important bridge head, a high explosive shell burst on the roof of the guard-house, crashing through the room above into a lower room, where he and two men were sitting. All escaped unhurt, but the base of the shell, weighing 7 lbs., broke the rungs of the chair on which Mr. Barron had been sitting, and lay between his feet. Two days later he was in the garden of the same place when a shell blew away the wall behind him, half burying him under bricks and debris, and his cycle, which was just by him, was blown over the wall into another garden and hung exactly balanced on a clothes-wire, where it was found twisted and riddled beyond further use.

Mr. Barron's many Jerusalem friends will be glad to hear through THE NEAR EAST of his safety and success; a commission won on the field for conspicuous services rendered is the modern equivalent to winning one's spurs on the battlefield.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

DE SMIDT.—On August 6, at the Directorate, Delta Barrage, Egypt, the wife of Leonard F. P. de Smidt, Irrigation Dept., P.W.D., of a daughter.

MASTERMAN.—On August 9, at Coventry, to Dr. and Mrs. E. W. G. Masterman, of Jerusalem—a daughter.

MARRIAGE.

MACLAREN—SEAMAN.—On August 4, at St. Mary's Cathedral, Glasgow, by the Very Rev. Provost Deane, D.D., assisted by the Rev. Claude O'Flaherty, M.B., Ch.B., Charles Walter de Bois Maclaren, of the Levant Consular Service, and Armadale, Rosneath, to Dorothy Catherine, only daughter of W. J. Beattie Seaman, late of Aldingbourne House, Chichester.

WHERE TO STAY.

UPPER EGYPT.

Luxor.

The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.

The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.

Are the Finest on the Nile.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

Alexandria.

MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Cyprus.

THE CYPRUS HOTEL CO.

Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Alexandria.

CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 50 per day.
C. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

Alexandria.

WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.
Inclusive Terms from P.T. 50 (10s.) per day.
Special Terms to Government Officials, Commercial Travellers, and for long stays.
Proprietor and Manager—AUG. van HILLEGEN.

THE BULGARIAN NEGOTIATIONS

If the Bulgarian Government is not altogether devoid of the sense of humour, it must be enjoying the position in which the force of circumstances has placed it. Last year Bulgaria was the whipped pariah of the Balkans, shunned by its neighbours and without anyone whom it felt it could regard as a real friend among the Great Powers. The only policy before it seemed to be to decide as soon as possible which of its enemies would ultimately prove the least hostile or the least capable of indulging its supposed hostility and to use it in a scheme for revenge. On the one hand there was Russia's unpardonable crime in appearing to favour Serbia's claims at Bulgaria's expense; on the other hand, Germany, in the person of the German Emperor, had claimed personal responsibility for the terms of the Treaty of Bucharest, which consolidated the wrongs and humiliation suffered by Bulgaria at the hands of her former allies. So complete was her political ostracism in Europe that it seemed as if from dire necessity she would have to make common cause with her traditional enemy the Turks. Negotiations between Constantinople and Sofia were carried on in a spirit that reflected little of the bitter animosity that had previously actuated Turks and Bulgarians in their relations with one another, and although no obligations were entered into on either side, it is certain that Turkey alone of the Near Eastern States had reason to suppose herself immune from the danger of attack by Bulgaria. In this condition of affairs in the Balkans Germany was quick to see her opportunity. Bulgaria was encouraged to forget that the Emperor William had taken credit to himself for the harsh terms imposed upon her at Bucharest, and to dwell on the "treachery" of Russia, which in reality consisted solely in holding that Bulgaria was in the wrong in her quarrel with Serbia. An Austro-German loan, in spite of the usurious terms on which it was concluded, sufficed to satisfy the Bulgarian Government in its warped frame of mind that the friendship it was looking for was to be had from the Central Powers. With the outbreak of the European War everything pointed to Bulgarian sympathies being with Germany and Austria-Hungary, and if the struggle had not resolved itself into one for the independence of nations and the liberty of Europe, there can be little doubt that official Bulgaria would have been whole-heartedly on the Germanic side. Fortunately for Bulgaria, the nature of the quarrel enabled her to adopt an attitude of neutrality. She was not called upon to translate her sympathies into active co-operation; but she was given time to carry out an orientation of the fundamental principles at stake in the great upheaval of the nations.

We shall not do the Bulgarian Government the injustice of supposing that it took any length of time to make up its mind regarding the relative justice of the causes which were being fought for on the Continental battlefields. If for a moment it had wavered in its belief in the Triple Entente, it must have committed Bulgaria to co-operation with Germany and Austria-Hungary. For more than half a year Bulgaria was practically ignored by the Entente Powers. Throughout this period Germany was leaving nothing undone to influence Bulgarian opinion in her favour. The Bulgarian Government was shrewd enough to profit by the occasion, and proceeded to obtain as much as it could from the Central Powers and their Ally. From the former, instalments of the original loan have been secured, while Turkey has been forced to agree to a surrender of territory which a year ago would have been regarded as out of the question. In the meantime, the diplomacy of the Triple or Quadruple Entente has come to appreciate the potentialities of Bulgaria as a friendly State. Instead of being ignored, the Bulgarian Government suddenly finds itself the recipient of ardent solicitations. It is true that they come from the quarter to which Bulgaria's sympathies are now wholly inclined, but the Bulgarians would be more than human if they did anything to hasten the understanding which in their hearts they have long desired. They have learnt their lesson in the strictest school of international callousness; they are smarting under the sense of injured pride as well as under very definite grievances. It is useless to ask them to recognise their own shortcomings in the past. Those shortcomings are brushed aside as the mistakes of individuals, and the good intentions of the nation are cited as the factor that ought alone to determine Bulgaria's destiny. To-day the Bulgarian Government has the satisfaction of seeing this point of view no longer ignored by the Entente Powers. Court is being paid to it, almost as if it had the issue of the war in its hands; to such an extreme does reaction from the former attitude of indifference proceed. It is to be hoped, however, that the native shrewdness of the Bulgarians will prevent them from sacrificing their own interests for the sake of a diplomatic triumph. From the Turks, who thought to qualify for the rôle of their only friend, they have wrung an agreement for a substantial rectification of the Thracian frontier. They have need, therefore, to be careful not to be led into the belief that they can necessarily obtain from those who are their real friends all they may desire.

The warning will not be altogether out of place if we have to take at their face value the statements of responsible Ministers and the fulminations of the inspired Press. Bulgaria has been dealt with far too cynically in the past to have any scruples against offering herself to the bidder who seems the more likely to "make good." The offers that reach her from Germany are not likely to fall short of her wildest dreams. They will not only be attractive, but will seem to throw into an unfavourable light the cautious overtures of the Quadruple Entente. But Bulgaria must decide for herself upon the relative chances which the rival claimants have of carrying their promises into effect. On this point it is well that the Entente Powers should not cherish any illusions. Not only has Germany been preaching her invincibility to Bulgarian ears for twelve months, but she has been substantiating her claims in a remarkable manner in Galicia and Poland. The Allies, therefore, enter upon their task of persuading Bulgaria under numerous disadvantages. They have the striking manifestations of Germany's military strength, and they must also contend with the ineptitudes of their own diplomacy in the past. Indifference to Bulgaria's case has of necessity implied encouragement of Serbia and Greece in a belief in the unchallengeable justice of their contentions. Neither of these countries is likely to change its belief except under compulsion—with a very clear indication of the dangers attaching to recalcitrancy. The demands made by Bulgaria upon Serbia and Greece entail the surrender of territory in Macedonia to which both countries offer the stoutest resistance. By the opening of negotiations at the three capitals concerned the Entente Powers indicate that they have at last appreciated the crux of the position. The course of these negotiations is rightly kept secret. As we have never wavered in the belief that the Balkan States can be brought to realize that the interests of the Peninsula as a whole require an understanding and a working agreement between them, we feel confident that the differences now dividing the countries are susceptible of settlement. The obstacles are mainly of German construction, and will have to be overcome by the judicious employment of courage and strength. For reasons that need not be recapitulated here Great Britain must take a leading part in these negotiations. At Sofia the ground has been carefully prepared by recent diplomatic changes. The Bulgarian Government, therefore, while entitled to its gratification over the turn which the course of affairs has taken, will not be slow to recognize that statesmanship rather than pique must interpret the true interests of the country.

EIGHTEEN MONTHS AGO.

(*December* 30, 1913.)

A DIARY OF TRAVEL.—III.

By Mary A. Poynter.

From Cairo to Port Said, across the land of Goshen, our train sped for two hours or more through a green, luxuriant landscape basking under a warm January sun. The Nile is far-spreading as well as far-flowing, and its touch is all the magic the responsive soil of Egypt seems to need. But the desert is grasping, and as soon as the little hills are met with and irrigation becomes difficult, palm tree and green field leave off, save in patches, yellow sand and bare rock taking their places.

Port Said, apart, a town unto itself, sits at the corner of the south-eastern Mediterranean and at the head of the Suez Canal, for the special purpose, it seemed to us, of keeping travellers waiting, and holding up ships for hours outside its harbour if a storm chances to be in progress in the Mediterranean. This rather severe arraignment, we understand, is applicable to Port Said only on rare occasions; its real mission is to open the gate politely to all ships Eastward bound (after they have been weighed and not found wanting), and to administer to the needs of and keep the Canal in ship-shape order from the Gulf of Suez to the Mediterranean.

If a sand-storm had not seen fit to blow up and down and roundabout at Port Said the day and two nights we were detained there, the town, with its broad-arcaded street or streets, reminiscent of India, its curious mixture of East and West and North and South, would have appealed to us more vividly and kindly. With the sand-storm there came a fall in temperature—and there is nothing so penetrating as the cold in a place that ought to be hot! It is a curious thing, too, to experience a raging, blinding storm, without rain or snow, and with a sun shining blandly in the sky all the while. Wind and sand are a combination to make the hardiest seek for shelter.

A voice at our door very early on this January morning announced that our ship was in harbour, after many hours tossing on the high seas outside, and that we were expected to go on board immediately. While it was still dark we followed our porter and the luggage to the Custom House and down to the quay with many a shiver and with coat collars held high. At sunrise the wind dropped altogether, and we were able to go on deck and take account of our surroundings, of what manner of a boat and harbour we were in. The morning was altogether reassuring. The Arab coolies were just finishing the coaling of our steamer to the accompaniment of that wild, rhythmic chant, dear to their souls when they have some work to accomplish in unison. This chant seems to consist of a phrase of questioning, ending, after a second's interval, with a phrase of response. They have no set expressions, but improvise as their task proceeds, as for example, should their employer come in sight, the words of the chant might take this form: "The master is coming, let us work hard!" the response being: "And perhaps he will give us more wages, he will give us more wages!" These picturesque workers are not without a sense of humour as well, and it is said that, conscious of the interest they provoke, when travellers stop to listen to their chanting they have been known to change the words of their refrain and to coin some fresh phrases apropos of the looks and the peculiarities of the people watching them.

Port Said for the moment in the morning light looked quite impressive rising out of its sea and desert surroundings. Then the town, the rather imposing offices of the Canal Company, the tall lighthouse at the entrance of the harbour, the salt mounds on the shore, lost their interest for us in the growing interest of that narrow little lane of water before us which was to be our ship's pathway for a hundred miles or so.

At a snail's pace—a ship's snail's pace—we fell into line and crept forward, taking our turn with the many other boats that were in the harbour awaiting permission to enter the Canal. Slow as our progress seemed, it did not take us long to be free of the port and out in the desert, through which the Suez Canal has hewed and hollowed its way. We looked for the mirages that travellers often speak of seeing as they journey through the Canal, but no deceptive domed city or oasis with palms was seen that day to vary the desert's monotony. The storm of the night before had dispelled all mists, all illusions. The pelican, in groups of many dozens, stood alone in his wilderness.

It takes usually something like seventeen hours to sail through the Suez Canal, a goodly part of these seventeen hours being consumed at "sidings"—broader places where boats going in opposite directions may pass each other. The Canal is so narrow one must "tie up" while the other passes. Watching great ships pass thus at close range and speculating upon the mystery of when our boat was to "tie up" and when to be signalled the right of way kept us interested until nightfall. One or two towns—Ismailia of to-day and the ruins of ancient Pelusium—are passed, and the Canal also crosses the old caravan route between Egypt and Syria, and then come the Bitter Lakes, through which steamers are allowed to increase their speed. But the latter half of the journey through the Canal was accomplished at night, and the town of Suez reached and passed so early in the morning that few passengers were astir to see the place tradition assigns as being the scene of the passage of the Children of Israel and the overwhelming of Pharaoh's hosts by the Red Sea. At times wild monsoon winds still blow and drive back the waves and play strange freaks with the waters of this usually placid sea.

When we came on deck we were hardly out of the Suez Gulf part of the Red Sea, but already the flat African desert coast on the right had taken on a background of mountains and on the left, as the steamer proceeded, the mountains of the Sinai Peninsula became more and more clearly defined, Sinai itself, the Mountain of the Law, being distinguishable in the distance at one time from the rest of the range. As the day advanced these mountains, seemingly devoid of vegetation, grew richer and warmer with colour. At sunset time the whole Sinai range was aglow with a deep rose light, which, together with the silver of the full moon rising directly behind, made a picture as unforgettable as it would have been impossible to catch with the brush.

Strabo, or some other time-honoured authority, says that the Red Sea owes its name to the colour of the people who dwelt along its shores—and a reddish-brown folk they are to this day, these Sabaeans. The spawn of certain fish during one or two months of the year lend the waters a reddish tinge in places, so much so that enthusiastic people may misconstrue this into being the true colour of the deep. In reality the Red Sea is a dark blue when it is not a grey-blue, or a blue-green, or storm-colour, as the case may be.

After a day out the Red Sea broadens, and the land on both sides disappears, unless one chances to be on a coasting steamer that calls at all sorts of interesting ports on both Eastern and Western shores. There were those with us who could tell of calling at Port Sudan, on the African side, the port of the greater Sudan beyond. They could also tell of calling at Jeddah, on the Arabian shore, but none save the old Mohammedan *hajjis* in the steerage could tell of that strange pilgrimage city of Mecca, lying among the mountains sixty miles inland, of which this same Jeddah is the port. Mecca is a ready word to come to the lips; indeed, it comes so familiarly, and many of us have seen so many picturesque pilgrims setting out Meccaward, that it seems as if it were a haunt open to the visitations of the multitude rather than to the followers of Mohammed only. We sometimes talk most of what we know least about, which is, perhaps, safe enough if one does not talk harshly.

The ordinary track of the steamers lies down through the middle of the Red Sea, but has to be travelled with caution, as the great coral reefs have a way of cropping out in mid-sea as well as along the shores. It takes several days to traverse its length, and there are some islands lower down, waterless, volcanic, and otherwise, upon which the lights were put out during the Turco-Italian war, and which made navigation at night a little unsafe as well as difficult. The lighthouses on these islands now have their lamps trimmed and burning, and ships steam merrily on by night as well as by day. Here one also has the experience of passing out of the temperate zone into the tropics, and the obliging captain will make an effort to point out the Southern Cross, dimly visible low down the horizon, if the light of the full moon does not eclipse the shining of the lesser stars.

The lower part of the Arabian coast bordering on the Red Sea, and known as the Yemen, is perhaps best known as the seat of continual uprising by Arab sheikhs against the Turkish Government or any government that undertakes to dictate to them. The Queen of Sheba's country, the land behind the mountains of the Yemen, long since passed out of the hands of this inquiring queen, is little known to the world at large to-day. One venturesome explorer made an effort recently to reach its capital, but was turned back by the natives with more haste than politeness. Yet word filters through that behind those forbidding mountains there are springs and green pastures and the remains of a once-prosperous kingdom.

Much has been written and more said about the heat and some other things of Aden; probably all has been true, and what I am going to write is true also. We came into the port of Aden about midday, taking a pilot on board and dodging various islands that put up jagged and picturesque peaks, seemingly to help the British Government in its work of fortifying this, the earliest of its Victorian acquisitions. We sailed out of the Red Sea through the Straits of Bab-el-Mandeb in the night, before leaving Africa, that no longer dark continent, quite behind us.

Travellers speak of Aden as being "just around the corner" on the Arabian side, but it takes some hours to "round" this "corner" and cast anchor at the rocky point where India, faintly suggested by Port Said, may be said to

Digitized by Google

begin. Not that the little town with its strip of desert behind is peopled largely with the natives of India, or that this absolutely waste place so far as vegetation is concerned joins shores, or, rather, lands, with India proper. Even the smell of the place—a mixture of dust, spice, camel, and tobacco—is of the wild Arabia, from whence it came.

The India part of Arabia is that, though long days distant from that land, it is administratively a part of the Bombay Presidency, that it is soldiered in part by Anglo-Indian troops, and that here the Indian bungalow—that comfortable house consisting of a broad, overhanging roof and deep verandahs, first makes its appearance. And the ubiquitous, uncompromising sola topee of India (from whence it has journeyed to Egypt and the Sudan) commences here to be seen on every head, save that of the native—feminine as well as masculine—that goes out in the sunshine.

If India comes here to meet the West, so it would seem that all Somaliland, left behind us as we supposed in Africa, sets out thus far Indiaward. Its representatives swarm on land and swarm in little boats about the ship, their shiny, lithe black bodies bending at all angles, yet never angular, as they offer their various wares—baskets, tobacco, and ostrich feathers—for sale. It is somewhat difficult to describe the dress of these Somalis, as there is so little of it—just a bit of cloth draped about the loins. Perhaps they wear strings of beads at home; I did not see any worn here. Their black countenances are usually very open, with broad smiles, showing a full outfit of very white teeth, the whole being set off with a great bushy, upstanding shock of tow-coloured hair. One's curiosity concerning this latter incongruity is instantly excited, and we were told the Somali lad has ways and means of his own for making many crinkly black hairs white or dust-coloured. We saw one head in the process of "bleaching," literally plastered with some white substance that looked like lime.

We went on shore prepared for great heat, but found a pleasant, coolish breeze blowing and everybody awake and about in a surprising fashion, considering what we had been led to expect. In spite of its being a desert spot, man looked well-fed and his camel prosperous, the latter's degree of prosperity being indicated by the amount of plumpness of his hump. Nice little bullocks, the sacred India kind, also with humps, though not large ones, were leisurely drawing loaded two-wheeled carts where their partly naked drivers directed. For the first time we saw the camel harnessed (he is an old friend of ours) and drawing very small carts filled with water about the streets. From his supercilious height he simply looked bored—not vexed—at being put between shafts.

Before setting forth to visit "the tanks" we went into the stores of Messrs. Cowasjee, Dinshaw and Co. (everybody knows these gentlemen), where I believe one can buy anything from a hair-pin to a ship; a white mouse to a hunting leopard. We went to inspect two of these leopards, and pretty, sleek, gentle spotted pussies they looked, fast asleep in one corner of the broad verandah. We were asked if we would like to pet them (being fond of pussies), but we hastened to assure the man in charge that it would be a shame to waken them!

Motor-cars are a fresh importation in Aden, and are much appreciated by the natives of "rank and fashion." The half-dozen or more were in such demand that afternoon that our little party of six had to climb into ordinary tikka gharries—two-seated sort of nondescript vehicles. Having only an hour and a-half allowed us (according to steamer time, which is never lenient to passengers) to drive to the "tanks" and back, our driver whipped up his little span briskly and over the smooth English roads we rattled, but none too fast for the little Somali lads, who kept up with us nearly all the way, shouting: "No faddah! No muddah! No sister! No bruddah! Backsheesh! Backsheesh!" It would seem from this that the population of all Somaliland must be composed of orphans. Our road to the "tanks" lay through the old town—built in the centre of a crater, which is, needless to say, extinct. Its Arab population graced the streets, may I say—they certainly gave it what grace it had—and the town also housed the men and animals of the Camel Corps. These were in their quarters when we passed. Almost everything else was out of doors. But not an Arab beggar did we see! They are much too proud to ask for pennies. Their pride shows in every glance, every movement. What lady of high degree can drape a shawl about her shoulders, letting it come almost to the ground, and carry it, too, with the grace of one of these dark-skinned men of the desert? One passed us, mounted high on a sleek, long-paced, running camel. The rider and his mount looked like carven silhouettes against the sky; they seemed to move almost without movement and with the silence of night, not of day.

