NOTES OF THE WEEK.

The debate in the House of Commons last Tuesday on the conduct of the war tore away the few remaining tatters of the veil which the Press Censorship has been laboriously holding up before the operations at the Dardanelles. "I will not attempt at this moment," said the Prime Minister, "to attach either praise or blame to this man or that, to this unit or that, but I will say this for myself, that in the whole course of the war, with its ups and downs, I have never sustained a keener disappointment than in the failure of this operation." Lord Charles Beresford was more candid. He recalled statements made by members of the Government about an impending victory on Gallipoli, and added that those who made them "now knew that we should never get through the Dardanelles."

Mr. Asquith's statement regarding the initiation of the Dardanelles campaign was of some interest in view of the belief hitherto current that the responsibility for this ill-starred venture rested almost exclusively on Mr. Churchill. The attack, he declared, "was most carefully considered and developed in consultation between the Admiral on the spot and the War Staff of the Admiralty here. . . . The matter was carefully reviewed over and over again in the War Council . . . and before any shot was fired or any actual step taken it was communicated to and approved by the Cabinet." These revelations distribute the blame more evenly, but make the collective failure to appreciate the true facts of the position only more glaring. When it was shown that the naval expedition had no chance of forcing the Straits alone, it was decided to undertake a joint naval and military attack. In regard to this stage Mr. Asquith had nothing to say about any "full investigation and consultation" which preceded the launching of the combined attack. Sir Ian Hamilton reported that the Vice-Admiral and he were in agreement that a joint naval and military attack was necessary, and "the actual plan of operations was left to the judgment of the commanders on the spot." We know now how much that judgment was at fault, and that one reason was the failure to obtain accurate knowledge of the conditions with which troops on Gallipoli Peninsula would be confronted.

If the blame for the Dardanelles fiasco rests with the naval and military authorities concerned, the Cabinet cannot be exonerated from responsibility for the decision to prolong the fatal venture. Mr. Asquith appealed to the House of Commons, in passing judgment, to consider what would have happened if the renewed attack of last August had not been undertaken. "It is at least probable," he said, "that the Russians, who were then already beginning to retreat before the Germans in Poland, might have had a serious set-back in the Caucasus. In all probability a great attack by the Turks might have been organised against us in Egypt. The Mesopotamia Expedition might have been swept out of existence, and Bulgaria would almost certainly have allied herself with the Central Powers months before the time when she actually did. And during the whole of this time and up to the present moment, do not forget that our force in the Gallipoli Peninsula has held up and is holding up a force of something like 200,000 Turks, and preventing them from doing incalculable mischief in other parts of the Eastern theatre." Even if the only alternative to a suicidal and ill-planned attack on the Dardanelles had been entire inaction on the part of the Allies in the Eastern theatre, we should still be unconvinced by the Prime Minister's rhetoric. As a matter of fact, there were other ways open to the Allies of dealing with both the Turks and the Central Powers without running their heads against a brick wall. If the ignorance of the Allied Governments of conditions in the Balkans and their indifference to the potentialities of the Balkan peoples had not surpassed the ignorance of the military authorities in regard to Gallipoli Peninsula, they would not now be wondering whether the help to be dispatched to Serbia will arrive too late to save that unhappy country.

But to follow Mr. Asquith in his apologia for the failure of British diplomacy is to pass in review the history of the Balkans not only for the last fifteen months, but for many years. Speaking on behalf of the British and Allied Governments, he said that ever since the beginning of the war they had not ceased or slackened in their efforts to promote united action among the Balkan States and Roumania. "The efforts of diplomacy ever since August and September last in that direction have been ceaseless and untiring." The

Digitized by Google

reference to the feverish activity of the Allies' diplomacy during the last two or three months serves to enhance the criminal folly of previous indifference. If efforts were made earlier in the war to promote united action among the Balkan States and Roumania, they failed because they were based on ignorance and were entrusted to incompetent hands. It argued neither knowledge nor common sense to promise Roumania for her neutrality as much as we were able to offer her for her active participation in the war: it did not make for united action among the Balkan States to promise Greece in return for paltry assistance at the Dardanelles a reward large enough to threaten the balance of power in the Balkans and to arouse the jealousy and misgivings of every other State. In a word, the efforts of the Allied Governments were directed along the lines best calculated to produce exactly the opposite results to those desired.

Here we may leave the story of past mistakes and derive what consolation we can from the Government's fresh resolve to make good to Serbia all that she has had to endure. For this decision we have the French Government to thank. From Sir Edward Carson's remarks it has to be inferred that the immediate effect of Greece's defection was to prompt the British Government once more to adopt the policy of "wait and see." General Monro was to be sent to the eastern waters "to try to find out what the situation was as regards the Dardanelles and Egypt and Serbia and all the other parts in the eastern theatre of the war." If the German Press, which has a knack of finding out some of the Allies' intentions, is to be believed, there was at one time a thought of relieving Serbia by means of an advance on Constantinople from Asia Minor—a combined movement on the part of the Mesopotamia Force and a new expedition to be landed at Alexandretta. The degree of relief that such a movement would bring to the hard-pressed Serbian Army can be learned from a glance at the map. If such a scheme were entertained anywhere for a moment, it was not likely to survive General Joffre's visit to London. Long before the Asia Minor expedition could have been under way, the whole of Serbia must have been overrun by the enemy, with results far more disastrous to the Serbian nation than the Belgians have suffered in similar circumstances. As things are to-day, thanks to the wonderful vitality and élan of the Serbians, they are able to derive no little encouragement from the presence of even a small Allied force on the southern frontier. That force is now in process of being strengthened, and its advance must tend to rob the Bulgarians of some of the confidence they would otherwise derive from their rapid progress in Serbian territory.

So far the invading forces of the Central Powers and the Bulgarians have experienced few, if any, effective checks. Nearly everywhere their advance has been stubbornly contested, but the only course open to the Serbians in the face of superior numbers has been to carry out a steady withdrawal, while inflicting as heavy losses as possible on the enemy. In some cases, notably at the capture of Kragujevatz, the punishment inflicted by the Serbians has been particularly severe. The fight for that town is said to have lasted four days, and the Austro-German forces were only able to advance to a general attack when they had received considerable reinforcements. But the heroism of the Serbian soldier has not succeeded in relieving the pressure on the main army, which, it must be inferred, is now distributed between Kragujevatz and Nish. Any slowness in the Austro-German advance from the north is compensated by the rapid movements of the western force, which is reported to have occupied Tchatchak on the railway bearing that name, and must now form the right wing of the Austro-German line. The main Bulgarian advance approaches nearer and nearer to Nish from the east and south, and the abandonment of that town will mean that the enemy are in possession of through railway communication to Constantinople, save for such parts of the line as the Serbians have destroyed. From Uskub the Bulgarians have turned south towards Monastir; but it is difficult to believe that this force will be able to effect much, if adequate reinforcements reach the Franco-British troops now in the Vardar valley near Krivolak.

Until the effect of the operations now decided upon by the French and British Governments has had time to make itself felt, the fate of the Serbians will be followed in this country with increasing anxiety from day to day. Nothing in Mr. Asquith's statement to the House of Commons justified the hope that the military authorities counted upon being able to arrest the enemy's advance before the greater part of Serbia had passed into their hands. The new pledge given to the Serbians brackets their cause with that of the Belgians, and they have the assurance that no peace will be ratified which does not make provision for the restoration of the whole of their country. If the bombardment of the southern and eastern coasts is to be followed up in a practical manner, we shall hope to hear that before many wagon-loads of German munitions have passed through Bulgaria to Constantinople the Allied forces have been able to isolate Turkey from Bulgaria. But from that stage to the freeing of Serbian soil from the enemy's presence may prove a long step, and it requires no effort of the imagination to depict the sufferings of the unhappy people who may have been unable to find safety in flight.

In a graphic account of the final exodus from Belgrade our Correspondent in Serbia tells of the early horrors that overtook the population, the fire of the Austro-German artillery being directed by aeroplanes on to the masses of fugitives thronging the roads leading from the town. Statements from other sources confirm what was only to be expected, that neither the Austro-Germans nor the Bulgarian forces are showing much mercy to the inhabitants of the districts they capture. It is, therefore, probably no exaggeration to say, as the appeal of the Southern Slav Committee to the British nation states, that "the plain purpose of the invasion of Serbia by German, Austrian, Magyar, and Bulgarian troops is to destroy and remove her from the face of the earth as a State and as a nation." But that purpose will not be fulfilled.

The section of the Greek Press which seeks to justify Greece's action at the present time is doing no service to the country or the Cabinet. King Constantine's attitude was not heroic, but it could be defended from one point of view. It was a frank avowal of fear, based on the contention that the Greek army was no match for the Bulgarians, even with the support that the Serbians might detach from the forces engaged with the enemy on the north and west. This view was probably sound, and King Constantine, rather than risk his popularity with his people by suffering a reverse at the hands of the Bulgarians, preferred to follow a course which, he argued, would not trouble his people over much. As a matter of fact his abandonment of Serbia has proved a bitter blow to many of his subjects in Greece and to all Greeks domiciled abroad. But as the army shares the view of its Commander-in-Chief, the party headed by M. Venizelos finds itself powerless to reverse the decision which the King has imposed upon his Government. It continues to urge intervention, and waits for the turn of the tide in the military situation which will remove the fears of the Greek General Staff.

When, however, part of the Press undertakes to show that Greece is acting according to the highest principles, it is soon out of its depth. It is contended that the Treaty of Alliance with Serbia was rendered null and void owing to the willingness of the Serbian Government to cede territory which it had promised Greece that it would not surrender to a third party. But for a long time the main reason that prevented Serbia from acceding to the appeal of the Entente Powers to see

Digitized by Google

that justice was done to Bulgaria was her resolve to do nothing that would jeopardise the alliance with Greece. When finally she agreed to part with the territory in question it was clearly on the understanding that Greece herself would be a party to the transfer. Much is made also of the determination of the Allied Powers to cede Greek territory to Bulgaria. But the Greek Press finds it difficult to support the betrayal of Serbia without running the risk of seeming to hold a brief for Bulgaria and Turkey, and at this point it abruptly abandons the line of argument and generally takes refuge in the glorification of King Constantine, who can be relied upon to gain the victory for "a policy exclusively Hellenic." The phrase may attain a notoriety which the author did not intend.

In the course of an interesting and forceful letter on the duty of the Entente Powers to Serbia (see page 10), Sir Arthur Evans records what he rightly terms an illuminating fact regarding Greece's "unqualifiable desertion." While the question of Bulgarian mobilization, with all its consequences, was still in the balance, he states, the German envoy, Baron von Falkenhayn, arrived at Sofia from Athens with the assurance that no counter-mobilization would take place in Greece, and that if such were attempted the services of M. Venizelos would be dispensed with. M. Venizelos proved strong enought to defeat the first part of this calculation, and the decree of mobilization was signed by King Constantine. Tsar Ferdinand indeed bitterly complained that he had been deceived by his German advisers. But the enforced resignation of M. Venizelos followed. The Germans, after all, had reckoned rightly on their Athenian tools. If the facts are as Sir Arthur Evans records them, they point to carefully arranged collusion between King Constantine and Germany. On the whole, however, in view of the freedom with which the Allies are allowed to land in Greece, it seems more probable that the German envoy was lucky in one out of two assertions intended to bluff King Ferdinand of Bulgaria. King Constantine can hardly persuade himself that his particular form of neutrality is altogether pleasing to the Germans. He may even be contemplating an ultimate declaration in favour of the Quadruple Entente, but in the meantime remains indifferent to the opinion formed of him by the world at large, so long as he does not have to face his subjects after a military reverse. On a vote of confidence the Zaimis Cabinet has now been defeated, but it is impossible at the moment of going to press to say whether the King will once more call M. Venizelos to power or will trust to his being defeated at a fresh general election.

In the course of his laudatory remarks on the Mesopotamia campaign, Mr. Asquith stated that General Nixon's force was now "within a measurable distance of Baghdad." Until more definite information is forthcoming we shall perhaps do well not to strain the Premier's phrase unduly. The last rout of the Turks took place at a spot some two hundred miles by river from Baghdad and only about half that distance as the crow flies. There was no place for the fleeing enemy to attempt to stand between there and Baghdad, and there was no reason why the British force should not press on after them. Some anxiety has been felt lest the occupation of Baghdad by our troops should offend Mohammedan religious sentiment. In a letter to *The Times* Sir Thomas Holdich challenges this view. In India, he points out, only the frontier tribesman under the immediate influence of his Mullah is likely to regard the Turk as "holy." To the Moslems of Mesopotamia and Persia the occupation would be welcome, as Baghdad is an important centre on the pilgrim route to Kerbela and Mecca, and it is to their interest to see the present Turkish régime replaced by the law and order attending British administration.

Sir Thomas Holdich's opinion finds support in the fact that an improvement in the situation in Persia coincides with the approach of the British expedition to Baghdad. There is probably no direct connection between the two incidents; but if the occupation of Baghdad were likely to cause anything approaching widespread resentment in the Mohammedan world, some use would be made of it in order to work upon the feelings of the Persians. But both from northern and southern Persia more favourable reports have been received. The presence of large numbers of Russian troops at Kazvin is said to have exercized a good effect, and from the fact that the British occupation of Bushire is reported to be at an end we may infer that similar results have ensued from the landing of an Anglo-Indian force at that port. "As the Persian Government has now taken steps to ensure the security of British interests and the maintenance of order, the occupation was terminated by mutual consent on October 16." The wording of the announcement argues more rapid movement on Persia's part than might have been expected from the conditions of the country at any time during the last few years, and we must hope that the progress indicated will be maintained.

Any optimism regarding conditions in Persia which may be felt in British or Russian circles has not prevented the Petrograd Government from sending a significant warning to Teheran. The Persian Government has been informed that, if the rumours of the conclusion of a special agreement between Persia on the one hand and Germany and Turkey on the other are confirmed, the Anglo-Russian Convention, which is based on the principle of the maintenance of the integrity and independence of Persia, will at once lapse. The warning is, no doubt, needed; but it will be more effective if it is supported by such personal advice and help on the part of the British and Russian representatives at Teheran as will enable the Persian Government to withstand and counter German intrigues. The Allied Governments have in the history of the Balkans a warning of the consequences arising from the failure to establish sympathetic connection between a Minister and the Government to which he is accredited. There will be no excuse for allowing the mistake to be repeated in Persia.

Egypt is to have another conspiracy trial; but the fact, in spite of the fond beliefs of the German Press, does not imply any deep-seated or widespread uneasiness among the people. It will be difficult to eradicate, either by education or by other means, the material on which Turkish and German agents batten in Egypt, and so long as the latter consider it worth while to compromise a few foolish people, these trials must be expected. A point, however, has been reached when it may be worth while considering whether leniency in dealing with these agents' victims is not a mistaken policy. On the ground that the real culprits are the principals and that all the others have been led away for the most part without realizing their position, the Administration has been inclined to let the latter off lightly. Not improbably the principals have made use of this fact to extend their machinations by pointing out that the danger incurred is insignificant.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 19.

"Our Day" in Egypt.

The High Commissioner, accompanied by the Residency staff, returned to Cairo for the winter season on Friday last. His departure from Alexandria and arrival in the capital were quite unofficial, but there was a representative gathering of higher Government officials and notables at the station here to greet his Excellency.

The day before he left Alexandria Sir Henry McMahon presided over a great public meeting held for the purpose of considering Lord Lansdowne's appeal for funds in aid of the British Red Cross and Order of St. John. The greatest enthusiasm was displayed at the meeting, and on the High Commissioner's suggestion it was decided to fix "Our Day" for the 30th inst. instead of the 21st inst., as at Home, the reason for the alteration being that the earlier date falls in the middle of the Biaram feast. In addition, as so many Egypto-Syrian residents had asked to be allowed to help in the arrangements and contribute to the funds, it was agreed that the appeal should be extended to the whole of Egypt instead of being limited to the British community. The most extensive arrangements are being made to ensure the success of the appeal. The programme for Alexandria and other centres has not been published yet, but that for Cairo includes a special concert at the Saidieh Red Cross Hospital, a choral matinée by an Italian choir, and a gala performance at the Kursaal, 50 per cent. of the receipts of which will go to the Fund. In addition, subscription lists and collecting boxes will be exhibited at the clubs and the principal hotels and shops. The various communities have in the past always generously collaborated in all the charitable undertakings that have been organised in the country, and judging by what one hears on all sides, "Our Day" in Egypt should prove to be a splendid success.

The Legislative Assembly.

It appears that, for various reasons, the Legislative Assembly is at present very much in the mind of the powers that be. In the first place, according to the new Organic Law, promulgated in 1913, the Assembly has to meet annually on November 1. Owing to the political situation no meeting has been held since the close of the first session in June, 1914. The suspension of the law in this respect has been effected by special decrees, and if the re-assembly of this body is again to be postponed, as it undoubtedly should be, a fresh decree will have to be promulgated before the end of this month.

There is, however, one point that makes the position somewhat different from that of a year ago. According to the above-mentioned Organic Law, the mandate of one-third of the members expires in January, 1916, when new elections have to take place. The selection of the out-going delegates has to be made by lot in full session, and since no valid decision can be taken by it unless two-thirds at least of its members, excluding those regularly on leave, are present, it follows that no meeting can be held until the lottery formality and the new elections have been accomplished. It is suggested that the Assembly should be convoked for one meeting to permit of the formal drawing of lots, and then be indefinitely prorogued. The objection to this is that the present is not the time when electoral campaigns should be undertaken. But, whilst theoretically this may be correct, in reality little inconvenience would result therefrom, and if it can be arranged, as suggested, for the elections to take place at the legal date, then as soon as the abnormal situation created by the war is at an end the Legislative Assembly will be able to resume its functions, without having to wait until the position of a proportion of its members has been regularised in accordance with the Organic Law.

Payment of Members.

Another question which has arisen is that of the continuation of the payment of the salaries of the members. A year ago (November 6, 1914) I drew attention to this, and expressed the opinion that in view of the necessity in which the Government found itself to curtail its expenditure and of the fact that the Assembly had done no work for seven months "this would appear to be a golden opportunity for the delegates, the majority of whom are well-to-do merchants and landowners, to show their patriotism by renouncing their claim to all or part of their remuneration." As far is is known, none of the delegates has seized this opportunity. One and all have continued to draw their salaries, although they have not done one stroke of work for eighteen months. Of course, they may object that it is not their fault that they have been idle. The whole point, however, reposes in the fact that their remuneration was not accorded them as a "salary" *qua* salary, but as an allowance or indemnity to cover their travelling expenses to and from their villages and their hotel expenses in Cairo during the session. These "salaries" come to the handsome sum of £E20,000 per annum, and since the object for which they were accorded has for the time being disappeared, and the delegates have not, as was at one time hoped, shown public spirit and taken the initiative themselves, the Government would be fully justified in stopping the payment of these allowances until such time as the Assembly resumes the normal course of its duties.

The Khedivial Wakfs' Scandal.

During the past week the trial took place of Ahmed Khairy Pasha, one-time Director of the Khedivial Wakfs and guardian of the Seif-ed-Dine Estate, who is accused of misappropriation of funds belonging to these two institutions. The case had aroused considerable interest owing to the main details, which had been common property for some time past; and the pleadings of the Parquet Substitut, Zaki Bey El Ibrachi, and of defendant's counsel Ibrahim Bey El Helbawi, the celebrated Egyptian lawyer, fully came up to general expectation as regards able exposition of the facts, eloquence, and sensational revelations. I do not propose to enter into details to-day, as all the most important facts were set forth in the series of articles I contributed on the subject to your columns about three months ago. All that I will say is that the proceedings fully confirmed those facts, and revealed the disgraceful and undignified part which the ex-Khedive played in the administration of these and other estates and in the misapplication of their funds. Judgment will not be given until the first week in November, by which time it is expected that the trial of Hussein Pasha Moharrem and others on similar counts—due to start on the 24th inst.—will have been concluded.

HELP FOR PRISONERS IN TURKEY.

Reuter's Agency has received the following communication from the International Red Cross Committee at Geneva dated October 26:—On October 12 the Red Crescent Society at Constantinople informed the International Committee of the Red Cross, Geneva, that as a result of an understanding with the Imperial Ottoman Government all parcels and money for prisoners of war in Turkey must be sent through the Red Crescent Society. The International Committee of the Red Cross therefore advises those desirous of sending parcels or money to prisoners of war in Turkey to address c/o the Ottoman Red Crescent Society. The Christian name, rank, regiment, and place of internment of the prisoner must in every case be clearly given.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, October 15.

The New Cabinet and the Chamber.

The declarations made to the Chamber by M. Zaïmis on Monday last did not throw any further light on the attitude of the new Cabinet, which will adhere strictly to a policy of armed neutrality, in order, as M. Zaïmis said, the better to safeguard the vital interests of the nation. He added that the ulterior policy of the Government would be dictated by events, which the Government would follow with the closest attention. M. Zaïmis did not ask for a vote of confidence, but contented himself with soliciting the support of the nation's representatives.

M. Venizelos's Speech.

Immediately afterwards M. Venizelos delivered a remarkable speech on Greece's foreign policy, which, listened to amid profound silence, created a deep impression. After drawing attention to the unconstitutional manner in which his Cabinet, elected by the majority of the Chamber's votes and the verdict of the people, had been replaced by the present Cabinet, thus depriving Parliament of all real authority and turning it into a mere congress of notables, he stated that he would nevertheless avoid at the present critical moment provoking unnecessary antagonisms and a crisis in the country involving a dissolution of the Chamber and fresh elections. M. Venizelos then set out to show that war with Bulgaria was absolutely inevitable; that it would come, at the outside, in two or three years' time; and that Greece, therefore, quite independently of her engagements towards Serbia, should settle accounts with Bulgaria at once, before that country became any stronger, when it would be too late to fight—for Greece would not then have the friends she has to-day. In her own interests Greece should intervene now and prevent the destruction of Serbia, who helps to maintain Balkan equilibrium. At all costs this equality of forces, established by the Treaty of Bucharest, should be maintained. Inspired with the greatest confidence that victory will rest with the Entente Powers, M. Venizelos spoke of the advantages that would accrue to Greece in that event, and of the dire consequences to her of victory for the Powers of which Bulgaria and Turkey were the allies. In disposing of the fear expressed by the Opposition that Greece, in attacking Bulgaria, might find herself opposed by German and Austrian troops, he pointed out that it would be impossible for these troops, supplied by a single railway line, to penetrate to the south of this new eastern theatre of war, which would be occupied by the Greek Army, by what remained of the Serbian Army, and by the Allied troops, who would come to their aid by way of Salonika.

Compensations for Neutrality.

However, in the event of a policy of neutrality being insisted upon until the end of the war, M. Venizelos advised the Government at least to profit by the valuable services that Greek neutrality rendered to the Central Powers to secure the compensations which the latter stated they were prepared to make, such as an extension of territory in Albania, the Dodecanesos—which concession M. Venizelos regarded as a joke—Doïran, Ghevgheli, etc., and, above all, to demand that the said Powers should guarantee the territorial integrity of Greece, not only during the war, but for ten years afterwards, to give her time to prepare for the duel with Bulgaria, and to obtain their intervention for the exchange of the Greek population of Bulgaria for the Bulgarian population of Greece. Finally, he said that it was of the highest importance that Greece should be permitted to occupy the Doïran-Ghevgheli sector at once, in order to prevent the occupation of this strategic point by Bulgaria. Thus M. Venizelos, in counselling his opponents, sought to be of service to his country, even at the cost of going against his own views. His speech ended with an appeal to the patriotism of the members of the Cabinet, whom he warned to take heed lest they should leave to their successors a smaller Greece than the Greece they had taken over from him. At the conclusion of his speech M. Venizelos was frantically cheered in the Chamber and again outside, where a large crowd waited for his appearance.

M. Theotokis and M. Gounaris protested against M. Venizelos calling the Chamber a "club of notables," and challenged him with a vote of confidence, which he avoided, so as not to create fresh difficulties in the country, although convinced that, in the event of new elections, his party would again be victorious. He contented himself with tacitly tolerating the Government, and he will support the Cabinet in voting the necessary mobilization measures.

M. Venizelos's speech gave rise to lively comments on the part of his opponents, who maintained that, under the pretext of giving advice, his remarks were directed against the King, and that, in exaggerating the danger of a great Bulgaria, M. Venizelos overlooked that of a great Serbia, of twenty million inhabitants. It is hardly necessary to point out the absurdity of this statement, since Serbia is a State that tends to expand towards the North and the Adriatic, whereas the natural expansion of Bulgaria is towards the South and the Ægean.

The War on Serbia.

The attack on Serbia by German and Austrian troops has caused sincere sorrow among the Greeks, who not long ago fought side by side with the Serbs against the Bulgars, and were able to appreciate the qualities of their former allies and admire them. Above all, it is feared that the Austrians will wreak savage vengeance on this heroic little people who have so humiliated the Dual Empire.

Immediately after Bulgaria's first attack upon Serbia, the latter asked the Greek Government, through the intermediary of its Minister at Nish, if it were disposed to come to her aid in conformity with the Treaty of Alliance. The Athens Cabinet replied the following day to the effect that it did not recognise a *casus fœderis*, since Serbia had not been attacked by Bulgaria only on causes arising from the Treaty of Bucharest, but mainly because Bulgaria was the ally of Germany and Austria. Thus the local, Balkan nature of the aggression, which was provided for by the Treaty of Alliance, no longer held good, as it had assumed the character of an incident in the great European War. It was further pointed out that at the present juncture, and unless Serbia were able to co-operate by placing on the same frontier the 150,000 men provided for in the Treaty, the participation of Greece would have dire consequences, while she would not be of any help to her ally; and that it would be better if she preserved her forces intact in order to aid Serbia in some degree by holding up a part of the Bulgarian troops on the Greco-Bulgarian frontier.

On Wednesday M. Passaroff, the Bulgarian Minister, informed the Greek Government that the Serbs having attacked the Bulgarians near Kustendil and Tren, killing seventy and wounding 500, Bulgaria had declared war on Serbia, and asked what would be the attitude of Greece. M. Zaïmis replied frankly that Greece would remain neutral. Thus, when M. Radoslavoff declared, at the commencement of the Bulgarian mobilization, that it had no aggressive aims against either Greece or Serbia, he uttered a half-lie. One now wonders whether he has not lied altogether!

Its Effect in Greece.

The people are deeply grieved at finding themselves unable to help Serbia, and M. Passaroff's assertion that it was the Serbians who attacked the Bulgarians, which is as unjust as it is unreasonable, has caused great indignation. The disembarkation of the Allied troops at Salonika is followed with the deepest interest, in the earnest hope that they may arrive in time. In certain competent quarters it is stated that, on the outbreak of hostilities, Greece occupied the Doïran-Ghevgheli sector, as M. Venizelos had advised. Officially, however, this is denied, though no information is vouchsafed on the subject.

Albeit it is impossible to make any predictions or to say whether the arrival of a large number of Allied troops will encourage Greece to come in, it is quite certain that at present the Government will not move.

Digitized by Google

It is said that an exchange of views has taken place during the last few days between King Constantine and King Ferdinand, and that Germany has guaranteed Greece against any attack by Bulgaria. The anti-Ministerial Press asks why, in these circumstances, Greece does not demobilize, since she has no intention of taking any action, and as she has nothing to fear from Bulgaria? This question will be raised in the Chamber on Monday.

Following on a wish expressed by Serbia to the Greek Government, the two Governments have decided to publish the text of the Treaty of Alliance, and this will probably be done in the course of a few days. The military convention annexed thereto will, however, remain secret.

CYPRUS NOTES.

(From a Correspondent.)

Cyprus, October 16.

The offices of the Chief Secretary have left Mount Troödos, and the High Commissioner, Sir John Clauson, will take the opportunity of visiting a few places during his return journey to Nicosia.

Excavations which are being carried on at Katydata, under the supervision of Mr. Markides, Curator of the Cyprus Museum, are reported to have yielded various objects of considerable scientific value.

The price at which locusts are bought by the Government has been reduced to 1d. the oke. The reason given is that during damp and cold nights much larger quantities of locusts can be caught than before when greater heat prevailed. Villagers have recently brought in great numbers. In one small village locusts to the value of nearly £70 were caught. The local papers argue that the reduction of price is bad policy, and that during the few remaining days in which the pest can be taken before depositing eggs the price should rather be raised. The great object is to destroy as many as possible in order to reduce the swarms that it is feared will hatch out next spring.

CANON MASTERMAN ON THE EASTERN QUESTION.

A course of lectures on Modern European History and the Coming of the Great War is being delivered by Canon J. H. B. Masterman, at the Central Y.M.C.A., Tottenham Court Road. Speaking last week of the Eastern Question, he said that it originated partly in the fact that the Turk, although he had many admirable qualities, could not rule subject races, and partly in the fact that the eyes of Europe, which had been turned westwards when the capture of Constantinople closed the great route to the East, had turned eastwards again on the opening of the Suez Canal. Its latest phase began with the revolt of the provinces of Bosnia and Herzegovina against Turkish rule. Milan, King of Serbia, took part in the struggle, and he would have been badly beaten had not the war broadened out into the Russo-Turkish war. This resulted in the Treaty of San Stefano, creating a big Bulgaria and leaving only fragments of his ancient territory to the Turk. Europe, fearing that the new State would be only a catspaw to Russia, intervened, and Bulgaria was greatly reduced in size. Bosnia and Herzegovina were at the same time handed over to Austria-Hungary to administer. From the material point of view, these provinces were administered well, but there was an entire refusal to recognise the national aspirations of the inhabitants, who were Serbs, and this led to a simmering discontent. The formal annexation of 1909 brought things to a crisis, for so long as the provinces were even nominally part of the Turkish Empire there was still room for Jugoslav aspirations towards a greater Serbia. Moreover, the fact that Hungary had treated Croatia with the most ruthless disregard of its interests and desires naturally made other Serb provinces reluctant to come under direct and complete control. The change from protection to actual annexation was the immediate cause of the trouble that had led to the present war.

In the first half of the nineteenth century the question around which European diplomacy chiefly turned was the Italian question. For the past fifty or sixty years the Eastern Question had taken that central place. Whether the present war would mean the end of the Eastern Question in the same sense as the wars of emancipation had meant the end of the Italian question it was too soon to say, but all who desired the future peace of the world hoped that it might be so.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, October 20.

Persecution of French Subjects.

The news from Constantinople is very meagre, and postal communication, which now takes more time than usual, may be cut off entirely at any time.

The Turkish authorities now appear to have turned their attention to the French subjects in the capital, for it is reported that ten French families were deported to Angora, en route for Changra, at two hours' notice. The names mentioned are Charrier, Toulon, Craft, David, d'Agostini, Dufour, Alger, Bocoq, de Pelletan, and Marechal. The wives and children were sent with the men, which has hitherto not been done in the case of the English, and it is feared that other French families are to be similarly treated.

Huns Still Arriving.

Large numbers of Germans continue to arrive daily in Constantinople—some are workmen and others soldiers, mostly artillerymen. All the munition factories are to be placed entirely under German control, and only Germans will be employed. Turkish recruits continue to arrive, and the private houses in Candilli have been reoccupied.

Regular arrivals of coal from the Black Sea continue, the Nora Hugo Stinnes and another vessel having succeeded last week in evading the Russian fleet.

Visit of Smyrna Notables.

The papers announce the arrival in Constantinople of a delegation of Syrian notables, who intend visiting the troops at the Dardanelles. The party was received with much ceremony; its members have been received by the Sultan. They are visiting different places of interest, and generally much attention is being paid to them. There is no doubt some special object in their visit and in the efforts of the Turks to make themselves so agreeable to them.

Perteb Pasha and his staff have left Smyrna. He has been received in audience by the Sultan, and it is said that he will have command of one of the army corps which will operate with the Bulgarians. The Turkish troops reserved for these operations are stated to number between 150,000 and 200,000 men.

Fresh School Regulations.

The *Hilal* has been publishing the new regulations regarding private schools. There are forty-six articles, and the object is, of course, to make it as difficult as possible for foreigners to establish schools in Turkey. For example, in order to obtain leave to open a school in any particular district the number of residents of the nationality concerned must be sufficient to justify the opening of a school, and leave will only be granted provided that Ottomans in the country of that nationality are also allowed to open schools. The Turkish language must be taught, as well as Turkish history and geography, and in the elementary schools at least four hours must be devoted to the teaching of Turkish.

Parliamentary Clap-trap.

On the reassembling of the Turkish Parliament after a week's adjournment, the President (Halil Bey) expressed his regret at not having been able, through indisposition, to be present at the opening of the session. He indulged in a great deal of high-flown language about the glorious deeds of the Ottoman Army and the future of the Empire, and said that the Turkish nation was prepared to make all necessary sacrifices.

Subsequently Enver Pasha discoursed at great length, but his speech, as can be imagined, is so full of inaccuracies, and such a perversion of the truth from beginning to end, that it is probably undesirable to make any extracts. As an instance of its inaccuracy, he states that the forces so far collected exceed 2,000,000 men, and that this figure includes only the ordinary classes. In spite of this large force, he admits that parts of the Turks' territory have been invaded. A reference that he made to the "invasion of Egypt" was amusing, for he said that the expedition to the Suez Canal last winter resulted in the occupation of the territory necessary for the larger movement to be undertaken later on!

SERBIAN LETTER.

(From Our Own Correspondent.)

Nish, October 14.

Preparing for the Bulgarian Attack.

The expected outbreak of hostilities with Bulgaria has not yet taken place, but everyone here is fully persuaded that, though deferred, it may occur at any moment. Everything indicates that the mobilization and concentration of Bulgarian troops is not intended merely to maintain the "armed neutrality" of a nation whose army would remain passive. So seriously is the situation viewed here that the women-folk and children of well-to-do families have left Nish for other parts of Europe, more sheltered from the probable attacks of the Bulgarians; and the authorities are taking every precaution in connection with the security of the treasures of the State.

German Aeroplanes' Visit.

My last letter reported that two enemy aeroplanes had flown over Nish, had dropped bombs, and had afterwards disappeared in the direction of Bulgaria. Since then two German aeroplanes have been seen, this time approaching from their place of refuge in the neighbourhood of Sofia. They had been discerned by watchful eyes at Pirot, whence Nish received timely notice of their approach, and their arrival was hailed with a vigorous fire from the Serbian artillery stationed on the neighbouring hills. This fire was well aimed, as could be seen by the clouds of smoke which floated at various spots immediately under the enemy aeroplanes; but so extremely high did they fly that it was impossible to reach them.

In the meantime Serbian aeroplanes had started in pursuit, and the enemy evidently considered that he who . . . "runs away may live to fight another day"; for after making a few courses from north to south and from east to west at a prodigious height, followed from afar by our aeroplanes, they went back to the shelter from whence they had come, after throwing only one bomb.

Bulgaria's Attitude.

It may be asked why Bulgaria confines herself to the secret aiding of the enemy, and why she has not yet attacked with her armed forces, as she threatens to do. The answer may be found in the attitude of Greece, who, it is said, will only come to the aid of Serbia if the latter is first attacked by Bulgaria.

Yet so far Bulgaria has played her hand well. She has so acted as to compel Serbia in self-defence to send nearly all her forces to the Bulgarian frontier, and in the meantime the Germanic group has profited by the absence of a sufficiency of Serbian troops on the Austro-Hungarian frontiers, and has attacked Serbia.

As was to be foreseen, it was difficult for Serbia to defend herself at one and the same time against two enemies, one in the North and the other in the South. An urgent call for help was signalled to all Allied countries, and the call has been promptly answered. A first landing of Allied troops has already been effected at Salonika, and more troops are on their way. May not that be also a reason why Bulgaria now hesitates?

The Austro-German Invasion.

At last the Germanic bullies have carried out their threat of again invading Serbia. During the night of the 7th and 8th and on the 9th they crossed the Danube at points near Semendria, using heavy artillery to facilitate the attack. The Serbians, with inferior forces, defended themselves bravely, annihilated the first Germanic detachments, made 200 prisoners, and freed the soil of the enemy.

On the 10th and 11th the Austro-Germans renewed their attack on these points of the Danube, and, after heavy losses and several repulses, they succeeded in getting a firm footing on the banks of the river on the Serbian side. In the meantime Semendria was evacuated by the civil population, and the battle continued to rage. The enemy also advanced on Pozharevaz, where fighting is now going on.

Near Semendria the tide turned in favour of the Serbian troops; the Austro-German troops were defeated, 50 per cent. were killed and left by the fleeing enemy on the battlefield, and Semendria was recovered by the Serbian troops. During those days the enemy also attacked at several points along the Save and the Drin, at all of which points a successful defence has been maintained, the only exception being temporarily the chief town of Serbia.

For three consecutive days Belgrade was bombarded by powerful heavy artillery, firing shells of 24 and 30 centimetres, from a distance beyond the reach of the Serbian batteries, and aided by hundreds of cannon of smaller calibre, which rained shells incessantly on all the Serbian positions and on the town. The parts of the town near the Save, the fortress itself, the buildings in the streets of that neighbourhood on the hill and those in the thoroughfares stretching down to the Danube were in a great part in flames and otherwise destroyed, and many houses in the central part of the town were ruined.

Allied Artillery Success.

Four Austrian monitors attempted to steam up the Save to take part in the bombardment of Belgrade. Two only succeeded. One was sunk by heavy artillery served by the Allied Marines, and another was completely disabled by their accurate shooting.

The enemy's shells fell in great numbers in all parts of the town, the Serbian positions were completely battered, many men serving the big guns were killed or wounded, and the heavy artillery was disabled and rendered useless. Every two or three minutes three hundred enemy guns belched forth fury and death. The inhabitants who sought to flee for refuge fell victims in the roads; the streets and pavements were covered with a sea of blood. It was under cover of this murderous fire that the enemy troops effected a landing at the base of the town.

The Evacuation of Belgrade.

The few Serbian troops defending Belgrade, with the Gendarmery, made at first the best defence they could. By the Save and the Danube, at the fortress end of the town, there was stubborn rifle and hand-to-hand fighting. Foot by foot the enemy had to fight their way up to the central part of the town. The defenders were a thousandfold outnumbered, and fell rapidly. The enemy's cannon continued to play havoc; death and devastation threatened the whole city.

To save the city from utter ruin the Commander of the Serbian troops considered it advisable not to bring into action the small force of reserves at his disposal, and the Serbian troops were ordered to fall back upon positions outside the town. And thus Belgrade passed entirely into the hands of the Germanic forces.

Civilian Refugees.

From the eastern part of the city the inhabitants could not escape, as the only means of egress from that quarter would be across the rivers Save and Danube, so that those who sought to get away from the town could only flee by the western routes, leading to Kragujevatz andSemendria. These routes now became thronged with fugitives, men, women, and children, rich and poor, civilians and military, all huddled together, in thousands, trying to escape from the flames of death and the fear of atrocity. Most of them—nearly all, in fact—were weary travellers on foot, but a few among them had, at enormous expense, procured vehicles to carry them away from destruction. Alas! even here there was no safety. An enemy aeroplane hovered over these roads and signalled to the distant enemy batteries where they should direct their fire, so that beyond the town the roads were barred by the enemy's fire, and hundreds of people trying to escape were killed and hundreds more were wounded. It was a pitiable scene of heartless massacre: death faced the fugitives whilst they advanced, death faced them if they should attempt to return.

I am told, by an eye-witness, of one man, his wife, their two children, and a soldier who had procured a cab for some exorbitant sum, and were fleeing from the city of destruction, when a shell struck the party, wounded the man, and killed the wife, children, cabman, and soldier, and some pedestrians near by.

It is estimated that of the 40,000 inhabitants lately in Belgrade before the bombardment there now remain less than 20,000 souls.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, October 15.

Anniversary of King Carol's Death.

October 10, the anniversary of the death of King Carol, was observed as a day of general mourning, all places of entertainment being closed, and music being prohibited in public places. A special Te Deum was celebrated at Curtea del Argesh, all the members of the Royal family and Cabinet Ministers being present. Upon the whole, the Press was not so enthusiastic as might have been expected regarding the anniversary, which was, indeed, made the occasion for a good many veiled remarks about the suspected German sympathies of the present King. The *Adeverul*, the strongest supporter of the Entente Powers, and the most ardent advocate of action on the part of this country, published a portrait of the late King in his uniform as a German Field-Marshal, with the inscription: "What a Field-Marshal's bâton has cost us." The accompanying article declares that King Carol was always in sympathy with the German idea of extending German power from the North Sea to the heart of India; that he worked continually, though unobtrusively, for that end; and that had he lived longer this country would have been subordinated to Germany. It goes on to say that at one time Roumania had a dream of greatness, and that she might have become once more the great Roumania she was in days gone by; but that the right moment to strike has been allowed to slip away, and that there is now nothing to do but mourn for the country, still Roumania, but soon to be a German province.

Roumania's Difficult Position.

This language, though high-flown, gives no inaccurate impression of the general feeling here to-day. Where, six months ago, one noticed a spirit of warlike enthusiasm, one observes now only signs of discouragement and disgust. Many people feel that the country is being played with, if not sacrificed, by those in power; and the attention paid to those German dignitaries who come and go so frequently can only strengthen this feeling. It was, for instance, a subject of much comment that the very day on which the staffs of the Entente legations at Sofia were in Bucharest was chosen by the King to drive Prince Hohenlohe about the city, the Prince lolling behind, while his Majesty acted as chauffeur.

On the other hand, there are many people who approve of the Prime Minister's waiting game, and believe that he has the country's interests at heart, and that his policy is the right one to follow. Now that Serbia is at war with Bulgaria, Roumania's only road to the outer world is threatened, and until the safety of the railway from Prahovo to Salonika is assured, either by Serbia herself or by the Allied forces now coming to her aid, it is almost impossible for Roumania to throw herself into the struggle. For, while she has now a plentiful supply of ammunition, she dare not begin what might well prove a lengthy campaign without having an open road for obtaining regular supplies.

The Cabinet met yesterday, when the situation produced by Bulgaria's declaration of war was discussed, but so far it is not known if any fresh decision was arrived at. A rumour that mobilization was decided upon is not generally credited, for it is considered that Roumania could best help when the Allied troops in force have reached Serbia.

Audacious German Propaganda.

German propagandists are still active, and, not content to work among the civil population, have had the audacity to attempt to corrupt the army. A large number of soldiers belonging to regiments now stationed along the frontiers have been found to be in possession of copies of the *Ziua* and the *Seara*, papers now "run" by the Germans, and of letters advising the recipients to desert to Austria and making all kinds of tempting promises to those who do so. Happily, the military authorities have discovered the source of corruption, and active steps are being taken to prevent further action of the kind.

"Liveliness" on the Danube.

A number of lighters and tugs have lately been purchased at Galatz, Braila, and Reni by German agents, and it is supposed they were intended for the transport of troops from Hungary to Serbia, though whether they could get up the river past the Serbian shore is doubtful. Four tugs purchased by Bulgaria were to have left by sea for Varna, but, unfortunately for their purchasers, the Greek mobilization was announced, whereupon the crews, being all Greeks, refused to take the road viâ Bulgaria, abandoned the tugs, and left the country by way of Serbia. A Russian gunboat has appeared off Sulina, and the departure of the tugs is, to say the least, uncertain.

Two other tugs, owned by Austrian subjects, were also sold to Bulgaria, and were proceeding towards Sulina when, opposite Reni, on the Russian bank, a gunboat stopped them and conducted them into port. The two craft had cost their new owners nearly half a million francs, so that the bargain is a dear one for them. A protest against their seizure has been lodged, on the ground that the Danube is neutral up to Braila, and under the control of the European Commission of the Danube. The Russians maintain that the tugs were close enough to their shore to come under their jurisdiction; but they add that they will be willing to submit the case to arbitration—after the war.

Greek Reservists Depart, and—

The Greek reservists in Roumania, of whom there are—or were—some seven thousand, responded to the call to arms with an enthusiasm that was in marked contrast to the attitude of the Bulgarians. Whereas the greater part of the latter either answered the call with a very ill will, or answered it not at all, being opposed to the war and its objects, the Greeks showed even greater promptness in leaving than they did at the time of the Balkan war. A few nights ago, when the first large party left Bucharest, a scene of great enthusiasm took place, the railway station being crowded with sympathisers, Greek and Roumanian, bent on giving them a hearty "send off." A procession, carrying Greek and Roumanian flags, escorted the reservists from the Greek Legation, M. Psychas and the Legation staff attending; the Greek national hymn and patriotic songs were sung; and the train left amidst cheers for Greece and Roumania. Similar scenes took place at Tulcea, on the lower Danube, when a steamer conveying the first Greek reservists from Sulina arrived.

Bulgarian Deserters Arrive.

Since the Bulgarian mobilization the numbers of deserters arriving in Roumania are assuming such proportions as to be extremely disquieting to the Bulgarian military authorities. At Calafat no less than 800, with their full equipment, crossed the river, and at many points they continue to arrive in parties large and small, so that it is becoming quite puzzling to the Roumanian authorities to know how to dispose of them. All alike declare their disgust at the action of their Government, and give as their only reason for deserting that they do not wish to fight against Russia.

Persons coming from Bulgaria also describe the extreme feeling against the war felt in various circles, and especially among the reserve officers and non-commissioned officers, who openly express their anger at having to fight on the side against Russia and Great Britain. "It is the end of Bulgaria!" a prefect of one of the principal Bulgarian river towns declared to some persons when they were leaving Bulgaria.

What the actual feeling is in Sofia it is difficult to say, as few Bulgarians or other travellers have lately come from there, the railway service being entirely employed in moving troops; while no one between the ages of seventeen and fifty is allowed to leave the country. A rumour is current of some regiments having shown disaffection and having been disarmed. Whether this is correct it is impossible to say; but it is only what might be expected, if one may judge from the numbers of deserters arriving here. In any case, the war is far from popular.

HELP SERBIA!

IT IS NOT TOO LATE.

By Professor Pavle Popovic.

I have just read the article of Dr. N. Zupanic on "The Strategic Significance of Serbia," which appeared in the current issue of the *Nineteenth Century*. I should very much like to say a few words in connection with this article. Perhaps I am not sufficiently qualified to deal with such a subject, but I think I can lay claim to some knowledge of it. As a literary man, I can discuss with the reader what appears in a review. As a Serb, I may be allowed to comment on subjects which concern my country. Again, during the three last wars in which Serbia was engaged against the Turks, the Bulgars, and the Austrians, I was, as a soldier and a non-commissioned officer, connected with the General Staff of one of the best and most active divisions of the Serbian Army, which fact, I trust, will carry some weight.

Dr. Zupanic explains admirably the great strategical importance of Serbia. He points out that "the issue of the war may perhaps be decided in this country." Why, he asks, have the Germans organised "a simultaneous attack by German, Austrian, Bulgarian, and Turkish forces against so small a country" if it be not because they have seen the important rôle of that country in their dreams of world-conquest?

"Serbia lies across and commands the great natural high-road which connects the East and the West, Asia and Europe," says Dr. Zupanic. As a good historian and geographical expert, he explains that it is through the valleys of Morava and Vardar that all the armies of the world had to pass whenever the West was at grips with the East. As soon as Germany is in possession of the principal railway lines, Belgrade-Salonika and Belgrade-Constantinople, she will be stronger than she has ever been before, and will be a source of the greatest danger to the British Empire. "Germany's domination of Asia Minor," continues our author, "and her organisation of that country, the building of strategical railways through the Turkish dominions in the direction of Egypt and India, would probably make Egypt untenable, and would gravely threaten England's position in India." He then adds: "The control of that railway (Belgrade-Constantinople) will enable Germany to provide herself with raw material, food, and fighting men from the Turks, and it will make it possible for her to send to the Turks all the guns and ammunition, all the manufactures, and all the officers and non-commissioned officers they may need." As a matter of fact, these are two great dangers which are pointed out by Dr. Zupanic. Once in possession of sufficient supplies, Germany will be in a position to prolong the war for seven years if she wants to, and it is certainly not the blockade by Great Britain that will stop her, because, as the writer says, in the case of a German success "the British blockade will be nullified."

The above are the principal points of Dr. Zupanic's very interesting article, the perusal of which I heartily recommend. The reader may ask, however, "Who and what is this Dr. Zupanic, whose name we have never heard before, and who expresses such views? Mr. Hillaire Belloc told us the other day in his admirable study, 'The New Balkan Factor,' in *Land and Water* (October 16), that 'the importance of the German invasion of Serbia' is greatly exaggerated, and that 'the enemy's effort (in Serbia) has mainly a political object.'"

I have no intention of going into a detailed analysis of Mr. Belloc's article. My opinion, however, or rather my conviction, is this. However great a military expert Mr. Belloc may be, and however incompetent in such matters Dr. Zupanic may appear, it is nevertheless the former who is wrong and the latter who is right. I could quote many Englishmen who are of the same opinion as Dr. Zupanic.

As a matter of fact, to help Serbia is more necessary than anything else at the present time. I do not say this simply because Serbia is my country, but because I realise that it affords a means of safeguarding the British Empire. If Serbia is crushed—I am trying to speak dispassionately of the disasters to which my country is exposed—she will be crushed only for a while, to rise again. But if the British Empire lose its strength and its greatness, it will not be able to help Serbia when the hour comes for her revival, and then Serbia will be crushed for ever. The British Empire will never cease to be the last hope of Serbia, even of a defeated Serbia. This is the Serbian idea, and it is evident, therefore, how closely her interests are bound up with those of Great Britain and how intimate is the connection between the Serbian and the British points of view.

Do not delay in coming to Serbia's help! You see how events are shaping in the Balkans. The newspapers announced the other day that Roumania and Greece would be prepared to intervene if the Allies sent 300,000 troops to Serbia's help, and I find this attitude perfectly reasonable. These two States are undoubtedly waiting for effective aid being given by the Allies to Serbia before ranging themselves on their side. Failing this, they will not. How can you expect Roumania, threatened on the south by Bulgaria, on the north by Germany and Austria, and on the west by all three, to expose herself to every possible peril by embracing the cause of the Quadruple Entente when she sees that at the critical moment she may perhaps be abandoned? Greece is held by the same fears, I must admit, while I cannot but blame her for the part she has played. Roumania and Greece are both waiting to see who is going to win. As soon as they see that victory is on the side of the Germans they will turn to that side. Greece, it appears, is already beginning to flirt with our enemies. Roumania may follow her example. There is imminent danger of all the Balkan States, with the exception of Serbia, ranging themselves on the side of our enemies.

If you do not rescue Serbia two misfortunes are in store for the Quadruple Entente. The first is that the Germans will be masters of the great road to Constantinople, and I have already explained what that means. The second, and by no means the lesser, is that the Entente will lose the whole of the Serbian Army, one of the best in the world, and one which the Allies have every interest in preserving for the future. Do not believe that our enemies will allow the Serbian Army to retreat to the south-west, and that they will be satisfied only with the possession of the coveted route to Constantinople. They will seek utterly to destroy and annihilate the Serbian Army. The Germans have everything to gain by doing so. The Bulgars—and by Bulgars I mean the whole nation, not only King Ferdinand, because they all have the same views, as you may gather from the declaration of the Russian Chargé d'Affaires at Sofia (*vide Birmingham Post*, October 27)—the Bulgars, I say, hate the Serbs to such an extent, and so stubbornly do they cling to the unjust idea that Macedonia rightly belongs to them, that they would themselves, even if the Germans did not wish it, encompass the destruction of the Serbian Army. Austria would do the same—Austria, who is thirsting for vengeance, and whose aim since 1866 has been the annihilation of Serbia and the extermination of the Serbian race. If the Serbian Army, aided by the Allies, manages to preserve its strength, it will one day, at the propitious moment, be able to drive the enemy away from the Belgrade-Constantinople and Belgrade-Salonika routes. But if it is destroyed, the Germans will keep those routes for ever. Try, therefore, to preserve the Serbian Army, because it is the only guarantee for a better future if the present should be lost.

You will say, "It is too late," and will quote Lord Lansdowne, who said a few days ago that "it is highly improbable that the Serbian Army will be able to withstand." No! It is not too late. It is not late at all. If you begin by thinking that it is too late, then certainly the campaign will be lost. But if you try to remedy matters, if you take some risks, then the campaign is not lost. A general should never anticipate defeat, but always believe in victory. How many times in our late wars have I not seen my division in extreme danger, in positions from which there was apparently no escape; but gradually the situation became clearer, the danger less, and we ended by being triumphant where we seemed doomed to certain defeat. Why? Because the commanding officers never lost their belief in victory, and concentrated all their energies on winning. That is how victories are won, not by resigning oneself to failure at the start.

It is not too late to help Serbia. The situation is beyond doubt very serious, but it is far from being desperate. My compatriots will continue to fight like lions if you send them the necessary help. Doubtless you follow day by day the account of the Serbian campaign? Those who have any experience at all of war must marvel at the inflexible resistance offered by the Serbian army to a vastly superior enemy. During the Austrian invasion last November the Serbian army simply evacuated Belgrade; to-day it has continued the fighting even in the streets of the city. Have you any idea of what that means? You must realise that the Serbian army is determined to defend each stone of its country, and that it shows no trace whatever of demoralisation, whilst any other army in the same circumstances would be completely demoralised. Can you realise the significance of the recapture of Veles, of Pirot, and of other positions which have been taken by the Bulgarians, or the fact that the Germans have, up to the present, made no notable progress in the north, though they began the campaign more than a month ago? Why, the Serbian army is showing signs of a vitality which is without precedent. This is the best proof that, however small the aid sent, the army can reconquer all that the Germans and Bulgars have so far taken, and drive the enemy from the country, as it did last year!

You do not know the worth of the Serbian army. I, who have seen it at work, can tell you something about it. I also know what our prisoners in the previous wars told me about the terrible effect of our artillery and of our assaults. I have, as regards the new campaign, information to the same effect. A German recently made a prisoner—the account is authentic—solemnly declared: "I have fought on all fronts, but never have I seen a better army than the Serbian. You simply work miracles. You are superior in courage and *adresse* to us Germans, who have the reputation of being the best soldiers in the world."

And this is the army you would abandon! You do not know what you would lose. It would be a crime—a crime against yourselves as well as against us Serbs! Send us help, and you will see what we are capable of doing. Help us against the Bulgars, and you will see what will happen to Mackensen. Davids love to fight Goliaths. We are glad to have opponents as strong as this German general. We are glad to be able to beat the victors and not the vanquished. For God's sake, do not deprive us now of the pleasure of conquering him. Such an opportunity may never occur again.

Many times in the course of our history have we turned to you for help, but you heeded not, much to our and to your own disadvantage. Throughout the nineteenth century we victoriously fought the Turks, but unfortunately it was thanks to Lord Palmerston that the Turks remained in Europe to join the Germans in the present war. For forty years we protested against the Austrian domination of Bosnia, but diplomacy allowed the Hapsburgs to remain there, with the result that the Austrian army from Vishegrad can now attack the Serbian army in the flank. We entreated you not to create an independent Albania, but diplomacy drove us from that territory which would have been of great service to us had we been allowed to hold it during the past three years. We always told you that the Bulgars were traitors, but you would never believe us.

Listen to the voice of even the small man, for he also may sometimes be right. He who has in his hand all facts and figures is no better than he who has a good idea in his head. "Genius is instinct," said M. Coudurier de Chassaigne in the *Sunday Times*. I have long ceased to put my faith in the authorities; I believe in more modest folk. Competent people in Serbia assured me in 1912 that we would be beaten by the Turks. A young student assured me that we would not—and he was right. Everybody in Serbia believed that the Balkan League was a lasting creation; a simple Serbian officer told me on the day war was declared on Turkey, "As soon as the Turkish war is over we shall have war with the Bulgars"; and again it was the small man who was right. The weak and inexperienced have good ideas sometimes, because they have instinct.

All those who have visited Rome remember that in front of the façade of the Church of St. Peter there stands an obelisk surmounted by a cross. Sixtus Quintus placed it there, his idea being that the monuments of the infidel should be subject to the emblem of the cross—*ut in crucis honorem ipsa impietatis monumenta cernerentur*. But this monument would not have been erected if at a critical moment when it was being raised a young boy had not noticed that one of the ropes which supported the enormous weight had become dry and was about to snap, and had not cried out "Acqua! acqua!" to warn the workmen to moisten the rope.

We Serbs are doing to-day what that little boy did then. We see that the rope will break unless prompt measures are taken. We also contribute to the victory of the Cross if you will only listen to us.

SERBIA "IN EXTREMIS."

To the Editor of THE NEAR EAST.

"*We are prepared to give our friends in the Balkans all the support in our power in the manner that will be most welcome to them, without reserve and without qualification.*"—Sir E. Grey, September 28.

SIR,—The urgent appeal for help to the Serbian army published on behalf of the leading statesmen of that country, and the statement, equally frank and serious, of Lord Lansdowne, call for some supplementary words on what, from the Serbian point of view, is the most critical aspect of the present situation.

A large strip of Danubian Serbia is in Austro-German hands. With the capture of the bridge-head opposite Orsova by the northern enemy and of Negotin and the mouth of the Timok by the Bulgarians, connection is already practically opened up between the two hostile forces. But it is the main line of communication through Nish at which the Germans aim, and for the seizure of this the enemy has now a triple converging line of advance at his disposal—up the valleys of the Morava and Timok, as well as from Sofia by the eastern line. It is becoming clear that in order to avoid a wholesale capitulation the Serbian forces may have to be withdrawn in a south-westerly direction, and that the final strongholds of defence may lie in Old Serbia and the upland valleys bordering on Montenegro.

With this eventuality clearly in view, the full gravity of what is now occurring in the Upper Vardar Valley will be appreciated. Unfortunately, to the east of Uskub there opens a serious breach to the mountain barrier of Serbian Macedonia within convenient striking distance of the important Bulgarian rail-head at Kustendil. Between that place and Egri Palanka—as, having driven between them, I can personally testify—there is no more serious obstacle than broad rolling downs. Through this gap, as might have been expected, the Bulgarians poured *en masse*, sweeping on to Kumanovo and Uskub, radiating to Vranya and Istip, and thus controlling a large section of the railway to Salonika—the sole line on which Serbia depends for reinforcements from its Allies, for munitions, and for adequate provisioning.

This is the crux. How is the national struggle for independence to prolong itself if the sources of supply are cut off? Nay, how, besides, is a huge, disastrous capitulation—affording Bulgarians and Turks alike a fresh source of armament—to be eventually avoided if the links with Macedonia are severed? Lord Cromer, from personal knowledge, has justly criticised the suggestion made in the House of Lords that a new line of communication may be opened out from Durazzo. The fact that the great Roman line—the Via Egnatia—took that route gives no clue to present conditions. As far as Elbasan there is now some kind of road, though liable to inundations, but beyond this to Ochrida there are only rough mule paths. Nor would the entrance into Macedonia from this point be of any practical use unless the Shar range was turned by the reoccupation of Uskub.

There remains the alternative Adriatic route viâ Scutari, Andrievitza, and the heart of the New Montenegro to Péch (Ipek) and the central plains of Old Serbia. I am quite aware that serious attention is being given to this route, and it must on no account be neglected. For part of the way from the lake a practicable road has been made. But beyond? Those who know what Montenegro is in winter, those who have traversed, as I have done, to the neighbourhood of Péch itself, the North Albanian Alps, will realise the enormous difficulties of transport. Certain stores and provisions may undoubtedly be conveyed by this route; for the heavier material of war it is unavailable.

The more the essentials of the geographical problem are realised the more urgent must appear the necessity of holding and, where necessary, recovering the Vardar line from Salonika at least as far as Uskub. For Serbia—for what remains of Serbia—this is a matter of life and death.

This, of course, was thoroughly realised from the beginning by the Serbian Government and High Command. It was indeed assumed that the southern part of the route would be kept open by the Greek ally, but the safety of important points like Istip, Uskub, and Vranya the Serbs were quite prepared to secure with their own arms. It was justly felt that even a withdrawal on the Danubian line would be less disastrous than the loss of the key to the Vardar route.

More seems to be known in Paris than in London as to the causes that have led up to the present almost desperate situation; but they have a very special claim on our own attention. Already on September 23 Bulgarian mobilisation and the ominous concentrations of troops on the Serbian frontier had begun, of which Greece and the Allied Powers were notified by Serbia. But the evidence of the hostile intentions of the Bulgarian Tsar and Government, of which naturally Serbia had a hundredfold more intimate sources of information than our own or any of the Allied Governments, accumulated to such an extent that on September 26 a despatch was issued on behalf of the Serbian authorities, both civil and military, appealing to the Allies for immediate action. These representations insisted on the urgent need of requiring the demobilisation of the Bulgarian troops within a fixed brief delay. It was further pointed out that in the event of Bulgaria's non-compliance with such an ultimatum the Serbian troops were still in a position to march on Sofia. In truth it was the last chance given to that unhappy country.

But it does not take any great amount of imagination to understand how a proposition for decided action of this kind was received by our own Foreign Office. What an imputation on the good faith of Bulgaria! Why, it would be the end of Government by high principle! Unfortunately, too, the British military authorities were obsessed by another objection. The mobilisation of Bulgaria was only a piece of German bluff. It meant nothing in itself except to draw off Serbian troops from the Danube line. Let them turn their forces on that side and not trouble themselves with the bugbear on their flank.

So the Bulgarian mobilisation was allowed to proceed. The Serbs were encouraged to forego Marshal Putnik's policy of concentrated defence. And then happened what had all along been arranged by the arch-conspirators. Bulgaria showed her true colours and Greece turned tail. The Bulgarians were allowed time, largely owing to the attitude of the British Government, to concentrate overwhelming forces on the most vulnerable point of the Serbian frontier. The defection of Greece left Serbian Macedonia uncovered. With regard to this unqualifiable desertion one illuminating fact is worth recording which at least places the responsibility in the right quarter. While the question of Bulgarian mobilisation, with all its consequences, was still in the balance the German envoy, Baron von Falkenhayn, arrived, it seems, at Sofia from Athens with the assurance that no counter-mobilisation would take place in Greece, and that if such were attempted the services of Venizelos would be dispensed with. Venizelos proved strong enough to defeat part of this calculation, and the decree of mobilisation was signed by King Constantine. Tsar Ferdinand, indeed, bitterly complained that he had been deceived by his German advisers.

But the enforced resignation of Venizelos followed. The Germans, after all, had reckoned rightly on their Athenian tools, and meanwhile the evil had been done.

The position of Serbia, left to herself, was now hopeless. Our own position after the great betrayal has been very frankly described by Lord Lansdowne. "Once bit, twice shy," and our military advisers, with the Dardanelles experience on their minds, were naturally averse from anything savouring of a fresh adventure. What was actually done had been arranged on the understanding that Greece would come in, but even then it is hard to understand why we should have only landed 13,000 troops at Salonika, while France, with less available forces and inferior means of transport, set down almost exactly three times that number. Why are we, too, not helping the Serbians at least to an equivalent extent? It is credibly stated that up to yesterday not a single British soldier has actually crossed the Serbian frontier. Had we been able to add another 40,000 men to the French contingent Uskub might have been at this moment again in the Allies' hands.

The 13,000 men—I quote Lord Lansdowne—"was the precursor of a large force which was put under orders at the same time." No one has the right to demand how that "large force" is to be employed. But it is permissible to make one or two observations. *Bis dat qui cito dat*. The success of the small French force and the apparent inability of the large contingent of Bulgarian irregulars or "comitadjis" to stand against Western discipline is in itself very encouraging. It lends probability to the calculation of Serbian military experts, which I am allowed here to cite, that if even as much as 50,000 additional troops could be thrown in by the Allies within a short period the essential line of communication by the Vardar Valley could yet be recovered and the whole held.

The loss of Uskub is the most serious blow that has as yet befallen the Serbian arms. It not only cuts the communication between the Morava and Vardar valleys and the lateral routes to Prilep and Monastir, but it also blocks the access to Kossovo and Novibazar by the Katchanik Pass immediately to the north. The Serb forces operating in Macedonia, Danubian Serbia, and on the Bosnian frontier are thus cut off from one another. The reoccupation of Uskub is the most imperative need of the moment.

As late as October 15 we renewed our solemn undertaking, quoted at the head of this letter, to do "everything in our power" for the assistance of Serbia. Is even such assistance as this not "within our power"? Never in all our history have we had a greater debt to a small ally—a debt in this case made the more binding by our fatal misdirection and the costly incapacity of our Government for prompt action.—I am, etc.,

ARTHUR EVANS.

Youlbury, Berks, October 28.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Julian (Old Style).	Gregorian (New Style).	—	Moslem.	Jewish.
1915. Nov.	1915. Oct.		1333. Julhijja.	5676. Heshvan.
5	23	Friday	27	28
6	24	Saturday.....	28	29
7	25	Sunday	29	30 Kislev.
8	26	Monday	30 1334. Moharrem.	1
9	27	Tuesday	1	2
10	28	Wednesday	2	3
11	29	Thursday	3	4

Thursday is the birthday of the King of Italy.

General Sir Ian Hamilton was received by Queen Alexandra at Marlborough House on Tuesday.

Lady McMahon had the honour of being received by the Queen at Buckingham Palace on Wednesday.

The Greek Minister and the Serbian Minister are among those who have accepted the invitation of the Lord Mayor-Elect and the Sheriffs to the Guildhall banquet next Tuesday.

According to a Constantinople telegram received in Amsterdam, the Sultan on Thursday of last week received in audience the Delegate-Apostolic, Mgr. Dolci. According to the newspapers, Mgr. Dolci handed the Sultan a letter from the Pope to his Majesty.

As soon as he learned that General Marchand, of Fashoda fame, had been wounded, Sir Reginald Wingate, Governor-General of the Sudan, sent him the following telegram: "Please accept heartiest congratulations on the success of your arms, and sincere sympathy for your wound. Hope that it will be rapidly healed." General Marchand replied: "Am delighted and appreciative of your good wishes, which are precious to me above all. Very many thanks."

The Lords Commissioners of his Majesty's Treasury have appointed Sir Henry Paul Harvey, K.C.M.G., C.B., Chief Auditor, National Insurance Audit Department, to act as a representative of the Treasury in the United States of America. Sir Paul was formerly Financial Adviser to the Egyptian Government.

On Thursday evening last week Mr. Tennant announced in the House of Commons that the command of the British force in Serbia had been entrusted to General Sir Bryan Mahon, D.S.O.

Sir Bryan, who is the eldest son of the late Henry Blake Mahon, of Belleville, Galway, was born in 1862. Gazetted to the 8th Hussars in 1883, he served in India till 1889. In 1896 he served in the Egyptian campaign, and he took part in the advance on Khartoum and the defeat of the Khalifa. For his services in the Dongola expedition he was granted the D.S.O., and he holds the Sudan war medal, the Egyptian war medal, with eight clasps, and the Order of the Osmanieh (4th class). Again in 1901-1904 he was in the Sudan, as Military-Governor of Kordofan. In the interval he took part in the South African war, and led the column which relieved Mafeking. He was awarded a C.B. in 1900, and in 1912 was made a K.C.V.O.

The *Times* correspondent in the Balkan Peninsula, at present in Bucharest, has received a telegram from Lady Paget stating that all the members of her hospital are gathered at Uskub and are safe and well. They are receiving every courtesy at the hands of the Bulgarians.

Mrs. Cyril Cumberbatch and daughter have arrived in Athens from Constantinople.

The engagement is announced of Miss Norah Gedge, only daughter of the late Admiral Herbert Gedge and Mrs. Herbert-Gedge, of Lennox Mansions, Clarence Parade, Southsea, and Lieutenant Steyn, R.E., only son of G. A. Steyn, M.D., late District Surgeon of Salt River and Maitland, and of Mrs. Starvey Steyn, of Kevalworth, Cape Town. Lieutenant Steyn, R.E., is a well-known Rugby International player, and an Oxford Blue.

The Dowager Duchess of Somerset, who died last week, was the daughter of Philip Morier, who (says the *Morning Post*) was Consul-General in Albania in 1803.

Field-Marshal Lord Methuen, Governor of Malta, requests that all parcels containing comforts or literature for distribution to the patients (now numbering upwards of 15,000) in the hospitals there should be addressed to the Commissioner, Red Cross Society, Valetta, Malta.

We regret that an error crept into the notice we published last week of the engagement of Mr. C. R. Skrimshire, formerly Headmaster of the English High School, Constantinople, and now of Wellington College. The lady to whom Mr. Skrimshire is engaged is Miss Aileen Lumb, not Lund, as stated.

Sir Reginald Wingate returned to Khartoum from Erkowit on Sunday, October 10, accompanied by the following members of his staff: Major G. S. Symes, D.S.O., Private Secretary; Major R. Rees-Mogg, Military Secretary; Major F. W. L. Edwards, A.D.I.; Mr. A. W. Keown Boyd, Assistant Private Secretary; and Shaheen Bey George, Arabic Secretary. Mr. Patterson, Mr. Lang, Mazloum Effendi, and the other officials of the Governor-General's Office arrived on the same train with his Excellency.

The day before leaving Erkowit for Khartoum, the Governor-General visited Sinkat, where he inspected the hill station of the British troops and their convalescent quarters. Visiting the headquarters of the inspector, his Excellency was received by El Lewa Wilson Pasha, Governor of the Red Sea Province, and Mr. Nalder, Second Inspector; and a number of Omdehs, Sheikhs, and notables were presented. Sir Reginald then called on Sherifah Miriam el-Morghaniyeh, and afterwards proceeded to the Old Military Station, where he was received by the officers of the 3rd Egyptian Battalion. Another resident of Sinkat honoured by a visit from the Governor-General was El Miralai Mohammed Bey Ahmed, former Commandant of Police, Red Sea Province.

News has reached us that the British prisoners of war interned at Urfa are enjoying very good health and are being well treated by the authorities. They live in a house which has been hired by themselves and have their own cook to look after their requirements.

According to a contemporary, Mr. G. Ward Price, the Paris correspondent of the *Daily Mail*, has been appointed to succeed Mr. Ashmead-Bartlett as official Press correspondent at the Dardanelles. The choice is particularly happy, as Mr. Ward Price has had considerable experience of the Near East. For some time before the Balkan wars he represented the *Daily Mail* at Constantinople, and he acted as war correspondent with the Turkish troops. Mr. Ward Price is a Cambridge man, and was in residence at St. Catharine's College for three years. There he greatly distinguished himself both in the schools and at games, taking high honours in history and rowing at Henley for his College.

A Sofia telegram states that the German Emperor has conferred Iron Crosses upon the Bulgarian Crown Prince Boris, Prince Cyril, the Premier, M. Radoslavoff, and General Jekoff.

Much regret will be felt by his many friends in this country at the news that Dr. David Sandler, of the Church of Scotland Mission, died suddenly in Constantinople on October 20.

The death occurred at Tenby on Sunday, after a long illness, of Lieutenant-Colonel Denne, late of the 4th Dragoon Guards, who was in command of his regiment at the battle of Tel-el-Kebir.

We regret to learn that the death, from enteric fever, took place at Port Sudan on October 8 of Mr. Percy Newton, chief clerk of the Customs Department. Mr. Newton entered the Sudan Government service in August, 1906, and had a large circle of friends and acquaintances, by whom his loss is very keenly felt.

The following urgent appeal is made by the Hon. Lady Monro, wife of Lieutenant-General Sir Charles Monro, Commander-in-Chief of the Mediterranean Expeditionary Force:—

2, Upper Belgrave Street,
October 30.

I beg most earnestly to make a special appeal on behalf of the troops of the Mediterranean Expeditionary Force, and especially those in the Dardanelles. Help is more than ever needed. I would point out that the number of men is largely increased and the area of operations widely extended.

Winter is upon us, and I feel sure everyone must wish to provide some extra comforts for our troops, especially as there is no opportunity of their obtaining anything on the spot. Christmas is now but two months distant, and further preparations for it must be made without delay, if our men are to feel the hand of love and friendship extended to them by those at home.

The Committee of Queen Alexandra's Field Force Fund have most kindly undertaken to acknowledge all donations of money and gifts in kind, and to use these to the best advantage for the benefit of our men now serving in the Eastern Mediterranean.

Donations of money and cheques should be specially marked for the Dardanelles, and sent to Mr. W. L. Sclater, who will act as Hon. Treasurer of the Dardanelles Fund of Queen Alexandra's Field Force Fund.

Gifts in kind should also be specially marked for the Dardanelles and sent to Mrs. Sclater, who is acting as Hon. Secretary.

Everything should be addressed to the offices of Queen Alexandra's Field Force Fund, at 24a, Hill Street, Knightsbridge, S.W.

MARY C. MONRO.

Our Bucharest Correspondent writes (October 15):—

Mr. Hurst, British Vice-Consul at Sofia, has remained in charge of the Legation archives.

Mr. Heard, Vice-Consul at Philippopolis, has left the country, via Dedeagatch.

Mr. Picton Bagge, Vice-Consul at Rustchuk, Mr. D. Young, who was on leave from San Francisco, and was assisting him, and Mr. Gilliat-Smith, Vice-Consul at Varna, with his wife and family, all left Bulgaria by way of Roumania. Mr. Bagge has proceeded to Petrograd. Mr. Young has been attached to the Legation here.

Mr. G. T. Havard, British Vice-Consul at Teheran, has passed through Bucharest en route to his post.

The Greeks of New Zealand (states a Wellington telegram) have cabled to the Minister of Foreign Affairs in Athens, as well as to M. Venizelos, expressing their sympathy with the Allies, and the hope that the Greek Government would join the Allies and help Serbia.

Mr. Ralph Caldwell Crafton, of Bulkeley, Alexandria, who died on September 2, left estate valued at £53,069.

WOUNDED AND MISSING.

MAJOR G. DAVIS,
1/11TH COUNTY OF LONDON REGIMENT,
Wounded and Missing on August 15 at Suvla Bay. Will anyone hearing news of him please communicate with Mrs. Davis, "Idencroft," Brondesbury Park, N.W.?

Digitized by Google

The funeral of the late Abbate Pasha took place in Cairo on October 11 from the offices of the Sultanieh Geographical Society, whither the body had been transferred from the deceased's residence. The Sultan and the High Commissioner were represented, and others present were General Maxwell, Comm. Attilo Sera, Italian Diplomatic Agent, the Governor of Cairo, Yacoub Pasha Artin, most of the members of the Sultanieh Geographical Society, and the First Aid Society of Cairo, and a large number of leading members of both the native and European communities. Sir Reginald Wingate sent a telegram expressing his unfeigned regret at the death of his old and valued friend, and his heartfelt sympathy with the family.

The Serbian Legation in Paris announced last Friday the death at Vznitzi of M. Lazard Patchou, the Serbian Minister of Finance.

M. Eugene Mavrodi, a noted Roumanian diplomat, passed away recently, writes our Bucharest Correspondent. He joined the Diplomatic Corps in 1883, being for a long period Councillor of Legation at Vienna, and later Minister at Brussels. Of late years, being in ill-health, he withdrew from public life. He was married to the Chief Lady of Honour to H.M. the Queen.

Writing on October 15, our Athens Correspondent says:—The death occurred the day before yesterday of General Smolenski, who, in the unhappy war of 1897, saved the honour of Greece, having alone gained a victory over the Turks at Reveni, Velestino. Thanks to this victory the General enjoyed at one time a very great popularity, of which, however, he never took advantage.

On Thursday of last week, her Majesty Queen Alexandra visited the Galleries of the Fine Art Society, 148, New Bond Street, to view the pictures of the Dardanelles by Mr. Norman Wilkinson, also those of France and Flanders by Mr. Russell Flint and Mr. Purves Flint, now at the front.

Lieutenant-Colonel George Butler Stoney, D.S.O., 1st Battalion King's Own Scottish Borderers, killed in action, was born in August, 1877, and was commissioned to the K.O.S.B. in September, 1897. He was promoted lieutenant in April, 1899, captain in 1904, and major in September of this year, while recently he received the rank of lieutenant-colonel. From April, 1908, until the present war he had been employed with the Egyptian Army. Colonel Stoney had seen service with his regiment in India in 1897-8, when, for work with the Tirah Expeditionary Force, he received the medal with two clasps. In the present war he had served with great distinction, and had been decorated with the D.S.O.

Major William James Anderson, 9th Manchester Regiment (T.F.), of Applecross, Rock Creek, British Columbia, who was killed in the Gallopoli operations on October 19, was the eldest son of the late Colonel J. C. Anderson, R.E., C.S.I. He was educated at Wellington and Sandhurst, and was gazetted to the 1st West Riding Regiment. After passing out of the Staff College he was appointed to General Chermside's Staff in Crete in 1899, and was subsequently Vice-Consul at Sivas and Diarbekir in Asia Minor, until 1903, from which time until his retirement in 1909 he held staff appointments in India. He was an accomplished linguist, and held the interpreter's certificate for French and Turkish. He leaves a widow and two children.

Captain Leicester William le Marchant Carey, 4th Battalion Royal Fusiliers, who was previously wounded and missing, and is now believed to have been killed on October 20, 1914, was the only son of the late Major-General Constantine Phipps Carey, R.E., C.B., and of Mrs. Carey. Born in November, 1877, he entered the Royal Fusiliers in February, 1898, was promoted lieutenant the following November, and captain in July, 1901. From July, 1903, to October, 1910, Captain Carey was employed with the Egyptian Army. In the South African war (1899-1902) he took part in the operations for the relief of Ladysmith, and was afterwards continually employed to the end of the war. He was decorated with the Queen's medal with five clasps and the King's medal with two clasps. In the present war he was mentioned in dispatches in October of last year.

Captain William Loring, 2nd Scottish Horse, who died on a hospital ship on October 24 from wounds received in action in the Gallipoli Peninsula, had spent several years in the British School of Archæology at Athens. He was the fourth son of the late Rev. E. H. Loring, rector of Gillingham, Norfolk. Two of his brothers have fallen in the war, and a third commands one of H.M.'s battleships.

Captain R. W. Sutton, 2nd Royal Dublin Fusiliers, who has been killed in action, enlisted in 1898, went through the South African War, 1899-1902, was mentioned in despatches, and received the Queen's medal with six clasps and the King's medal. He also served in the Aden Hinterland in 1902-3. Captain Sutton, who received his commission from the ranks on May 21 last, was shot through the head by a German sniper while examining the entanglements in front of his line of trenches on the morning of October 16.

The Lord Mayor's appeal for help for the suffering Armenians has already brought in over £7,000, but more subscriptions are very urgently required. Further instances of the plight and sufferings of the refugees in Southern Russia are received almost daily by the Relief Committee in London. From scores of other districts to which the remnants of the Christian inhabitants of Armenia have escaped come heartrending details of wretchedness and distress. The Lord Mayor's Committee is endeavouring to succour these people, who are among the worst sufferers through the war. Subscriptions will be gratefully received by the secretary, Armenian Refugees (Lord Mayor's) Fund, 96, Victoria Street, London.

Mr. Aneurin Williams, M.P., as Chairman of the British Armenia Committee, has received from the Foreign Office the following memorandum containing the substance of a telegram from the British Consul at Tabriz: "His Majesty's Consul at Tabriz, Mr. Shipley, telegraphing on the 22nd inst., reported that 25,000 Syrian mountaineers from Tyari and adjacent districts were now refugees in Salmas, and that 10,000 more were expected. Mr. Shipley adds that these refugees are destitute, and that unless help is received numbers of them must inevitably perish, especially as the winter is close at hand. The American Relief Committee, under the presidency of the United States Consul, is endeavouring to do all that is possible, but its resources are entirely inadequate to meet the requirements of the situation, and the circumstances justify an urgent appeal to charity in this country. His Majesty's Consul suggests that all the funds should be sent to him for distribution through the United States Committee, which, in his opinion, constitutes the best agency for effective relief."

Dr. Moon's second lecture on typhus was delivered last Friday in the hall of the Royal Society of Medicine, Wimpole Street. The address was chiefly of a historial nature, giving accounts of epidemics from the days of ancient Athens onwards. Speaking of the service we might render our Allies in the Balkans, the lecturer said this would chiefly be by showing them how to avoid the mistakes that we had made in the past, and teaching them how much the disease might be got rid of by simple methods, before Serbia had accumulated the capital that would make it possible for her to build great laboratories for research work. Typhus was essentially a war disease. He thought the bites of blood-sucking insects, such as lice, were not the only means by which it might be communicated.

The third lecture concluding the series was given last Wednesday. Dr. Moon said that the three main causes of the disease were dirt, overcrowding, and destitution. The population of the Turkish quarter of Skoplje seemed to him to suffer less from the epidemic than the inhabitants of other parts of the town, which fact he attributed to the frequent ablutions enjoined by Mohammedan law. The authorities set up a system of compulsory notification of the disease, together with isolation of cases, disinfection of houses and clothing, examination of railway travellers, etc.; and the various British and foreign medical missions, working devotedly in co-operation with the authorities had such success that before June the epidemic was over and he did not think it would recur.

Two half-figure busts by M. Ivan Mestrovic have been added to the International Society of Sculptors, Painters, and Gravers Exhibition at the Grosvenor Gallery. They are portraits of "Madame Errazuriz" and "Miss St. George."

A Press representative was informed last week that at the head offices of the Serbian Relief Committee no news concerning between two and three hundred Englishwomen who are attached to various hospital units in Serbia had been received in this country since the 26th ult., but information had arrived that a temporary orphanage at Belgrade, inaugurated by British funds, had suffered demolition as a result of the late bombardment.

Addressing a S.P.G. meeting at Stepney last Friday evening, Bishop Bury said he asked recently for a clergyman to volunteer to go to Serbia. He intimated clearly that typhus was then raging, that cholera was expected, and that the candidate would have to pay his own expenses. He received eighty answers to that appeal. Nothing was held out to the volunteer but the plain mark of the Cross.

The *Egyptian Gazette* of October 14 reports that news has been received in Alexandria of the death of Judge von Bulow, who until January last was a Judge of the Mixed Court of First Instance at Alexandria. The Judge left Egypt on leave before the war broke out and his connection with the Mixed Courts terminated last January, together with the mandates of all the other enemy subjects who were judges in those Courts.

Judge von Bulow was a kinsman of the late Chancellor of the German Empire, and went to Egypt in 1898 on his appointment to a judgeship in the Cairo Mixed Courts. In 1904, he was appointed to Alexandria. Last April he was nominated by the German Government to a judicial post in the Belgian capital, but had to resign a few months afterwards owing to illness. He went to Switzerland for a change of air, but did not improve and returned to Germany. He died in a sanatorium at Berlin last month. He had been suffering from a tumour in the face, and succumbed after an operation. The late Judge was fifty-two years of age. He was a highly-cultured man. His father was formerly Envoy to the Vatican.

SCHOOLS for BOYS & GIRLS.

TUTORS for ARMY, UNIVERSITY, CIVIL SERVICE and ALL EXAMS. REFINED HOMES with EDUCATION for children whose parents are abroad.

Messrs. J. and J. PATON, having an intimate, unique, and up-to-date knowledge of the best Schools and Tutors in this country, will be pleased to aid parents in their choice by sending (free of charge) Prospectuses and Trustworthy Information regarding Establishments which can be thoroughly recommended.

The age of the pupil, district preferred, and rough idea of fees should be given.

'Phone, write, or call,

J. and J. PATON. Educational Agents, 143, Cannon St., London, E.C.

Lecturing at Essex Hall Strand, last week, Mr. A. H. Pollen, said that if ever the diary of the E 11, Commander Nasmith, V.C., in the Sea of Marmora came to be published, the most marvellous sea story that had ever been written would be told.

The following ratings who formed the crew of his Majesty's submarine "E 7" at the time of her loss, are officially reported to be prisoners of war in Turkey :—

Blanchard, Herbert, sto. 1st class; Coates, Asher, Proby E.R.A., R.N.R.; Dalnoky Louis Anthony James, P.O.; Dempsey, William George, leading smn.; Doyle, Alexander, acting ldg. sto.; Godfrey, John Herbert, sig.; Gwynne, Ernest Alfred, A.B.; Harrison, John Henry, E.R.A., 2nd cl.; Hooper, Reginald, ldg. smn.; Hubbard, Frederick James, acting ldg. sto.; Johnson, William Edward James, stoker, 1st cl.; McDonald, William Gordon, E.R.A., 3rd cl.; Macklin, Herbert, E.R.A., R.N.R.; Matthews, William Henry, A.B.; Osborne, Ernest, stoker 1st cl.; Parkhurst, Thomas Milner James, leading teleg.; Pope, Harry Henry, stoker, 1st cl.; Reid, William, A.B.; Ross, Percy Charles, A.B.; Sims, Robert Walter, P.O.; Smith, Jack Richard, A.B.; Taylor, Edward Charles, ch. stoker; Tomkinson, Thomas Henry, stoker, 1st cl.; Websdale, Edward Samuel, P.O.; Wilson, Archibald, leading sto.

For the benefit of officers, medical men, and nurses who are about to proceed to the Near East, the authorities of King's College are organising elementary classes in the modern Greek, Russian, and Serbian languages, to which Turkish will be added if there is a sufficient demand.

APPOINTMENTS. PROMOTIONS, Etc.

A Cyprus correspondent informs us that Mr. Bowring, treasurer, was expected to return to the island at the end of the month.

Major James J. B. Tapley, D.S.O., Army Veterinary Corps, has been taken on the strength of the Egyptian Army with the rank of Bimbashi, and posted to the Sudan Government.

Under date of October 15, our Bucharest Correspondent reports :—

M. Al. Jacovake, First Secretary at the Roumanian Legation at Berlin, has arrived at Bucharest on leave.

M. Al. Pisoski, Roumanian Diplomatic Agent at Cairo, has arrived at Bucharest.

M. A. Guranesso, lately recalled to fill a position at the Central Administration of the Ministry for Foreign Affairs, has again taken up his position of First Secretary at Sofia, M. Trandifiresco, who replaced him, has returned to Bucharest.

M. C. Langa Rashcano, Councillor at the Constantinople Roumanian Legation and former Director of the Cabinet of the Ministry of Foreign Affairs, has been decorated with the Order of St. Sava of Serbia.

Under date of October 30, Reuter's correspondent at Amsterdam telegraphs: According to a Berlin telegram, the Sublime Porte has been requested to agree to the appointment of Count Wolff Metternich, formerly Ambassador at the Court of St. James, as Ambassador Extraordinary.

The Berne correspondent of the *Morning Post* understands that Bulgaria has appointed a Minister Plenipotentiary to Berne, who will probably be M. Stancioff, formerly Minister to Italy.

Mr. W. Lawrence Balls has been appointed to a position on the staff of the Fine Cotton Spinners' and Doublers' Association of Manchester, to conduct scientific investigations.

DOMESTIC ANNOUNCEMENTS

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

GOSCHEN.—On October 17, at Cairo, the wife of E. H. Goschen, of a son.

KENNY.—On October 31, at 15, Lower Berkeley Street, W., the wife of Capt. W. D. Kenny, Royal Inniskilling Fusiliers (attd. Egyptian Army), of a daughter.

HONOURS FOR MESOPOTAMIAN SERVICE.

The following honours and awards bestowed upon officers of our forces for distinguished service in Mesopotamia, are announced in the *Gazette* :—

To be Additional Members of the Military Division of the Second Class, or Knights Commanders, of the Most Honourable Order of the Bath :—

Major-General Charles John Melliss, V.C., C.B., Indian Army.

Major-General George Frederick Gorringe, C.B., C.M.G., D.S.O., Indian Army.

To be Additional Members of the Military Division of the Third Class, or Companions, of the said Most Honourable Order :—

Colonel (temporary Brigadier-General) Richard Narrien Gamble, D.S.O.

Colonel Patrick Hehir, M.D., F.R.C.S., Indian Medical Service.

Colonel Usher Williamson Evans, Royal Engineers.

Lieutenant-Colonel John Hennessy, M.B., Royal Army Medical Corps.

To be additional members of the Second Class, or Knights Commanders of the Most Exalted Order of the Star of India :—

Lieutenant-General Sir Arthur Arnold Barrett, K.C.B., K.C.V.O.

Lieutenant-Colonel Sir Percy Zachariah Cox, K.C.I.E., C.S.I.

TO BE MAJOR-GENERAL.

Colonel (temporary Brigadier-General) W. S. Delamain, C.B., D.S.O., Indian Army.

TO BE BREVET COLONELS.

Lieutenant-Colonel A. S. R. Annesley, Supply and Transport Corps.

Lieutenant-Colonel W. W. Chitty, 119th Infantry (the Mooltan Regiment).

Lieutenant-Colonel E. S. Cleeve, Royal Field Artillery.

Lieutenant-Colonel C. B. L. Clery, 104th Wellesley's Rifles.

Lieutenant-Colonel S. H. Climo, D.S.O., 24th Punjabis.

Lieutenant-Colonel H. L. D. Fordyce, Supply and Transport Corps.

Lieutenant-Colonel A. J. N. Harward, 48th Pioneers.

Lieutenant-Colonel R. P. Molesworth, Royal Garrison Artillery.

Lieutenant-Colonel E. C. Peebles, D.S.O., 2nd Battalion the Norfolk Regiment.

TO BE BREVET LIEUTENANT-COLONELS.

Major H. A. Holdich, 2nd Battalion 5th Gurkha Rifles (Frontier Force).

Major C. C. R. Murphy, 30th Punjabis.

Major (temporary Lieutenant-Colonel) G. A. F. Sanders, Royal Engineers.

TO BE BREVET MAJORS.

Captain F. Booth, the King's Own (Royal Lancaster Regiment), attached 34th (Divisional Signal) Company, Sappers and Miners.

Captain E. G. J. Byrne, 104th Wellesley's Rifles.

Captain R. E. Wright, M.B., Indian Medical Service.

TO BE COMPANIONS OF THE DISTINGUISHED SERVICE ORDER.

Commander Anthony Hamilton, Royal Indian Marine.

Major Henry Arthur Bransbury, Royal Army Medical Corps.

Major (temporary Lieutenant-Colonel) Leslie Herbert Queripel, Royal Field Artillery.

Lieutenant Richard Hassell Sheepshanks, 12th Cavalry.

AWARDED THE MILITARY CROSS.

Captain Edward Bruce Allnutt, Royal Army Medical Corps.

Captain William Burgess Benton, 105th Mahratta Light Infantry.

Captain Murray George Gunning Campbell, Royal Engineers.

Captain Kenneth Edward Cooper, 110th Mahratta Light Infantry.

Captain William Morgan Hunt, Royal Garsion Artillery, attached 23rd Peshawar Mountain Battery (Frontier Force).

Captain Aubrey Francis Vincent Jarrett, Royal Garrison Artillery, attached 23rd Peshawar Mountain Battery (Frontier Force).

Captain Charles Aubrey Pogson, 117th Mahrattas.

Captain Henry Cave West, Royal Horse Artillery.

Captain Arthur Wilfred White, 117th Mahrattas.

Captain Alister Ralph Thomson, 7th Duke of Connaught's Own Rajputs.

Lieutenant Humphrey John Baillie, 2nd Battalion the Dorsetshire Regiment.

Lieutenant Richard Henry Dewing, Royal Engineers.

Lieutenant Malcolm Eccles, 119th Infantry (the Mooltan Regiment).

Lieutenant (temporary Captain) Harcourt Sutcliffe Farebrother, 2nd Battalion the Norfolk Regiment.

Lieutenant Alec Bryan Matthews, Royal Engineers.

Lieutenant Eric Lechmere Stephenson, 2nd Battalion the Dorsetshire Regiment.

Lieutenant Narayan Krishna Bal, Indian Medical Service.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.
The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.

Are the Finest on the Nile.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Alexandria.
WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.
Inclusive Terms from P.T. 80 (16s.) per day.
Special Terms to Government Officials, Commercial Travellers, and for long stays.
Proprietor and Manager—AUG. van MILLINGEN.

Bucharest, Roumania.
GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

FRIDAY, NOVEMBER 5, 1915.

BRITAIN'S PLEDGE TO SERBIA.

It is the whole position in the Near East which has brought criticism on the conduct of the war to a head, and compelled Mr. Asquith to render an account of his stewardship in the House of Commons last Tuesday. Elsewhere in this issue we try to follow the Premier over much of the ground covered by his statement; here we may confine ourselves to the question of Great Britain's pledge to Serbia, to which prominence was subsequently given by the speeches of Sir Edward Carson and the Foreign Secretary. Mr. Asquith made no reference to the undertaking given by Sir Edward Grey on September 28; but he dealt with the reproach brought against the Allies of being too late in providing active help for Serbia, and so far admitted the justice of the charge by emphasising King Constantine's responsibility for having upset the plans of the Entente Powers. He asked those who criticised the alleged inertia of the Allied Powers to take into account the action of the Greek Government, but refused to comment upon it on the ground that it was better not to do so. Whether it will redound to the credit of Great Britain and her Allies that it should be known that Greece's failure to throw a hundred thousand or more men into the field was sufficient to dislocate their plans and to leave them powerless to bring aid to Serbia is a question which the House of Commons was not asked to consider. If that aspect of the subject had been brought to its notice, it might have reflected that when Germany's calculations were upset by Belgium's refusal to act up to the expectations of the German Government, the new situation was met by the General Staff in an effective manner and without any public whimperings. It is true that our enemies had made careful preparations for most emergencies, but any stigma attaching to them for such action is concerned solely with the fact that the preparations were made in time of peace, while the German Government was protesting its friendliness. The Entente Powers had more than twelve months after war broke out in which to prepare for a situation which, as Sir Edward Grey has admitted, was to be foreseen. Their only effort to cope with it was to try to persuade the Greek Government to do the work for them. They had good reason to hope that Greece would do it, but they made no provision to meet what must inevitably prove a very critical position, if Greece, who had already once proved altogether unreliable, should fail them again. By such means war is not waged successfully; or if the "final lap," on which all hopes have now to be pinned, proves successful in spite of such means, then the cost has been ruinously enhanced.

Although Mr. Asquith made no reference to Sir Edward Grey's pledge to Serbia, the late Attorney-General made it clear that his resignation from the Cabinet was based almost exclusively on that pledge and the failure of the British Government to redeem it. Sir Edward Grey had spoken in the House of Commons on September 28. It was, Sir Edward Carson maintained, "one of the most important declarations that could be made" in that House. He added: "I believed it, when I was a party to it, to be the policy of his Majesty's Government, but I believed more: I believed that our military advisers never would have allowed us to make that declaration, unless we had actual preparations and plans which were ready when the moment came to enable us to strike and to assist our gallant little Ally on the field of battle." How far this was from being the case has been proved by subsequent events. But in a letter which he wrote to the Prime Minister on October 12, and which he read to the House of Commons, Sir Edward Carson showed that the failure to redeem the pledge to Serbia was not solely due to lack of military preparations. After Sir Edward Grey had announced that, in the event of Bulgaria assuming an aggressive attitude on the side of our enemies, we were prepared "to give to our friends in the Balkans all the support in our power in the manner that would be most welcome to them in concert with our Allies, without reserve and without qualification," the War Committee of the British Cabinet appears to have evolved certain plans which had little or no reference to the situation in Serbia. "I could understand," wrote Sir Edward Carson, "a policy of limiting all our actions to the western theatre . . . and in that way to relieve the situation in the east. But to send an army to Egypt to await action which may or which may not be possible on the report of a General to be sent to Gallipoli seems the most futile and hesitating decision that could be come to, and one calculated merely to lead to a further dissipation of our forces." Such, apparently, was the intention of the Cabinet at the time when Sir E. Carson resigned. Since then, fortunately, other counsels have prevailed; General Joffre has been over to England to lay his own views before the Government, and Mr. Asquith has now given a fresh pledge to Serbia.

Serbia is no longer to be abandoned. She has been left "to bear the brunt of a frontal invasion by Germany and Austria and a side attack from the King of Bulgaria," but Mr. Asquith declared, in the name of Great Britain and her Allies, "we cannot allow Serbia to become the prey of this sinister and nefarious combination." As a result of complete agreement between the Entente Governments, whose co-operation is to be "close, cordial, and in full concert," Serbia "may be assured . . . that her independence is regarded by us as one of the essential objects of the Allied Powers." Mr. Asquith very naturally could not say by what method or in what form this common policy of the Allies would be pursued, but it will be hoped in this country that, now that we are going to help Serbia, we shall strike quickly and intelligently. Sir E. Carson's statement that valuable time has already been lost would seem to be too obvious to be challenged. But so different are the views held by the British Government regarding the proper conduct of the war from those of the general public that Sir Edward Grey was able to maintain that there has been "no delay in preparation" for helping Serbia. "The forces that were immediately at our disposal for landing at Salonika were landed and are engaged in the operations in the Balkans now. Preparations went on without delay to send further forces to the east, and it is not the case that we delayed or hesitated or that any consultations that took place could have had the result of delaying any practical steps which could have been taken to give help to Serbia." If this is Sir Edward Grey's honest belief, it is obvious that the British and Serbian Governments hold different views regarding what constitutes delay in military operations. Nor will the Serbians be better pleased with the British Foreign Secretary's explanation of his pledge of September 28. He contended that the promise only had reference to the sending of "a certain definite number of men to Salonika for the express purpose of enabling Greece to fulfil her treaty obligations to Serbia," while the expression "without reserve and without qualification" implied that, "when once Bulgaria had joined the Central Powers, there could be no more talk of concessions." In the light of this "explanation," which occurred to no one who heard or read Sir Edward Grey's pledge, we can only hope that behind Mr. Asquith's fresh pledge there does not lurk any similar explanation rendering it absolutely valueless.

THE DESTROYERS OF TURKEY.

A LETTER FROM PRINCE SABAHEDDINE TO LORD KITCHENER.

We have received for publication a copy of a letter addressed by Prince Sabaheddine to Lord Kitchener. It will be remembered that the Prince not long ago addressed to the Sultan of Turkey a telegram protesting against the course that the present rulers of the Ottoman Empire were—and still are—pursuing. To this he alludes in his present letter, of which the following is a translation:—

My Lord,—In a speech which you recently delivered in the House of Lords there occurs, as reported by the telegraphic agencies, this characteristic sentence: "It is only just to admit that the methods of the Turks are infinitely superior to those which have dishonoured their masters, the Germans."

Deeply touched by these generous and fair words, my friends of the Ottoman Liberal Opposition party and I tender you our sincere thanks. We also hope that the goodwill which is beginning to show itself amongst the noble minds of England regarding the Turkish people, so tyrannically treated but so loyal at heart, will increase as time goes on. For while, ostensibly, it is reluctantly fighting against you, it is at the same time carrying on an internal struggle in favour of that cause for the triumph of which you and your Allies are so heroically shedding your blood.

It was particularly to the development of this spirit, which showed itself at the beginning of the war in the opinion of educated Turkey, that I desired to draw the attention of the Sultan and his Government by means of my latest telegram. Therein I said: "The Turkish and Ottoman national conscience has ranged itself definitely on the side of the Allies, to such an extent that we should prefer, if the worst came to the worst, to see ourselves beaten by the side of those whose cause is so just, rather than triumph on the side of Germany, whose cause is so manifestly unjust. Honour compels us to oppose all brute force that scorns legitimate rights. Thus, neither arrests, nor persecutions, nor executions will suppress the Ottoman patriots who are striving, in the general interests of Europe also, to safeguard their independence and their national dignity."

We, the Ottoman Reformers, who have for many years worked systematically to prove to our fellow-countrymen the social and moral superiority of the Anglo-Saxon world, and the necessity of allying ourselves to it—we have joyfully discerned this spirit of justice in your noble words, which do such credit to your country. We have also observed further evidence of this generous spirit towards us in the writings of some of your talented and large-minded publicists, who have upheld the proposal—which is so eminently a just one—to leave Constantinople in the possession of a repentant Turkey. This proposal is also only in accordance with that principle of nationalities which the Allies themselves defend.

Allow me, my Lord, to repeat here what I have said elsewhere: that, modest as our efforts have been, had they been better appreciated and seconded by the diplomacy of the Entente at Constantinople, and that had the representatives of the Entente, three years ago (on the occasion of the attempt against the Sublime Porte by the Unionists), refused to recognize a Government founded on a crime, the present usurpers of power would never have been able to hold their position. This would have resulted in the access to power of a sincerely Liberal and reforming Government in Turkey, and, consequently, in a close understanding between the Sublime Porte and England and her friends, as well as with the Balkan States, whose true interests demand the preservation of the Ottoman Empire.

In those circumstances, Austria, to the great gain of her subjects, certainly would not have dreamed of sending an ultimatum to Serbia, who would then have been supported by all the armies of her neighbours; and Germany, held between the united forces of the East and West, would have been reduced to utter impotence even before she had been able to draw the sword. And if, in spite of everything, war had broken out, we should at least have had the satisfaction of shedding our blood beside you in the defence of a just and noble cause. Unhappily, at the time when the leaders of the "Union and Progress" party were so strongly supported by official Germany and—which seems incredible!—even upheld by the representatives of the Entente, we Liberal Reformers were almost ignored by the diplomacy of the Allies, although we desired to assure the friendship with them which formed part of our national programme, at the risk of liberty and even of life.

But if the present war could not be avoided, its repetition, under other conditions and at a date more or less distant, ought to be prevented. That object can only be achieved by securing a stable equilibrium in the East. And the maintenance of an Ottoman Empire, *reformed and reorganized*, is the only possible condition of such equilibrium.

The partition of Turkey, on the other hand, by letting loose ambitions which it would be impossible to satisfy, would create a most precarious situation. International rivalry and the increasing anarchy that would result from it would end by bringing about a fresh catastrophe, like that which followed the first Balkan War, to which the present war is a natural sequel.

At the outbreak of the present war, England, the great and historic friend of Turkey, declared that she was not making war on the Turks, but on their Government—words that earned the gratitude of all thinking Turks.

Unfortunately, Ottoman patriots, who now risk the worst tortures in order to save their country from the "Unionist" and Germanic claws, see with indescribable sorrow that Ottoman territory forms the basis of every attempt at a bargain between the Allies and between them and neutrals.

I declare, my Lord, that, as a convinced supporter of the cause of the Allies, I have been more than once questioned on this subject by my countrymen, and, unhappily, without being able to give them any satisfactory reply. This naturally paralyses the efforts of those in Turkey who are devoted to the cause of justice; and it is the "Party of Union and Progress" and Germany that benefit by this state of things, to our disadvantage, and, perhaps, to that of our friends of the past and of the future.

Russia herself is the first victim of this state of affairs.

If it had been possible to plan and steadily carry out a course of action between the British Government and the true representatives of Liberal Turkey, we should certainly have had by now a radical change of authority at Constantinople, a change which would have had as one immediate result a definite orientation of all the Balkan forces in favour of the Allied Powers. Let us hope, in the higher interests of humanity, which demand the final triumph of the Allies, as well as in the interests of honest and Liberal Turkey, that such an understanding may yet be established.

Thanking you again most heartily, my Lord, for your words regarding my countrymen,—I am, etc.,

SABAHEDDINE.

HEROIC SERBIA.

SIR IAN HAMILTON'S FAREWELL.

Reuter's correspondent with the Mediterranean Expeditionary Force reports that the following farewell order by Sir Ian Hamilton was issued to the troops on October 17:—

On handing over the command of the Mediterranean Expeditionary Force to Sir Charles Monro, the Commander-in-Chief wishes to say a few farewell words to the Allied troops, with many of whom he has now for so long been associated.

Firstly, he would like them to know his deep sense of the honour it has been to command so fine an army in one of the most arduous and difficult campaigns which have ever been undertaken, and, secondly, he must express to them his admiration at the noble response they have invariably given to the calls he has made upon them. No risk has been too desperate, no sacrifice too great.

Sir Ian Hamilton thanks all ranks, from generals to private soldiers, for the wonderful way they seconded his efforts to lead them towards a decisive victory, which, under their new Chief, he has the most implicit confidence they will achieve.

HICKS PASHA: AN ANNIVERSARY

(From a Correspondent.)

Two-and-thirty years have passed away since the slaughter of General Hicks and the whole of his expedition sent a thrill of horror through the civilised world; yet no one has thought of perpetuating the memory of this brave soldier by even the most humble kind of monument. It may be, as Sir Thomas Browne has told us, that "to extend our memories by monuments, whose death we daily pray for, and whose duration we cannot hope, without injury to our expectations in the advent of the last day, were a contradiction to our belief"; nevertheless there is a deep-seated feeling of satisfaction created by the spectacle of a suitable memorial destined to keep in green remembrance those who have fought nobly in the battle of life and who deserved something in the form of permanent recognition at the hands of those who survive them. Such an one was Hicks, one of the most cruelly defamed and most undeservedly condemned men of his time. He may have had but little to do with the actual winning of the Sudan; but at least, he acted like a brave soldier and did his duty, as he conceived it, in the face of much difficulty and obstruction. And in these days when both men and women are being commemorated for acts of self-sacrifice, assuredly a plea may be urged calling for the perpetuation of the memory of the intrepid fight waged against fearful odds in the waterless forests of Kordofan, three decades and more ago.

The disastrous end of the Hicks Expedition was the final act in the drama enacted in the hideous days of Mahdi misrule in the Sudan. In response to urgent appeals to Cairo for reinforcements, General Hicks, with several European staff officers and a force of untrained Egyptian conscripts, had been despatched to Khartoum, After a reconnaissance in force up the White Nile, during which the Dervish Emir Makashif was defeated and killed at Marabia, on April 29, Hicks commenced preparations for his advance into Kordofan, and after numerous delays the ill-fated expedition of over 8,000 men started from Dueim on September 24, and advancing viâ Shat and the Khor Abu Habl reached Rahad, where news arrived that the Mahdi and his army were based at Birka. Following yet another delay of several more days, Hicks ordered a further advance into the forest of Shekan, some thirty miles to the south of El Obeid. At Aloba, on November 5, the force was surrounded and attacked by some 40,000 Dervishes under the Emirs Wad el Nejumi and Abu Girga. Lacking all discipline and consisting mostly of the scum of the earth, the Egyptian troops lost all idea of obedience to their officers; and being further hampered by the presence of thousands of camp followers and baggage-camels, they offered practically no resistance. The result was that they were massacred almost to a man. Out of the total number mentioned it is said that not 300 got away alive.

History is not altogether silent as to the strenuous and courageous attempts of Hicks and his European officers to save the situation—with such material as they had at hand this was impossible—but no endeavour has ever been made to do even belated justice to the memory of these plucky Englishmen. On the other hand, there have not been wanting, as is usually the case, plenty of critics to disparage and decry them.

Lord Dufferin, upon whose matured judgment Mr. Gladstone and his Cabinet had so greatly relied for advice in 1880-1885, thought very little about the Sudan, and the death of General Hicks and his brave companions seems to have made but little impression upon that great diplomat, even if it horrified and shocked the warmer-hearted British public. Lord Dufferin, writing of the Hicks Expedition, which had started from Cairo for Khartoum on February 1, declared that "it was undertaken upon his own responsibility," and that neither he (Lord Dufferin) nor the British Agent (Sir Edward Malet) "was concerned in it." Nevertheless, Hicks had been appointed, after a distinguished career in India, to be head of the army in the Sudan, and his expedition was far from being the filibustering or adventurous undertaking Lord Dufferin attempted to represent it. This, however, was the wretched spirit in which Sudanese and other Imperial matters were regarded in political England in those days! Small wonder that, such pusillanimous counsel and such inepitude becoming known to the Mahdi—and little seems to have been concealed from that astute brain, thanks to his efficient intelligence department—he should have felt greatly encouraged, and should have become extremely daring in furthering his crusade against the British.

There are still living several distinguished men who can bear testimony to the worth and the gallantry of General Hicks. This may not be perhaps the most expedient moment to seek for co-operation in furtherance of a suggestion put forward for a memorial to Hicks's memory. Yet upon this, the thirty-third anniversary of his death, it may not be deemed altogether incongruous to urge his claims upon our consideration—even if sadly belated.

"And the tear that we shed, though in secret it rolls,
"Shall long keep his memory green in our souls."

HOUSE OF COMMONS.

British Commander at Salonika. Oct. 29.

Mr. Greenwood asked who was the officer in command of the British forces at Salonika, and had he a free hand?

Mr. Tennant replied that the officer was Lieutenant-General Sir Bryan Mahon, and his orders were to co-operate with our Allies, the French.

Post to Dardanelles. Nov. 3.

Mr. H. Samuel, replying to Mr. Yeo, said that special inquiries had been made as to non-delivery of letters and parcels to the troops in the Gallipoli Peninsula. The service had necessarily been slow, and had been largely dependent on the ordinary transport service, which was carried on under conditions of considerable difficulty. Steps were now being taken which he hoped would result in acceleration of the transmission of letters and parcels by about a week. It was believed that only one mail bag had been lost while under the care of the Post Office since the service began. The chief cause of the failure to deliver was inadequate packing. Thefts of parcels were infrequent. Every endeavour was made to trace wounded soldiers and deliver parcels addressed to them.

The Dalmatian Coast.

Mr. Denman asked whether the Foreign Secretary was aware that publicity had been given to the general conditions of an alleged agreement made between the Allies and Italy relative to the disposal of the Dalmatian coast after the war; and whether, in case any such agreement was in existence, there were any reasons which prevented the publication of the original document, so that the engagements of this country in the Near East might be clearly defined.

Sir E. Grey: I can only say that I am in no way responsible for any unauthorised statements that have appeared in the Press, and am not in a position to make any statement on the matter.

Prisoners of War in Turkey.

Answering Mr. Pringle, Lord Robert Cecil said that five official lists of British naval and military prisoners of war in Turkey had now been received. The latest of these lists had only recently reached the Foreign Office. It was being translated from the original Turkish, and would be forwarded to the War Office as soon as the translation was completed. It comprised the names of eight officers and 116 men—all military. The names of the eight officers had already been communicated to the War Office.

Parcels for Prisoners.

Lord Robert Cecil told Mr. Mount that parcels for prisoners in Turkey could be forwarded through the Swiss Post Office. They should be addressed to the Central Post Office, Constantinople. Regulations had been issued as to how such parcels should be packed and despatched.

PARCEL POST TO SERBIA SUSPENDED

It is officially announced by the Postmaster-General that the parcel post to Serbia is suspended.

Digitized by Google

THE WAR IN THE BALKANS.

THE ENEMY ADVANCE CONTINUES.

The past week has been as replete as its predecessors with rumours and reports, but one or two facts stand forth conspicuously. Some of them are political rather than military in nature, such as the debate in the House of Commons on Tuesday, which drew from Mr. Asquith the vital admission that General Joffre's visit to this country during the week-end had resulted in convincing our Cabinet that something must be done to help Serbia in her hour of need, and that quickly. Measures are, therefore, being taken in the eleventh hour, but what they are has not been made public yet.

Northern Serbia.

The record of the military operations in the Balkans during the past week is far from reassuring. The salient feature is the fall of Kragujevaz, Serbia's great arsenal, which appears to have fallen on November 1 into the hands of Austro-German forces. Fighting here was desperate, and for four days the Serbs tenaciously held out against a superior enemy and inflicted severe punishment on him—20,000 casualties are spoken of—before retiring into the fastnesses to the south. By the fall of this strong place the whole northern section of Old Serbia, from the Save-Danube front to a distance of roughly sixty miles farther south, will have to be surrendered to the enemy. To all intents and purposes the latter, having taken the hills to the south of Grn Milanovaz (to the west of Kragujevaz), are in command of the Western Morava valley, or of a first, natural, defensive line reaching from Vishegrad, through Ushize (reported captured yesterday), eastwards to the Bulgarian frontier near Zaichar. Doubtless the enemy will fortify this line, thereby assuring their communications with Bulgaria against flank attacks. The position is a strong one, but it does not mark the limit of Teuton and Bulgar aggression, which is bent on pushing the brave Serbian army farther south with a view to utterly annihilate it.

The Nish Sector.

We pointed out last week that if, as was more than probable, the German and Bulgar forces had linked up across north-eastern Serbia, the Timok sector ceased to be of military significance. Unfortunately, this has happened; the Austro-German frontier is now contiguous with that of Bulgaria, and there is free intercourse between the two. However, except for the Danube as a most invaluable waterway from Orsova to Vidin, the nature of the terrain is against easy communication between the two parties in this sector. Hence the necessity for the enemy to seize and hold the railway line, which, leaving the Morava valley at Nish, climbs sharply eastwards to the Bulgarian frontier. Nish, therefore, is the immediate objective. It is being approached on three sides, if not on four; from the north, up the Morava valley; from the north-east, along the Timok valley and the Nish-Zaichar railway line; from the east along the Nishava River and the Nish-Sofia line; and, finally, from the south and south-east along the Vlasina. How long Nish will be able to hold out is beyond human knowledge; the enemy is within forty miles of the city on the north and twenty miles on the east; Pirot and Bela Palankra on the east, and Kniashevatz to the north-east, have already fallen into the hands of the Bulgars, and it is even reported (on Wednesday) that the heights overlooking Nish to the east have been taken by the enemy. Opposed to them are the fortifications of Nish which turn in this direction, few being turned towards the north. But the numerical strength of the enemy, and especally his artillery, is so vastly superior to that of the Serbs that unless a miracle occurs Nish must fall. The Government offices, the diplomatic body, and, with but few exceptions, the Government itself, have been removed, the Entente Ministers having gone to Kralievo, and the Government to Maturago. King Peter, it is said, is most unfortunately invalided at Topola, the historic town where his ancestor first raised the standard of revolt against the Turks.

Central Serbia.

In considering the defence of Nish it must be remembered that Voivode Putnik dare not risk having his army encircled by the enemy at this point, and that he must, therefore, withdraw it before it is too late. In other words, rather than defend the city to the last and find his retreat cut off, he will evacuate it and let the enemy occupy it. To hold on to the Nish-Constantinople line twenty-four hours more or less is of no moment, now that the inevitable must happen in view of the fact that no timely help is forthcoming. Far more important is the safety of the army. Is this assured? As very little is known concerning the exact positions held by the Bulgars to the west of Vrania and the north and west of Uskub, and concerning the progress made from Uskub in the direction of Vishegrad, it is difficult to define the Serbian line of retreat. A Serbian official communiqué on October 31 stated that "after violent attacks with large forces, the enemy succeeded in capturing the Kocanik Pass," which lies between Uskub and Kossovo. A Bulgarian communiqué on the same day claims that "on the plain of Kossovo our troops have reached the district north of Matjanik, and the upper Morava, east of Gilmi." Moreover, from the east of the Morava the Bulgars are reported to have advanced on Lescovaz, half-way between Nish and Vrania, with the result that a retreat along the Nish-Uskub line seems practically impossible, and that the encircling movement of the enemy is developing. As far as can be gathered, therefore, the only route open for the retreat of Voivode Putnik's army is in a south-westerly direction from Nish to Pristina. But the Bulgars are approaching the latter from the south, and verily it looks as though the plain of Kossovo was again to become famous in the annals of Balkan warfare. As for the Serbian retreat to Monastir, it appears only to be feasible after the Serbian army (or its Allies) has broken through the Vardar wedge which the Bulgars have succeeded in driving into the heart of Macedonia.

Southern Serbia.

The past week has seen little alteration in the lines held by the Allied forces and the enemy in southern Serbia, a circumstance which seems to indicate that the positions on both sides are being consolidated pending the general action along the entire front. The reported capture by us of Strumitza (in Bulgaria) had reference evidently only to Strumitza Station on the Uskub-Salonika line between Ghevgeli and Veles. Regarding the latter, the enemy appear still to be in possession of that part of the town lying to the east of the Vardar, and it is, therefore, highly improbable that the Uskub-Ishtip-Egri Palanka triangle held by the Bulgars is being threatened. Operations by the French seem to have been limited, pending the arrival of further support, to the Doiran sector, where, according to a Serbian report, the French have occupied the heights of Valandovo, Rabrava, and Tatarlisof, all of which dominate Strumitza, "which is not expected to resist much longer." To the south of Veles and west of the Vardar the Bulgars are attempting to reach Prilip and Monastir, but they are being heroically opposed by the southern Serbian army occupying a strong position at Isvar and flanked on their left by British cavalry, which is thus helping the stubborn resistance offered to the Bulgarian attempt to reach Monastir. No news has been received concerning the position in the Treska valley, which runs south from Uskub in the direction of Prilip and is of considerable strategic importance, but advices from Corfu state that Bulgarian troops have approached Kalkandelen, a few miles from the Albanian frontier, and are reported to have been stopped by Serbian troops. From the foregoing it will be seen that no decisive results have been obtained in this section during the past week. The military operations now developing are in preparation for a big action shortly to be fought, and in which the British and French troops will fill a predominating role. General Sir Bryan Mahon, in command of the British forces, has arrived in the Balkans.

Sea Operations.

A Paris communique issued on Wednesday states that "the Bulgarian Ægean coast has been blockaded since October 16, and that Dedeagatch was bombarded on October 21." There is no official confirmation of the landing of Anglo-French troops at Kavalla (reported on Tuesday), and though the same applies to the bombardment of Varna, on the Bulgarian Black Sea coast, by Russian warships, there is no reason to believe that the bombardment did not take place.

THE SUDAN TIMES.

We congratulate our contemporary, the *Sudan Times*, on the celebration of its twelfth birthday, which occurred last month. The paper has from its inception been characterised by a firm and unwavering belief in the value of the Sudan from all points of view, and it has certainly served to inspire confidence—confidence that has been fully justified by events—among serious inquirers regarding the Sudan as a field of investment. Apart from this, the paper is keenly appreciated by the ever-increasing British colony in the Sudan, which it serves with brightly written local reports and the latest telegraphic and other news from Europe.

TANGIER TO TEHERAN.

The announcement, made in Germany, that "the army of Field-Marshal von Mackensen, commander-in-chief of the Austro-German forces invading Serbia, is now styled 'The Army of Egypt'" sounds just a little bit like a counting of chickens before they are hatched. F.M. von Mackensen and his Huns are admittedly plagues, but they are not yet one of the plagues of Egypt. And it remains to be seen whether they ever will be.

***

A little while ago, as you may remember, the Germans were very angry indeed with us for employing "unfair" methods of disposing of their beautiful U boats. They complained that we sent out large vessels to demolish these harmless little craft, whose commanders, as all the world knows, have earned for themselves a quite unique reputation for chivalry. They also complained that we sent out very small vessels, which, being swift, and handled by men who liked not chivalry of the kind displayed by the commanders of the U boats, made themselves highly unpleasant to the said commanders. In fact, it seemed that unless we employed vessels of a particular (unspecified) size we should have to consider ourselves no gentlemen—according to German Admiralty standards. This, while it may have saddened the Ramsay Macdonalds and others of the Potsdam-for-ever Party, merely caused most of us, I fear, to smile. The German view, we remarked once more, was a thing peculiar to itself, and the German lack of the sense of humour was surely unique.

***

But we were mistaken. It has been left to M. Tontcheff, the eminent Bulgarian financial expert and sturdy henchman of Ferdinand the Traitor, to excel the Prussian pattern of unconscious humour. For he has been telling a correspondent of the *Pester Lloyd* that "the Bulgarian people *now* recognized Russia to be the natural enemy of Bulgaria," and that "at the same historical moment as the Bulgarian soldiers were joining hands with their victorious Austro-Hungarian and German comrades, the Russian Fleet was making a *felonious* attack on the Bulgarian coast." The italics are, of course, mine. Could there possibly be a more perfect example of gorgeous flapdoodle than this? I shall certainly keep my eyes open for any further interviews with M. Tontcheff, who in the matter of guileless simplicity could surely give the Heathen Chinee points and a beating.

***

On second thoughts, perhaps M. Tontcheff is merely mistaken regarding the feelings of his countrymen towards Russia. Possibly he has been so occupied in keeping in the closest possible touch with Berlin financial circles that he has rather lost touch with Bulgarian national feeling. The Bulgarians may have recognized Russia as their "natural enemy" long ago—say in 1878—and have been chafing all the time to "act accordingly," as M. Tontcheff so pleasingly phrases it. This would account for the extraordinary methods in which they have manifested their eagerness to fight against her and her Allies—the wholesale desertions, the mutinies of entire regiments, the placing on the retired list of many officers of high rank, the introduction of Turkish troops for the protection of Bulgarian soil, and so forth. And if this be so, I would ask M. Tontcheff whether it is at all likely that Russia would make any kind of attack—let alone a "felonious" one—on the Bulgarian coast. If she sent troops to Bulgaria it would obviously be only in order that they might help their Bulgar half-brothers in welcoming "their victorious Austro-Hungarian and German comrades." Let M. Tontcheff, therefore, calm himself, and continue to assist his royal master with his financial operations and calculations. Between them they may eventually find out the exact value of thirty pieces of silver—acquired at a price.

***

Another pleasing proof of Bulgarian willingness to learn, even from the Turk, is forthcoming in the announcement that all French and British subjects who failed to leave Bulgaria before the declaration of war are to be interned at ports on the Ægean. This, I take it, is in the hope that the French and British subjects referred to may meet their deaths in the course of a bombardment by the Allied Fleet. It is an ingenious idea, copied, of course, from the Turkish one of sending Frenchmen and Britons into the danger zone at Gallipoli. I trust that a hint similar to that which proved so effective in the case of Enver and the other Young Turks will be conveyed to Ferdinand, Radoslavoff and Co. Should this be done, they will probably copy the Turkish example once more.

***

Omdurman, I see, has suffered rather heavily from the effects of flood this year. It is not often that rain visits the town, but when it does one's thoughts turn instinctively to Niagara. This year a storm broke at 10 o'clock at night, after a preliminary bombardment of sand which had lasted some hours. By midnight the streets were entirely flooded and houses were beginning to fall. Omdurman was not built to withstand rain. I do not yet know whether the material damage to property was very great, but the flood was unfortunately attended by one fatality at least. The night was passed in safety by the inhabitants of the town, notwithstanding the danger which hidden sand-pits offered to the many people who were driven from their homes to seek refuge elsewhere. But on the following morning, when the danger seemed past, and when the lake which had been the market square only the night before was bathed in sunlight as people waded this way and that to their destinations, death laid a gaunt hand on a passing native and dragged him struggling to his doom before the eyes of all the people. A well which had long ago been filled up was the cause of the trouble. The filling had presumably given way beneath the weight of the flood and the man combined, and had sunk further into the earth, leaving the core free, a veritable death-trap.

***

In writing of this I am reminded of a Cairo newspaper, long since defunct, and of a weird and wonderful tale told on the occasion of a former flood in Khartoum. Sudden and heavy rains had fallen upon the city. So much we in Cairo knew through the medium of the Government; then came the British Daily Newspaper with its details. The rains, it said, had been quite unprecedented in volume. Scores of crocodiles had been washed down stream by the force of the accumulated currents of the Nile, and, bewildered and furious, they had landed at and attacked Khartoum. Natives with *nabouts* had done their best, but an advance had been made at some points, and notably one gigantic crocodile had succeeded in entering the Palace! The account came out under large headings, and was evidently advanced in entire good faith by the staff of the paper responsible for its circulation. So much for the credulity of certain newspaper men and for the imagination of a certain young luminary in a Government office. Whenever I see a "tall" story in the papers now I think of him, and of the misguided fate that made an officer (a capable one, I admit) of a born romancer. It was said of him in Cairo that his life was divided into two parts. The one he spent in the concoction of news for the local Press, the other in agonies of mind fearing that he might have successfully imposed upon his victims and that the humour of the thing would not appeal to the Powers that Be.

CORSAIR.

AUSTRO-HUNGARIAN REPRESSION AS A CAUSE OF THE WAR.

Last Monday, at the London School of Economics, Dr. Seton-Watson delivered the second of his series of lectures on Austro-Hungary and the Southern Slavs. He said that the dual constitution was in effect an arrangement between the Germans and the Magyars to divide the empire between them, buying the Poles and Croats with special concessions, so as to make them accomplices in holding down the remaining eight races. The constitution of Hungary guaranteed such rights as the use of their native tongue to the non-Magyar races, who formed about half the population, but in practice such rights were denied. On one occasion, when some Roumanians petitioned the Emperor in their native language, not only was the Magyar Government able to prevent the petition from reaching the sovereign, but the men who were responsible for it were arrested, and received among them twenty-nine years' imprisonment. Later the Hungarian Government formally and by decree dissolved the Roumanian National party in Hungary, declaring it illegal to have a political party on the basis of nationality. This policy of suppression was seen in every department. Since 1868 the number of Slovak elementary schools had been reduced from 1,800 to 400. A mother had been sent to prison for three days because her infant had been decorated with the Roumanian tricolour; in many places an inscription on a tombstone was not allowed in any language but Magyar. It was this kind of oppression that had reacted upon the relations between Austro-Hungary and Serbia, had created the Southern Slav question, and brought a very important quota to the causes of the present war.

NEAR EAST BOOKSHELF.

M. VENIZELOS.*

It has been remarked that the great war now raging has unmade many reputations and made but few fresh ones. Applied to the Balkans and South-Eastern Europe generally the remark would seem to be very true. But it certainly would not be true with regard to M. Venizelos. His policy may have failed to commend itself to those of his countrymen who have not yet succeeded in escaping from the cramped views that are the result of centuries of stagnation under Turkish rule; but to the outside world at least the true greatness of the man has only been made more apparent by the events of the past few weeks. We recognize that it is his fairmindedness, his readiness to give something in return for something, instead of expecting something for nothing, that has given the petty-minded men who have schemed to bring about his retirement their opportunity. And we make bold to form our own opinion of him—and of them. In this country he has had admirers ever since he sprang into prominence as a leader of the Cretans in their struggle for freedom; the number of those admirers was greatly increased when he took the helm of the Greek ship of State in the hour of need, and piloted that somewhat erratic craft into safe waters; it went up by leaps and bounds at the time of the Balkan War and the subsequent Conference of London; and, quite naturally, it has increased enormously since the outbreak of this great war, in which he has been one of the few European statesmen who have known their own minds and have not feared to speak them out. Obviously, therefore, the moment was an auspicious one for the appearance of his biography; and this little book is sure of a warm welcome.

It certainly opens in most promising fashion. The first chapter begins:—

> Early in the year 1864, in the village of Mourniès, a charming little town an hour's journey from Canea, in a house surrounded by almond trees in blossom, two Muhammedan hodjas and two Greek priests were praying; for two days and two nights they prayed ceaselessly near a room where the wife of a rich merchant of Canea was then in labour. . . . They all four prayed in different tongues that the child about to be born should have long life.
>
> At dawn on the third day a son was born, Eleftherios Venizelos, the future Minister of Greece.

That Moslem hodjas and Greek priests should unite in praying for the unborn child was surely a happy omen of the success that should attend his efforts to unite all elements of the country whose greatest citizen he is to-day.

Unfortunately, Dr. Kerofilas has been less happily inspired in the rest of his book than in the beginning. He tells us a great deal about M. Venizelos's political activities, his wonderful success, both at home and abroad, in winning friends for the cause to which he has devoted his life, of his courage in times of crisis, and of his eloquence and astuteness. But he does not tell us of these things in an attractive style, or one worthy of his subject. His facts are as a rule reliable; but they are not well arranged, especially in regard to chronological order; nor has he, we think, apportioned his space wisely. We are all comparatively familiar with M. Venizelos's work since he was called from Crete to Greece, and though any account of his career must, of course, cover this ground, it would surely have been better if the author had compressed Part II. and utilised some of the space thus gained in giving us a fuller sketch of the Cretan days, of which we would gladly know more. As it is, even of these Cretan days we get only the political side, so to say—and throughout the book there is the same fault. Of Venizelos the man we are told but little; and what little we are told is unsatisfying and conveys the impression that Dr. Kerofilas himself is but slightly interested in this side of his subject.

The account of the Conference of London is interesting, especially that part of it which describes the duel between M. Venizelos and Dr. Daneff over the question of Salonika. And even more interesting—because less familiar—to English readers are Chapters 8—10, dealing with the peace negotiations at Bucharest. But in reading them it will be well to bear in mind that they are written by a Greek, and, very naturally, give all the facts from the Greek point of view.

The Introduction contributed by M. Také Jonescu is admirable. It contains a fine tribute to M. Venizelos as statesman, patriot, Cretan, and Greek. And when M. Jonescu writes: "Sincerity, the cult of truth, that is the finest trait in Venizelos's character, and at the same time the secret of his strength," we feel that he has judged aright.

The record is brought down to the end of last August, when M. Venizelos and King Constantine were understood to be agreed upon the policy that Greece should follow. On his last page but one the author asks: "What is the point on which the King and his great Prime Minister are at one?" And he adds: "As we write it is impossible to know." In the light of subsequent events, question and answer sound rather pathetic. But M. Venizelos, we hope and believe, has not yet completed his service to Greece. His courage will keep alive his ideals, with which he has to some extent inspired his countrymen. The Greek people have faith in him, too, so that we may yet hope, with Dr. Kerofilas, "that Greece will follow the evolution marked out for her by the force of destiny, which since 1912 has been so gloriously personified by M. Venizelos."

* "Eleftherios Venizelos: His Life and Work." By Dr. C. Kerofilas. With an Introduction by M. Take Jonescu. Translated by Beatrice Barstow. (Murray. 3s. 6d. net.)

BOOK NOTES.

Messrs. George Newnes have just issued, at the price of 1s., "Sir Ian Hamilton's Despatches from the Dardanelles." Field-Marshal Sir Evelyn Wood contributes an introduction.

Mr. John Murray announces "With the Turkish Army in the Crimea and Asia Minor," by Thomas Buzzard, M.D. The book, which is illustrated, deals with incidents of the war that are comparatively little known, such as the battle of Tchernaia and operations connected with the siege of Kars.

Part XI. of the "Oxyrhynchus Papyri," edited by Drs. Grenfell and Hunt, has just been published by the Egypt Exploration Fund. It contains some new literary pieces, with translations and notes. The price is 25s.

Mr. Lawrence Balls' forthcoming book, "Egypt of the Egyptians," which Messrs. Pitman will publish very shortly, contains a portrait (signed) of Sultan Hussein, presented specially for the purpose, as frontispiece.

THE PRESS ON THE NEAR EAST.

Germany and Armenia.

The following paragraph, which is quoted from a German paper, *Die Hilfe*, by the *Challenge*, is, as far as we are aware, the only public expression of German opinion that could be construed into even a semblance of sympathy with Armenia in her present straits. The editor of *Die Hilfe* is a member of the Reichstag:—

. . . . It ought not to be forgotten in Germany that—rightly or unrightly—Germany will be held accountable by the neutrals for everything that happens now in Turkey. Now up to the present moment *no single voice has been raised in Germany to express even compassion for the Armenians*! That is a great mistake, since it is just the mission agents in Switzerland, in Holland, in Sweden and America, who know only too well that the Armenians have never found much sympathy in Germany, neither in 1895, when Abdul Hamid had a large part of the Armenian people slaughtered, nor in 1909 after the massacres of Adana.