An old Indian ex-soldier showed us all we could see in ten minutes of the famous tanks of Aden. These were originally built by the Persians, so some authorities say, in a great cleft in the mountain, and are kept in repair to this time. They consist of a number of huge tanks, or basins, built with cement in the natural rock, the first one high up in the mountain chasm, and the others below in a descending scale to catch the water as it may overflow from the one directly above. Alas! it does not often overflow. If this land was dry in old Persian times, it is still drier to-day. The rainfall each year is now too slight to be counted upon to quench the thirst of man and beast, to say nothing of thirsty vegetation. The only trees we saw in Aden town were a dusty banyan tree and a pepul tree growing, or trying to grow, by one of the upper tanks. The water that supports life in Aden now is drawn from the sea and condensed into fitness for drinking.

Mr. Cowasjee, being, among other things, the agent of our ship's company, gave us the use of his boat to and from the shore, and came on board to bid us farewell ere our ship set sail. We had a pleasant little visit with this Parsee among Parsees, though my eyes and thought would wander a bit from the man and his faultless English to his spotless white dress, white trousers—broad and flowing—a long white coat of curious cut and tied in front instead of being buttoned, and lastly, to his shiny, brimless hat of "more than Oriental splendour."'

As the time came for the boat to weigh anchor the prices of the wares for sale began to go down. The man with the ostrich feathers had to be almost forcibly put off the boat by the stewards. The Somali boys in the little boats below throw up a skilful line to a would-be purchaser, and one gets a brightly tinted, quaintly woven basket at a reasonable price after much bargaining. It is not that one really wants the basket either; it is the picturesque experience that one seeks, the flashing smiles on the black faces below, the naughty little whimper with which the seller tries to make you believe your shilling has been lost on its way down in the basket, then the quick change back to smiles again when he sees you do not believe him. Well, man must earn his living some way, and small wonder that the native people prefer to live upon the fat of the ship rather than upon the fat of the land—which is thin even to leanness.

LETTER TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE IMPERIAL MARITIME LEAGUE.

To the Editor of THE NEAR EAST.

Sir,—The Imperial Maritime League from the very commencement of its recruiting campaign realised that working below the surface there was a strong pro-German and anti-British propaganda being carried on, and that sooner or later this would develop into an open organised movement to stop the war in the interest of Germany. The League has therefore utilised its campaign to exert quietly and steadily a counteracting influence. The following resolution for signatures was drawn up, and has been extensively signed:—

> We, the undersigned, desire to place on record our unswerving determination to use all the possible means at our disposal to support the Governments of the Allied peoples in carrying on the war until peace has been restored by the unconditional surrender of the enemy, and thus for all time crush the arrogant military despotism of the German Empire, with which she is now seeking to dominate the world.

A resolution identical with this form has also been put at over 2,000 of the League's meetings. This has been passed practically unanimously, there having been so far only three dissentients to the resolution.

Now that the League's forecast has proved correct, it is anxious to have this phase of its work more widely known, and we would ask all patriotic people to sign the petition and to induce their friends to do so. All who have the time to organise a house-to-house canvass in their own neighbourhood would be doing a patriotic service.

This letter will be sent to the oversea Press in order that the movement may be an empire and not merely a national one.

Forms can be obtained on application from the Honorary Secretary, Imperial Maritime League, 2, Westminster Palace Gardens, Victoria Street, London, S.W.

I am, etc.,

WILLOUGHBY DE BROKE.

2, Westminster Palace Gardens, Westminster, London, S.W.,
August 12, 1915.

Any newsagent or bookstall in the United Kingdom can supply copies of "THE NEAR EAST," which are on sale early on Friday morning. Should any difficulty be experienced in obtaining the paper, the Manager would be glad to receive a post card giving particulars, and he will take steps to rectify the matter.

THE PRESS ON THE NEAR EAST.

The Fate of the Balkans.

In a leading article under the above heading *The Times* (August 6) dealt very fully with the part German diplomacy formerly played in the Balkan States, and the object by which it has always been inspired up to the present.

After the victories of the Balkan League, Germany and Austria strove, unfortunately with success, to sow discord between the Allies, and prompted the Bulgarian attack upon Serbia and Greece. The unjust Treaty of Bucharest, which, as the late King Carol telegraphed to the German Emperor, was to be, "thanks to you, definitive," was concluded under German auspices.

The same policy, that of blinding the Balkan peoples to their true interests and preventing their expansion by fomenting internal dissensions, is actively in force at the present time, and *The Times* points out that it has already deprived Greece of an opportunity such as will probably never recur. The paper considers, however, that diplomatic short-sightedness on the part of the statesmen of the Triple Entente is responsible for a certain measure of Germany's success in Balkan affairs. "Their first duty should have been to guarantee to the Balkan States that, on the day of victory, those States should receive, as nearly as possible, all the territories inhabited by people of their own blood. There can be no true peace in the Balkans until a settlement is attained."

We quote below the concluding paragraphs of the article:—

If the Bulgarians desire, as they are entitled, to attain their ethnographical boundaries after the war, just as Serbia is entitled to realize the aspirations of all her Southern Slav kindred to political unity, and Roumania to liberate the Rumanes of Austria-Hungary, there is but one course open to the Balkan peoples. Their vital interests command them to side with the Powers that are engaged in repelling German aggression. It is for the diplomacy of the Allies so to deal with Balkan Governments as to bring their action into harmony with the aspirations of their peoples. The fate of the Balkans is at stake.

The Outlook in the Balkans.

In the course of a leading article, the *Manchester Guardian* (August 9) deals with the situation in the Balkans in the light of the recent German advance in Poland. The paper leans to the opinion that, granted moderate security in the west, and threatened with serious danger at the Narrows, Germany would undoubtedly attempt to link up her armies with the Turkish forces. As matters stand, however, it is shown that any attempt to do this would almost certainly result in immediate war with Roumania, and Bulgaria's attitude is too doubtful to be trifled with. In the meanwhile the *Guardian* sees no reason why the Entente should not succeed in obtaining an agreement with all the Balkan States upon general terms.

We believe that the enunciation by all the Entente Powers of a formula of policy in which the recognition of the principle of nationality in territorial rearrangements and of the freedom of the Straits should be the principal term might have an excellent effect. What the Balkan neutrals are saying is that they do not seem to have much to gain from the triumph of either side. If Germany wins, the Balkan States would at best be mere satellites of the great Middle Germanic Empire from Hamburg to the Persian Gulf. They all see that. They add, however, that the result would be much the same if Russia beat Germany. The best answer to that argument might be the enunciation of a policy of general application which would show that the policy of the Allies is not one of self-aggrandisement, but liberationist in the truest sense.

Lifting the Deadlock.

Almost alone among the papers of London, the *Evening Standard* (August 5), in an article under the above heading, is hopeful that the desire of M. Gounaris to be able to point to some results achieved by his five months' tenure as Prime Minister of Greece may lead to a fruitful result of the negotiations proceeding between the Allies and Greece. The paper continues:—

It must, however, be remembered that the main difficulty to be overcome is presented not by Greece, but by Serbia. We think we are justified in saying that now that Serbia is about to get much more than the window in the Adriatic, whose refusal impelled her to hold Macedonian territory east of the Vardar, public opinion in this country, while sympathising deeply with her unhappy situation and appreciating her great gallantry, anticipates a reasonable accommodation between her and her other Balkan neighbours.

The Mesopotamian Expedition.

A writer in a recent number of the *Broad Arrow* (July 31) contributes a short but admirable article on the above expedition. He shows how the success which has attended this campaign emphasizes our inexhaustible resources of Empire, and draws an interesting comparison between our methods of strategy on the Tigris and Euphrates and those employed during the Nile and other great campaigns of the world. We quote the paragraph with which the writer concludes his article after a brief résumé of the expedition up to the end of May:—

Meanwhile our men became adepts in handling hundreds of the peculiar long and thin native boats, each holding ten men, and two when linked together holding a machine gun. River steamers were brought up and assisted to maintain communications to Amarah, which was reached on June 3. On the whole, the aid of aeroplanes made this the most interesting as well as effective expedition up these mighty historic streams since the fall of Belshazzar himself; and it is a pity that the preoccupations of our people in more terrible zones have prevented them from doing full justice to a perfectly marvellous enterprise.

Look to the East.

The supreme importance of the operations at the Dardanelles in their bearing upon the war as a whole forms the keynote of the *Observer's* (August 8) weekly notes on the situation. The writer prefaces his remarks with the following allusion to the connection between affairs in Russia on the one hand and the Dardanelles on the other:—

All Europe is more than ever overshadowed for the moment by the great military drama in the East, where the fortunes of our own troops and their French comrades in the outlying fight at the Dardanelles must always be regarded as inseparable from the ordeal of Russia. It must be steadily regarded as the key to the surest and fullest recovery in that region. Even before the Polish capital was abandoned by the Grand Duke we had tightened our grip on Gallipoli. We shall have to discuss the connection between these two facts.

In its subsequent review of activities, the *Observer* notes that we are at last getting at the real meaning of terms, and that no one any longer pretends to regard the Dardanelles expedition as a secondary undertaking. The *Observer* considers the attitude of Roumania to be the most unreasonable of Bulgaria's neighbours, and expresses itself as "infinitely anxious" that the Serbians should enter with a willing heart into the adjustments which are absolutely indispensable to the making of a greater Serbia. In regard to Greece, the writer's opinions are an echo of those expressed in our leading article last week:—

As for Greece, statesmanship disappeared with M. Venizelos, and the consequences of the eyeless policy of his successors may soon be past repairing. The pro-German Court and the Government of its choice have relieved the Allies from all obligation. Roumania, Bulgaria, and Serbia by themselves would constitute a Balkan League incomparably stronger than the last and capable of ensuring an equally splendid and solid expansion for each of its members.

Articles to Note.

"The Dardanelles Campaign" (illustrated), in the *Sphere* (August 7).

"The Indestructible Bulgarians," by H. M. Wallis, in the *Daily News* (August 10).

"Through Constantinople," by H. B. Boyd-Carpenter, in the *Morning Advertiser* (August 7).

"Across Galata Bridge," in the *Nation* (August 7).

"Calais or Constantinople?", by A. H. Trapmann, in the *Sunday Pictorial* (August 8).

"The Anzacs" and "A Night on Anzac," by H. V. Nevinson, in the *Manchester Guardian* (August 5 and 7).

"In the Dardanelles," by a French Surgeon, in the *Evening Standard* (August 5).

"The World-Wide War" (v.), by "L. H. C.," in the *Liverpool Courier* (August 6).

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The rumoured cession to Bulgaria by Turkey of the land lying to the west of the Maritza, consequently putting the former in possession of the entire railway line to Dedeagatch, is not a *fait accompli*, as was feared last week. *The Times* correspondent in the Balkan Peninsula admits that a protocol to the effect has been signed between the two countries, but states that it may be regarded as "practically devoid of political importance." On August 4 "no change had occurred in the relations between Bulgaria and Turkey, and the negotiations were apparently at a standstill." We reproduce the full message on another page. It proves conclusively that the negotiations between Turkey and Bulgaria on the subject of the Dedeagatch-Sofia line date from prior to the war; that on Bulgaria's part they were due solely to economic considerations, and were without any political significance. The only question that arises is: What is the *quid pro quo* to be? Either this has not been determined or, if so, it has been kept secret. Which is it? Until we know that, and until the negotiations between the two countries have been brought to a conclusion, no one can criticise Bulgaria for wishing to free Dedeagatch from its existing economic disadvantages.

***

The article by Mr. Albert Ball which appeared in the current issue of the *Quarterly Review* on German methods in Italy is so characteristic of German methods in the Balkans (and even in Austria!) that we have quoted lengthy extracts therefrom on another page. There are German institutions similar to the Banca Commerciale in Serbia (generally run by Austrian banks with German backing), in Bulgaria, Roumania, and above all in Turkey. The Berlin consortium, at whose head stands the ubiquitous Deutsche Bank, is beyond a doubt the most powerful and influential financial group on the Continent, a gigantic wire-pulling institution with willing, paid tools in all the countries where they operate. Shipping companies, coal companies, oilfields, railway lines owe them allegiance; importing houses are in their debt, and liquidate it by importing German goods from industrial firms allied to the banks; politicians, newspaper proprietors, and the aristocracy are likewise in their debt, and liquidate it by adding to the power and prestige of the branch firms locally established, even when contrary to the interests of their own country. The hold which the German banks have thus obtained in foreign countries is tremendous, so great in fact that they influence, and practically control, the national economic and political life of the victim State. Nor is this power likely to be obliterated when once peace has been signed, unless the Allies make up their minds to wage as ruthless a financial war against the Huns as they are doing to-day in the naval and military spheres.

***

The first step in the desired direction is, as I have always pointed out, the creation (as regards the Near East) of an Anglo-Balkan Bank. Far be it from me to suggest that this bank should work on German lines, *i.e.*, by means of bribery and corruption, but it will, nevertheless, have to look after British interests, and further them by all legitimate means. It will also have to be in a position to keep a careful watch on German financial doings and report them to headquarters, where they can be attended to and counteracted wherever necessary or possible. In this way the nefarious influence of the German suborning banks would gradually be restricted, though it will doubtless take years of hard work to unmask, in the countries concerned, all the tortuous doings and subterranean tunnels of the German mole-banks. Nevertheless, it must be done, and the Near Eastern countries themselves will only be too glad of our assistance in helping them to get rid of Germany's pernicious influence based on financial crookedness.

***

Herr Stinnes, of Constantinople coal fame, is again to the front in connection with the sale of eleven ships, in all probability of German origin, to a United States ring of buyers. These ships have been bought by the American group at British, Scandinavian, and Mediterranean ports, and the exact nationality of the vessels previous to their sale "is not stated." One might think, almost, that they were enemy ships eluding the grasp of the law. The whole transaction is peculiarly a German one. Apparently the vessels were originally bought by a Danish coal merchant with funds provided by Herr Stinnes, and have now been sold again to the American group. Considering that Herr Stinnes is one of the tools (or used to be, because now he is, in all probability, one of the leaders) of the great German financial consortium referred to in a previous paragraph, I must be excused if I imagine that the whole deal has been successfully engineered by the group in question, who are, of course, allied with the big German shipping companies, and doubtless acting on their behalf. I wonder, in view of the above successful transaction, what new rôle will be reserved for Herr Stinnes in Germany's financial developments after the war. It is a name, a suspicious name, to be borne in mind.

***

Our Sofia Correspondent chronicles a welcome change in the attitude of the Agrarians to the Government. Hitherto they have been the staunch supporters of neutrality, but now that they have to realise their crops, and cannot do so owing to the fact that the Dardanelles are still closed, they are beginning to decry neutrality, and to urge the Government to aid the Entente Powers in their Dardanelles task. It is to be hoped that our representatives on the spot have noticed this change, and are acting accordingly.

***

It is not only in Bulgaria, however, that agriculturists are feeling the effects of the situation in the Dardanelles. In Roumania, a much larger grain-producing country, the lack of sea-borne traffic is sowing discontent among the peasantry, and a rising of the peasantry is feared unless something is done to hasten the opening of the Straits. This "something" is that Roumania, in the same way as Bulgaria, must aid the Entente Powers in their struggle for the Straits. The sooner these are opened, the quicker will the two countries be able to dispose of their crops. This is logic, and the fact that in both countries the farmers, etc., are beginning to realise it, shows that the Governments dare not hesitate much longer.

The arrival in the Mersey last week of a vessel flying the Persian flag seems to have caused some surprise among those to whom the Persian mercantile flag is an unknown quantity. Apparently, the International Code Signal book gives this flag as being green, white and red, in horizontal stripes, from which regulation the Limmi, the vessel in question, departed to the indignation of those who had to classify her. Besides, her log was an interesting one. Her port is Bundar Abbas, she belongs to the Compagnie Perso-Ottomane de Navigation à Vapeur, and she arrived in the Mersey from the Greek Islands with a cargo of ore, flying an unrecorded flag. I am sure that the status of the boat was as great a puzzler to the authorities at Liverpool as the Orient question is to our most enlightened statesmen.

***

On another page we publish an official notice of the Bulgarian Government inviting tenders for the construction of four railway lines. These are:—(1) From Radomir, through Dupnitza to Jumaja, with a branch line; (2) from Dupnitza to Bovovdal; (3) from Plevna to Lovetch; and (4) from Gabrovo to Sevlijevo. THE NEAR EAST's Special Correspondent in the Balkans, writing in our Engineering Supplement last summer (June 19), gave the following particulars concerning the lines in question:—(1) This is the "first immediate section of a line intending eventually to link up Strumnitza with Sofia. From Dupnitza it follows the course of the Dzermveno River, one of the affluents of the Struma, to its union with the latter, and then follows the Struma Valley to Jumaja." The branch line (2) from Dupnitza was not mentioned in the despatch referred to, and is only a small item. (3) It is intended to construct a line running north from Plevna to Philippopolis, via Lovetch, Trojan, and Karlovo. The first section, it would appear, is that from Plevna to Lovetch. "The district between Lovetch, Sevlijevo and Gabrovo is the Manchester of Bulgaria," wrote our Correspondent, "and it is intended to link up the three towns by rail." This explains (4) which two of the towns mentioned above are to be connected by rail. At present, Gabrovo is linked up with Tirnovo, but Sevlijevo has no railway communication. The next step will doubtless be to connect Sevlijevo with Lovetch, and then continue the line southward to Karlovo and Philippopolis.

***

The following further particulars from our Special Correspondent in the Balkans, concerning railway construction in Bulgaria, will be of interest to those who contemplate sending in a tender:—"The usual procedure followed in Bulgaria is by the publication of an open tender, the work generally going to the lowest bidder. Government payments are regular, in instalments. Practically all the rails are of British make, but the rolling stock, as a rule, is supplied by Continental firms. Any big British firm of contractors willing to make one (or several) of the lines to be built would not only find a welcome (in Bulgaria), but would be able to do a profitable piece of work. . . We should not lose sight of the possibilities offered to British firms in connection with railway construction in Bulgaria." Unfortunately, this is not a happy moment in which to invite tenders from British engineering firms up to their ears in Government work.

German Financial Methods.

The current issue of the *Quarterly Review* contains an article by Mr. Albert Ball on Germany's financial methods in Italy, which is so applicable to practically all Near Eastern countries that we reproduce the following extracts:—

German financiers who work in foreign countries do not conform to any type we know. Having been carefully trained in the language, history, physiography, and industries of the country they are destined to occupy, and having learned the most approved methods of finance and of organisation, they are then sent out by one of the powerful industrial banks to a district which has been carefully studied and prepared for their arrival. They go there with all the proper introductions and the financial backing of those who sent them, and they proceed to found a financial institution, probably an industrial bank, to which they at once give a name which suggests a local origin, or, at any rate, avoids all suspicion of German influence. Thus we have a Banca Romana at Bukarest, a Creditna Bank at Sofia, a Banca Commerciale Italiana at Milan, and, what is even more mystifying, a Banca Russa at Genoa. All these banks are of German origin, but do not betray it in their names; and the same procedure is followed in Austria, Switzerland, Belgium, Russia, or any other country to which German capital is attracted.

Local Banks.

Having founded the bank, our German financiers see to it that the control and management remain in their hands, and that Germans are appointed to the responsible posts on the staff; but otherwise, to the best of their abilities, they will endeavour to secure local notabilities as shareholders or even directors. This is useful in obtaining further capital and desirable business connections, and, above all, it goes a long way to give the enterprise the local or national appearance which the name usually implies. In the course of time the preponderating German influence will no doubt be suspected. If it creates difficulties, it is quite easy for the parent bank to transfer the German interest in the undertaking, which we will suppose to be in Russia, to a bank, Belgian in name, but equally under German control; and the preponderating influence will then appear to be Belgian. The procedure is sometimes varied by creating a pseudo-international trust, subscribed to by financial institutions apparently foreign, but really under the control of the parent bank. In extreme cases German financiers have been known to go so far as to part with the whole of their shareholding, except the amount necessary for the qualification of the directors, retaining, however, the control and management for which they had made themselves indispensable. They can even then be of considerable use to the Fatherland.