The *Basler Nachrichten*, a Swiss paper of pronounced German sympathies, says:—

. . . . It would be not only gracious, but politically wise, if it were made a special concern on the German side to prevent Turkey proceeding against the Armenians more savagely than military necessity requires. A Germany that fills the neutral world day after day with complaints because its opponents employ Gurkhas, blacks from the Senegal, and Moors must take it into account that it will be held chargeable for everything which its Turkish allies perpetrate upon the unhappy Christian peoples of the East if it does not put forth all its power at Constantinople to procure relief.

The expression " more savagely than military necessity requires " is certainly worthy of note.

A "Perfect Scoundrel."

In one of the most interesting articles that have been written on the subject, M. Joseph Reinach sets forth in the *Morning Post* (October 28) an intimate character sketch of the Coburg of Sofia. It is not pleasant reading, but it is an article to be noted by inquirers into the why and wherefore of Bulgarian intervention. A personal friend of King Ferdinand for many years, M. Reinach writes with exceptional authority. In the early days of his acquaintanceship with the King the writer shows the latter to have been animated by profound friendship for France—his mother's native country—and by equally deep hatred for the Young Turk. Our first quotation is of a telegram addressed by Ferdinand to M. Reinach in answer to a telegram which he dispatched to the King lamenting the news that Bulgaria was negotiating for a loan in Berlin:—

Monsieur Joseph Reinach, Paris.—Sofia Palace, February 12, 1915.—I know nothing whatever of the news to which you refer. Whatever it may be, I believe the historian is too shrewd to accept without confirmation statements of such doubtful authenticity. *As to my sentiments, they remain unchanged.*—The *European*.

In his comments on subsequent events the writer says:—

In the month of April the betrayal, one of the most despicable recorded in history, was an accomplished fact. The Minister of Roumania at Sofia intimated as much to his Government, which communicated the information to the Powers of the Triple Entente. At the same time the King of the Hellenes sent a warning on the subject to at least one of the three Allied Governments; in fact, he even sent two warnings. But King Ferdinand continued to protest that he would remain at least neutral and that at heart he remained friendly to Russia, England, and France. Rarely has a ruler displayed such shameless hypocrisy.

M. Reinach thinks that had Russia been victorious in Galicia and in Poland, Ferdinand " would have come to an understanding with the Triple Entente instead of betraying his past and his honour by selling his armies to Germany." Writing of the emissaries bearing mendacious assurances from the King who were subsequently despatched to him, M. Reinach admits that, although his confidence had been rudely shaken, he continued to appeal to the conversational views so often expressed by the Bulgarian Monarch.

But I was deceived in believing, with Shakespeare, that there is no such thing as a perfect scoundrel. It seemed to me in July last that the time had come for armed intervention in the peninsula of the Balkans. I gave expression to that opinion in the proper quarters. I urged that vessels and an expeditionary force should be despatched to Salonika with the consent of the Greek Government. M. Hanotaux was of the same opinion. A few days later, on July 11, some of my friends were of opinion that I might yet do some good if I went and saw the King at Sofia. The time when such a visit would have been of any avail, even supposing it would ever have had any influence on the result, had gone by. However, I had a conversation on the subject with M. Delcassé, who, I am sorry to say, was still hopeful.

M. Reinach deplores the error in our diplomacy which prevented Serbia attacking Bulgaria before the Austro-German armies could reach the Danube.

Hamburg to Baghdad.

We take the following quotation from an article in the *Daily Graphic* by Mr. Waclaw Czerniewski, who quotes the saying of a famous diplomat regarding the Balkan people, " vox populi, vox asini," in support of his argument that although the Greek people are admittedly on our side, we may yet number them among our belligerents. He continues:—

But remember always that it is in the Balkans that the chief object of German endeavour lies. The present situation there is the result of the work of many years of German diplomacy. Germany is aiming at the creation of a world-empire from Hamburg to Baghdad. The Kaiser many years ago started his first diplomatic campaign with the object of winning over the Turks, to whom he could very easily picture a restoration, with German help, of a powerful Turkish empire such as it was in the time of Suleyman the Great. . . . Turkey in possession of Germany would control the communications from Russia to the Mediterranean and from England to India, China, Japan, and Australia. . . . However, to realise the idea of a Germano-Austro-Turkish Empire it is essential—apart from any other difficulties—either to bribe or crush the little Balkan States. . . . Thus it is most important that the Entente Powers should abandon their policy of wait and see, and should take the most energetic steps to apprehend Germany while yet the gateway to Constantinople remains locked.

The Great War.

In his sixty-fourth appreciation under the above heading, " Vielle Moustache " deals with affairs in the Balkan theatre in the *Saturday Review* (October 23). The situation has altered considerably since the article was written, but the paragraph quoted is as much to the point to-day as it ever was:—

We must have no more dribbling into a war arena of improvised armies. We have had time enough to straighten out our incongruous war methods, which find Indian soldiers perishing of cold in Flanders and Territorials of heat in Mesopotamia. When shall we begin to realise that we are making war, and that unless we succeed we go under as a nation? We still fail to conceive that we are up against a determined nation, not an army only. Peace with the German will only be dictated when behind the parchment stands the whole manhood of England, rifle in hand, with the glint on British bayonets ready for the thrust that will determine for the enemy a hesitating mind.

Baghdad.

In a leading article the *Morning Post* (October 30) deals with our advance upon Baghdad and the possibilities of adverses in the Balkans exposing our forces in Mesopotamia to danger of attack by a Turco-German army. In the first paragraph we quote a well-deserved tribute paid to our troops in this region, to whom the actual days of fighting have been " rare recreations."

No estimate of their work would be at all adequate which did not take account of the physical miseries they have endured in a climate which is quite beyond the conception of the average Englishman. Even Marco Polo, who passed through every extreme of weather in Asia with robust disregard, quailed before the summer of the Persian Gulf; and yet in a region where people in the best houses, with every available palliation, find it difficult to exist, General Nixon's troops have fought, toiled, and marched in the open in a way that raises our ideas of the capacity of the human constitution for adaptability and endurance. It is a magnificent record, but to judge by the methods of the English Government one might suppose it to be a story that was to be kept away at all price from the attention of the public.

In dealing with the chances of a Turco-German advance on Baghdad, the *Post* continues:—

However unsafe, as a rule, it may be to prophesy, one may safely predict that that is a development that need not be seriously considered. The British force, whether at Kut-el-Amara or Baghdad, is in a position quite out of range of practical menace from any movement from Constantinople. An army moving from the west would have to move on its feet and its wagon wheels from the time of arriving at the Taurus range. This means that the despatch of a great force is impracticable, while that of a small one is futile.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

It was stated in the *Egyptian Gazette* recently that on November 1 the Egyptian State Railways would take over and exploit the Helouan line of the Egyptian Delta Light Railways, but inquiries at the London offices of the company yesterday elicited the information that no such alteration in the service has as yet taken place. It will be remembered that, in the ordinary course of events, the line should have been taken over by the Egyptian Government last year, but that in view of the war the operation was suspended. Questions also arose between the company and the Government regarding the ownership of certain lands, which tended to retard the conclusion of the negotiations, but these have since been fully settled. It is now thought that the Government could, if it wished to, take over the line, without further delay, and a cable to that effect from Egypt may be expected in London at any moment.

***

I am pleased to see that the directors of the Baku Russian Petroleum Company have come to an agreement, and that Mr. Herbert Allen has resumed the chairmanship of the company, and that Mr. R. R. Tweed, the late manager at Baku, has agreed to act as managing director for a period of three years. I see, moreover, that Mr. Allen's method of setting aside a lump sum for depreciation, instead of writing specified amounts off certain assets, has been accepted. It is to be hoped that now the company has set its own house in order, a normal line of development will ensue in so far as war conditions permit.

***

A writer in the *Egyptian Gazette* points out that there seems to be a good deal of English gold in circulation in Egypt, "probably on account of the necessary opening of private hoards." The writer then says: "Every Briton knows that this gold ought to find its way to England so as to swell the gold reserve at this time of national crisis"; but, he adds, "many of us do not know how best to accomplish this with the small sums of gold that come our way from time to time." Unfortunately, he gives no idea as to how it is to be accomplished, and we remain in the dark. Subscriptions to the War Loan might, as was suggested some time ago, have been a means, but unfortunately no facilities have been granted to the Egyptian Post Office to receive small subscriptions, as is the case at home. It is really a pity that our Government should not have extended such facilities to Egypt, Cyprus, and the Sudan. Perhaps it is not too late to do so even now, even in Cyprus, which we came so near to losing some weeks ago.

***

The letter published elsewhere from the managing director of the Cairo Motor Company throws some interesting sidelights on the new motor-service in Cyprus, and shows the company to be nothing if not enterprising. I am pleased to see it, and predict a decided increase in the passenger traffic on the various routes exploited if fares are lowered so as to meet the purses of the Cypriots and to compete favourably with carriage traffic. Needless to say, and as much for their own sake as for that of Cyprus, I wish the company every success and admire their optimism.

***

The lately proposed cession of Cyprus to Greece has drawn forth many letters of protest from all parts of the country, but one which was sent by Lieut.-Colonel Martin to the *Scotsman* refers to a matter of some interest, and one that has never received much attention. I refer to the reafforestation of the island, on which we have spent much time and more money. Nevertheless, it has "progressed no further than a most promising beginning, and aims at no less than planting one-half the total area, with the assurance of such benefit to its conditions as to constitute a general improvement from penury to affluence and contentment in the near future." The forestry operations, continues the writer, "have been under the charge of Scottish experts, trained at Aberdeen and elsewhere—a fact which should preserve our future interest in the undertaking; but there exists a still more important aspect as regards ourselves. Cyprus promised to afford in a few years the most striking object-lesson of an island rescued from economic and agricultural depression by the means, mainly, of re-afforestation on a scale only possible to a practically despotic Government administration, such as exists frequently in many of our dependencies, but never at home. Hence administrative successes which are possible and actually effected in India, Egypt, Cyprus, etc., etc., are never witnessed, say, in Ireland or the Scottish Highlands in the same completeness as a finished scheme. It was hoped that in the matter of forestry Cyprus might, in a few years, afford an example to be followed in other islands nearer home, and notably in the Hebrides."

***

The writer has evidently taken the reafforestation of Cyprus much to heart, and, honestly, I cannot blame him. He frankly hates the thought that, in the event of our handing the island over to Greece (which is not impossible with our present Government), all our best efforts in this direction should be thrown to the four winds of Greek indifference, and he, therefore, wonders if it would not be possible to obtain an understanding that the scheme "now well in hand, though even yet insufficiently financed," be "carried to completion"? I am afraid that such an understanding would be impracticable.

***

"It is true," said M. Angeloff, the former Bulgarian Consul-General in Manchester, who resigned his post as a protest against Bulgaria's action in joining forces with the Central Powers, "that Great Britain has much trade with Bulgaria. But why is that? It is because she sends honest and durable goods to the peasantry of Bulgaria, whereas Germany sends showy and worthless goods." In this statement lies a truth which I have frequently urged in these columns. British goods are "honest" and "good," and people who appreciate these qualities will have no other goods. It must not be forgotten, however, that if Bulgaria, like all Near Eastern countries, is one of our good clients, she is in no smaller a degree a good customer of Austria and Germany, principally for the reason that goods of enemy origin are, in spite of being "worthless," pushed with an energy and enterprise of which we here have no conception. The superior quality of the British article is decidedly an asset of which we can all be proud, but the mere fact that it is superior is of no trade significance unless the public be made to realise it. Hitherto, our trade with Near Eastern countries has suffered on account of the little interest we have taken in trying to prove to the countries concerned that our goods are the best. Had we done so, and had we given a reasonable amount of credit, our trade returns would have been much higher. As it is, it is mainly due to men like M. Angeloff, who took pains to point out to their countrymen the superiority of our goods, that we have done as well as we did, and we owe them a debt of gratitude which, I hope, will not be forgotten.

***

In connection with the notice published recently in THE NEAR EAST of the tenders invited by the Egyptian Postal Administration for the supply of general stores, we have received a copy of the specification, which may be seen at THE NEAR EAST offices by firms interested. The closing date for offers is December 1. The stores required include:—Mail bags, boots, fuel, ready-made furniture, letter-boxes and accessories, hardware articles, electric lamps and accessories, electric fans, enamelled plates, safes, stamps and punches, special postal stationery, telltale watch requisites, lead seals, rolling-stock and accessories, flags, disinfectants, etc., etc.

***

A Central News message from Amsterdam (which I reproduce here with all reserve) states that it is reported from Constantinople that the Turkish Government endeavoured to obtain from Germany a credit of six million pounds Turkish. Germany, in reply, finding it inconvenient to hand over this amount of cash, offered instead to furnish the amount in Treasury bonds, and it is under cover of these bonds that Turkey is now issuing notes which have an artificial value throughout the Turkish Empire, but are payable in gold only one year after the conclusion of the war.

***

The Egyptian cotton crop for the season 1914-15 is estimated at from 6,500,000 to 7,000,000 cantars, as compared with 7,500,000 cantars for the season 1913-14—a considerably higher figure than was for long deemed possible. The decrease is almost entirely attributable to the damage effected by the attacks of ordinary boll and pink worms, which in some districts ruined two-thirds of the crop. Unless serious steps are taken to combat the evil (says the *Financier*), the outlook is threatening. A step in the right direction has probably been taken by a new law which decrees that all bolls still adhering to cotton plants must be removed and burned at least fifteen days before the date fixed in each district for the removal of the roots from the ground. The quality of the crop suffered in most varieties, and the damage done would probably have been greater but for the fact that there had been an increased cultivation of the Sakellarides cotton, which matures early and escapes the worm to a greater extent than other varieties. It is unusually difficult to estimate the value to the grower of the cotton crop.

Egyptian Post Office.

Annual Report.

The Postmaster-General of the Egyptian Postal Administration has published his annual report for the year 1914. The results attained during the first half of the year were satisfactory, but the outbreak of war and consequent suspension of various foreign services had a depressing effect upon the revenue. Various schemes for the development of the inland service were inevitably postponed, yet, despite these adverse circumstances, nine new offices and thirty-seven rural stations were opened during the year, and the house-to-house delivery service was extended to six new centres—viz., Manfalut, Deirut, Fashn, Baliana, and Bani-Mazar in Upper Egypt and Tukh in the Delta.

New Stamps.

A new issue of stamps was introduced in January to replace that antedating to 1879.

The features of the new issue are a distinctive design and colouring for each value and the addition of a 20 piastre stamp.

Dr. Wallis Budge, Keeper of Egyptian Antiquities at the British Museum, lent valuable aid in revising the proofs of those designs consisting of reproductions of Egyptian temples and monuments.

The issue has been favourably received, both in Egypt and abroad.

The number of licensed stamp retailers in Egypt is 282, as compared with 317 in the year 1913. The rate of commission allowed on sales thus affected was reduced from 2 per cent. to 1 per cent. towards the end of the year. The possession of a licence appears to be regarded as an asset by shopkeepers, and has the effect of attracting trade to their establishments. It is not, however, to the advantage of the Administration to grant licences, excepting where public convenience demands them, and the merits of each application are very carefully inquired into.

Correspondence.

It is estimated that more than 81½ million articles of correspondence were dealt with, a decrease of 6.2 in comparison with the year 1913. An exact statistic of registered articles is kept, and of these we learn that less than one per million was lost, a gratifying result especially as the registration service is one of the cheapest in the world.

A substantial increase in the number of postcards exchanged is attributed to motives of economy on the part of the public. All inland Government correspondence has been carried free of postage since April 1, 1914.

Foreign correspondence showed a decrease in the number of articles despatched and received of more than a million and almost two millions respectively, an inevitable consequence of the suspension of postal communications with certain countries.

The movement of funds handled by the Inland Service is an interesting study, and reveals the altered conditions brought about by the increased circulation of banknotes and the financial stringency occasioned by the war.

The insured letter service, for example, has benefited by the transmission of some 2¼ million pounds in excess of the figures for the preceding year. but this is outbalanced by a heavy drop in the number and value of specie groups.

Insured boxes sent abroad numbered 1,762, valued at £E16,050, compared with 3,005 valued at £E32,823 in the previous year.

Financial Results.

The receipts amount to £E305,611, and the expenditure to £E316,492, in comparison with £E334,759 and £E294,885, respectively, in 1913.

In order to permit of true comparison between the figures for the two years, it is necessary to take into consideration the following changes introduced in the formation of the Budget, with effect from April 1, 1914.

(1) The foreign transit dues, etc., (£E31,143), hitherto deducted from receipts, are not included in expenditure.

(2) The cost of services rendered by one Department of State to another no longer figures in the Budget; hence the receipts are decreased by £E34,330 for franking Governmental correspondence and the expenditure by about £E11,865 otherwise due to other departments.

Allowing for these modifications, the net decrease in receipts for 1914 is £E25,361, i.e., 7.7 per cent., and the increase in expenditure £E2,329, or 0.79 per cent.

The measures adopted consequent to the outbreak of war have realised a general economy of approximately £E23,311 upon the estimated expenditure for the financial year ending March 31, 1915.

Savings Bank Department.

Branches were opened at twelve new centres, bringing the total number of agencies of all kinds up to 1,984. The total number of depositors at the end of the year was 233,744 as compared with 282,401 in 1913.

The amount remaining to the credit of depositors on December 31 was £E466,797, as compared with £E642,678 last year.

The number of accounts remaining open excludes those for which no transaction was recorded during the year.

During the months of August and September many depositors hastened to withdraw their savings, but anxiety was soon allayed when it was found that these were readily available. Special arrangements were subsequently made to enable such individuals to redeposit the sums withdrawn.

A decrease of 16,920 transactions was recorded in the rural branch of the bank, which is the more regrettable in view of the fact that it is only in its infancy.

The students branch of the savings bank show an increase in the number of depositors, but a decrease in the total amount deposited. At the end of the year 13,919 accounts of a total value of £E10,342 remained open, as compared with 9,787, value £E12,821, in 1913. The officials of the Ministry of Education continue to co-operate in the endeavour to popularise the system among the students under their charge.

As a result of the labours of a Commission appointed in the summer of 1913, a comprehensive Postal Law has been drafted and forwarded to the Ministry for consideration by the Government's legal advisers.

In the autumn, a subscription list was opened by members of the staff, the proceeds of which, amounting to £400, were forwarded to the Secretary of the General Post Office, London, as a contribution to the Relief Fund for the families of British Postal Servants who have volunteered for active service. All grades of the staff responded with liberality, and it is gratifying to be able to place on record that this spontaneous and practical expression of sympathy with a kindred service owed its inception to the non-European employees of the Administration.

During the year, new postal premises at Suez were taken over from the State Buildings Department of the Ministry of Public Works and the important alterations to Cairo Post Office, which have extended over several years, are now within sight of completion.

Cash Services.

Cash transmitted by the Inland Service amounted to £E19,374,000, a decrease of £E5,788,000 compared with the preceding year. The exigencies of the situation during the latter half of the year demanded the substitution throughout the country of banknotes as an equivalent for cash. Since this change the importance, for the time being, of the Specie Group Service is nugatory. Whereas in 1913 nearly fifteen million pounds were carried by this means, less than nine and a-half millions were dealt with in 1914, and this chiefly during the first seven months of the year. On the other hand, there has been a substantial increase in the number and value of insured letters, owing to the fact that remittances for payment on crops, wages, etc., now take the form of banknotes despatched by this medium. The decrease recorded in the number and value of groups, however, is only partially due to the increased circulation of banknotes, for, after deduction of the increased value of insured letters from the total decrease in cash transmitted by post, there remains a diminution of £E3,500,033 in funds handled by the Inland Service, attributable to the dislocation of affairs consequent upon the war. In October the minimum tax on money orders was raised from ten milliemes to fifteen milliemes. The projected inauguration of an inland postal order service rendered this measure advisable.

Money orders exchanged with the Sudan showed an increase of 4,702 in number and £E64,321 in value. This is partly due to higher rates charged by banks for remittances from August till October, whilst Post Office commission remained unchanged.

Newspapers.

Newspapers and periodicals published in Egypt numbered 102 at the end of 1914, forty-four having ceased to appear during the course of the year. Of this number thirty-one were European. The disappearance of twenty-seven literary, scientific, and industrial reviews argues that public interest has been absorbed by the war. Several of the European newspapers have been acquired and combined by a company. The number of illustrated reviews increased to seven. Of the 102 newspapers published, sixty-five were published in Cairo, twenty-six in Alexandria, five in Tanta, three in Port Said, and one each in Assiut, Mansura, and Zagazig.

CYPRUS MOTOR SERVICE.

Reduced Rates.

(To the Editor of THE NEAR EAST.*)*

Sir,—In your edition of September 17 I notice a reference to our motor passenger service in Cyprus. Your correspondent's contentions regarding rates are quite justified and my company recognised that in order to popularise the motor service some sacrifices were required. These we have effected in the hope that increased traffic will justify the reductions.

The most frequented route is that from Larnaca to Nicosia, a distance of twenty-six miles. Our charge for this run is 3s. single (i.e., 1.4d. per mile), and 5s. 6d. return (i.e., 1.15d. per mile). These extremely low rates will only be justified if, as we hope, a more frequent intercourse is developed between these two important centres, through our rapid, comfortable, and cheap service.

An innovation that we have instituted is a through rate from Nicosia to Limassol and vice-versa, via Larnaca. The rate for this through-trip, a distance of sixty miles, is 10s. 9d., or at the rate of 2d. per mile; whilst the trip from Larnaca to Limassol is charged at 9s. single (i.e., 2.6d. per mile), and 16s. 3d. return (i.e., 2.2d. per mile).

On all runs, hand luggage is carried free, by means of special trailers constructed for the purpose.

Explanations have repeatedly been asked for the reason of the higher mileage charge on the Limassol route, and through the medium of your paper I should like to explain that this is due to the indifferent state of this road and the consequent wear on tyres and machinery.

My company hopes that, with the co-operation of the Public Works Department on the improvement of road surfaces, it will be possible to maintain the present rates, and that fresh lines may be developed next year which will offer visitors improved means of communications between the charming spots that abound on the island of Cyprus.—Yours faithfully,

E. W. FLOWER.
Managing Director of the Cairo Motor Co.

Writing on October 22 from Bucharest, the *Times* correspondent in the Balkan Peninsula stated that an official *communiqué* declares that, inasmuch as the Bulgarian Government has suspended the transit of goods from Salonika destined for Roumania, the Minister of Public Works has decided to prohibit the passage of goods from Bulgaria to foreign countries. The same correspondent adds that a meeting of Moldavian landowners and farmers at Jassy has decided, notwithstanding the high prices offered, to suspend the sale of agricultural produce to German buyers.

Egyptian Cotton.

THE COTTON CROP.

On October 24, the following official estimate of the 1915 Egypt cotton crop was posted in the Khedivial Bourse, Alexandria:—

The restriction by law of the cotton growing area was expected to result in the sowing of about 1,350,000 feddans, but according to the returns obtained by the Sarrafs for the Department of Direct Taxes, only 1,186,000 feddans were actually planted with the crop in 1915.

A check survey conducted in a few localities showed that the aggregate of the cotton areas given for these localities corresponded very nearly with the Sarrafs figures. It was thought inadvisable, therefore, to make any correction of the figures given by the Direct Taxes Department. This figure, viz., 1,186,000 feddans, is that which has accordingly been taken as the basis of the estimate of the yield. The damage due to the pink seed worm has been computed by a method based upon a careful examination of the results obtained in the field. By this method, checked by inspection of the more important localities, the cotton crop of Lower Egypt is estimated at 3.99 cantars per feddan, and that of Upper Egypt at 4.49 cantars per feddan; making an average for the whole of Egypt of 4.10 cantars per feddan, and a total, based on an area of 1,186,000 feddans of 4,863,000 cantars.

This is an estimate of the 1915 crop alone, and takes no account of the balance of the crop of 1914, which has been held over until this year. Should the whole crop of 1915, together with an appreciable quantity of last year's crop, which is believed to have been held back, reach Alexandria before the end of the cotton season, the deliveries will be somewhat higher than the above-mentioned estimate.

COTTON AND THE WAR.

Mr. John A. Todd, Professor of Economics at the University College, Nottingham, contributes an important article to the new quarterly number of the "Bulletin" of the Imperial Institute," to be published this month. The question of the world's cotton supply (he points out) has been critical since the beginning of the present century, for, although the world's crops have nearly doubled in that period, the extraordinary expansion of the demand has all the time been pressing hard upon the increased supplies. In five out of ten seasons before the war the world's cotton consumption was actually in excess of the world's crops.

Owing to the temporary fall in prices at the beginning of the war the production of cotton all over the world was very much curtailed. But the world's surplus stocks have now been to a considerable extent worked off, and any revival of normal trade after the war coming upon the reduced supplies of raw material will, it is pointed out, almost certainly produce a severe cotton famine.

Only one thing can be done to prepare the way for meeting this difficulty when it arises, namely, to arouse interest in the development of new cotton fields within the Empire, especially in India, Egypt, and the Sudan, where the work of the British Cotton Growing Association and the International Cotton Federation has already shown the way. Russia has shown her wisdom in developing cotton fields in Turkestan and Trans-Caucasia, which now supply the greater part of her large native consumption of cotton. Germany, in her own sphere of influence in the Levant, has, it must be admitted, produced large results. That is a point to be remembered in the inevitable re-arrangement of the Turkish Empire after the war, as is also the fact that in Mesopotamia we have a potentian cotton field, which will probably rival Egypt and the Sudan in quality as well as quantity. But the greatest possibilities for an immediate increase in our cotton supplies lie in India, where great improvements, both in quality and quantity have been made in recent years.

Every penny that the British Empire invests now in cotton growing, either in education or in irrigation, will, Professor Todd considers, be a profitable investment for the future, and the sooner the investment is made, the greater, as well as the quicker, will be the return. What we shall want after the war is not merely a British cotton growing association with a capital of a paltry £500,000, but an organisation of the size of a State department, with all the combined resources of the British Empire behind it.

EGYPT'S TEXTILE IMPORTS.

The following tables, from the report recently issued by H.M. Vice-Consul at Alexandria, show the value of the share of the United Kingdom, as compared with the shares of the principal competing countries, in the chief sub-divisions of textiles imported into Alexandria during the years 1912-14 :—

The following official communication is issued: The General Officer Commanding-in-Chief has received numerous applications from merchants for permission to export eggs from Egypt. In certain cases where merchants were proved to have eggs ready packed for export by October 11, permission was given to ship them. No further export of eggs can under any circumstances be permitted for the present.

PRODUCE REPORT.

London, November 4.

Currants.

The arrivals of this and last week amount to about 2,500 tons. The market continues firm at previous rates, but owing to other kinds being in a, comparatively, small supply more business is being done in Amalias and Provincial.

Sultanas.

Smyrnas are nearly exhausted; common to fine sell at 85s. to 105s. while new Greeks are quoted 102s. to 115s., and Afghans 84s.

Figs.

There has been only a moderate demand this past week, but the market is steady at previous rates.

Dates.

There has been a further advance in quotations for new crop, but with only small business passing.

Seeds.

Linseed has been, more or less, steady, but rather quiet. London-Calcutta spot and afloat is quoted 62s. 3d., while the same has been paid for November-December, and Bombay ditto 64s. Cottonseed has been very firm, with sellers offering sparingly. London-Egyptian leading is quoted £11 10s. per ton. Rapeseed continues firm, but quiet. Guzerat November-December 63s., and brown Cawnpore pure basis ditto 57s. 6d.

Oils.

Linseed oil ruled firmer, with a good demand; spot pipes £31 5s., barrels £31 15s.; November-December, £32; January-April, £32 15s.; May-August, £33 10s.. Cotton oil is quiet; crude spot in pipes £30 10s. to £30 15s.; refined pale pipes £33 10s., and barrels sweet £37 to £39, as to make. Rapeseed oil is firmly held; ordinary brown naked spot £38; English refined barrels £40 to £41.

Oilcakes.

Cotton Cakes.—There are no stocks of Egyptian in the market, but October and November shipments are being offered at £8 12s. 6d., ex ship, with only small business, however, doing. English makes are firmly held at £8 17s. 6d. to £9, and Bombay £8 15s. per ton.

Linseed Cakes.—There has been a general scarcity of all descriptions, with the result of quotations being dearer, especially for home-made descriptions. Best London made are quoted at £11 15s. to £11 17s. 6d. Fine seedy Argentine sold at £11 12s. 6d. to £11 15s., and Japanese in bags for arrivals are quoted £11 7s. 6d. to £11 10s.

Locust Beans.

The scarcity of this kind continues, and prices are dearer, £8 5s. for whole and £8 15s. for kibbled.

With reference to previous notices regarding the requirement of Consular certificate of non-enemy origin for imports and declarations of ultimate destination for exports, a recent issue of the Cyprus *Gazette* contains a further Government notice to importers and exporters prescribing amended regulations regarding certificates of origin for certain goods imported into Cyprus from various European countries and declarations of ultimate destination in respect of all exports to various foreign countries from Cyprus. Under these amended regulations, certificates of origin are, for the present, only required in respect of imports from Norway, Sweden, Denmark, Holland, and Switzerland.

Roumanian Notes.

(From Our Own Correspondent.)

Bucharest, October 15, 1915.

German Coal.

Coal from Germany is commencing to arrive in Roumania, and will be employed first of all in the lighting of Bucharest and Galatz, both partly lit by gas. The coke obtained will be sold to the public at reduced rates. When the needs of the gas companies have been satisfied, the balance will be put at the disposal of the public.

Transit to and from Bulgaria.

For some days past transit of goods between Germany and Bulgaria *via* Roumania is at a complete standstill, and nothing is passing through the country. The same applies to transit in the opposite direction, and the transport of eggs and poultry from Bulgaria to Austria and Germany has ceased. It does not seem likely, with the limited means of railway transit in Bulgaria, that much can be done in either direction for some time to come.

State Receipts.

The receipts of the Treasury for the year 1914-1915 amount, for the period April 1 to August 31, to 535 million fr. Placing the receipts for the rest of the financial year, September 1 to September 30, at five million francs, it is estimated that 540 millions will have been obtained. As the Government estimate at the commencement of the year was 600 millions, there will be a deficit of 60 millions to deal with.

Although the actual result is unfavourable, yet when one takes into consideration that war has been general, and that consequently customs' receipts, which form the principal source of revenue, have been greatly reduced, the result must be taken as really satisfactory, especially when it is remembered that the Roumanian agriculturists have found it nearly impossible to export their cereals.

Economic Societies.

Statistics on Rural Economic Societies, which in 1903 had barely commenced to exist, have just been published, and show most surprising results.

In 1903 there existed but eight societies, covering an area of 4,940 hectares, and paying an annual rent of 94,789 fr.

In 1904 the number had doubled with 10,557 hectares under cultivation, paying rent valued at 256,025 fr.

In 1905 the number of societies had risen to thirty-seven, cultivating 30,358 hectares, with a rental of 626,114 fr.

In 1906 the number had increased to sixty-eight associations, with 54,687 hectares, and funds of over a million francs. Since then the numbers have advanced steadily, so that in 1913 there were no less than 495 associations, with 76,678 members, paying 13,497,081 fr. annually and possessing a reserve capital of 4,289,981 fr.

The proprietors of the land let out to the Societies are the State, Communes and philanthropic institutions (hospitals, etc.) possessing land property.

ROUMANIAN OIL NEWS.

Exports of oil products from Roumania are estimated to amount to about 1,100 tons per day, says *Oil News*. These do not include petrol and oil fuel, both of which articles are on the prohibited list. There is an insufficient supply of lubricants, because this means re-distillation, which refiners are not inclined to undertake in present conditions. Another factor with similar influence on supply is the lack of sulphuric acid, which there is no means of filling.

Mail advices dated Bucharest, September 26, says the above journal, describe the general position as somewhat improved. Exports of lamp oil and the heavy oils to Austria-Hungary and Germany have been resumed and there is a brisk demand. The quantity of oil despatched varies from day to day owing to the irregular running of the trains and the number of empty tank-waggons returning over the frontier; some days as many as a hundred waggons arrive, whilst other days the number scarcely reaches twenty.

Engineering Notes.

A New Harrow for Dry Lands.

While the modern harrow, in various styles and designs, is being used in almost all the well-managed estates in the East, it is a remarkable fact that the archaic home-made native harrow can still be seen at work in small holdings, and often in large estates, in the Near East. The former is the outcome of the continuous progress of modern agricultural engineering, and the latter is one of the oldest and simplest rustic contrivances that man invented for the cultivation of his land; but it is at the same time very interesting as a survival of a primitive method which is adhered to in spite of the progress that has been made in methods of land cultivation. For its construction two pieces of timber are required, a log 5 ft. or 6 ft. long by 10 ins. to 12 ins. in diameter, in the middle of which the end of a pole is securely fastened, both thus forming a "T," and this is the harrow. To use it over ploughed land, one end of the pole is hooked or chained to the yoke of a pair of oxen, in the same way as the beam of a swing-plough. The driver stands on the log, which is drawn over the ploughed land and levels it, breaking the clods, or covering seed where sown. In some districts in the Near East this method of harrowing is evidently preferred to any other modern method; and the writer had once the opportunity to ask a native farmer why he adhered to that primitive contrivance while modern chain-harrows were available in the estate. His answer was that those "European" devices were very good for certain soils, but not half as good as his old wooden harrow for dry soils. The reason he gave was not quite correct, but explained in some way why the archaic harrow is still in use. It was observed, and rightly believed, that the way in which it levelled the surface of a ploughed land tended to preserve the moisture below the surface. The weight of the dragged log over the surface levels the latter and breaks the clods, but, evidently, does not disturb the cavities which are formed by the plough below the surface of the soil, and which hold the water from rains when such fall in dry districts. The creation of such cavities is effected by a new harrow, the manufacturers of which apparently agree with the ideas of the Oriental farmer. The new harrow is proving an excellent implement for use in dry farming regions, where it is desired to prepare the soil in a way that the small amount of moisture that is normally available may be preserved. The implement can be drawn by two horses or bullocks, and the harrow-blades are so attached that they spade up the earth more deeply and pulverize it more finely than can be done by ordinary disc or tooth harrows. The action of the spades forms cup-like cavities below the surface of the soil, and these receive and hold the water from rains and showers, and thus conserve the moisture for the benefit of growing crops, whereas, it is claimed, a plough, or other harrows, would cut furrows that would cause the water to run off or collect in small pools on the surface, where it would evaporate immediately in the sunshine after the shower was over. This feature makes this new spading-harrow particularly useful in orchards, as it prevents the rainfall from running off or evaporating, and preserving it where every particle can be reached by the network of roots below the surface of the soil.

Irrigation Works in Mesopotamia.

Referring to the possibilities awaiting the contractor and engineer in the vast fertile and practically untouched regions hitherto under the dominion of the Turks, so soon as the present disastrous war should come to an end, the *Engineer* says that, apart from the projects already contemplated by foreign contractors holding concessions or construction contracts from the Ottoman Government, there are numerous opportunities which exist in other directions, and which will now the more readily obtain the financial support denied—it may be believed—to them so long as the corrupt and unreliable Turkish officials remained in power.

Among the territories especially likely to benefit from economic development of this character are the valleys of Mesopotamia and the Euphrates, where a great scheme of irrigation is under construction. The responsible undertaker, under ordinary circumstances, would have been the Ottoman Government itself, and the services of one of the best known and most successful foreign consulting engineers, Sir William Willcocks, had been secured, his comprehensive and courageous plans for the introduction of a widely embracing irrigation project having long ago been prepared and accepted. The estimated expenditure called for amounted to over £19,000,000, and the greater part of this sum had been practically guaranteed to the Ottoman Government, while the remainder was upon the point of being raised.

In connection with this scheme, the railway constructed by the Germans with so much trouble and at such expense—the Imperial Ottoman Baghdad line to link up the Anatolian railway system at Konia with Baghdad—will be found a most valuable asset and adjunct. Coming on from Constantinople, this railway has now been completed by Teutonic capital and by Ottoman labour as far as the western side of the Taurus mountains, a large section of some 80 miles having been comparatively recently opened between Baghdad and Sammarra. That the whole of the system will pass away from Turkish and German control, probably into that of the British and French Governments as a joint undertaking, seems highly probable. In that case the line would be further extended across the Taurus mountains direct to Baghdad, thence to Busra, the original terminus determined upon, or, as an alternative, to Koweit. This accomplished, and a direct line of over 350 miles of track secured from Baghdad through Damascus to Beyrout, the whole of the immense Mesopotamian trade would be controlled and British influence in the important districts of the Persian Gulf would be predominantly established.

THE PORT OF SALONIKA.

M. Bartissol, the well-known French engineer, who constructed the port of Salonika, has given some interesting particulars concerning the port. They were recently published in the French paper *L'Information*, and were recently reproduced and amplified in an article in the *Liverpool Journal of Commerce*. The following are some extracts from the last-named article:—

Before the construction of the existing port, Salonika only possessed a range of quays extending over a length of two kilometres. When the idea was mooted for constructing new quays provided with the most modern equipment, M. Bartissol obtained a subvention of 1,500,000 frs. from the Ottoman Government, and a purely French company was formed with a capital of 5,000,000 frs., debentures to the amount of 8,000,000 frs. being also issued. The revenue from port dues has steadily increased; it has grown from 692,000 frs. in 1905 to 914,000 frs. in 1913. The year 1914 showed the effects of the Balkan wars, and the receipts were only 834,000 frs. The record year was 1910, when the receipts crossed the million franc mark.

The new quays at Salonika have an available working length of 1,200 metres, and the depth of water varies between 8 and 10 metres, thus permitting the approach of large vessels. They comprise a length of 400 metres on the land front with two perpendicular breakwaters at the extremities, each with a length of 200 metres. The entrance to the port is protected by a dyke parallel to the shore at a distance of about 300 metres. The equipment consists of a 15-ton crane and four 5-ton cranes, and thus the heaviest goods can be easily handled. The railway lines run down to the quays and are provided with turn-tables, so that goods can be discharged direct into the trucks.

One interesting thing about the port of Salonika is that it possesses a sort of free zone, which is covered with buildings belonging to Serbia. The explanation of this apparent anomaly is as follows. At the time when Salonika belonged to Turkey the Serbians, who had a considerable trade in cattle through the port, found that the animals coming from Turkey were constantly decimated by epidemics which spread sometimes to the Serbian cattle. To prevent the losses arising from these diseases the Serbians obtained from the Turkish Government a site between the old and the new quays upon which they could build cattle sheds. The Greek Government confirmed this concession and extended it, permitting the free entry of Serbian goods, and it is guarded by Serbian Customs men. An official contract recognising in a more precise manner the extent of the freee zone was in preparation before the war. It provided for the building of new quays at a cost of about 7,000,000 frs. The war prevented the realisation of this project, but it remains operative.

A description of the port of Salonika would be incomplete without mention of the railways behind it. Of these there are three. One goes to Constantinople by way of Seres, Drama, and Dedeagatch. The second runs northward into Serbia, through Uskub and Nish to Belgrade. The third line travels westwards and terminates at Monastir, near the Albanian frontier.

The first of these lines is French as far as Dedeagatch, after which it forms part of the Oriental Railways built by Baron Hirsch. The second and third lines also form part of the system of the Chemins de Fer Orientaux, as is the case with the line starting at Dedeagatch and running through Adrianople to Sofia. The importance of the Salonika-Nish-Belgrade line, M. Bartissol said, did not escape the notice of the Germans, who acquired an interest and placed some Austrian and a few German representatives on the council of administration. They also made strong efforts to get a footing in the Port of Salonika Company. Shortly before the outbreak of war large purchases of shares were made in Paris for German account, and the Germans hoped gradually to obtain, if not full control of the port of Salonika, at least a preponderating voice in the management of the company. Thanks to the policy of the French company there is no chance of these desires being realized, and it is due to the company's steady opposition to the German financial intrigues that the Anglo-French forces are now able to land.

GRANT & CHINN,
The British Sanitary Engineers of Egypt and the Sudan.
CAIRO and ALEXANDRIA.
Telegraphic Address: "TUBULAR."
Agents for SHANKS, OF BARRHEAD; and THE BERKEFELD FILTER CO.

SULZER BROTHERS, WINTERTHUR, SWITZERLAND
Steam Engines of all sizes, especially Uniflow Engines, Boilers and Superheaters. Sulzer Diesel Oil Engines from 20 to 6,000 B.H.P. Pumps of various systems, particularly Sulzer's high and low lift Centrifugal Pumps. Fans of all kinds. Steam and hot water heating. Ice and Refrigerating Machinery (Linde system)
ALEXANDRIA OFFICE: 26, CHERIF PASHA STREET.
O. B. 117. Telg.: "Sulzer, Alexandria." Tel. No. 738.
CAIRO OFFICE: 28, SHARIA EL MAGHRABY.

Trade Notes.

Egypt.

Tenders are invited by the Egyptian Coast Guard Administration for the supply and delivery of the following stores required during the year 1916 :—(1) 4,030 metric tons of large, first class, Cardiff coal and 40 tons of best quality Newcastle coal. (2) 170 metric tons of petroleum. (3) 11 metric tons of benzine. Copies of the specifications and conditions of tender may be obtained from the Director-General, Coast Guard Administration, Cairo, by whom sealed tenders will be received up to noon on December 1. A provisional deposit equal to 2 per cent., or a bank guarantee of 10 per cent., of the value of the offer must accompany each tender. A copy of each of the specifications and conditions of tender may be consulted by United Kingdom exporters of the materials mentioned at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

Tenders are invited by the Egyptian Ministry of the Interior for the supply of equipment and clothing required by the Stores Department during 1916, including the following :—Bandoliers, belts, bayonet frogs, ammunition pouches, cartridges, and other accoutrements; brushes; bits, bridles, chains, collars, reins and other horse and camel equipment; camp equipment; bedsteads, chairs, cupboards, tables and other furniture; tools; calico, canvas, uniform cloth and other textile materials; leather; oils; paints; boots; breeches, jackets, shirts, tunics, trousers, and other clothing.

Copies of the specifications, with forms of tender, etc., may be obtained, at a cost of 2s. per copy, from the office of Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Broadway, Westminster, London, S.W. Sealed tenders, on the proper form, will be received, up to noon on December 1, by the Under-Secretary of State (Personnel and Equipment Department), Ministry of the Interior, Cairo.

Tenders are invited by the Director-General, Coast Guard Administration, Cairo, for the supply of coal, petroleum, and benzine required by the Service during the year 1916. Specification may be seen and all information obtained at the Coast Guard Magazine, Arsenal, Alexandria, or at the Coast Guard offices at Port Said, Ismailia, Suez, and Damietta. Date, December 1.

Tenders are invited by the Egyptian State Railways and Telegraphs Department for the supply of 20,000 oak sleepers and 101,300 pine sleepers. The sleepers must be of very good quality wood, and preferably of one of the following species :—European and Japanese oak, Montenegrin, Swedish and Norwegian and Baltic red pine or any other species of oak or pine of equal quality. In default, tenders for sleepers of any other quality of wood coming from Japan, America, India or Australia, would be taken into consideration. Copies of the specification, containing form of tender and form of bank guarantee, may be purchased, price 2s. each, from Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Broadway, Westminster, London, S.W. Sealed tenders, on the proper forms, will be received up to 10 a.m. on December 15, by the General Manager, Egyptian State Railways and Telegraphs, Cairo.

For particulars concerning the tenders invited by the Egyptian Postal Administration, see page 21.

Tenders are invited by the Controller, Cairo Tanzim Department, for the supply of general stores required by the Giza and Gezira Water Works during the financial year 1916-1917. Date, December 2.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.

MANUFACTURERS OF

"LALIMLI" WOOL WEAR

Flannels, Serges, Blankets, Tweeds, Broadcloths, Coatings, Hosiery, Rugs, Puttees, Uniforms, &c., &c. . . . .

CONTRACTORS TO GOVERNMENT

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.

Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.

Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

New Egerton Woollen Mills Co., Ltd.

National Bank of Egypt.

The National Bank of Egypt, says the *Statist* in its yearly bank review, started originally with a capital of £1,000,000 sterling, but in the following year the capital was increased to £1,500,000, which was the amount paid up in the first balance-sheet issued by the institution. In 1903 50,000 new shares were issued at a premium of £4 per share. In 1904 the same number of new shares was issued at a premium of £6 per share. This was followed in 1905 by a further issue of 50,000 new shares, which were placed at a premium of £10 per share. The capital has remained at £3,000,000 since 1905. The bank has the sole concession for the issue of bank notes in Egypt, the power of circulation being unlimited. In addition to the head office in Cairo there are offices in Alexandria and London, together with sixteen branches in Egypt and three in the Soudan. The bank was founded for the purpose, among other things, of enabling banking assistance to be given to the fellaheen of Egypt, and at the end of 1901 a sum of over £400,000 sterling was invested in these loans, nearly the whole being covered by mortgages. The business was so successful that it was possible to have put out a much larger sum, but the directors came to the conclusion that a larger part of the bank's capital could not prudently be devoted to this business. It was announced at the meeting in March, 1902, that, on account of the good that was being done in this direction, the Government was desirous of extending the system, and had agreed to advance the bank £250,000 to enable the work to continue. It was found, however, that this could only be in the nature of things a temporary expedient, and, finally, towards the end of the year there was brought into existence the Agricultural Bank of Egypt, to which the National Bank handed over its fellaheen loan business. In addition to a considerable holding of ordinary shares the National Bank possesses half the deferred shares of the Agricultural Bank. It also holds an important interest in the Cassa di Sconto Bank. A distinctly successful career has been experienced by the institution. It has filled a badly felt want in Egypt and has also done well for its shareholders.

The main feature of the accounts for 1914 is the largely increased amount of the bank note issue, which is £E1,464.954, as compared with £E2,236,117, and on this question the Governor pointed out that :—

"On the declaration of war the importation of gold into this country became no longer possible, and to meet the demand for currency necessary for commercial requirements, the Egyptian Government decreed the notes of the National Bank of Egypt to be legal tender throughout the country and at the bank. This prompt measure, for which I think everybody in Egypt is deeply grateful to the Government, coupled with the immediate steps taken in England by the Treasury and the Bank of England to re-establish the discount market, made the financing of the cotton crop to the extent of its demand an easy matter from the point of view of sufficiency of funds. Our bank, I am glad to say, worked in cordial co-operation with the Government, and has fully proved its utility in the hour of need. Without availing itself of the moratorium, the bank not only financed the cotton crop, but was also able to give assistance right and left in the earlier days of the crisis when there was a run on the banks and before the notes were made legal tender.

"While not departing from our statutory backing of the notes, namely, half gold and half gilt-edged securities of the Egyptian Government's approval, we were able to expand the currency in Egypt by purchasing and depositing against the note issue Egyptian Government three months' Treasury Bills, the amount of which was passed to the credit of the Ministry of Finance."

The deposits at the end of 1914 amounted to £E7,092,211, which compares with £E391,696 shown in the first accounts issued. The total assets in the first balance-sheet stood at £E3,274,778, while at December 31, 1914, the total assets were £E19,499,943. From a comparison of these figures the growth of the institution may be seen, but in order to give a clearer view of the great growth that has occurred we set out herewith an abstract of the liabilities and assets for each year since the formation of the bank, the figures being given in Egyptian pounds.

The first dividend was 7 per cent., but as 1901 was much less prosperous the dividend was reduced to 5½ per cent. For 1902 and 1903 the rate was 6 per cent. per annum; it was raised to 7 per cent. for 1914, to 8 per cent. for 1905, and to 9 per cent. for 1906, at which figure it remained until 1911, when it was reduced to 8 per cent., a rate which was maintained for 1912. For 1913 the rate was 7½ per cent., but for 1914 the dividend has been reduced to 4 per cent.

We set out below a statement of the profits made for each year since the formation of the bank :—

PROFITS OF THE NATIONAL BANK OF EGYPT.

Year ended Dec. 31.	Gross Profit (a). £E.	Expenses. £E.	Net Profit. £E.	Dividend Amount. £E.	Dividend Rate. %	Reserve, Invest., Deprn., etc. £E.	Carried Forward. £E.
1914	468,089*	159,595	308,494	117,000	4	208,706	—
1913	398,917	178,907	220,010	219,375	7½	—	17,212
1912	372,774	142,244	230,530	234,000	8	—	16,577
1911	383,983	131,647	252,336	234,000	8	—	20,047
1910	387,068	124,631	262,427	263,250	9	—	1,711
1909	376,353	120,372	255,981	263,250	9	—	2,534
1908	395,591	133,121	262,470	263,250	9	—	9,803
1907	491,147	126,220	364,927	263,250	9	119,331	10,583
1906	465,154	117,957	347,197	263,250	9	85,618	28,237
1905	371,947	99,059	272,888	195,000	8	77,666	29,908
1904	374,479	77,978	296,501	136,500	7	153,600	29,686
1903	184,582	87,815	96,767	117,000	6	14,172	23,285
1902	189,448	88,354	101,094	87,750	6	10,466	18,085
1901	134,583	34,047	100,536	80,437	5½	10,405	15,207
1900	187,733	67,832	119,901	102,375	7	6,747	10,779

(a) Less rebate of interest on bills not yet due.
*Includes £E 219,375 taken from reserve.

The proportion that the shown net profit bears to the paid up capital is 10.5 per cent., to capital and reserve combined 7.4 per cent., and to the total working resources, amounting to £E19,499,943, 1.6 per cent.

Mr. F. T. Rowlatt, the Governor, pointed out in March last that although Egypt is suffering from the effects of the war, yet it is only a question of economy for a time. The necessary foodstuffs are abundant, and her only important industry, which is the production and refining of sugar, has done very much better during the war owing to the rise in prices of that article. "Then we must look to the future. The political status of the country is altered. She is free to borrow and develop her resources. It will be possible to take up again the great drainage and irrigation works, with a free hand to make satisfactory financial arrangements."

BAKU RUSSIAN PETROLEUM CO.

It is satisfactory to find that the directors of the Baku Russian Petroleum Company have been able to come to an agreement with respect to the various matters over which the recent dispute arose, says the *Investor's Review*. The amended report now issued states that Mr. Herbert Allen has consented to resume the chairmanship of the company, and that Mr. R. R. Tweed, the late manager at Baku, has agreed to act as managing director for three years. In the accounts as originally presented the question of depreciation was one of the rocks on which the directors split, and a compromise appears to have been made, as the new balance-sheet sets out the assets in the manner adopted by Mr. Rutherford, but Mr. Allen's method is accepted of setting aside a lump sum for depreciation instead of writing specified amounts off certain assets. The balance on profit and loss account remains at £27,286, and the provision for depreciation is also unchanged at £60,236, but of this £41,513 has been written off and £18,724 has been transferred to a reserve against contingencies arising out of the absence of certain inventories. These appropriations leave a debit of £32,950, of which £10,527 is met by the balance brought forward and £22,422 by a transfer from the general reserve set aside a year ago.

TAX ON COTTON FUTURES.

It is announced, says the *Egyptian Gazette*, that the Government intends to put a tax on all operations in cotton futures. The Commission Bourse, presided over by Mr. King Lewis, the Director of the Customs Administration, has been entrusted with the duty of studying this new impost. It is said that the proposed tax will be no less than P.T. 50 for a contract of 250 kantars. As soon as the conditions of this tax have been decided upon, the matter will be submitted to the consideration of the brokers.

The general opinion at Alexandria is that this tax is far too high, and is, in fact, higher than the tax on Egyptian cotton future operations in Liverpool, which is only two shillings per one hundred bales, corresponding to 750 kantars.

Roumania holds the record for cheapness of telegraphic communication. Telegrams of not more than a certain number of words can be sent anywhere within Roumania for 2½d., and at that price proves (so it is said) a fruitful source of revenue.

NATIONAL BANK OF GREECE.

ESTABLISHED IN 1841.

CAPITAL - Dr. 20,000,000. RESERVES - Dr. 13,500,000.

Referring to Egypt, it says: "Egypt is said to have been suffering from high prices. This, however, is apparently only the case in such places as Alexandria, where the presence of large numbers of troops has been responsible for a rise in the cost of living. But on the whole, although imported goods have gone up in price, the necessaries of life are cheaper."

SERBIAN ARMY CONTRACTS.

In the King's Bench Division on Thursday, Mr. Justice Darling heard an application in a pending special jury action of the Balkan Agency, Ltd. *v.* James Compton and Sons, Ltd., in which there is a claim for £18,000 commission.

Counsel for the defendants said they were a big firm of army clothing contractors, and the Balkan Agency were claiming £18,000 which they alleged was due to them as commission for placing a contract, on behalf of the defendants, with the Serbian Government. The main defence was that the Balkan Agency induced the defendants to give them a commission note by alleged misrepresentation that they were the sole commercial agents in England for the Serbian Government, and that no tenders would be entertained by the Serbian Government unless they went through the plaintiffs. The essential witness supporting that allegation was Major Harold Compton, who was at present in the firing line, and could not attend the Court before the first or second week in December. The defendants accordingly wanted the hearing postponed until then.

Counsel for the plaintiffs opposed the application, but his lordship fixed December 6 for the hearing.

BANK'S REPORTED LOAN TO ROUMANIA

Recently Mr. King asked the Secretary of State for the Home Department in the House of Commons whether the statement made in the public Press at the end of last January that the Bank of England had lent £5,000,000 to Roumania was, before being passed, submitted for confirmation to the Foreign Office or to the Treasury.

Sir John Simon: The statement was referred to the Foreign Office and the Treasury before being passed for publication. These Departments, while they did not confirm the accuracy of the statement, saw no reason to interfere with its publication.

NOTES OF THE WEEK.

By a consensus of opinion Lord Kitchener's mission to the Near East, whatever may be the developments to which it may subsequently lead, indicates that the British Government is imbued with the necessity of giving the Eastern campaign its full attention. For this reason the mission stands out as the most significant incident of the week. In due course, as is explained elsewhere in this issue, we shall hope to hear that the Secretary of State for War has not only studied the military situation in the Balkans and at the Dardanelles, but has also enlightened King Constantine and the Greek Government regarding the intentions of the Entente Powers and their ability to carry their resolve into effect in the Near East. The language employed by Mr. Asquith at the Guildhall Banquet lends colour to the belief that the mission will have a diplomatic side. Lord Kitchener, he stated, "has gone to survey at close quarters and in intimate confidence with our own representatives and those of our Allies the whole situation in the Eastern theatre of the war."

The decision to send Lord Kitchener to the Near East would seem to have been taken hurriedly. We shall probably not be far wrong in regarding the mission as a not unnatural corollary to General Joffre's visit to London. In any case, it has been undertaken, as Mr. Asquith assured his audience on Tuesday, with the unqualified approval and the warm sympathy of the Allies. In passing through France Lord Kitchener conferred once more with General Joffre, and had an interview with the new Prime Minister. All the energy and conviction with which the campaign in the Near East is now being conducted we owe primarily to the French Government, which seems to have been far less ready than our own Government to expose itself to the charge of having left Serbia in the lurch. Before these pages are in print Lord Kitchener will have reached Eastern waters and, if Athens should be his first objective, will almost have had time to accomplish one portion of his mission.

Both the advocates of patience in the dealings of the Entente Powers with Greece and those who favour peremptory measures have much to urge on behalf of their respective views. The determining factor is probably the degree of enlightenment which has come to King Constantine since he first made up his mind that the Central Powers were bound to prove victorious in the war. All that has happened since can be explained partly by this conviction and partly by his fear of an unsuccessful war, and by personal antagonism towards a masterful Prime Minister. Sir Edwin Pears has lent the authority of his name to the report that the Goeben was able to reach the Dardanelles through the connivance of King Constantine, who gave orders, which did not pass through the Minister of Marine, that the German ship was to be allowed to coal at a port near Athens. If this report be true, it shows that the King of the Hellenes was anxious at an early stage of the war to keep in favour with Germany. At a later date he would seem to have decided that there was something to be said for co-operation with the Entente Powers, but that it would have to be on terms which guaranteed Greece against all possibility of loss and offered her the greatest possible gains. When the Allies were unable to meet him on this point, he refused to waive his claims at the suggestion of M. Venizelos. Then came the change in the military situation in Europe, with its disadvantages to Russia. King Constantine, fearing lest he had been indiscreet, tended to vere round in the opposite direction. He had allowed the Greek Army to be mobilized in the face of Bulgaria's threatening attitude, but he would not take the field in circumstances that might bring the Greek Army up against Germans and Austrians. From what we know of German diplomacy it is safe to infer that it was quick to profit by the occasion, and that it gave King Constantine the necessary assurance that the Bulgarians would not attack Greece. All would be clear sailing from that point, unless the Allied Powers were to take advantage of their position. Greece would humour the latter by allowing the disembarkation of troops at Salonika with further protest, and would safeguard herself against Germany by pleading *force majeure*.

With a somewhat distracting choice of three evils before him, King Constantine will have hoped to have chosen the least in outraging constitutional practice. As he remained adamant on the subject of military action before he could know for certain which group of Powers was going to win, no other course was open

Digitized by Google

to him. Thus M. Venizelos was replaced as Prime Minister by M. Gounaris, and when the latter could no longer carry on the Administration the King persuaded M. Zaimis, who had some claim to public respect, to take office. There could, however, be no permanency in any arrangement which tried to carry through a breach of the Constitution by means of the constitutional machinery. M. Zaimis acted loyally by his Sovereign in placing his services at his disposal when he believed that the King was acting in the real interests of Greece. But he seems to have made up his mind very quickly that the part he was called upon to play was intolerable, and he lost no time in resigning the Premiership. A trivial instance in Parliament—offence taken by General Yanakitsas, Minister for War, who refused to accept an apology for an insult and left the Chamber—provided the opportunity for demanding a vote of confidence, which M. Zaimis knew would not be accorded him. As he refused to withdraw his resignation, the King was obliged to make a further attempt to carry on along the same lines, because there was no new factor of which he could avail himself in order to reverse his policy.

The appointment of M. Skouloudis as Premier would seem to indicate that King Constantine is not altogether averse from seeing Greek policy lean more and more towards the Entente Powers. We are of opinion that if a dissolution of the Chamber can be avoided, and if Lord Kitchener is accorded an interview in the Palace at Athens in time, Greece may yet succeed in freeing herself from the reproach which King Constantine's policy called down upon her. There is a fullness of explanation in the message sent by M. Skouloudis to the French Government which rings sincere, and which coincides, we hope, with the final abandonment by the King of any ideas he may have entertained of ranging Greece on the side of the Central Powers. Greek neutrality, according to the new Prime Minister, is now to be "characterized by the sincerest good will towards the Powers of the Entente." The new Cabinet, he adds, is too conscious of the true interests of the country and of what it owes to the protecting Powers of Greece to alter in the least particular its line of conduct. Unfortunately for Greece, neutrality, however sincere the good will by which it is characterized, leaves untouched the breach of faith committed in the base desertion of Serbia. For that reason it can have no merit as a permanent policy, but only as a transition stage from the line of conduct into which the Greek nation was nearly forced against its will.

Further support of the theory that with proper handling Greece may shortly be induced to act in the only manner consonant with her honour and traditions is also forthcoming. According to the *Gaulois* King Constantine recently said to a representative of the Quadruple Entente who asked him what his intentions were towards the Allies:—"I replied to the Emperor William when he asked me why I did not oppose the landing of the forces of the Allies at Salonika that, even if I desired to do so, I could not so long as Germany had not succeeded in paralysing the action which the Allied Fleet might take against my country." It is all to the good that King Constantine should now remember the action which the Allied Fleets might take against his country, for he must have forgotten it at one time, certainly when (if he ever did) he helped the Goeben to reach the Dardanelles. Another statement circulating from Athens is to the effect that the Greek Government has approached the Governments of the Allies regarding the question of a further loan of forty million francs. It would argue a degree of cynicism of which we do not believe a Greek Government to be capable, if Greece were to ask for a loan to enable her to continue to benefit by her betrayal of Serbia.

One point must be borne in mind by the Allied Governments in connection with Greece and Roumania, and that is that Germany is no longer content to secure the neutrality of these countries. Time was when German diplomacy, fearing the defection of Greece and Roumania, made profuse offers to the two Governments in return for the maintenance of neutrality. Now, however, Germany is more ambitious, and aims at nothing less than to bring both countries into the war on her side in spite of the trend of popular opinion towards the Entente Powers. With this end in view an active propaganda is being carried out. In Roumania a society has been formed to further the idea —already put forward in the German bribe to the Government—of Roumanian participation in the war on Germany's side for the acquisition of Bessarabia. The purely political aspect of this agitation finds support in the economic situation of the country. It is argued in the pro-German Press—and a large portion of the Roumanian Press is either owned by Germans or in German pay—that, as the only solution of the economic crisis is that Roumania should sell her produce in the one market where it can be bought, it behoves her to safeguard herself against the cutting of prices by balancing political factors against the commercial factor which leaves the seller obliged to sell in a single market at the mercy of the buyer. It will readily be understood how subtle this line of argument may prove in a country which is entirely dependent on the export of a few products.

In Greece Germany has no pull over the economic situation. Accordingly she is working on other lines. There is the same Press propaganda, which is said to have resulted in winning over to the German cause eleven out of sixteen daily newspapers in Athens, as well as a large proportion of the provincial Press. As the task of making the Greek nation pro-German is regarded as hopeless, the aim of the Germanized Press and of German propagandists is to rouse public opinion against the idea of Greece going to war, by dwelling on the resultant inconveniences and horrors. So much of the German machinations is exposed to the light of day. At the same time there is reason to suppose that a subtle campaign is being carried on in the army with a view to familiarising officers and men with the idea of co-operation with the victorious hosts of Germany, together with Turks and Bulgarians. We may feel confident that these German aims are incapable of fulfilment, but it will be well to take note of them and to remember their existence in all negotiations with Greece and Roumania.

Although the Austro-German and Bulgarian forces have been able to join hands in Northern Serbia, effective communication between Berlin and Constantinople will not have been established until the whole of the railway from Belgrade to Nish is in the invaders' possession and the damage done to the line by the Serbians has been repaired. Nish is in the hands of the Bulgarians, who are now engaged in driving the Serbians from the small section of the railway north of Nish still held by them. In the meantime, however, German munitions have secured a free passage down the Danube, and are being landed at Rustchuk for transport by rail to Constantinople. It will doubtless form part of Lord Kitchener's mission to decide whether the Allies have any chance of stopping this traffic before the Turks with the help of unlimited munitions become too formidable for the retention of the Allied troops on Gallipoli Peninsula.

Nothing could be more heroic that the desperate struggle which the Serbians are putting up against overwhelming odds. So far they have kept their forces both in the north and in the south intact, and their object must be to link up the northern with the southern force, which with the help of the Allies is holding back the Bulgarian advance from this quarter. There is still some danger that the invading armies may get completely round the Serbian army of the north. The progress of the Bulgarians is being delayed, if not actually checked, by the arrival of the Allied forces, but what is now the right wing of the German line of advance approaching from the west is already in a position to menace the Serbian line of retreat to Montenegro and Albania. At this point, however, the real difficul-

Digitized by Google

ties of the enemy begin, and the Serbians from now onwards will derive much more advantage from the configuration of the country than they have hitherto.

As was to be expected, Sir Edward Grey has been challenged from many quarters in regard to his explanation of the pledge given to Serbia on September 28. The statement on that date was made in answer to a request for information regarding the intentions of Bulgaria in mobilizing her forces. In his reply Sir Edward Grey confined all his remarks preceding the pledge to Bulgaria. He said, "As long as Bulgaria does not side with the enemies of Great Britain and her Allies, there can be no question of British influence or forces being used in a sense hostile to Bulgarian interests; and as long as the Bulgarian attitude is unaggressive, there should be no disturbance of friendly relations. If, on the other hand, the Bulgarian mobilization were to result in Bulgaria assuming an aggressive attitude on the side of our enemies, we are prepared to give to our friends in the Balkans all the support in our power, in the manner that would be most welcome to them, in concert with our Allies, without reserve and without qualification." On November 2 Sir Edward Grey gave his explanation of this promise: "That statement made on September 28 was founded on a promise which we had made in answer to a request from Greece to send a certain definite number of men to Salonika for the express purpose of enabling Greece to fulfil her treaty obligations to Serbia. That was a definite and specific promise on which that promise was founded. When I went on to say 'without reserve and without qualification,' it meant this, that so long as there was hope of Balkan agreement and Balkan unity, we were expressing ourselves as ready to work and help to realize the national aspirations of Greece and Serbia, and also working to achieve Balkan unity by urging certain concessions to Bulgaria. What I wished to convey on September 28 was that once Bulgaria joined the Central Powers there would be no more talk of concessions from Greece or Serbia, and that the help we were prepared to give thenceforth to Greece and Serbia was to be given without any qualification and reserve. That was the particular promise made."