In Italy the main agency for German economic penetration has been the Banca Commerciale Italiana. . . . In the early days of the Triple Alliance Crispi endeavoured, with the approval of Bismarck, to induce German bankers to support the market for Italian bonds, which were at the time attacked on the Paris Bourse. The support was given grudgingly, and it was intimated to Crispi that, if German bankers were to interest themselves in Italian securities there should be some institution founded which would enable them to keep in touch with the financial condition and development of the country. This led in 1894 to the formation of the Banca Commerciale Italiana, with the very modest capital of £200,000, subscribed to the extent of 74 per cent. by German and Austrian and the balance by Swiss and Italian bankers. Certainly, when Crispi encouraged the formation of the bank he did not foresee that in twenty years it would have a capital of £6,240,000, and that, working with other institutions under German management, such as, e.g., the Credito Italiano, it would dominate the economic situation.

The bank has recently informed the public that of the present capital of £6,240,000 63 per cent. is owned by Italians, and that the German-Austrian holding has been reduced to 2½ per cent., the balance being in the hands of investors described as Swiss and French. There is a board of thirty-three directors, which, before the agitation made itself felt,* consisted of fifteen Italians and eighteen foreigners. . . . The real work had to be done by the resident managing directors, and until the last few months Italians have as far as possible been excluded from these posts. It is no secret that the real work has been done by three extremely competent men—Herr Joel, who has been on the management from the start, Herr Weil, and Herr Toepliz—and their names appear and reappear in the annals of the bank and of the subsidiary companies which it has founded. . . . The association of Italian directors, as the character of the individuals selected throughout has shown, was for the purpose of attracting the Italian investing public and obtaining political influence. In the course of time and with the extension of the company's operations that influence has become so great as to be dangerous not only in the world of industry, but in that of politics, of the Press, and of administration.

Shipping Control.

The first object of the Banca Commerciale was to acquire the control of the shipping companies which represent the all-important factor in the organisation of foreign trade. By obtaining 45,000 shares as security for a loan, which could not be repaid, to the Navigazione Generale Italiana, the bank acquired practical control of that company; and the chief rival, the Lloyd Italiano, was also brought within the net of its influence. Gradually all the important shipping companies came under the bank's management. The bank then turned its attention to the steel and iron, naval construction, and armament companies, the bulk of which it formed into a trust under its control. As an instance of the power of the bank, and as showing its close relations with German and Italian industry, we may mention that in 1913, when Germany was dumping iron on the Italian market, the bank acted as an intermediary between the German and the Italian Iron Trusts, and brought about an agreement under which the Germans were guaranteed a fixed but limited annual import of 40,000 tons, the result of which was to add 33 per cent. to the price of German iron.

Industrial Control.

The bank, in its recent statement of defence, claims to have identified itself with the vigorous development of chemical, mining, textile and electricity companies. By electricity companies the bank means companies for producing electrical power. In the matter of electrical machinery and appliances the bank has always seen that its clients and the companies under its control should get such goods from Germany; and the A.E.G., the Brown Boveri and the Siemens, the three well-known German producers of these goods, who are always strongly recommended by the bank, between them export annually to Italy goods of an average value of £8,000,000 sterling. In this connection we may note that Dr. Helferich, who has since become Finance Minister of Germany, but who at the time was manager of the Deutsche Bank, which has been always represented on the board of the Banca Commerciale, in discussing the advantages of the investment of German capital abroad, stated the first object to be the encouragement of the German export trade. He added as a further advantage that of financial mobilisation in time of war. The meaning of this phrase has been variously construed, but perhaps it explains the statement that only 2½ per cent. of the capital of the bank is now German-Austrian. If the statement is true, it shows that, with an infinitesimal expenditure of capital, German management could still control the fate of a large number of Italian companies whose total capitalisation amounts to about £40,000,000 sterling. The bank, following German models, has established, or has combined with other financiers to establish, financial institutions in foreign countries. It has created the Societa Commerciale d'Oriente, of which Herr Joel was the first president. It combined with Austrian financiers to found the Banca d'Albania.

Next to the Banca Commerciale Italiana, the Credito Italiano, which until quite recently has also been under German control, has been the most important organ for German economic penetration. Ezio M. Gray notes as a fact, which we trust is only a fortuitous coincidence, that in March last, just before the coming into force of the Legge Salandra against "espionage," several of the managers of the Credito Italiano left the country, among them being the manager of the Roman branch, who was director of no less than twenty-seven industrial companies. Whatever doubts there may be as to these gentlemen, there are none as to the manager of the Civitavecchia branch, who was also the local German consul. We have an official announcement, dated April 16, 1915, that he was divested of his consular functions and escorted to the frontier.

* Dr. Preziosi's recent campaign against the bank.

Abyssinia in 1914.

II.—Trade and Finance.

We reproduced last week some extracts from an able review of the situation in Abyssinia in 1914, from the pen of the U.S. Consul at Adis Ababa. The following are further extracts:—

The export trade has been increasing gradually each year. It has been due to the efforts of the foreign traders in the principal centres of trade; the Abyssinians themselves are not merchants, and were the commerce of the country dependent upon their exertions there would be but little trade. A few foreign firms control most of the export business; they have a working agreement concerning prices, thus placing the Abyssinians in a helpless position to secure the best returns for their native products. These firms carry large supplies of cotton goods, exchanging them at a good profit for the Abyssinian articles of export. They also have an understanding that no intruders will be welcome and any new firms contemplating this field must be prepared to contest every point with competitors who employ methods and means that might be questionable from the standpoint of the best business ethics.

Bank of Abyssinia.

The only banking institution in Abyssinia is the Bank of Abyssinia, chartered under the Egyptian laws, with a capital of £500,000, one-fourth of which is paid up. It is controlled by the National Bank of Egypt, and its present governor, a Scotch-Canadian and British subject, is an appointee of the governor of the latter banking institution, thus showing the intimate connection between the two banks. The principal place of business is the capital, Adis Ababa. Agencies have been established at Dari Dawa and Harrar along the railroad line; at Gore in the west, where is located the important trading market for goods passing up the Nile, then by rail to Port Sudan on the Red Sea; and at Dessie in the north-east, which has a trade outlet at the port of Assab in Eritrea on the Red Sea. At these places the Abyssinian Government has its customs officials.

The Abyssinian Government has a mint at the capital, but at present it is not in operation. Its coinage of Menelik dollars and piastres are accepted in all parts of the Kingdom, but the Maria Theresa thaler, of the same value as the Menelik dollar, is more popular. The thaler's value changes with the price of silver. The piastre is much in demand in small trading, and although the intrinsic value is only one-sixteenth of an Abyssinian dollar, at times it is necessary to pay one dollar for fourteen piastres on account of their scarcity. In some parts of the country bars of salt are still used as the medium of exchange, and blank cartridges are used everywhere for small specie. All of the Maria Theresa thalers are imported from Austria, while at present piastres are minted in France. Abyssinian banknotes were to be put in circulation the latter part of 1914. On account of the expense in procuring cash from the Bank of Abyssinia, several important firms import Maria Theresa thalers for their own account.

Banque de l'Indo-China.

In Jibuti the official money is French. The 5-franc piece and small coins are used, but the Indian rupee is preferred among the indigenous population. The notes issued by the Banque de l'Indo-China are also legal tender. A branch of this bank is located here in a fine building. Its principal activities are the financing of building and industrial enterprises in the French colony, acting as the financial agent of the colonial administration, and assisting in the successful financing of the French-Ethiopan Railroad. Most of the labourers along the construction line are paid off in these bank notes, and money changers travelling on the railroad do a thriving business at every station in taking up these notes in exchange for the Abyssinian silver currency, usually the Maria Theresa thaler.

There is no officially published tariff schedule for customs duties, but the authorities are governed by a list that approximately imposes a tax of between 8 per cent. and 10 per cent. ad valorem on all imports and 10 per cent. on all exports. At Dire Dawa, on the railroad line to Adis Ababa from Jibuti, is located the first customs station. The officials here are Abyssinian, as well as practically all others in the customs service, except at Gambella, in the western part of Abyssinia. Here the collection of duties has been intrusted to the British Sudan Government, which has leased a strip of land from the Abyssinian Government for a term of years. Two Britishers are stationed there and a British consul. The Sudan Government has constructed warehouses for the storage of goods awaiting shipment by steamer to Khartum. All goods entering Abyssinia from the Sudan, in transit, pay no duty, as it is collected at Port Sudan for the Abyssinian Government. European goods re-exported to Abyssinia within six months from the Sudan have a rebate of 7 per cent. of the Sudan duties, but they must pay 8 per cent. at Gambella. Sudan products pay 6 per cent., 5 per cent. for Abyssinian duty, and 1 per cent. as an export duty, and vice versa for Abyssinian products. However, if such goods pass in transit to Port Sudan en route to Europe, 5 per cent. is refunded. The 10 per cent. export duty on all Abyssinian products is collected before the goods reach Gambella.

The administration of the customs is under the jurisdiction of the minister of commerce. He, as well as the other seven ministers, receives no fixed salary. The incumbent is the president of the council of ministers.

The Abyssinian Government maintains a postal and telegraphic service by way of Jibuti with all European States through treaty arrangement with the French Government. It also accepted the international arrangement of Rome, May 26, 1906, regarding insured letters and boxes. The director of the service is a Frenchman. It is also possible to telephone from Adis Ababa in Jibuti, in the French Somaliland, and to the principal towns in Abyssinia. There is a telegraphic service to European countries over the Italian owned and operated line between Adis Ababa and the Italian colony of Eritrea.

The French-Ethiopian Railroad has paralleled its line with a well-constructed telegraph and telephone system, which will doubtless be used by the Abyssinian Government, as its own line is constantly out of repair and gives unsatisfactory service.

Industries.

There are practically no industries in the entire country. For several years the Government has been attempting to establish a cartridge factory in the capital under the supervision of a British subject. In 1914 the factory was completed. An electric plant has been installed under the direction of the same person at a small place nineteen miles distant from Adis Ababa, which furnishes 175 horsepower, sufficient to run the cartridge factory and provide power to light the city. The entire equipment was ordered in England, but in the factory there were noted several American machines, estimated to be worth £1,000. The power of the electric plant is capable of being increased to 1,000 horse-power by the construction of an inexpensive dam across the Akaki River. Although the city of Adis Ababa has no street lights, it will soon be forced to adopt progressive ideas when the railroad reaches it. Other municipal improvements must necessarily follow.

A few small saw and flour mills are located near the capital, the output of which is limited. In the western part of the country a sugar plantation of 500 acres is under cultivation by British interests; also near Gambella over 100,000 rubber trees have been planted. Up to the present all of the rubber collected comes from the wild rubber vines in the west and south, with the centre of trade at Gore, the market place for the trade that has its outlet at Gambella. A concession for gold mining was given to an Italian firm a few years ago in the district near Gambella. American mining machinery for washing was imported at a heavy expense. The venture proved a failure. There is, however, gold that can be worked profitably. Silver, coal, and iron have been found, but as yet nothing can be predicated as to their commercial value.

Abyssinia is unique in that it is not saddled with a public debt. This is due to the fact that the late Emperor Menelik II. turned down all propositions to loan him funds with which to construct public works, buildings, and other necessary improvements so as to make the country attractive for Europeans. He encouraged them to spend their own money in buildings in the capital, and was ready to grant certain concessions. But few of the concessions have materialized into any benefit to the country or the concessionaires. This has been due largely to the fact that the latter have been persons without any financial backing. They hoped to exploit their concessions by interesting foreign capital. The one exception is the French-Abyssinian Railroad, but even that has had many vicissitudes, and had it not been for the assistance of the French Government the line probably would have waited for many years.

Treaty with America.

The new treaty with the United States, which was ratified last year, has three advantages over the 1903 treaty, viz.—(1) American citizens do not now subject themselves to the jurisdiction of the Abyssinian courts, but are tried by their own consular courts; (2) American citizens have the use of telegraph, post, and all means of transportation upon the same terms not only of all citizens of other Powers, but of the subjects of the Ethiopian Empire; (3) the treaty is automatic, in that it will continue for terms of ten years unless notice is given of intention to terminate it one year before the expiration of any term. The treaty has the most-favoured-nation clause regarding customs duties, imports, and jurisdiction; grants the right to travel and transact business to American citizens, insures their person and property, and establishes the rules for reciprocally receiving diplomatic and consular representatives.

No definite statistics are available of the value of the trade of the United States with Abyssinia, but approximate figures can be given. It can be stated with assurance that the United States purchases indirectly more Abyssinian products than any other country. Coffee and skins reach the United States through Aden, hides by way of European ports, ivory by London—in all estimated at £160,000. The sales of American sheeting should exceed this sum. Besides, American sewing machines are sold that are classified as coming from Egypt, because the agent of the Singer Co., who has the district of Abyssinia, is located at Cairo. American carts have been used in hauling goods from and to the end of the railroad line. In the cartridge factory £1,000 worth of American machinery was installed in 1912 and 1913. Considerable canned fruits from California are sold, and a miscellaneous assortment of articles have reached Adis Ababa from American houses that do a mail order business. The goods are shipped to their agents in London, thence by parcel post to Abyssinia. This business could be greatly increased if there were a parcel post arrangement direct with Abyssinia viâ Jibuti.

Persia in 1913-14.

H.M. Consul-General at Ispahan reports :—

The year 1913-14 (ending March 20) shows only slight improvement on the previous year in the matter of trade conditions in that region. Prices of grain and other foodstuffs remained high and only the smaller Government pensions were paid. Money was slightly easier in mercantile and banking circles, chiefly owing to rather less insecurity than usual on some of the main trade routes, notably those from Ispahan to Ahwaz and Teheran respectively.

Exports appear to have been considerably reduced—both to places abroad and to other towns in Persia. Money to a large extent was locked up in opium, which had been bought at high speculative prices and could only be realised at a loss.

A certain amount of insecurity in the town and environs resulted in the continuation of the sense of unrest prevailing previously. Except on the two routes mentioned above robbers and rumours of robbers on the roads continued to make the regular arrival and departure of caravans an impossibility.

The import trade of the district is fully exploited by European merchant firms, with established offices or representatives in Ispahan. It is only occasionally, and among the minor imports (*e.g.*, bicycles, stationery, enamelled ironware, medicines, etc.), that some small opportunity may offer for an independent importer.

Cutlery and leather goods of United Kingdom manufacture are much appreciated, but the Persian buyer is seldom willing to pay higher prices for superior quality of goods. Moreover, the enormous rise since 1908 in the price of cereals and other prime necessaries of life continues greatly to cripple the purchasing power of the province for imported articles.

Illustrated catalogues in English have occasionally led to small orders for British goods; but it may be taken as a general rule that a personal representative to push these on the spot is a *sine quâ non*. When a native of the country is employed in this capacity, strict previous inquiry may prevent subsequent disappointment.

In the backward condition of the country, and with the inadequate means of transport available, there is at present no demand for elaborate machinery, electrical apparatus, and all the luxurious and complicated by-products of an advanced civilization, catalogues of which frequently reach the British Consulate-General. The occasional purchase of a motor-car, oil-engine, bicycle or iron bedstead must not be construed to mean that there is any regular demand for these goods.

Cotton Piece-Goods Market.

H.M. Consul-General at Ispahan writes that, owing to over-importation, the prices of cotton piece-goods during the year ended March 20, 1914, fell 5 to 8 per cent., the market being very dull and money so extremely tight that it became a matter of the greatest difficulty for sellers to recover even the smallest amounts from purchasers. Demand was distinctly below the normal, especially as certain districts formerly supplied from Ispahan (such as Sultanabad, Gulpaigan and Khonsar) began to obtain their piece-goods from Hamadan; and whereas in former years a good demand existed every spring for narrow Mexicans for the village of Dehkurd and the district of Chahar-Mahal (Bakhtiari land), during 1913-14 very few drapers from outlying districts came into Ispahan to make their purchases and the Dehkurd demand was chiefly met direct by Shuster merchants through their agents on the spot. Only grey shirtings, owing to scanty stocks, formed an exception and realised good prices. Perhaps one-fourth of the normal amount of business was transacted between March and June, and yet in this first quarter the market, although far from being bright, was comparatively better than during the remainder of the year. In

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.

the second quarter it became daily worse and in the summer was totally paralyzed.

The September, or post-Ramazan, market was cheerful by comparison, except for white shirtings, both demand and prices of which were out of proportion to the rates ruling in Lancashire and stocks in Ispahan. It may be noted that the great rise in the price of raw cotton in America and Europe had practically no effect upon the Ispahan market. A fair business was even done in woollens and mixtures at satisfactory prices. Mexicans, too, showed improvement.

In the autumn the usual demand was absolutely lacking. Money being by this time a great rarity, local importers of Jewish goods viâ Hamadan and Kermanshah were making forced sales at very low prices in order to meet their acceptances, thus spoiling the market altogether. In December the market revived slightly, and rash persons predicted the setting-in of a better demand for the Persian new year season, but these hopes were not realised. Not only was business at a complete standstill during the penitential months of Muharram and Safar, when, except for the purchase of material for mourning garments, little is doing at the best of times, but great depression prevailed on the eve of No Ruz (March 21, 1914), and the year closed in an atmosphere of complete gloom and despondency. It should be remembered, however, that great scarcity of food and the abnormally high prices of commodities prevailing at the time played a conspicuous part in demoralising the piece-goods market, as naturally the poorer classes of the community, that is to say the majority of the population, being on the verge of starvation, could not be expected to give much thought to the renewal of their wardrobes.

Several caravans of Russian piece-goods arrived from the north during the summer, the total imports for the year being estimated at 3,000 bales, valued at something like £55,000. Russian goods competed during 1913-14 more successfully than before with British goods, several local merchants having imported direct from Russia in small lots. The total imports of Russian piece-goods amounted to about one-seventh of those from the United Kingdom and elsewhere.

PARCELS FOR THE MEDITERRANEAN EXPEDITIONARY FORCE.

In view of the exceptional conditions of transit, involving several transhipments and exposure to great heat, it is necessary that parcels for the Mediterranean Expeditionary Force should be very carefully packed. The following recommendations are made as the result of the experience of the Army Post Office :—

Small parcels are found to arrive in better condition than large parcels. If a large consignment has to be sent it is better to send two or three small parcels than one large one.

All parcels should be as nearly round as possible, and should be well padded with shavings, crumpled paper or similar protective material.

The outer covering should consist of strong linen, calico or canvas, or other textile material, and should be securely sewn up.

As an alternative parcels may be packed in boxes made of strong double corrugated cardboard or strawboard. It is undesirable to use wooden and metal boxes with square corners for the outer covering, since although such boxes usually form an adequate protection to the contents they are liable to damage other parcels in transit.

Parcels merely wrapped in paper or packed in thin cardboard boxes, such as shoe boxes, cannot be accepted.

No perishable articles may be sent; and anything likely to become soft or sticky, such as chocolate and sweets, should be packed in tins.

A PALACE OF INDUSTRY.

In the spring of 1917 a Palace of Industry —as it is to be called—will be opened as a permanent institution in London. The object in view is the holding of two fairs, every spring and autumn, in which will be exhibited the main industries of the Empire. The palace will be managed by an advisory council consisting of representatives of all the trade associations of the United Kingdom.

TRADE NOTES.

Egypt.

H.M. Consul at Cairo (Mr. A. D. Alban) reports that tenders are invited by the Egyptian State Railways and Telegraphs Administration for the supply of 15,000 khaki uniforms during the three years 1916-18, or, alternatively, 5,000 uniforms for 1916 only. Sealed tender, on the proper form, will be received, up to 10 a.m. on September 25, by the General Manager, Egyptian State Railways and Telegraphs, Cairo. Samples, in triplicate, of the cloth and brass buttons it is proposed to supply, must be sent to the Superintendent of Stores, Egyptian State Railways and Telegraphs, Cairo, not later than September 18, otherwise the tender may not be considered. Copies of the specification and form of tender may be obtained from the office of Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, London, S. W., on payment of 2s. A copy of the specification and form of tender may be inspected by United Kingdom manufacturers of khaki uniforms at the Commercial Intelligence Branch of the Board of Trade.

Bulgaria.

The Board of Trade are in receipt, through the Foreign Office, of telegraphic information to the effect that the re-exportation of rice from Bulgaria has been prohibited; that the exportation and re-exportation of manila rope and twine, hops and chlorate of potash have also been prohibited; and that the Bulgarian Government have authorized the exportation of native-made Segres sheep and goat skins from Bulgaria, as also of hay and straw, the produce of the 1914 harvest.