The upshot of the matter is that Sir Edward Grey's words of September 28 did not carry their plain and literal sense, but, as Lord Milner has expressed it, "meant something totally different, and something which no unsophisticated reader could possibly have read into them." Without doubt it is most unfortunate that it should have been so, when a statement of the British Foreign Secretary is in question. But even if the emphasis which the words "without reserve and without qualification" were taken to give to the statement be eliminated, the promise to give all the support in our power remained. It is now possible to trace how the Government proceeded to fulfil this promise. The statements of Mr. Asquith and other Ministers have elicited the following information:—The decision to send troops to Serbia was taken by the British Cabinet on September 24; on October 2 M. Venizelos agreed to the landing of British and French troops under "a merely formal protest"; on October 26 "permission was given to the Government" for British troops to proceed from Salonika to Serbia and to cross the frontier. This permission, the spokesman of the Government added, was acted upon without delay. What the Government has not explained is why there was a delay in landing British troops after October 2, when French troops were landed, and why they were still detained at Salonika while the French were already at grips with the Bulgarians. The nation, jealous of its honour, does not regard the delay as compatible with the undertaking to give all the support in our power. Sir Edward Grey takes his stand on direct communications passing from the British to the Serbian Governments, and refuses to be bound by statements made in Parliament, the primary object of which would seem to be to silence importunate inquiries.

Before we leave this subject it will be well to place on record the few dates with which the Government has marked the progress of events in the Near East. The German and Austrian sympathies of the King of the Bulgarians have always been known, Sir Edward Grey informed the House of Commons—a statement which will at once be contrasted with Lord Crewe's announcement in the House of Lords on October 14:—"We did not originally assume that Bulgaria was, or need be, hostile to us in the first instance." Reports of Bulgarian negotiations with Turkey under German influence came from various Balkan sources as early as April. The Serbian Government was much perturbed in April by the raid by Bulgarian bands on the railway near Strumnitza at the beginning of the month, and by rumours of further impending raids at the end of the month, and they stated their belief in the complicity between King Ferdinand and the Central Powers. On September 19 Bulgaria began to mobilize, and the Serbian Government proposed to the Allied Governments that the Serbians should at once invade Bulgaria, and thus anticipate Bulgaria's declaration of war. The reception accorded to this suggestion may be inferred from the fact that on September 27 Sir Edward Grey "was pressed" for his opinion, and replied "that all the political and diplomatic arguments were against such action, that he was no judge of strategical considerations, and could deal only with the others." (Lord R. Cecil, House of Commons, November 10.) The British Government declares that there was no question of refusing permission to Serbia to anticipate Bulgaria's hostility, but it is obvious that the Serbian Government regarded Sir Edward Grey's communication in the light of a refusal. This fact alone, in view of subsequent developments, ought to have spurred Great Britain on to render Serbia the fullest possible help when she was suffering from the effects of having paid attention to the "political and diplomatic arguments," of which she would have recked nothing, if the British Government had not reminded her of them. But between October 5 or thereabouts and October 26 the British troops remained at Salonika, while the Serbians were being hard pressed from west, north, and east.

Speaking in the House of Lords on November 8 Lord Milner had some shrewd remarks to make on the bogey of the possible effects of a withdrawal from the Dardanelles. "Let that matter," he said, "be determined by military considerations alone. . . . If the military considerations are against it, do not let us persist in that enterprise under the delusion that persistency will help us with Roumania or Greece, or that the abandonment will hurt us in Egypt or elsewhere. Prestige is the child of definite, solid success. You cannot ensure prestige by any kind of make-believe. If our prestige has suffered in the Dardanelles, then the way to recover it is by doing better somewhere else." More than six months ago, when we suggested that the Allied cause might be better served than by continuing the Dardanelles venture, we pointed out in these Notes, in connection with this very point, that "the Oriental world may prove to be quite level-headed enough to lay stress only on the end attained and not on the fate of any particular means adopted."

LETTER FROM CAIRO.

(From Our Own Correspondent.)
Cairo, October 25.

The Feast of Courban Bairam.

The five-day feast of Courban Bairam has passed off quite quietly. Owing to the present political situation no reception was held at the Palace, where a register was merely opened for the public, but excepting for that deviation from custom the feast was celebrated much as usual. The fact that a great war, affecting their country, is being waged at the present moment does not seem to have affected the masses in the manner of the celebration of their great festival, and absolutely no attention was paid to the *fetwa* obtained and published by the Government to the effect that in the present circumstances sacrificial economy would be advisable, and that the killing of one sheep would satisfy the requirements of the Sherei law. Indeed, if anything, more sheep than ever have been sacrificed on the occasion of this Courban Bairam. The explanation of this is, of course, that the average Egyptian is guided by material considerations in such a matter, and that, except by the merest accident, foresight never enters into his life. Had cotton prices been bad or difficulties been encountered in marketing the crop, he might have paid heed to the "recommendations" of the circular embodying the *fetwa;* but the contrary is the case, the fellah has obtained for his cotton and other crops prices that have not ruled for some little time; and so he has obstinately adhered to—and in many instances exceeded—his time-old habit, quite regardless of the fact that the wholesale slaughter of lambs and kids and such-like young animals might lead to a very serious state of affairs in existing circumstances, where imports from Serbia and Syria, the usual sources of supply, are stopped. Fortunately there is the Sudan supply, which can be, and is being, drawn upon, and any imminent danger could be averted, even though "Sudani" meat is not in high favour in this country. But the attitude of the Egyptian masses in this matter and their disregard for the *fetwa* are an illustration of their curious outlook on economic matters, and of the great difficulty that is encountered in tackling the economic problems that periodically arise in Egypt.

The Dardanelles Mails.

It was with great pleasure and satisfaction that everyone in Egypt heard that the question of the Dardanelles mails had been taken up at home, and that a full inquiry had been promised. There is absolutely no doubt that the postal arrangements are a positive scandal. Scarce a man returns from the peninsula who does not complain bitterly about the grossly irregular manner in which his mail has reached him, although his unit may not have been moved from one particular "beach" for weeks, and the instances of parcels having been tampered with *en route* are more the rule than the exception. Many are the cases where packages strongly secured before posting have been wilfully smashed open and the contents abstracted; and we in Egypt have been repeatedly warned in private not to send our parcels through the ordinary channels, especially if they contained eatables or tobacco, but to entrust them to some officer or men returning to duty, if we wanted to make sure that they would ever reach their destination.

The mistake seems to be that no effective supervision is exercised, and that no trained staff deals with the military postal business throughout. Whatever may have been the organisation to start with, a good deal of the routine is now being done by men physically unfit to cope with it properly, or by others who, however brave on the field, and however willing to work in any capacity, possess little idea of what is really required of them, and would not, as one man put it to me, be kept for a single day, even as office boys, in any business concern. In addition, the mode of transport to and from the peninsula is of a nature that lends itself to pilfering and loss. It is to be hoped that a serious reorganisation of the system on business lines will be introduced. There should be absolutely no difficulty in getting together an intelligent, efficient, and honest postal staff to carry out the service right up to the point of delivery, and steps should be taken to ensure that this staff is permanently devoted to the postal service. There is no need to wait for the conclusion of the inquiry promised by the Postmaster-General to introduce the requisite reforms. It is up to everyone to see, now that the above is officially recognised, that it is rectified with the utmost celerity.

Marriage of the Sultan's Daughter.

Yesterday the marriage of Princess Samiha, daughter of H.H. the Sultan, to Prince Ismail Bey Daud, one of the great-grandsons of Mohammed Ali Pasha, and A.D.C. to his Highness, took place at Ras-el-Tin Palace. Owing to the present political situation the ceremony was quite a quiet one, only the members of the family, the Ministers, and the Sheikhs who drew up the contract being present. His Highness, in lieu of the usual expensive festivities, caused a substantial sum to be distributed to the poor and certain Moslem benevolent societies.

The Daira Seif-ed-Dine.

The trial of Hussein Pasha Moharrem, late Under-Secretary of State for War and ex-Curator of the Daira Seif-ed-Dine, on a charge of misappropriating the sum of £E52,000 of the Daira's funds, is at present in progress before the Saida Zenab Court. The witnesses who have been heard so far include Mohammed Pasha Said, who was Prime Minister at the time the misappropriation was committed and is now Curator of the Daira; Ali Pasha Zulfikar, Governor of Cairo and President of the Mejlis Hasbi, the Chancery Court to which the transactions were formally submitted; and Ahmed Ziwar Pasha, Governor of Alexandria. The present Premier, Hussein Rushdi Pasha, who was Minister of Justice under Said Pasha, will be called this afternoon.

Together with Hussein Pasha Moharrem are being tried on the charge of complicity Osman Bey Moharrem, the engineer who reported on the land purchased, and Ahmed Bey Saddik, Assistant Director of the Daira Khassa, who is now in Switzerland, and is being tried by default. One other person should have appeared in the dock—viz., Murad Bey Fareg, the lawyer, who had a hand in the drafting of various of the documents on which the charges are based. He has been able to prove his Russian nationality, and so cannot be brought before the Native Courts. The case is arousing much interest owing to the revelations that are being made.

Cairo, November 2.

Return of the Sultan to the Capital.

H.H. the Sultan came up by special train yesterday morning and drove to Abdin Palace, where he has now taken up his residence for the winter. His Highness was greeted on arrival at Cairo station by Lieutenant-General Sir John Maxwell and the senior Government officials, a guard of honour of British and Egyptian troops being drawn up on the platform.

"Our Day."

"Our Day," which, owing to the feast of Bairam, was fixed for Saturday last, October 30, has passed off most satisfactorily. A few days previously a great meeting of leading Egyptians was summoned at the Opera House by the Governor of Cairo, Ali Pasha Zulfikar, with the object of calling public attention to

"MILKMAID" BRAND
Sterilised Fresh Milk
Obtainable from all leading Grocers and Druggists in Egypt and the Levant.

Digitized by Google

the appeal for funds made by the British Red Cross Society. H.E. the High Commissioner presided over the meeting, which was a very representative one, and delivered an address explaining what had been done by the society and what was still wanted. At the conclusion of his speech he announced that H.H. the Sultan had generously contributed £E500, and that H.H. Prince Fuad had also made a handsome donation. General Maxwell and Surveyor-General Babtie spoke of the great debt that the Army owed to the Red Cross, and Sir Courtauld Thomson gave some interesting details of the work that the society in its many branches was carrying out. The Governor of Cairo also addressed the meeting, which, before it dispersed, drew up a substantial subscription list, over half of the amount whereof was paid in cash on the spot.

For "Our Day" itself extensive arrangements had been made, and the full programme was carried out most successfully. The Red Cross Hospital at the Saidia School, which was open to the public all day, was a very busy centre from an early hour, and the managing committee and its assistants had their work cut out for them to show all the visitors round. The wards were all gaily decorated for the occasion, and there were several side-shows, and later in the day an excellent concert, to all of which visitors were allowed to take the patients. The High Commissioner visited the hospital during the afternoon. At the Y.M.C.A. a most successful carnival, in which the soldiers collaborated whole-heartedly, was held; a musical *matinée* was given at the Opera House by an Italian quartette; a military concert took place on the terrace of the Continental; whilst the eventful day was brought to a fitting close by a gala performance at the Kursaal. In Alexandria a great fête was held at the Jardin Rosette, and a military boxing tournament took place last night at the American Kursaal.

There is no doubt that "Our Day" has been an unqualified success. Throughout the week money has been pouring in from the provinces, where the Egyptians have contributed most generously, and what with the proceeds from the above-mentioned entertainments, and the collections made at the various hotels and centres, where leading ladies of the British colony were stationed the whole day, Egypt ought to have no reason to be ashamed of its contribution to the funds of the Red Cross Society. Owing to the large area over which the collections have been made, it will, however, not be possible to know the total amount subscribed for about another week.

The Greek Situation.

The dissatisfaction with which Greeks domiciled abroad view the policy followed by their Government and the direction in which their sympathies lie received practical demonstration on Sunday morning, when a meeting of the Hellenic community of Cairo was held under the presidency of Rostovitz Bey. The Kursaal, vast as it is, was packed with Greeks of every class, who made no secret of their feelings. After an introductory speech by Rostovitz Bey, Maître Bouboulis, in a most able address, explained the situation and the object of the meeting, and submitted a draft cable, which it was proposed to send to M. Zaimis, the Greek Premier. This telegram was to the effect that the Greek community of Cairo—

"Anxious, at the present crisis which the nation is traversing, to see Greece adopt a line of action that would safeguard her national interests . . . . adjures the Hellenic Government to direct the country, before it is too late, along the path that will assure the realization of its ambitions in a manner consonant with the traditional dignity and honour of the Hellenic nation, by the active intervention of Greece on the side of the Protecting Powers, and of our heroic Allies, the Serbians, whose cause is indissolubly bound up with that of Hellenism."

There was not one dissentient voice amongst the huge crowd congregated in the theatre, and the despatch of the message was agreed to amid wild enthusiasm. The meeting—during the whole of which, it may be noted, the name of King Constantine was not mentioned—broke up after each of the members of the Entente had been honoured by cheers. A meeting of the Alexandria community is to be held on Wednesday, when the same message will be put to the vote.

The Legislative Assembly.

The Legislative Assembly should have met yesterday in new session, but on Wednesday last a decree was promulgated postponing its reassembly until a date to be fixed later on, and suspending the provisions of the Organic Law enacting that a partial re-election of the delegates and of the members of the Provincial Councils should take place in January next. The position with regard to the Assembly was explained in one of my recent letters. It appears that the Government has come to the conclusion that it would, after all, be advisable not to hold elections. Quite possibly it is right in its opinion, though there are some who consider that no harm would have been done if just one sitting had been allowed, to permit of the elections taking place; that, in fact, it would have been a good thing to have given the country a temporary distraction. But, having come to its decision in regard to the elections, the Government certainly was very well advised to postpone the reassembly of the Legislative Assembly *sine die*, instead of putting it off for periods of two or three months, as was done in the case of the last session. It is understood that for the time being the question of stopping the allowances of the delegates is not being followed up, though such a course would be fully justified.

THE SITUATION IN PERSIA.

A Reuter's message despatched from Teheran on Wednesday presented a gloomy picture of the state of affairs in the Persian capital, where the German Legation was reported to have armed "a large force composed of Austrians and well-paid mercenaries," for the purpose, it was only naturally feared, of creating a similar situation to that at Ispahan, Yezd, and Kermanshah. Russia acted promptly, and the Russian detachment at Kazvin received orders to advance on Teheran forthwith. The same day the Persian Minister in Paris called on the French Prime Minister and declared, in the name of his Government, that, contrary to certain reports, no agreement existed between Germany and Persia. A telegram, dated November 11, from Reuter's Petrograd correspondent, carries the tale of disorder created by German agents a stage further. It reports that the Russian troops are only sixty-five versts from Teheran, that the Germans and Turks are making hasty preparations for departure, and that the Shah and the Government are said to be contemplating withdrawal to Ispahan if Russia finds certain Persian proposals inadequate The proposals referred to appear to have been drawn up at a twenty-four hours' sitting of the Council of Ministers, which was held "to deliberate on the acceptable conditions to be offered to the Russian and British Governments." At a secret sitting of the Mejliss, the message adds, the majority of the deputies expressed a wish for a favourable adjustment of relations between Russia and Persia. That wish will certainly find an echo in this country.

Hafni Hamud, an employee in the Port Sudan Customs, was tried by a military court at Alexandria on October 18, and sentenced to ten years' penal servitude. The charge (states a Cairo telegram) was that of being in possession of a seditious document.

In connection with the recent attempt on the life of the Sultan of Egypt, it is officially announced from Cairo that Lieutenant-General Sir J. G. Maxwell, commanding the British forces in Egypt, has given directions for the preparation of the summary of evidence required by military law.

SUDAN NOTES.

(From Our Own Correspondent.)

Khartoum, October 16.

Sir Reginald Wingate and his staff returned from Erkowit on October 10 by special train.

Recent arrivals from the North, after leave in England or change of air in Egypt, include Mr. Drummond, of the Education Department, and Mr. Davidson, of the Legal Department. Several ladies have also returned, harbingers of the cold weather.

The north wind reached Khartoum on October 14, and produced a long wished-for change in the weather. Recently the humidity and heat have been excessive, whilst the insect life of the country seemed to thrive on the conditions, and became somewhat tiresome. All these, however, are blown away by the cool north wind.

Owing to the conditions of the river, the last boat for Gambella left on October 15, and it is not certain that it will succeed in reaching its destination.

The first race meeting has been set down for November 27. A feature is the addition of a race for country-bred horses and an amateur race, in which neither jockey nor horse may enter that has previously won a race.

The situation of the northern provinces, Halfa, Dongola and Berber, owing to the damage done by locusts, was reported as precarious. This now appears too pessimistic a term, and though in some parts of Dongola distress has been felt, and will undoubtedly be felt again, in Halfa Province the natives have secured a fair date crop, apart from which they have little that grows, owing to the height of the river banks and the rocky soil. In Berber, it is true, a valuable crop of cotton and grain on the river banks was lost, and this will prevent the natives from repaying the loans they received last year, but the rain crops on the land away from the river will be sufficient to supply food. In Dongola, too, where the clouds of locusts succeeded one another with a most depressing regularity, the natives have taken heart, and hope to get a small crop on the falling Nile. But the shortness of forage for cattle will be the chief problem, as without forage the cattle that work the water-wheels cannot keep up their toil, and the comparatively low flood has left much island land untouched that normally yields a rich quantity of grass, besides giving the native an easily won crop on land refreshed yearly by the Nile sediment.

THE SUDAN AND THE HAJJ.

(From a Correspondent.)

It has been decided that no pilgrims shall leave Egypt this year for the Hejaz, owing to the state of insecurity reigning in Arabia, and it is probable that the Sudan Administration will also be compelled to forbid any pilgrims from leaving that country through Suakin, for the same reason.

Each year up till the present many thousands of Sudanese pilgrims have made their way to the Hejaz to take part in the ceremonies of the sacred Hajj, the authorities facilitating their progress as much as possible, while carefully safeguarding the general community against any risks of infection by imported diseases. The stringent and strictly maintained quarantine regulations already existing were considerably amplified in March of last year, when the Central Sanitary Board issued a number of fresh regulations designed at once to assist the pilgrims and to protect the Sudan from dangers of contagion. No one was allowed to enter or to leave the country in connection with the pilgrimage to Mecca except through the port of Suakin. In 1911, some 3,880 persons had left the country for Jedda through this one port, while 4,494 had returned. During the previous year, 5,905 pilgrims had left and 3,344 had returned, while in 1912 nearly 8,000 had proceeded to Jeddah from the Sudan alone. There is always a discrepancy between the numbers of those going and those returning, which is accounted for by the fact that many remain at Jeddah until the quarantine restrictions are withdrawn, or even until another pilgrim season comes round. Others, again, who leave *viâ* Suakin return by way of Egyptian or Eritrean ports, and *vice versa*.

CYPRUS NOTES.

(From a Correspondent.)

On leaving Troödos, the High Commissioner and Lady Clauson visited Papho, taking up quarters at the English Club, and taking tea with the Acting Commissioner and President of the District Court of Limassol, Mr. A. S. Stuart, now acting also at Papho. Next day (October 10) the higher officials and the Mayor were received. These tours of the High Commissioner are of great benefit as regards a more intimate knowledge of the different districts and discussion of local topics on the spot, aided sometimes by personal inspections.

Papho at some periods was the capital of Cyprus, and near it was the world-renowned temple of Aphrodite—now a ruin—the scene of so many mysterious rites, and overlooking the shore where the goddess rose from the waves. For a long time, however, it has fallen into poverty and obscurity, and has been considered the most backward part of the island, from no fault of its own. At present it suffers from the "economic crisis" caused by the war. Petitions were made to Sir John Clauson for relief work, for better communication by land and sea, and for improvements of the "port."

From the Papho district, which sends many of its people abroad, another batch of 200 young men have emigrated to seek employment in Egypt, in some cases having sold their properties before leaving. In some villages the schools have been closed owing to the inability of the people to pay the masters' salaries. Most village schools receive a grant in aid from the Government, and the villagers might legally be compelled to pay their share; but they now urge that the present distress renders this impossible.

Severe comments are made by a leading paper on an "ecclesiastical scandal." At the village of Vasileia, in the Kyrenia district, owing to the refusal of the priest to continue his duties, on the ground of non-payment of fees by the villagers (their excuse being again poverty), the church has been closed. As a consequence, infants have remained unbaptised, and the dead cannot be buried until arrangements are made to bring a priest from some other village. The attention of the Bishop of Kyrenia is invited to the conduct of the *pappas*.

The Greek Press publishes the appeal of the Queen of Greece for fresh support of the Red Cross and the Patriotic League of Greek Women, of which she is the patron. It follows the lead of the Athenian Press, still with the impression that Hellas will enter the struggle "with the co-operation of Roumania," when Hellenic interests point the way, and expresses firm belief in "the wisdom of the king."

ARABIAN DESERT FIGHTING.

In reference to recent fighting in the Arabian desert, the following Brigade Order has been issued from Headquarters, Sheikh Othman (General Staff), dated September 27:—"The Officer Commanding Sheikh Othman Brigade area is instructed to convey to all the troops under him the thanks of the General Officer Commanding Aden for the excellent work done by them on the occasion of the capture of Waht on September 25, 1915. The feat of marching to Waht, turning out its garrison of four guns, 700 Turks, and 1,000 Arabs, holding it against reinforcements from Lahej, and returning the same day to Sheikh Othman, was a magnificent test of endurance, dash, and spirit of all engaged in the operation. A distance of at least twenty miles was covered, and the troops had to march across a waterless and shadeless desert with deep sand on an exceptionally hot day. The Officer Commanding the Brigade especially wishes to thank all engaged for the excellent manner in which all units mutually assisted each other and co-operated from start to finish throughout the day, thus assuring the achievement of the goal aimed at with a surprisingly small number of casualties."

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of the "NEAR EAST" to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, October 26.

The Offer of Cyprus.

The situation remains unchanged, and the Government shows no inclination to depart from its attitude of neutrality. The last few days have been marked by an event of great importance, which in other circumstances would have given rise to general enthusiasm in the country, namely, the offer of the island of Cyprus made by Great Britain to Greece as further compensation for her participation in the war on the side of Serbia and the Allies. The Government, however, declined the offer. Although no official communication on the subject of this step is forthcoming, it seems certain that M. Zaimis, while expressing surprise at the intervention of the Powers in the dispute between Greece and Serbia, maintained firmly his view that the Austro-German attack on Serbia had, for the present, at any rate, released Greece from the obligation of armed intervention in favour of her ally. Whilst reiterating his assurances of the Government's benevolent disposition towards the Entente Powers and the country's sympathy with them, and with Great Britain in particular, M. Zaimis said the acquisition of Cyprus could not compensate Greece for the risks of war.

Had the Government accepted the offer of Cyprus, the Powers were to have made formal proposals to Greece, offering her, besides Asia Minor, Bulgarian Thrace—thus denying Bulgaria access to the Ægean—Monastir, Doiran and Ghevgheli—necessary for her territorial security—as well as Northern Epirus and the promise of the despatch to the Balkans of 300,000 troops. Now, after M. Zaimis' refusal, it would appear that the Entente Powers, before taking any steps to invite the Greek Government to state precisely its attitude towards them, are waiting to see the effect of the arrival in the Peninsula of the Allied troops, in the hope that Greece will then be inspired with sufficient confidence to throw in her lot with them. Should this hope not be fulfilled, it is probable that the Powers will call upon Greece either to demobilize or to take part in the war against Bulgaria and Turkey, seeing that her mobilization is of no help to Serbia. In view of the equivocal attitude of the Athens Cabinet, they regard with suspicion the presence of Greek troops behind those of the Allies. In certain circles rumours are current of coercive measures to which the four Powers may have recourse in the case of a refusal on the part of Greece; but this would seem at least premature.

The Treaty of Alliance.

The refusal of the Zaimis Cabinet to help Serbia, the ally of Greece, has created a painful impression in the country, and more especially abroad, where Greece has been brought into discredit in consequence; and this fact is now preoccupying official circles, where every effort is being made to make their point of view prevail. The Treaty, they hold, has a purely Balkan character, and does not bind Greece to help Serbia in the present circumstances, providing, as it did, for an attack by Bulgaria alone, and not by any other Power. In support of this assertion, it is stated that in May, 1913, when the Treaty was signed, the present complications could not have been foreseen.

The Serbian Point of View.

On the other hand, a well-placed Serbian who is conversant with the text of the Treaty and the negotiations which led up to it, asserts, in an anonymous letter published in the *Patris*, that the clause providing for Greek aid to Serbia "against any attack by a third party" was aimed at Austria-Hungary, and that the meaning of this clause was discussed at length and clearly defined before the Treaty was signed. He adds that neither the Venizelos nor the Gounaris Cabinet, in declining to come to the aid of Serbia, attempted to justify their abstention by the fact that Serbia had been attacked by Austria, as was done by the Zaimis Cabinet in declaring the Treaty null and void. Serbia concluded a Treaty with Greece and not with either the Venizelos or the Gounaris Cabinet. At any rate, Greece should have warned Serbia at the outset, and not have left her under the impression that she could rely on her help in the case of an attack by Bulgaria. Finally, the writer discloses the fact that a fortnight before the Bulgarian attack, when there were only 30,000 Bulgars on the frontier, against 120,000 Serbs, Serbia informed the Athens Government of her intention to attack first, in which case the Serbian army would have been in Sofia in ten days, but she was dissuaded from taking this step by Greece, who pointed out the defensive character of the Treaty. Serbia followed the advice of her ally, but was none the less abandoned at the critical moment. Not only that, but the greater part of the Greek Press assured Bulgaria that the mobilization of Greece would not be directed against Bulgaria.

These statements have been confirmed to me by a Serbian diplomat, who added that in the military convention attached to the Treaty, it is stipulated that if, while Serbia is at war with Austria, Greece should be attacked by Bulgaria, Serbia should send to her aid a certain number of troops, which shows that the Treaty was based on reciprocity and the solidarity of the two States. The Serbian diplomat also assured me that the Treaty provides, in terms which admit of no dispute, for the intervention of Greece in case of the attack of a third Power, *other than Bulgaria*, and that Greece, in her reply, did not contest this, but argued that, instead of one other Power (Austria) there were two attacking Serbia!

The Serbian Campaign.

The Venizelist Press is asking where are the 800,000 German troops who, according to Germanophil circles in Athens, were to make a descent on the Balkans; and the same organs call attention to the fact that, although already three weeks have passed since the Austro-Germans attacked Serbia, they have made only very slight progress. It would seem likely that M. Venizelos's forecast will be realised, and that the German troops, instead of coming to reinforce the Bulgarians, are relying on the latter to defeat the Serbians. The same organs ask if Greece is going to pursue to the end a course of inaction, which would leave Serbia to her fate, in order to render a service to Germany, and they deplore the fact that the Zaimis Cabinet did not act up to M. Venizelos's declaration, that Greece would not fail to attack Bulgaria if the latter should attack Serbia, for in that case Bulgaria would never have dared to do so. But even if she had, Greek troops would now have been in Sofia, while the Austro-Germans would still be making vain efforts to enter Serbia by way of the Danube.

The Political Outlook.

That portion of the Press which is inspired by the German Legation and German propagandists in Athens has worked hard for months past to instil in the people the fear of entering into a war with the Central Powers, and it is to their efforts that the present hesitation is due. If, however, sufficient Allied troops arrive at Salonika in time to lend effective aid to Serbia confidence will be revived, and the policy of M. Venizelos will again become popular. The people will then realize that the present is a unique opportunity of crushing Bulgaria without running any risks, and one that should not be lost. Should events take this course, it is thought that the King would not offer any opposition. The mission of the present Cabinet will then come to an end, and M. Venizelos could easily return to power to pursue his policy. Foreseeing such an eventuality, Germanophil circles are showing signs of uneasiness, and, in order to prevent it, they are urging the Government to bring about a Ministerial crisis by asking for a vote of confidence, thus aiming at the dissolution of the Chamber, which would prevent the return to power of M. Venizelos. It is stated that three veteran members of the Cabinet, MM. Theotokis, Rallis, and Dragoumis, supported by M. Gounaris, are working for such a solution so as to get rid of their adversary Venizelos, who, in their opinion, would now be defeated at the polls. But the President, M. Zaimis, is opposed to such a course, not wishing to plunge the country into the throes of a general election, especially at such a critical time.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, October 27.

The Situation in Constantinople.

According to latest arrivals here, there does not appear to be much change in the general situation at Constantinople; but the unexpected entry of Bulgaria into the conflict on the side of the Huns has naturally produced a feeling of some depression in the Entente communities.

Three weeks ago about one hundred wagons of flour and some petroleum arrived from Bulgaria, and for a few days bread was to be had in sufficient quantity, but since Bulgaria mobilized transport has not been available, and it has again become difficult for the people to obtain their daily requirements of bread.

The latest report gives the coal stock as only 23,000 tons, and no arrivals are reported lately. This would account for the stoppage of some of the flour mills, though wood and lignite are being burnt in mills, factories, and on the railways. The Scutari-Kadikeui waterworks announce in the papers that they are obliged to cease supplying the public, owing to shortage of water. The real reason is, however, no doubt, because they are without coal for their pumping stations. Kadikeui and Scutari will be faced with a water famine.

A "White Flag" Mystery.

A curious incident appears to have absorbed popular attention a short time ago. One day a number of white flags were observed at different points of the harbour, on the quay, at Kadikeui, and on the lower Bosphorus. There was naturally much inquiry and speculation as to the object of this display, but no solution of the mystery has been forthcoming. The guesses indulged in by some people were amusing, for they were variously reported as a sign of surrender, to be followed by the arrival of American warships the following day—a sort of "rehearsal" to accustom the people to their use in preparation for "the day" when they will be hoisted in token of surrender!

French and British Subjects.

There is no news of the Englishmen who were exiled to Karahissar, but it is stated on good authority that the Government has given instructions that they are to be well treated. Mr. Egbert Rizzo, who had been deported from Aleppo to Urfa, has arrived in Constantinople, and it is rumoured that other Englishmen who have been detained at Urfa will follow him. The names of two of the French families who have been deported mentioned in last week's letter should read: Dafos instead of Dufour, and Bocagnano instead of Bocoq. M. Toulon was let off on the strength of his wife being a German, and M. Marechall also succeeded in obtaining his release, and has been allowed to leave the country. The French colony are rather depressed at these deportations, as it is said that others will follow as a retaliation for Ottoman families having been arrested by the French.

The private safes of enemy subjects in the Credit Lyonnais have been sealed by the authorities, and it is said that those in the other banks will also be sealed, and that a note will be made of the securities of enemy subjects deposited in the banks.

Official Exactions.

The so-called requisitioning of goods—more correctly speaking, official robbery—continues, boots being the article mostly in demand just now. Messrs. Bakers' and many other boot stores have been cleared of all suitable footwear. There may be some hope in the case of foreigners of obtaining compensation when the war is over; but this requisitioning means absolute ruin to scores of native merchants, many of whom were rich men before the war.

Greeks and Armenians.

The Greeks are apparently in the Turks' bad books again, for the authorities have ordered all Greek signs to be removed from shops and other places.

The extermination of the Armenians continues, and in places where they have hitherto been unmolested they are now meeting with the same fate. They have been removed from Rodosto, and so have the Greek *rayahs* as well. Many were sent away from Rodosto in open barges, like cattle, exposed to heavy rain, others were packed in small Bosphorus steamers with scarcely even room to sit. The Armenian quarter at Ismid, consisting of three to four hundred houses, has been destroyed by fire.

The German steamer Kerkyra, in entering the Golden Horn recently, did extensive damage to the Galata Bridge. On the Stamboul side the bridge was drawn away some distance from the shore, and the centre gates cannot be closed.

Parliamentary Critics.

There appears to have been some excitement in the Senate on the opening day, which, of course, was not reported by the newspapers. According to private information, Ahmed Riza Bey, who was the first President of the Chamber of Deputies, and is now a Senator, submitted an Interpellation to the Senate containing the following questions:—Why does the Government conceal the situation of the army at the Dardanelles? Why does the Government conceal the military disasters and financial exhaustion? "I accuse the Government of the Armenian massacres and of the persecution of the Christians in general," Ahmed Riza is reported to have said, "and even in the event of the Central Powers being victorious—which in my opinion is improbable—they would considerably influence our position as a State and as a nation. Ungrateful nations are not the Christians, but we who have turned against our friends and protectors. We have entered into an alliance without previously determining our situation and the advantage which we shall obtain in the event of success." "Can you say," continued Ahmed Riza, "what benefit we shall derive from this war, when up to the present time we have lost 400,000 men?"

It appears that some unpalatable truths were also spoken in the Chamber by the deputy for Yozgat, which likewise led to some disturbance. It is said that Ahmed Riza was arrested on leaving the Senate, but was released on the intervention of Prince Youssouf Izzedin.

THE SITUATION IN THE LEBANON.

(From a Lebanese Correspondent.)

Cairo, October 25.

It would seem after all that the annexation by the Ottoman Government of the Lebanon as an ordinary vilayet, with a Turkish Governor, has not yet carried with it the complete abolition of the province's privileges, if we are to judge from a circular addressed to the Kaimakams and Mudirs. The text of this circular was published in a local Beyrout paper, of which a copy has lately come to hand. This official notification runs as follows:—

> As the state of the treasury of the Mountain has become critical, it is incumbent on you to collect the Government taxes to the last para; and it is, moreover, your duty to make the population realize that the taxes and imposts in all the vilayets of the Empire have been increased and yet fully collected, in spite of the present circumstances. Therefore, the Lebanese, who have been exempted from military service by the privilege that has been vouchsafed to them by their government of eternal existence (*sic*), are expected to offer of their own free will, and without the least compulsion, the payment of the taxes due by them, more especially as the amount of these taxes is destined for expenditure within the Mountain itself and for its own needs. No manner of excuse may, therefore, be accepted for any delay or postponement. Any delay in the execution of this order will place you and the village sheikhs (mayors) under responsibility. We require you to give wide publicity to these instructions among all the different classes of the population, and to communicate at once the contents thereof to all concerned.

The three principal resources of the Lebanon are: the silk crop, the remittances made by the Lebanese emigrants abroad—especially in America—and the profits derived from the summer visitors, principally in the shape of rent and sales of fresh provisions. Owing to the war, these three sources of revenue have been practically dried up at the source, and one may well ask how the poor inhabitants of this rocky province are to meet the Turkish Government's peremptory demands.

SERBIAN LETTER.

(From Our Own Correspondent.)

Nish, September 30.*

(*Delayed in transmission.)

Threatened by an Austro-German invasion in the north and an attack by Bulgaria in the south, the people in Serbia are excited but not terrified. They appear to have every confidence in their Allies, and are nervously awaiting the development of the attitude of Austria-Germany and Bulgaria.

The ideas and feelings of the Serbian people I can best portray by repeating the words of the chief Serbian politicians and by quotations from the Serbian Press.

The semi-official organ *Samouprava* says:—

Bulgaria wants to treat the Turco-Bulgarian entente from an economic point of view and not to consider it in a political sense, but the military measures taken the last few days and the manifestations and demonstrations at Sofia show clearly that this Turco-Bulgarian contract has a political character.

And even if it were an economic arrangement, it would be to the detriment not only of France, Great Britain and Russia, but also of the Balkan States, from an economic point of view, to aid a country which is at war. It is, in fact, the same thing as fighting on the side of that country against its enemies; therefore, if it is to be believed that Bulgaria has only an economic entente with Turkey, it is still an act directed against the interests of the Triple Entente.

The *Balkan Courier*, published at Nish, says:—

Bulgaria has decreed a general mobilization. It is not possible to deceive ourselves as to the real character of this action. It is an open declaration of hostility against Serbia and the Quadruple Entente. Bulgaria declares that this mobilization is only a means of maintaining armed neutrality, but it is evident that this is mere pretence, in order to gain time to concentrate the Bulgarian Army. An armed neutrality has no significance in reference to Bulgaria. If she mobilizes to-day it is not in order to maintain neutrality; it is in order to cease being neutral; and it is not the less evident that this will be done to the detriment of Serbia and the Triple Entente, and in favour of Germany, Austria and Turkey.

The Belgrade *Politika* writes:—

The news of the recent demonstrations in Sofia against the Quadruple Entente, and more especially against Russia and against Serbia, caused much more consternation in diplomatic circles than among our own politicians.

A highly esteemed former Cabinet Minister said to us: "We in Serbia, are not in the least surprised by the proceedings now taking place in Bulgaria; for having seen, after the events of 1908 and 1913, how close were the bonds binding Berlin, Vienna and Sofia together, we have a clear idea of how things stand with our eastern neighbour. Therefore, the passing events do not surprise us, and we feel that we can well await quietly and fearlessly the development of circumstances."

The *Novosti*, of Nish, writes:—

The mobilization of Bulgaria has been no surprise to us. We expected as much after the fall of Warsaw. The Bulgarian Government made its choice long ago between the two groups, but before declaring itself it awaited the moment when Germany would be in a position to intervene with armed force in Balkan affairs. The Bulgarian mobilisation was a proof that this moment had arrived. In order to save the situation in the Balkans at the last moment there remains but one course open to the Allies, and that is for them to intervene with an armed force on the side of Serbia without losing a single instant.

The *Balkan Courier*, in an article headed "The Balkan Crisis," writes:—

If the signing of the Turco-Bulgarian treaty does not suffice to enlighten the greatest optimist on Bulgarian intentions, her sudden mobilization and the manifestations at Sofia prove that there is no room now for effecting any arrangement. We have arrived at the culminating point of the crisis which has for a long time hung heavily over the Balkan States.

Serbia has given irrefutable proofs of her good will in order to avoid a Balkan conflagration; she has consented to sacrifices whose importance is indisputable; she has gone to the extreme limit which her national dignity and the defence of her rights permitted. Bulgaria has either understood this, or does not want to understand it. We await the solution of the crisis without bravado and without menacing any one, but confident in our own strength.

The *Odjek*, a semi-official organ, writes:—

The Balkan crisis in its newest Bulgarian armed menace has become acute.

Within two days the Bulgarian mobilization will be complete, and at the same time a concentration on the Serbian frontier. A week later we may expect this army to enter into action. It is not necessary for Serbia and her four Allies to wait until the end of this period in order to know on which side this army will act.

Every day that is allowed to pass idly increases the sacrifices over and above those which might with justice be demanded of Serbia; and for the Quadruple Entente the realization of a combination on which the fate of the great European war depends becomes questionable. If Russia is indifferent about losing European communication with her Allies, and if the Quadruple Entente is indifferent as to whether it has a million more rifles on its side, it none the less places Serbia in a difficult position.

It is incomprehensible that it cannot be clearly seen in the interests of the Quadruple Entente and in those of the Balkan States that a decision to end the Balkan crisis must be rapidly taken. This is the moment when prompt action can be most easily effected and with chances of the best results. It is the way to shorten the bloody war which it will have to come to.

A leading politician of the Young Radical party, whose voice carries great weight in this country, expresses his views in the following words:—"With her declaration of a general mobilization Bulgaria has openly gone over to Germany, and opposes Russia. Bulgaria has failed to take a lesson from her costly experience of a few years back; she repeats the same mistakes, which this time may have disastrous consequences not only to the interests of the country at the present time but also as regards her future existence.

"In reply to the mobilizing of the Bulgarian Army, King Constantine ordered the mobilization of the whole Greek forces. So the situation in the Balkans begins to be clear. Serbia and Greece rise once more in arms for the freedom of the Balkan people.

"Bulgaria has had time for calm reflection, and to weigh deliberately the consequences which may ensue from her new adventure.

"The Quadruple Powers have had time to study separately the plans and intentions of each of the Balkan peoples. The diplomatists of the Quadruple Entente did everything possible in order to satisfy Bulgaria, and went to extraordinary lengths to get Bulgaria to range herself on the side of the Entente. And after having employed every possible means, the result is the mobilization of the Bulgarian Army, and at the same time the entering into action of Austria-Hungary against Serbia.

"The Powers of the Quadruple Entente must say their last word quickly and firmly."

A ROUMANIAN VETERAN.

(From Our Own Correspondent.)

Bucharest, October 16.

From Ploesti comes news of the death of a fine old soldier, Gregorie Jon, one of the heroes of the capture of the Crevitza redoubt, the key to the position at Plevna. There, single-handed, he captured the Turkish standard, which he proudly deposited at the feet of King (then Prince) Carol. Like many old soldiers in other countries, he fell upon hard times after leaving the army, and for some years dragged out existence on the wretched pittance of 40 francs a month, working as cleaner at the offices of the *Moniteur Officiel*. Then a reporter of the *Universul* discovered him, and that paper took up his case; and a subscription being opened for his benefit, enough money was obtained to purchase a small piece of land near his native village, where he was able to pass the rest of his days in peace.

He was accorded a military funeral, the honours being done by a company of gendarmerie and a company of his old regiment, while wreaths were sent from the Prefect of the district, his former regiment, and other bodies, and the funeral was attended by a great crowd of people.

The Serbian Legation in London has received instructions from the Serbian Government to deny most categorically all reports emanating from Austro-German and Bulgarian sources alleging that the Serbian civil population fires at and takes part in hostilities against enemy forces.

NEAR EAST BOOKSHELF.

GREEKS IN ENGLAND.*

It would have been difficult to find a more timely juncture for the publication of "Hellenism in England." This little volume contains the results of much painstaking research by Archdeacon Dowling and Mr. E. W. Fletcher into the relations that have existed from the earliest times between the Greeks and this country. A valuable Introduction is contributed by the Greek Minister, M. Gennadius, which embodies many points untouched by the authors. M. Gennadius, who is an authority on the subject, has given such a scholarly survey of Greek influences here that it is much to be regretted that his information was not embodied in the text. Perhaps that may yet be done in a subsequent edition.

The fundamental difficulties which are bound to present themselves to those who essay the part of historian in such by-paths of history are sufficiently obvious for enumeration to be unnecessary. With the best possible intentions the result is apt to be a little lacking in coherence. In the present case, while there is material available in the first few centuries before the Christian era, the authors have failed to find any trace of Greek activities in this country between 27 B.C. and the dawn of the Renaissance. M. Gennadius, however, gives a number of facts which go far towards filling up the gap. Constantine the Great, he points out, accompanied his father to Britain, and on his death was crowned Emperor at York in 306, while Theodore of Tarsus, of Greek descent, was crowned Archbishop of Canterbury in 668. Theodore's work in organising the English Church, and in reconciling local antagonisms, led Stubbs to write: "He was the real organiser of the administrative system of the English Church, and in that work laid the foundations of English national unity." The writer also mentions John Basing, who died in 1252. He was at one time Archdeacon of Leicester, but a greater claim to fame lies in the fact that he was probably the first Englishman to study Greek at Athens. The first instance of a Greek visiting Britain is in 330 B.C., when Pytheas came over from the Greek colony of Massilia to ascertain how much truth there was in the rumours that there was considerable mineral wealth in the country. He was followed over two centuries later by Posidonius, once the tutor of Cicero, who was able to make a favourable report on the Cornish tin trade with Massilia.

With the capture of Constantinople in 1453 the cult of Hellenism began to prevail in this country. Under Grocyn and Linacre at Oxford, and Erasmus at Cambridge, Greek became a part of the university curriculum, and from that time onwards gradually assumed the importance which would make its removal from the list of compulsory entrance subjects at the universities practically an academic revolution. The study of Greek was doubtless responsible for a desire for an increased connection between the countries, and we find that in 1616 the Patriarch of Alexandria decided to send a young man to Oxford to be trained for the priesthood. The student remained at Balliol five years, and distinguished himself on his return by succeeding his patron as Patriarch. An attempt was made in 1677 to establish Gloucester Hall as a Greek College at Oxford; but after repeated attempts the experiment was abandoned, and in 1714 Gloucester Hall came into the hands of Sir Thomas Cookes, who founded Worcester College. Within the last ten years two Greek monks were sent to Oxford—one of them is now an Archimandrite at Jerusalem, and the other is Titular-Bishop of Stavropolis. In keeping with her mathematical traditions, Cambridge has not had anything like the same association with Greeks. In fact, one of the few notable events in her history in this connection was the translation of the *Book of Common Prayer* into Greek in 1665 by Dr. Duport, Master of Magdalene College and Regius Professor of Greek.

Apart from the universities, there have been, and are, flourishing Greek colonies in various parts of this country. "Hellenism in England" will be found to contain an excellent account of the growth of these communities, and of the Greek churches which have marked their assemblage. The presence of these communities in our midst is, however, no criterion of the strength of Hellenism in England. In literature and the arts are to be found the signs indicative of the extent to which we have yielded adherence to the Hellenic cult. The Hellenism which has roused our admiration is the civilisation of Athens, and, glorious though that civilisation undoubtedly was, it would lose much of its gloss if it was proved that it was merely an end in itself, and not an incentive for the race to achieve even greater heights.

* "Hellenism in England." By Theodore E. Dowling, D.D., and Edwin W. Fletcher, F.S.A. Scot. With an Introduction by H. E. Joannes Gennadius, Litt.D. (Faith Press.)

A BOOK OF REVELATIONS.

40 Years in Constantinople

¶ Sir Edwin Pears' Book of Secret History of the Near East. 16s. net. The book that is inspiring leading articles in the newspapers and many big queries.

¶ The book that makes the most remarkable disclosures of recent years which every one must read. The book that tells of the superiority of German diplomacy in the Near East. 2nd Ed.

HERBERT JENKINS, ARUNDEL PLACE, HAYMARKET, S.W.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

BULGARIA AND THE PRINCIPLE OF NATIONALITIES.

To the Editor of THE NEAR EAST.

Sir,—Having just returned from Bulgaria, where we have lived for some years, may we call the attention of your readers to certain points in connection with the present position of that country in relation to the Entente Powers?

It has been repeatedly stated that the Allies are fighting this war for the principle of nationalities and the rights of small nations, and that we shall not lay down the sword until our object has been attained.

Bulgaria received Sir Edward Grey's declaration regarding the principle of nationalities as an assurance that what belonged to Bulgaria by a rational application of that principle and a due regard to economic necessities would be given to her, and that, if any of the Balkan States opposed the Allies in the fulfilment of their engagements to Bulgaria as a small State, the Allies would act with the firmness consistent with their mission, their dignity, and their honour.

For many months the Balkan States were left in anxious uncertainty as to how the Allies proposed to interpret the principle of nationalities as applied to the Balkans. Proposals were finally made, and subsequently renewed with modifications, involving the cession to Bulgaria, after the war, of certain territories occupied by Serbia and Greece, as well as other advantages. These proposals, made, as they were, by Powers warring for a stated principle, were, it was logically to be assumed, equivalent to a recognition by those Powers of Bulgaria's right, under the principle involved, to the territories proposed to be ceded to her.

Greece hastily replied to the Note containing the Allies' proposals, refusing to make any concession to Bulgaria. Serbia, after much delay, notified her acceptance in principle, but interposed so many reserves that her reply was practically a rejection of the Allies' demands.

The ultimate issue of this situation was obvious: either Bulgaria would seize Macedonia, or the Allies would have effectively to adhere to their avowed principles and compel Greece and Serbia to cede what the Allies had already implicitly recognised as belonging to Bulgaria.

The moment was a decisive one. It was evident to Bulgaria that the principle of nationalities could only be regarded as a plausible theory so long as its application was to be subject to the approval of her capricious neighbours—the authors of the Treaty of Bucharest. No Government in Bulgaria could ever have supported the cause of the Entente so long as her principles melted away at the opposition of Greece, whose very breath of life was dependent on our will.

Ferdinand was put on his mettle. He knew his people. They wanted Macedonia, and he realised that they would not get it from the Allies. Macedonia they consider as the cradle of their race. The blood of their recently massacred brothers called, moreover, for vengeance. These were the sentiments which would govern the majority of the people in a war for Macedonia. The elation of the troops, consequent on immediate easy victories, would, so Ferdinand no doubt foresaw, soon reconcile the people to fighting on the side opposed to Russia and England. Our half-hearted policy had served, moreover, no other purpose than to strengthen the hand of the King and to discredit our own friends in Bulgaria in the eyes of their following.

As our Bulgarian friends frequently pointed out, there was but one course to pursue from the beginning, if we wished to obtain the support of Bulgaria and the respect

Digitized by Google

of other small nations—viz., to have given a frank and definite interpretation as to how the principle of nationalities should be applied in the Balkans, stating clearly what the Allies would henceforward regard as the boundaries of each Balkan State. Bulgaria would have been satisfied, and the King would have been swept away had he attempted to act against a contented national opinion. As it was, profound bewilderment replaced all other national feeling, and Ferdinand seized the occasion to indulge in a gigantic gamble.

It is frequently asked why Bulgaria could not reasonably have accepted our promise to give her, under certain conditions, a part of Macedonia at the end of the war. Bulgaria's answer is as follows:—

1. Macedonia belongs to Bulgaria, and Serbia recognised the fact in the Secret Treaty of 1912. The Allies have subsequently implicitly endorsed Bulgaria's claim.

2. Bulgaria could easily take Macedonia herself at a smaller sacrifice than that she was asked to make in return for a promise of Macedonia after the war.

3. She had no reason to feel assured that the Allies would adopt a stronger attitude towards Greece and Serbia after the war than they had done during the war, in case these States refused to give up the territories promised by the Allies to Bulgaria. Bulgaria had only recently been sadly deceived by both Greece and Serbia; and our own Foreign Secretary's statement regarding the *status quo* made prior to the first Balkan War was still fresh in the Bulgarian mind.

4. If the Allies' promise of Macedonia was good enough for Bulgaria, the Allies' still more attractive promise of compensations to Serbia and Greece should also have been good enough for the two latter.

In making overtures to Greece and Serbia with regard to the cession of certain territories to Bulgaria, the Allies presumably acted on a principle, the application of which was just, consistent, and necessary. On the basis of this assumption, it would have seemed permissible to anticipate that judicious action would follow these overtures in case they failed in their purpose. Greece and Serbia probably experienced a very great surprise, with perhaps a touch of disappointment, on finding that the Allies had accepted, with little further ado, their refusal to adhere to the principle which the Allies had solemnly undertaken, without reserve, to put into execution, and which would have meant salvation to all the Balkan States.

The interests of Greece and Serbia henceforward dominated the policy of the Allies in the Balkans; and Bulgaria was left a prey to Ferdinand and the Germans. As is natural, Greece seems now somewhat scared at the situation her own vacillation has created, and Serbia is gently murmuring that we are not helping her fast enough out of the dilemma in which she and, to a serious extent, we also, have been placed.

The question which troubles our minds most is whether we are still determined to apply the principle of nationalities in the Balkans and not to sheathe the sword until the cause of discord has been removed; or whether we shall leave to posterity a legacy still more unhappy than that of the Treaty of Bucharest.—We are, etc.,

H. L. ANDREWS.
CHAS. TURNER.

THE MAIN THEATRE OF THE WAR: THE BALKANS.

To the Editor of THE NEAR EAST.

Sir,—The arrival of Germany in the Balkan Peninsula is misunderstood if it is attributed to failure on her other fronts. Rather is the explanation to be found in the fact that she is now seeking to gain by military effort what for the last twelve years she has been unable to obtain by diplomatic means. That Germany intended the Balkans to be the main theatre of her operations is not only shown by the long record of events that led up to the war, but it is indicated by the way in which hostilities were launched. The fact that the seat of the outbreak lay in Serbia may of itself give a key to the position, for an attack upon that State was an attack upon territory that formed a barrier in the development of Austro-German communications with the East, and which a long course of provocation had sought in vain to remove. But there are contributory facts that assist our judgment. Germany's declaration of war was a declaration against Russia, and it was not accompanied by a similar declaration against France. On the contrary, the German Government inquired through their representative at Paris "What attitude France intended to adopt in case of a Russo-German conflict," indicating thereby no predetermined resolve to make war on France. And though Baron von Schoen said, "on his own initiative," that the answer was not in doubt, yet had France then, as Greece has now, been false to her treaty obligations, the war might for the time being have been confined to Eastern Europe, and the struggle so long impending between Slav and Teuton for ascendancy in the Balkan Peninsula have been fought out on its simple and uncomplicated terms.

This is only to show that the Balkan offensive is not an afterthought on Germany's part, that the inception of it is not involved in mystery, and that it cannot be taken as an indication of Germany's weakness based upon the argument that, being contained elsewhere, she is driven to seek an outlet to the south. Whether she will achieve her end, or, if she does achieve it, whether the end will be worth the unexpected sacrifices made for it, are questions apart. But that she is now engaged upon the express object for which she declared war is apparent, for German plans have throughout persisted in unity of purpose, and in spite of all opposition. By way of example, they survived the Anglo-French Declaration of 1904, which had the effect, amongst other things, of withdrawing France from participation in the construction of Ottoman railways, which had been proceeding under the joint auspices of the Deutsche Bank and Comte Vitali, the Paris railway magnate. And they survived the subsequent Anglo-Russian Convention, which gave our relations with Russia a new setting and in effect afforded her a free hand in the Balkan Peninsula, and so the means of countering the growth of German ascendancy there. And the remarkable fact is that it now persists towards its self-appointed end, notwithstanding the opposition of Russia and France in military conjunction, and despite the additional opposition of Italy and ourselves. With one hand Germany holds back French and British on the West, and with the other she holds back the Russians on the East, and with the passage cleared, as police clear a roadway for the passing of processions, her armies press forward ostensibly to realize the objects for which she destined them. While in holding her back from Calais we have successfully countered one of the two great aims of German ambition, the command of her sea communications, yet the other, the penetration of the Balkans, remains undecided, and while it is undecided it is of the first importance for us to recognise that in the result is contained all that Germany has for so long set herself to achieve by land and all that we have set ourselves to prevent.

For has not our whole diplomatic effort for more than a decade been concentrated on the limitation of German endeavours in Asia Minor? By means of the strategical system of railways that were in course of development, largely under Germany's superintendence, and rendered the more dangerous by her refusal to internationalize them, not only was Constantinople being connected with the Persian Gulf, but the vulnerable approaches to Egypt were being rendered liable to a concentration of assault from the remotest parts of the Turkish Empire. For the British, who wish to direct their resources to the maintenance of sea power, and who want no new frontiers to defend, the Baghdad Railway, as being in its anticipated effect on the peoples of Asiatic Turkey in the nature of a turning movement of our position in Egypt, has constituted since its inception the leading international question in which we have been engaged, and it is in connection with this that Germany's Balkan offensive so concerns us.

It is not too much to say that the question of Germany's communications with the East has entirely revolutionized her world policy. Under the compact with France, not only did we abandon the Mediterranean policy of the Victorian era, but, under the agreement with Russia, we even came to regard the menace of Muscovite encroachment on Indian frontiers as altogether removed, and the anticipated growth of Russian ascendancy in the Balkans as no longer a danger to our sea communications. Could there have been more momentous changes in our foreign outlook or changes that better indicated the depth of the impression that Germany's aims had made upon us? It is idle to say that the Foreign Office, saturated as it was with this subject, has been taken by surprise, or that it was unaware that the Eastern theatre would mark the culmination of Germany's plans. Preparation was duly made, if it was not made in the Balkans. We are a maritime Power, and our plans were laid upon considerations of making the most of sea power. The Dardanelles was our natural objective, and our enterprise there was capable of fulfilling all political expectations in this connection; and it is only fair to remember that, had it succeeded, not only would the question of railway communications in Asiatic Turkey have been solved to our advantage, but the balance of power in the Balkans would have yielded in our direction. That this undertaking did not succeed was due to military and not to political causes, and the Foreign Office was unjustly blamed for the difficulties that have arisen as a consequence of the failure.—I am, etc.,

DOUGLAS M. GANE.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Julian (Old Style).	Gregorian (New Style).	—	Moslem.	Jewish.
1915.	1915.		1334.	5676.
Nov.	Oct.		Moharr'm	Kisler.
12	30	Friday	4	5
13	31	Saturday.....	5	6
	Nov.			
14	1	Sunday	6	7
15	2	Monday	7	8
16	3	Tuesday	8	9
17	4	Wednesday	9	10
18	5	Thursday	10	11

Thursday next, being November 5, Old Style, is the birthday of H.R.H. Prince Cyril of Bulgaria, second son of King Ferdinand, who was born at Sofia in 1895.

King Peter, of Serbia, has conferred on Commander H. S. Cardale, R.N. (British Naval Mission in Greece), the Karageorge Order (Military Cross of Serbia), for distinguished service in the field. This is the first time that this decoration has been conferred upon a foreigner.

Prince Danilo, heir to the Throne of Montenegro, and his wife, Princess Xenia, who have been staying at Cap Martin, have left for Italy, states a Nice telegram. The Prince, who is now in rather better health, will rejoin the Montenegrin Army if he can obtain medical sanction.

It is officially announced that Queen Elizabeth, the Queen Dowager of Roumania, underwent an operation for cataract on the right eye on Wednesday morning. The operation, performed by Professor Landolt, who had been specially summoned to Roumania for the purpose, was completely successful.

Cordial telegrams, says a Paris message, were exchanged between the French Premier and M. Pashitch, the Serbian Premier, on M. Briand's assumption of office.

The Serbian Minister visited the French Embassy on Saturday, and, during the absence of M. Paul Cambon in Paris, was received by M. Fleuriau, the Chargé d'Affaires.

A Bucharest telegram, received in Petrograd, states that M. Savinsky, Russian Minister to Sofia, who had been detained in the Bulgarian capital by illness, was expected to leave on Monday for Russia.

Sir J. D. Rees, M.P., has undertaken the direction of the Prisoners of War Information Bureau, in succession to Sir H. P. Harvey, who has proceeded to America.

The Right Rev. the Bishop in Jerusalem and Mrs. McInnes return to Egypt on the P. and O. steamer Arabia, leaving London to-morrow.

The marriage of Second Lieutenant Bernard St. John Storrs, R.F.A., third son of the Very Rev. the Dean of Rochester, and Marjorie, only daughter of Mr. and Mrs. William Kingham Dyson, took place in Rochester Cathedral on Wednesday of last week. The bridegroom is a brother of Mr. Ronald Storrs, Oriental Secretary to the Residency, Cairo.

WANTED. — Back numbers of the "SPHINX." — Write particulars, A.B.C., c/o "THE NEAR EAST," Devonshire Square, London, E.C.

WOUNDED AND MISSING.

MAJOR G. DAVIS,
1/11TH COUNTY OF LONDON REGIMENT, Wounded and Missing on August 15 at Suvla Bay. Will anyone hearing news of him please communicate with Mrs. Davis, "Edencroft," Brondesbury Park, N.W. ?

Miss Hilda Binns, of Constantinople, who was last July selected as nurse at Bagthorpe Military Hospital, Nottingham, is now attached to Queen Alexandra's Imperial Military Nursing Service Reserve.

Friends of Mr. Neville Maltass will be pleased to learn that his son, Sydney, who was interned by the German authorities on November 6 last year, while on a visit to Germany, has returned to London, and is in good health. He was released from Ruhleben on the anniversary of his internment.

In a letter dated from Athens on October 10, an Englishman formerly resident in Constantinople writes :—

The following are the names of some of the Englishmen who were deported into Anatolia about a month ago :—Messrs. Leete (Agent of the Western Assurance Co.), Farley (ex-analytical chemist at the Ottoman Gunpowder Works), Hoare (accountant, Economic Co-operative Society), Wellard (of the National Bank of Turkey), and Wellesley, Gilbert, and Harold Ashover. There are, besides, half-a-dozen more whose names I have not been able to ascertain. Dr. J. Maclean, of the British Hospital, now under American Red Cross management, and Mr. James Rawe, an old resident of over 70 years of age, were likewise arrested, and were about to be deported, but Mr. Morgenthau, the American Ambassador, was again successful in procuring their release.

The announcement that Mrs. Douch and family had left Constantinople proves, unfortunately, to have been incorrect. We learn on the best authority that as the Turks would not allow Mrs. Douch's son (who is only fifteen years old) to go out of the country with her, she pluckily decided to remain with him. Their friends will be interested to know that they are now living in Mr. Hayden's flat in Chichli, and that, though their house and property had been confiscated by the Turkish Government, they themselves had not, up to October 1, been molested in any way.

The King has been pleased to approve of the appointment as a Companion of the Distinguished Service Order of Major Cecil John Lyons Allanson, 1st Battalion 6th Gurkha Rifles, for most conspicuous gallantry and marked ability on August 9, 1915, in leading his battalion to the attack on Chunuk Bair Ridge, Gallipoli Peninsula. Major Allanson, with two companies, reached the summit of the ridge under a very destructive fire from the enemy, where he was wounded by a bayonet thrust. When it became obvious that supports could not reach him, he skilfully withdrew his men, and, notwithstanding the pain from his wound, remained with his battalion throughout the whole day, being the only British officer left.

In a congregation at Oxford held on Tuesday a statute was issued establishing the Bywater and Sotheby Professorship of Byzantine and Modern Greek Language and Literature out of moneys bequeathed to the University by Mrs. Charlotte Bywater and her husband, Professor Ingram Bywater.

The death occurred last Sunday, at Alderbourn, Stoke Poges, of Mr. F. Guy, formerly of Port Said, where he was manager for Messrs. Worms and Co. He was seventy-two years old.

Lieutenant-Colonel C. B. Baldock, 108th Infantry, Indian Army, who is reported to have died on service, was an accomplished linguist, and held first-class certificates for Persian and for languages appertaining to India, and he had also qualified for Staff employment. Before the present war his active service had been seen in the Burmese Expedition of 1887-8, and he was decorated with the Burmah medal with clasp.

Lieutenant-Colonel John R. Beech, 2nd Scottish Horse, D.S.O., who has died as the result of a chill, and heart failure following pneumonia, was in the Egyptian Expedition of 1882-4, when he was mentioned in despatches, receiving two clasps. He served in the Sudan Expedition of 1884-5, and was the recipient of two clasps. He was again in the Sudan in 1888-91, when he was slightly wounded, and was once more mentioned in despatches. He also saw service in the South African War in 1899-1900, receiving the Queen's medal with five clasps.

The death took place last week at his residence, Herne Hill, of Lieutenant-Colonel W. H. Drage. Born in 1855, and educated privately, he joined the Commissariat and Transport Department (now the Army Service Corps) in 1872, and ten years later became a warrant officer. From 1886 to 1904 he was attached to the Egyptian Army, and he had seen much fighting in the Nile Valley. He took part in the Sudan Expedition of 1884-5, receiving the medal with clasp and the bronze star. He was also engaged in the Sudan between 1885 and 1889, when he was mentioned in despatches, receiving a clasp and the Fourth Class of the Medjidieh. He was in the Expedition to Dongola in 1896, when he was again mentioned in despatches, and was the recipient of the Egyptian medal. In the following year he was in the Nile Expedition, and was once more mentioned in despatches, becoming at that time a member of the Distinguished Service Order, and receiving a clasp to the Egyptian medal. In the Nile Expeditions of 1898 and 1899 he earned further distinction, being at the Battle of Khartoum and being again mentioned in despatches, obtaining at the same time the honorary rank of lieutenant-colonel. He likewise received the Third Class of the Osmanieh.

Captain Humphrey de Butts Grant, Royal Field Artillery, who was previously reported wounded, and is now reported killed in action in France on October 3, was born at Cyprus in February, 1885. He was the only child of Colonel S. C. N. Grant, C.B., C.M.G., Chief Instructor at the Military School of Engineering, Chatham, who was employed on special service in Cyprus from 1878 to 1886, and Mrs. Grant, the White Cottage, Norton, Yarmouth, Isle of Wight.

Owing to indisposition Mr. Ashmead Bartlett was unable to lecture at the Free Trade Hall, Manchester, on Friday last. His lectures at Sheffield, Leeds, Liverpool, Birmingham, and the Queen's Hall have had to be postponed for the same reason. Mr. Ashmead Bartlett, who returned from the Dardanelles in a bad state of health, is suffering from enteritis, but his medical attendant thinks he will be well enough to resume his lecturing tour before the end of the month.

Kaimakam R. G. Archibald Bey, R.A.M.C., attached to the Gordon College Wellcome Research Laboratories, Khartoum, has reverted to the British Army.

A Constantinople telegram received in Amsterdam states that the German Emperor has conferred the order of the Black Eagle upon the Turkish Grand Vizier.

News has reached the Committee of the Serbian Relief Fund, 5, Cromwell Road, S.W., that at least 7,000 refugees from Serbia have crossed the frontier into Roumania. In spite of the heavy drain on their fast-diminishing capital the Committee have decided to send the refugees clothing and money as quickly as possible, and a sub-committee has been appointed to deal with the matter.

The Archbishop of the Armenians in Western Europe has written from the Armenian Church at Manchester to the Lord Mayor of London thanking him for his efforts to alleviate the sufferings of a martyred people.

The Byron Society's Executive Committee has sanctioned the following appeal to Greeks throughout the world :—"The Byron Society, recalling the help given by Great Britain, France, and Russia to the Greek cause at Navarino and on many other occasions, and holding in honour the names of Byron, Victor Hugo, Pushkin, and other great Philhellenes belonging to those three nations, hereby appeals to the Greeks throughout the world to unite in resisting the Germanic influences which will involve the ruin of Hellas and Hellenism."

SUDAN HONOURS.

(From Our Own Correspondent.)

Khartoum, Oct. 27.

The feast of Kourban Bairam began on October 19. A levée was held by H.E. the Governor-General on October 20 at 9 a.m., at which the conferring of a number of decorations and robes of honour were made known to the public. A guard of honour was drawn up before the Palace and H.E. read out the list of honours, and invested certain native notables with their robes. The British officials who received decorations included the following:—

ORDER OF THE NILE (*2nd Class*).

Col. H. W. Jackson, C.B., Governor of Dongola Province.