The Board of Trade are in receipt, through the Foreign Office, of copy of an Order of the Resident General of the French Zone in Morocco, dated June 25, which authorizes the exportation of the undermentioned articles from the French Zone, as from July 1, so far as concerns consignments destined exclusively for French territory, the United Kingdom and Italy: Maize, up to 50,000 quintals; chick-peas, up to 60,000 quintals; sorghum, up to 10,000 quintals; and canary-grass, without limitation as to quantity.

The Board of Trade are also in receipt, through the same channel, of copy of a further Order of the Resident-General, dated June 21, which authorizes, under certain conditions, the coastwise carriage, from ports of the French Zone in Morocco to Tangier, of the undermentioned goods: Oxen, sheep, pigs, wheat, barley, flour and semolina, chick-peas, beans, maize, and native butter.

Greece.

One of the most remarkable and striking phases in the development of Greece (says *Commercial Intelligence*) has been the steady expansion of the Greek mercantile marine within the last twenty years. The number of vessels comprising the merchant fleet of Greece at the end of 1903 was 210 steamers, with a combined tonnage of 202,140 tons, and at the end of 1914, according to *Lloyd's Register*, it numbered 440 steamers, with a tonnage of approximately 900,000 tons—viz., four vessels of over 6,000 tons, fifteen vessels of over 4,000 tons, eighty-four vessels of over 3,000 tons, 134 vessels of over 2,000 tons, and 202 vessels of under 2,000 tons. The increase in shipping rates since the South African War has contributed largely to the development of Greek merchant shipping, and certainly has had an extraordinary influence on the economic, and particularly on the monetary, situation of the country. According to statistics published by a local journal eighty-five steamers of 219,450 gross tons were added to the Greek flag between July, 1913, and the end of December, 1914. The value of these steamers, reckoned at an average of £8 per ton gross, amounts to £1,755,600, and the total value of the Greek mercantile marine amounts to about £6,800,000. It is estimated that the earnings which the Greek mercantile marine will realise in 1915 as a result of the war will exceed £3,000,000.

ROUMANIAN CORN DEPOTS.

(From Our Own Correspondent.)

Bucharest, July 24.

For some little time past interested parties have discussed the question of depots for the new crops which will shortly be ready for reaping, and which promise to be excellent. The most sanguine put the quantity of wheat alone at 2½ million tons.

The ordinary depots are crowded to their utmost extent with the crops remaining over from last year and not exported on account of the political situation.

M. Bibicesco, the Governor of the National Bank, proposes the construction immediately of depots close to the stations on the frontiers by which grain is exported, or in the more important producing districts, where the grain could be stored until sold at profitable prices. If this were done the credit banks would consent to make advances on the grain stored, a warrant for the grain being sufficient guarantee. After the war advantageous prices could be obtained, and thus the speculation in sales forced "in extremis" would be done away with.

M. Bibicesco is of opinion that the State should undertake the construction of these depots, as time presses, and the State can guarantee rapid construction. The National Bank would be ready to advance 10 million francs for this purpose. In this way it would be possible to complete a work saving millions to the country, i.e., the difference between the price to be obtained by agriculturists to-day among the hundreds of offers and the price to be obtained if the producer is not forced to sell on account of having no place where to store his grain. The large dealers, who in normal times sell at current prices abroad for future delivery, are at present unable to do anything. "Prompt" sales are generally very rare.

Moreover, if the depots are constructed, farmers will not hurry to thresh their corn, but will stack it till the granaries are ready.

NEWS FROM ALL SOURCES.

A new West End office for the Italian State Railways has been opened in London. It is situated at the bottom of Waterloo Place and is a bureau for every kind of information likely to be required by the intending traveller in Italy. People who go to Egypt, Greece, and the East generally pass through Italy and will find a call at this office useful.

The seismological observatory at Hohenheim (Wurtemberg) registered on Sunday, says a message from Amsterdam, a violent earthquake, the centre of which is apparently in South Europe—possibly in Calabria or Albania.—Central News.

During the first five months of 1914 Spain expended 49,201,000 fr. on its protectorate in Morocco; during the like period in 1915 the expenditure was 64,568,000 fr.

The Roumanian Cabinet, it was announced by Reuter's Agency on August 7 from Paris, has voted a new credit of £4,000,000 for army purposes. This lacks confirmation.

According to a Cairo telegram, a military court has fined Nestor Gianaclis, the cigarette manufacturers, £500 and their manager £100 for trading with the enemy.

SUEZ CANAL TRAFFIC.

In a White Paper issued on Monday are given the returns of the navigation through the Suez Canal for the year 1914 as compared with those of the two previous years 1912 and 1913. The net tonnage for the past year shows a decrease of 624,389 tons, as compared with that of 1913, and a decrease of 865,625 tons as compared with that of 1912. The reduction of the transit dues to 6.25f per ton from January 1, 1913, together with the reduction of tonnage, had the effect of reducing the gross receipts, which amounted in 1914 to 122,248,853 frs., as compared with 126,650,934 frs. in 1913 and 136,423,831 frs. in 1912. During the first seven months of 1914 the traffic through the canal was in excess of that for the same period of 1913. The receipts, however, fell after the outbreak of war, but the loss occasioned by the diminution of the mercantile traffic was partly compensated by an increased movement of military transports. The number of vessels which passed through the canal was 5,273 in 1912, 5,085 in 1913 and 4,802 in 1914, of which 3,335 in 1912, 2,951 in 1913 and 3,078 in 1914, carried the British flag. There has been an increase of 857,794 tons last year as compared with 1913 in the tonnage of British vessels, which amounted to 12,847,621 tons in 1912, 12,052,484 tons in 1913 and 12,910,278 tons in 1914. During the same period the tonnage of German vessels has decreased from 3,025,415 tons in 1912 and 3,352,287 tons in 1913, to 2,118,946 tons in 1914.

Merchant Vessels.

The percentage of British vessels and their net tonnage in 1914 was 64.1 and 66.5 respectively, as compared with 58 and 60.2 in 1913, and 62.1 and 63.4 in 1912. The percentage of German vessels and their net tonnage was 10 and 10.9 respectively, as compared with 15.3 and 16.7 in 1913, and 13 and 14.9 in 1912, while the percentage of net tonnage of the other maritime nations using the canal in 1914 remained practically stationary as compared with the preceding year. Of 3,314 merchant vessels and vessels in ballast, of a net tonnage of 12,907,216 tons, passing through the canal, 2,372 ships of a net tonnage of 9,516,439 tons, were British, being 71 per cent. of the number and 73.7 per cent. of the tonnage; 299, or 9 per cent., were German vessels, whose tonnage was 9.7 per cent. of the whole; Holland, France, Austria-Hungary, Russia, Norway, Sweden, Denmark and Italy combined furnishing a total of 20 per cent. of the vessels and 16.6 per cent. of the tonnage of the carrying trade to the East through the Suez Canal.

Ten Years' Tonnage.

In the ten years 1891-1900 the annual net tonnage ranged from 8,698,777 tons to 9,738,152 tons and the transit receipts from 83,422,101 frs. to 90,623,608 frs. The average of the net tonnage was 8.588,947 tons and of the transit receipts 80,006,013 frs.; while in 1914 the net tonnage amounted to 19,409,495 tons and the transit receipts to 122,248,853 frs. The mean net tonnage per vessel, which in 1881 was only 1,517 tons, rose from 2,067 tons in 1891 to 2,926 tons in 1901 and 3,608 tons in 1911, and to 4,042 tons in 1914. Fifty-seven steamers exceeding 150 metres (492 ft.) in length, or more than 18 metres (59 ft.) in breadth, with a draught of over 8 metres (26 ft. 3 ins.), passed through the canal in 1914. The mean duration of passage for all vessels navigating the canal was 16 hours 11 minutes in 1914, while the percentage of vessels navigating by night as well as by day amounted to 95.5 per cent. in 1914, as compared with 96.9 per cent. in 1913. The percentage of vessels drawing less than 27 ft. (8.23 metres) was 96 in 1914, as compared with 96 in 1913 and 97 in 1912, whilst that of vessels drawing more than 27 ft. was four in 1914, as compared with four in 1913 and three in 1912. Since January 21, 1915, the maximum draught allowed for vessels passing through the canal has been raised to 9.14 metres, or 30 ft. During 1914 363 vessels passed through the canal for the first time, 25 of which were warships and 114 belonging to shipping companies whose vessels regularly use the canal, and who furnished over 90,000 net tons to the traffic of the canal.

Carriage of Troops.

The number of troops carried through the canal during last year amounted to 228,720, as against 88,748 in 1913, being an increase of 139,972. There was an increase of 140,228 British, 5,488 Italian and 23 French, against a decrease of 3,581 Turkish, 1,355 Dutch, 560 Japanese, 259 German and 12 Spanish troops, as compared with 1913. The number of civilian passengers amounted to 155,183 in 1914, as against 169,641 in the preceding year, being a decrease of 14,458; while the number of pilgrims, emigrants and convicts was 7,869 in 1914, as compared with 23,846 in 1913, or a decrease of 15,977. In the year 1870, 26,758 civil and military passengers were carried through the canal; in 1880 the number rose to 98,900, in 1890 to 161,352, in 1900 to 202,203, and in 1914 to 391,773, as against 282,235 in 1913.

WAR ON GERMAN TRADE.

In connection with the campaign undertaken by the Board of Trade, on the advice of their Advisory Committee on Commercial Intelligence, to assist British manufacturers and merchants to secure trade formerly in the hands of German or Austro-Hungarian firms, the Board continue to receive a very large number of inquiries for the names of sellers or buyers of articles of which the sources of supply or markets have been interfered with by the war.

Special arrangements have been made in the Commercial Intelligence Branch of the Board of Trade for dealing with these inquiries, and the weekly list of articles (No. 33) which inquirers desire to purchase is ready, and may be obtained by United Kingdom manufacturers and exporters of British goods.

British firms interested as suppliers in any of the goods mentioned should communicate with the Director of the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

Engineering Notes.

Bulgarian Railway Construction.

We publish in another column an official notice by the Bulgarian Government inviting tenders for the construction of four railway lines:—(1) From Radomir, viâ Dupnitza, to Zumaja, with (2) a branch line from Dupnitza to Bobordol, together 90.1 kilometres; (3) from Plevna to Lovetch, 52.5 kilometres; and (4) from Gabrovo to Sevljievo, 29.75 kilometres. Caution money for (1) and (2), 741,000 fr.; for (3), 320,000 fr.; and for (4), 160,000 frs. Specifications, plans, etc., can be obtained at the Direction Générale des Construction, 4, Rue Preslav, Sofia, for the sum of 80 fr. Date, August 30 (N.S.). Tenders to be addressed, for each line separately, to the Direction Générale des Construction.

Roumanian Milling Industry.

The milling industry in Roumania is a thriving and increasing one (writes our Bucharest correspondent), presenting a good opening for British investment in normal times. At present there are in the country 4,902 flour mills, of which 4,749 are in rural districts, 153 being in towns. Of the latter ninety-seven can grind one to six wagons (a wagon of ten tons) in twenty-four hours. They are all fitted with machinery for producing different grades of flour and meal; three of them can produce 200 tons in the twenty-four hours. The combined horse-power developed by 2,577 motor and steam mills is 87,000; 2,325 mills are worked by water or wind.

Cheap Oil.

Prices for raw oil have now reached such a low figure that sales can almost be effected at a loss (says *Engineering*), and the transport, storage and export difficulties are also very discouraging. At a recent meeting of the smaller petroleum producers—those who have not their own refineries—the unsatisfactory position was gone into and several propositions were put forward to alleviate the present situation. It was proposed to form a joint bureau for the sales and to approach the Government with a view to obtaining permission to export raw petroleum. Some reservoirs, it was urged, should also be placed at the disposal of the producers, without refineries, by the State, and credit facilities provided.

Samarkand Trams.

The U.S. Commercial Attaché at Petrograd reports that a Belgian syndicate, which has an important concession for street railway, lighting, and transportation of goods in Samarkand, a city of about 105,000 inhabitants, in Russian Turkestan, is unable to take advantage of its concession on account of financial difficulties due to the war. A representative of the concessionaires in Russia would be glad to get into touch with American capitalists with a view to selling out the concession or securing American partnership therein. The concession is for forty-five years and provides for a complete monopoly of the business of transporting passengers and freight and of electric lighting. It is understood that construction can begin any time, and that about $500,000 would be required for immediate construction purposes. The city will furnish free the land necessary for a central station.

Dongola Irrigation.

The *Sudan Times* states that the irrigation projects which are being carried out in Dongola Province include the cutting of a canal from Abu Fatma to Kereima. A length of four kilometres of this canal, which is three metres wide and two metres deep, has already been dug. It was expected that the canal would be completed about the 10th inst., after which work will begin on an embankment from Abu Fatma to Taba Gabeliya, fourteen miles east of Abu Fatma. Operations will then be transferred to Kerma, where several canals and embankments will be made. It is hoped that by the middle of September all these schemes will have been completed. The work is being done under the supervision of Bimbashi Halkett.

Young Egyptian Engineer.

A correspondent writes: Mr. Aziz Butros, of Sindibees, Kalioubieh, Egypt, who was awarded the degree of Bachelor of Engineering by Sheffield University, has, in addition, obtained the Associateship in Engineering. Dr. W. Ripper, Dean of the Faculty of Applied Science and Professor of Engineering, writes that the work of Mr. Butros "throughout the whole course has been in every way highly satisfactory, and his conduct has been exemplary."

THE DEDEAGATCH RAILWAY.

On August 2 the *Times* correspondent in the Balkan Peninsula sent the following message to his paper from Sofia:—

"The circumstances that a protocol has been signed, as already reported in the *Times*, transferring to Bulgaria the Turkish territory west of the river Maritza, and consequently putting her in possession of the entire railway line to Dedeagatch, may be regarded as practically devoid of political importance.

"Before the outbreak of the European war Bulgaria urged this concession on the part of Turkey as a modification of the treaty of Constantinople, and latterly the pressure put on Bulgaria by the Western Powers with regard to the passage of contraband through Dedeagatch, as well as Turkish interference with her traffic, furnished grounds for a further insistence. Eventually the Turkish Government, notwithstanding considerable opposition in Constantinople, determined to make the concession in the hope of thus establishing friendly relations with a well-armed neighbour whose attitude naturally is of great importance at the present juncture.

"Accordingly the protocol embodying a preliminary arrangement was signed after protracted negotiations. With the discussion of the details difficulties present themselves. The question of the construction of a new railway from Adrianople to join the Kirk Kilisse branch, and thus secure direct communication between Adrianople and Constantinople, the Bulgarian demand for the possession of a zone of three kilometres round the station at Karagatch and a further demand for territory west of the river Tundza have all supervened. This region, which had been offered by Turkey before the meeting of the Conference of Bucharest, in the hope of being allowed to participate in the deliberations, was subsequently refused to the Bulgarian delegates negotiating the Treaty of Constantinople. On the other hand, the Turks, elated by the reports of Russian reverses, are now increasing their terms and are stated to be insisting on political obligations which Bulgaria refuses.

"The German intervention in these negotiations has been of a somewhat gratuitous character. For some time past Germany has been alive to the danger of a Bulgarian advance on Constantinople, and has urged Turkey to make considerably larger concessions. This interference has caused much resentment, even in Young Turk coteries, and apparently led to the assassination of Colonel Leipzig. Whatever the result of the negotiations Bulgaria is resolved not to allow her hands to be tied."

On August 4 the same correspondent stated that "No change had occurred in the relations between Bulgaria and Turkey, and the negotiations were apparently at a standstill"

Last week the Bulgarian Legation in London made the following statement to a representative of Reuter's Agency:—

The Dedeagatch-Sofia Railway, while of the greatest importance to Bulgaria, has no economic value whatever to Turkey By the Treaty of Constantinople, Turkey undertook to grant Bulgaria absolutely free use of the line for ten years, but during the last three or four months Turkey has broken her engagements many times by stopping commercial communication. Bulgaria has repeatedly protested against the conduct of the Turkish authorities. There has been a struggle rather than negotiation between Bulgaria and Turkey on this matter, as was clearly shown when, a fortnight ago, the Bulgarian Government issued a decree stopping all traffic to Turkey.

For the railway concession Bulgaria would never fetter her freedom of action. It is affirmed that, so far as Bulgaria is concerned, the whole business has a purely economic interest, and that it is a matter of secondary importance to Bulgaria to know what hopes or expectations may have induced Turkey to satisfy the Bulgarian claims.

ROYAUME DE BULGARIE.

MINISTERE DES CHEMINS DE FER, POSTES et TELEGRAPHES

Direction Générale de la Construction des Chemins de fer et des Ports.

AVIS.

No. 5565.

Le 31 Août / 13 Septembre, 1915, à 10 heures du matin, il sera procédé au Palais de l'Assemblée Nationale à l'adjudication, sous pli cacheté, de la construction par entreprise générale à forfait des chemins de fer: "Radomir - Doubnitza - Gorna Djoumaya" et de son embranchement "Doubnitza-Bobov-dol" d'une longueur totale de 90.1 kilomètres, "Pleven-Lovetch," d'une longueur de 52.5 klms., et "Gabrovo-Sevlievo," d'une longueur de 29.75 klms.

Les cautionnements qui devront être déposés pour être admis à l'adjudication sont fixés conformément à la Loi sur les entreprises publiques comme suit: leva or 741,000 pour la ligne Radomir-Doubnitza-Gorna Djoumaya et son embranchement Doubnitza-Bobov-dol; leva or 320,000 pour le tronçon Pleven-Lovetch et leva or 160,000 pour celui de Gabrovo-Sevlievo.

Le cahier des charges, les plans et la collection des types pour chacune des lignes susmentionnées, se vendent à la Direction Générale des Constructions, 4, Rue Preslav, au prix de frs. or 80.

Les offres devront être conformes au modèle de soumission et porteront sur chaque ligne séparément et non sur les trois ensemble.

Les plis contenant les offres devront être remis jusqu'au 31 Août, 1915, 10 heures du matin, au plus tard et porteront l'inscription: "Offre pour la construction du chemin de fer..... ....." Les offres faites ap ès cette heure ne seront pas prises en considération.

Near East Markets.

BULGARIA'S CROP EXPORTS.

(From Our Own Correspondent.)

Sofia, July 27.

Now that the harvest is being collected, steps will have to be taken to ensure routes for its export. Statistics show that 250,000 tons of maize and 150,000 tons of barley are still held here from last year, as well as several thousand tons of hay and chaff. This year's crops are above the average, but the quantity which can be exported has not been determined, but the minimum is estimated at 750,000 tons of grain. If at present high prices these could be exported a considerable amount of money would enter the country.

The agrarians, being chiefly interested in exports, have approached the Government with a view to increased export facilities, but these, owing to the war, are impossible. The result is that the agrarians, up till now the staunchest adherents of the Government, are beginning to attack it for its policy of neutrality. They understand that as long as the Dardanelles are closed they will not be able to realise their crops, and that the sooner the Straits are opened the sooner will the harvest be exported. They are, therefore, urging that Bulgaria should aid the Entente Powers and drop her neutrality. The result is an atmosphere distinctly favourable to the Allies, of which advantage will doubtless be taken.

ROUMANIAN GRAIN EXPORTS.

Cabling on August 8 from Bucharest, the *Times* correspondent in the Balkan Peninsula said: "The question of the exportation of cereals to Germany and Austria-Hungary will apparently be settled in consequence of the decision of the Roumanian Government to permit the exportation of wheat as soon as an amount of maize purchased after last year's harvest by the German Government but still detained in this country has been sent beyond the frontier. Of this about 40,000 wagon loads were sold at high prices last year but still await exportation. Last autumn Germany offered as much as £200 a wagon for maize, but the price has now fallen to nearly a third of that figure.

"In any case, the quantity of cereals exported to Central Europe will not be large owing to the difficulty of providing railway wagons. Germany declines to send wagons into Roumania, and is prohibiting the passage of her own wagons over the frontier. The delay caused by loading and unloading at the frontier has reduced the export to small dimensions. The prohibition on the export of wheat and other cereals last year was necessitated by the prospective great rise in the price of bread.