Colonel Jackson has been associated with the Sudan for the greater part of his life. After the battle of Omdurman he proceeded South and took a large part in the delicate negotiations of Fashoda. Subsequently he was Acting Governor-General and then became Governor of Dongola, which province from a state of arid penury rose to a considerable degree of affluence, and was the model for all administrations.

(*3rd Class.*)

Dr. J. B. Christopherson, Director of Khartoum and Omdurman Civil General Hospitals.

Dr. Christopherson has 13½ years' service in the country, and has done wonders to disseminate in the native mind the value of hygiene and medicine instead of magic and dirt.

(*4th Class.*)

Major R. C. Greenwood, Senior Inspector, Bahr el Ghazal Province.

Major Greenwood has nearly nine years' service, spent almost entirely in the extreme South. He has just returned from Gallipoli.

Capt. H. Beaumont, Inspector, Mongalla Province.

Captain Beaumont came to the Sudan in 1909, and is stationed at Latuka, one of the remotest outposts.

Major C. W. Spinks.

Major Spinks is second in command of the Artillery and Ordnance. He recently returned to Khartoum to take up his residence here.

Mr. A. L. Butler.

Mr. Butler, who joined the service at the beginning of 1901, has just retired from the position of Director of the Game Preservation Department.

Mr. C. Havercroft.

Dr. Hodgson has for many years made At-Sudan Railways, and has been for the greater part of his service in charge of the Port Sudan section, where his work has been notable.

Mr. C. A. Willis, Assistant Director of Intelligence.

Mr. C. A. Willis has ten years' service. He was previously in the Administration, spending seven years in Kordofan, of which four were devoted to the Western district. He has since been in the Red Sea, whence he was promoted Senior Inspector, Dongola Province.

Mr. H. P. Hewins, Director of Commercial Intelligence Bureau.

Mr. Hewins has 11½ years' service. He is also Secretary of the Economic Board, and is responsible for the commercial returns that appear periodically. He has done much to assist the trade of the Sudan.

Dr. V. S. Hodgson, M.V.O., Senior Medical Inspector.

Dr. Hodgson has for many years made At-bara a model town in matters of hygiene. He has twelve years' service.

Mr. H. A. MacMichael, Senior Inspector, Khartoum Province.

Mr. MacMichael came out in 1905, and was for six years in Kordofan. He was then transferred to the Blue Nile Province, whence he was promoted to Khartoum. He has produced a standard work on the Arabs of Kordofan, and other work is shortly expected from him.

Mr. J. G. Matthew, Senior Inspector of Sennar Province.

Mr. Matthew was largely instrumental in the growth and prosperity of Tokar and the cotton industry there, though the first years of his service, as the present, were spent in Sennar.

Civil Bey.

The rank of Civil Bey (2nd Class) was conferred on two persons:—Ibrahim Eff. Dimitri and Hassan Eff. Ahmed, Chief Accountant, Public Works Department.

Ibrahim Eff. Dimitri, of Syrian birth, has been for many years the Arabic Secretary of the Inspector General, a responsible position involving considerable journeys and constant work.

SUDAN PROMOTIONS.

(From a Correspondent.)

Major G. S. Symes, D.S.O., who has recently received promotion, occupies the position of private secretary to the Governor-General of the Sudan. Major Symes has been in the service of the Government since January, 1909. He has long enjoyed the esteem and confidence of Sir Reginald Wingate, and of all others with whom he comes into contact officially. He is a good Arabic scholar as well as a very competent organiser. Much of the success that has attended the operations of the Economic Board may be attributed to his initiative.

The Governor-General's personal staff includes, likewise, an assistant private secretary (Mr. A. W. Keown Boyd), a military secretary (Captain Rees-Mogg), an Arabic secretary (Shaheen Bey George), a shorthand writer, several junior clerks, and a British N.C.O. The whole of the Palace establishment is a very modest one, calling for an annual expenditure of something less than £E4,500, and of this amount £E370 is contributed by the War Department towards the pay of the Arabic secretary.

Major H. J. Huddleston, who has recently been promoted, took part in the settlement of the trouble among the Nuers some time ago, being one of the British officers with Major Romilly, who were despatched from El Obeid (Kordofan) to deal with the troublous tribesmen. It may be remembered that the result was officially said to have been in every way successful, and that the end was attained without unnecessary resort to harsh measures. Mr. A. J. C. Huddleston (now on leave), who is stationed at El Damer, in the Berber Province, as Second Inspector, is a brother of Major Huddleston.

Major F. J .M. Postlethwaite, whose name is found among the most recent promotions, has occupied the position of Second Inspector at Gedaref (Kassala Province) for some time, and with considerable distinction. He has especially interested himself in improving the general appearance of an otherwise unattractive looking town, encouraging the native cultivation of edible vegetables, and opening up a new road from Gedaref to Fau viâ Ghadambalia and Migre, where wells have been sunk. Major Postlethwaite has also worked energetically and successfully to complete the new Civil Hospital at Gedaref so far as is possible in the absence of sufficient funds.

Other Sudan officials who are included in the new promotions are Major G. B. Wauchope, Second Inspector in the Kassala Province, now temporarily detached in Egypt, and Major C. H. Stigand, stationed as Second Inspector at Kajo Kaji, in the Mongalla Province.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

Bevan.—On November 7, at 4, St. Ronan's Road, Southsea, the wife of Carus B. Bevan, Sudan Civil Service, of a son.

Speakman.—On the 5th inst., at Suez, the wife of J. MacClure Speakman, of Tor, Egypt—a son.

MARRIAGE.

Hargreaves—Bowell.—On November 2, at the Garrison Church, Mustapha, Alexandria, by the Rev. Canon Gairdner, of Cairo, assisted by the Rev. E. W. Green, Chaplain to the Forces, Alfred Ridley Hargreaves, Lieut. R.A.M.C., M.R.C.S., L.R.C.P., of the C.M.S. Hospital, Old Cairo, fourth son of John P. Hargreaves, of Birkenhead, to Helen Sophia, third daughter of the late Rev. William Bowell, vicar of Sissinghurst, Kent.

The British Women's Patriotic League is collecting clothes, hospital necessaries, and money for our hardpressed Ally, Serbia. All interested are asked to send clothes, etc., to the care of Mrs. Moxey, 46, Westbourne Terrace, and money to the Secretary of the League, 92, Victoria Street.

SCHOOLS for BOYS & GIRLS.

TUTORS for ARMY, UNIVERSITY, CIVIL SERVICE and ALL EXAMS. REFINED HOMES with EDUCATION for children whose parents are abroad.

Messrs. J. and J. PATON, having an intimate, unique, and up-to-date knowledge of the best Schools and Tutors in this country, will be pleased to aid parents in their choice by sending (free of charge) Prospectuses and Trustworthy Information regarding Establishments which can be thoroughly recommended.

The age of the pupil, district preferred, and rough idea of fees should be given.

'Phone, write, or call,

J. and J. PATON, Educational Agents, 143, Cannon St., London, E.C.

Telephone: 5053 Central.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.

FRIDAY, NOVEMBER 12, 1915.

LORD KITCHENER IN THE NEAR EAST.

The decision of the British Government to send Lord Kitchener on a special mission to the Near East betokens, we may hope, the acceptance, "without reserve and without qualification," of the importance of the Balkans as a theatre of war. The people of Great Britain ask for nothing better than that Lord Kitchener's visit to the Near East should be in the nature of an heroic remedy for a desperate ill, an earnest of the tardy recognition of the fact that this country is now required to put forth its fullest effort in order to retrieve past mistakes. How much those mistakes are still with us may be seen in the circumstances attending the departure of the Secretary of State for War. Nothing would have been simpler or more calculated to restore confidence to the public than an intimation from the Government that developments in the Near East necessitated an entirely new orientation, which it was proposed to entrust to the most capable hands. Then when Lord Kitchener's absence from the War Office was noticed—as it must inevitably be noticed a few hours after he had left—it would have been connected at once in the public mind with the Government's new plans. The policy of secrecy, carried as it has been to extreme lengths, aroused all manner of suspicions. It was realized, as Lord Milner reminded the House of Lords, that the Government was developing a tendency to shed its elements of strength rather than its elements of weakness. What more likely than that Lord Kitchener, in leaving his work at the War Office, should be following Sir E. Carson into the wilderness? One newspaper, less shrewd than others, traced the line of argument with undue persistency to its logical conclusion, and has been suppressed. The Government has found it necessary to issue a denial of reports which could easily have been prevented, and in an access of misplaced indignation the official *communiqué* states that the visit has been undertaken by Lord Kitchener "in discharge of his duty as Secretary of State for War, which duty he has no intention of abandoning." But the country would have experienced no qualms in learning that Lord Kitchener had left the War Office to take over supreme direction of a large Allied force for operations in the Near East, provided always that his army and its reinforcements were to be commensurate with the work he had to accomplish, and that the country could have the assurance that his departure was not likely to coincide with any weakening in the counsels of the Government. Even now it is not concerned with the possible duration of Lord Kitchener's absence provided his object is achieved. He has a twofold task to perform—to co-ordinate the military and diplomatic efforts of the Allies in the Near East, and by his reports to galvanize into intelligent action a Government which, whatever its record in other places, has not shown until the eleventh hour an adequate comprehension of the issues before it in that theatre of war.

The situation confronting Lord Kitchener in the Near East will be largely the result of the mistakes of a Government of which he has been and remains a member. To what extent he himself shares responsibility for those mistakes we have no means of knowing, but the desire to enable the whole Government to withdraw from an invidious position must surely spur him now to make his mission the prelude to some very definite success. He will find that the military situation could hardly be worse. In Serbia the enemy's advance is steady and systematic, although it may slacken in speed as the more difficult terrain to which the Serbians are withdrawing is reached. The primary object of the Germans in invading Serbia is now within an ace of attainment; the secondary object, that of annihilating the nation, undertaken perhaps in deference to their Bulgarian allies or prompted by the discovery that, owing to the failure of the Entente Powers to help the Serbians in time, there was some chance of cutting off the army's retreat, still hangs in the balance. But a free passage for munitions has already been won down the Danube to Rustchuk, whence they can be conveyed by rail to Constantinople, and before many days have passed it is to be expected that the last section of the Belgrade-Nish railway will have fallen into the invaders' hands, enabling supplies to reach the Turks without transhipment, as soon as the Save bridge has been rebuilt. In regard to the Dardanelles operations, it is no secret that, if the Turkish Army should acquire an adequate supply of munitions, the position of the Allied forces on Gallipoli Peninsula will become extremely precarious, if not untenable. For Lord Kitchener's mission to achieve success in the military sphere it will be necessary for him not only to devise speedy relief for the Serbians, but also to check the free passage of German men and munitions to Turkey in time to save the Allied troops in Gallipoli, or as an alternative to arrange for the withdrawal of those troops.

There remains, however, another sphere in which it will be possible for Lord Kitchener's services to be utilised on the occasion of his visit to Eastern waters. We are constrained to believe that a personal interview between the British Secretary of State for War and King Constantine would tend to clear up the anomalous position in which Greece now finds herself. To the Greeks, as well as to the other peoples of the Near East, Lord Kitchener's mission is probably the first clear indication they have had that Great Britain at least, in common parlance, "means business." One and all have been encouraged to believe that, however well-meaning British diplomacy might be, there was nothing behind it to make good what it failed to obtain by words. During the course of the present war no action on the part of Great Britain has served to dissipate this theory. She was anxious to secure the support of the Balkan States, but she was paralysed in turn by the intransigeance of Serbia, Bulgaria, and Greece in the matter of making the concessions necessary for such support. When, in contrast to this attitude, the Balkan States have been brought up against Germany's methods, they have inevitably been impressed by the confidence and thoroughness shown by her, which found such telling support in the achievements of the German armies in the field. Both King Constantine and King Ferdinand of Bulgaria are firmly convinced that the Central Powers must ultimately triumph in this war. Their belief is based on the claims advanced by Germany and on the failure of the Entente Governments to prove to them wherein the Allies' superiority lies. Unlike the King of Bulgaria, King Constantine has been prevented from giving practical effect to his belief in Germany's ultimate success by the uncomfortable fact that the Allies have control of the sea, and would be able to dispose of Greece long before the Central Powers, even if they were so minded, could give her adequate assistance. The King of the Hellenes is actuated by no lofty principles. He is not anxious to fight in this war; but if he must, he is determined that he shall be on the winning side. There are many striking factors in the military position now which dispose of most of the arguments on which Germany has relied hitherto. No one will be able to lay these before King Constantine with greater cogency than Lord Kitchener, who, in view of his recent conferences with General Joffre and the French Government, will doubtless be able to speak on behalf of the Entente Powers as a whole. The interview would thus have all the advantages of finality, for in the event of King Constantine's position not being cleared up to the satisfaction of the Allies, definite measures could be adopted to put an end to an equivocal attitude which is prejudicial to the Allies' interests.

THE SPIRIT OF RUSSIA: 1812 and 1915.

By Estelle Blyth.

In one of Maurus Jokai's books there is a chapter called "Roses in the Snow"; it describes the passage of a dying man to Siberia, whose blood, falling as he is carried along unconscious, makes the roses in the snow. Death marked just such a trail of suffering on the Russian snows in 1812, when the Grand Army of Napoleon melted away before "the stubborn constancy of the Muscovite race."

The battle of Eylau (February 8, 1807) was claimed by Napoleon as a victory, but it cost him 12,000 men, and Benningsen, by retiring some few hundred yards, lost the opportunity of forcing a double disaster upon Napoleon which would have been patent to the eyes of the world. As it was, Napoleon, with his extraordinary aptitude at what he called "the divine side of the art" of war, challenged Benningsen to a second battle, which he was not daring enough to venture, and then cried aloud to the world behind him, "The Russians refuse to fight—I have conquered!" The Treaty of Tilsit followed, whereby Napoleon, in lordly wise, bestowed countries right and left on whom he would. Russia's assent to the treaty was compelled by circumstances, and the wound rankled for three long years before it was cured by warfare. Napoleon complained in 1809 of the Tsar's bad faith, but he had probably even then determined on a second and successful invasion of Russia. To this end he neglected to reinforce his army in the Peninsula, saving the troops for a smashing blow at Russia. Slowly, methodically, and as secretly as possible he prepared the great army that was to crush Northern Europe for ever, the while he kept the Tsar dangling after a string of political feints such as none could devise better than he. Napoleon did not mean to move until the spring (1812), when he calculated that his vast army could subsist upon the Polish plains as it moved north, and so march as light as possible. Austria and Prussia, being pressed, sent men—Austria willingly, for it was to her interest that Russia should be broken, so that she herself did not lie between two mighty Powers such as France and Russia; and Prussia because Napoleon had broken her to his will, and she now bent this way or that at his word. At least eleven hundred thousand men were under Napoleon's banner. Russia, too, made her halting preparations, but she was bewildered by Napoleon's diplomatic wiles, and in any case her available resources were inferior.

The Niemen was crossed on June 24, 1812. At Wilna, a few days later, Napoleon met the National Diet of Poland, and made his first mistake by trying to temporise with the Poles; they wanted liberty as the price of their support, he demanded that support in return for specious promises; in his own callous words: "Je suis très loin de vouloir être le Don Quichotte de la Pologne." Chilled and disappointed beyond measure, Poland thenceforward gave no more help than she need to Napoleon. The Grand Army swept forward. Smolensk and Borodino, to the mind of Napoleon, were but incidents in a campaign, and truly they weigh lightly in comparison with what came after, though Borodino cost the French 50,000 in killed and wounded, and the Russians perhaps 3,000 less. All along the way the Russian dead and wounded marked the track; the sufferings of the latter were truly horrible, but the testimony of an eye-witness is that "not one of them uttered a groan," though "many were heard to call aloud the name of their country or their mother." One man, "who had lost all save one arm and his trunk," appeared "animated, full of hope, and even of gaiety"; others were seen straightening their broken leg by tying the branch of a tree tightly against it, and then, with the support of another branch, making their way to the next village. "Eight days at Moscow, and there will be an end to it!" cried Napoleon, when the list of generals wounded at Borodino was brought to him. Moscow, with its treasures, its riches, its two hundred and ninety-five churches, its gardens and suburbs, its mysterious inviolable charm—Moscow was to atone for all.

At Moscow the Tsar Alexander addressed his people, forewarned them of their danger, and asked them for their help in terms that evoked in them a resentment against the invaders and a resolve to withstand them that were almost too deep for expression; the looks and gestures of the people betrayed their feelings, but a Russian crowd is largely a silent one, and therefore all the more impressive and alarming. The citizens gave two million roubles, one man alone giving 50,000, or two-thirds of all his possessions. A balloon (constructed, it is said, by a German engineer) was prepared to try and destroy Napoleon by dropping bombs and fire on him, but meanwhile a plan of terrible magnitude and daring was evolved. Moscow was to be abandoned, and, if necessary, burnt. It is impossible here to enter into the many reasons, political and military, which led to the conception of such a fearful measure; that it could be though of, and carried out with such thorough and unwavering completeness gives us a startling insight into the Russian character and its profound capacity for doing and suffering. The archives, the public treasures of all kinds, and such personal possessions as the rich could remove, were conveyed from the city; the poor saw, understood, and followed suit. On September 3, 1812, the first contingent of the citizens of Moscow left in a vast procession, men, women, and children bearing such of their most cherished possessions as they could carry; the priests in their flowing black robes led the people, and bore in reverent hands the sacred ikons and treasures of the churches. With tears and prayers, and hymns of mourning and supplication, the people left their sacred city to its doom. It is said that the crowd passed through the gates "with painful hesitation," and then turned once more to take a long last look at Moscow ere they left her walls for ever. Ten days later the remainder of the citizens, the aged and the sick, made their exodus, all hope for the city being now at an end.

On the 14th Napoleon beheld from an eminence the beautiful gilded city of Moscow. "There, at last, is that famous city!" he cried in the first flush of pride, then added sombrely, as if to himself, "It was full time!" He waited, expecting heralds from the city to announce its surrender and submission. The day declined, but no sign of life came from the city, and at length some officers, venturing within those silent walls, brought back the incredible tidings, "Moscow is deserted!" Napoleon's anger flamed up. "Moscow deserted! Impossible! Go, bring me the boyars—I will know the truth!" The officers sent for the boyars returned with five or six miserable workmen, for they feared to return empty-handed; it was true, Moscow was empty. Empty, too, was the triumph of Napoleon; vanished all the hopes he had built on this tremendous day. He might enter the city, and in the Kremlin exclaim: "I am in the Kremlin, the ancient palace of the Tsars!" but he made his boast to empty walls. At night the city burst into flame; here and there a dull glow first awoke, smouldered amongst the wooden houses and the narrow streets, then with a crash and a roar as of every power of hell let loose, it reared its terrific crest to heaven. The thought of that empty, silent city, dead to all appearance, bursting at night into such fearful life as only fire can give, grips the imagination with both hands. Like some grim terror of the night Moscow awoke to life, and with relentless fury took vengeance on the invader. Napoleon was aroused from sleep, and watched the spreading flames from a window of the Kremlin; his ejaculations betrayed his extreme emotion. "It is their own work!—What extraordinary resolution!—So many palaces!—What men!" All at once the cry arose that the Kremlin itself was on fire. It was true. They found the incendiary, a poor devoted creature who had obeyed a command that meant his own inevitable doom, and the furious guard bayoneted him to death in a courtyard. Napoleon himself was hurried by his people from a danger so imminent. The city was now an ocean of spreading fire, whose roaring deafened every ear, as the flames appalled the sight. "We walked," says one of the Grand Army, "on a ground of fire, beneath a fiery sky, and between two walls of fire." Napoleon spent the night at Petrowski, and early the next morning turned his eyes upon Moscow, hoping that the fire had been subdued, but it was burning with the same savage fury; "the whole city appeared like a vast spout of fire rising in whirling eddies to the sky, which it deeply coloured." As he watched, one cry escaped Napoleon, a cry of deep foreboding: "This foreshadows great misfortune to us!" When the fire had burnt itself out, Napoleon returned to the Kremlin, which the heroic efforts of his guard had saved. Even now the exhausted city, blackened and laid waste, her ashes still smouldering sullenly in places, was worth plundering. Dishes and goblets of gold and silver, rainbow-coloured silks from Eastern looms, and precious stones from many lands, had miraculously escaped destruction, but food was obtainable by the merest handfuls, and the hungry soldiers eagerly bartered the richest spoils for a crust of bread or a

little tea and sugar. Indiscriminate looting was certainly the order of the day, but Napoleon restored the churches, wherein his cavalry had quartered themselves, to the Russian worship, and opened places of refuge and support to those of the citizens who were yet in Moscow.

We pass over the month that elapsed between the burning of Moscow and Napoleon's departure on October 19. The sanguinary fight at Malo-Jaroslawetz (October 24), after which Napoleon narrowly escaped capture by the Cossacks, showed that the Russians were far from being broken either in body or in spirit. Sullenly the Grand Army continued the retreat, passing on its way the field of Borodino, where skeletons and bodies of thousands, standards torn and defaced, broken guns, helmets, and muskets, bore terrific and ominous testimony to the battle. The horrors of Borodino were surpassed, however, by the horrors of the retreat. The Abbey of Kolotskoi was full of mutilated and suffering survivors of Borodino; all had to be abandoned save the few who could be crowded into the conveyances of the army, though they crawled to the abbey doors and besought for help and mercy in the most moving terms. There were no means of subsistence for the Grand Army, which was accustomed to march light because it lived upon the country as it passed through; for the Russians had destroyed houses, burnt trees, sacrified stores, rather than let the invader find support. The draught-horses slipped and stumbled and fell upon the rough frozen tracks and ice-smooth steeps; when they fell the starving soldiers set upon them like wolves, slew them, and fairly tore them to pieces, broiling the flesh at the wagons which supplied their fires. The Russians hung upon the flanks of the Grand Army, seldom risking a pitched battle with men reduced to desperation by their awful plight, but harassing them beyond endurance. On November 6 a terrible snowstorm assailed the French, "it seemed as if the very sky was falling," wrote one of the Grand Army, "and joining the earth and our enemies to complete our destruction." The men were confused by the thickened atmosphere and the darkness; they wandered helplessly from the track, and many perished in snowdrifts and hollows, while others died from the cold and exposure. All around on the desolate countryside little snow-covered mounds began to appear, marking where these poor things had fallen by the way. A strong and piercing wind added to the anguish of the living. The tall black shapes of pine trees here and there arising out of the snow increased the horror of this gaunt landscape, wherein appeared no sign of life save the trail of "an army dying amidst a nature already dead." Night fell, a few fires were kindled, frequently extinguished by the falling snow, and officers and men crowded round those meagre flames to share their horrid meal of horseflesh. Morning rose on circles of dead soldiers lying round little heaps of cinders; they had not survived the night. The Army arose and struggled on; never men suffered more than these, their muskets dropped from their frozen fingers, the rich spoils of Moscow were recklessly flung away and strewed the track. On November 13 the Russian victory at Krasnoi gave the invaders another bitter proof of their temper; Napoleon crossed the Berezina, and the Russians burnt the bridge behind him. The Emperor hastened by a shorter way to Paris, and the Grand Army, obliged by its size and condition to follow more slowly, suffered no less after his departure. One by one the French footholds in Russia were abandoned. The Grand Army melted out of the grim northern land which it had sought to conquer like snow in springtime.

1915.

On August 5, between 6 and 7 a.m., the Germans entered Warsaw, after weeks of stubborn fighting. At 5 a.m. on that day the Russians had retired in absolute quiet and order upon their new front; their last fight for Warsaw, for the moment, was fought the previous evening, when the Russian covering troops firmly resisted the Bavarian advance guard, and, having destroyed the bridges over the Vistula, fell back to join the main army.

We turn back the pages of a few days to the close of July, when the evacuation of Warsaw began, the foreign consuls and their archives being sent away amongst the first, together with the officials, archives, and funds of the Law Courts. On July 18, three days' notice having been given, the real exodus began, under police organisation and supervision. The citizens, rich and poor alike, streamed forth, silently accepting and enduring the sudden break-up of thousands of homes; men of wealth and position all at once found themselves homeless and penniless. Day and night the sad procession wound its way out of Warsaw, in carts, in carriages, in cattle-trucks, or on foot; the people carried with them what they could, drove before them what cattle they might save, and went forth, dumbly obedient and patient as the Russians are. Meanwhile the soldiers and officials worked like Titans night and day, dismantling the city before the menaced entry of the foe. Every inch of metal that could be stripped away, machinery, telegraph wires, factory plant, were sent out, and what little could not be saved was destroyed; for a full twenty-four hours the roar of dynamite told of precious machinery and other plant being rudely forced from its holdings. Even the pumps were transported, leaving the city waterless, to face whatever horrors that might entail. It is said that barely one ton of copper was left behind for German use. The churches flung wide their doors to the crowds of weeping exiles who came for a few last moments of prayer, but their treasures, the rich robes and ikons, the jewels, books, and sacred vessels were removed, and the great bronze bells were carefully unhung and carried thence; they whose deep and solemn voices had for years called Russians and Poles to prayer must not be left to the sacrilegious use of a foeman. The life of this great and beautiful and ancient city of Warsaw drooped and died before the eyes of those who loved her, a tragic sight, indeed, for them. All that time, and during the last few hours especially, a rain of bombs and shells fell upon the city, increasing the horrors of the last phase; and even after it was useless from a military point of view, German aeroplanes continued to drop bombs upon Warsaw, apparently from a malicious wish to increase the sufferings of the people.

At dawn on August 5 the Russians blew up the bridges behind them and left the city, and about an hour later the Germans entered it. Silence, emptiness, desolation everywhere; a few sick in the hospitals, the old and infirm, those who would stay on because life nowhere held either terror or hope for them, railways, tram-lines, storehouses, factories, shops, and public buildings denuded beyond repair, water and light cut off—such was Warsaw's welcome to the Germans. Well might a German officer describe the scene as "a gaping emptiness." Was it really worth while? Moscow did not repay Napoleon; will Warsaw repay the Germans?

The Russians are a great and a strong people; they can bear great blows, be taught by great sufferings. They are a silent people, whose chief expression hitherto has been in their religion; under suffering and loss of adversity they are dumb; their very stolidity makes them more terrible, for it supports them through so much, and when it is melted the fire underneath is unrestrained, appalling. The soul of Russia has been long in travail, as the most superficial acquaintance with her music and her literature can tell us; it is the body of her that suffers now. Russia has been forced back more than once during these thirteen months of war; she may have to face yet further trials of her strength and patience. Wilna may go,* perhaps Moscow, too, again, but to take cities here and there is not to conquer Russia. The further the Russian retreat the further the German advance into Russian territory. This is true. But the tide is bound to return upon itself, and when the wave of the Russian advance rears its crest, has Germany the men or the moral strength to withstand that downward rush?

SERBIA'S ORIGIN AND DEVELOPMENT.

In his third lecture on "Austria-Hungary and the Southern Slavs," delivered last Monday at the London School of Economics, Dr. Seton-Watson said that Serbs and Croats were kindred tribes, who settled more or less where they are to-day in the seventh century, after which Geography had worked its will with them, tearing them in two different directions by the rival cultures of Rome and Byzantium. Christianity was brought to them in the ninth century by the great Slav apostles Cyril and Methodius, at a time when the eastern and western churches were temporarily in communion; but when schism broke out again the Croats fell under the influence of Rome, whereas the Serbs remained under that of Byzantium. The Croatian State was formed, but in 1102 its dynasty became extinct, and the country fell under the Hungarian crown, but retained the autonomy which it has never since lost. The Serbian State grew out of a system of clans very loosely knit together, until Stephen the First Crowned became king of the whole country in 1217. The State developed and advanced, but in 1389 came the battle of Kossovo, and by the middle of the fifteenth century both Serbia and Bosnia were completely reduced by the Turks. The tiny States of Montenegro and Ragusa were all of the Southern Slavs that retained their independence. For Serbia centuries of national extinction followed, but the national tradition was kept alive by the ballad poetry of the people and by the clergy of the Orthodox Church.

Little more than one hundred years ago a peasant, Kara-George, the grandfather of the present king, led a successful insurrection against Turkish rule, but in 1813 the Turks came back, and he had to flee into Austrian territory. Two years later a rival peasant leader, Milosh Obrenovitch, raised the standard of revolt, and within two years had been declared hereditary prince. His career was stained by his permitting the treacherous assassination of Kara-George, whose head was sent to the Sultan as a kind of trophy. Thus began the quarrel between the two dynasties, which has continued ever since. Of the present king, Dr. Seton-Watson said that he was the first Serbian ruler who had ever made an attempt to govern the country according to the wishes of the people rather than according to the wishes of himself and a little clique. This was, perhaps, due to the fact that until he became king he had lived all his life in Paris and Geneva. Since his accession Serbia had enjoyed a literary, intellectual, political, and military revival.

THE WAR IN THE BALKANS.

THE FALL OF NISH.

The fall of Nish, foreshadowed as imminent in these columns last week, took place last Friday. The military authorities, realising that the prolonged defence of the city might, in view of the systematic advance of the enemy from the north and east, imperil the unbroken retreat of the Northern Serbian army, took no unnecessary risks in remaining too long in their perilous positions, and evacuated their war capital. The army retired in good order up the Toplitza Valley, and is now presumably massed in the region to the east of Montenegro, to the south of Novi Bazar and to the north of Prishtina.

It has been apparent ever since the Bulgars took up arms against our ally that Nish would be the first objective. Fighting hitherto has been entirely subordinated to this aim, and, in view of the enemy's great superiority in men and arms, it must be admitted that his strategy developed normally, in spite of the heroic resistance offered by Voivode Putnik in innumerable rearguard actions. Throughout the past two weeks Nish has been threatened at close quarters by the Bulgars, but, in the eyes of the Serbian General Staff, the moment for evacuation had not arrived. On Tuesday of last week the two armies of the Bulgarian General Boyadieff, the one operating southwards from Knieshevatz and the second eastwards from Pirot, joined forces in the Upper Timok and advanced to the attack on the north-eastern fortifications of Nish. For three days the Serbs stubbornly defended their positions, causing the enemy heavy losses, and then, having gained as much time (presumably with a view to enable the Allies to land larger forces at Salonika) as could be gained with safety to the army, the order was given for the retirement.

The enemy have, of course, cried their victory to the skies. This is certainly not justifiable. The fall of Nish, after the loss to the Serbs of the Timok sector and Pirot, and after the insecurity of their position at Leskovatz to the south, was merely a question of days, unless relief could be pushed down the Morava Valley. This relief, as is well known, was not forthcoming, though through no fault of Serbia. The success, therefore, of the enemy is not such a brilliant achievement as pretended. If the capture of the city had broken the retreat of the Serbian army or involved the capitulation of important forces, then the triumph would have been a great one, but, as it is, the greed and impatience of the Bulgars to be the first to enter Nish without waiting for the German advance up the Morava to approach within striking distance of the Serbian line of retreat enabled the heroic army to withdraw in perfect order.

Effects of the Evacuation.

The effects on the Balkan campaign of the evacuation of Nish are manifold. The first aim of the enemy will be to strengthen the Belgrade-Sofia line, which passes through Nish, so as to render attacks upon it from the west and south-west practically impossible. With this end in view the Germans will have to push the Serbs back towards the south throughout the whole northern part of Serbia. This result is slowly being achieved. At the time of writing the Serbs have practically had to evacuate their country south from the Save as far as the line Vishegrad-Ushitze and from the Danube as far as the line Pirot-Nish. The Western Morava valley from Ushitze to Krushevatz seems to be in the virtual control of the enemy, and, therefore, it can be assumed that the Belgrade-Sofia line is already protected as far as Parachin. The next sector to be equally protected is that between Parachin and Nish, and this will involve operations along the Ibar and Toplitza valleys, where heavy fighting will shortly take place, if it has not already begun.* The Serbs are doubtless in strong positions in this sector, and if driven back (and the enemy must make attempts to do so if his line of communication with Constantinople is to be guarded against flank attacks) will fight every inch of the way and give battle on ground chosen by them, most likely somewhere on a front extending through Mitrovitza, their present capital in the historic region of Kossovo. In this connection the semi-official *communiqué* issued last Friday by Reuter's Agency is of some interest. "So far," it says, "the fighting has been of the nature of rearguard actions. No decisive battle has been fought, as such an action would not be accepted by the Serbians at present. The Serbian army is not broken at any point." This is most significant. It speaks volumes for the military genius of Voivode Putnik, and we can safely rely on him, more than ever now that he has shortened and thereby vastly strengthened his lines, to give battle to the invaders at his own time and place.

* At the time of writing the enemy claim to be advancing on both sides of the Ibar, and simultaneously in a parallel line southwards along the Upper Western Morava, to the west of the Jelitza Planina.

Central Serbia.

Another effect of the fall of Nish will be to alter the campaign in Central and Southern Serbia. In the former the Bulgars have taken Leskovatz, which, with Vrania already in their possession, gives them the control of the Uskub-Nish line. In the neighbourhood of Vrania, moreover, the Morava River leaves the railway line and bends to the west. The enemy have followed this course, and have now reached the eastern approach to the Kachanik Pass, which leads from Uskub to Kossovo, Prishtina, and Novi Bazar. The Serbs hold the pass, and will doubtless make every effort to maintain their position here in order to prevent the enemy (1) from driving the Egri Palanka-Uskub wedge to the Albanian frontier—thus separating Voivode Putnik's army definitely from the Serbian armies fighting in the Prilep sector—and (2) from linking up the army advancing along the Upper Morava (as a result of the fall of Nish) with that operating in a north-westerly direction from Uskub. The position is a strong one, and it is vital to the Serbs as a gateway through which to advance, at the proper moment, on Uskub from the north.

Veles: Its Reported Capture by the Allies.

If the report which reached London on Thursday to the effect that Veles had been taken from the Bulgars is correct, and if we are able to hold the place definitely, at the same time maintaining our line Doiran-Ghevgheli-Veles, the attack on Uskub will come sooner than is generally thought. We owe it to the Serbs having held out at Nish heroically so long as they did that our tardiness in reaching the Balkan theatre of the war has been partly retrieved, and if we are now able to push forward our advance, backed as we are to the south-west of Veles in the Prilep region by the Serbs holding Babuna defile and Isvor, the Bulgarian position at Uskub will become untenable. At present the line held by the Serbs and their allies in the southern sector runs in an easterly direction from Gostivar (on the Upper Vardar), across the Treska Valley to the Babuna mountains, northwards through Isvor to Veles, southwards along the Salonika line as far as Strumnitza station, and then eastwards along the Bulgarian frontier to a point south of Doiran. It constitutes not only a strong line from which to advance along the Upper Vardar to Kalkandelen and along the Treska and Lower Vardar to Uskub, but also the only line of defence for Monastir and Prilep against the Bulgar invader. Its importance, therefore, is enormous. It is of greater immediate military interest than any other line now held in Europe, and developments here will be watched with the keenest anxiety during the coming week. It is to be trusted that the higher command in this region has not been stinted, once again, of adequate forces and supplies.

THE IMPORTANCE OF SERBIAN RESISTANCE.

At the Services Club last Tuesday, M. Woislew M. Petrovitch told the story of the Serbs from the earliest times. He said that in the Middle Ages, Serbia was the gateway from the east to the west, now she was the gateway from the west to the east. Speaking of recent times he said that the treaty of Berlin had promised an improvement in the condition of the people of Macedonia, but for thirty years after its signature the inhabitants of that country suffered not less than the Armenians, and their numbers grew ever fewer. On a suggestion of Monsieur Pasitch to Monsieur Venizelos, the Balkan League was formed, and the Turks were all but driven out of Europe. Had Constantinople been taken then, M. Petrovitch said, he did not think the present war would have taken place. Disputes as to the division of the conquered territory led to the second Balkan war, in which the Bulgarians were completely defeated; the Serbians could have marched into Sofia, but were advised by the Great Powers to desist. Then came the incursions of Albanians, and two Serbian divisions were sent to that frontier. Hardly had they returned to their homes when Austria-Hungary sent the insulting ultimatum; of which, however, Serbia accepted every clause except the one giving Austria-Hungary power to eliminate at her discretion men from the Serbian army. That clause Serbia offered to refer to the Hague tribunal, to which offer Austria-Hungary replied by making war. The first expedition cost that empire 45,000 prisoners besides twice as many killed and twice as many wounded; and the second expedition had a similar fate. Now the whole Serbian nation was withdrawing in front of the enemy's new advance. M. Petrovitch thought troops should be withdrawn from the Dardanelles and sent to Serbia's assistance; for if the line from Salonika to Uskub was not recovered Germany would get supplies. At present she was very hard up for food. Whatever happened the Serbian nation would not perish, for the Serbs would retire to the mountains as they had done before the Turks, and would live there another five centuries if necessary; but it would be very grave for the British Empire, for the Germans at Adrianople and Constantinople would mean the arming of a million Turks to be used against the British in Egypt.

TANGIER TO TEHERAN.

I was pleased to read in THE NEAR EAST recently a letter from an American criticising my attitude towards the Turk. If what this esteemed correspondent says is to be relied upon—and I have no reason whatever to doubt this—it seems that the American people are fully alive to the horror of the Armenian massacres. This is a healthy sign. Perhaps in the near future we shall see the German nation ostracised by this same formidable ban of protesting citizens because of the truly "unspeakable" atrocities perpetrated in Belgium. Logically, indeed, it is certain that this will be so, for otherwise it might seem that America, to the exclusion of all honour and manliness, was prepared to condone any extreme of barbarity when it was committed by a kultured and much-monied nation. And that in itself would be "unspeakable."

***

Ever since the war broke out the overbearing German has been bent upon keeping his Austrian ally as much in the background as possible, except, of course, when it came to the question of an advance against a nasty position. Then—in the early stages of the war, at least—he was reported occasionally as being willing to leave the place of honour to his friend. But taking things all round, it cannot be denied that he has shown a fixed determination to take to himself whatever credit was to be had from the war; and signs have not been wanting that his Austrian ally has been rather restless as a result. Now, however, news comes that an Austrian doctor serving at the front has brought out an invention that may well turn the Hun green with envy. This is nothing less than a means of keeping the soldiers in the trenches warm in even the coldest weather. The desirable result is to be achieved by "weaving electric heating threads into soldiers' pants," and subsequently connecting the said pants with a battery, placed at a convenient distance behind the trenches, the current from which can be so regulated as to warm up any desired number of soldiers.

***

Doubtless ribald scoffers will make merry over this invention. They will want to know just how the connection between pants and battery is to be made; how the soldiers will be able to regulate the current so as to get the desired degree of warmth without getting too much of it; and a lot of other things like that. Will the connecting wires be easily detachable in case of necessity arising for a sudden advance or retreat? And if a short circuit occurs will it be pleasant for the soldier, or soldiers, in its vicinity? I am afraid I cannot answer these questions, for I never could understand the simplest matter connected with electricity. But I have formed my own theory about the real use to which the woven-with-electric-heating-threads soldiers' pants are to be put. When a big advance is desired the Austrian (or German, for the Germans seem to have command everywhere) commander will give the word; the battery will, suddenly and without warning to the woven-panted ones, do its worst; and the startled soldiers will vault out of their trenches, with one startled yell, and advance like demons, in such a charge as has never before been witnessed.

***

According to a report published by *El Mokattam*, and forwarded by the Cairo correspondent of *The Times*, Abbas Hilmi, the ex-Khedive of Egypt, who "has never accepted his deposition by the British Government . . . has now sent in his resignation to the Sultan of Turkey." And the explanation is—just a fit of pique. Abbas Hilmi, it is said, "was commissioned by the Kaiser to intrigue for the preservation of Italian neutrality," on the strength of his family being "on excellent terms with the Italian Court." He failed, and the Kaiser, furious at the failure, refused to see him when he was in Berlin recently. Whereupon Abbas, so to say, remarked: "Shan't play."

***

The Times correspondent is amused by the idea of "the ex-Khedive, who was never renowned for tact or perspicacity, being entrusted with such a mission with any expectation of success." The idea strikes me, also, as a humorous one, but for slightly different reasons. The ex-Khedive, I agree, is not a very tactful person. But in such dirty work as he was supposed to be engaged upon it is not so much tact as intrigue that is required; and Abbas Hilmi loves intrigue, and always has done so, and in this field he has occasionally scored at least a minor success. Intrigue has for a long time been the only thing he has cared to spend money on freely; and there is good reason to suspect that he is ready to spend it quite freely for this purpose, especially if it be other people's money. Indeed, if the *Mokattam's* story be true, it would never surprise me to learn that the Kaiser's indignation was not entirely unconnected with this aspect of the business. Again, while Germany has not always shown faultless judgment, it seems to me that in this instance she may have played her cards quite well. The work was dirty; therefore Abbas Hilmi was the man to do it. If, by a miracle, he succeeded, well and good. If he failed, as he seemed bound to do—for even the excellence of his family's relations with the Italian Court could hardly be expected to counterbalance the influence of Queen Elena, who, being a Montenegrin, is not likely to sympathize with the Huns—his failure would afford a good excuse for getting rid of him once for all. In fact, it seems highly probable that he has for some time been regarded by the Germans as an unprofitable investment, and one to be cleared out at the first suitable opportunity. And they may well have reckoned that when matched against the King of Italy, who is an honourable man, and an intelligent one to boot, he would fail, as any other like him would be bound to fail.

***

If the *Mokattam's* story should turn out to be true, it will be interesting to see what Sultan Mohammed and Hajji Wilhelm will do about it. Of course, they will have to appoint a successor promptly! And in view of the Kaiser's nomination of his son Joachim to Poland, it is just on the cards that another of the Prussian princes may be selected. The Crown Prince, one supposes, would think the position beneath his dignity. But he is an impulsive, as well as a repulsive, person, and he might possibly consider it. And then, if ever the Turco-Teuton dream of the conquest of Egypt materialized—which Allah forbid!—the world would once more see a "Nero of the Arabs." A debauchee, a drunkard, and addicted to other unspeakable vices, he would certainly merit the title quite as well as did Muttawakil.

CORSAIR.

RACIAL CUSTOMS OF THE SERBS.

On October 30, at the Horniman Museum, Dr. A. C. Haddon lectured on "Our Eastern Allies," considering them from the anthropological point of view. Speaking of the Southern Slavs, he said they were generally tall and dark, in these respects contrasting with most of the inhabitants of Russia, but they belonged ultimately to the same broad-headed race. The first Slavs came into the Balkan Peninsula along with Ayars and Huns, whose servants they were. Later the Emperor Heraclitus introduced other Slavs, weary of Hun domination, to people the wasted province between the Danube, the Balkans, the Save and the Adriatic. These soon overflowed into Macedonia. They were not long faithful to the Empire, but they effectually checked further invasions of the Ayars and later of the Hungarians. The Serbs to-day were a typical Southern Slav people. They would not follow a leader because of his personality, but they would be faithful to him because of the principle he represented. They were deeply religious, but shrunk from religious discussion. They retained many primitive customs. The communitary organisation of society was still thriving among them. In such a community the family lived in a large central house with smaller houses round it for the younger married members. Each member of the social group thus formed had to give his labour for its benefit, it was only in his spare time that he might earn money for his own private profit. The community was governed by its oldest member, who had almost autocratic power, but held office only by the good will of the other members. His wife had supreme authority in all communitary interests affecting the women. The fire upon the central hearth was sacred, it was not allowed to go out, and if by any accident it was extinguished it must not be rekindled by matches, but in the ancient method, by rubbing sticks of wood together. Such a communitary group would have a patron saint. This was a purely Serbian custom not found in any other nation; it might be a relic of ancestor worship or of totemism. One curious ancient ceremony that survived was the "rain ceremony," performed in seasons of drought. A young gipsy girl, stripped and wreathed in willow boughs and flowers, led the peasant girls past the houses of the village while the children poured water over her to make the rain to fall.

LADY IAN HAMILTON AND THE TROOPS AT THE DARDANELLES.

The Edridge Habitation of the Primrose League organised a "Dardanelles Day" last Saturday, and some hundreds of ladies attended at the Baths Hall, Thornton Heath, London, to present Lady Ian Hamilton with gifts of warm clothing, chocolate, cigarettes, etc., for the troops at the Dardanelles. Councillor Warren, who presided, said no one knew what a pleasure it must be to a man at the front to receive a gift sometimes accompanied by a very welcome message.

Lady Ian Hamilton, in thanking the donors for the gifts, said the men on the Gallipoli peninsula would win through right enough, and if recent changes meant that they were going to be helped to win through more rapidly, no one would be more glad than herself. This consignment of gifts she would send out in her own name, but afterwards would amalgamate her fund with that of Queen Alexandra. She had received many letters from soldiers expressing the most touching thanks for the gifts of kind people at home.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Serbia's Appeal. November 4.

Mr. RONALD MCNEILL asked the Under-Secretary for Foreign Affairs whether Serbia's direct appeal to this country for help was made in reliance on the statement of the Government that we were prepared to give our friends in the Balkans all the support in our power in the manner that would be most welcome to them, in concert with our Allies, without reserve and without qualification; whether that pledge was given after ascertaining from the military advisers of the Government that it would be possible and expedient to send effective aid to Serbia; whether immediate preparations were made for redeeming the pledge; whether the Serbian, French, and Italian Governments were informed and, if so, on what date, of the strength of the British force which would be sent to assist Serbia, and how soon it would be in the field; and whether the despatch of 13,000 men, with a promise of a larger force to be sent at some future time to an unspecified destination, was the fulfilment of the undertaking given to Serbia on September 28.

Lord R. CECIL: Serbia's direct appeal to this country for help was received, and the decision to send troops to Salonika, subject to the consent of Greece, was taken before September 28, and the Serbian Government were informed of that decision. The statement which my right hon. friend made in this House on September 28 was based upon a promise made to Greece before that date, in concert with the French Government, to send troops to enable Greece to fulfil the obligations of her Treaty with Serbia. There appears to have been some misunderstanding as to the exact scope of this statement, but after it was made there was, in fact, no delay in making what military preparations were possible to send troops to the East, so that they might be available to help Serbia in any way that was practicable.

Mr. R. MCNEILL: Can my noble friend answer the part of the question as to whether a pledge was given after ascertaining from the military advisers of the Government that it would be possible to send effective help for Serbia?

Lord R. CECIL: I am afraid that I cannot add to my reply. I must ask my hon. friend to put down a further question.

A Dardanelles "Scandal."

Replying to a question put by Sir G. YOUNGER, who wanted information regarding regimental institutes at Mudros and elsewhere, Mr. TENNANT said that Expeditionary Force institutes had been established at Mudros, also at Kephalos and at all the beaches on the Peninsula held by British forces. Stores to the value of nearly £100,000 had already been sent out, and further consignments are being sent at regular intervals.

Sir G. YOUNGER: Does the right hon. gentleman really state that these regimental institutes have been established within range of all the troops in the Dardanelles? I can tell him it is not so.

Mr. TENNANT: I informed the hon. member that they had been established at Mudros, Kephalos, and at all the beaches on the Peninsula held by the British forces.

Sir H. CRAIK: Is the right hon. gentleman aware that the troops at Mudros are complaining that it is quite impossible to get any supplies whatever?

Mr. TENNANT: It is hoped that when the full effect of these institutions is felt these complaints will cease.

Sir G. YOUNGER: Will the right hon. gentleman inquire whether the Admiralty transport regulations there are not perfectly disgusting, and stores are not being delivered? It is a crying scandal.

Mr. TENNANT promised to inquire.

Mesopotamian Communications.

Sir J. D. REES asked the Secretary for India whether rails were being laid from the Persian Gulf towards Baghdad as our forces proceeded in that direction.

Mr. CHAMBERLAIN: The necessity, so far, has not arisen, as the Tigris offers a sufficient line of communication.

The Offer of Cyprus. November 9.

Sir ARTHUR MARKHAM asked the Prime Minister whether he or the Secretary of State for Foreign Affairs had during the war offered important British territory or territory of our Allies to any Foreign Power without first consulting the Cabinet.

Mr. ASQUITH: The only instance in question was Cyprus. The offer was made in an emergency after consultation with the heads of the Departments most concerned.

Troops for Serbia.

Replying to Mr. RONALD MCNEILL, who asked on what date the Cabinet decided to send to the assistance of Serbia a larger force than the remnant of the 10th Division, 13,000 strong, under the command of Sir Bryan Mahon, Sir E. GREY said: I believe it was on September 24.

Balkan Warnings.

Sir E. GREY, in reply to a question put by Mr. RONALD MCNEILL, said: The German and Austrian sympathies of the King of the Bulgarians have always been known, and reports of Bulgarian negotiations with Turkey under German influence came from various Balkan sources as early as April. I cannot divulge what those sources were. The Serbian Government were much perturbed in April by the raid by Bulgarian bands on the railway near Strumnitza at the beginning of the month and by rumours of further impending raids at the end of the month, and they stated their belief in the complicity between King Ferdinand and the Central Powers. Military preparations at any given moment must depend upon the forces available and the extent to which those forces can be spared from one place and used in another. I should doubt whether even the War Office would think it in the public interest to discuss that in public. I am neither willing nor competent to do so.

Replying to a further question from Mr. R. MCNEILL, Sir EDWARD GREY stated that when he first informed the Serbian Government, in answer to an appeal for help, of the despatch of troops, he did so in the words: "We are offering to Greece to send forces to Salonika to help her to fulfil her obligations towards Serbia." He told the Serbian Government definitely that the landing of our forces and their movements after they had landed depended upon the consent and attitude of Greece. When, on September 28, he promised to help our friends in the Balkans, "without qualification and without reserve," the words he used could not bear any other construction than the political one he had placed upon them. His promise was to give all the assistance in our power, and that, in fact, had been done and was being done.

Mr. R. MCNEILL: Are we to understand that the right hon. gentleman, after his declaration in this House on September 28, never explained to the Serbian Government the meaning which he attached to his words in this House at a more recent date?

Sir E. GREY: I never said anything to the Serbian Government at all about my declaration in the House of Commons. What I had to do was to reply to the Serbian appeals for help. That I could only do after consulting Lord Kitchener or the Cabinet, and in my replies to the Serbian appeals for help I stated that we were sending troops to Salonika, and used the words quoted in my answer. I said that sending them to Salonika must depend upon the attitude of Greece, and when they had gone there, and I was asked what their movements would be, I said that also must depend upon the attitude of Greece. My communications with the Serbian Government were direct communications; they were not founded upon what I said in the House.

Australians in Egypt. November 11.

In reply to a question by Mr. GINNELL, Sir EDWARD GREY stated that he had no information of any outrages committed by the Australian forces upon Egyptians.

Sir E. Grey has circulated the following replies to questions by Mr. Leicester Harmsworth:—(1) Suspicions of an arrangement between Bulgaria and Turkey, under German influence, have for a long time been entertained in the Balkans, and there were reports of such an arrangement from various sources, which I cannot divulge, as early as April. The subsequent negotiations between Bulgaria and Turkey in regard to the Dedeagatch railway were, of course, common property at least as early as July. (2) The Serbian Minister here suggested on July 7 that the possibility of sending some British troops to Serbia should be considered, but at that time it was thought by the military authorities that the troops could not be spared from elsewhere.

BOOK NOTES.

Messrs. Seeley, Service and Co., have published (at 5s. net.) Dr. S. M. Zwemer's new book, "Mohammed or Christ." The book is illustrated, and Bishop Stileman contributes an introduction.

Messrs. Hodder and Stoughton published last week, at one shilling net, Mr. Granville Fortescue's "What of the Dardanelles?" The author, who was an officer in the U.S. Army in the Spanish-American War, and was afterwards A.D.C. to Colonel Roosevelt, has during this war been attached to the German, Belgian, French, and Austrian armies, as well as to the Turkish. He has therefore had ample opportunities of forming a judgment regarding the prospects of both sides, and his book is certainly one to note.

Messrs. T. C. and E. C. Jack have recently published "The Civilisation of the Ancient Egyptians," by A. Bothwell Gosse. The price is 5s. net.

DOOM OF THE KAISER.

Foretold in Monk Johannes' startling 800 year old Prophecy.

8-page Pamphlets sent post free; 6 copies 1s. 1d., 12 copies 2s. For distribution purposes—50 copies 5s. 3d., 100 copies 8s. 6d.

Also

THE EAGLES AND THE CARCASE.

By "THETA."

In Ten Chapters, being the most astounding book published in connection with Prophecies on the War, and its ultimate ending.

THE PRESS ON THE NEAR EAST.

Lord Kitchener.

In a leading article on Lord Kitchener's mission to the Near East, the *Pall Mall Gazette* (November 8) laments the fact that the Government did not sooner take steps to prevent the dissemination of false and idle rumours regarding the Secretary of State for War. The paper continues:—

The visit of Lord Kitchener to the further end of the Mediterranean must strike everyone with a sense of fitness and promise. . . . Neutrals will have a more vivid impression of the earnestness with which the Entente Powers are addressing themselves to the Balkan situation when they find a soldier of world-wide celebrity upon the spot. The presence of a real War Lord may even counteract in some quarters the communications of the titular variety which fulminates from Berlin. Lord Kitchener's journey can leave no one in doubt that the Balkan problem is to be handled upon the most vigorous and comprehensive lines. . . .

The Navy and Victory.

The *War Office Times and Naval Review*, in an article on the general situation, condemns in unmeasured phrases the "wait-and-see" policy of the Government that left us unprepared for an attack upon Serbia. The greater part of the article is, indeed, devoted to an indictment of the Government, although the paragraph which we quote below shows a firm conviction in the certainty of ultimate victory:—

We have been disgusted to read in some papers pessimistic forebodings as to what will happen should Germany get to Constantinople. It has been suggested that we may lose Egypt and the control of the Suez Canal and possibly India. We have no patience with these prophets of evil. . . . They do not understand what sea power is. This war will be won at the finish, however prolonged it may be, by the nations that hold command of the seas. That is the reason why the Central Empires can never win it, and even should Germany get to Constantinople her success will only be the precursor to that terrible ruin, financial and otherwise, which will eventually fall on Germany, Austria, and, of course, Turkey and Bulgaria likewise, for the simple reason that the Allies have and will keep to the finish complete control of the seas, from which every German vessel has been swept.

Roumania's Ruler.

Commenting upon the words addressed by the King of Roumania to the Crown Prince on the occasion of his birthday recently, and exhorting him to remember the responsibilities of kingship and the value of his nation's love, *La Politique* (Bucharest) remarks:—

Cette allocution royale, modèle de genre, servira, nous sommes sûrs, de guide dans la vie à notre jeune Prince et c'est le vœu que nous formons.

The *Daily News* (London), after quoting the conclusion of the King's address, says:—

These are certainly noteworthy words, which should disabuse the public of the notion that King Ferdinand of Roumania could ever act like the other Ferdinand against the "aspirations" and "will" of the nation and contrary to the counsels of the "advisers of the Crown."

The Balkan Imbroglio.

An article of quite exceptional interest, by Dr. E. J. Dillon, appears under the above heading in the *Fortnightly Review* (November). Written in September, its publication was held over during the delicate diplomatic negotiations which were proceeding in October; but, as the editor of the *Review* points out, the article is so applicable to the present situation that its issue is still well "worth while." The first portion of the article is devoted to an examination of the attitude of the Allied Governments, and more especially Britain, towards the Balkan States. Dr. Dillon recognised the generosity of our sentiments, but, on the other hand, points to the attitude and achievements of the Central Empires in their diplomatic relations with these States:—

The Balkan States are the shifting sands of the political sphere. They show no solidity, no consistency anywhere. This defect is matter for regret rather than blame, but it behoves the Central Governments of the Great Powers to realize it. We are wont to talk of Turkey, Bulgaria, and Greece as though these politico-geographical names stood for an enduring substratum of personality, principle, or tendency underlying their temporary Governments. That assumption is baseless. Each of those countries is at every given conjuncture merely a cloak which conceals and a force which magnifies some average mortal. Each of these actors is equipped with his own modest share of mental and moral qualities which differentiate him from his Western contemporaries, is sensible to a peculiar order of motives, and very often holds systematically aloof from the currents favourable alike to the progress of humanity and to the growth of his own nation.

The writer thinks that Greece's great opportunity went for good and all when Venizelos was dismissed by King Constantine at the time when the country might have received territories covering over 60,000 square miles at the cost of participating to a slight extent in the war; and considers that the King is, and will remain, absolute master of the destinies of Greece. He shows, too, that our faith in the power of constitutional government in the Balkans has been gravely misplaced. The King goes his way, as we have seen; the Constitution follows his dictates. In regard to Bulgaria, we quote from a footnote to his main article, written by the author in October:—

Over and over again I had endeavoured to make known to the British, French, and Russian peoples the circumstance that Ferdinand of Coburg was bound absolutely to the Central Empires and also to the Turkish Government. I knew that *at first hand*. But my telegrams and messages announcing it were all suppressed. I then had the information brought before the proper authorities

Dr. Dillon makes an interesting statement regarding the Batak massacres by Abdul Keriru Pasha in 1876. Gladstone published his pamphlet, "Bulgarian Atrocities," and "aroused the horror of civilised men."

But a section of the Hungarian aristocracy warmly sympathised with the mass-murderer and decided to present him with a golden-hilted sabre. The list of subscribers for this token of aversion to the Bulgarian people can still be viewed in the Museum at Budapest. The third name on that list—Princess Clementine—is followed immediately by that of her son, Prince Ferdinand of Coburg, who gave one hundred florins as a token of his admiration for the exterminator of his future subjects!

A Wonderful Journalist.

In an article contributed to a recent number of the *Daily Chronicle* Mr. David H. Low, a former lecturer in the University of Belgrade, produces many arguments to prove that the Bulgarian reputation for prowess on the field of battle is due more to the activities of her Press organisers than to the strength of her armies or the genius of her commanders. The following paragraph refers to the notorious bogus correspondent who imposed upon half the world at the time of the first Balkan war:—

This mysterious personage was alleged to be the only foreigner privileged to follow the campaign from the Bulgarian side. He seemed to have more than mortal skill in getting hold of the wires and despatching his version of events before the authorities had had time to despatch theirs. An admiring world learned that the Bulgarian plans were developing without a hitch, and the troops were moving forward with clockwork regularity. As the official reports, when they came, invariably confirmed what the correspondent had already said, our leader writers waved the palm branch and hailed the shadowy figure as a new journalistic genius. Somebody must have laughed.

Articles to Note.

"The Shelling of Dedeagatch," by an officer who was "spotting" for guns in one of H.M. ships—the *Times* (November 10).

"Constantinople.—I.," by Henrietta Pearson, in the *Queen* (November 6).

NOTES AND NEWS.

Devonshire Square,
London, E.C.

In connection with last week's note on the taking over by the Egyptian Government of the Helouan line, formerly the property of the Egyptian Delta Light Railway Company, I have been given to understand that a cable received on Tuesday from Cairo states that the line is definitely to be taken over by the Government on December 1.

***

I have been speaking with a gentleman who has only just returned from Sofia, and as a result of our conversation I think that the following queries are pertinent: Is it true that in the month of September France and England, jointly and separately, bought up most of Bulgaria's surplus wheat stocks, and paid for them; that not only were the goods not delivered (as was to have been supposed) but that the Bulgarian Government, immediately on the conclusion of the negotiations, prohibited the export of grain, though allowing it to be exported *sub rosâ* to Germany; that this operation was entirely negotiated *after Bulgaria had mobilised*, after our Foreign Office had received warning (last April) of Bulgaria's ultimate intentions, and after the Bulgaro-Turkish negotiations of last July had clearly shown (*vide* Sir Edward Grey's written reply to a question in the House the other day) the trend of the Bulgarian Government's foreign policy?

***

To-day it is being rumoured that not only are we selling coal to Greece, but that we—i.e., the Allies—are also on the point of granting her a loan of forty million francs. At the time of going to press we have been given to understand that the Allies are still discussing the conditions upon which this loan will be granted. The *Petit Journal* says that it is only natural that pourparlers should take place, especially as it is indispensable to obtain fresh guarantees from the Government in Athens. In the last few days, adds the Paris journal, an appreciable difference has been noticeable between the declarations of the Greek Prime Minister, who is friendly to the Quadruple Entente, and certain opinions expressed by one of his colleagues, who has asked whether if the Serbians came to be thrown back upon Greek territory, they should not be disarmed. In Italy, moreover, there seems to be a growing feeling of mistrust, if the following message received by the *Petit Parisien* from Rome is to be trusted. "Political circles in Italy," says the correspondent, "are sceptical about the Note which M. Coromilas, the Greek Minister, has presented on behalf of the Hellenic Government. After what Bulgaria has done, they think that the repeated declarations of the Greek Government should be treated with reserve. It is suspected that the Greek Government desires to hide the intentions of the Crown and the Cabinet until the moment when it has an opportunity to make common cause with Austria and Germany and Bulgaria." In view of the general feeling of insecurity, it is to be hoped that the Allied Governments will insist upon adequate securities before embarking on a loan to Greece.

***

The United States Consul at Alexandria, writing on September 10, states that an American copper-mining syndicate at Skouriotissa, Cyprus, has applied for Government permission to lay a railway from its mines to the port of Karavostassi so as to facilitate the shipping of ore. The total quantity extracted from these mines to date aggregates about 4,000,000 tons. It is believed that after the proposed tunnels in the mines are completed the daily output of ore will approximate 1,000 tons. Three more American mining engineers will soon arrive to join the syndicate's staff.

***

The recovery which has recently taken place to 21s. 3d. in the quotation for the £1 ordinary shares of the Egyptian Markets is attributable to the fact that since the commencement of 1915 the gross receipts have advanced by £2,600 to £41,500, and seem likely to increase still further, says the *Financial Times*. Out of 123 markets the company now has in use 122, as against 116 at this time last year, while it is understood that the other branches of the business are doing well. For 1914 a dividend of 8 per cent. was paid on the ordinary shares, as against 10 per cent. for 1913. That the directors will be in a position to again pay 8 per cent. for 1915 is not in doubt, while they may be able to distribute more than this, though it would be unwise to assume that they will actually do so under war conditions.

***

The directors of the Peninsular and Oriental Company have declared an interim dividend of 5 per cent., which, together with a bonus at the same rate, makes 15 per cent. for the whole year, the same as in the previous year. It may be noted (says the *Morning Post*) that the dividend is still free of income-tax. At the rate of tax in force for the year of the company's accounts the tax is equivalent to $1\frac{3}{4}$ per cent.

***

The Central News Agency reports from Amsterdam that the *Official Gazette* at Constantinople publishes an Act voted by Parliament authorising the Government to make an arrangement with the German Government for an advance of six million pounds. There is only one comment: Has Germany the money (in hard cash) to lend? If so, let her bestow it on her ally and continue doing so, whatever the securities offered by the Young Turks in exchange; if not, let the Turks be wary of pawning securities for "scraps of paper."

***

The recent U.S. Consular reports on Turkey, from which a first extract is reproduced elsewhere, are exceedingly interesting, more particularly on account of certain sidelights thrown in this year of war on Turkish trade. Imports and exports have fallen tremendously—in some cases, even, they seem to have been wiped away entirely. But, on the other hand, it is worth noting that the U.S. Consuls are not of those who predict terrible disasters for Turkey after the war; on the contrary, they are most optimistic, and predict a glorious future for the Ottoman Empire—an era of trade and industrial expansion, of great public works constructions, of prosperity and progress undreamt of. I wonder!

***

This brings me to the real point in connection with these reports, namely, the zeal displayed by the U.S. Consular service in seeking to persuade the American manufacturing exporter of the business opportunities which await him in Turkey if he will only be up and doing, and gird up his loins. In this respect, the report by Mr. Ravendal, the U.S. Consul at Constantinople, is more than usually instructive, and I only regret that I have not been able to quote it *in extenso*. Not only does it give a healthy survey of the whole situation, but it is as full of hints and suggestions to American exporters as a new-laid egg is full of meat. Incidentally, and in paragraphs relating to the American Chamber of Commerce of the Levant, to the special trade commissioners sent out by the United States Government to study the economic situation, etc., we learn how keen our cousins are in building up a Levant trade, how successful they have been hitherto, how eager officials are to forward their country's trade interests, and what steps will have to be taken (commercial banks, steamship lines, etc.) to assure a success in the future vastly superior to that in the past.

***

Unconsciously, while reading this report—which I hope will be filed at and studied carefully by the Anti-German Union—I thought of the many valuable articles which have recently been written in the Press about our "Coming Trade War." Whilst we are discussing, debating, advising, arguing, urging (and doing little), the Americans are silently, unobtrusively, but thoroughly, improving their own commercial position in all quarters of the globe. Their Consular officials are working hard at gathering and classifying information, at advising their countrymen and suggesting methods to be employed if American trade is to progress. Their information and advice is sound. Moreover, the United States being a new nation and, therefore, more receptive to new ideas, the Consular officials are listened to with greater attention than they would be in Great Britain, even supposing our officials (which is a great deal to suppose) were to follow their example. The net result is that whereas we are still in the preliminary propagandist stage of the trade war, the United States are carefully preparing the practical side of *their* trade war (banks, shipping, etc.), aided and abetted by an enthusiastic, wide-awake Consular organisation which, in its turn, works hand in glove with modern, go-ahead chambers of commerce.

***

But to return to the more immediate report issued by Mr. Ravendal. He points out in the first place the articles in demand in Turkey, describes them, and shows how the American exporter can take advantage of the opportunities thus offered him. Next in importance is a description of Turkey's exports acceptable to American importers. In conclusion, the Consul expands on certain innovations essentially necessary to United States trade if the latter is to benefit by the opportunities offered it. These reforms include two which have frequently been insisted on in these columns in the interests of British trade—namely, commercial banks, with a view to solving the vexed credit question; and greater steamship facilities, so as to counteract the pernicious competition (in our case) of German ocean-borne trade. That I was not wrong in insisting on these facilities is now shown by Mr. Ravendal, who urges—and with greater likelihood of success—a similar course to be adopted by the United States.

COMMENTATOR.

Turkey and the War.

U.S. Consular Reports.

I.—Constantinople.

In view of the fact that our Consular officials are not able to publish this year their annual reports on the economic situation in Turkey, we shall reproduce from time to time copious extracts from the U.S. Consular reports. The first of these, published below, is from the able pen of Mr. Ravendal, the Consul-General at Constantinople.

Turkey's economic outlook was never brighter than in May, 1914, when the large Government loan had just been negotiated in Paris by the Ottoman Minister of Finance. It was in the main a construction loan, involving the building of a network of railroad lines and highways. Numerous concessions for public utilities, especially in the interest of easier communication and transportation, such as railways, carriage roads, electric tramways, and ports, had been granted to or applied for by French, British, German, Belgian, and Austrian capitalists. Merchants, in anticipation of a general business revival, had hastened to replenish their almost exhausted stocks of goods. No business failures of any consequence had been occasioned by the late wars, so that credit conditions ranked high. There was a feeling abroad in the land that an era of exceptional commercial and industrial activity was about to dawn upon Turkey.

Decrease in Trade.

In a normal year Turkey (as reduced by the loss of its European possessions with the exception of Thrace and the Constantinople district) will import goods from abroad to the approximate amount of £40,000,000. exporting about £30,000,000 worth. As showing the reduction of trade, it has been calculated that the Turkish imports and exports during the last six months of 1914 amounted to only £5,306,007 and £2,772,966, a loss of about 73 per cent. and 81.5 per cent., respectively. In the month of December, 1914, Turkey's total imports amounted to only about £200,000 and the exports to about £255,000.

For the last decade Turkey has been on the eve of an industrial "boom." When the constitutional *régime* came in, it was thought that the era of industrial progress was at hand. The existing ban on electricity had been lifted when Sultan Abdul Hamid's Government approved of electric enterprises (light and tramway) in Damascus. Urgently needed were numerous railroads, ports, highways, telephone systems, electric street car lines, irrigation and reclamation works, factories, public buildings, docks—the country was waiting to be built up from the very foundation. It promised the handsomest returns on investments. Some improvements have been perfected. In Constantinople, electric light, electric street railway, and telephone systems have been installed. A railroad has been built from Panderma, on the Sea of Marmora, to Smyrna. Irrigation works on a large scale have been completed near Konia and more than initiated in the vicinity of Bagdad. Port works have been started at Samsun, and a railroad has been partly constructed from that town in the direction of Sivas. The so-called Bagdad Railroad has made notable progress, and in Palestine a railroad has been built connecting Jerusalem with the port of Haifa. Similarly a railroad has been constructed from Tripoli in Syria to Homs.

Concessions.

One is justified in believing that the termination of the present war will usher in the long-delayed day of construction in Turkey, because it is thought that it will introduce political order and stability. One is forced to assume that, on the one hand, Turkey will eliminate such domestic elements as militate against foreign investments, and, on the other, that foreign capital will be found. Judging from the present outlook, capital will first be sought in the United States, and it is hoped that the American money market may be both able and willing to respond to the call in the interest of the further extension and consolidation of American foreign commerce.

No American investments in industrial enterprises have been made in Turkey except by the Standard Oil Co., the MacAndrews and Forbes Co., and the American Tobacco Co. The latter two concerns own and operate minor plants in various sections of the Empire, facilitating the purchasing and preparing for shipment to the United States of liquorice root and cigarette tobacco, respectively. The former has obtained important concessions for the production of petroleum on the coast of the Sea of Marmora and in southern Palestine, and expects to work them on a large scale as soon as hostilities cease.

It is conceivable that silk reeling establishments may also be opened under American auspices in the Mount Lebanon and Brusa districts, and that thus Turkish raw silk may at length find its way direct to the American market. However, the paramount question is the matter of transportation. Who is going to undertake the construction of the urgently needed railroads in Asia Minor? Who will be called on to undertake the building of highways throughout the land? Who is destined to obtain and exploit the numerous municipal electric light and tramway and port and dock concessions which were cancelled?

It is probable that fundamental changes will be caused in the matter of concessions for public works in Turkey as regards the nationality of the concessionaires. Similarly, trade is likely to flow into new and different channels. In the present report it is proposed more particularly to study the distribution by countries of Turkey's trade as it may be affected by the war. It is of chief interest to ascertain the likely trend of Turkey's trade when business will be resumed.

Cotton Trade.

Cotton textiles occupy first rank among Turkey's imports, and Great Britain has in the past enjoyed a long lead over all competitors in this trade. Whether British, German, Austrian, and Italian manufacturers will be prepared later to supply Turkish needs in the matter of cotton textiles remains to be seen. It is likely that, owing to the inevitably disorganized condition both of their plants and the labour market, it will be some time before they will be in a position to supply the needs. It seems, therefore, that there will be a period of time immediately following the conclusion of peace when American cotton goods manufacturers will have the first call, and, in consequence, their greatest opportunity to establish themselves in the Near Eastern market.

In Turkey the classes of cotton goods sold, in the order of their importance, are: Prints, grey goods, bleached goods, and coloured or yarn-dyed goods. In grey goods the demand is for a heavily starched product weighing about 2.50 to 3 yards per pound in the 32-inch width, which is most popular. All widths, from 30 to 50 inches, can be sold, however. The dealers prefer that the goods be put up in pieces of 33 metres, or 36 yards, but with 40 laps or folds. A wide variety of bleached goods are sold, from the coarsest sheeting up to the fine muslin and madapolams. In general, they follow the same widths as grey goods. The finish is important, and a soft linen finish is preferred. In prints, goods from 27 to 29 inches wide are the most popular. A quality selling for 6 to 7 cents per yard is much in demand. It is highly important to furnish the designs which are in vogue in Turkey, and which are not nearly as conservative as the patterns sold in the United States. The principal yarn-dyed goods sold are the so-called "Toiles de Vichy," which are known in the United States as ginghams. They are usually 36 inches wide, and they come in various qualities.

Sugar.

For many years Turkey has relied chiefly upon Austria for its large needs of sugar. More recently considerable quantities of this product have been drawn from Russia. The present stringency of supply may cause the revival of cane-sugar culture in Mesopotamia and Palestine and introduce the raising of sugar beets in Anatolia; but it is more likely that Turkey will await the resumption of normal relations with the Austrian and Russian markets, suffering in the meantime the inevitable discomfort of high prices, inferior substitutes, and deficient supply. A prominent commission house in Constantinople, in the belief that, as a result of the pending conflict, Austria will be unable to furnish sugar on the former basis, has entered into correspondence with an American sugar refinery with a view of representing it in Turkey.

Flour and Rice.

Agriculture is more or less certain to be disturbed for the present. The exportation of foodstuffs has been forbidden and it is considered likely that Turkey for the next few years will require more than ordinary imports of flour. During the last six months of 1914, notwithstanding the wheat crop of Anatolia was exceptionally abundant, the importation of foreign flour was larger by about 30 per cent. than during the corresponding period of 1913. While Russia, France, Roumania, and Bulgaria dispose of substantial supplies of flour to Turkey, this staple is also brought from the United States and Canada, both direct and viâ Marseille and Trieste. The total imports of flour to Turkey are valued at £1,600,000 to £1,800,000 annually. Should direct steamship communications between Turkish ports and New York be re-established at the close of the war, there is no doubt but what American flour will reach here in appreciable quantities. Transhipment is fatal to this trade. A product of the United States, under the general category of cereals, which is certain to prevail in Ottoman markets, is glucose. Both glucose and corn starch of American manufacture are making gratifying progress not only in Turkey, but throughout the other sections of the Levant. Their sale is certain to increase on account of the scarcity and the high price of sugar and the growing consumption of sweetmeats. Constantinople is the headquarters of this trade, which is extended through agencies stretching from Belgrade to Aden and from Batum to Patras.

In view of the remarkable growth in American exports of rice, it is pertinent to observe that rice is to this country what the potato is to Ireland, and that it seems well within the range of possibilities that American rice and rice flour may soon be sold in Turkey. At present India, Egypt, and Italy are the chief rivals in this market. Recently Dutch rice (East Indian rice refined in the Netherlands) has acquired a certain reputation in the Levant. Turkey each year imports rice to the amount of more than £1,000,000.

Machinery.

Turkey is certain to become an attractive market for machinery. In the matter of engines, petroleum motors may be unhesitatingly recommended, as the price of benzine is about 135 per cent. higher than oil. There are rumours of an impending petroleum monopoly in Turkey which, if realized, might enhance the price of petroleum. On the other hand, there is in prospect a largely increased domestic production which would keep prices down in spite of the monopoly. Greece has a petroleum monopoly and Bulgaria a tax system equivalent

DELICIOUS COFFEE.
RED WHITE & BLUE
For Breakfast & after Dinner.
Wholesale, of Hanson's, London, England.

Digitized by Google

to a monopoly. Greece admits benzine free of duty.

In Great Britain, where benzine is also expensive, petroleum motors, marine and stationary, are manufactured on a vast scale and at attractive prices. Motive power is urgently in demand in all countries of the Near East, and at least for the present the oil engine will predominate, as benzine and coal prices are high. "A reputable American concern," recently remarked a leading dealer in Constantinople, "specializing in simple kerosene motors of one to twelve horse-power could do excellent business here." Both in agricultural and in general industrial and engineering operations, oil engines of limited horse-power are wanted, and this demand will be strongly in evidence when later the peaceful activities of the people are allowed free vent.

Various kinds of machinery will be needed in agriculture, mining, irrigation, and house construction, in factories and shops, in sawmills and flour mills, in ice-making, and laundrying. Along with the resumption of the exploitation of natural resources will come a call for machinery in the building of highways, railroads, and harbours, in the installation of telephone and tramway systems, as well as municipal light and waterworks. Manufacturers of non-competing products should combine, if necessary, for the purpose of defraying the expense of such representation as is absolutely unavoidable. There is no valid reason preventing manufacturers of oil engines, pumps, windmills, wood and metal-working machinery, automobiles, cash registers, typewriters, and radiators from acting together in maintaining a properly equipped warehouse and sales office in Constantinople. This sort of co-operation is absolutely essential in new markets such as those of Turkey. . . . Special attention should be paid to the market for generating plants with their prime movers, electric fixtures, and machinery. This market is at present controlled by German manufacturers.

Oil.

In oils—mineral, vegetable, and animal—the United States plays an important part in Ottoman markets. During 1914 the sales of American petroleum in Turkey increased by 139 per cent. as compared with 1913. In view of the proximity of the competing sources of supply—Russia and Roumania—the progress made year by year by agencies established here of American refineries is remarkable. Last year American petroleum was awarded the bulk of the contracts by the Turkish Government Purchasing Department. Further progress is expected as soon as bulk installations with tanks, tin-can factories, etc., similar to those now existing at Smyrna, can be built at Constantinople, Alexandretta, and other Turkish ports. The total deliveries of American petroleum in 1914 amounted to 600,000 cases, against 250,000 in 1913. With the building of better roads, the development of aviation, and the more extensive use of engines, the consumption of benzine in Turkey is likely to increase materially. Also in lubricating products the American varieties gained ground, although Russian lubricating oil ("Mazoüt"), on account of both price and quality, occupies a strong position. Russia exports principally "black oil," used for axle lubrication, while Roumania supplies Turkey with engine oils. The Anatolian and Oriental railroad companies have until recently been using Roumanian oil, but are now buying an American brand.

Leather.

In upper leather, glazed kid, sterling kid, and box calf are the principal varieties imported. Glazed kid is chrome tanned, and a good product comes from France. Nevertheless, the American brands are usually preferred on account of the strength of the leather. France and the United States compete also in sterling kid, while box calf is supplied by Germany with hardly any competition. Until now much of the American upper leather has been supplied by houses in England, who sell B brands at A prices and otherwise prejudice the business. Sole leather is largely furnished by France. It has been found that a given weight of French sole leather will yield more surface than the same weight of American sole leather, the latter being heavily saturated, it is alleged here, with chemical matters. Upper leather is imported into Turkey to the amount of £500,000 per annum. A large house in Stamboul dealing in glazed kid, box calf, sterling strips (colt and cow), splits, and fancy coloured leather informs the writer that 40 to 50 per cent. of the kid they import is of American origin, but bought in England. "We only buy 20 per cent. direct from America."

Paper, etc.

Paper is an item of some consequence among Turkish imports. Austria supplies about 55 per cent., Germany 40 per cent., and other countries 5 per cent. Austria commands the market, because it is in a position to quote low prices, and, furthermore, grants liberal credit. Quality is not looked for in Turkey primarily. Wholesale dealers prefer credit, because most of them work with a small capital and carry but limited stocks; small orders are given and filled from Austria within two weeks.

Some years ago a fair assortment of office supplies, especially rubber goods, used to arrive from the United States. These are now received from Germany. As a general rule, American stationery and office supplies are considered of excellent quality but expensive. The consumption of print and book paper is rapidly growing in Turkey.

In haberdashery and furnishing goods the Turkish market is constantly adapting itself more and more to modern styles.

It has often been suggested in consular reports from Turkey that this country affords a good market for American paints and varnishes, now supplied by Great Britain, Belgium, Germany, Austria, and France. It is now learned that a strong concern here, representing American petroleum interests, has decided, as soon as the war is over, to import from the United States a full line of ready or prepared paints and keep a stock on hand of such articles.

Coal.

The outlook for the sale of American coal in Turkey is promising. It is difficult to foretell how freight conditions will be after the war, and this is the chief consideration. However, American coal has won its way into Italy, Greece, and Egypt, and it is not doubted that it will be introduced in Turkey as soon as conditions permit of its entry. It is at present among contraband goods. Judging from preparations made prior to the outbreak of the war there will be a depot in Constantinople set aside for American coals, and from this centre, ports of the Aegean, the Eastern Mediterranean, and the Black Sea, will be supplied. Turkey imports in a year some £700,000 worth of coal, mostly of British origin. Between 50 and 60 per cent. of Constantinople's annual importation of coal, which amounts to about 500,000 tons, is consumed by the different steamship lines and railroads, and the remainder is used partly for bunkering steamers of irregular lines and partly by local industries and for heating private dwellings. The leading grades have been Admiralty, Newport, Newcastle, and Lancashire. Anthracite is growing in favour, both for production of gas and for burning in house stoves.

Wood.

Before the war nearly 80 per cent. of the lumber consumed in Turkey came from Austria-Hungary, but Scandinavia has of late years considerably increased its sales in these parts (from 40 to 800 cars in five years). The effects of the war will likely cause Turkish importers to look to new sources for their supplies of lumber, the imports of which are valued at about £800,000 annually. Scandinavia supplies Africa and Australia, as well as the bulk of the needs of all European countries which do not themselves produce lumber, particularly Belgium and France, where the effects of war will cause an unprecedented demand.

These are factors that will contribute to the introduction of American lumber in Turkey. An unusual opportunity it likely to present itself. It will cover not only building material, but also hardwoods (red gum), veneer (mahogany, oak, and birch), and oak or maple flooring. If properly taken advantage of it would form the basis for the institution of a new steamship line with lumber as its staple article of freight. The opening of the Panama Canal will materially facilitate the shipping of Oregon pine to the Levant.

Most of the furniture imported into Turkey comes from Austria and Germany. Hamburg factories of late have been offering American style desks at about the same price as the American article, and with advantageous shipping and credit conditions. This competition, in fact, has been growing quite keen. Many importers prefer the German article because it arrives in better condition. The native furniture is of indifferent finish and made from unseasoned lumber. Turkey offers a promising market for doors, sash, and blinds.

Copper is an article of consequence in Turkish housekeeping, as numerous kitchen utensils are made of this metal. It is stated that Turkey annually imports copper sheets and slabs to the value of about £350,000.

The automobile is rapidly making inroads in Turkey. There are now scores of cars in Constantinople and other principal centres. Motor trucks will be much in demand after the war.

Railway Material.

The necessary material for railroads built by foreign concessionaires is usually bought in the home country from which come the capital and the technical skill. The only railroad owned by the Government is the Hedjaz Railroad, for which most of the supplies are furnished by Germany. Generally speaking, Germany leads in locomotives and freight cars, Austria in passenger cars, while Germany, Belgium, and Austria compete in the matter of rails. In narrow-gauge installations Belgium and Germany have been competitors. Quarries, mines, tile and brick factories, cement works, harbour enterprises, etc., require rails, waggonets, and other Decauville material. There will be a great demand for these materials on the conclusion of peace.

It is clear that the termination of the war will witness a situation in Turkey in which the American export market figures conspicuously. But the Turkish demand will not be limited to articles mentioned in the preceding paragraphs. It will comprise also manila rope; binder twine and sacking; oil cloth and tar paper; lamps, lanterns, and lighting devices; clocks and watches; canned groceries, biscuits, hams, and evaporated milk; drugs and medicines; photographic goods; musical instruments; leather belting; fertilizers; harness and saddlery; refrigerators; fire brick; cement; metal bedsteads; boiled linseed oil; perfumeries; incubators; turpentine; dental supplies; surgical instruments; arms and ammunition; and jewelry.

Exports.

The export movement of Turkey during the first half of 1914 was above normal. The crops were fair if not abundant, and a prosperous year seemed assured. The decrees prohibiting the exportation of all foodstuffs and of all articles which might serve military exigencies, however, practically caused a stoppage in the export trade.

In a normal year Turkey's exports are valued at nearly £30,000,000. During 1914 this total was reduced to probably about £17,798,384, of which only £2,772,966 (estimated) represented the exports during the last

DATES.

SPHINX BRAND.

PRODUCE OF BASRAH.

Selected from the famous Gardens.
Only superior qualities of
Hallawees, Khudrawees, Sayers and Zehdi
are packed.
In cartons of one to four pounds, small boxes, ordinary cases, baskets, tins, and skins.
SPHINX competes with all other brands in quality, packing, and is guaranteed to be clean, sound, fresh, and free from disease.
Sole Proprietor:
BAHJET S. FORAGE, BASRAH.

Digitized by Google

six months of the year. Among products which were exported rather freely despite the war were tobacco, opium, and silk. Important articles tied up by the official embargo were wool, barley, and oils. Crops which became more or less of a total loss, owing to defective shipping facilities and the closing of belligerent markets, were Syrian oranges and nuts from the Black Sea coast. The United States is the principal buyer of Turkish opium, followed by Great Britain, Germany, Italy, and Japan. Prospects for the 1915 crop are good, but some anxiety is felt regarding harvesting possibilities owing to lack of labour. The area planted is somewhat less than usual. Nevertheless a crop of 8,000 to 9,000 cases is expected for Turkey, and 2,500 for Macedonia.

Since the loss of Macedonia to Greece, Serbia, and Bulgaria, Turkey's tobacco exportation has been reduced by 33 per cent. Efforts are being made, however, in Turkey, to extend the culture of tobacco and to improve its quality so as to maintain the world-wide prestige of Turkish cigarette tobacco. The culture of Turkish tobacco is spreading in California and promising experiments are being undertaken in the Philippines.

The trade in rugs the first half of 1914 proved normal, and satisfactory sales to the United States, Germany, and Austria were reported. With the outbreak of the war and the closing of the Dardanelles, the rug business came to a standstill. Dealers, however, maintain prices, as they feel certain of fair business after the war. Most of them hold considerable advances from the banks, which, under the moratorium, they need not pay back for the present. As all wool has been requisitioned by the military authorities the weaving of carpets is limited. Constantinople continues the principal clearing house for Persian rugs, but there is a tendency in Persia to ship direct to the European and American markets, and therefore the Turkish carpet industry has been showing signs of renewed vitality.

The shipments of wool were influenced by the embargo. The new clip promises to be as good as last year's. In ordinary times considerable supplies of Turkish wool is invoiced at the American consulates at Trieste, Marseilles, and Liverpool, for the United States. However, as Turkish domestic industries require increasing quantities, and no adequate efforts are being made to improve sheep husbandry in Turkey, it is likely that shipments to the United States will diminish.

Oil, Nuts, etc.

Although the closing of the Dardanelles stopped all exportation of Black Sea coast nuts except minor lots shipped into Europe, the consular statistics show that the United States bought as many nuts from Turkey in 1914 as in an average year. It is believed that this trade (almonds and pistachios from Palestine and Syria, and filberts and walnuts from the Black Sea districts) is certain to grow in volume. Similarly American purchases of Turkish figs, raisins, and olive oil continue as in the past. Although the port of Smyrna was closed in October, it was possible to export figs via Vourla. Opium and tobacco were the only other articles that could stand the additional expense of transportation.

The output of olive oil was only about half that of 1913—prices ruled over 10 per cent. higher.

In October, 1914, a severe earthquake destroyed the towns of Sparta, Bourdour, and a few others in the hinterland of Smyrna, which produce most of the attar of roses in Asia Minor. Many people in the business were killed. It will take three to four years before the industry revives to the point of activity and promise reached last autumn.

Silk Industry.

The Turkish silk industry was seriously affected. Producers have large quantities of thread on hand which they are unable to export. Reports from both Brusa and Beirut are pessimistic, and the prospects for the 1915 crop seem unfavourable. During the last four years silkmen complained of inadequate profits, due to increased cost of labour, lack of transportation facilities, etc. Attempts are made to assist the industry by the free distribution of mulberry plants and by educational methods. Prizes are also given for the best results.

In a normal year the production of cocoons and raw silk in Turkey is valued at some £1,800,000. The spun silks usually are exported—about 1,000,000 pounds from Syria, and 1,500,000 pounds from Brusa. The industry is capable of great development, but requires modernization along Italian lines.

Engineering Notes.

Acetylene Searchlights.

Searchlights at the present time are, according to recent information, a very desirable equipment on board ships plying in the Eastern Mediterranean. Neutral boats engaged in the coast and the Ægean Islands service, coastguard stations, patrolling boats and private yachts are often embarrassed or inconvenienced at the approach, at night, of boats or floating objects, the nature of which may be doubtful or dangerous. In such cases a searchlight is of great assistance. But it appears that the apparatus mostly known or used in those regions is the electric searchlight, the cost of which is, more or less, prohibitive for the class of service referred to above. It would, therefore, interest the owners of such coasting boats to know that there are several searchlights of British construction that can be obtained, for the purpose, at a very reasonable price. The acetylene searchlight will be found particularly suitable. This instrument is, as a rule, self-contained, and generates its own acetylene gas without any separate generator. It can be fitted either with a silver parabolic reflector or a glass-covered reflector. By means of a swivelling attachment the lamps can be moved instantaneously in any direction all round the compass. An automatic generator is provided which, when charged with carbite, will supply the lamp for eight or ten hours continuously. On the other hand, the lamp can be used intermittently as required, gas being turned on and off at will. The prices vary from £8 for a complete outfit of about 1,000 candle-power, to £11 or £12 for one of 1,500 candle-power.

Leaking Boiler Tubes.

The bugbear of an engineer is the leaking of boiler tubes This can be especially vouched for by the marine engineer, who, in spite of the various tools, expanders, ferrules, and other devices with which his engine-room stores may be provided for the purpose, often finds himself in mid-ocean embarrassed and in despair, for as a rule, none of the devices within reach will enable him to effect a lasting or, sometimes, even a temporary, remedy. The consequence is a troublesome and worrying voyage, and loss of engine efficiency. It will therefore be of interest to engineers, shipowners, and, generally speaking, steam boiler proprietors, to learn of an expanding ferrule, the use of which is claimed to give absolute immunity from leaking tube trouble. As, apparently, the ordinary tube joint has not a sufficient area of contact with the tube plate to withstand abnormal stresses for any length of time, the aim of the designer of the ferrule in question has been to provide a joint which extends the full width of the plate. The device consists of two sleeves which have a common taper, the one external and the other internal. When one is forced into the other the tendency is to produce parallel expansion, so that the tube is brought into contact with the tube plate right through, and not merely over a small area, as is the case with tubes expanded with rollers. It is asserted that tests on locomotive power boilers in continuous use for over twelve months have been completely successful, the joints having had no attention, and being now as firm and as watertight as when first made.

Dongola Irrigation Works.

Work is still actively proceeding on the excavation of irrigation and drainage canals in the basins of Dongola Province, say the *Sudan Times*. The work accomplished up to the present includes a canal for irrigation of the northern Kerma basin, which extends from Abu Fatma village to Kerma town, a distance of some ten kilometres, with a width of ten metres and a depth of between two and three metres. It also includes the heightening of Abu Fatma embankment which retains the water of the basin and irrigates an area of 2,000 to 4,000 feddans. Two dams have also been erected at the "Borkik" outlet, which will serve to store up the water to be utilised in irrigation. The convict labourers' camp was transferred to Argo Island two weeks ago, where work is now going on for the erection of dams and the digging of canals for the irrigation of that basin. It is hoped to complete this work and hand it over to the Provincial authorities before the end of the present year. The number of convicts now at work amounts to 933. The average amount of excavation work done by each convict daily is four or five cubic metres.

The Bagtche Tunnel.

The U.S. Consul-General at Constantinople reported on September 3 as follows:—

The most important event in railroad construction in Turkey to date is the recent completion of the large tunnel on the Bagdad Railroad piercing the Amanus Mountains on the border between Asia Minor and Syria. It is known at the Bagtché Tunnel, taking its name from the station of Bagtché, at its northern entrance, about 75 miles east of the city of Aadana and some 60 miles north-west of Aleppo. With the completion of this tunnel the most serious difficulties connected with the construction of the Bagdad Railroad have been overcome, and the work of connecting up many of the isolated stretches of track may be expected to be completed with reasonable rapidity. In spite of delays occasioned by the war, this most important undertaking in railroad construction in Turkey has passed the problematical stage and is now certain to become an accomplished fact in the near future.

Details.

The following details, taken from a recent issue of the local *Osmanischer Lloyd* throw interesting light upon the importance of the Bagtché Tunnel from a technical point of view:—"Leaving Mamoure, last station on the Bagdad Railway in the Cilician plain, the line begins, at the foot of Amanus Mountains, to ascend, at a grade of 394 feet, the slopes of these mountains, which are intercepted by ravines crossed by means of eight steel bridges and seven small tunnels, the latter having a total length of 6,355 feet. Thus it arrives at Bagtché station, situated at an altitude of 1,754 feet, near the entrance of the great tunnel which bears its name. Before reaching the mouth of the tunnel the line runs through two other tunnels, having a length of 236 and 394 feet, respectively, and over a small bridge. The great tunnel has a length of 16,028 feet. For about 8,000 feet it ascends to 246 feet above the level of the entrance, and then begins to descend and emerges at the other end 197 feet above the level of the entrance. Between this point and Islahie station, which is still building, there are four more tunnels having a combined length of 3,500 feet. The total length of the tunnels it has been necessary to construct in crossing this chain of mountains is therefore a little more than 26,250 feet. The great tunnel with its length of more than three miles is by far the longest in Turkey. It is only exceeded in length by the great tunnels in the Alps and elsewhere. Still, the technical difficulties which had to be overcome in piercing through have been just as great as those encountered in the Alps. In fact, for several hundred yards, the engineers encountered a rock of practically pure quartz, which was so hard that it was necessary to have recourse to boring machines of special construction."

GRANT & CHINN,

TRADE NOTES.

Egypt.

H.M. Consul at Cairo reports that tenders will be received by the Postmaster-General, Alexandria, up to noon on December 1, for the supply and delivery of the following supplies required during 1916-17:—Mail bags, boots, fuel, ready-made furniture, letter-boxes and accessories, keys and other hardware articles, lamps and electric fans, enamelled plates, rolling stock and accessories, safes, strong cupboards and safety locks, stamps, special postal stationery, and miscellaneous articles. Tenders must be made out on the printed schedules which, with copies of the specifications, may be obtained on application to the Central Stores Department, General Post Office, Alexandria, where also samples may be inspected. Some of the samples may be inspected in London at the offices of the Egyptian Government representative, Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Broadway, Westminster, S.W.

Gibraltar.

The Crown Agents for the Colonies notify that tenders are invited for the supply of about 4,000 tons of steam coal to be delivered at Gibraltar during 1916. Forms of tender and conditions of contract may be obtained from the office of the Crown Agents for the Colonies, Whitehall Gardens, London, S.W., where also tenders will be received up to noon on November 15.

Malta.

Copy of a Government Notice (No. 221), dated October 11 last, has been received, which amends the Government Notices Nos. 175 and 200 of 1915 by prohibiting the exportation of various articles to certain destinations from Malta, as follows:—

To all destinations abroad, other than the United Kingdom and British Possessions and Protectorates:—Chlorides of sulphur; fustic (chips and extract) and logwood (chips and extract, including haematine crystals and other logwood preparations); iron ore, Cumberland haematite; whale meal; animals, pack, saddle and draught, suitable or which may become suitable for use in war; diamonds, rough, suitable for industrial purposes, including Brazilian carbon; and bones for manure, dissolved bones, bone flour, bone meal and bone ash.

To all foreign ports in Europe and the Mediterranean and Black Seas, without permission of the Collector of Customs:—Aluminium, salts of; calcium sulphite; china clay (including china stone and potters' clay); gas carbon; kapok hempen fibre; and iron ore (except Cumberland hematite).

SULZER BROTHERS, WINTERTHUR, SWITZERLAND
Steam Engines of all sizes, especially Uniflow Engines, Robust and Superheaters. Sulzer Diesel Oil Engines from 20 to 6,000 B.H.P. Near East Markets.

SUDAN DURA EXPORTS.

(From Our Own Correspondent.)

Khartoum, October 16.

Exports of dura for this year have passed all previous records. The most successful hitherto was in 1910, when 32,400 tons of dura was exported. This year up to the end of September the total amounted to 36,700 tons, and that notwithstanding great difficulty over transporting the grain by sea.

RAINFALL IN CYPRUS.

(From a Correspondent.)

Cyprus, October 20.

The first rain, always very welcome, has fallen at Nicosia and in many parts, encouraging hopes of a good season for ploughing and sowing. There is still no reason to fear the series of "lean years" which croakers predicted.

Further swarms of locusts have unfortunately been reported, and the invasion appears to coincide with fresh movements into Egypt from the Sudan. The villagers at the localities attacked met the foe with the discharge of guns, the beating of petroleum tins, and loud shouting, driving them from their fields. The same or other swarms visited the lands of the historic Idalium (Dàli), Potamia, and other places. Towards evening they settled on trees and bushes, enveloping every branch and twig with a covering of reddish hue.

A show of live stock held at Nicosia has been quite successful, and has shown a marked improvement in exhibits of various classes, notably, perhaps, of sheep. The Government efforts to improve the breed of ponies, cattle, pigs, poultry, etc., have been crowned with great success, and are worthy of all praise; and the agricultural shows periodically held at the capital, at other towns, and at some of the fairs, are unquestionably doing much to stimulate progress in these and other important branches of the still backward agricultural industry.

The *Koelnische Zeitung's* Sofia correspondent telegraphs that a Commission, composed of representatives of the German Wheat Society, have arrived in the Bulgarian capital with the object of arranging with the Bulgarian Government for a supply of wheat for Germany and Austria.

PRODUCE REPORT.

Currants.

The market is very firm. Pyrgos, quoted 39s. to 40s; bags, 36s. to 36s. 6d.; Gulph, 45s. to 48s.; Patras, 43s. to 46s.; Vostizza, 49s. to 55s.; Islands, 40s. to 44s., and smalls, 39s. to 46s. Stocks in London on October 31 5,960 tons, against 6,136 tons the same period last year.

Sultanas.

Very little business is being done. Smyrnas are practically exhausted, and only small supplies of Afghans, Greeks, and Californians are available, the prices of which are constantly advancing. Stocks of sultanas of all kinds in London on October 31, 873 tons, against 3,293 tons of last year.

Figs.

Prices are a little easier, and the demand somewhat diminished, buyers having bought for present requirements.

Dates.

There is only little business doing at steady rates, the first tide boats being expected here with the new crop about the end of next week.

Locust Beans.

The market is firm on last week's quotations.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.

Oils.

Linseed oil is very firm and in good demand at fully 5s. advance. Spot pipes £32; barrels £32 10s., month £32 15s., Nov.-Dec. £33, Jan.-April £34, and May-August £34 15s. Rape oil is firm at £38 for ordinary brown naked, spot, and £41 to £42 for English refined, barrels. Cotton oil is firmly held. Crude spot in pipes, £31 10s.; refined pale pipes, £34; and barrels, sweet, £38 to £40.

COTTON MARKET.

Liverpool.

November 11.

Messrs. Reynolds and Gibson telegraph:—There has been a quiet general demand for cotton this week, and a fair amount of business is reported. Quotations show an advance of five points. Sales, which include 200 bales Sudan cotton, are estimated at 2,900 bales.

Manchester.

There continues to be a fair inquiry for piece goods for export, but there has been considerable difficulty in arranging business. India has not been prominent. Printing cloths and heavy goods have met with inquiry for Egypt generally. The yarn market has been strong.

EGYPTIAN COTTON CROP.

Estimated at 4,863,000 Cantars.

Reuter's Agency reports from Cairo that Mr. Gerald C. Dudgeon, Consulting Agriculturist at the Ministry of Agriculture, has issued the following notice regarding the approximate yield of the cotton crop in 1915:—

"The restriction by-law of the cotton-growing area was expected to result in the sowing of about 1,350,000 feddans; but according to the returns obtained by the Sarrafs for the Department of Direct Taxes, only 1,186,000 feddans were actually planted with the crop in 1915. A check survey, conducted in a few localities, showed that the aggregate of the cotton areas given for these localities corresponded very nearly with the Sarraf's figures. It was thought inadvisable, therefore, to make any correction of the figures given by the Direct Taxes Department. This figure, viz., 1,186,000 feddans, is that which has accordingly been taken as the basis of the estimate of the yield.

"The damage due to the pink seed worm has been computed by a method based upon a careful examination of the results obtained in the field. By this method, checked by inspection of the more important localities, the cotton crop of Lower Egypt is estimated at 3,99 cantars per feddan, and that of Upper Egypt at 4.49 cantars per feddan, making an average for the whole of Egypt of 4.10 cantars per feddan, and a total, based on an area of 1,186,000 feddans, of 4,863,000 cantars. This is an estimate of the 1915 crop alone, and takes no account of the balance of the crop of 1914, which had been held over until this year. Should the whole crop of 1915, together with an appreciable quantity of last year's crop, which is believed to have been held back, reach Alexandria before the end of the cotton season, the deliveries will be somewhat higher than the above-mentioned estimate."

The Sudan and the War.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, October 30.

The half-yearly account of the Sudan Government, which has just been made public, follows very appropriately in the track of the publication of the annual report of the Central Economic Board for 1914.

By comparison with the same period of the preceding year, the receipts during the six months ending June 30, 1915, fell off by £E110,225 to £E736,608, and the expenditure by £E85,902 to £E663,024, leaving a balance in hand of £E73,584. The chief heads of revenue that showed decreases are royalties £E14,064 (gum £E9,453), Customs £E26,995 (import dues £E23,254), steamers £E23,202, and railways £E56,654, but, on the other hand, telegraphs increased by £E3,567, rent of Government land by £E10,237, and Land Tax by £E9,195.

On the expenditure side the Provincial Services have remained comparatively stationary, practically the whole reduction being borne by the Departments. Public Works have taken £E4,581 less, steamers £E19,660 less, and railways £E48,643 less. In the first instance the reduction is due to the stoppage of all but the most necessary works, whilst in the other two instances diminution of passenger traffic and falling off in foreign trade, especially imports, have naturally led to a curtailment of services and a consequent reduction in certain items of working expenses.

On the figures the financial position would not appear to be so bad, but he would be a rash man who would attempt to draw any definite conclusions therefrom or say whether the anticipation of a deficit would be realised or not.

The balance in hand of £E73,584 may look most satisfactory, and undoubtedly it reflects great credit on the financial situation, but there is at present no indication as to the commitments of the Sudan Government in respect of large orders placed during the first half and other claims that are as a rule settled in the course of the second half of the year; in addition to which it should be remembered that at the end of June, 1914, the balance in favour of revenue was £E97,907, or £E24,323 more, and that notwithstanding, the surplus at the end of the year was only £E12,203.

Effects of the War.

Of course, the outbreak of war took everyone by surprise, and whilst it was necessarily not until the last quarter that any appreciable economy in expenditure could be effected, the diminution in revenue made itself manifest almost immediately, with the result that the last half of 1914 showed a deficit of £E85,704.

It may quite rightly be contended that the general conditions during the second half of the current year will be widely different from those existing during the same period of 1914, that the present rate of reduced expenditure will be maintained, that crop prospects are good and that trade is reviving. All that is very true, but under present-day conditions there is no knowing how matters will shape a month or so hence, despite all the efforts that have been and are being made to counteract the effect of the war and re-establish some approach to the previous favourable condition of affairs; nor must sight be lost of the fact that no matter how the revenue may be affected, expenditure cannot with safety be reduced any further.

A Hopeful Outlook.

That the position is, however, full of hope is abundantly evident from the very able annual report of the Director of the Commercial Intelligence Branch of the Central Economic Board for 1914. Trade since the outbreak of war, *i.e.*, during the eight months from July 31, has fallen off by 30 per cent. It is, however, comforting to note that whereas imports diminished by 40 per cent., exports fell by 13 per cent. only. There is, indeed, as the report points out, every reason to anticipate that the statistics of the succeeding months will show that the leeway lost has been made up, for, owing to the improved climatic conditions in 1914, there is a great quantity of produce waiting shipment, whilst it may be added that the initiative of the Sudan authorities in advertising the resources of the country prior to the war, in finding new markets, since the outbreak of hostilities closed certain outlets or restricted others, and in more recently attracting shipowners to Port Sudan, is bound to result in a favourable turn being given during the ensuing months to the country's external trade.

Those who have followed at all closely the more recent history of the Sudan must admit that ill-luck has dogged its footsteps. Deficient rains and low floods, to say nothing of the outbreak of rinderpest and the locust visitation, coming just as the country had been made to stand financially on its own, combined to make the years 1912-1914 the most anxious that its administrators had experienced, and just when all obstacles had been surmounted and daylight was appearing, came the war, with its inevitable setback to all the hopes that the improving situation had engendered.

The Sudan has so far emerged not unsuccessfully from the crisis which confronted her after a three-year period of almost unprecedented drought, and despite the shrinkage of trade values, due in the first place to the aforesaid unfortunate climatic conditions and subsequently to the effect of the war on shipping and on trade in general, the country has so far continued to pay its own way. This I can affirm is entirely due to the promptitude with which, immediately war broke out, the responsible authorities tackled the serious problem that presented itself, and to the sagacity, foresight, and boldness which they have displayed all through in their handling of an unprecedented and peculiarly difficult situation. The very excellent report of the Central Economic Board already referred to serves to show that that institution is actively seconding the efforts of the financial administration—ably directed by Colonel Bernard Pasha—to steer the country through the troubled waters that have confronted it, and that no stone is being left unturned to secure for the Sudan the facilities and the openings for its products, on the disposal of which its welfare so absolutely depends.

NATIONAL BANK OF GREECE.

ALEXANDRIA PRIZE COURT.

S.S. "Lutzow" (ex Cargo).

Judge Grain has handed down from the Supreme Court, Alexandria, sitting in Prize, the following judgment :—

The goods were shipped on the s.s. Lutzow on a bill of lading dated from Zurich on or about July 18.

The cargo, consisting of five cases of cotton goods and other articles, was invoiced on July 15, 1914, from an Arnold German, a Swiss subject at St. Gall (Switzerland), to German and Co., of Manila (Philippine Islands). A formal American Consular certificate of invoice is put in, and also a copy of the original invoice certified by the British Consul at St. Gall, showing that the seller is Arnold German, the Swiss, and the purchaser German and Co., Limited, of Manila. These goods are also invoiced by Berman and Co., a German firm at Hamburg, to German and Co., of Manila, the invoice being dated July 30, 1914.

The Procurator asks for condemnation of the goods on the ground that the presumption is that the property in the goods is in the enemy firm of German and Co., of Hamburg, as the bills of lading state that the goods are shipped by German and Co., of Hamburg, and one of the invoices show that the goods are sent by German and Co., of Hamburg, to German and Co., of Manila. The Procurator urges that even if the goods did originally belong to Arnold German, the Swiss, nevertheless he has put himself into the hands of German and Co., of Hamburg, and lost the control of the property in his goods.

Mr. Booth appears on behalf of Arnold German, the Swiss, and urges that the property in the goods remain in Arnold German, and asks for a release to the neutral. Certified copies of the correspondence are put in between Arnold German and German and Co., of Hamburg, which, in my opinion, show that it was Arnold German who was sending these goods to the Philippine Islands.

It appears that Arnold German was sending these goods for the purpose of finding out how this particular class of goods would sell in America.

In one letter, dated July 29, 1914, from German and Co., of Hamburg, to Arnold German, they ask if he desires to insure his goods against war risks, and inform him that the goods will probably be shipped in the s.s. Lutzow. This certainly makes it appear that Arnold German was looked upon by German and Co., of Hamburg, as the owner and consignor of the cargo.

The correspondence also shows that Arnold German was sending the goods to German and Co., of Manila, on approval, and that they had the option of taking up the goods themselves or selling them for Arnold German. Therefore, there is doubt that the property in the goods is in whoever is decided to be the seller and consignor, either Arnold German, the Swiss, or German and Co., of Hamburg, the enemy firm, and not in the buyer or consignee.

The reason given in the correspondence for the two forms of invoice I must confess I cannot understand. The letter from Arnold German states, "the invoice from German and Co., of Hamburg, is only used for United States Consul invoices and copies thereof, because Manila wants for the Customs House uniform invoices for all imports of the firm."

But taking into consideration that the copy of the original invoice certified as a true copy by the British Consul at St. Gall shows that Arnold German was the seller, that the certificate of the invoices from the American Consulate at St. Gall (Switzerland) shows also that Arnold German is the seller; and taking into consideration that there is practically no evidence of any property in the goods having passed to German and Co., of Hamburg, beyond the second invoice and their names on the bills of lading, I am of opinion that there is sufficient evidence placed before me on behalf of the claimant to enable me to grant a release to him.

The Order of the Court will therefore be for the release of the cargo in question to Arnold German, the Swiss, of St. Gall.

FRANCE'S LOAN TO BULGARIA.

Reuter's Agency learns from The Hague that it is learned from a competent Bulgarian source that as the representative of the bondholders of the Bulgarian loan placed in France left Bulgaria without appointing representatives, the Bulgarian Government, in the interest of Bulgarian finances and bondholders, has placed the business in charge of the Director of the Bulgarian National Debt.

ANGLO-RUSSIAN LOANS TO PERSIA.

Reuter's Agency reports from Teheran that the European war adversely affects Persian revenues, particularly those from the Customs. With a view to releasing funds for efficient internal administration and the observance of neutrality obligations, Persia has arranged with Great Britain and Russia a moratorium in respect of the interest and amortisation of their loans. The service of the British public loan of 1911 is, however, unaffected.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Production of week: Gemsah, 899 tons (last week, 482 tons); Hurgada, 238 tons (last week, 205 tons).

BAKU RUSSIAN PETROLEUM. — Estimated gross production week ending November 6, 97,050 poods. Price of crude oil, 43½ copecks per pood.

BIBI EIBAT OIL.—Production for week ending November 7, 62,766 poods (or 1,012 tons).

EUROPEAN OILFIELDS.—Production for week ended 7th inst., 83,900 poods. Price of crude oil at Blacktown, 43 copecks per pood.

GREEK GOVERNMENT FIVE PER CENT. LOAN OF 1914.—Messrs. C. J. Hambro and Son announce that the numbers are announced of 1,275 obligations purchased for amortisation.

ROUMANIAN CONSOLIDATED.—Production for month of October, 11,302 tons; production for week ending November 6, 1,500 tons. When reservoirs cleared will produce more quickly.

SUEZ CANAL RECEIPTS.—The traffic receipts of the Suez Canal for the 10th inst. amounted to 310,000 frs., as compared with 260,000 frs. for the corresponding day last year.

NOTES OF THE WEEK.

Two matters call for immediate settlement in the Near East—one concerns Greece, the other Roumania. Unless the unforeseen happens, some of the Serbian troops retreating before the Austro-German and Bulgarian forces may be pressed back into Greek territory. The idea is being sedulously circulated in Athens that in such a case the Greek Government is making up its mind to intern the Serbians, and that it may even adopt the attitude that it cannot allow the Franco-British forces to return by the way they came. We shall require much more evidence than is forthcoming at the present moment to believe that the Greek Government is contemplating any such policy. Even if the prospect of having the Allied forces hemmed in between the Austro-German, the Bulgarian, and the Greek armies appealed strongly to King Constantine, he cannot altogether ignore the fact that Greece would remain defenceless from the sea, and that his easy triumph on land would be the prelude to the commercial and financial ruin of the country.

That the probabilities are all against Greece adopting the policy suggested is no reason why she should be allowed to maintain an equivocal attitude on the subject. The matter has to be cleared up once and for all, and that before the danger of a Serbian withdrawal to Greek territory becomes imminent. The first report of Lord Kitchener's movements places him at Mudros on November 15, but as he must have reached Greek waters four or five days earlier, we shall hope to find that the position in Greece had already engaged his attention. It would be useless to disguise the fact that up to the present King Constantine has acted as though he were more German than a Hohenzollern. The Prussian programme, as outlined to King Ferdinand of Bulgaria, has been carried out most scrupulously. M. Venizelos was forced to resign, and when his majority in the Chamber made its strength felt, the Chamber was dissolved. The elections will not take place until December 19, and the Chamber will not meet before January 24. For eleven weeks, therefore, King Constantine will govern without a Parliament. This circumstance will enable him to take rapid decisions, which may be either favourable or unfavourable to the Allies. It is for the Allied Governments to make sure that they shall be favourable.

Neither prudence nor common justice to our Serbian allies counsels a weak-kneed attitude towards King Constantine. As has been pointed out before, it is not a question of the traditional relationships between the British and Greek nations. The Greek nation has not been allowed to come into the picture at all. King Constantine has eliminated it by getting rid of its elected representatives, and seeks to convey the impression abroad that he is acting as the German Emperor's henchman. For reasons already stated in these columns the pose is not altogether convincing; but it might become the real thing, if the Allied Powers were foolish enough to allow King Constantine sufficient rope. Meanwhile, the uncertainty surrounding his attitude is prejudicial to the Allies' interests, and there can be no justification, in view of the situation in Serbia, for tolerating such an attitude for another moment. A message from Athens speaks of King Constantine having expressed a desire to see Lord Kitchener. Diplomacy of the "face-saving" order was supposed to be restricted to China, but if the need of it is felt in the Near East it must be given full play. The only thing that matters is that Lord Kitchener and King Constantine should meet, if they have not already done so, and that the latter should no longer be left in any uncertainty regarding the intentions of the Allied Powers to see the war through in the Balkans. The Entente Governments owe it to themselves, to the Serbians, and indeed to the Greek nation, which in the enthusiastic welcome given to M. Denys Cochin, a member of the French Government, has virtually appealed to the Allied Powers to save it from a pro-German policy.

While the relations of the Entente with Greece are being adjusted, no time ought to be lost in coming to an understanding with Roumania. When free communication between Germany and Constantinople has been opened up, the Roumanians will find themselves hemmed in on two out of three sides by the Central Powers group. It would be only natural on the part of the latter to turn on Roumania and to require her to side with them under penalty of a simultaneous attack from the Carpathians and the Danube. If this should happen—and the period within which it may quite well happen can now be reckoned in days—the Allies may rest assured that, after what has happened to Serbia,

Digitized by Google

the Roumanian Government will not risk a national disaster for the *beaux yeux* of the Quadruple Entente. From Roumania's point of view the march of events has justified her delay in declaring herself, although the Allies must reflect that, if Roumanian co-operation had been secured when the Russians first reached the Carpathians, the war would have followed a very different course. As things are now, however, the Roumanians cannot be expected to bear the brunt of a German-Bulgar-Turkish attack single-handed. If they are to be saved from a German ultimatum, the Allies must show themselves capable of undertaking military operations in the Balkans on a big scale. In the opinion of the correspondent of *The Times* in the Balkans, if Russia could send a force of 200,000 men, while Great Britain and France land an army of the same size on the Ægean coast, the result would probably be the adhesion of Roumania and Greece, and the failure of the German advance towards Constantinople. But in such operations time is the prime factor.

Parliament has been busy during the week with the subject of the Near East. On November 11 the Foreign Secretary returned to the question of Serbia and the help afforded her by the Allies, emphasizing the Government's contention that military exigencies alone, not absence of good will, prevented Great Britain from giving the Serbians more effective help. Sir Edward Grey confined his remarks almost entirely to the period subsequent to September 24. If that date had marked the outbreak of hostilities instead of occurring in the fourteenth month of the war, there would be much force in the plea that Great Britain could not lay hands suddenly on a large number of troops for despatch to a new front. When once the Government takes its stand on the question of an insufficiency of available forces its critics must needs leave it in possession of the field. Sir Edward Grey's statement, therefore, would probably have been the last word on the subject, if he had not given Sir Edward Carson an opportunity to challenge his reading of the course of events. The Foreign Secretary was at pains to show that, when Greece repudiated her treaty obligations to Serbia, no decision was taken by the British Government not to help Serbia. Consultations took place between the Government and its military advisers and with the French. "The hesitation was, as Greece was not to co-operate, what was to be done with the troops when they were ready," preparations to send troops being in progress all the time. A few days later, however, Sir Edward Carson flatly contradicted Sir Edward Grey's assertion. He claimed that "a most emphatic decision had been come to—a decision founded upon the advice of our military advisers, that it was too late to assist Serbia," and recalled his protest against the decision and his contention that Serbia ought to be told through her Minister, "in order that the little nation might take such steps as she thought necessary to preserve herself from absolute destruction." There the matter, which is rapidly passing into the limbo of ancient history, rests, until the Foreign Secretary returns to the charge.

Further contributions to history, though mainly of a personal nature, were made in the House of Commons on November 15, when Mr. Winston Churchill, whose resignation from the Cabinet had been announced a few days before, explained to the House the reasons that had led him to take that step. The subject of the Dardanelles is the one with which we are most concerned in these pages, and the chief point established by Mr. Churchill was that the enterprise in its first phase as a naval venture had been undertaken after the most careful scrutiny and elaboration of the plans by all the authorities concerned, from the Admirals on the spot to the Cabinet. He maintained that with the failure of the first naval attacks it was quite feasible to withdraw altogether from the venture. The naval operations begun as they were did not necessarily involve the military operations begun as they were. "That was a separate decision which did not rest with the Admiralty either in principle or in method." Mr. Churchill was of opinion, however, that the military operations, once begun, ought to have been prosecuted with the utmost vigour, and he repeatedly urged the Government to take Constantinople at all costs, "to take it soon, and take it while time remains."

In the four or five weeks that have elapsed since the invasion of Serbia began in earnest the enemy have made great strides. The northern part of the country above a line connecting Vishegrad and Nish is in Austro-German hands, while the Bulgarians have advanced west of the Nish-Uskub railway. With the capture of Tetovo (Kalkandelen), west of Uskub, a town which has changed hands no less than three times in a few days, the Bulgarians have introduced a serious menace to the Serbian northern army's line of retreat to the south. Indeed, if the pressure at this point cannot be at once relieved, it is difficult to see how the Serbians can avoid having to pass into Montenegro and Albania, leaving their forces in the south to join hands with the Anglo-French armies, and to await the time when the Bulgarian advance can be thrown back with the help of the Allies' reinforcements. Montenegrin territory will not of itself protect the Serbian army from the victorious Germans; but the further progress of von Mackensen's force must depend on a variety of factors, which render further speculation at this stage useless. Italy has yet to make some contribution to the Allied cause in the Balkans. Greece and Roumania are also factors in the general situation which could very rapidly alter the complexion of things in this theatre of the war. But the situation is undoubtedly critical, and the utmost dispatch is called for both in diplomatic steps and in military operations.

The meeting of the Allies' War Council in Paris this week can hardly fail to have been concerned with the situation in the Near East. It will answer completely the expectations formed of the new scheme for co-ordinating the efforts of the Entente Powers if the first deliberations should herald the participation of the Italians in the Balkan campaign. With the Serbian army of the north being headed off into Montenegro and Albania, it becomes more than ever necessary that these much-tried troops should receive reinforcements at the earliest possible moment. The available routes militate against any large expedition, but in the country in which the Austro-German forces will have to be held, if the Serbians are to be relieved, comparatively few men, if well supplied with heavy artillery and maxims, will suffice to contain von Mackensen's force. Without doubt the main line of the Allies' advance must be from the Ægean, but the object which Italian reinforcements through Montenegro would attain would be to delay the enemy's advance in the Balkans until the Anglo-French armies were in a position to take the field in sufficient numbers.

Energetic action on the part of Russia has had the effect apparently of improving the situation in Persia. The arrival in Teheran of a force composed of Austrians and mercenaries, which was at once taken over by the German Legation, indicated that the latter was contemplating a *coup* in the capital on the lines that had already been successful at Kermanshah and Ispahan. The prompt dispatch of Russian troops from Kazvin to Teheran upset Austro-German plans, and the two Legations decided to abandon the field. Up to the last moment they seem to have counted upon persuading the Persian Government to evacuate Teheran with them and to remove to Ispahan. Wiser counsels, however, prevailed. The Shah and his Government appear to have satisfied themselves of the friendliness of the Russian and British Governments. They have announced their intention of staying in Teheran, and it ought to be possible for complete agreement to be established between Persia and the two Powers regarding the steps to be taken to re-establish the authority of the Government in the country. We must not lose sight of the fact that Persia, like Bulgaria, is divided into two camps, pro-Entente and pro-German. The latter must not be ignored, and the former look for definite support and encouragement from the representatives of Great Britain and Russia.

EGYPT'S CANTONAL COURTS.

(From Our Own Correspondent.)

Cairo, October 26.

A law has just been signed and published in the *Official Journal* altering the fees in civil and commercial causes coming within the ordinary jurisdiction of the Cantonal Courts. According to the tariff introduced when this system of village justice was first established all cases that fell within its jurisdiction were exempt of any fees if the amount involved did not exceed P.T.100, and had to pay fees at the rate of 2 per cent. if the amount exceeded that figure; whilst all cases that, coming within other jurisdictions, were submitted by common consent of the parties to the Cantonal Courts had, if any amount was involved, to be taxed at the rate of 4 per cent. Under the new law just promulgated the exemption of fees accorded to cases of P.T.100 and under is abolished, and all cases where an amount can be fixed are to be taxed at the rate of 4 per cent., whether they come directly within, or are submitted by consent to the jurisdiction of the Cantonal Courts. This alteration and raising of the fees were foreshadowed by the Judicial Adviser in his last report. The reason for this step is that very often fellaheen who wished to bring suits for sums over P.T.100 adopted the simple device of splitting up their actions so that each of them should not exceed the afore-mentioned limit, and by these means avoided paying any fees at all. In addition, the tariff made litigation so cheap that the fellaheen took advantage of it to submit to these courts petty claims that otherwise would never have been brought or would have been settled privately. Whilst there is little doubt that these village tribunals have benefited and been appreciated by the fellaheen, and so justify their institution, nevertheless there is no reason why the country should bear almost the entire cost of the huge administration involved—nearly half the personal claims presented in 1914 were for sums not exceeding P.T.100. The fees fixed for cases where the claim cannot be assessed have not been altered, but the removal of the exemption and the institution of an all-round fee of 4 per cent. for all other cases will, without unduly taxing the fellaheen, go some way towards meeting the extra expense of the Cantonal Courts, which is as it should be—especially in view of the general financial situation of the State.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, November 3.

Turkish Misgivings.

The statement made in a previous letter that the Turco-Bulgarian Agreement had been received by the Turks with much misgiving appears to be fully justified in the light of information which is now coming through of the existence of a strong undercurrent at Constantinople. It is stated that popular sentiment in all directions is for peace, and many elements would be ready to overthrow the present Government if a leader could be found. There appears also to be much unrest amongst the Arabs, and the Syrian Mission referred to in previous letters has evidently been arranged by the Government with the object of pacifying the discontented.

That is the position in Turkey to-day. The people want peace, but there is no organisation nor any strong man to lead a movement against those who have ruined their country. The Turks, even now, appear sceptical about Bulgaria; and the Bulgarians say they cannot forget previous Turkish oppression. It is no secret that the Turks and the Germans are getting more and more at loggerheads; and incidents are frequent, almost of daily occurence, it is said, causing them to hate one another. The Huns say, "Wait till the war is over and we will then settle accounts. The Turks retort by reproaching them for their ingratitude in not recognising that the favourable position of the Huns in Europe is due to the Turkish resistance at the Dardanelles. Even the Turkish wounded openly speak of their hatred to the German nurses; and declare that it is thanks to the Germans that they are in that state. The Germans, it is alleged, cannot stand the fighting at the Dardanelles, and are constantly going to Constantinople on sick leave.

Large numbers of German subalterns arrive in Constantinople, and it is said they are to replace the Turkish officers who have fallen.

The "Egyptian Expedition."

There is talk of another expedition to Egypt this winter, and German and Turkish officers have been leaving for Syria. The Turks think the German Army will pass through Constantinople on its way to Suez, but the Germans in Constantinople entertain different views, and are of opinion that it will be an army of occupation and will remain in Constantinople.

Since Bulgaria went to war there has been more military activity in Constantinople. Two army corps have been formed to assist the Bulgarians, and have been placed under the command of Perteb Pasha and Vehib Pasha. It is said two or three divisions have been withdrawn from the Gallipoli Peninsula, and that Turkish troops are to be sent to Dedeagatch and neighbourhood to protect the coast against a landing by the Allies.

The Supply of Ammunition.

It is reported that a large quantity of ammunition, which had been held up in Roumania, has been released and has arrived in Constantinople, and also that the Bulgars have sold to the Turks a large quantity of ammunition which they captured in the Balkan War. Judging from the frequent shipments of munitions from Constantinople for the Dardanelles these reports are not at all improbable, although the monthly output of shells at Constantinople is now said to be about 40,000, besides cartridges, bombs, hand grenades, etc. Arrows for dropping from aircraft are also being made, and at Tophané and Zeitoun Bournou old guns are being improved or repaired.

Naval Activities.

About a month ago the Austrian steamer Carmen, laden with ammunition, and sixteen lighters, also loaded, accompanied by four tug boats and two destroyers, left Constantinople for the Dardanelles, but were attacked by British submarines; and it is said the whole lot were sunk, after quite a battle with the destroyers.

The Goeben has filled her bunkers, and was reported as leaving for Varna, which port is now being used by the Turco-German Fleet as a naval base in the Black Sea.

The last Russian bombardment apparently did a lot of damage to the town of Zunguldak, but it is evidently still possible to load coal there, as several

colliers were reported to have left Constantinople for Zunguldak. However, no arrivals of coal at Constantinople have been announced lately.

The Sea of Marmora is patrolled, in search of submarines, by, amongst others, some of the Bosphorus passenger boats, on which small guns have been placed.

Copper Commandeered.

For some time the Turks have been collecting all the copper they can in Constantinople; and it is said that this is melted into ingots and then sent to Smyrna, viâ Panderma, for shipment per submarines to Pola! It is now reported that all military copper utensils are being collected and are being replaced by tin and enamel ware, which the military authorities are now requisitioning in large quantities from hardware stores, more unfortunate victims of official robbery.

All the cotton grown in the Adana district is being taken by the Turks.

It is reported that Germans in Constantinople who were hitherto exempt from military service are now being called up for employment in various capacities.

The news from the Englishmen who were exiled to Karahissar is that they are as well as can be expected under the circumstances.

ODESSA LETTER.

(From Our Own Correspondent.)

Odessa, October 25.

The Bulgarian Committee, which has existed in Odessa for very many years, and which prior to Bulgaria securing her independence played a very important rôle in Bulgarian affairs, held a meeting yesterday, at which one thousand people, mostly Bulgarians, were present. In the course of his address the president, M. Rasheef, referred to Bulgaria's conduct as "criminal madness." The unhappy people of Bulgaria, he said, had been for five centuries under the Turkish yoke, groaning for help. Their tears and groans reached the Power that always defends the persecuted—Russia. Their prayers were heard; the liberation of Bulgaria was accomplished; and the Bulgarians at the hands of Russia received their freedom and the chance to live and expand as a free, independent nation on a level with other nations. He continued:—

Many of us were witnesses of the events of 1876-77, and in our memories there rises up the picture of Turkish excesses and the persecution of our brothers; and we remember also the sacrifices for us of the glorious Russian soldiers. Rescued at such sacrifice from the hands of the tyrant Turk, and thanks to the freedom given to it by Russia, the Bulgarian nation grew, notwithstanding the intrigues of her enemies—the Germans.

Now the rulers of Bulgaria, with Ferdinand Saxe-Coburg-Gotha at their head, following up the plans of the Germans, are proceeding further, entering into an alliance with their eternal enemy, the oppressor of the Bulgarian people, the Turk, they are going against Russia, their liberator. The treacherous madness of the Bulgarian rulers!

We protest with indignation against their treachery and their base action against the Bulgarian nation and its history. May they themselves fall into the pit they are digging for Bulgaria. But we, faithful to the traditions of the Bulgarian nation, will go forward in complete unison with our Russian brothers, with our liberator—Russia—giving our labour and our efforts for the salvation and deliverance of our country from the hands of its treacherous rulers.

Numerous other speeches in a similar strain were made, after which the following resolution was submitted and passed unanimously, all standing:—

On this 11th day of October, 1915, we, the Bulgarians living in Odessa and its neighbourhood, assembled at the invitation of the Bulgarian Committee to consider the events which are taking place in Bulgaria, after listening to the speeches of MM. Rasheef, Kapcheva, and Kaleva, and of Professors Kazanský and Doosinsky, express our indignation at the criminal policy of Ferdinand Saxe-Coburg-Gotha, which is ruinous for the Bulgarian nation, and expressing our devotion to our great liberator, Russia, who in these historical days stands as the defender of the Slavs, the freedom of humanity, and the union, freedom, and greatness of the Slav peoples, we resolve:—

(1) To fight with all strength and means against the Powers which have given Bulgaria over to German slavery, and are driving her to complete ruin;

(2) To pray Russia, the Mother of the Slavs, to defend the brotherly Bulgarian nation against the clique of German placemen who are abusing the authority which they have seized; and

(3) To convey to his Imperial Majesty, the Protector of the Slavs, the feelings of our deep devotion to him and our willingness at his word to give all we have, to our last drop of blood, for the glory of Russia and the Slavonian cause.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, November 5.

The Latest Ministerial Crisis.

The present Ministerial crisis, though apparently brought about unexpectedly by a trivial incident in the Chamber two days ago, has, in fact, been latent ever since the formation of the Zaimis Cabinet, and was bound to come sooner or later. The conditions under which M. Venizelos tacitly consented to tolerate the Government when the Zaimis Cabinet made its first appearance in the Chamber have greatly changed since, notably as regards Greece's attitude towards Serbia; and the leader of the majority could no longer share in the grave responsibility of the Government's policy. Moreover, the Venizelists fear that the Government, after having introduced the Budget for 1916, will suddenly close the Parliamentary session, the minimum duration of which will expire in a few days' time. The Venizelist majority would then be rendered powerless to overthrow the Cabinet.

On the other hand, the ex-party leaders who are members of the Cabinet, and more particularly M. Gounaris, aimed at bringing about a dissolution of the Chamber by asking for a vote of confidence, in order to benefit by present circumstances, which they consider to be unfavourable to M. Venizelos, and to hold fresh elections. Thus it was that when the incident arose, while M. Venizelos called upon the Minister of War to give satisfaction to the Chamber by withdrawing his remarks, the ex-party leaders remained obdurate, although the Minister of War and the Premier were disposed to close the incident amicably, and, having won M. Zaimis over to their side, brought about the fall of the Ministry.

As M. Zaimis, in contrast to his colleagues in the Cabinet, who are nearly all more or less Germanophil, enjoys the confidence of the Entente Powers and of Serbia, the King asked him to remain in power while the elections were being held. M. Zaimis declined, however, not wishing to take any part in a militant policy, as in that case he would, according to law, be obliged to give up his post as governor of the National Bank. Thus the King was forced to accept the Cabinet's resignation.

The Elections and Mobilization.

It is now being asked how elections can be held when such a large proportion of the youth of the country is absent. This consideration has given rise to the fear in Entente circles that Greece may demobilize. It appears even that the Russian Minister has asked M. Zaimis for explanations on the subject, declaring that such a course, which would leave the Bulgarian army quite free to act against the Allies, would hardly be consonant with Greece's expressions of benevolence towards the Entente Powers. But these fears are quite unfounded. So long as the Bulgarian army is under arms, no Greek Government would dare to propose such a measure. The only possible course would be to disband simply one-third of the reserves called up, which, in the opinion of military circles, would not weaken the force necessary to cope with the Bulgar danger. Contrary to the opinion expressed by some of his most ardent partisans, that the Venizelists should abstain from taking any part in the coming elections, as a protest against the dissolution of the Chamber, M. Venizelos has declared that a very active part must be taken in the campaign, with the object of enlightening the people.