"The all-important problem how to export this year's harvest, together with a considerable remnant of last year's, must remain unsolved till the opening of the Bosphorus and the Dardanelles. Obviously it is the interest of Roumania, whose principal outlets were the Danubian ports, to contribute to this result by all the means in her power. In this case her economic interests are identical with those of Bulgaria, to whom the open roadstead of Dedeagatch offers but slender consolation for the enforced idleness at Varna, Burgas, and the Danubian ports. The opening of the Straits will bring a sudden access of wealth to both countries and immediately decrease the agio of gold, which in Bulgaria is unprecedentedly high By encouraging Bulgaria to make a forward step in this direction Roumania will advance her own economic as well as her political interests."

The Exchange Telegraph reports from Paris that a message has been received from Rome to the effect that discontent prevails in Roumania among agriculturists in consequence of the forbidding of the export of corn, wheat, etc. Last year's unsold crop, plus this year's crop, amount to 600,000 wagons, representing £60,000,000.

The petroleum stock is also considerable. Poverty is great, and the country is threatened with a financial catastrophe. The only remedy would be the forcing of the Dardanelles, which would render exportation possible.

It is believed that M. Bratiano will in the end agree that Roumanian intervention, with a view to hasten the opening of the Dardanelles, is vital to the country's interests. Public feeling is greatly disturbed, and a general rising of the peasantry is feared which would be more redoubtable and disastrous than the uprising of 1907.

PRODUCE REPORT.

London, August 12.

Currants.

Owing to the confirmed reports that the new crop is much smaller than was expected, prices have advanced; the market, however, is quiet. The stock in London on July 31 was 4,239 tons, against 3,597 tons the same period last year.

The Liverpool market is also quiet, and only small business passed this past week in provincial at a slight advance.

Sultanas.

The market is very firm and dearer. The stock in London on July 31 was 2,395 tons, against 3,369 tons the same period last year.

The stock in Liverpool is very small, and is held with the expectation of higher prices.

There has been only a small demand this week, but prices for old, as well as new, crops are firmer.

Seeds.

Linseed is steady, with light offers, and late values are still obtainable, although buyers are not numerous. London-Calcutta spot, 54s. 3d., afloat ditto, Aug.-Sept. sold at 54s., and Sept.-Oct. quoted 55s. Rapeseed is steady, but quiet. Guzerat Aug.-Sept. 56s., and brown Cawnpore 52s. Cotton seed is firm, but a nominal market. Egyptian to London spot, ex lighter, offers at £9 16s. 3d., which price was paid a few days ago for this position. Rangoon beans are steady at £18 per ton. Canary seed remains quiet, with prices practically unchanged.

Oils.

Linseed oil is depressed, and further declined 5s. to 10s. Spot pipes £24, barrels and month £24 10s., Sept.-Dec. £25, and Jan.-April £26 5s. Cotton oil remains firm. Crude spot in pipes £28 15s., refined pale pipes £31, and barrels sweet £36 to £37 as to makes. Rape oil is dull, ordinary brown naked spot £35 to £36, English refined barrels £37 to £39.

Oilcakes.

Cotton cakes: There is only a limited quantity of Egyptian in stock, for which buyers are compelled to pay extreme prices of £7 8s. 9d. to £7 10s., while shippers ask £7 5s. for Nov.-April new crop shipment, to which, however, there is no response English makes quoted at £7 12s. 6d. to £7 15s. per ton. Linseed cake: There is little business passing, and that of a retail description, owing to the prices, which buyers consider prohibitive. Best London-made sells at £11 10s. to £11 12s. 6d. Fine seedy Calcutta for shipment is offered at £11 10s. per ton.

Locust Beans.

The scarcity continues, and what is offered commands full prices of £8 per ton for whole and £8 10s. for kibbled.

Gums.

The market is very quiet, only little business passing at more or less firm prices. Arabic, Turkey, sorts are quoted 40s. to 50s., East India, common to fine, 32s. to 38s.; Myrrh, good to fine, 96s. to 100s.; Tragacanth, first, 380s. to 580s., and low to good sorts 90s. to 130s.

SYRIAN OLIVE OIL.

Writing on May 31, the U.S. Consul-General at Beirut said that locusts have done much harm this year to the olive trees of Syria. This affects the new crop, and prices of olive oil are advancing. First quality now sells at 16 cents and second quality at 15 cents per pound. No third quality of oil is offered for sale, as it is used exclusively in soap manufacture, and soap manufacturers hesitate making soap, as the military authorities will commandeer the soap for the army.

COTTON MARKET.

Liverpool, August 12.

Messrs. Reynolds and Gibson report:—

Egyptian Spot.—There has been an increased demand this week, and good business is reported. After several variations, quotations show an advance of ten points for the week. Sales are estimated at 3,600 bales.

Manchester Report.—This week has proved rather disappointing, and although there is business going through and individual firms here and there are quite satisfied, the general increase in cost of production, followed by a tendency to increase prices, is doubtless restricting business.

COTTON PROSPECTS.

The monthly cotton report of the Alexandria General Produce Association for August is as follows:—

Lower Egypt.—The temperature during July has been very favourable to the crop. Plants have made satisfactory progress, being stronger and better developed than for the same period last year. Flowering is general and in advance in comparison with the last crop, plants having more flowers and bolls. Leaf-worm has been seen in nearly all districts, but owing to steps taken the damage is very small. Boll-worm and pink boll-worm were also reported in all districts, chiefly in the Sharkieth province. Locusts have entirely disappeared. Water has been sufficient except in some parts at tails of canals.

Upper Egypt and Fayoum.—The temperature has been very favourable. Plants look very well and are strong and well developed. Flowering is well advanced, flowers and bolls being in excess of last year. Boll-worm and pink boll-worm reported from all districts. Locusts have not been seen. Water sufficient.

Reuter's Cairo correspondent, in a message dated July 26, says:—The cotton worm, which a few weeks ago manifested itself throughout the country widely and profusely, did no damage to the crop, owing to the favourable weather conditions and the energetic steps taken by all to combat in the past. There is now little fear of any damage being done by the next generation. With regard to the boll-worm, however, it is, of course, too early to make any statement, except that those cultivators who planted their cotton early will be the smallest sufferers from attack.

TOKAR COTTON CROPS.

The *Monthly Journal* of the Sudan Chamber of Commerce publishes the following report received from the National Bank of Egypt, Suakin Branch:—

Crops in cantars of 100 rotles.

1913.	1914.	1915.
112,000	68,000	200,000

53,000	29,000	56,000

This year on about 18,500 feddans Durra and Dukhn were sown.

SUDAN COTTON.

At the meeting of the Council of the British Cotton Growing Association, held at Manchester on August 5, it was stated that the total crop from the Sudan this season will amount to over 24,000 bales, valued at about £300,000. The yields at the Experimental Stations on the Gezira Plain during the past season amounted to over 450 lbs. of lint cotton per acre, which is a very satisfactory result.

COMPANY MEETING.

BIBI EIBAT OIL COMPANY.

Mr. Herbert Allen, presiding at the third ordinary general meeting of this company, held on Tuesday, August 10, at River Plate House, Finsbury Circus, E.C., said they were met to consider the accounts for the year ending March 31, 1915, in which were incorporated the results of the Russian company's operations for the year ending January 13, 1914. The latter showed a net profit of Rs. 150,000, which was applied to the payment of a dividend of 6 per cent. on the shares held by this company in the Russian company, and it was that dividend which was the principal source of this company's income for the year ending March 31, 1915. The equivalent of the Rs. 150,000 just mentioned, taken at what had hitherto been regarded as the normal rate of exchange, was £15,831, and, adding £10,760 received from other sources—principally interest on loans and dividends on investments—their total income for the year under review was £26,591. Their expenses all told were only £3,883, and, after making certain other deductions amounting to £500, there remained a gross profit or surplus of £22,208. The principal set-off against this was £7,000 for the debenture service—namely, £3,695 for interest and £3,305 for redemption—and there was a small loss of £219 on the sale of certain securities which it had been decided to realize. Next, they had considered it wise to earmark a sum of £2,500 for taxes, not knowing at the moment the precise amount that might be called for under this heading, and finally, after the various deductions which he had just mentioned, they were left with a balance to credit of profit and loss account of £15,330. Under the provisions of the articles of association £312 had to be applied to the redemption of income notes, and the balance remaining was £12,176, to which must be added the balance of £2,842 brought forward from the previous year, making together £15,018, which sum the directors, under all circumstances, recommended should be carried forward. He was afraid there must be some little feeling of disappointment that they were not recommending the application of some part of this balance to the payment of a dividend, and no one could regret this more than the directors, who were themselves amongst the largest shareholders. But the directors felt bound, from motives of the most common prudence, to husband the company's present resources to the uttermost in these very disturbing times, when coffers once depleted could scarcely be replenished at any cost. After referring at some length to the company's operations in 1914, to the great strike which took place in the summer of that year, to the price realized for the company's products, to the heavy royalty upon their output exacted by the Russian Government (under which the Government had taken no less than £800,000, whilst the shareholders had received only £130,000), and to the company's interests in the promising new oilfield at Novo Aldi, near Grosny, the Chairman dealt with the financial position of the company, which he regarded as the bright side of the picture. Their capital was very small; shares and debentures together were under £300,000 nominal; their floating liabilities were less than £3,000. Against this they had investments, loans, and cash amounting nominally to £115,000, in addition to their holding of the entire share capital (Rs. 2,500,000, or about £250,000) of the Russian company. Of these resources, something like £50,000 might be regarded as liquid and available for the purposes of their business. As to the future, he could only say that the restoration of but two or three of the wells now under repair would greatly alter the complexion of their affairs, and with their new deep well No. 11 also in production they should speedily be back to the output of 1912 or 1913 and in the enjoyment of reasonable prosperity. The only remaining consideration would then be a continuance of fair prices for their output, and if, in addition to this, they obtained the promised reduction of royalty, their prospects would be still further enhanced.

On the motion of the Chairman, seconded by Mr. Arthur Herbert Wright, the report and accounts were unanimously adopted.

THE BULGARIAN LOAN.

According to Reuter's Agency, the Bulgarian Minister of Finance issued on August 6 the following statement:—

By the terms of the contract for a loan of £20,000,000 concluded with a syndicate of German and Austro-Hungarian banks, the financial group had to announce by August 1, 1915, whether it intended to realise its option regarding the first part of the loan—namely, £10,000,000.

Within the last few days the syndicate announced that it would fulfil its undertakings and take up its option. As the war, however, prevents any public issue, this is postponed for a year or longer after the conclusion of peace.

In the meanwhile the banks receive, against the result of this future issue, £4,800,000 of Treasury bonds to be deposited with them. The Bulgarian State will provide interest for this amount at the rate of 6½ per cent.—that is to say, 1 per cent. above the official German bank rate, plus ⅛ per cent. commission for each three months, which, added to the interest, gives a rate varying between 6½ per cent. and 7 per cent. The Treasury bonds will be paid for at the rate of 81 marks 25 pfennige for 100 frs.

The sum of £3,000,000 owing to the Banque de Paris et des Pays Bas will be paid out of the products of the issue resulting from this first option. As regards the sum of £1,200,000 owing to the Russo-Asiatic Bank, this amount is held at its disposition by the Disconto Gesellschaft, and will be handed over to it as soon as possible after the conclusion of peace.

The *Kolnische Zeitung* states that M. Stoyanoff, the Director of the Bulgarian Public Debt, after the successful conclusion of his negotiations with the banking group, has left Berlin.

AGRICULTURAL BANK OF BULGARIA

(BANQUE AGRICOLE DE BULGARIE).

PRIVILEGED CREDIT ESTABLISHMENT.

ESTABLISHED IN 1864.

CAPITAL (fully paid-up) - - Frs. 45,500,000

COMPANY NOTES.

Egyptian Delta Light Railways.

The directors, in their report for the year ended March 31, state:—

An aggregate of 997 kilometres (say 619.13 miles) were open and working at March 31, 1915, as follows:—Beherah Province, 263 kilometres; Gharbieh Province, 331 kilometres; Charkieh, Dakalieh, and Kalioubieh Provinces, 399 kilometres; Cairo Quarry Lines, 4 kilometres, or a total of 997 kilometres. An additional 2 kilometres of line were opened during the year, and 8 kilometres of the Cairo Quarry Lines were lifted, making a nett reduction of 6 kilometres. The loss on the lifting of this portion of the Cairo Quarry Lines has been borne by construction reserve, as provided for in the modified concession from the Government of Egypt. Immediately on the declaration of war all capital expenditure was stopped, with the exception of that which was absolutely necessary. The construction of the Sah-el-Hagar to Berimbal extension and other contemplated works are for the time being suspended. The gross receipts for the past two years were:—Year ended March 31, 1914, £255,927; March 31, 1915, £195,082. The number of passengers carried during the year was 5,604,766, as compared with 7,319,663 for the previous year.

The gross receipts under the head of coaching traffic were £121,436, as compared with £156,244 for the year ended March 31, 1914, a decrease of £34,808, the average per mile per week being £3 14s. 10d., as compared with £4 17s. 3d.

The number of passengers carried and the receipts from each class during the year were: —First class, 345,672 passengers (£16,533 6s. 7d.); third class, 5,259,094 passengers (£98,949 5s. 9d.); miscellaneous, £5,953 7s., or a total of 5,604,766 passengers (£121,435 19s. 4d.).

The gross receipts from goods traffic were £67,761, as compared with £91,559 for the year ended March 31, 1914, a decrease of £23,798, the tonnage lifted being 599,236 tons, as compared with 968,576, a decrease of 369,340 tons. The falling off in the receipts from the working of the railway is directly attributable to the war. The total expenditure under the head of working expenses was £141,068, as compared with £154,681 for the previous year. The ratio of actual expenses to gross earnings was 72.31 per cent., as compared with 60.44 per cent. for the year ended March 31, 1914. This increase of percentage is entirely due to the falling off in the gross earnings. The balance of £9,112 3s. 6d., which was reserved and carried to suspense account at March 31, 1914, has been used for the reduction of the gross expenses for the past year, and, further, that credit has been taken for an additional £7,094 12s. 1d. in order to reduce the expenditure for the year under review to 64 per cent. of the gross receipts in the terms of the new concession. This latter sum has been carried to suspense for incorporation in the revenue accounts of subsequent years, when the expenditure falls below the maximum fixed. The strictest economy is being exercised in all departments, and the working expenses have been reduced to the lowest figure consistent with the efficient working of the line. The balance carried to nett revenue account is £70,221 6s. 3d., which, with interest and dividends earned, amounting to £1,655 2s. 7d., the net profits from working the Helouan Line, £3,869 7s. 4d., and the balance brought forward from 1914 of £23,255 1s. 11d. gives a total of £99,000 18s. 1d. to be dealt with. After providing for interest on debentures and all fixed charges, a balance of £58,315 8s. 1d. remains. The board recommend the payment of a dividend of 2½ per cent. on the preference shares for the year ended March 31, 1915, which will absorb £26,019 10s., leaving a balance of £32,295 18s. 1d. to be carried forward. The transfer of the Helouan Railway and its dependencies to the Government of Egypt has not yet been carried into effect; meanwhile, this company has continued with advantage to work the line. H. E. Maurice Cattaui Pasha, Baron Jacques de Menasce, and Mr. W. Pelizaeus, members of the board in Egypt, and who are of German and Austrian nationality, have vacated their seats on the board. It is not proposed to fill these positions.

One of the directors, H. E. Scander Pasha Fahmy, retires by rotation, and, being eligible, offers himself for re-election.

Nile Valley Gold Mining Co.

In present circumstances the Treasury cannot be got to give its sanction to the projected fourth reconstruction of the Nile Valley Gold Mining Company as the Star of Egypt Mines, Ltd. But, for some mysterious reason, it has authorised the offer of £4,000 debentures to the shareholders of the old company. The special terms offered would be tempting (says the *Financial Times*) if one felt any confidence in the property.

Oriental Telephone Shares.

Mr. Justice Eve, in the Chancery Division, has granted an application by Mr. Harry James Oppenheim and others for the appointment of a receiver of £15,000 worth of plaintiff's shares in the Oriental Telephone and Electrical Company, Ltd., held by Mr. Henry Growing, who was the defendant to the proceedings and a former director of the company. His lordship also ordered that the receiver should collect the dividends payable on the shares pending the hearing of the action.

NEW COMPANY

Associated British Manufacturers (Near East), Ltd.

A private company has been registered at Somerset House with the above name, and with a capital of £10,000 in £1 shares. The objects are stated to be to carry on the business of sale and commission agents, representatives of contractors, merchants and manufacturers, general warehousemen, merchants, bankers, traders, and carriers, to import, export, buy, sell, barter, exchange, pledge, make advances upon or otherwise deal in goods, manufacturers, articles, and merchandise, etc. The number of directors is not less than eight nor more than fifteen. The subscribers are provisional directors. Every holder of at least 200 shares may appoint one director. Persons becoming members for first time more than three months after date of incorporation not to have such right unless otherwise resolved by the directors.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.— Gemsah — Production for the week, 163 tons (last week 390 tons). Hurgada—Production for the week, 274 tons (last week 228 tons).

ANGLO-ROUMANIAN.—Production of crude oil for week ending July 31, 251 tons.

BRITISH BURMAH PETROLEUM.—A cablegram has been received from Burmah reporting that the total production of crude oil by this company and the Rangoon Oil Company, Limited, amounted to 59,162 barrels for the month of July.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended July 21 amount to £E4,038, as against £E5,950 for the corresponding period of last year.

Annual ordinary general meeting will be held in Hall No. 43, Winchester House, Old Broad Street, E.C., on August 30.

NATIONAL BANK OF EGYPT.—The Bank has transferred its London Office from 3 and 4, Lothbury, E.C., to 6 and 7, King William Street, London, E.C.

SUEZ CANAL RECEIPTS.—The traffic receipts of the Suez Canal for the 9th inst. amounted to 210,000 frs., against 270,000 frs. for the corresponding day last year.

NATIONAL BANK OF EGYPT.

NOTICE OF REMOVAL.

The National Bank of Egypt has TRANSFERRED its LONDON OFFICE from 3 and 4, Lothbury, E.C., to 6 and 7, KING WILLIAM STREET, London, E.C.

NOTES OF THE WEEK.

The Near East to-day is attracting, if possible, more attention than it did during the Balkan wars. Now that the right moment for the intervention of Roumania and Bulgaria has passed, the Allied Governments and the British public are discovering the advantages that would accrue from the military co-operation of these countries with the Quadruple Entente. For months we have urged in these columns the necessity of taking the settlement of the Balkan question out of the hands of the Balkan Governments. But only a few weeks ago did the Allies address themselves with any show of determination to the task, and it is only as many days since the Press of Great Britain as a whole has counselled dictation to the countries concerned of the terms that alone will bring about the agreement required before the Balkan States can strike a blow in their own interests.

Even at this supreme crisis in the affairs of Europe British diplomacy clung to its traditional policy of *laissez faire*. Reluctance to take any steps that might seem to imply encroachment upon the independence of another State overruled all considerations for the interests of the Allies and of the Balkan countries themselves. The position would have been different if the Balkan Governments had shown any resentment at the prospect of outside interference with the affairs of the Peninsula. In point of fact, they have clamoured for it as loudly as their *amour propre* would allow them. But the Allies preferred to ignore their appeals, and allowed the golden opportunity for the abandonment of Balkan neutrality to pass when the Russians were making their advance across the Carpathians.

At the first sign of an attempt on the part of the Quadruple Entente to deal with the Balkan Question Bulgaria and Serbia, the two States who hold the key to any understanding in the Peninsula, have hastened to meet the Powers half-way. The declaration of Bulgaria's attitude, which the Premier has allowed to be published, is almost unique among official statements in the matter of candour. Bulgaria, he stated, is fully prepared and waiting to enter into the present war the moment absolute guarantees are given her that by so doing she will attain the realization of her national ideals. When the Entente Powers can give the assurance that the territory pledged to Bulgaria after the first Balkan War will be returned to her and her minor claims in Greek Macedonia and elsewhere realized, they will find the Bulgarians ready and waiting to fight for them; but the guarantees must be real and absolute. Dr. Radoslavoff continued that, as Bulgaria could not realize her aspirations by the force of her own arms, she had accepted frankly and openly the offers of both groups of Powers to negotiate to that end. The Entente had asked for her direct participation in the war with the full assistance of the whole Bulgarian Army. The Central Powers had only asked for a continuation of Bulgarian neutrality until the end of the war. "Candidly," he added, significantly, "this latter we are loth to grant. We might, indeed, concede the continuation of our neutrality for a lesser period, but whether we remain neutral or whether we fight, the end to be gained by us and the motives governing our decision remain always the same. We seek only to gain absolute guarantees for the realization of our national ideals. . . . We are prepared for any eventuality. . . . If we are asked to fight alone, we are ready. If we are asked to fight with a new Balkan alliance, our willingness remains the same, but also on the same condition. Give us back Serbian Macedonia is all we ask, and then we will fight in the way we can serve you best."

There is nothing in Dr. Radoslavoff's statement which has not been known for many months past to those who cared to make themselves acquainted with conditions in the Balkans, unless it be the tenour of the negotiations carried on at Sofia with the two groups of Powers. In spite of this fact, however, the diplomacy of the Allies clung to the belief that Bulgaria and Serbia might of their own initiative arrive at some understanding. It forgot that there was no incentive to either country to hasten an agreement. Serbia found herself freed from Austrian aggression, and did not feel the need, as she could hardly contemplate the possibility, of help from Bulgaria. The latter realized that Fate was playing into her hands. She was maintaining the neutrality which the Germans so ardently desired; if ultimately she had to declare herself on the side of the Entente, there was time enough for the step. It required an extraneous force to bring both countries to see that their own in-

Digitized by Google

terests and the welfare of the Balkan Peninsula, with which their interests were inseparably linked, called for a permanent settlement of all questions outstanding between them.

The Serbian Government has issued no statement as categoric as the Bulgarian Premier's in regard to its willingness to accept the intervention of the Quadruple Entente. But when it is remembered that Serbia owes her very existence as an independent State to-day to her Allies, it is difficult to believe that she will interpose any insuperable obstacle to the fulfilment of their wishes. We may admit at once that the adjustment of the points at issue between Serbia and Bulgaria may require skilful handling. The more is the pity that it should have to be effected when every day's delay means the sacrifice of so many more lives on Gallipoli Peninsula. For this reason we hope that no attempt will be made now to determine the actual details of an agreement between the two countries. Bulgaria may press for this course to be pursued; but the interests of the Allies are in the scales against her. It should be enough that she receive the assurances of the Entente Powers that her aspirations will be realized in so far as they conform with the principle of nationality.

The apparent reasonableness of Serbia and Bulgaria coincides with the definite assumption by the Quadruple Entente of its responsibilities in the Balkans. It has also been preceded, however, by a concentration of Austro-German troops in the neighbourhood of Orsova, where they are in a position to threaten both Serbia and Roumania simultaneously. Germany has allowed it to be given out that this column is intended to force a passage through Serbia and Bulgaria for the succour of Turkey, who is no longer at pains to disguise the seriousness for her of the situation at the Dardanelles. An Austro-German concentration against Serbia has been announced once before; it was heralded by a very considerable flourish of trumpets, and, as we know, came to nothing. The position in the Balkans from the German point of view is highly precarious, and it would be entirely in keeping with Germany's tactics to try to intimidate the neutral States by elaborate threats regarding her intentions. For this reason it is quite possible that the reported concentration of troops at Orsova is little more than bluff intended to make good the failure of German diplomacy in the Balkans. On the other hand, the situation in the eastern theatre of the war might prompt Germany to risk the withdrawal of a force for operations in the Balkans in an endeavour to maintain her hold upon Turkey, and at the same time punish Serbia and possibly other Balkan States. It is a possible development which the latter cannot afford to ignore.

There can be little doubt as to the effect upon the Balkan States of any attempt on Germany's part to force a passage through to Turkey. Neutrality would be thrown to the winds, whether agreements had been ratified or not. Both Roumania and Bulgaria would realize that it was no longer a question of the attainment or non-attainment of their national aspirations, but that the maintenance of their independence was at stake. Before the Austro-German forces had penetrated far into Serbia the Balkan League would have been revived in spirit, if not in actual covenant, with Roumania as an additional factor. For this reason we could almost wish to see Germany attempting to send an army to Turkey's relief. But the mere menace, coming as it does in the wake of the Allies' representations, will perhaps suffice to put an end to the present unsatisfactory state of affairs in the Balkan Peninsula.

The domestic affairs of Greece bring her for the moment into the limelight, but it is noticeable that she occupies only a secondary position in any discussion of the Balkan question. M. Venizelos was right when he urged at the beginning of the year that Greece's opportunity had come, and, if not seized, might not return. When the Allied forces established themselves on Gallipoli Peninsula the potential usefulness of Greece had almost entirely disappeared. In the event of a revival of the Balkan League her co-operation would not be without value, but by herself she has no longer any military part to play in the war, and her capacity for driving bargains with the Allies has diminished proportionately.

The personality of M. Venizelos thus becomes the dominant note in the interest taken in current developments in Greece. The action of the Entente Powers in making representations to the Greek Government at the same time as it made them to the Serbian forced the former to bring an indeterminate situation to an end. Parliament was summoned to meet on August 16, and the Ministry was immediately forced into a trial of strength with the Venizelists on the question of the presidency of the Chamber. The Venizelist candidate was elected, and M. Gounaris resigned. At the time of writing M. Venizelos has been invited by King Constantine to form a Ministry, and has asked for four days in order to consider the position. Various reports are current regarding the terms on which M. Venizelos was entrusted with the formation of a new Cabinet. For the present we may reject them all, and await the course of events. Speculation is naturally rife in regard to the attitude which M. Venizelos, if established in power, will adopt towards Greece's participation in the war. One thing is certain, that he will take office unfettered by any views he may have expressed last January, and his policy will be determined by Greece's interests in relation to circumstances as he now finds them. If the value of Greek military support has been materially diminished since he was last in office, the further consideration supplied by the presence of German submarines in Ægean waters will have to be taken into account. The Allies have corrected the balance of naval power in that sea in Greece's favour, and we may be certain that she will not be anxious to run any risk of curtailing Greece's present preponderance over the Turkish Navy by exposing her fleet to submarine attack.

During the past week the Allied forces have continued to gain ground on the Gallipoli Peninsula. The advance need no longer be measured in yards, but can claim to be marked by positions of some little importance in this narrow theatre of war. It is too soon to determine the effects of the additional landings made on the Peninsula; but we may note that, however much the situation may seem to approach to stalemate, the infliction of serious losses almost daily upon the Turks continues to take place. Against the sinking of the Turkish battleship Hairredin Barbarossa by a British submarine has now to be set the loss of the transport Royal Edward, which was conveying nearly 1,400 officers and men as reinforcements for the 29th Division at the Dardanelles. A crew of 220 officers and men brought the ship's complement to nearly 1,600 men. The Royal Edward was sunk by a German submarine in the Ægean Sea on August 14, and only 600 of those on board were saved. It had been hoped that the fresh landings on Gallipoli implied that all the enemy's submarines in those waters had been accounted for. This is clearly not the case, and we must be prepared for fresh delays in the military operations while steps are being taken to deal with yet another submarine.

The despatches received from Vice-Admiral de Robeck and Sir Ian Hamilton, the first of which was published in the *London Gazette* on Monday and the second issued by the Press Bureau on Wednesday, have again given exceptional prominence to the Allies' operations against the Turks. The one received from the Admiral in command reports the landing of the Army on the Gallipoli Peninsula on April 25-26 and the great part taken by the senior service in helping the troops cling to the precarious positions they occupied in the face of a withering fire. The despatch reads like an Homeric epic of brave deeds and dauntless courage in the face of terrible odds, and, together with Sir Ian Hamilton's official account of the Army's *rôle* in those stirring days, published some time since, constitutes one of the most brilliant pages of martial history. More topical, however, because covering more recent operations, is

Digitized by Google

Sir Ian Hamilton's despatch issued by the Press Bureau on Wednesday. The Commander-in-Chief reports that "in the southern zone the situation remained unchanged during the 14th and 15th," but that "in the northern zone the right flank of the Australian and New Zealand Army Corps was heavily attacked during the night of August 14-15." Happily, however, "all attacks were repulsed." Of great interest is the statement that at "Suvla the troops on the left flank made a short advance," because it is the first time that Sir Ian Hamilton makes specific mention of the new landing place in the Anzac zone to the north of the Australians' and New Zealanders' position. The advance was made "to straighten the line," and, in spite of heavy gun and rifle fire from the enemy, the British troops gained some 500 yards. Obviously, therefore, the desired strategic object to the north of Ari Burnu was attained, and our new grip on the Peninsula has been strengthened.

The signing of the protocol between Turkey and Bulgaria providing for the transfer to the latter of the section of the Dedeagatch Railway running on Turkish soil and all territory west of the River Maritza has led to no definite results. Difficulties arose as soon as the details of the agreement came to be fixed, and now it is understood that the Bulgarian Government has recalled its delegates. If Bulgaria acts in accordance with the spirit of Dr. Radoslavoff's declaration, the conclusion of the convention with Turkey is likely to prove a work of supererogation. The change in the Turkish demeanour after the signing of the protocol, which ultimately led to the breaking off of the negotiations, may have supplied the Bulgarians with an additional argument in favour of taking their stand without further delay on the side of the Quadruple Entente.

News has been received of the death of the Sultan of Lahej as a result of a wound received in the recent Turkish attack upon his fortress. Early in July a Turkish force advanced into the hinterland of Aden. The Sultan of Lahej, a loyal chieftain, called upon the Resident at Aden for assistance. The force sent, even when strengthened immediately afterwards, proved unequal to dealing with the Turks, and fell back upon Aden. It was during these operations that the Sultan received his fatal wound.

Talk of a separate peace between Turkey and the Quadruple Entente is said to have been revived in Constantinople. We are not inclined to lay much stress on such rumours; but it is difficult to believe that the Turks will be able to hold out as long as their allies, the Germans. No one impugns the capacity of Turkish troops for fighting when their heart is in it; but with the elimination of the first line it must seem a strange business to the bulk of the reinforcements that causes them to be hurried into the firing line under foreign officers. As soon as Germany's contributions to the Turkish defence are exhausted the process of disillusionment, which must already have begun, will be rapid. The point to be borne in mind now, however, is that sooner or later a separate peace will have to be concluded with the Ottoman Empire, which will be altogether outside the terms of the settlement that have to be forced upon the Central Powers. That peace will have to go beyond the disposal of Turkey in Europe and the future of the Bosphorus and Dardanelles, the questions in which the whole of Europe has a particular interest. It must make provision for the adjustment of Turkey's internal affairs, and for this reason must be the subject of careful inquiry and consideration.

So long as the war lasts the domestic affairs of the Ottoman Empire are virtually a closed book to the outside world. It would be a great mistake to allow a hurried and incomplete settlement to follow the sudden collapse of Turkish resistance in Europe. Reports of the situation in Armenia are beginning to filter through to this country. That a grave state of affairs exists in that province may be inferred from the fact that the German Press has found it necessary to make an elaborate apologia for what has happened, and to seek to discount the reports that must eventually be published abroad. We may not believe all that is said of the doings of the Turks and Germans in Armenia. According to some accounts, the province has been denuded of its Armenian inhabitants. The unhappy population has either been massacred or deported, and the expulsion has been carried out in a manner that leaves little hope of the refugees surviving in the place to which they have been banished. The truth of these reports cannot be ascertained now. It must be a subject for investigation when the war is over, and it is on this ground that the Allies must be on their guard against any hasty peace with Turkey which will leave the question of the subject populations of the Ottoman Empire unsettled.

The Russian line continues to give way before the fierce and sustained attacks of the Austro-German forces. Kovno has fallen, and the advance of the enemy at this point can barely fail to affect the alignment of the whole Russian armies from Riga to Bukovina. But so long as these armies remain for the most part intact, and allow no serious penetration of the enemy between them, our belief in the ultimate capacity of our Allies to hold the German advance remains unshaken. As the Russians fall back they simplify the process of reinforcements, and each week finds them nearer the point when the German superiority in guns and munitions will be overtaken. But these are critical days in the east, and it must add to our disappointment that neither the Allies in the west nor the Italians have been able so far to distract the enemy's attention from his attack on the Russians.

The article upon the situation in Persia which we published last week has led a correspondent, signing himself "Freydoon," to send us for publication a letter, which will be found elsewhere. In the main he agrees with the writer of the article as to the state of affairs existing in Persia at the present time, but he differs from him to some extent regarding the causes that have brought about the admittedly dangerous and unsatisfactory situation; and as to the remedy suggested by "Jamsheed"—the formation of a Coalition Government—"Freydoon" will have nothing to do with it. Both writers, it will be observed, admit the existence of a strong anti-Russian feeling in Persia; but whereas "Jamsheed" is of opinion that there is a danger of this feeling being turned to advantage by the enemies of our Ally—and of ourselves—"Freydoon" is convinced "that not only the Government, but the whole nation, are determined to maintain their neutrality." We hope and believe that the latter view is correct; but with so much combustible material scattered about it is not possible to feel sure that no explosion can possibly take place. We should be glad, therefore, to see even more active steps taken to remove from Persian territory the Austro-German *agents-provocateurs* who are known still to be carrying on their baleful activities.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, August 2.*

Allies' Submarines' Exploits.

Constitution Day was celebrated in Constantinople on July 23. The streets were decorated, and salutes were fired at noon; but the occasion was not marked by the pomp and bluster of former years. It was expected that a general attack on the Allies at the Dardanelles would take place on this day; but the Germans counselled delay owing to unpreparedness, and Enver apparently yielded. In the meantime all available troops and munitions are being despatched from Constantinople to the Dardanelles. At Candilli the private houses that had been occupied by soldiers since November have now all been evacuated. The troops go by train as far as Uzun-Keupru, and munitions are sent by sailing craft to Gallipoli; but a British submarine appears to have sunk two lighters, one of which, it is said, contained wire rope for a net which is being laid at the Dardanelles to entrap the Allies' under-water craft. This submarine also destroyed some lighters alongside the gun wharf, damaged the Quay at Tophaneh, and blew up the steamer Bigha at the pier at Mudania.

The Breslau has been attacked again, and this time her damage is reported to be serious. In fact, some accounts say that she is unfit to go to sea again. She appears to have gone to Eregli, in the Black Sea, to escort some colliers, but was attacked by Russian submarines or torpedo boats; she has serious damage to her bottom, and has entered the floating dock at Stenia, and is now keeping company with the Goeben. Two Turkish torpedo boats appear to have sustained damage from a British submarine.

Coal and Oil Supplies.

In spite of Russian vigilance, steamers carrying coal succeed in reaching the coaling ports in the Black Sea, and are able to load there and return. Last week the Hamidieh escorted four steamers to the Black Sea, and two of them, the Kechan and Patmos have returned safely with their cargoes. There seems to be no prospect of starving Constantinople of coal, and as long as fuel for the mills is obtainable, bread will not be wanting, wheat being abundant and the grain crops this year excellent.

Petroleum also finds its way into Constantinople in small quantities from Roumania in sailing vessels, and the price is now about 60 piastres per tin. The imports of rice and sugar—two important articles in the dietary of the Turk—have apparently ceased, as the price of the former is now twelve piastres and of the latter ten piastres per oke, while sixteen piastres has to be paid for an oke of olive oil. Matches are almost unobtainable and are exceedingly expensive.

Young Turks' Disagreements.

There has been further dissension amongst the Young Turks, and three more members have left the governing clique. Djambulat, one of the most prominent of the Young Turk Party, and Ahmed Nissim are reported to have quarrelled with Enver, and to have left Constantinople. Djemal, who was Minister of Marine, has also fallen out with Enver, and though he was ordered to the Caucasus, he refused to go. Mahmud Moukhtar has been recalled from Berlin, and has been replaced by Hakki Pasha. It is fairly evident now that Colonel von Leipzig was assassinated by a Turkish officer. These and other incidents all tend to confirm the rumours of discontent amongst large numbers of Turks, who are becoming disillusioned; and a crushing defeat at the Dardanelles will, it is hoped, bring about an important change at Constantinople; though the Germans are clearly not going to capitulate without a great struggle.

More German soldiers arrived last week. There is a feverish activity in making munitions, and the works of the Bosphorus Steamship Company at Haskeuy, on the Golden Horn, have now also been converted into a factory for this purpose.

The Turks evidently fear an incursion of Russian submarines, for they are now preparing to place a net at the entrance of the Bosphorus, as they have done at the Dardanelles, and all available buoys from various places are being collected for this contrivance.

Turkish Casualties.

An estimate of the killed and wounded in the Dardanelles campaign is 120,000. Of this number 30,000 have been killed, 15,000 invalided, 45,000 are in hospital, and 30,000 have returned to their regiments. Wounded arrive daily in Constantinople.

Prince Youssouf Izzedin, after visiting the army at the Dardanelles, went to Adrianople to inspect the troops there.

Persecution of Greeks and Armenians.

The reports of the persecution of the Armenians and the Greeks are most appalling. The Armenians in Asia Minor are being forcibly converted to Islam, and those who refuse are massacred. The Greeks are being driven from their houses to find their way—if they are fortunate—to Mytilene and other Greek Islands, but those from the shores of the Marmora are expelled to Asia Minor, the women and children to find refuge wherever they can, while the men are forced to work on roads or otherwise for the military. The fate of these unfortunate people can be better imagined than described.

Mystery of Prisoners.

There is much mystery about the fate of the British prisoners taken at the Dardanelles, and no information on this subject is available. According to the British returns, about 7,000 officers and men are missing in the Gallipoli campaign, but the Turks in their official *communiqués* have only once claimed to have captured prisoners, and that was last week, when it was stated that a few prisoners had been taken.

The *Hilal* has a leading article on the treatment the enemy's wounded receive at the hands of the Turks, compared with the manner in which the Turks are treated by the English and French. The only object of this article is, as usual, to vilify the Allies; but it is interesting to learn from the *Hilal* that the Turkish soldiers are so well disposed to our men as to throw sweets, etc., into their trenches.

Smyrna Quiet.

There seems to be no change whatever in the situation at Smyrna.

Athens, August 7.

Turco-German "Incidents."

The past week appears to have been an uneventful one in Constantinople, and even the newspapers have been less abusive than usual. The most sensational bit of news is that Enver and a German officer quarrelled and came to blows. There appear to be continuous incidents of this kind between Turkish and German officers. Some forty German officers and two hundred artillery men arrived in Constantinople last week, and the new German Ambassador is said to have brought with him over thirty wagons of ammunition!

Incidents of the Fighting.

One night, the batteries at Scutari opened fire on an imaginary submarine in Constantinople harbour, and about fifteen shots were fired, some of which struck Keuprulu Han and other buildings in the vicinity of the Stamboul Railway Station.

A Turkish gunboat has struck one of their own mines and received serious damage, and the Barbarossa, which had been stationed at the Dardanelles, has now been sent to the bottom by a submarine of the Allies.

Thirteen wounded Australian soldiers have arrived in Constantinople, and have been taken to Kadikeui, and there is a continuous arrival of Turkish wounded. Owing to want of accommodation, the slightly wounded are kept in hospital for a few days only, and then sent into the interior.

The Great Fire.

The fire appears to have been one of the most disastrous that has occurred in Constantinople for some time. It broke out on the Monday afternoon at 3 o'clock and burnt until seven the following morning. The number of buildings destroyed is about 1,000, including fifteen large residential flats.

The settlement of losses arising out of these conflagrations is a matter which is causing considerable anxiety to British insurance agents, owing to their inability to pay the claims. A short time ago, one agent refused to pay a loss of £250, and was sued in the Turkish Court. He was condemned to pay, and in order to avoid a sequester being put upon his house he deposited the £250 in court. This money was subsequently seized by the Turkish Government, being enemy funds! Finally, he was obliged to make an arrangement to pay the claim by instalments. This is a proof that the fears entertained that agents' private property would be seized were not groundless.

To give another instance of the arbitrary methods of dealing with foreigners' property, there is a notice in the *Hilal* to the effect that if a certain Mr. Hilton Price, of Kutchuk Pancaldi, does not put in an appearance before July 25, the Court will proceed by default to sell his furniture to pay his rent of £48.

* Delayed in transmission.