The Messrs Buxton's Letter.

The letters published in the *Daily Chronicle*, in which the brothers Buxton endeavour to exonerate the Bulgarian people from any blame in connection with their country's action against the Entente Powers, has revived the suspicion here that British official circles are still well disposed towards Bulgaria. The existence of such suspicions is greatly to be regretted, more especially at a time when the Allied troops are on Greek territory and quite close to the Greek provinces which the Entente had promised to Bulgaria. Fortunately, a communiqué from the British Legation, to the effect that England will no longer treat Bulgaria as anything but an enemy, and that the troops are there with no other aim than to fight them, has helped to dissipate the fears created by the letter of the brothers Buxton.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, October 23.

Pro-Entente Feeling.

The feeling against the Government has once again risen to a very high pitch, and the "Entente" Press has been very bitter and outspoken in its statements. The commencement of hostilities on the part of Bulgaria against Serbia seems to have served to bring matters to a head, and the Opposition openly demands a move on the part of Roumania to aid her neighbour.

Two meetings of the Council have been held during the last few days, but nothing of any importance appears to have been discussed; though it is nearly impossible to learn whether the country's foreign policy and the need for a change therein came under discussion.

An important move on the part of the Opposition, made probably as a set-off to the inauguration of the Marghiloman club, some little time ago, has been the founding of the "Federation of Unionists," which took place on the 21st instant. M. Nicq Filipescu was elected president, and he, together with M. Také Jonescu and other Opposition leaders, spoke on the urgent need of Roumania's ranging herself on the side of the Entente Powers in the fight.

Among other things, M. Filipescu showed how the agreement between Bulgaria and Germany dated from August of last year, and stated that M. Beldiman, the Roumanian Minister at Berlin, informed the Roumanian Government of it at the time, but that no notice had been taken of it by the Government, which had acted as though ignorant of the fact.

Public Demonstrations.

A mass meeting is announced for to-morrow, at which all those in favour of immediate action are invited to be present. Not only will the leaders of the Opposition from the capital be present, but also those from the provinces. That great importance is attached to this meeting is evident from the fact that the Government journals, such as *La Politique*, strongly decry it, and that the police and military authorities are taking strict measures against any demonstration in the streets afterwards. It was originally intended to have two separate gatherings, one at the Dacia Hall, and the other at a large summer cinema ground; but, it being against the law to hold open-air meetings, this latter has been abandoned on a hint from the police. A notice forbidding any demonstration has been published in the papers, and extra troops are being drafted into the town from Ploesti and elsewhere.

How public feeling is trending is shown by an incident that occurred a night or two ago, when a determined attempt on the German Legation was made by a large crowd, and many windows were broken with stones. A few arrests were made, and when those arrested were brought up for first examination no less than a hundred lawyers presented themselves to defend them.

As remarked above, the Press has lately been most outspoken, and articles appear daily on this country having been sold "to the Germans by a German," while many hints appear as to those who are not good patriots being better out of the country. One very significant article, from the pen of the well-known writer, M. Costaforo, appeared on the occasion of a speech made by the King at the ceremony of promoting Crown Prince Carol a major in the army, on his coming of age. This article commented strongly on the difference in the Prince before and after his stay in Germany, and advocated his being sent after the war to England, where there is a constitutional government, in order to repair the harm done by the air of Germany.

Everybody awaits the outcome of to-morrow's meeting with great interest, for it is felt that it is an attempt to force the hand of M. Bratiano. Should such a riot occur as would induce the present Prime Minister to resign, then it is supposed that the King would form a Government with MM. Marghiloman, Maiorescu and Carp among its members. It is believed, among the Opposition at least, that such an arrangement would not stand an hour, and that the King would never attempt such an unpopular move. The one and only solution would be mobilization and a move to help Serbia, by an attack on Bulgaria and a defensive action as regards the western frontier. The actual force to which Roumania would be opposed in this quarter is believed to be only small. In any case it is known to have been drawn on considerably for the offensive against Serbia.

Austro-Hungarian Pin-Pricks.

While returning through Hungary, from France, M. Michel Cantacuzeno, former Minister of Justice, was arrested, on the grounds that he was carrying correspondence addressed to M. Filipescu. He was detained some days until measures for his release were taken at the Austro-Hungarian Legation here.

This is only one of thousands of such "pin-pricks" on the part of the Austro-Hungarians, who, aware of the bitter feeling that exists against them in this country, take their revenge by such means. Any Roumanian wishing to obtain a visé to a passport at the Austro-Hungarian Legation or Consulate here is treated to every kind of delay and indignity imaginable. The policy is short-sighted, and no doubt this country will sooner or later "get even."

An "International Incident."

A few days ago, at the military depôt at Cotroceni, when soldiers were engaged unpacking some tents arrived from France, one of them found a note attached by a pin to a tent side, the wording of which was as follows:—

Cher soldat, la jeune fille qui vous envoie ce billet, croit que vous serez vainquers et que vous reviendrez tous sains et forts dans votre patrie. Mille baisers.—Marcelle.

The address of the writer of the note is given, and the soldier who found the note has replied to it. One wonders what the eventual result of the strange correspondence may be.

THE RESURRECTION OF GREECE.

In a recent lecture at King's College, Dr. Seton Watson told the story of Greece's resurrection after centuries of Turkish domination. He said that when in 1821 Mehemet Ali definitely revolted against the Sultan he invited the Greeks to join him, and there was a general rising in the Morea; strongholds were wrested from the Turks and Moslems were massacred. The Sultan replied by hanging prominent Greeks, and in January, 1822, the Greek inhabitants of the island of Chios were massacred, a population of 113,000 being reduced to 1,800. Heroic guerilla warfare followed, lasting for years. In 1827, Count Capodistria was elected President, and Russia, France and Great Britain offered their mediation. This was accepted by the Greeks and rejected by the Turks, but on October 20 came the battle of Navarino, when the Turkish Fleet was destroyed. The war dragged on another couple of years, but Greece had been saved. In 1830 the Powers drew up a protocol to regulate the position of Greece, but the frontiers were drawn in such a niggardly way that Prince Leopold of Coburg, to whom the throne was offered, refused it; the Piræus and Thessaly were left out, and Samos and Crete were specially excluded. In 1831 the President was assassinated, and the crown was given to Prince Otto of Bavaria, whose reign lasted until 1862, when he was deposed by a revolution. In 1863, Prince William of Denmark accepted the throne, under the name of George the First. He brought with him as a contribution to Greek national unity the Ionian Islands. Traces of the British occupation were still to be found in those islands, the good roads there were due to British work, and people were to be seen playing cricket in the great square of Corfu.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, November 3.

Greece and Bulgaria.

Under the Government of M. Zaimis Greece still remains neutral, but it is certain that in order to secure this result German diplomacy has had to work extremely hard both in Athens and in Sofia. Just what promises it has made we do not know; what we do know is that Greece maintains her neutrality in spite of reiterated offers made to it by the Entente of the cession of Cyprus and of other territory. Germany has worked hard and, from its own point of view, well; the Entente, or its diplomatists, not hard enough, or not well enough.

Has Germany succeeded in working the miracle of bringing about, if not a union, at least an entente between Greece and Bulgaria—on the basis of future compensations, or of mutual guarantees against attack by either party? It almost looks as if she had. For, though Greece has not demobilized, it is nevertheless true that relations between the two countries are at any rate quite "correct," which in these times is the equivalent of something more. After the simultaneous withdrawal of the Greek and Bulgarian troops from the frontier, the Bulgarian Government forbade the Press of its country to publish anything hostile to Greece, and the Bulgarian journals no longer refer to former "unredeemed" territories. On the other hand, the Greek Government has just sent to Sofia a delegation which will conduct negotiations for the transfer of certain wheat to this country. All this points to an improvement in the Greco-Bulgarian relations; and this improvement has a good deal of significance to those who follow events closely.

The Military Situation.

The military situation has not undergone any important modifications. All the Allied troops disembarked here have not yet left Salonika, and until the Allies send to the Balkans a force of at least 200,000 men no serious action will be possible. Meanwhile, Serbia is actually invaded by the Austro-Bulgaro-German armies. According to trustworthy reports, the Allies will for the present content themselves with guarding the railway line which ensures communication between Salonika and Serbia, confining themselves to a prudent defensive while waiting for the propitious moment to embark upon a bold offensive. Up to the present the Entente has disembarked here about 100,000 men, which seems to indicate operations on a larger scale than any military critic had foreseen. And that is the impression given by a visit to the camps of the Franco-British troops in Salonika and its environs.

Austro-Bulgarian Plans.

The plan of the Austrian and Bulgarian Staffs, it is well known, is to cut the Salonika-Serbia line and to effect a junction of their forces at a point on the narrow belt of land where the frontiers of Austria, Roumania, Serbia, and Bulgaria lie together. According to the latest reports available—which, however, are not confirmed—this junction has already been effected in the neighbourhood. The report is not credited in military circles here; for the capture of this town has been frequently announced, only to be denied. The main field of the great fight that will begin very soon in the Balkan mountains is the key to the Vienna-Constantinople road, which is the great route of which both adversaries desire to be the undisputed master.

THE COMMERCIAL INTELLIGENCE OFFICE OF EGYPT

23, Sharia Soliman Pasha, Cairo.

Commercial Information supplied by arrangement to British Firms dealing with Egypt and the Near East. Correspondence invited.

F. W. CUMING & CO., Ltd.,
General Managers.

The Austro-Germans have crossed the Danube at several points, and have consolidated their new positions. Their next effort will be against Nish; and while the Austro-Germans would continue their march on Constantinople the Bulgarians would hope to gain possession of the territories allowed to them by the Treaty of 1912, but which were given to Serbia by the Treaty of Bucharest. It is thought in Greek political and military circles that the Bulgarian offensive will be carried up to the Greek frontier except in the Doiran and Ghevgeli districts, regarding which Greece has well-known ethnical ambitions.

Franco-Serbian Co-operation.

The French troops are already co-operating with the Serbian forces against the Bulgarians; but all reports about a French invasion of Bulgarian territory are groundless.

The Bulgarians are said to have attacked Veles with great impetuosity, but they have been repulsed with heavy losses. As to Uskub, nothing certain is known regarding its fate, neither the French military authorities nor the consuls here having received any official communication about it.

Nor is there any news of importance from the north or north-east of Serbia. The struggle, however, continues, fierce and stern, in all the small fronts into which this new war in the Balkans resolves itself. The Austro-Bulgaro-Germans are straining every effort to emerge victorious in this conflict, which will decide the supremacy of the Orient. The effort of the Allies will surely be no less strenuous.

All the German plans will melt away like dreams if—as everything seems to indicate—the Allies take energetic action in the next few weeks. They hold some trump cards in their hands; though, for reasons that will be readily understood, I cannot enlarge on this subject. I need only say that Salonika is not the Allies' only base in the Balkan theatre. There are the Bulgarian coasts, the Albanian coast, etc. Evidently the Allied Staff knows whether or no they should be used. . . . It may be pointed out that quite lately there has been talk of a new factor in the Balkans—the formidable Russian factor. Will the armies of the Quadruple Entente meet in Serbia, where the present conflict originated? It seems very probable, but the future alone can show.

GERMAN AMBITIONS IN THE NEAR EAST.

Speaking before the Fabian Society at Essex Hall last Friday, Lieut.-Commander J. Wedgwood, M.P., said that Germany's policy was that, whatever might happen in other theatres of the war, she should be able to show, as one of its results, a military occupation of Turkey. A financial occupation she already had. The terms of peace might guarantee the integrity of the Turkish Empire, but before the war Germany had already got such a grip by banks, railways, harbour improvements, commercial agents, etc., that the country was fast passing into the condition of a German colony; and if to this was added an enormous public indebtedness for loans raised in Germany, the officering of Turkish troops by Germans and the presence of German soldiers, the position of affairs would be similar to the British occupation of India. The possibility of peace on these terms was, to his mind, what Germany was aiming at, and the hope that Persia might be added to Turkey was a further incentive. The German Empire had been formed not so much by war as by a customs union, and it was by extending that customs union that the Germans hoped to build up a greater empire, extending from Antwerp or, at any rate, Hamburg to Baghdad. In order to persuade Turks, Bulgarians, and Greeks to enter such a customs union, it was necessary that at the end of the war the Central Powers should have military predominance in Sofia and Constantinople and within striking reach of Greece.

What should we do if the Germans sent troops into Asia Minor, occupied the Turkish Empire, and sought to threaten our Eastern possessions? We ought not to let that cause us to waste our troops on too many points. With the devices we had discovered for ourselves or learned from captured German trenches, anybody could see that we could hold the short stretch of the Suez Canal with a comparatively small force. Three rows of trenches, well studded with redoubts and protected by barbed wire, would make Egypt impregnable against any force that could be brought against it, whether the Germans built one railway or twenty, provided the trenches were put down in time and all the latest devices of the Western front were followed. India was adequately protected from attack by our forces on the Tigris. Further, any attack by the Germans must follow the line of the Baghdad railway, and where this railway passed round the north-east corner of the Bay of Iskanderoun was a point vulnerable to attack by a force based on either Egypt or Cyprus.

THE WAR IN THE BALKANS.

THE HOUR OF PERIL.

The situation in the Balkans, as it presents itself to-day, cannot be clearly defined. The news which comes through from the Near East, be it from enemy sources or from Athens, Salonika, or Vodena, is so contradictory and so inconsequential that no clear survey of how the armies are operating can be obtained. The enemy reports, tainted with the bravado which characterises them, give us little or no reliable information. Unfortunately, in the absence of news which might throw light on the situation, the London Press is inclined to paint the latter in morbid hues, which create the impression that the Serbs are on the point of throwing up the game. Their great hour of peril, admittedly, is at hand. The help to be expected from the Allies is relatively speaking small (unless Italy moves), and it is even doubtful whether they will be in a position to break through the Bulgarian lines, more particularly the Uskub wedge, in time to help the Northern Army under Voivode Putnik hurl itself on the Teuton enemy somewhere near or on the Plain of the Blackbirds.

Kossovo.

Though operations in the south of Serbia, where Bulgars are fighting against the Anglo-French expedition and against the Southern Serbian Army, are of more immediate interest, the situation in the north must claim priority of place. We saw last week that, after the fall of Nish, the main Serbian Army under Voivode Putnik, retreated slowly in a south-westerly direction along the Toplitza. Since then no news, except enemy news, has reached us concerning the movements of this army. King Peter, it is said, led the attack against the Bulgars attempting to cross the Morava near Orlian, but finally the enemy's superiority in numbers and artillery prevailed, and they crossed the river, pursuing the Serbs, who retreated in an orderly and dignified manner to the Toplitza mountains to the east and north-east of Prishtina. Since when no news has been received of its exact whereabouts or doings. From enemy reports, the advance of the Austro-German armies from the north is progressing; but the fact that no important developments have been claimed makes us suspect that either (1) the resistance offered by the Serbs in their almost inaccessible mountain passes is so stubborn as to make a rapid advance impossible, or (2) that, in pursuit of his strategic plan, Mackensen does not wish to hasten forward his centre and left armies into the real danger zone until his right, operating southwards from Vishegrad, in the direction of Novi Bazar and Mitrovitza, is in a position to drive a wedge between the Serbian army and its line of retreat into Albania. Operations which have been taking place in the vicinity of Kalkandelen, or Tetovo, between Bulgars and Serbs, seems to show that the last-named cause is the paramount one, and that the Bulgarians operating northwards are to play an important part in Mackensen's strategy.

The whole week's fighting has been preparatory to the great engagement which, as previously pointed out, will take place somewhere near the historic Plain of Kossovo. Failing this, the Serbian North Army must retreat into Albania before it is too late. Up to the present, and judging by the absence of German claims to great victories in the Toplitza and Novi Bazar sectors, to the north of the Serbian main army, it can safely be assumed that this army is still intact, and that its line of retreat westwards into Montenegro or Northern Albania is still open. It is with great eagerness and anxiety that events here will be watched, but it is hardly likely that the great engagement (or judicious retreat) will take place for some time, neither the Germans nor the Bulgars being in a position to consummate their strategic plan as rapidly as might be imagined. The mountain roads in Central Serbia are, happily, atrocious for the transport of heavy artillery, which must besides be protected against hill raids by flanking columns.

The Babuna Position.

As stated previously, more immediate interest is being taken in the operations in Southern Serbia. The reasons for this are only too obvious: British and French troops are fighting side by side in this sector with the Serbs, and news, both accurate and inaccurate, is coming through, which is not the case as regards the Northern Serbian Army.

Analysing the enemy's gains and losses during the past week as compared with our own, the balance is in favour of the former. The Babuna position, which was, when reviewing the situation last Thursday, the strong link in an Entente line extending from Gostivar to Doiran, has become merely a salient in our hands, threatened by strong enemy forces advancing from the north—from Tetovo, Uskub, and Veles. At the time of writing the resistance of the Serbs in this position is becoming desperate, and should they be forced to fall back, not only is Prilep at the mercy of the Bulgars, but our whole line, from Gradsko to Doiran, becomes so vulnerable that in all probability it will have to be shortened. The fact that we have not been able to deploy our forces (at least it is not known that we have done so) from the Vardar front westwards seems to indicate a decided insufficiency in the number of troops landed—a circumstance of which the enemy has been taking full advantage by fiercely attacking the Anglo-French line with no other purpose in view than that of impossibilitating the sending of troops to the more vulnerable point of attack between Krushevo and Prilep. Until important reinforcements have strengthened our line (where our utmost consists in repelling enemy attacks) the help we can extend to the Serbian Southern Army is practically nil. This should have been foreseen.

Tetovo.

The strengthening of the Bulgarian position at Uskub has enabled the enemy to advance westwards to Tetovo and capture it. This practically completes the enemy wedge across Serbia's "waist-line," and cuts off the Northern from the Southern Army, excepting through roadless Albania. In plain words, the salient feature of Balkan operations during the past week has been the way in which the Bulgars have strengthened this wedge and their whole position in this sector. The danger to which they were momentarily exposed by attacks from the north and the south has been removed: towards the south they have driven the Serbs from their positions, and are within reach of Prilep and Monastir, whereas in all probability they have strengthened their line to the north and are meditating a formidable attack on the Kachanik Pass, the gateway to Kossovo.

The Hour of Peril.

The outlook is far from hopeful, but not on this account must we despair. The Bulgars have undertaken, upon German instructions, a big task, so big, as a matter of fact, that they are more than likely to overshoot the mark. That will be our opportunity. Moreover, Voivode Putnik's army is still intact, and whatever the successes achieved by the Bulgars in the southern sector—short of the total defeat of our forces, which is not to be thought of—it can never be complete as long as the Northern Serbian Army holds its positions in Central Serbia. Then, again, we must take it that our troops on the spot are increasing in numbers, that French troops are hastening to help their comrades, and that, finally, Italy now realises that it is up to her either to throw an army into Salonika or into Albania. It is sufficiently clear that the Allied forces in Southern Serbia are too weak to do more than hold a given line, and that, therefore, not only have they been unable to help the decimated Serbs to hold their vulnerable positions to the west of the Anglo-French lines, but they are also seriously imperilling their own position along the Vardar.

FOR PRISONERS IN TURKEY.

The War Office announces that an arrangement has now been made for remittance of money to be sent to British Prisoners of War in Turkey.

Persons desirous of taking advantage of this arrangement should forward any sums which they may desire to send to:—The Secretary, Prisoners of War Help Committee, 5-7, Southampton Street, London, W.C.

Full particulars should be given of the name, number, rank, etc., of the prisoner to whom the money is to be remitted.

Speaking at University College on Thursday evening last week, Professor Pollard took a hopeful view of the situation in the Balkans. With regard to the loan to Greece, he said it seemed rather a superfluous luxury to provide the sinews of war for a Power whose ultimate position was open to so much doubt. We had no particular reason to help Greece in her difficulties, and it would apparently pay Greece to join the Allies rather than remain outside.

Public Opinion

Edited by PERCY L. PARKER

PUBLIC OPINION'S greatly increased and increasing circulation since the war began shows that it fulfils a most useful purpose to-day by way of inspiration and information. It gives a magnificent analysis of all the great problems—social, political, financial, and religious—arising out of this War of Nations which will alter the whole of life for the present generation.

PUBLIC OPINION can be sent to any address in the United Kingdom for three months for 3s. 9d., or to anywhere in the world for 5s. 3d. Yearly subscription to the United Kingdom 10s. 10d., or Abroad 13s.

A SPECIMEN COPY will be sent to any address on receipt of a post card to THE MANAGER, PUBLIC OPINION 23-24, Temple House, Tallis St., London, E.C.

TANGIER TO TEHERAN.

Like a good many other people, I dare say, I have frequently wondered of late what effect it would have had on recent events in the Balkans if our own Prince Alfred, afterwards Duke of Edinburgh, had accepted the offer of the Greek throne when it was made to him after the abdication of King Otho. He refused the offer, unless my memory plays me false, because Queen Victoria considered the position of a King in such a democratic country was too precarious. King George, however, occupied the throne for half a century —and made a remarkably good sovereign, too, showing rare tact and patience on more than one occasion.

***

I wonder whether King Constantine in these stressful days ever recalls the words of wisdom contained in the political testament of his father, King George. "Never forget," wrote the late King, "that it is preferable for the King to suffer, even morally, rather than to allow his people to do so." And again: "Give your children a good Greek education, for they must, above all things, be Greeks." I do not pretend to know what King Constantine thinks of this advice to-day—if, indeed, he has time to think of it at all in the intervals of receiving Hajji Wilhelm's admonitory greetings —but I do know that a great many Greeks are of opinion that his people have suffered morally, and seriously so, by the vacillating policy—to give it no harsher name—that Greece has been compelled, against the people's will, to follow. Two days ago a Greek friend was holding forth on the subject to me, and his language was as vigorous as anyone could wish to hear, especially when he referred to King Constantine's extremely active consort. What he said about that August Personage I will not set down. Indeed, it was unprintable. And his opinion was that whether the King's children were "above all things . . . Greeks" or not, the King's policy was most emphatically *not* Greek.

***

I have on more than one occasion alluded to the psychic qualities of the Serbian people and to their simple acceptance of spiritual direction in the affairs of everyday life. An article contributed by Count Cheddo Miyatovich—one of the most ardent psychics of the day—to the *Daily Telegraph* throws further light upon their beliefs, and recalls a prophecy which would seem to be in the process of fulfilment to-day. In the year 1868 a peasant called Matha, of Kremna, was gifted of visions concerning the future of his country, and they come down to us in the form in which he dictated them to the Prefect of Ushitze and the President of the Court of Justice in that year. One of the most important of his declarations was to the effect that during the reign of King Peter a foreign army would overrun the country, causing the people terrible sufferings, but that the country would eventually be delivered by the Serbian Army, and that it would become greater than ever. The Serbians believe that this hour is at hand. Already the foreign hosts have made true much that the first portion of the vision indicated—the Serbian Army, unconquered and unafraid, is fighting its way to the position from which it is to deliver the blow that will complete the prophecy. There is in Serbia a power more mighty than Krupp, a spirit that Potsdam cannot even sear.

***

In the House of Commons last week (on Thursday), Colonel Yate, in the course of a most interesting speech on the situation in the Near and the Middle East, said, very truly, that in the British Army there is no spirit of bitterness against the Turks, as there is against the Germans. The Turks, he added, had behind them the traditions of old Crimean days; and he went on to tell a story that he had heard from a doctor, who in the days of the Russo-Turkish war went out with one of our first Red Cross units. This doctor related that the Turks would come to him day after day, and say to him: "When are you English coming to help us? You English officers lead us; our officers drive us." "That," said Colonel Yate, "was a great testimony from the soldiers of one nation to the officers of another"; and he was right. I am not surprised that he lamented that we should be fighting the Turks at all. Properly led, the Turk is a fine fellow, in peace as well as in war. But, unfortunately, he very seldom has been fortunate in his leaders. And led—or driven—by such a gang as has seized the power in Constantinople to-day he is, I fear, bound to come to a bad end. I agree with Colonel Yate that "The pity of it is that to-day the Turkish soldier, instead of being led by British officers, is now being driven not only by his own officers, but by German officers as well." With all his faults, he deserves a better fate than that.

***

The Rome correspondent of the *Morning Post*, in a message forwarded to that paper under date of November 11, writes:—

> I regret to say that the painful impression created by the pro-Bulgarian letter of Messrs. C. R. and Noel Buxton continues in the Serbian colony here. An official declaration disavowing the British Government's sympathy with the Buxtonian policy of treating Bulgaria as a prodigal son and Serbian Macedonia as the fatted calf would greatly reassure our Serbian Allies.

A neat bit of phrase-turning that will surely raise smiles on the faces of "Messrs. C. R. and Noel Buxton" even in the present circumstances, which they, like other well-wishers of Bulgaria, must find far from amusing.

***

Prince William of Wied, who, after a brief and inglorious attempt to play the part of Mpret of Albania, fled from the land of the Shkypetars back to his beloved Fatherland, is now reported (by the *Echo de Paris*) to be with the Bulgarian Headquarters Staff. Ferdinand of Bulgaria must look out. It is all very well for the Rome correspondent of the *Echo de Paris* to say: "This is regarded here as a proof of Bulgaria's intentions with regard to Albania." But what about Prince William's intentions? Perhaps he might prefer Sofia—or even Constantinople—to Durazzo. Besides, what about the Albanians? The ex-Mpret's record, one supposes, will hardly endear him to a race that, whatever its faults, cannot justly be accused of cowardice.

***

According to the report recently issued by the High Commissioner, Cyprus is beginning to feel the evil effects of education. Country youths returning to their villages after educational training in the towns feel themselves to be a peg above their parents, and refuse to labour in the fields, while their parents, proud of their sons' learning, work the harder to support them in idleness. Thus a class of men fit for nothing but clerical work and high collars is springing up, to the detriment of the country. This is a pity, but it is not surprising. The same sort of thing is to be seen everywhere, and, personally, I blame the system rather than the student. Sound knowledge is a very fine thing, but indiscriminate education is the deuce. And it always seems to me that we have extraordinary views on education even in our own country. We take the son of a labourer and we cram him with a confusion of learning that almost inevitably leads to a confusion of ideas, or at the least robs him of this fitness to follow the work of his father. I think that in some ways even the late lamented Mr. Squeers was better advised than we are. We have yet to educate ourselves in the art of educating.

***

It is not even as though the system we have nurtured could lead us to an ultimate plane of higher things, far removed from the sordid facts of toil. Unfortunately, while nature insists that we should feed our bodies in order to exist, we can never get away from the fact that the land must be tilled, the flocks and the herds tended. Let the Cypriots remember that. And now, in the twentieth century, when the pendulum of our civilisation has swung far towards the goal of the Utopians, back it comes with a crash, altering all our world again. It is no uncommon thing now to see tapering fingers and filbert nails grimed with the stain of toil at our workshops and hospitals about the country. What of the indignity of labour now? The fighting men stand apart; no code of learning has ever taught us that it is undignified to fight when our King and our country call us. But when the fighting is done, what then? Are the heroes of the seas and the trenches going tamely back to their counters, with clean hands and spotless collars the height of their ambition. I think not. I fancy that more strenuous ideals will call them, and if England will not give them place and encouragement, they will emigrate to the newer lands that will. Let England remember that. And in framing our educational laws for Cyprus or any other country, for Heaven's sake let us remember the ranks of pallid, ill-paid, semi-educated peasantry which fought tooth and nail for the honour of genteel slavery in our own cities before the war began.

NEAR EAST BOOKSHELF

BEHIND THE VEIL.*

Foremost among the social phenomena of our age stands woman's revolt against customs which hamper the free development of her personality. They originated in her physical disability, and the exigencies of intertribal warfare. Woman's functions as child-bearer and rearer forbade her to take part in marauding expeditions, and placed her at the mercy of the victorious tribe. A successful leader obtained the largest share of booty, which included women, children and cattle; and male jealousy prompted him to keep his female captives in strict seclusion. Thus in course of time a man's social status came to depend on the number of wives whom he could afford to withdraw from out-of-door employments. A custom which arose from necessity became the hall-mark of superior caste, and the Harim was established on firm foundations. Mrs. Cooper has studied this peculiar institution in Egypt and Further Asia. Her sex proved an Open Sesame to the gilded prisons in which her Eastern sisters are content to dwell, and she speaks of life behind the veil with all the authority of an expert.

The word "Harim" is constantly misapplied by Europeans who are ignorant of Arabic. Its literal translation is "privacy," and it connotes the apartments in a Moslem's house which are sacred to his womenfolk, as distinguished from the Selámlik, wherein he foregathers with male relatives and friends. In a wider sense Harim implies the social system prescribed by Mohammed, who forbade women to show their faces in public. An Egyptian girl, for instance, is "kept harim" at the age of seven or eight.

Mrs. Cooper analyses the effect on Eastern women's mental development produced by their highly artificial environment. Protected as they are from the struggle for existence which makes for human progress; economically dependent on their husbands; forced to centre their thought, imagination, and emotion on the home, they exhibit many characteristics of our hot-house plants. Their strong religious instinct is utilised to strengthen male authority, and their actions are swayed by the heart rather than the head. Herein lurks danger for civilisation. For it is a law of dynamics that force shall increase by compression. Woman's emotional capacity, accumulated during ages of severance from the broad currents of human life, is apt to burst forth at a time of cataclysmic change. Thus the influence of a sex which is constitutionally conservative and traditionalist serves but to heighten the fury of revolution, and spreads to the political sphere with disastrous effects for the community at large. During periods of religious persecution Moslem women have often proved themselves capable of amazing fortitude. Charlotte Corday remains for all time the type of feminine devotion to a Cause; but Mrs. Cooper tells us that the heroine of the French Revolution had a kindred spirit in modern Persia.

During the sixties of last century, orthodox Shias persuaded the Shah to destroy a reform movement preached by Baha 'Ullah, with fire and sword. The market-place of Tabriz was deluged with his followers' blood, and, by a refinement of cruelty, their women-folk were dragged from the harim to witness the execution of sons and husbands.

One morning in June a mother was brought to see the death of her fourteen-year-old son, an only child. When the executioner had done his work, the head was tossed into her lap, and she was told, "Take back your son!" She stood up, and, holding the loved head in her hands, raised it towards the sky, as if to offer it to the God who seemed to have deserted her in her hour of need; looked long into the closing eyes; then threw it to the official's feet, saying, "I do not take back what I give to my God!" and turning quickly, took her place among the sorrow-maddened women.

The annals of Christian martyrdom may be searched in vain for a nobler instance of self-devotion; and there is surely hope for poor, stricken Iran if its daughters still resemble this nameless heroine.

An atmosphere of romance clings to the black-veiled women of Egypt, and to the lattices through which they peer curiously on the outer world. It is sustained by erotic novelists, who draw on their perverted imagination and vague memories of the "Arabian Nights." A European privileged to visit one of Cairo's great ladies is sorely disillusioned. She is shown into a drawing-room furnished in the French fashion, with gilded chairs, a grand piano, hangings and curtains made in England or France. Great glass chandeliers holding the glaring electric lights express the cosmopolitanism which the mistress feels she must show the world, in order that she may not be considered as belonging to the old school of Egyptian motherhood.

The orthodox tea-gown is a long *négligé* made in an Empire form, or what was once styled a "Mother Hubbard," with the fulness of the cloth gathered into a much-trimmed yoke, and ending in a long train. But the younger generation prefers to sport creations from Messrs. Worth's or Paquin's *ateliers*. Their mothers still give their straight black locks a reddish tinge by covering them for twenty-four hours with a paste composed of henna, known to our gardeners as Egyptian Privet. This plant was once employed as a dye for the finger nails, but it is out of fashion, and a parallel change of taste leads Young Egypt to eschew the barbaric jewellery in which her mother delighted for glittering baubles from Bond Street or the Rue de la Paix. Scientific massage is extensively practised, in order to keep the skin and complexion in perfect order; but, strange to say, the manicurist has not yet made her appearance in harims. Ladies habitually resort to the public bath for ablutions and gossip, but mosques are forbidden to them by custom. The tabu has not lessened their devoutness: on the contrary, Egyptian women are pillars of religion, which, as they understand it, is alloyed with many survivals of animism.

Mrs. Cooper follows a fair Cairene in her daily round of duty and pleasure. It includes the supervision of her sons' education until the ninth year, when they are transferred to the Selámlik; but daughters remain in their mother's hands up to the eve of marriage. The toilet occupies many hours, and others are given to the management of a horde of lazy and ill-organised servants. In the afternoon she is "at home" to callers of her own sex, or sallies forth, closely veiled, in a limousine or brougham, to visit female friends. On such occasions conversation never soars above children's ailments, servants' shortcomings, or "society" chatter. Mrs. Cooper tells us that only ten years back the proportion of literate women was three per mille! But a silent revolution is at work. The Government has founded girls' schools in every village. Foreign missions are not one whit behind the State in providing facilities for female education; and in the larger towns there are many private seminaries of the type which is only too well known in this country. The movement receives support from bachelors of the present generation, who demand a modicum of instruction in their future wives. Thus the struggle of past with future which prevails throughout the civilised world is rapidly transforming the ideals of Egyptian womanhood.

Mrs. Cooper does not attempt to forecast the effect of the new leaven. In her opinion the average denizen of the harim will not become a "désenchantée," still less a suffragette. Nor will she be a mere plagiarist of her European sisters' habits. She has a message for our wives and daughters which is sorely needed at the present time, in her self-sacrifice and devotion to the home. Indeed, Mrs. Cooper's survey of Eastern harims inspires a doubt whether, after all, the seclusion of women is not in closer harmony with the scheme of nature than the agitation for political rights which convulsed this country until it was stilled by the clash of arms.

The absence of an index is a drawback to our enjoyment of this excellent book, which should be remedied in subsequent editions. Moreover, Miss Cooper's illustrations will come as a cold douche for Europeans whose imagination has been fired by Tennyson's entrancing picture of the Persian girl:—

> Serene with argent-lidded eyes,
> Amorous, and lashes like to rays
> Of darkness, and a brow of pearl
> Tressed with redolent ebony,
> In many a dark delicious curl
> Flowing beneath her rose-hued zone.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

BULGARIA, SERBIA, AND EUROPE.

To the Editor of THE NEAR EAST.

Sir,—The Bulgarian case is very far from being as plain as Messrs. Noel and C. R. Buxton seem to think. Messrs. Buxton's thesis about Bulgaria is obsolete. It will not stand a moment in the light of facts and before the deeper motives of the actual Balkan tragedy. Messrs. Buxton are reasoning like Adam Bede after the fall of Hetty. And as Hetty was *not* the ideal girl Adam thought, so the Bulgarians and their policy are quite different from the geometrical and ideological conceit which Messrs. Buxton have crystallized about them in their minds.

And first let me say, Sir, that the revision of the Treaty of Bucharest during the war was a crime and a fatal blunder.

The case is not very different from the well-known "scrap of paper" policy. It has shaken the faith of the loyal Balkan peoples in the Allies and in the sanctity of treaties, and has only provided the Bulgarians with a good pretext for legitimatising their awful spring in the dark as *a national war with the assent of Europe.*

The Bulgarian friends of Messrs. Buxton are not sincere. The Bulgarians are generally not sincere at all. That is the pivot of the question. Taine has said: "History is psychology in progress." The Bulgarian treacherous policy and war are the best illustration of the great historian's definition.

It is absolutely untrue that the Macedonian Question stands for the Bulgarians as a capital question. That *may* have been true twenty years ago: it is not so *now*. Macedonia is a second-rate question for Bulgaria. The Bulgarians of to-day lay much more stress on another question, viz., to oppose with all means in their power any considerable territorial increase of Serbia and the unity of the Serbo-Croatian-Slovenic race.

They knew very well that the Entente Powers would give them Macedonia, or at least its largest part, after the world-war, but they knew, too, that the future Serbo-Croatian-Slovenic State would be much greater and mightier than theirs. The programme of Bulgarian statesmen, without distinction of parties, is only apparently the conquest of Macedonia. In truth it is a permanent distrust of—nay, the utmost opposition to—the eventual formation of a Great Serbia or Jugoslavia between the Danube and the Adriatic.

Macedonia *plus* a feeble and divided Serbo-Croatian-Slovenic people, and therefore a large access to the Adriatic, with a permanent alliance with the Central Powers—that is the Bulgarian programme, and not Macedonia alone.

We Jugoslavs know this very well, but the old formulæ unfortunately hold their ground and obstruct the way to a manly comprehension of the situation.

The truth is that the Bulgarians in the present world crisis were the predestined allies of the Central Powers. Their English sympathies (Robert College and Karaveloff remembrances), which are the main origin of the inexplicable Bulgarophilism of some Englishmen, have never had deep roots in the Bulgarian soul. The Bulgarians, like the Prussians or the Magyars, are the born foes of the principle of nationality—of other nations.

What policy, then, ought to have been pursued towards Bulgaria? Only one: No bargaining for Balkan provinces no shakening of the solemn Treaty of Bucharest, whose existence was guaranteed by Roumania and Greece especially, but not its overthrowing; no negotiations with the Bulgarians, but concentration of large forces in Macedonia and Serbia three months ago. Instead of that "scrap of paper" policy, there have been idle negotiations, abstention.

We are now seeing the dreadful effects of diplomatic tactics according to the recipe of Messrs. Buxton.—I am, etc.,

(Count) LOUIS VOINOVICH

(Peace Delegate of Montenegro at the London Conference).

Rome, November 10, 1915.

BULGARIA AND THE PRINCIPLE OF NATIONALITIES.

To the Editor of THE NEAR EAST.

Sir,—In view of all that has passed within the last month, it was certainly surprising to read the letter published in your last issue under the above heading. That Bulgaria should still possess such champions in our midst is certainly disquieting to those who have viewed with regret the energetic propaganda which has had in the past so bemusing an effect on public opinion in this country.

It is to be noted in the first place that the writers wholly accept the pretensions of Bulgaria to Macedonia. That, however, is a subject which has been so thoroughly thrashed out in your columns that it is unnecessary to deal with it again at this moment. That the attitude of the native Macedonian population hardly agrees with the assertions put forward may be seen from the hideous fiasco of the much-advertised "great rising" of 1903, when, according to Mr. Brailsford, the total number of the insurgents was no more than 4,800. The men of the Vardar have also fought well for Serbia in this war.

It is untrue that Serbia's reply to the Powers "was practically a rejection of the Allies' demands." On the contrary, in the beginning of September Serbia agreed to surrender the whole of the "contested zone," including even Monastir, with the reservation of Ochrida and Prilep only. To claim Kavala on the principle of nationality is impossible; it is a Greek town.

The writers say that the Bulgars "consider" Macedonia "as the cradle of their race." That is absurd, and, if true, argues an abnormal ignorance of their own history. The cradle of the Bulgars in the Balkan Peninsula lies between the Balkan and the Danube; it is there that are seated the most important origins of their race and polity in the Near East.

The assertion that Serbia recognised Macedonia as belonging (i.e., by race) to Bulgaria in the Treaty of 1912 is devoid of foundation. The partition therein agreed to by Serbia was her consideration for Bulgarian aid in her attempt to reach the sea. As I have dealt fully with this Treaty in the *British Review* for September, it is unnecessary to go over the same ground here. Nor do I think it correct to point out that Bulgaria could so easily take Macedonia for herself. She is engaged on the task now, and I fancy that it looks less easy than it did at the beginning of October.

I am not quite certain that I understand the *sous entendu* of the third paragraph from the end of the letter. As I read it, it contains a covert threat (or hope?) that the Allies will fail to sustain the principle of nationality in favour of Serbia because Bulgaria was not satisfied with the granting of all-contested Macedonia with the exception of the two places mentioned. That is a bitter wish for our brave Allies, and I do not think it will find fulfilment if all goes well with our arms, an exception being made, unfortunately, of a large part of Dalmatia.

It is regrettable that the writers' minds are troubled by the thought that Bulgaria, having stabbed Serbia in the back and endangered our whole campaign in the Near East in a manner that will cost us millions of pounds and thousands of lives, will not be rewarded by her grateful enemies as the result of her perfidious hostility with all that she could have acquired as a staunch ally, because I fear that it is unlikely that any means will be found of lightening that trouble. The suggestion that Bulgaria should be rewarded is too grotesque, and is merely another amazing instance of that pro-Bulgar obsession which has worked so much harm already. I find it difficult to write without bitterness on such ideas at the moment when the heroic Serbs are undergoing their present agony in the common cause.—I am, etc.,

A. H. E. TAYLOR.

P.S.—The claim to the "eternal" possession of Nish, and for Central Albania and Durazzo, would seem to argue that Bulgarian love of the principle of nationality is not altogether without qualification.

BRITISH REFUGEES FROM TURKEY FUND.

To the Editor of THE NEAR EAST.

Sir,—The Press has already attracted the attention of a generous public to the distressing circumstances in which many former British residents in Turkey are placed owing to the war.

During the last ten months about 80 families have been helped, consisting approximately of 300 people. Part of the money subscribed has been sent to Constantinople to relieve those who, either for family reasons or on account of their restricted circumstances, were unable to leave the country, and, as the cost of living in Constantinople is very high to-day, the necessity of continuing this assistance is urgent.

In reply to the appeal of Sir Francis Elliot, H.B.M. Minister, money has also been sent to Athens, where a good many families took refuge at the outbreak of war, and where they are still living. Their needs are, unfortunately, as great as ever. Sir Francis has recently addressed to the committee a further request for the sum of £500, to which

Digitized by Google

they have not been able to respond to the full extent owing to other calls and to lack of sufficient funds.

In this country, many are still requiring financial assistance, the need for which will not diminish during the coming winter, which cannot fail to increase the existing distress.

These are the circumstances in which I venture to appeal for further subscriptions, which should be sent to the acting hon. secretary, Mrs. Frank Barker, Lowndes House, Lowndes Place, or the hon. treasurer, Mr. W. Middleton Edwards, 5, Giltspur Street, E.C. Any amounts, no matter how small, will be gratefully accepted and duly acknowledged.—I remain, etc.,

LOUIS MALLET.

Lowndes House, Lowndes Place, Belgrave Square.

THE URMIA CRISIS.

To the Editor of THE NEAR EAST.

Sir,—I have read with interest the above article in your issue of September 3 last. Whilst there are such diverse numbers of Christian nationalities in countries ruled by Turkey and Persia, it is difficult for one even to guess whom your correspondent refers to. The place is a Mohammedan country, and the Christians in it no doubt form a unit; perhaps it is for this reason that the correspondent has not been explicit. However, I would ask any of your readers, or, better still, the correspondent himself, to say who compose the Christians of Urmia and who have been those victims of Kurdish atrocities set up by Turkish pashas referred to in the article.—I am, etc.,

"A CHRISTIAN."

Bandoeng, Java, October, 1915.

REVUE DE LA SITUATION.

To the Editor of THE NEAR EAST.

Monsieur,—Ce n'est plus une guerre que nous contemplons, mais bien une anarchie royale contre l'ordre social du monde civilisé, et là où nous comptions trouver chez la nation allemande une force morale qui pour lui permettrait de se refaire et de reprendre son élan industriel passé, nous ne voyons que de la cendre et du fumier, vu la part que cette nation prend dans les méthodes criminelles impérialistes.

Toutefois la solution n'est guère à la plume, en ce moment, mais bien à l'épée.

Le projet d'extravagance militaire que le Kaiser entretient n'est qu'une orgie d'idées aussi immorales que peu pratiques. Où est-il de son but après quinze mois de lutte? Arrive en Serbie? Soit. Et après? En attendant des milliers de ses soldats sont mis hors combat journellement, son peuple souffre de la faim et de mille autres misères, ses colonies lui ont été enlevées, ses bateaux de commerce balayés des eaux, un grand nombre de ses bateaux de guerre coulé et son commerce extérieur détruit. Un triste resultat d'un plus triste calcul de ce nouvel Alexandre le Grand!

La Bulgarie se bat-elle de son côté contre la Serbie sans que la conscience grecque se révolte? C'est malheureux pour la pauvre Serbie, mais la Roumanie, qui forgea la Couronne de son Roi des canons turcs pris à Plevna, est la même qui aida la Russie en 1877 et point une autre, et nous verrons ce que fera la Russie, en outre des dispositions prises et à prendre par les autres Alliés.

Ayons patience. Voici la Mésopotamie conquise à la grande joie des Arabes, l'Egypte aura encore un rôle important à jouer, et la mer est à ceux qui ont des flottes pour la parcourir et la défendre. Les Allemands et les Turcs ne trouveront qu'à se faire tuer dans la Méditerranée quoi qu'ils disent et fassent! La solution sera radicale à présent et ils l'auront voulue. Les Turcs Liberaux comme Prince Sabaheddin ont perdu leur dernière chance, à ce que je vois.—Agréez, etc.,

ALEXANDRE SEFI.

November 9, 1915.

BRITISH REFUGEES FROM TURKEY FUND.

We are informed by the Hon. Treasurer to the above Fund that the following subscriptions have been received since the publication of the former list, which appeared in our issue of June 11:—

	£	s.	d.
The Hon. Lady Herbert	5	0	0
Dr. J. C. Uhthoff	1	0	0
Mrs. Newton Warren	0	6	0
Mrs. Brenchley Baker	0	5	0
Lt. H. A. D. Hoyland	1	0	0
Miss Theodora I. Ward	1	0	0
E. L. Norris	0	10	6
Miss E. Cheese	0	10	0
Dr. Clemow	5	0	0
Messrs. Jos. Gardner and Sons	2	0	0
Messrs. Thos. Wilson, Sons, and Co., Ltd.	25	0	0
The Sec., Nat. Relief Fund	500	0	0
R. W. Bullard (2nd Donation).....	10	0	0
Bertram Mills.....	25	0	0

Messrs. Armstrong, Whitworth and Co., Ltd. (2nd Donation)100		0	0
Messrs. G. and J. Weir, Ltd.	25	0	0

CYPRUS TO-DAY.

Speaking at a meeting of the Royal Colonial Institute held on Tuesday last in the Whitehall Rooms, Mr. Roland L. N. Michell, C.M.G. (formerly British Commissioner for Limassol), said that Cyprus when occupied in 1878 had a bad name as a "fever-stricken hole." By degrees it acquired a better reputation, and began to be extolled. Truth lay between the extremes. From June to October the heat was trying for dwellers in the plains, while an admirable climate could be enjoyed in the hills. During the remainder of the year there was an excellent season in the plains, while the heights were often deep in snow. The people were strong, hardy, frugal, and had maintained their vigour during ages of hardship. It was a mistake to regard them as lazy and sluggish; the apathy that was observable did not differ much from the stolid conservatism common in agriculturists elsewhere, and it must be remembered that until recently the incentives to industry that existed in civilised communities were entirely lacking. When the island came under British rule in 1878 its condition resembled that of most other Turkish provinces, and no one who visited it to-day could have any idea of what the pioneers had to face. But in spite of the ruinous condition of the country, the burden of the Tribute, the anomalous nature of our tenure previous to 1914, and other obstacles, order had been brought out of chaos, and the foundations of future progress firmly laid. The wealth of the country lay in agriculture, the principal area of cultivation being the great central plain called the Mesaoria.*

As regards the future of the island, Mr. Michell said the outlook was hopeful. The most vital problem was unquestionably that of irrigation. Storage reservoirs had been constructed, but the villagers had shown indifference. The water supply from wells might be increased. Besides irrigation and a reform of the present methods of husbandry, it was necessary that the rural population be emancipated from the money-lender. Money at a low rate of interest must reach the fairly solvent members of the agricultural community for liquidation of their debts and for reproductive purposes. Reafforestation should be pushed on. A tourist trade might be developed.

As to the political question, Mr. Michell said it was beyond question that the people were contented with our rule. In the towns there had been maintained for many years an agitation for union with Greece, but if this ideal could not be realised the Greeks who supported the movement would prefer to remain under British rule. The Turkish community was strongly opposed to the movement. The offer of the island to Greece came as a disagreeable shock to Anglo-Cypriots; the movement did not appear opportune for relinquishing a possession which, owing to its geographical situation, might be of the greatest value as a naval and air base. Its position dominated the Suez Canal, Alexandretta, and neighbouring coasts. It was an admirable half-way house for young soldiers going to India; and as a sanatorium it was a most valuable possession. There was a strong feeling amongst Englishmen that the Turkish community deserved full consideration, and in the interests of the whole population it would be regrettable if our work of regeneration should be arrested.

General Sir Robert Biddulph, second High Commissioner for Cyprus, took part in the discussion that followed. He said that the reason the island had at first a bad reputation for health was because people landed at Larnaca, which in those days had a marsh that was the abode of mosquitoes, and visitors rarely went more than a few miles inland. The marsh was now drained. As to the agitation for union with Greece, many of the people who led it were not Greeks of the island, but had come from Athens.

BOOK NOTES.

The friends of Mr. Réne Francis, both in this country and in Egypt, will be glad to learn that a new edition of his book, "The First Temptation of St. Anthony," has been called for, and has just been published (Duckworth, 15s. net). It is illustrated from drawings by Miss Katherine Loro, and is a translation from the 1849-56 Manuscripts, edited by Louis Bertrand.

An official account of "The Work of the British Red Crescent Society in Three Continents, 1912-1914" has just been published. It is a pamphlet of 95 pages, and is issued from 41, Sloane Street.

Messrs. Hodder and Stoughton have published at the price of one penny a pamphlet, by Mr. Arthur J. Toynbee, entitled "Armenian Atrocities: The Murder of a Nation."

Messrs. Harrap and Co. have published lately two books dealing with Ancient Egypt. One is "Stories of Egyptian Gods and Heroes," by F. H. Brooksbank; the other, "Myths and Legends of Ancient Egypt," is by Lewis Spence. Both are illustrated. The price of the "Myths" is 7s. 6d. net, and of the "Stories," 5s. net.

The drawings prepared by Mr. Edmund Dulac for the illustration of the Queen of Roumania's fairy tale, "A Dreamer of Dreams," and those he did for "The Arabian Nights," are now on view at the Leicester Galleries, Leicester Square. The former book has just been published by Messrs. Hodder and Stoughton (6s. net).

Messrs. Jack published last week "The Civilization of the Ancient Egyptians," by A. Bothwell Gosse, a volume in the "Through the Eye" series.

*Detailed reference to the economic situation as expounded by the lecturer will be found on page 78.

23	10	Tuesday	15	16
24	11	Wednesday	16	17
25	12	Thursday	17	18

In a letter dated October 23, but only just received, our Bucharest Correspondent writes:—The Dowager Queen Elisabeth, who has for the last few years been suffering from cataract, has undergone a fresh and apparently successful operation at the hands of Professor Landolt, who arrived at Curten de Argesh from Paris a few days ago. The Professor travelled through Germany and Austria-Hungary, he being granted a special pass for this purpose.

Prince Ahmed Fuad Pasha has been appointed President of the Sultanieh Geographical Society, in succession to the late Abbate Pasha.

A Reuter's message despatched from Athens on Tuesday evening states:—Considerable interest centres in Sir Francis Elliot's interview with Lord Kitchener at Mudros. It is understood that King Constantine has expressed a desire to see Lord Kitchener and discuss the situation with him from a military standpoint.

On Thursday of last week, at Chinthurst Hill, Guildford, a daughter was born to Sir Henry and Lady Babington Smith.

The marriage arranged between Mr. Maurice Bonham Carter and Miss Violet Asquith will take place on the 30th inst., at St. Margaret's Church, Westminster.

Mr. Harry H. Lamb, C.M.G., who, our readers may remember, was the British delegate on the International Commission of Control in Albania in 1913-14, has been sent out to assist in the Balkans, where his knowledge of the countries and the language of the different nationalities engaged in the war will be of great service. Mr. Lamb has had about thirty-five years' experience in the Near and Far East.

General Marchand, states a Paris telegram, has left for St. Raphael, on the Riviera, where he intends spending a few days in order to regain his full strength before returning to duty. He has now recovered the full use of his limbs, and goes for daily walks of several miles.

On Thursday of last week Dr. Armand Ruffer, C.M.G., and Mrs. Ruffer celebrated their silver wedding, having been married at All Saints' Church, Norwood, in 1890. Dr. Ruffer is President of the Sanitary, Maritime, and Quarantine Council of Egypt, and Mrs. Ruffer is a daughter of the late Captain J. Tyndale Greenfield, R.A.

Princess Soutzo, wife of the Military Attaché to the Roumanian Legation in Paris, left London on Tuesday for the French capital.

WOUNDED AND MISSING.

MAJOR G. DAVIS,
1/11TH COUNTY OF LONDON REGIMENT,
Wounded and Missing on August 15 at Suvla Bay. Will anyone hearing news of him please communicate with Mrs. Davis, "Edencroft," Brondesbury Park, N.W. 9

We regret to learn that Archdeacon Ward has been unwell since his arrival in England from Egypt, and that his medical advisers have forbidden him to attend to correspondence for some weeks.

The Rev. F. de W. Lushington, M.A., arrived in Egypt at the end of last month, and took up the duties of *locum tenens* at All Saints' Church, Ramleh, on the 2nd inst. He had recently been serving at the front as Chaplain to the Brigade of Guards, but was invalided with heart trouble. He had previously held the post of Archdeacon of Malta, and when the war broke out was headmaster of Dover College.

The *Egyptian Gazette* of November 3 announces that a marriage has been arranged and will shortly take place between Mr. Geoffrey Lockman, of the Ceylon Contingent, and Miss Ivy Suter, youngest daughter of Mr. and Mrs. Harry C. N. Suter, of Cairo.

Mr. Gerald C. Delany has been appointed general manager of Reuter's Telegram Company in Egypt in succession to the late Mr. David Rees.

Our Bucharest Correspondent writes (October 23):—

Mr. Bourchier, the correspondent of the *Times*, has arrived from Sofia. He was invited by the Bulgarian Government to remain in Sofia, and his servant was even exempted from military service, but Mr. Bourchier has come on here, and thinks of remaining here some time.

M. Titus Maiorescu, former Prime Minister, has returned from his travels, and has been received by King Ferdinand.

Colonel Colomb, of the Belgian Army, and one of the heroes of Ypres, has passed through Bucharest, on his way to Russia, on a special mission. He is accompanied by Mme. Colomb.

General Vissolykin, an aide-de-camp of the Tsar, has passed through Bucharest en route to the Serbian headquarters, charged with an important mission.

It is announced in the *London Gazette* that the King has granted authority to the following to wear the decorations stated:—

Grand Cordon of the Order of St. Sava (conferred by the King of Serbia).—Lady (Ralph) Paget.

Grand Cordon of the Order of the Nile (conferred by the Sultan of Egypt).—Colonel Lord Edward Herbert Cecil (Financial Adviser, Ministry of Finance, Cairo); General Sir F. R. Wingate (Sirdar of the Egyptian Army and Governor-General of the Sudan); Sir Malcolm McIlwraith (Judicial Adviser to the Egyptian Government); Sir R. W. Graham (Adviser to the Egyptian Ministry of the Interior); Mr. Douglas Dunlop (Adviser to the Egyptian Ministry of Education).

Grand Officer of the Order of the Nile (conferred by the Sultan of Egypt).—Sir Murdoch Macdonald (Under-Secretary of State for Public Works in Egypt); the Hon. R. C. Lindsay (Under-Secretary of State for Finance in Egypt); Mr. James Haines (Under-Secretary of State for Agriculture in Egypt); Mr. W. E. Brunyate (Legal Adviser, Ministry of Public Works, Egypt).

The *Gazette* announces that the King has granted authority to the following to wear the decorations conferred upon them as stated:—

Lord Kitchener.—Grand Cordon of the Order of Leopold, conferred on him by the King of the Belgians.

General Sir Arthur Henry Fitzroy Paget, G.C.B., K.C.V.O., Order of Saint Alexander Nevsky, conferred on him by the Emperor of Russia, and First Class of the Order of the White Eagle, conferred on him by the King of Serbia.

Captain R. G. C. Glyn, Rifle Brigade (Special Reserve).—Third Class of the Order of the White Eagle conferred on him by the King of Serbia, and Second Class of the Order of Saint Anne, conferred on him by the Emperor of Russia.

Lieutenant (temporary Captain) G. H. MacCaw, 3rd Hussars.—Fourth Class of the Order of the White Eagle, conferred on him by the King of Serbia.

In a letter from Jerusalem is told the following story, which bears vivid testimony to the way in which the late Bishop in Jerusalem, Bishop Blyth, was loved and venerated by the people of the Near East. Just before the Bishop left Jerusalem, in July, 1914, he deposited certain articles of church plate belonging to St. George's Cathedral, which were of special value, in the Crédit Lyonnais Bank for safety, this being his usual custom when leaving Jerusalem for any length of time. When the Turks took over the bank, some time in November, 1914, these packages were found there, sealed with the Bishop's well-known seal, and bearing his name on each; and because they bore the name of Bishop Blyth the Turkish authorities voluntarily handed them over untouched to the United States Consulate.

No one who knows anything of the position held by Bishop Blyth all through the Near East, whether in his own immediate jurisdiction or not, will be surprised at this spontaneous tribute of respect to his name and memory on the part of the Turkish officials at Jerusalem, but it is especially good to hear of such an act on the part of an enemy during wartime.

The substance of an important telegram has been communicated by the Foreign Office to Mr. Bertram Christian, chairman of the Serbian Relief Fund. The telegram was received from Sir Charles des Graz, British Minister in Serbia, by wireless, viâ Rome. "In spite of the interruption of telegraphic communication," says the message, "and the blocking of the roads, Sir Charles des Graz has been able to get into touch with most of the British hospital units in Serbia. He finds a general disinclination among them to leave their work, and is of opinion that, in the present state of the country, it would be wiser that British nurses and doctors should remain where they are and not attempt to leave the country." Sir Charles des Graz had heard from the United States Minister at Bucharest that the members of Lady Paget's unit were well and continuing their work at Uskub. In conclusion, he suggests that "it would be well to send large supplies of foodstuffs and medical stores to Salonika, in the hope of the line being opened in order to supply the needs of the units." Remittances ear-marked "For Serbia" should be sent to the Treasurer, British Red Cross Society, Pall Mall.

Mr. Charles Cooke Taylor, who went out to Serbia in the early part of February last when the typhus epidemic was at its worst, and who was attached to Lady Paget's Hospital as orderly, in the course of a letter, says: "When the invasion by Austrian and German troops took place it was at once realised that Uskub, being a position of great strategical importance, was in imminent danger, and a move to Pristina was contemplated, but the hospital was overcrowded by the influx of patients from other hospitals, and either it was too late to effect the transfer, or it was too great an undertaking to be attempted in the circumstances. At all events Lady Paget resolved to stand her ground and risk whatever might be in store. She did so. Uskub was assailed and occupied, and the hospital passed undamaged into the hands of the Bulgarians. It is pleasant to be able to add that they have proved more chivalrous antagonists than some of their allies, and the latest news to hand reports all members safe and well."

As we go to press we regret to learn of the death of Mr. T. S. Blockey, head of the well-known firm of T. S. Blockey and Co., of Baghdad and Busreh, which took place at his residence, Grove Cottage, Cheshunt, on Thursday morning. Mr. Blockey, who had spent nearly thirty years in Baghdad, had an intimate acquaintance with that part of the Near East, and had done much to forward British interests in the Baghdad-Persian Gulf region. He returned to England to take up his residence about twelve years ago, but continued to take a very active interest in the affairs of his firm, while his activities in other directions might well put many younger men to the blush. His death will be sincerely regretted by a large circle of friends, both in this country and abroad.

Digitized by Google

A message from Salonika states that the various Scottish Women's Hospitals in Serbia were evacuated in ample time, and that there is no cause for anxiety about their staffs.

Mr. E. Ashmead-Bartlett's second lecture on the Dardanelles operations has been postponed till November 24.

The marriage of Lady Mary Charteris, second daughter of the Earl and Countess of Wemyss, to Lieutenant Strickland is to take place in Cairo to-morrow.

The death took place in London on Monday of Charles Molyneux Grenfell, late Lieutenant 10th Hussars. The son of the late C. W. Grenfell, M.P., he married, in 1887, the Hon. Mabel Mills, sister of the present Lord Hillingdon, and leaves one daughter, who married Captain Arthur Watts-Russell. Mr. Grenfell took part in the Egyptian campaigns of 1884 and 1886.

M. Leopold Jullien, the manager of the Union Foncière d'Egypte, who has been stationed in the South of France since he left Alexandria on the outbreak of the war, has recently been transferred to the front.

The Joint Committee of the British Red Cross Society and the Order of St. John have decided that a Christmas gift shall be given to every sick and wounded soldier in the hospitals under the Red Cross in France, Malta, Egypt, and the Dardanelles. The order for the despatch of parcels of various small comforts and luxuries has already been given. The committee have received some contributions for this purpose already, and will be pleased to receive further donations.

A Knitting League has been started in Egypt to provide woollen comforts for our soldiers in the Near East. Miss McMahon, the Residency, Cairo, is willing to receive contributions, in money or in kind (wool, knitted mittens, mufflers, Balaclava helmets, etc.), for the benefit of the troops on the Canal, and the Hon. Mrs. R. Lindsay, Gezira, Cairo, will similarly receive gifts intended for the men of the Mediterranean Expeditionary Force.

The Athens correspondent of the *Morning Post* reports that a grandson of General Fabvier, the French general who fought in the Greek War of Independence and distinguished himself by raising the siege of the Acropolis by the Turks, has addressed a letter to M. Venizelos, which has been published in the *Patrie*. In this letter the writer, who himself is fighting as a French soldier in Macedonia, appeals to the Greek nation to remember the Philhellenes who fought for Greece's liberty, urging them to draw the sword against their hereditary enemies the Turks and the Bulgars, and to help to erect an insurmountable barrier against the Germanic wave descending to the Ægean.

Sir Gaston Maspero, Secretary of L'Académie des Inscriptions et Belles-Lettres, will have a pleasant but prolonged task in studying the long series of letters upon Egyptological subjects which the late M. François Chabas received from his friends, says the *Athenæum*. This correspondence, carefully arranged by M. Chabas himself, in seventeen bound volumes, has recently been presented to the Académie by Madame Piquemal-Chabas. The writers were frequently British, and communications from them extend over a period from 1852 to 1877.

The *Egyptian Gazette* announces :—The recent purchase by the British Government of the 9,000 and odd square metres of land from the Nile Land Company is for the extension of the garden of the British Residency, Cairo, and for the erection on it of offices for the Residency staff, as the Residency itself is to be occupied after the completion of these offices exclusively by the High Commissioner and his household.

THE LATE PROFESSOR VAN MILLINGEN.

We have been favoured by a correspondent with a copy of the minute adopted by the Faculty of Robert College, Constantinople, regarding the death of Professor van Millingen. The following extracts will, we feel sure, be read with interest and appreciation by many of our readers who were privileged to know Professor van Millingen :—

"As a scholar he was thorough, laborious, painstaking, and exact. His books on the archæology of Constantinople made him a recognised authority for all time on that subject. He was a profound theologian; he thought both deeply and clearly, he was conscientiously fair and just in his treatment of all difficulties and objections. He so impressed his students with his justice, sincerity, and love of the truth that they gave him their confidence unreservedly. . . . He was a strong, clear, persuasive preacher. His style was often poetically beautiful, and every sermon was an example of close, strong reasoning that appealed to the intellect and carried conviction to the minds of his hearers.

"He was a man of undaunted courage. He was not afraid of the consequences of any truth, and he never hesitated to defend the truth by whomsoever it might be attacked. He was devotedly loyal both to the college and to his friends and associates. As a teacher he had rare power in compelling his students to think for themselves. He was never satisfied unless he had succeeded in drawing out the best efforts of which each student was capable. The tidings of his death will be received with especial sorrow by the Alumni of the college.

"He was a courtly, gracious Christian gentleman, who won the love of men by the charm of his own personality and the genuineness of his character.

"In his death the college has sustained a very great loss. One has been removed from our midst who for thirty-seven years has left his impress upon every student who has graduated from the college during that period. We, his associates, are deeply afflicted with sorrow for our separation from him whom we esteemed so highly, trusted so completely, and loved so tenderly; and we extend our loving sympathy to his wife and children while we congratulate them on the noble life and splendid work of their husband and father."

APPOINTMENTS, PROMOTIONS, Etc.

Captain Marinkovitch, extra Attaché at the Serbian Legation in Bucharest, who had been on leave, returned to his post in the last week of October.

A Dutch message states that M. Melvill de Carnbee, Councillor of the Netherlands Legation in Paris, has been appointed temporary representative of Holland at Sofia.

A Constantinople telegram reports that Hajji Adil Bey has been re-elected President of the Turkish Chamber of Deputies. The Vice-Presidents are Emir Ali Pasha and Hussein Jahid Bey.

Under date of October 23, our Bucharest Correspondent writes :—The Dutch Minister, Dr. C. Van Vredenburch, has returned after being absent on leave. Count Carlos Bendink, First Secretary of the Legation, who has been acting as Chargé d'Affaires during the Minister's absence, has now left for Constantinople, having been appointed First Secretary there.

Count Wolff Metternich, the new German Ambassador to Turkey, has arrived in Constantinople.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

BROOKE.—On November 17, 1915, at 45, Savile Road, Dewsbury, the wife of Arthur Brooke (Constantinople)—a daughter (Margaret Louise).

DEATH.