Any newsagent or bookstall in the United Kingdom can supply copies of "The Near East," which are on sale early on Friday morning. Should any difficulty be experienced in obtaining the paper, the Manager would be glad to receive a post card giving particulars, and he will take steps to rectify the matter.

NEWS OF SYRIA.

(From a Correspondent.)

Alexandria, August 3.

The Situation at Beyrout.

The U.S. collier Cæsar arrived last week at Alexandria from Beyrout with about 300 passengers, mostly Jews, of whom 150 are French subjects. Although the statements made by the refugees are of a somewhat conflicting nature, all agree on the following points: The economic distress is growing more acute every day, and is aggravated by the lack of proper means of transport. As already stated, the injudicious use of lignite has damaged the railway engines, and the train between Beyrout and Damascus is said to be running now only once a week, while the train between Aleppo and Rayak is performing the journey in not less than three days. On the other hand, the wholesale commandeering of horses, mules, and camels has deprived the country of such means of transport as might have supplemented the disorganised railway service to some extent.

All the reports agree as to the existence of a growing feeling of discontent, even among that section of the Moslem population, as in Nablus, which, on account of its strong sectarian feeling, was expected to remain unshakeably loyal to the Moslem Government, in spite of all its sins and errors. It is difficult, however, to believe that the feeling of discontent will translate itself into open revolt without some kind of organised outside assistance, and the reports of indiscriminate arrests and hangings should be received with caution. Accounts do agree about the fact that several members of the Arab Committee of Reform have been interrogated by the military authorities. The transfer to Aleppo of Bekir Sami Bey, who was on intimate terms with some of the protagonists of the Arab movement, lends a strong colour of verisimilitude to these reports.

The Allies and Syria.

Unfortunately, humanitarian considerations enter but little into great political decisions, especially in such a terrible and distracting war, and one could hardly presume to find fault with the Allies for not having come to the assistance of the Syrians, principally on humanitarian grounds, but for the fact that they have already committed themselves to such a policy to some extent by the frequent demonstrations of their warships and aeroplanes. No purpose could be served—indeed, it would be a positive disservice—by stirring up revolt among a helpless and disarmed population without guarded and careful preparation, strengthened by the conviction of timely co-operation. The cup of bitterness of the population is certainly overflowing. The misery into which the Turks have wantonly plunged them has destroyed every vestige of sympathy that some of the Moslems may have entertained for them at the outbreak of the war, and it needs very little prophetic vision to foresee a general and enthusiastic welcome of the Allies as liberators, should they land.

The exigencies of the political and military situation may bring about such a consummation at no distant date. The country, by all accounts, is practically denuded of troops—at least, of such as could offer any serious resistance. Until the middle or even the latter part of October the weather conditions are such as to allow of uninterrupted landing operations at any point of the exposed coast of Syria. In October the railway that is to connect Southern Palestine with the Sinai Peninsula is expected to be completed. There seems to be no doubt about the pushing of the work of construction under the able and energetic direction of Meissner Pasha. The importance which the German Press has lately been giving to the Suez Canal—a protagonist of German military thought having even discussed the comparative value to England of Calais and the Canal—warrants the belief that the Turco-German threat of a renewed attack in October may not be an idle one. How far, however, the Turks may be able to detach the necessary forces from the Dardanelles, should they not have been forced by then, and how far they may be able to solve the coal problem, are open questions.

In this connection may be mentioned the rumour of the cutting down by the Turks of olive trees for fuel purposes. If this be true, the harm done to the country will be almost irreparable, as most of the olive trees in Palestine are old—some even several hundred years of age.

The Syrian Protestant College.

It is interesting to note the self-assurance that has lately been characterising the actions of the Turkish authorities, a self-assurance certainly fed by German accounts of "glorious" victories and future dreams. Djemal Pasha does not seem to have been satisfied with imposing the compulsory teaching of Turkish upon the American College. He is reported actually to have required this to be the principal language of instruction. Also, as already reported, he demands the exemption of the non-Christian students from attendance at religious exercises. The president of the college, who has become an adept in Oriental diplomacy, is said to have met the order with truly Turkish suavity, and to have promised to lay the matter before the Board of Trustees. Thus, this radical change, if effected, could only come into force the next year, as the present academic year has expired. Meantime, the president is said to have proceeded by the U.S. cruiser Des Moines to Constantinople, to confer with the American Ambassador. It is said that if the Turkish demands be insisted upon the president will not open the college next autumn. One cannot well see how it can be otherwise, when the college is run with American money and by American teachers, to whom Turkish is worse than a dead language. The whole thing, however, seems so absurd that, with all our knowledge of Turkish aberrations, one can hardly lend it credence.

A Serio-Comic Incident.

An incident savouring deliciously of the serio-comic is reported by the last batch of refugees. The anniversary of the proclamation of the Constitution was celebrated at Beyrout with much festive display of colour and light. The Garden of Liberty (Oh, the bitter irony of the name; the anguish of the crushed Nationalist souls still freshly echoes therein!), the adjoining Seraglio, and the Barracks were brilliantly beflagged and illuminated, and conspicuous everywhere were the Turkish and German flags. But, alas! while martial music was alternating with patriotic speeches the inopportune visit of an Allied man-of-war to the harbour was announced, and presently the whirr of a hydroplane was heard overhead. Suddenly the scene of festive brilliance was turned into dark dismay, and even the lights in private houses were ordered at once to be put out. One can imagine the silent rage of the Teuton at this rather rude reminder of Britain's sea power, which, like a fatal serpent, has wound itself round his stiff neck and is slowly but relentlessly throttling him!

The aviator is said to have proceeded to the Lebanon and to have dropped some Egyptian newspapers at places beyond the prying eyes of the Turkish garrisons. The patriarchal residence at Bkerké is said to have received also a good portion of these heaven-sent but death-bearing gifts. *A propos*, the last rumour is that the aged Maronite Patriarch was waiting to get up sufficient strength to proceed to Sofar and meet Djemal Pasha there. This would be a compromise saving patriarchal dignity and prestige, as his Beatitude would not have left Lebanese soil to respond to the call of the Turkish General.

(From a Correspondent.)

Alexandria, August 2.

Beyrout's New Vali.

The new Vali of Beyrout hardly needs any introduction to your readers, for he is the illustrious Azmi, formerly Chief of Police at Constantinople, and lately Governor of Konia, Anatolia. The remarkable incident causing his removal from the former office is well remembered. It was the famous arrest of an alleged criminal on board a Russian steamer and his subsequent "mysterious" disappearance. This arrest, being a violation of the Capitulations, caused Azmi's dismissal. Dismissal in Turkey, however, is not a serious matter. In fact, it is generally advantageous, for the victim is quite generally promoted to a better post. In this instance Azmi was appointed Governor of Konia, and was afterwards transferred elsewhere. His presence at Beyrout at the present juncture is, therefore, not very desirable.

More German Influence.

The influence that German women have lately been exercising, in conjunction with their zealous husbands, in directing the destiny of the Turkish Empire, is becoming more and more conspicuous. Recent reports from Aleppo announce the transfer of its Vali, the ex-Minister Jelal Bey, to Angora. His removal from Aleppo is attributed to a small "disagreement" which the unlucky Governor has had with the wife of Colonel Liman Pasha, who is also stationed there.

THE SUDAN HIGH COURT.

(From a Correspondent.)

It will be just seventeen years on the second of the coming month—September—since the battle of Omdurman settled for all time the political status of the Sudan and the condition of its people. The promise then held out to the latter regarding their future government and the kind of justice that they might thenceforth expect to receive, has been faithfully kept in all particulars. "No attempt will be made to govern your country from Cairo, still less from London. You must look to the Sirdar alone for justice and good government, and I do not doubt that you will have no cause for disappointment." Thus spoke Lord Cromer—the then British Agent in Egypt—when addressing an assembly of notables at Omdurman, on January 5, 1899. From that day to this the work of introducing into the Sudan a judicial system which should in all respects prove suitable to the requirements of the country has known no abatement; from year to year improvements and modifications of the laws—necessarily somewhat experimental in their earlier composition and enactment—have been introduced; the latest Ordinance, adopted and promulgated on May 15 last, was that establishing a High Court of Justice.

It may have seemed somewhat anomalous that the Government, having all along been cognisant of the serious defects caused by the paucity of judges, and of the resultant difficulties in carrying out the administration of justice speedily and satisfactorily, should have hesitated so long in removing this particular cause of reproach. As far back as September, 1906, we find Mr. E. Bonham Carter, C.M.G., then as now the Legal Secretary, writing in his annual report to the Government: "The main defect of the system at present is that the number of judges is insufficient." The anomaly becomes no less striking when it is remembered that to-day the number of judges remains precisely the same—namely, six—including even the Legal Secretary himself when, and if, he chooses to sit.

But while the new Ordinance will not in any way increase the numerical strength of the Sudan judiciary, it will greatly improve the hitherto highly unsatisfactory method of allowing an appeal to be from one judge to another sitting alone. For the first time since the handsome and commodious new law courts of Khartoum have been opened (1908), a full Court will shortly assemble to hear and decide the first of the large number of cases of appeal that are certain to be brought before it; for the Sudanese people are uncommonly litigious, revelling in disputes, often of the most trivial character, as the legal records issued by the Government abundantly prove, thereby reminding one of those lawyers who, as Burton declared in his "Anatomy of Melancholy," were so litigious and busy here on earth that "they would plead their clients' causes hereafter, some of them, in hell."

By the terms of Clause 6 of the new Sudan Ordinance establishing the Court of Appeal, the members of the Court are to consist of the Chief Justice (hitherto known as the Chief Judge) and such other judges as the Governor-General may from time to time appoint, not less than one-half of their number being barristers of the English or Irish Bars or members of the Faculty of Advocates in Scotland, of at least five years' standing. Provision is also made for the possible death, illness, or absence of the Chief Justice, the Governor-General having the power to appoint any fit or proper person of sufficient experience to be acting Chief Justice, or an acting judge of the High Court. Ordinarily, the members of the Court will consist of the Chief Justice and the judges of the High Court, who will sit together. The actual Appeal Court will be constituted by three or more members sitting together and presided over by the senior of them, but provisions may be made by rules of court for the hearing of specified classes of appeals and proceedings by fewer than three members of the Court of Appeal.

Provision has likewise been made for the possible disagreement of the judges in certain cases. There are three forms of procedure open to a divided court: (1) If there be a majority of one opinion, that opinion shall prevail. (2) If the members are equally divided in opinion, and the matter be a final appeal, the appeal shall be dismissed provided that with the consent of the Chief Justice the appeal instead of being dismissed shall be referred to one or more of the other judges of the High Court, and the appeal shall then be decided according to the opinion of the majority of the judges who have heard the appeal and of the judge or judges to whom it has been referred. (3) If the members are equally divided in their opinion and the matter is interlocutory or other than the determination of a final appeal, the opinion of the senior member of the Court shall prevail.

The powers of the Chief Justice are very wide; for it is he who has in his hands the general superintendence and control over the High Court of Justice, and who provides for the formation of the Courts of Appeal and the distribution of business in both the High Court and the Courts of original jurisdiction. At the same time that the High Court was established there was also called into being a subordinate court to be known as the Province Court for each one of the fourteen provinces, such court consisting of a province judge (except in the Province of Khartoum or in any other province where a branch of the High Court may have been established) and district judges, who may be of three grades.

The whole Ordinance consists of 47 clauses and numerous sections and sub-sections. As it stands, it is an undoubted improvement upon the old order of things, great trouble having been taken by its framers to carry out the recommendation of a former Master of the Rolls—Sir George Jessel—who once declared that "the use of a technicality in administering justice is to defeat it." Even as it has long stood with its unquestionable and unquestioned defects, the Sudanese judicial system has shown many improvements and advantages over that of Egypt, where the procedure of the courts always has been and is exceedingly slow. Those who have had any practical experience of litigation conducted in the two adjoining States can but admit that the judicial system adopted in the Sudan presents many points of superiority.

SUDAN OFFICIAL REPORTS.

(From a Correspondent.)

It will be learned with much regret that the Sudan Government has decided not to issue any Official Report for the year 1914. The resolution has no doubt been arrived at on account of the heavy expenses incurred for printing and publishing the two large volumes which now form the comprehensive record of the economic and social progress of our valuable African Protectorate. Commencing with a humble, and even obscure, few pages in the Annual Report on the Finances, Administration and Condition of Egypt, the Sudan gradually ranked as worthy of a separate and distinct report upon its own affairs. By the year 1906 this annual publication had already assumed substantial dimensions, consisting of over 750 pages of very closely printed text and tables. The volume threatening to become unwieldy on account of the large amount of new matter continually being added, it was decided, in 1911, to issue the Report in two volumes instead of in one. The first of the two, a stout book of some 602 pages, contained the whole of the provincial reports made to the Central Government by the Provincial Governors. Included in this volume also were the annual reports of the Department of Agriculture and Forests, of the Forestry Department, the Customs, Education (including the Geological Section and Sudan Government Museum), the Sudan Medical Department, Posts and Telegraphs, Repression of the Slave Trade Department, and the Stores Section. The whole of the second volume was given up to the Memorandum from Lieut.-General Sir Reginald Wingate, and addressed to Field-Marshal the Viscount Kitchener of Khartoum, on the Finances, Administration and Condition of the Sudan.

Although essentially intended for the use of officials, and possibly the Press, the Sudan Report contained a great deal of matter very valuable and interesting to the public. A great mistake, therefore, was made when the altogether prohibitive price of two guineas net was put upon the publication. If it was intended to make the distribution limited, the object must have been achieved in every way, for assuredly few would have felt inclined to expend so considerable a sum upon these handbooks, notwithstanding the large amount of reading matter that they contained.

In the issue of 1913 a further rearrangement of the Sudan Government Report was introduced. The publication still continued to appear in two volumes, but now the first of these was devoted entirely to the Memorandum from the Governor-General to H.B.M.'s Agent at Cairo, while the second and smaller volume was devoted to the Provincial Governors' Reports. The best improvement made, however, was the reduction of the selling price of the two volumes from two guineas the set to three shillings per volume, or, say, six shillings the set. At this figure the public sale advanced, but still, of a necessity, remained small.

Should the war in Europe be still raging, it is doubtful whether any Report for 1915 will see the light; in that case it is not unlikely that the Government might elect to issue a triple Report for the years 1914, 1915, and 1916 combined. It is not, however, very probable that this expedient will have to be resorted to. In the meantime, no doubt the general economic, administrative, and financial condition of the country will be described briefly in the Report on the Finances, Administration and Condition of Egypt, as a supplement to that usually useful publication. The several hundred pounds which will be saved by the Sudan Government by withholding their own Report for last year should prove of some moment, in view of the present condition of the Protectorate's financial condition. This, while in no way serious or even disquieting, needs careful watching and just as careful nursing.

CYPRUS NOTES.

(From a Correspondent.)

Cyprus, July 31.

Petitions for Relief Work.

The local Press continues strenuously to urge the need of relief work under the Public Works Department. Some of the northern parts of the island, including Morphou and the Solea district, are reported to be hard pressed, and in other parts there is much complaint. Strong representations are also made as to the need of larger issues of seed corn on loan. The Government is called upon to keep the Cyprus tithe grain for this purpose, and to import from Egypt sufficient wheat to safeguard a supply of food.

The boatmen of Kyrenia have represented by deputations to the Commissioner the great hardships they are suffering in consequence of the prohibition to export produce to the Greek islands and to Italian ports. They ask for either a relaxation of this order or for relief work on the harbour.

Troödos Convalescent Camp.

The officer in charge at the convalescent camp at Troödos has expressed the warm thanks of the officers and men to all those who have sent gifts to the camp. These were collected through the kind offices of Lady Clauson, who represents the Red Cross in Cyprus. The Australian convalescents have all left, and only British soldiers are now in camp.

Death of the Abbot of Trooditissa.

News of the death from syncope of Epiphanios, the Abbot of the Troöditissa Monastery (July 20) was received with great regret not only by the Greek community, but by all the English who had the pleasure of his acquaintance. The Abbot, who had done much for the monastery during the years in which he held office, was highly esteemed and universally popular. A man of fine presence, good attainments, and very sympathetic character, he always gave a hearty welcome to the numerous visitors for whom the venerable monastery has been a favourite place of resort. It is situate in the depth of the Troödos pine forest, at one of the most picturesque spots, overlooking a deep and well-wooded ravine. Close at hand is a spring of excellent water. The building has been considerably enlarged by the late Abbot, for the accommodation of summer visitors. It was here that Sir Samuel and Lady Baker pitched their camp in 1879, and spent a considerable part of the summer; and Sir Samuel has given an interesting account of the monastery and its inmates at that time.

THE GREEKS IN TURKEY.

A Cyprus correspondent writes, under date of July 31:—The Greek papers devote much space to Hellenic and Balkan news. They recognize the serious dilemma in which the Greek Government is placed. After considerable trimming, and after becoming like the *Nea Heméra* almost anti-Venizelist, they now incline strongly to his view that neutrality will hardly be of advantage to Hellas.

The treatment of Greeks in Turkey is hotly resented. The number expelled from Gallipoli, Derco, and islands of the Marmora, and sent to places inhabited exclusively by Moslems is said to be about 30,000. At Cyzicus, Panormos, Artani, and other localities they have been similarly treated. Prisons are full of Greeks accused of aiding the Allies in various ways. In some places the Turks are stated to have enforced the adoption of Islam. Bashibozouks and other irregulars have been employed. From Vourla Greeks have taken refuge in Chios and Mytilene. According to the *Nea Heméra*, General Liman von Sandars has advised the Porte that it was desirable to expel as far as possible the Greek element from Asia Minor as hostile to Turco-German interests. The alleged formation of a close Turco-Bulgarian League aiming at the exclusion of Greek commerce is also discussed. It is believed that Turkey aims at expelling all Greeks from the Ottoman Empire, with the exception, in some cases, of women, who would be forcibly married to Turks; and also at substituting Turkish for all foreign languages.

THE PUBLISHER
would be obliged if Readers would inform him if they experience any difficulty in obtaining copies of the paper.

ODESSA NOTES.

(From Our Own Correspondent.)

Odessa, July 22.

Black Sea Operations.

The appearance in the field of operations of Russia's first Dreadnought in the Black Sea, the Empress Maria, is now an accomplished fact. Russia's Black Sea fleet is thus placed in a position of commanding strength as against that of Turkey. Meantime the Russian submarines have been much in evidence of late, having proved their usefulness in sinking the enemy's transports, which from time to time still try to maintain communication between the Turkish coaling ports and the capital. The torpedo craft have also just accomplished a good stroke of business in sinking fifty-nine sailing vessels laden with flour intended for the Turkish army.

The Mobilization of Industry.

The course of the war in general on this side has brought home to the Russian Government and people the truth that this is a war of ammunition and of the factories even more than a war of numbers of men. The Russian army is splendid in numbers and in spirit, and given an abundant supply of ammunition, nothing will be able to bar its way. Like her Allies in the West, Russia is now proceeding with the mobilization of her industries, and the enthusiasm with which this has been taken up everywhere bids fair to achieve great results. The Press and people have coined a new motto, "Everything for the Army," and with this as its watchword the nation enters upon the second year of this great war.

In a few days the Duma is to meet, when we are sure to see a great outburst of patriotic feeling, and it will again be made clear to the whole world that Russia's 150 million people are determined to carry on this war, in conjunction with their Allies, until the cause of freedom, justice, and righteousness shall be triumphant all along the line. The ideal is a high one and the path difficult, but the goal is, fortunately, certain.

Russia has, so far, undoubtedly borne the heaviest share of the enemy's onslaught, and one can only hope that the day is not far distant when her French and British Allies will find it possible to take a more active share in the campaign than they have done during the last few months, and by a great, determined, and sustained effort compel the Germans to withdraw part of their enormous forces now operating on the eastern front; for there can be little doubt that Germany has greatly weakened her Western Armies in order to carry on her present vigorous offensive on this side.

OUR MONTENEGRIN ALLIES.

Sir J. Roper Parkington, Consul-General for Montenegro, has received the following official telegram from Cettinje:—

During the last few days the Austrians have shown greatly increased activity on the whole of the frontier, more especially in the Grahovo Gatzko district, and on the Herzegovina borders. In the neighbourhood of the "Bouches de Cattaro" an artillery duel was followed by a determined infantry attack, which was readily repulsed by our troops. The Austrian aeroplanes make daily flights over our entrenchments for reconnaissance purposes.

His Majesty has conferred on the French Minister at Cettinje the military medal for bravery in the field; the gallant Frenchman took a leading part in a desperate encounter with the enemy, and greatly encouraged our soldiers by his presence. The King has recently received in audience a deputation of the leading Catholics from the Scutari district, who desired to express to His Majesty the loyalty of their co-religionists.

SERBIAN LETTER.

(From Our Own Correspondent.)

Nish, July 31.

Minor Operations of War.

We are still in a state of expectancy in Serbia. No important move has as yet been made either on our side or on that of the enemy. At four o'clock in the morning of July 22 three enemy aeroplanes flew over Belgrade, and threw thirteen bombs, wounding twenty persons, six of them severely, of whom three died afterwards from the effects of their wounds. At the time of the occurrence one of our aeroplanes set out from Belgrade to pursue one of the enemy aeroplanes, and overtook it north of Borcha. The fire of a machine gun from our machine drove off the enemy, whose aeroplane, after replying with rifle fire, appeared to descend south of Mogona, in Hungary.

On the same day we undertook an aerial enterprise. Two of our aeroplanes flew over Peter Wardine, an Austrian fortified post on the Danube, opposite the town of Neusatz, in Hungary, and threw six bombs, one falling on the railway station, one on the hangar for storing aeroplanes, and one on the fortifications.

On July 24, between seven and eight o'clock p.m., a weak Serbian division stationed on the bank of the Drina, near the village Shgitareva, crossed the river, and in ambush awaited the arrival of the enemy's reconnoitring party. The latter, although more numerous than the Serbian force, was surprised, beaten, and driven away, losing several men killed and one taken prisoner. Early the next morning the enemy was seen to be endeavouring to fortify the left bank, and was repeatedly driven off.

On July 27 there was feeble cannonading between the Serbian and the enemy's forces near Ritopeck, close to Belgrade, Petka, and Tekié, on the Danube. Serbian artillery fire prevented the enemy fortifying the position at Chetkovza

Proclamation by Crown Prince.

A proclamation to the Army has been issued by Prince Alexander, as Regent and Commander-in-Chief of the Serbian forces. It recalls that one year has elapsed since the present war began, and calls upon the men to be ever ready to offer their blood for the cause of Serbia and of Slavdom.

On August 14 (August 1, Serbian style) a decree will be promulgated setting forth a long list of officers promoted. Amongst the list of promotion of higher officers it is expected that there will be no less than eight new generals, and the present Minister of War will probably be one of them.

American Aid for Serbia.

A volunteer motor-car corps has been equipped and forwarded here from the United States of America. The corps consists of twenty-five students of Columbia University and twenty-five Serbians resident in America, and possesses twenty-five light motor-cars, with all necessaries for field service. It has been placed at the disposal of the Serbian civil and military authorities.

Prisoners of War.

Through the Roumanian Government an arrangement has been made between the Serbian and Austrian Governments for the organisation of postal communication across Roumania for the forwarding of letters and packages for prisoners of war and interned persons in Serbia and Austria-Hungary.

The Russian paper *Novoe Retch* states that 17,000 prisoners of war captured by Russia from the Austrian Army, of Serbian and Slav nationality, will be sent by Russia to Serbia in order that they may assist in agricultural work in this country.

An Extraordinary Storm.

During the last few days the weather has been excessively hot, almost as oppressive as in the torrid zone, and last night came the climax, a sudden and violent storm of hail pouring down with fearful violence, many hailstones of the size of hen's eggs. At Nish most of the houses had many windows broken by the hail; in the parks birds lay dead and dying, horses were lamed and wounded, men who were unable to obtain shelter had cut scalps and bruised limbs, the blood streaming from their wounds. This hail lasted fifteen minutes.

The brewery at Pagodine is manufacturing large supplies of ice for hospitals, butchers, hotels, etc., and the first 10,000 kilos has been received at Nish.

The famous Albanian chief, Akif Pasha, former Cabinet Minister under Prince Wilhelm, who after the retirement of that Prince directed many of the attacks on the Serbian frontier, has been captured by the Serbian army of occupation in Tirana, and is at present interned at Podgoritza, in Montenegro.

Nish, August 7.

The Entente Powers' Representations.

The collective and simultaneous action of the Quadruple Entente Powers at Nish, Sofia, Bucharest, and Athens will probably have a prompt and favourable effect, and the result, whether favourable or unfavourable, will be telegraphically made known to the public in Europe long before this letter reaches its destination. The Serbian Crown Prince, acting as Regent and Commander-in-Chief of the Serbian Army, arrived at Nish to preside at the important Cabinet Councils now taking place in connection with this matter.

The modification of the Bucharest Treaty, so essential to peace and a good understanding between the Balkan States, is not likely to give entire satisfaction to any of them, and least of all to Serbia and Bulgaria, whose views are irreconcilable, and whose conciliation can only be achieved by firm and generous action on the part of the Entente Powers. Furthermore, both Greece and Serbia attach great importance to the retention of those Macedonian territories already in their possession, and it is no easy task, in order to modify the Bucharest Treaty, to discover a *quid pro quo* that would appease the susceptibilities of these two nations.

Should the present negotiations result in an amicable understanding between the Balkan States, we may expect to see the neutral countries of the Balkans entering at once into action. In parliamentary circles it is supposed that the next sitting of the Skuptshina will be convened for the 16th of this month; and it must be borne in mind that, according to the Serbian laws, no cession of Serbian territory can be legally made without the sanction of the Great Skuptshina.

Serbo-Austrian Fighting.

At present only preliminary war demonstrations can be reported on the Serbo-Austrian frontier. According to the Serbian official reports:—

In the morning of the 2nd of this month one of the Serbian batteries at Belgrade had a duel with an enemy howitzer battery at Bezhania on the other side of the River Save on the Hungarian frontier. The correct aim of the Serbian battery was facilitated by means of information obtained from a Serbian aeroplane. Our fire was very effective, and the enemy battery was quickly silenced. During the action two enemy field guns fired fifty-six times at our aeroplane, but without doing any harm.

On the 3rd of this month one of our divisions crossed the River Save to the enemy's territory near the island Ada Tzigania, and after successfully reconnoitring, our division recrossed to Serbian territory, bringing back several prisoners.

On the same day towards evening our artillery near Tekio on the Danube engaged the enemy artillery, which in a short space of time was silenced by us.

At about the same time our artillery stationed lower down on the Danube dispersed a body of enemy troops who had constructed trenches near the railway station at Orsova, on the Danube in Hungary.

Between the 3rd and 4th of this month the enemy opened fire on several points of our territory on the River Save with the object of constructing fortifications under the shelter of their artillery, but the fire from our side rendered any such construction impossible.

Serbia and the Vatican.

It seems that the Austrian Government, whose aim was to make itself the protector of the Catholic Church in the Balkans, is not overpleased with Serbia's relations with the Vatican. An official Austrian *communiqué* of July 22 states that the Vatican had resolved not to have any diplomatic intercourse with Serbia through a representative of the Vatican until the conclusion of the war. This statement is, however, undoubtedly misleading, for since Dr. Michael Gabrilovitch's arrival at Rome he has presented his credentials as Serbian Minister to the Vatican, and the Pope has already accorded him several official audiences.

The above-mentioned Viennese fabrication is a proof of Austria's grief at having suffered the loss of a formidable weapon which she had hoped to wield against Serbia. For in consequence of the new *Concordat*

Digitized by Google

between Serbia and the Holy See Austria is deprived of the religious power she hoped to attain over the Catholics in the new Serbian territories.

News in Brief.

The monks of the monasteries in Serbia have resolved to receive and maintain free of charge a certain number of orphans whose fathers have fallen in the war. As soon as the permission of the Serbian Minister of Public Instruction is obtained the monks will begin to take in the orphans.

It is intended to open agricultural schools at Uskub and Monastir in the new Serbian territories, and thirty students will be provided for at the expense of the State.

According to *Odjek*, fifty soldiers have been sent to Durazzo to form a guard for the Serbian Consulate. In that part of Albania which the Servian troops have occupied a registration of the inhabitants has been made.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, July 26.

Germany and Roumanian Students.

A considerable sensation has been caused by the discovery that Austro-German propagandists have been actively at work amongst the students of Bucharest. Some of these young men having been observed spending money very freely, some professors instituted inquiries, which led to the discovery that the money was supplied by a M. Stoian, nominally a lawyer, but actually a journalist of some notoriety. He, in turn, declared that the money came from the Austro-Hungarian and German legations, and was being distributed to certain students who were willing to spread German propaganda among their fellows. Dr. Thomas Jonescu, Rector of Bucharest University, having instituted an inquiry, the charge was fully proved, and the Senate of the University is now considering what punishment shall be inflicted on the students guilty of such dishonourable conduct. A number of lawyers have petitioned for the removal of M. Stoian's name from the roll, and most of the journalists of Bucharest are doing likewise with regard to the Syndicate of Journalists, of which M. Stoian is a member. The students as a body have issued a manifesto condemning the act of their comrades in the strongest terms, and invoking the aid of students throughout the country in order to raise funds to establish a paper to combat German and Austro-Hungarian propaganda.

A "Ballon d'Essai"?

The *Adeverul* recently announced that M. J. Bratiano, President of the Chamber, had, in the course of an interview with M. Radeff, the Bulgarian Minister, proposed the formation of a Bulgaro-Greco-Roumanian *bloc*, directed principally against Serbia and the Slav cause. M. Radeff, in the *Viitorul*, categorically denies this report, though there was hardly any need to do so in view of what is known of Roumania's policy.

The Question of Munitions for Turkey.

As reported already, the request of Prince Hohenlohe for permission to pass munitions of war through this country to Turkey met with a formal and decided refusal from the Roumanian Government. As one result of this, the Austro-Hungarian authorities are raising all manner of difficulties in the way of the passage of all kinds of goods that are urgently required here. Several hundred trucks of sugar purchased in Austria-Hungary are thus held up at the frontier, and a similar fate has overtaken various other goods, notably part of the coal bought in Germany by the Roumanian Government. As to the latter, perhaps it does not matter much, as the first instalment, which had already been delivered, turns out to be not up to sample, and is being detained while the matter is inquired into.

A local journal has revived the reports that engineers, sailors and officers in large numbers, to say nothing of munitions, were being allowed to pass through into Bulgaria for Turkey. As a matter of fact, the arrangements made by the Ministry for Public Works, which controls the State Railways, and the Ministry of Finance, which directs the Customs, are so elaborate that it would be wonderful indeed if any munitions are smuggled through to Turkey. If such there be, it must be only in quite insignificant quantities. Only a day or two ago, for instance, an Embassy courier arrived at Predeal with some innocent-looking packages supposed to contain cotton-wool, all marked with the familiar Red Cross, and all smelling strongly of disinfectants. Medicated cotton-wool, the courier explained, was much wanted at Constantinople, for the wounded. But a Customs official, impressed by a difference of weight in the packages, opened one and found that it contained shell caps. Of course, confiscation followed. A large number of waggons, said to contain Red Cross material, are now at the frontier undergoing close examination, even the smallest boxes being inspected in accordance with orders. The German authorities fret and fume, but the examination proceeds systematically.

For the Turkish Army.

A large consignment of anti-cholera and anti-typhus serum, destined for the Turkish troops, passed through from Vienna a few days ago, in charge of a Dr. Ghermanis, and was carefully gone through in Bucharest. The doctor, who had been sent to obtain the serum, complained bitterly of the lack of hygiene amongst the Turkish troops. All attempts to introduce any cleanliness, he said, are combated not only by the soldiers, but by their officers also. The result is that sickness of all kinds is terribly prevalent.

A Pro-German Society.

At last a society has been formed which dares to declare openly for the "boches." The Ligue Populaire, as it is called, is a creation of the Austro-German propagandists, formed by the efforts of a former editor of *La Politique*, who has, officially, left M. Marghiloman's journal to take up his new duties. The "Ligue" held a meeting yesterday at the Dacia Hall, at which a motion was carried declaring that Roumania's future depended on a durable and solid friendship with the great German Empire. The "arguments" employed to support this view are too vague and subtle for recapitulation, and frequently bordered on the ludicrous, while the audience was not an imposing one.

A Cloud Burst.

Last Monday there was a violent storm, and between Comarine and Sinaia stations there was a cloud-burst that washed away part of the line. As a result, railway communication was interrupted for two days, and visitors at Sinaia had either to prolong their stay or to pay the exorbitant prices demanded for carriage or motor transport to Comarine. The line has now been restored to working order.

DEFENCE OF BELGRADE.

The Serbian Legation in London has received the following statement from Nish :—

On the 12th inst. we succeeded in silencing the enemy's guns and stopping the work among the fortifications of the enemy near the village of Dobra, on the Danube.

On the same day, near Velico Selo, close to Belgrade, our artillery was engaged with the enemy artillery which has been placed near Lelo Starkchevo. After this the enemy's artillery was silenced, having fired about sixty shells.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

"THE FUTURE OF CYPRUS."

To the Editor of THE NEAR EAST.

Sir,—Owing to the derangement of the postal service in the Mediterranean I have only just received your issue of July 16, and I now beg leave to offer a belated criticism of one statement in Mr. Kenneth Ledward's letter on "The Future of Cyprus." I refer to his assertion that "we have never had cause to regret Mr. Gladstone's action in handing them (the Ionian Islands) over to Greece."

From a naval standpoint, the possession of Corfu by Great Britain during the present war would have been of the first importance, and it might well have formed the base for operations against the enemy in the Adriatic, for which Malta is a distant and awkwardly placed substitute. I can assure Mr. Ledward that the loss of Corfu by Great Britain has been deplored by the Naval War Staffs of at least three Great Powers since the end of July, 1914.

Again, in view of the great and increasing importance of the submarine in modern naval warfare, I must protest against Mr. Ledward's scheme for transferring Cyprus to Greece on sentimental grounds. Greece has already an enormous coast-line, far larger than she can ever hope to police adequately. Are we to give Cyprus into hands already more than occupied elsewhere, and so provide a future enemy with a coast-line for the establishment of secret submarine bases within easy striking distance of the Suez Canal and all that its traffic means to us? A secret submarine base is a very simple affair—it is not necessary to have a natural harbour for the purpose—a thing which has so far not been discovered in Cyprus.—I am, sir,

Yours, etc.,

THE SITUATION IN PERSIA.

To the Editor of THE NEAR EAST.

Sir,—Permit me to say a word or two regarding the article on "The Situation in Persia" by a correspondent, who signs himself "Jamsheed," published in your issue of the 13th inst. In THE NEAR EAST of July 9 you published some "Persian Notes" which appeared to me to give an accurate account of the exact position in Persia. I am able to judge this, as I am in close touch with Persia, and carefully read most of the Persian newspapers. In no Persian paper have I seen an advocacy of Persia fighting on the side of the Germans or the Turks; and from most reliable private information in my possession no responsible person or party, with influence on public opinion, advocates or would think of advocating such measure.

On the other hand, my information unfortunately strongly confirms your correspondent's assertion that there is a widespread animosity against Russia, because, as your correspondent states, the Persians say "Persia has suffered too much at the hands of Russia." It is this very fact of which the German and Turkish propagandists in Persia have taken advantage. Apparently Russia does nothing to counteract this. We all know that, apart from the Russian occupation of certain parts of their country, Persians have had various grievances against Russia, such as collection of Persian revenue by Russian consuls, and similar interferences in the internal affairs which the Persians have considered not only derogatory to their independence, but also an obstacle to the proper administration of the country. It appears that nothing has been done to remove or to mitigate these grievances.

A careful perusal of the Persian Press shows that the cause of the frequent changes of the Persian Cabinets to which your correspondent has referred is their failure to come to some understanding with Russia regarding these matters, the settlement of which public opinion strongly demands. My information and my careful observation of the Persian situation convince me that not only the Government but the whole nation are determined to maintain their neutrality with all means at their disposal. For this very reason since the commencement of the war they have pleaded more strongly than ever for the withdrawal of Russian troops, the presence of which the Turks have represented as the cause of their violation of Persian neutrality. Deep study of the situation leaves no room for doubt that the remedy for this state of affairs would not be the dissolution of Parliament or the formation of a Cabinet such as your correspondent suggests. In the first place, the dissolution of Parliament would cause disturbances throughout the country; and where is the military force which would be necessary to keep order? In the second place, a Cabinet such as your correspondent suggests could not possibly be formed, and, if formed, would have a very short life, as it would be most heterogeneous; for it contains the names of great Persian patriots and Liberals, as well as the names of staunch reactionaries and of men whom Persians consider traitors to their country. Surely the most effective remedy would appear to be the pursuance by Russia of a more liberal policy, with due regard for public feeling and for their aspirations. My conviction is that, had such policy been pursued, Persia would not have seen so many Cabinet crises, and there would have been none of this undue anxiety about German propaganda.—I am, etc.,

FREYDOON.

"IN STRICKEN SERBIA."

To the Editor of THE NEAR EAST.

Sir,—Some centuries ago an Englishman landed at Rouen and saw a red-haired fisherwoman. He wrote home: "French women are red-haired and coarse in appearance." He was in perfect good faith. Similarly, a certain doctor writes recently from Serbia to say: "Such a thing as a bath is unknown in Serbia." This remark, by a stranger, is no wonder; baths, pots, pans, and more precious things are now scarce in Serbia; but the wonder is that this funny *calembour* should find room in your pages. You surely know that the weekly bath was a national institution in Serbia long before it had been introduced into England. There are public baths in every little town, and the daily shower-bath precedes the average Serb's breakfast. In wartime, many things have been upset, but bathing in contaminated rivers has been a source of epidemic. The fond physician who imagines he is introducing the custom of the bath to Serbia merits our tender solicitude.—I am, etc.,

ANNIE CHRISTITCH.

Valjevo, Serbia, July 25.

RED TAPE AGAIN.

To the Editor of THE NEAR EAST.

Sir,—A Christian Syrian, resident in London for the past twenty years, finds it necessary for his business to go to Egypt, via Marseilles. We know that he is under no special restriction here, and that France looks upon Syrians as her "protégés." We know, also, that Syrians are welcome at any time, and were never considered strangers in Egypt, if we do not remember that Syrians gave Egypt her first civilisation, and her later one, too, and also her best men.

Yet, incredible to relate, when this Syrian applies to our authorities for a permit to leave these shores for Alexandria, he is told to get first a permit from the High Commissioner in Egypt to enter! I need not explain further, because neither you nor your readers can give the permit required, and the dullards who withhold it do not understand anything.

The instances of red tape being really too many, I venture to advise the Prime Minister to have a deputy of eminence, like Curzon or Rosebery, to overlook the doings of every department. We cannot afford at this juncture to make mistakes, and it will be no consolation to us to be told afterwards that So-and-so is to blame, and not the Government.—I am, etc.,

ALEXANDER SEFI.

London, August 18, 1915.

NEW BULGARIAN STAMPS.

Mr. Fred J. Melville writes in the *Daily Telegraph*:—A correspondent in Sofia sends me three of the stamps of the pictorial series printed by the new printers, Messrs. Petiti and Co., of Rome. They are the 5, 15, and 30 stotinki, depicting respectively King Ferdinand in white military undress, the River Iskar, and the monument on Mount Rŏla. The original series was engraved in London but printed at the Oficina Calcografica Italiano in Rome, and the stamps were perforated 12. The new stamps are similar in design, but are in new colours and have a different gauge of perforation:—

5 stotinki... Green and brown, perforated 14.
15 stotinki... Myrtle-green, perforated 11½d.
30 stotinki... Black and red-brown, perforated 14.

There is also a new provisional 10 stotinki surcharged in red on the 25 stotinki ultramarine and black. This surcharge appears to have been printed in sheets of 100, and the ninth stamp in the second horizontal row has an error, reading "18" instead of "10."

NEAR EAST BOOKSHELF.

THE OLD ORDER IN EGYPT.*

Egypt in the 'sixties was a very different place from the Egypt of to-day, and Baron de Kusel's volume of reminiscences, extending over the period from 1863 to 1887, comes at a moment when the country, passing into yet another definite period of her history, is attracting a very considerable share of attention throughout the world.