REID.—On October 29, at the Deaconesses' Hospital, Alexandria, Mrs. Reid, wife of Mr. Arthur H. Reid, agent of the Imperial Ottoman Bank, Mansourah.

SCHOOLS for BOYS & GIRLS.

TUTORS for ARMY, UNIVERSITY, CIVIL SERVICE and ALL EXAMS. REFINED HOMES with EDUCATION for children whose parents are abroad.

Messrs. J. and J. PATON, having an intimate, unique, and up-to-date knowledge of the best Schools and Tutors in this country, will be pleased to aid parents in their choice by sending (free of charge) Prospectuses and Trustworthy Information regarding Establishments which can be thoroughly recommended.

The age of the pupil, district preferred, and rough idea of fees should be given.

THE REAL PERSIAN PROBLEM.

After a period of silence, during which the British Government appeared to have adopted the attitude that the less said about Persia the better, an official statement has been issued, setting forth a variety of outrages committed during the last four months in that country against British Consular officers and other British subjects. The public is familiar with all the occurrences referred to in the memorandum, with one exception; it is stated that "a report has now been received that his Majesty's Consul and the manager of the Imperial Bank at Shiraz have been made prisoners on orders from Teheran. As telegraphic communication with Shiraz is cut off, no confirmation or denial of this report has been received." This latter incident, if authenticated, will have followed hard upon the outrage at the same town on October 23, when a clerk and a servant of the Consulate were shot, the latter succumbing subsequently to his injuries. As this statement of attacks on British subjects has been issued without any explanation, we are left to infer that it is intended to prepare the public mind for possible developments in Persia. An answer given in the House of Commons by Lord Robert Cecil confirms this belief. He stated that, in view of all that had happened and the presence of German and Austrian agents in Persia, the Government had not been without apprehension for the safety of the British and Allied Legations in Teheran. For this reason Russian reinforcements had advanced towards the capital, as the only means of giving protection. A Russian newspaper, quoted in a message from Petrograd, speaks of "the Anglo-Russian expeditions to Persia," as though something like concerted action was to be attempted. It is not long since it was announced that the British force landed at Bushire—which is the port for Shiraz—had been withdrawn, as the Teheran Government was in a position to maintain its authority in that region. Subsequent events hardly bear out this optimistic view, and if it became necessary, apart from possible developments on the eastern frontier, to support in the south the action taken by the Russians in the north, the points of entry for British forces into Persia would be Bushire and Mohammerah, the latter of which is already within the scope of the Mesopotamian expeditionary force under General Nixon.

It is to be feared that the withdrawal of the British force from Bushire, followed, as it was, by further outrages at Shiraz, argued a failure in certain quarters to appreciate the actual situation in Persia. Lord Robert Cecil's statement makes it clear that, if such was the case, any illusion on the subject has now been removed. In view of all that has been known of the activities of German agents in the country, it would be strange if the British and Russian Governments had failed to understand the menace to which their joint interests were exposed. We can only suppose that in accepting the assurances of the Persian Government they felt that the rest of the country could be left to its own devices. The series of outrages on British and Russian subjects, however, which threatened to extend even to the capital, showed that German agents were making enough headway to bring about the possibility of the Persian Government having its hand forced. It was to prevent this eventuality that a Russian force has marched from Kazvin to Teheran. A Russian appeal to the Persian people states that, in view of the uselessness of the measures taken hitherto against the corrupting gold of Germany and against the propaganda of the Turco-German *agents-provocateurs*, who seek to compromise the friendship between Russia and Persia, Russia has decided, in agreement with the Government of the Shah, to put an end to these activities in the interests of the good relations between the two countries. The appeal asks all Persians to believe that the Russian arms will not be turned against them, their families, or their possessions, but will be solely used in the defence of the peaceful population, who will be paid for anything the troops may take. This is an exemplary proclamation, the terms of which, we do not doubt, will be carried out to the letter. But it is well that it should have been accompanied by an explicit statement to the Persian Government that, while Great Britain and Russia desire to maintain the most friendly relations with Persia, they can only do so if the Teheran authorities make a real effort to prevent British and Russian subjects from being exposed to such outrages as have taken place.

There is room in Persia to-day for a little plain speaking all round. If it is to take place between the Persian Government and the Governments of Great Britain and Russia it must also be introduced between the two latter Powers. In the view of a section of the Persian population, as we are reminded by the Press, the real Persian problem turns largely on Persia's grievances against our Ally. If we did not believe that Russia of to-day was very differently minded from the Russia that the Persians know, we should not choose this moment for referring to the subject. But it can only be prejudicial to Anglo-Russian interests to ignore the fact. In regard to much that the Persians lay to the charge of the Russians Russian policy is innocent; for it is a notorious fact that from time to time Russian agents have been a law unto themselves and have acted independently of orders. The Persians, however, have had no means of distinguishing between Russia's Imperial policy and the acts of her officials, with the result that a very strong prejudice exists in the country against the Russians and their works. It is on this prejudice that the Germans and Turks have built, and the measure of success they have achieved can be gauged by the fact that it has now been found necessary to despatch Russian troops to Teheran. When, therefore, Lord Robert Cecil states that "the whole trouble arose from the proceedings of German and Austrian agents in Persia," he is really understating the case. One antecedent cause of the present unsatisfactory developments in Persia is the feeling, whether justified or not is beside the point, of uncertainty regarding the Allies' intentions. Both the Russian and the British Governments must be aware of the fact; but if from false modesty they affect to ignore it, they are more likely to aggravate than improve the situation in Persia. All the conditions that inspired that feeling or led to the dubious acts of Russian officials have now been changed; but the Persians are, after all, human, and may be forgiven if they display little alacrity in accepting Russia in a new rôle without any explanation of the metamorphosis. "Spheres of influence" are now, or should be, in abeyance. If the Allies want to be spared the trouble that Germany has been sedulously fostering for them in Persia, the British Government must be the chief spokesman in Teheran, in order to convince the Persians that Russia is not adopting the phraseology of conventionality and insincerity in speaking of friendship between her and Persia. The good intentions of the Persian Government seem to be established by the decision of the Shah to remain in Teheran; but if an effective stop is to be put to Turco-German intrigues there must be active co-operation between the Persian authorities and the Allies. These intrigues have not been confined to the capital and the western provinces, but have extended across Persia, and threaten to make mischief beyond the eastern frontier. The British Government is on very strong ground in asking Russia, on the strength of an alliance which is now based on a community of ideals and interests, to stand aside while it deals with the real Persian problem and prepares the way for a working arrangement between the three countries which will promote the real interests of Persia.

AN EGYPTIAN SUNSET.

The new arrival in Egypt, after his first interested glance out of the train window on the way to Cairo, spares small attention, as a rule, to the landscape of the Delta. If a traveller, he is here to see mosques and mummies, temples and pyramids, and for him Egypt is the desert and the Nile. If, like Pharaoh's brethren, he has come to settle in the land, he will most likely satisfy his passion for rustic scenery within the well-kept limits of Gezira—unless, indeed, an inspector of *omdehs*, or cotton-crops, he speeds from *balad* to *balad* on the ubiquitous "motor-bike."

But, however little accounted of, the Delta has a beauty quite of its own for at least one hour of the day. That is the hour of sunset. Then, like Cinderella at the stroke of twelve, it undergoes a sudden transformation—but the other way about. Touched by the witch's wand of night, it turns from a sun-scorched, featureless plain to a land of mystery and shadow. The deserted scene fills with life as the *fellaheen*, scattered out of sight among the fields all day, emerge and gather on the raised canal-dykes, those ancient thoroughfares of Egypt. Mere mud banks half an hour before, these dykes now change to busy highways crowded with a pageant-like procession of men and beasts.

One summer's evening, not long ago, I watched this witchery. A broad streak of flame flung athwart the Western sky marked where the sun had lately set, but overhead dusk had already spread its wings, and night crept up from the East. Standing stark against the sunset glow a line of palms showed up in high relief, each separate frond as clear-cut as if cast in bronze. The green faded slowly from the fields of sugar-cane. Near where I stood was a primitive wayside mosque at the corner of a field, where the peasants on their homeward way stopped a while for the evening prayer. It was only a platform covered with reed mats and built a foot or two above the ground, with a tub of water for ablution near at hand. A dozen men had gathered there and, mounting on the platform, ranged in a double row facing towards Holy Mecca. A solitary figure took his place in front and lead the prayers, the rest following him word for word, motion for motion. Nothing in the whole wide world could exceed the simple dignity of those blue-gowned sons of toil as they bent and rose in perfect unison, chanting their praise to God, "the Compassionate, the Merciful."

From a rise a little beyond I gained a view clear across the plain to the desert. The light was waning fast, but the range of low hills—broken survivors of the great cliffs which hem in the valley of the Nile—still held a sharpness of outline unknown in northern lands. Far away on the horizon the pyramids of Giza, grim wedges of black, thrust up against the sky. A canal ran through the field in front of me, and presently along its bank came trooping a motley crowd of country-folk in single file. Two boys straddling across the massive back of a lumbering black *gamoos* led the procession, merry youngsters, breaking every now and then into snatches of Arab song. A herd of goats came next, driven by a tired-looking woman muffled in black and carrying an empty water-pitcher on her head. Her husband followed, riding a tiny donkey, whose even tinier colt, a pretty shaggy thing, trotted closely at her heels. After them a camel with huge bundles of *durra* in rope-nets on either side his hump. Last of all a crowd of sturdy *fellaheen* brought up the rear, their hoes over their shoulders, striding with the easy gait of the Egyptian peasant, untrammelled by their flowing *galabias*.

They passed in silhouette, like shadow figures on a screen, and silent till they reached a bridge over a branch-canal. As they crossed, the echoing planks gave back their footsteps clear and distinct—the buffalo's heavy tread, the pit-a-pat of the goats, the clatter of the donkeys' hoofs, the camel's deliberate plod and the padding of the bare-foot *fellaheen*, one succeeding another till the last man reached the farther bank. There they paused, and a deep-drawn soughing told that the weary beasts were enjoying their well-earned drink. For a minute the shadow forms were mirrored in the calm water of the canal, then, passing on, grew vague and indistinct against the dark background of the fields beyond.

Only a faint echo of the clear boy-voices carried back to me as the little company, heading towards its village now twinkling with distant lights, passed out of sight and left "the world to darkness and to me."

G. E. H.

"THE BALKANS AND THE WAR."

Last week Mr. J. L. Garvin addressed a crowded meeting of the members of the Constitutional Club on "The Balkans and the War." The Rt. Hon. Sir F. E. Smith, K.C., M.P., occupied the chair.

Mr. Garvin said that the Allies had allowed themselves to be taken by surprise four times. The first surprise was the weight and almost the direction of the unparalleled sweep upon Paris, the second was the ability of the enemy to stay the tide of disaster after the battle of the Marne, the third was the great attempt to breach the Russian line, and the move in the Balkans was but the sequel of three other moves that had found the great alliance as a whole less prepared than it might have been. It was impossible for any group of allied Powers to get the full benefit of their alliance unless they were in actual physical contact. Germany and Austria were thus situated, but a considerable stretch of mountainous country separated them from Turkey. In like manner with the Allies, England, France and Italy were in touch, but were separated from Russia. It was, on the whole, more important to Germany to effect a junction with Turkey than it was for us to link up with Russia, though it would be difficult to express in words how great an advantage it would have been if the Dardanelles operations had been carried through to success, and British sea-power had been fully in touch with Russian seaports. But it was more vital still to Germany; it meant for her the support of an enlarged Bulgaria, and Bulgaria's position was such that Greece and Roumania were restrained to neutrality and might even be driven to join the Central Powers. Direct contact between Germany and Turkey would mean that the Turks, who had undoubtedly been very short of munitions, would get their supplies. The German rank and file would not go to Turkey, but officers and non-commissioned officers would; and machine guns, shells, and other munitions would be sent. Until such direct contact was established it was impossible for Turkey to organize or mobilize to the full, and he had not the least doubt that the success of the German plan of breaking through and joining hands with Turkey would mean the effective employment of a million additional men against the Grand Alliance. The Germans' plan was to make themselves secure in the Balkans, to rest upon their present lines there and elsewhere in the winter, and to attempt another great move against Russia in the spring—or, at any rate, to bar the Russian offensive, as they thought they had barred the Western offensive. The Germans argued that the lesson of the present war was that once you had gained any position nothing was harder than to turn you out. They thought that if they got to Constantinople they would keep it, and Russia would be driven to a separate peace. They thought they would get a leverage from Islam to use against the British, that they could make Mesopotamia another and more powerful Egypt; and, although they did not think that India or Egypt could be threatened at a first remove they hoped to have an opportunity later on when there would be no alliance to deal with, but England would be alone.

Literally and figuratively Serbia stood in the way of these German plans, and if it were thinkable that she should perish, not only would Britain have been guilty of a breach of honour, but she would have made a great tactical mistake. What he feared for Serbia was the fate of Gordon. The circumstances were strangely alike, and there was danger of the same tragedy of hesitation and delay. It might prove that "time was of the essence of the contract," and that success or failure in the first case would be determined not by weeks or months, but by days or hours.

He could give a good many reasons for the assertion that in this case honour went hand in hand with policy. The Serbians had 250,000 men, these were as much an incorporate part of the Allies' forces as if they were in the British Army; and what would be said if it were stated of 250,000 British troops that whether they stood or were wiped out was a matter of minor concern? The destruction of the Serbian Army would be a military disaster, which, taking place in the Balkans, would react to the extremest length upon the whole situation on all sides of Europe. Again, if Serbia were abandoned, what of Greece and Roumania? These would join the Quadruple Alliance to win, but would not join to go down; and if we abandoned Serbia we should lose every possibility of winning Greece and Roumania, whose adherence would turn the scale if we pursued a vigorous policy. So far as concerned the Western Balkans the case would be altogether lost, and the ugly alternative of complete abandonment of that peninsula would come up for discussion. The case of Antwerp was cited by some who were in favour of weak courses, but in that case the Belgian Army had not been abandoned; the Seventh Division and the Naval contingents had worked their way up to Ghent, and enabled King Albert and his gallant troops to withdraw. So in the present case, we could not do now what might have been done three weeks ago, but by advancing to Uskub we could save the Serbian retreat from being cut off.

THE PRESS ON THE NEAR EAST.

Serbia's Requirements.

A short time ago a number of young American students went to Serbia to engage in relief work. One of them, Mr. Palmer Smith, a student in the Columbia School of Journalism, contributes to the New York *Independent* (October 25) an article, entitled "Barbarous Serbia," from which we have taken the following passages:—

The Serbians also need an injection of the push and vim of the Western world. They are slow to learn, and conservative in their opinions. Nearly all the hospitals and relief agencies now operating in the country have given up trying to use Serbs as helpers. Dr. Ryan, head of the [American Red Cross] hospital, complained that the Serbs were almost useless because of their utter inability to learn or even comprehend the simplest rules of sanitation and cleanliness, which suggests what to me is the most imperative need of the nation.

There is seemingly absolute ignorance or wanton disregard of the primary rules of sex hygiene among all except the wealthier and more cultured classes of the nation, which form only a very small proportion of the population. . . . It is only the healthful outdoor life which all classes of the people lead which enables them to survive the curse.

Education is the only thing that can help Serbia. And how can education best be accomplished? Not by teaching the older people. They are too conservative. They regard the American doctors who are employed by the Serbian Government to supervise the sanitation in the principal cities and towns as flying in the face of Providence. They have a fatalistic belief that if disease is coming it will come anyway, and if precautions are taken it is a sign of cowardice and an endeavour to escape your fate. The only angle of attack that seems to offer any real prospect of success lies in taking the children at an early age and giving them a good education. This seems entirely feasible if money is forthcoming either from the Government or from private sources.

Serbia or Constantinople.

Mr. Marmaduke Pickthall, writing under the above heading in the *New Age* (November 11), urges that a huge mistake has been made in the Eastern theatre of war:—

Had the force which was sent to the Dardanelles been sent to Serbia, Turkey would have been cut off permanently from all help from her Allies, and must inevitably have succumbed in time to economic pressure; Bulgaria would never have declared for Germany, Greece would not have hesitated, and the neutrality of Roumania would have been secured, without the slightest need for bribery. At the same time, we should have gained a name for helping our Allies, not without value as an asset for the future.

Mr. Pickthall considers Constantinople to be impregnable by force of arms, although the city might have been reduced had she been deprived of an effective flow of food and ammunition. The writer concludes a vigorous article in the paragraph quoted below:—

If I were the British Government, I would send every available man into Serbia—indeed, I should have done so months ago—and if Serbia had been crushed before my troops arrived, I should use those troops to liberate her, and for no other purpose, certain that in Serbia is the gate of Germany's ambitions in the East, and that on our treatment of Serbia will depend the honour of our nation in the East in years to come.

Greece and the Allies.

Our relations with Greece are made the subject of a leading article in the *Daily Chronicle* (November 18). It is pointed out that the situation cannot be left by the Entente Powers where it is now, and, moreover, that no Ministerial assurances unsupported by the unequivocal declaration of King Constantine can any longer be regarded as representing the Greek nation. After dealing with the peculiar position occupied by the nation in virtue of her broken alliance, the paper continues:—

You cannot force a country to fight for you in fulfilment of her pledges, but you can hit back if she uses force against you in defiance of them. In the second place, the Allied troops who have gone to Salonica were sent there originally by the invitation of the then Greek Premier, M. Venizelos. His invitation binds his King and his nation, and it is not for either of them to turn round now and act as if it had never been given. International relations simply cannot be conducted on such lines. . . . The Allies have now abundant grounds for compelling Greece to adopt an unequivocal attitude, one way or the other.

Germany's Promise to Greece.

We take the following quotation on the above subject from an article contributed by Dr. E. J. Dillon to the *Contemporary Review* (November):—

Abandoning old positions which seemed fixed and unchangeable, Germany promised to the Greeks as well as to their neighbours in the Balkans rich spoils to be taken from her own allies. On the one hand, Bulgaria, Roumania, and Greece were to be recompensed at the cost of Turkey, Austria, and Hungary; and on the other hand, Bulgaria's desires were to be gratified at the expense not only of Serbia, but also of Greece and Roumania. It reminds me of the bait on twine used by Baron Munchausen, which was greedily devoured consecutively by a number of silly wild ducks, which strung themselves like so many beads, and were then carried home by the ingenious sportsman.

Armenia.

The publication of Mr. Arnold Toynbee's pamphlet on the Armenian atrocities has had the effect of reawaking public indignation with Germany on the score of her non-intervention. The following paragraph from the *Westminster Gazette* (November 15) may be taken as representing the opinion of the Press generally:—

The whole tale makes the flesh creep. The Armenians under the rule of the Turk have practically perished from the face of the earth. And this has been done, if not with the direct sanction of Germany, with its silent acquiescence in the act of its ally. Not one word of disavowal of this massacre of a civilised and Christian people has come from a nation that boasts its civilization and its culture. When the whole terrible tale of the fall of a nation from European ideals comes to be told there can be no more gruesome page than that which recites how Germany failed by a single word to spare a woman or a child in Armenia.

Berlin on Kitchener.

The following quotation of German opinion regarding Lord Kitchener and his mission to the Near East are taken from a recent number of the *Daily Telegraph*, which reproduced many extracts from the German Press, all of which go to show that the movements of the Secretary of State are watched with considerable apprehension in Berlin.

The *Berliner Tageblatt* says:—

Nothing is more stupid than to under-estimate an adversary, and when England sends her best military man to the district in which possibly the war will be decided we have every reason to examine this man, his capabilities, his determination, as impartially as possible. To begin with, we cannot but admit that what Lord Kitchener has done in the course of this war as an organizer is deserving of the greatest respect. . . .

Who is this man with whom we have to reckon in the development of the struggle in the Eastern Mediterranean? He is a typical representative of English militarism, which, notwithstanding all declamations, has always existed, and once had a similar representative, a man of the same stamp, in Wellington.

The same paper, after paying a warm tribute to Lord Kitchener for his work in organising the new armies, proceeds to anticipate his policy in the Near East, which, it considers, will be one of unflagging vigour against the danger of German communication with Constantinople.

Mysterious Baghdad.

Under the above heading Mr. Ernest Phillips contributed an interesting article to a recent number of the *Manchester Guardian*. The writer deals with his subject from many points of view, political, historical, and geographical. In reference to German ambitions in this quarter as manifested in the Baghdad Railway concession, the writer says:—

Do not forget that the concession for the Baghdad Railway was signed almost immediately after the Kaiser's visit to Constantinople, when the butcher of Berlin embraced the bloody-minded Abdul and swore brotherhood with the fiend who had sent thousands of helpless Armenians and unoffending Bulgarians to a ghastly death by fire and sword. And for what purpose? Firstly, to colonize Near Asia and sow it with German Kultur; secondly, to reduce Turkey itself to a state of vassalage; thirdly, to absorb Mesopotamia; fourthly, to oust Great Britain from the Persian Gulf; and, lastly, to reach out towards India in order that, if the moment ever arrived, that gem could be snatched from the British Crown.

Mr. Phillips comments in no measured language upon the misfortune which has come to the Turks by their entry into the present war as enemies of Britain, and concludes an entertaining pen-picture of the glories of the city of Baghdad in by-gone centuries in the following paragraph:—

And what of its future? The Kaiser planned it as the key of his Asian Empire. His hopes are dashed to the ground. Baghdad will pass now from Turkish rule; it will never be the capital of a German province, for the day when British troops enter its gates it will surely become an outpost of our Indian Empire. And then, freed from the incubus of the Turk, released from the menace of Germany, its glory may revive under the encouragement of a tolerant British rule, and Western influences may turn this fabled city into a great commercial emporium, which will give it a new and abiding lease of life and power.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

M.E.F. Correspondence.

November 10.

Mr. PIKE PEASE informed Mr. NEEDHAM that correspondence from the Mediterranean Expeditionary Force for this country is dispatched by such means as are available and the time occupied in transmission varies considerably. The hon. member might rest assured that there was no avoidable delay on the part of the Post Office. The time for transmission from Mudros is fixed at fifteen days.

Sir G. YOUNGER asked if the right hon. gentleman was aware that parcels had been on the way for five or six weeks, and had not arrived at all.

Mr. PIKE PEASE said a statement had already been made with regard to the matter, and a further statement would probably be made shortly.

Great Britain and Serbia.

Replying to questions by Mr. BRYCE, Lord R. CECIL stated that the Serbian Government had expressed the opinion that the right military policy was to attack Bulgaria before her mobilization was completed. In Sir Edward Grey's view that was a question for the Serbian Government to decide, and he had therefore sent no instructions to the British Minister at Nish. When pressed for his opinion, he had said that all the political and diplomatic agreements were against such action, and that he could only deal with considerations other than strategical ones. There had been no question as far as he was concerned of refusing permission.

Dr. MACNAMARA, in reply to Sir E. CORNWALL, said: A British Naval Mission was detailed for special service with the Serbian forces, and its head, of course, conforms to the wishes of the Commander-in-Chief of those forces in all matters connected with military operations.

Mr. TENNANT, replying to Mr. BRYCE, said permission was given to the General in Command of the British troops to cross the frontier into Serbia on the evening of October 26. This permission was acted upon without any delay.

Egyptian Tribute to Turkey.

November 11.

Mr. GINNELL having asked the Secretary for Foreign Affairs whether the amount of the Egyptian tribute payable to Turkey prior to the war was now being applied to the benefit of the people of that country,

Sir E. GREY writes: The Egyptian Government have, I understand, decided that, in view of the various issues involved, it will be desirable to defer the question of the tribute, formerly payable from Egypt to Turkey, for consideration after the conclusion of the war.

Egyptian Paper Money.

Sir E. GREY, in a written reply, informed Mr. GINNELL that his attention had not been called to reports in the *Egyptian Gazette* of losses sustained by illiterate Egyptians through the use of paper money forced upon them. Among the instances cited by Mr. Ginnell were those of animals having eaten the notes, and of three owners of equal shares in a note having cut the note in three equal parts.

Great Britain and Islam.

Mr. GINNELL asked by whose direction the pledge given by H.M. Government to the Egyptian people at the outbreak of the war that, recognising the respect and veneration with which the Sultan of Turkey in his religious capacity is regarded by the Mohammedans of Egypt, Great Britain took upon herself the sole burden of the war in Egypt without calling upon the Egyptian people for aid, was subsequently broken, and the opposite policy enforced without consulting the Legislative Assembly.

Sir E. GREY, in a written answer, says: It is not the case that any pledge has been broken, or that the policy previously announced has been departed from.

Outrages in Egypt.

In a written reply to Mr. GINNELL Sir E. GREY said he understood that after the recent attempts on the life of the Sultan of Egypt certain arrests were made, and that a few individuals suspected of complicity in these and similar outrages have been kept under observation. He had no information as to the number of the persons concerned, nor of the actual treatment accorded to them by the Egyptian Government.

The Legislative Assembly.

Sir E. GREY informed Mr. GINNELL that he was not aware that responsible opinion in Egypt desired that the Legislative Assembly should be convened at the present moment, and he understood that the Sultan of Egypt had been advised by his Ministers that the convention of the Assembly would not in the present circumstances be necessary. He had no information to the effect that the offer of the Sultan to raise half a million men to fight Turkey had been accepted.

Mr. GINNELL asked if the responsible advisers who were preventing the Sultan from convening the Assembly were Egyptian or British, but Sir E. GREY said he must have notice of the question.

Dardanelles Commissariat.

Mr. TENNANT informed Mr. WILL THORNE that the canned beef supplied to the Dardanelles was the same as that supplied to the rest of the army in France and elsewhere. It was manufactured under most careful supervision by medical experts, and there was no reason to hold it accountable for the diarrhœa amongst the troops in the Dardanelles, although he was aware that this form of sickness had been prevalent there.

Mr. PRINGLE asked if Mr. TENNANT was aware that this diet was unsuitable to the climatic conditions of the Dardanelles.

Mr. TENNANT: I dare say the hon. member is quite right, but he must remember that in time of war it is not always easy to supply everything.

Persia and the Allies.

Sir E. GREY, replying to a question by Sir J. D. REES, whether the British Minister at Teheran was a party to the warning given by the Russian Minister to the Persian Government that, if it concluded any special agreement with Germany and Turkey, the Anglo-Russian undertaking to maintain the integrity and independence of Persia would lapse, said: The warning was given by the Russian Minister alone, but the British and Russian Governments are acting in complete unity in Persia, and it must be obvious that the Persian Government cannot make agreements with our enemies, who have instigated murderous attacks on our Consuls and their staffs in Persia, without risking the position of Persia.

Serbia's Plight.

Mr. H. LAW said that, in spite of declarations by the Prime Minister and the Secretary for Foreign Affairs, there was doubt in many minds whether we were doing our utmost for Serbia, the smallest, most unfortunate, and most heroic of our Allies.

Sir E. GREY said that it was impossible, for military reasons, to go into the question in detail, but he would assure the House that Great Britain's help to Serbia had been limited by her power, not by any want of good will. When Bulgaria attacked Serbia and it appeared probable that Greece would fulfil her treaty obligations to Serbia and enter into the war, at once the possibility of co-operation with Greece for that purpose opened out new possibilities of helping Serbia. In common with the French Government, we made to Greece the offer to send 150,000 men to enable Greece to fulfil her obligations to Serbia. That was the beginning of the whole thing. We sent at once the only men who were available, and who could be sent immediately, but we could only take troops from elsewhere when they could be spared with due regard to military exigencies in other places. One of the reasons why the French Government had in some cases sent more troops than we had yet sent was that we provided transport for some of the French troops, and until we had liberated some of those transports it was impossible to embark British troops. Then came the new situation in the Balkans, brought about by the change of Government in Greece, and it was evident that Greece was not going to fulfil her treaty obligations to Serbia. We then considered, with our military authorities and in consultation with the French, whether we could go on without the co-operation of Greece. We did send troops, and there was only hesitation for a time when Greece changed her mind. What troops were available had been got ready and dispatched as quickly as possible. If we had not been able to do more it was merely one of the many instances in this enormous war where the limitation had been imposed not by want of sympathy, not by our aspirations, but solely by the amount of force at our disposal.

The State of Persia.

November 16.

Replying to Mr. PONSONBY, who asked whether he could give the House any information in regard to the critical situation in Persia, Lord R. CECIL said: As will be seen from to-day's Press various outrages have recently taken place on his Majesty's Consular officers in Persia. In view of all that has happened, and the presence of German and Austrian officers in Persia, we have not been without apprehension for the safety of the British and Allied Legations and subjects in Teheran. For this reason some Russian reinforcements have advanced towards the capital as the only means of giving protection. The Persian Government has been expressly informed of the pacific intention of the troops, whose one aim is to afford protection to the foreign Consuls in case of need. Certain proposals have been recently received from the Persian Government, and are engaging the attention of the British and Russian Governments. As in the past so now his Majesty's Government's one desire is to maintain the most friendly relations with the Persian Government provided the latter makes a real effort to prevent attempts being made by our enemies on British and Allied officials in that country. It must be remembered that the whole trouble comes from the proceedings of German and Austrian officers and agents in Persia.

The Armenian Massacres.

Mr. ANEURIN WILLIAMS urged the Government to give an assurance that wherever they might find Armenian refugees on Turkish or Bulgarian soil they would use their best endeavours to release and remove these unhappy people, and to save them from complete destruction.

Mr. T. P. O'CONNOR thought that the massacres could not have taken place without the connivance, or, at any rate, the recognition of the German Empire. He trusted that one outcome of the war would be to stop for ever the ruthless tyranny and bloodlust which had resulted in the massacre of 800,000 human beings.

Lord R. CECIL said that the story was a terrible one. In February of last year the Powers had induced the Turks to accept a measure of reform which might have produced some security for these unhappy people. The moment the war broke out, even before Turkey joined our enemies, she abandoned the pretence of accepting this reform, and as the Committee of Union and Progress thought that it could be done they initiated the terrible scheme of which we saw the results to-day. It might be said without fear of exaggeration that no more horrible crime had been committed in the history of the world. There was only one mitigation of the horror and regret which they must all

Digitized by Google

feel, and that was that this was in no sense a religious movement. It was not due to any fanatical outburst of Moslem feeling. It was nothing of the kind. He believed that pious Moslems in all parts of the world viewed with as great reprobation as we did the horrors that had occurred. The crime against the Armenians was part of the deliberate policy of what Lord Bryce had called the gang of murderous ruffians who ruled Constantinople. It was part of a deliberate policy to wipe out the Armenian people, and when local Turkish authorities were anxious to mitigate some of the horrors of the operation they were ordered to go on with it, or in one or two cases were removed from office. In spite of the assertions of apologists for the Turks, there was no provocation on the part of the Armenians, and there was no kind of truth in the suggestion that British agents intrigued to stir the Armenians to rebellion. If any opportunity occurred of assisting the Armenians by the efforts of our Consuls or armed force, the Government would feel that those efforts had been put to a very noble use. The indirect complicity of Germany in the massacres of Armenians was proved beyond doubt. The creed of German militarism led logically to crimes of this description. The State occupied in the German mind the place which among other people belonged to religion and morality. Once that bastard patriotism was admitted, it became an excuse for any and every crime, and there was no limit to the degradation of a nation which accepted such a view. Unless the German people abandoned this idolatry, they would sink even lower than they had sunk already.

Gallipoli Camps. Nov. 16.

Sir E. Cornwall asked whether adequate provision had now been made for the winter drainage of the camps, and the shelter of the men on the peninsula of Gallipoli, and whether the plans of the authorities in this respect had been now carried out.

Mr. Tennant said he had no quite recent information on this point, but the General Officer Commanding gave an assurance some two months ago that all the necessary arrangements were in hand, and as all demands for material had been and were met without avoidable delay, he had no reason to suppose that the plans had not been carried out.

British Women in Serbia. Nov. 17.

Mr. Cathcart Wason asked the Secretary of State for Foreign Affairs if he would make a special request to President Wilson to give instructions to the American Ambassador at Berlin to make every effort to save the lives and honour of British ladies now tending the sick and wounded in Serbia.

Lord R. Cecil: I have already made inquiries through the United States Ambassador in London and Sir Charles des Graz as to: (1) The British Red Cross; (2) the Scottish Women's Hospital, Valievo; (3) the Berry Mission; (4) the Wounded Allies' Relief Committee; (5) the 2nd British Farmers' Unit, and have received information as to the whereabouts of (4) and (5), who may be in Bulgarian hands. There would appear to be no reason to believe that the ladies referred to will be badly treated. But I will ask his Majesty's Ambassador at Washington to make special representations to the State Department on the subject.

GERMANY'S LAST CARD.

Speaking at the Knightsbridge Hotel on Tuesday, M. Miyatovich, formerly Serbian Minister in London, said he estimated the German-Austrian force in the Balkans at 300,000, with at least 100,000 men behind them. Then there were the Bulgarians, numbering about 500,000; while there were 200,000 Turks ready for operations in the Balkan Peninsula. The Allies between them must send at least 500,000 men, and then they would have a very good chance. He did not share in the unjust attacks that had been made on British diplomacy. If it had not succeeded it was the fault of military circumstances. He hoped that Greece would yet come to see that she had done not only wrong to herself but to the Allies. She would probably wait to see if the Allies had a victory. He did not think King Constantine of Greece was guided only by personal pro-German predispositions. He had a German wife, but he was not going to join the Germans. The speaker doubted if anything could be done to bring Roumania into alliance with us, although most of the people of that country were deeply and decidedly in sympathy with us. One thing was certain: the British Empire could not allow the Germans to go to Constantinople and be masters of the Balkan Peninsula. If the Germans and Austrians were beaten in the Balkans he believed that the German Emperor would see that the best interests of his country would be served by asking for peace. The Balkan venture was Germany's last card, and if defeated they would be morally and politically forced to peace. The speaker concluded by expressing the hope that by about February next the situation would change in favour of the Allies. Meanwhile, if Serbia retired, she would retire into Albania.

ST. SOPHIA AND THE MOSQUES OF CONSTANTINOPLE & BRUSA.

Lecturing at University College recently, Professor F. M. Simpson said that the first church of St. Sophia was built by Constantine. It was destroyed by fire about half a century after its erection, and another erected on the site shared the same fate in January, 532. This gave the Emperor Justinian his opportunity. The present building was begun in February of the same year, and dedicated on December 26, 537. To build a church of such a size and such construction in less than six years was a wonderful achievement, only possible because with architecture of Byzantine character the building can be finished in the carcase state before the internal decoration is applied. In the case of St. Sophia the decoration was probably applied after the formal dedication. In 538 the eastern semi-dome and the great dome fell, probably in consequence of an earthquake, and advantage was taken of the fact to rebuild the dome some twenty feet higher than before; but it is still low, being slightly less than a hemisphere. A writer of that period, Procopius, justly said the church was of indescribable beauty, excelling both in its size and in the harmony of its measures, appearing to be both long and wide without being disproportionate, and being singularly full of light and sunshine. In early time St. Sophia had a wonderful treasure of gold and silver furnishings and ornaments. The latest mention of these was by Anthony, Archbishop of Novgorod, in the year 1200; for, three years later, all were stolen and dispersed, when the band of Venetians and Franks, who formed what was called the Fifth Crusade, captured and sacked Constantinople. They did far more damage than the Turks did when they captured the city two and a-half centuries later. Since the time it has been a mosque the Turks have carried out numerous restorations, the fabric being completely overhauled in 1848 and further repairs being carried out about fifteen years ago.

It was a remarkable instance of architectural perversity that, although the art was carried to a high pitch of excellence in Europe during the Middle Ages, no attempt was made to apply the lessons to be learned from what was still, in the opinion of many, the very finest church in the world. Only after nine centuries had passed was its general plan copied in the Imperial mosques at Constantinople. The mosques at Brusa were erected before the Turks came into Europe, and were of a different design.

INDIAN CIVILIANS IN SERBIA.

(From a Correspondent.)

Mr. L. M. Wynch, C.I.E., left for Serbia on April 1 last as Administrator of the 1st British Farmers' Hospital (4th Serbian Relief Fund Unit). The equipment for this hospital was presented by a fund raised by Mr. Herbert Brown among British farmers, and the expenses of upkeep were defrayed by the Serbian Relief Fund. The hospital was established in Belgrade, in a fine building containing about 200 beds. The cases treated here were at first mainly typhus, and when this disease was checked, it became a general hospital. The staff left at the termination of their contract in September, and the hospital building was taken over by the staff of the 2nd British Farmers' Hospital, which had before been working at Posharevatz.

The 2nd British Farmers' Hospital (5th Serbian Relief Fund Unit), which was organised under the same conditions as its predecessor, is in charge of Mr. F. C. Parsons. Within a few days of its arrival at Belgrade the bombardment of that city began, and it was found necessary to withdraw the staff, who, according to the latest news received, took over the Serbian Military Reserve Hospital at Jagodina, a town some fifty miles south of Belgrade on the main line of railway. It is reported that the hospital building in Belgrade was totally destroyed by the bombardment, and it is feared that the valuable equipment of the hospital is a total loss.

Mr. Wynch has now returned to England. He has proved a most efficient administrator, and has won the respect and affection of his staff. Both Mr. Wynch and Mr. Parsons—the latter of whom has had throughout continuous difficulties to contend with—have sustained in every way the high reputation of Indian civilians as organizers and administrators. Mr. Wynch had as his secretary Mrs. Moore, the wife of Mr. A. W. Moore, now of the Rifle Brigade, and well known formerly as Secretary of the Balkan Committee and correspondent of the *Times* in Persia; and the senior physician was Dr. Fabian Hirst, of Ceylon. The secretary of the 2nd B.F. Hospital is Mr. R. C. Grey, of the Malay States.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of the "NEAR EAST" to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

THE DARDANELLES OPERATIONS

STATEMENT BY MR. CHURCHILL.

In the House of Commons, on Monday, Mr. Churchill replied, at great length, to the criticisms levelled against him in connection with his administration as First Lord of the Admiralty. His review of the Dardanelles operations was so complete, so astonishingly full, and withal so interesting that we reproduce it at length, believing that it will be of value to many of our readers as a record. "What," he asked, "am I going to prove, to try to prove, about the Dardanelles?" And he answered his question as follows:—

I am not going to prove that we have forced the Dardanelles. No amount of argument, however excellent, will do that, nor am I going to try to prove that the plan we adopted was the best plan that could have been adopted. I am concerned to make it clear to the House and to the country and the Navy that this enterprise was profoundly, maturely, and elaborately considered. There was a great volume of expert opinion behind it, and it was framed entirely by expert and technical minds, and in no circumstances could that be regarded as having been undertaken with carelessness or levity. That I am concerned to prove.

In the month of December last the political situation in the south-east of Europe was stagnant and torpid, and the immense currents of opinion which were then favourable to the Allied cause flowed sluggishly, or even ebbed. In Italy our negotiations made little progress. At the same time the Russian Government asked the Foreign Office whether some action against Turkey in the Mediterranean was not possible to relieve the pressure in the Caucasus. In consequence of those communications from the Foreign Office and the War Office I began to direct the attention of the First Sea Lord and other naval advisers to the possibilities of action in Turkish waters. The Dardanelles stood out as incomparably the most decisive operation that was open. Of course, from the beginning we all recognised that a joint naval and military operation by surprise was the best way of attacking the Dardanelles. As early as November 3 we obtained from the War Office their appreciation of the number of troops necessary to seize the Gallipoli Peninsula by a joint amphibious *coup de main*. On November 30 I sent a minute to Lord Kitchener offering to congregate transports for 40,000 men; that is to say, sufficient for the first echelon of an army for the purpose in Egypt on the chance of their being wanted, as I could see that the situation was developing in the direction of an attack in the Eastern Mediterranean on the Turkish Empire. We were informed that no army was available. In the early discussions which took place amongst us and at the War Council it was clearly the prevailing opinion that even were they available they should not be used for attacking the Gallipoli Peninsula. On the other hand, the need for action in the east of the Mediterranean was constantly pressed upon us from many quarters.

As the result of those representations and discussions, I telegraphed on January 3 to Admiral Carden, who was our admiral blockading the Dardanelles and who had been there since the Turkish declaration of war. I put to him this specific question, although these are not the actual words. It is a paraphrase: "Do you consider the forcing of the Dardanelles by ships alone a practicable operation?" The Admiral replied to the effect that the Dardanelles could not be rushed, but could be reduced by a regular and sustained naval bombardment. I put the same question simultaneously to Sir Henry Jackson, the present First Sea Lord of the Admiralty, and I received from him an almost similar answer. The coincidence of opinion between those two officers, one the man on the spot and the other the expert at the Admiralty, who was studying the Eastern theatre in the War Staff—the coincidence of opinion between those two men made a profound impression on my mind.

Admiral Carden was then asked to formulate his plans and to state his requirements. He did so in full detail in his telegram of January 11. We were in a position to meet those requirements. The victory at the Falkland Islands had cleared the German flag from the seas and liberated a large reserve of naval force. The strength, actual and relative, in home waters was undergoing that steady increase which had been in progress ever since the beginning of the war, and the action of the Dogger Bank on January 24—Admiral Beatty's action—had shown that ship for ship, man for man, and gun for gun we had a clear advantage. That being so, we were in a position to meet the very large requirements Admiral Carden put forward. His plan was then examined by the Admiralty War Staff, and Sir Henry Jackson expressed his full concurrence in it, and advised in writing an attack on the outer forts being made as early as possible.

Lord Fisher, of course, knew everything that was passing. He never advised, never expressed any opinion against the specific operation, nor indeed against the operation at all at this stage. He was very much impressed with the proposal of the Admiralty War Staff to add the Queen Elizabeth to the bombarding fleet. We had seen—and it was fresh in everybody's mind—great fortresses, reputed to be the strongest in Europe, collapsing fort by fort from five or ten shells from 15-inch howitzers. Here was the Queen Elizabeth with eight 15-inch guns on a broadside. Lord Fisher was also strongly in favour of action in Turkish waters, and wrote to me repeatedly on the subject, and especially of joint operation of the Fleet and the Army at the Dardanelles. His schemes involved the co-operation of Powers who were neutral and of an army which was not available, but they all led up to the point of forcing of the Dardanelles with old ships. Sir Arthur Wilson was in favour of attacking the outer forts, but he felt that future progress must depend on the amount of Turkish resistance.

After these discussions I brought Admiral Carden's plans before the War Council of January 13. This meeting was attended by the principal members of the Cabinet, by various high military officers, by the First Sea Lord, and by Sir A. Wilson. The War Council were immensely impressed with the political advantages of the plan if it could be carried out, and they pressed the Admiralty to find a way to carry it out. No one spoke against the method proposed. No expert adviser indicated any dissent. The War Office have always assumed in their Staff papers that the decision to make a purely naval attack upon the Dardanelles dated from the meeting of the War Council of January 13. I do not so interpret it. I consider that the decision was that the Admiralty go on perfecting its plans and making its preparations without being committed finally to action. And this was what we did. The whole plan of Admiral Carden was searchingly re-examined by the Admiralty War Staff and the various gunnery experts whom we had at our disposal, the highest and best in the world, and the general consensus of opinion was established in its favour. On January 25 Lord Fisher sent me a memorandum on naval policy. This memorandum did not question the feasibility of the particular operation, but it deprecated reducing our margin in home waters or using fighting ships for bombarding purposes except in conjunction with military operations. It was a memorandum directed not only against the Dardanelles operation, but against others, which were being very strongly pressed forward at the time. I sent the memorandum to the Prime Minister, with an analysis, which I drew up myself, of the naval margins available at the time. I think on that point I may claim that my view has been vindicated by events. Not only did Lord Fisher himself at a later date, but the new Board of Admiralty sent all the ships which were then under consideration to the Eastern Mediterranean, and a great many more besides; and so far from any misadventure occurring in home waters, it is well known that our position has become increasingly safe.

I attach importance to the fact that at no time did I receive from Lord Fisher any criticism of the definite method of attack proposed. In principle he had doubts and objections, but on the special technical and professional points involved I received from him at no time any expression of adverse criticism. Early in the morning of January 28 I had an interview with Lord Fisher in the presence of the Prime Minister, and we discussed the whole situation. The impression I derived was that Lord Fisher agreed and consented to a purely naval attack on the Dardanelles being made. The whole matter then came up for final decision at the War Council, which was held later in the day. The meeting was again fully attended. Lord Fisher and Sir Arthur Wilson were both present. As the result of prolonged discussion, in which again no adverse criticisms were expressed, and in which Lord Fisher contented himself with saying that he had expressed his opinion to the Prime Minister, the Dardanelles operation was definitely sanctioned, and we were directed to execute it. Meanwhile the War Staff had completed their work on Admiral Carden's plan and had drawn up the necessary war order. The project was also laid before the French Minister of Marine. M. Augagneur came over to London; the principles and methods were fully discussed; the project was examined in detail by the French General Staff. They were very favourably impressed by the plan; they announced their agreement and said it was a plan conceived in a spirit which was *prudent et prévoyant*. They pointed out that it enabled us to withdraw at any stage should the gunnery results not be such as we anticipated. What happened? They sent their ships, which supported the enterprise with a loyalty and valour beyond description. The action meanwhile proceeded. Ships, in number many more than Admiral Carden had asked for, were rapidly concentrated from all over the world.

On February 18 the attack on the outer forts began. The first phase of the operation was successful beyond our hopes. The outer forts were destroyed; the Fleet was able to enter the Straits and attack the forts in the Narrows. Up to the time that this happened we had always kept in view the possibility that if this operation, which necessarily depended for its success upon a number of incalculable factors, did not develop as we hoped, and if the obstacles were found to be much greater than had been foreseen, we could convert it into a demonstration and turn our attention to some other part of the Mediterranean. We had kept in view, and had prepared an amphibious operation, which would serve as an alternative in case we wished to withdraw, so as to safeguard our prestige. But the success which we had achieved at the outer forts produced an electrical effect throughout the Balkans. Its repercussion was evident from the first moment in Italy. We had touched the great strategic nerve centre of the world war of 1915. Within a week the leader of the Greek people, M. Venizelos, had taken the decision which led to his first retirement from office. Within a fortnight the Turks were forced to move back to Adrianople, and to develop their defences against Bulgaria. The movement in Italy was also most marked. A panic was created in Constantinople. Everyone supposed that the enterprise was going to succeed. Day by day I held Staff meetings at the Admiralty, at which I received the appreciation of the greatest authorities, who were unanimous that the movement was progressing in the most favourable manner; more favourable even that we had expected, though we quite recognised that the greatest difficulties were to come. It was not now desired by anyone to go back or to ride off on any alternative operation. The eyes of the whole world were riveted on the Dardanelles. Every interest, military, naval, political, and economic, urged its completion. Meanwhile,

Digitized by Google

however, in the early days of March, the progress of naval operations became slower.

But across the prospect of the operation a shadow began to pass at the end of the first week in March. The difficulties of sweeping up the minefields increased, and although great success was obtained by the ships in silencing the forts, they were not able at that stage to inflict decisive and permanent damage. The mobile armament of the enemy began to develop and to become increasingly annoying. It was therefore decided that the gradual advance must be replaced by more vigorous measures. Admiral Carden was invited to press hard for a decision and not be deterred by inevitable loss. Admiralty telegrams gave to the officer on the spot, and were intended to give to him, the feeling that whatever he felt inclined to do he could do with the certainty of being supported in the direction of vigorous measures. These telegrams were the result of close consultation between the First Sea Lord and myself, and, like every other order of importance which has emanated from the Admiralty during my tenure of office in peace or war, bear the written authority of the First Sea Lord. The admiral on the spot, Admiral Carden, expressed himself in entire agreement with the spirit of the Admiralty telegrams, and he announced his intention to press forward in his attack on lines which had been agreed upon, and with which he said he was in exact accord.

The date of the attack was fixed for March 17, weather permitting. On the 16th Admiral Carden was stricken down with illness and was invalided by medical authority. On the advice of the First Sea Lord, who fully concurred, I appointed Admiral de Robeck, Second in Command, who had been very active in the operations, to succeed him. I thought it indispensable to find out on the eve of this difficult attack whether the new Admiral shared the opinion of his predecessor, and I therefore sent him a telegram, of which the following is a paraphrase: "Personal and secret from the First Lord,—In entrusting you, with great confidence, with the command of the Mediterranean detached Fleet, I presume you are in full accordance with the Admiralty telegrams 101 and 109, and Vice-Admiral Carden's answer thereto, and that you consider, after separate and independent judgment, that the immediate operations proposed are wise and practicable. If not, do not hesitate to say so. If so, execute them without delay and without further reference, at the first favourable opportunity." Admiral de Robeck replied that he was in full agreement with the Admiralty telegrams. He would attack on the 18th. The House is fully acquainted with what followed. I should like to point out that the total British casualties in this formidable adventure scarcely exceeded a hundred. The French, it is true, had the misfortune to be unable to save the crew of the Bouvet. We lost two old vessels, of a class of which we had about thirty, and which if they had not been employed at the Dardanelles would have been rusting uselessly in our Southern ports. Therefore, I do not think in making this attack, on which so much depended and the results of which if successful would have been so far-reaching, we risked or lost any vital stake.

Meanwhile time had been passing. The army, which earlier in the year we had been told would not be available, was gradually assembling, and Sir Ian Hamilton had arrived with the leading division of his force. The Admiral came out to attack on the 18th, determined to renew it at the first opportunity, and telegraphed accordingly. But after consultation with the General it was decided to substitute for the purely naval operation a joint naval and military attack. I regretted this at the time, and I endeavoured to persuade the First Sea Lord to send a telegram ordering a resumption of the naval attack. But we could not reach an agreement, and in view of the consensus of opinion of the naval and military authorities on the spot I submitted to the alternative, but I submitted with great anxiety. Every day the danger of the German submarines arriving—a danger which, however, we greatly exaggerated in our minds—seemed to become more imminent. Every day the possibility of a renewed Austro-German attack on Serbia seemed to draw nearer. Every day I knew the Turks were digging; I knew they were drawing reinforcements from all parts of their empire, and I can assure the House that the month which apparently had to be consumed between the cessation of the naval attack on March 18 and the commencement of the military attack on April 20 was one of the least pleasing which I have experienced in my life. I have gone through this story in detail in order to convince the House that the naval attack on the Dardanelles was a naval plan, made by naval authorities on the spot, approved by naval experts in the Admiralty, assented to by the First Sea Lord, executed on the spot by Admirals who at every stage believed in the operation. I am bound, not only in justice to myself, but in justice to the Fleet, who require to know that the orders sent to them from the Admiralty are those which always carry the highest professional authority—I am bound to make that clear. I will not have it said that this was a civilian plan, foisted by a political amateur upon reluctant officers and experts.

I am not going to embark on any reproaches this afternoon, but I must say I did not receive from the first Sea Lord either the clear guidance before the event or the firm support afterwards which I was entitled to expect. If he did not approve of the operation, he should have spoken out at the War Council. War is a hard and brutal job, and there is no place in it for misgivings and reserves. Nobody ever launched an attack without having misgivings beforehand; you ought to have misgivings before; but when the moment of action is come, the hour of misgivings is past. If the First Sea Lord did not approve the operations, if he believed they were unlikely to take the course expected of them, if he thought they would lead to undue losses, it was his duty to refuse consent. No one could have prevailed against such a refusal; the operation would never have begun. There was the time for resignation. He did not take the course. He hoped, as I did, as the French Admiralty did, as the War Council did, that a speedy success would have resulted. For the naval operations, subject to what I have said, I take the fullest personal responsibility. I did not make a plan; but I approved of the plan, I backed the plan, I was satisfied that in all the circumstances that were known to me, military, economic, and diplomatic, it was a plan that ought to be tried, and tried then. After weighing and sifting all the expert evidence, with the personal knowledge I had of all the officers concerned, I recommended it to the Prime Minister and the War Council in the presence of my principal naval advisers, believing, as did everyone there, that I carried them with me, and I pressed it with all the resources at my disposal. I recommended it to the War Council, I recommended it to the French Government, not as a certainty, but as a legitimate war gamble, with stakes which we could afford to lose, for a prize of inestimable value, a prize which, in the opinion of the highest experts, there was a fair and reasonable chance of our winning, a prize which at the time could be won by no other means. On that basis clearly understood it was accepted by all concerned. On that basis I accept the fullest responsibility; I require no shield. I do not desire to reduce or divide my burden in the slightest degree.

For the military operations at the time they were embarked upon, for the methods by which they were executed, for the numbers of troops estimated to be necessary, their quality and commanders, I take no responsibility except by what is implied by my having remained a member of the Government. That general Ministerial responsibility, of course, I accept; but I accept it only subject to my written and recorded opinions, expressed in every case before and not after the event. Luckily there is no dispute about this. In the early days of March, when it became clear that military operations might be required and that military support would be forthcoming, I sought an interview with the Prime Minister, at which I asked Lord Kitchener directly whether it was understood he assumed the responsibility for the military operations, by which I meant—and I said I meant—the measuring of the forces required to achieve success; and after he had replied in the affirmative I transferred the Naval Division on March 12 to military command. My right hon. friend told me the other day he recollected this interview vividly, and therefore it is not necessary for me at this time to enter upon an analysis of the military movements.

I am glad that is so. But I must examine this question: Did the fact that the naval operations had been begun necessarily and inevitably compel the beginning of, and persistence in, the military operations? I have shown how at the beginning of the naval attack we kept open an alternative operation of an amphibious character on which we could at any time ride off. But would it have been possible, after the naval attack of March 18 had been broken off, to sail away and cut the loss? A careful survey of the facts as we know them to-day shows that undoubtedly it would have been. The naval attack finished on the evening of March 18, the military attack did not begin until April 25. If in that period we had known what we now know of the course of the military operations, I cannot conceive that anyone would have hesitated to face the loss of prestige in breaking off the attack on the Dardanelles. I do not consider the naval operations, begun as they were, necessarily involved the military operations, begun as they were. That was a separate decision which did not rest with me or the Admiralty either in principle or in method, but I wish to make it quite clear that I was very glad the War Office authorities were willing to prosecute the enterprise by military means, and I certainly did my best to induce them to do so, and to support them in doing so.

There are, however, two observations which I wish to make of a general character upon the military operations. First, the essence of an attack upon the Gallipoli Peninsula was speed and vigour. We could reinforce from the sea more quickly than the Turks could reinforce by land, and we could therefore afford to renew our attacks until a decision was obtained. To go slow, on the other hand, to leave long intervals between attacks, to enable the Turks to draw reinforcements from their whole Empire, and to refresh and replace their troops again and again, was a great danger. Secondly, on the Gallipoli Peninsula, our army has stood all the summer within a few miles of a decisive victory. There was no other point on any of the war fronts, extending for hundreds of miles, where an equal advance would have produced an equal or even a comparable strategic result. It has been proved in this war that good troops, properly supported by artillery, can make a direct advance two or three miles in the face of any defence. The advance, for instance, which took Neuve Chapelle or Loos or Souchez, if made in the Gallipoli Peninsula, would have settled the fate of the Turkish Army on the promontory, would probably have decided the whole operation, might have determined the attitude of the Balkans, might have cut Germany from the East, and might have saved Serbia. All through this year I have offered the same counsel to the Government, to undertake no operation in the West which is more costly to you than to the enemy, but in the East to take Constantinople, to take it by ships if you can, to take it by soldiers if you must, to take it by whichever plan, military or naval, commends itself to your military experts, but take it, and take it soon, and take it while time remains. The situation is now entirely changed, and I am not called upon to offer any opinion upon these new aspects. But it seems to me that if there were any operation in the history of the world which, having been begun, it was worth while to carry through with the utmost vigour and fury, with a consistent flow of reinforcements and an utter disregard of life, it was the operation so daringly and brilliantly begun by Sir Ian Hamilton in the immortal landings of April 25.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

In last week's "Notes" I analysed at some length the U.S. consular report from Constantinople, the most salient feature of which was the manifest desire on the part of the writer to convince his compatriots that after the war Turkey would be an excellent market for American manufacturing exporters. Incidentally, he indicated the ways and means to be employed in order to conquer that market, and how preparatory measures would have to be taken now; profits accruing at a later date would more than cover initial expenditure.

***

In other words, the United States are preparing for the great trade war. Their consular officials (the case of Consul-General Ravendal is not exceptional) are advising expedition to manufacturers and financiers, the Chambers of Commerce are doing likewise, and semi-official trade experts are visiting the great markets of the world and gathering information to be placed at the disposal of American business firms. There is a thoroughness about the American method which commands our respect—however much it may ultimately be directed against us—and the only deplorable fact is that, in spite of our charmed Cabinet of twenty-two and a Press alive to the necessity of our taking steps to enter the lists now so as to be armed to the teeth when the time comes, nothing positive has been done. Some leagues, prominent among them the Anti-German Union, have agitated in favour of preparation, and are still doing so; the Board of Trade is doing its little bit according to its lights, and there the matter begins and ends. The fact is that those who should be directly interested in being prepared for the trade war are content to let things drift; they all agree that reforms are necessary, that the Government should really do something, but as for insisting on it, there will be time for that later on, they say. Will there?

***

The United States are not the only nation preparing for future trade rivalry in the great markets of the world. By some unforeseen circumstance I have chanced on an odd copy of a German publication, called the Deutsche Levante Zeitung (German Levant Journal). It is characteristic of German methods. Published in two languages, German for those who read Bernhardi in the original, and French for those who live on a higher plane of civilisation. There is no similarity between the two texts; the German one praises the Balkan States, and the French one praises Germany. I have nothing to do with the policital section, though admittedly it is interwoven with the economic section. The latter is thoroughly German in its pleasing, insinuating, self-praising style, and it is backed up by advertisements in all languages, advertisements only of German export articles. After a year of war (the copy under review is dated August), and after we have been taught, under the auspices of the Press, that Germany is on the verge of starvation, penury, and bankruptcy, German exporters can still afford to advertise their goods where British firms have long since refused to launch forth on publicity. Why is this? It is because the German realises that, come weal or woe, he must prepare now, and keep on preparing whatever the present unremunerative cost, for that great trade war of the future for which we are as unprepared as we were a twelvemonth ago. Here are the Germans, then, and the Americans, straining every nerve now to extend their business relations in foreign markets after the war is over, whilst we are doing practically nothing, are still riding the Free Trade nag, scoff Preferential Tariffs, which would favour our friends and Dominions, now anxiously awaiting the re-dumping of German goods in the British market, and let matters slide indefinitely. It is deplorable.

***

In connection with the above, I have frequently pointed out that if we are to accomplish anything in the Near Eastern market it is essential that we should have a Mediterranean shipping line. I am glad to see that the matter has been taken up to a certain extent by some writers in the Egyptian Press. Before the war broke out the North German Lloyd and the Austrian Lloyd kept up an excellent service of boats—cargo and passenger—between Alexandria, Port Said, and Mediterranean ports. In later years the Hamburg-Amerika Line also developed its service in Near Eastern ports, with surprising results for German (and American) trade. The war has, temporarily at least, put a stop to all these services, and the people in Egypt, Britons among them, are pining for some additional service running to and from Alexandria to take the place of the suppressed lines. However, no British firm has made an attempt so far to establish a service between Alexandria and Europe, in spite of the fact that now is the time, when there is no competition, for such a line to be created and popularised so that it can be advantageously extended and finally occupy an unassailable position against all rivals when the war is over It would pay both as regards the passenger and freight service. It is notorious that in the past thousands of pounds' worth of Egyptian trade was lost to Great Britain and sent to Germany owing to the insufficiency of British tonnage. Is this to be repeated? Surely there must be at least one enterprising firm of British shipowners willing and able to take the infinitesimal risk of establishing a Mediterranean service of cargo and passenger boats having as immediate object the exploitation of Egyptian and Sudan trade.

***

The lecture by Mr. Michell on Cyprus, referred to at some length elsewhere, is timely. The island has just escaped a worse fate than was imagined by our genial Secretary for the Colonies (at least, after Mr. Asquith's assertion that the responsible heads of departments were consulted before Cyprus was offered to Greece, we must assume that Mr. Bonar Law agreed to the cession of our youngest Crown colony), and Mr. Michell's plain statement of facts may prevent a repetition of the almost perpetrated blunder. Let us hope that it will have this effect. For Cyprus is not the worthless proposition some barristers would have us believe. It has possibilities that cannot be denied, and if only a more lavish scheme of economic reform were introduced it would turn out to be a valuable property. As for the Greek community, which seems to loom so large in the eyes of some of our administrators, it is not all-important, however resonant its orchestral efforts.

***

Reports yesterday stated that all Greek steamers had been held up in British ports. The following denial has been published by the trading agents of the Hellenic Consulate in Liverpool:—"The report is incorrect and misleading. The position of Greek steamers is as follows: Firstly, unlicensed goods for Greece can still be shipped; secondly, Greek steamers that are at present loading licensed goods are permitted to complete the loading and sail; thirdly, no Greek steamers other than those loading are at present allowed to take licensed goods for Greece. The Greek steamer Themistoclis is now loading for the Piræus and Salonika, and will sail as soon as the loading is completed."

***

According to the *Morning Post*, similar measures have been adopted at Marseilles by the French authorities. Commenting on the detention of Greek steamers in British ports, the French Press (says the *Daily Mail*) is hailing it with satisfaction, and insists that "the time is past for words, that only acts count, and that at the moment when renewed German pressure is being put on King Constantine the Greek Government can be brought to its senses only by a strong hand."

***

According to the *Financier*, New Zealand farmer soldiers now in that country have been immensely struck with the value of Egyptian phosphate layers. They have discovered at Sofaja Bay, on the shores of the Red Sea, what is claimed to be the richest phosphate (naturally pulverised) field in the world. A trial shipment of 500 tons has been forwarded to New Zealand. This, I hope, will be the beginning of better commercial relations between Egypt and our Pacific colonies, and ought to open a new era of inter-colonial trade between the various members of our Empire. I have always insisted on the great development which could be given to "trade within the Empire" if backed by a powerful protective tariff, and I sincerely trust that one of the first results of this great war will be the welding together by economic bonds of our vast possessions. Egypt, Cyprus, and the Sudan stand to gain as much thereby as our great Dominions beyond the Seas.

***

Since fighting in Serbia has necessitated the closing of the route from Salonika to Roumania, the Roumanian Government has been in treaty for the arrangement of a route with Great Britain viâ Russia and Sweden (says our Bucharest Correspondent). He then adds that goods for the Roumanian Government which have already arrived in Salonika will be stored there till means are found to forward them to their destination. On the other hand, and owing to the fact that the Bulgarian Government has strongly objected to the passage through Bulgaria of goods with a Roumanian destination, the Roumanian Government has countered by no longer permitting Bulgarian-bound goods to pass through Roumania.

COMMENTATOR.

Cyprus To-day.

Necessary Agricultural Reforms.

At the Royal Colonial Institute, Mr. Roland Michell, C.M.G., delivered an instructive lecture on the above subject. The following are extracts from that portion of the lecture devoted to the economic situation :—

Agriculture.

The wealth of Cyprus lies in agriculture. Mining prospects are not brilliant. The copper mines are practically exhausted. Asbestos is worked on Mount Troodos. Salt may now become more remunerative. There are two good salines near Larnaca and Limasol. The principal area of arable cultivation is the great central plain called the "Mesaoria," lying between the northern and southern range of mountains. The soil is rich, as the detritus carried down from the denuded hills by winter torrents provides annually a fertilising layer of silt, which has been compared with that which enriches the Valley of the Nile. Water rights are, as may be imagined, of great local importance and not unfrequently of litigation. The principal products of the island are cereals, vines (wine and raisins), carobs, and silk cocoons. The exportation of these products represents about three-fourths of the export trade. The fruits of Cyprus include grapes, oranges, lemons, pomegranates, apricots, peaches, plums, cherries, quinces, apples, pears, figs, and melons, besides walnuts, almonds, and hazel nuts. As regards cereals the average yield of wheat is about 2,000,000 bushels, and of barley about the same. The carob tree, which produces the locust bean of commerce, is indigenous and grows luxuriantly in large areas. Grafting is necessary. The average yield is about 35,000 tons. The greater part goes to England and France. In England it is chiefly used in the composition of cattle foods; in France for distillation. The bean contains a large percentage of sugar. The cultivation of the tree should be largely increased.

Vines.

The vine has been cultivated from early ages, and the hills are largely clothed with vineyards. Cyprus wines used to enjoy a good reputation, especially the rich sweet variety called "Commanderia" (from a Commandery of the Templars), made from grapes when half dried. Some of it resembles Tokay. The bulk of the wine is red, both sweet and dry, of great strength and body. Most of the "black" wine, as it is called, is unpalatable to Europeans owing to the taste of tar imparted by the jars in which it is fermented by village manufacturers, and by the tarred skins in which much of it is still transported. This industry, too, has remained in a primitive condition. Some progress has been made by enterprising firms, but the efforts to improve village manufacture generally have, so far, not met with much success. Sir Samuel Baker thought that if Cyprus were to become a British possession wine would be so greatly improved, and still be so cheap, that it would become (with a moderate import duty) the drink of the poorer classes in England, "and wean the spirit-drinkers to a more wholesome drink."

To bring about better results the whole wine industry would have to be revolutionised. At present good wine of uniform quality cannot be shipped. In Europe it can practically only be used for blending purposes. A good deal of spirit is distilled, and brandy of good quality is made by several leading firms.

By nature Cyprus is well adapted to the production of good wines, especially of a Burgundy type. When Madeira lost its vines, it was restocked from Cyprus. Soil and climate are equal, or superior, to those of Australia, for example. The cost of labour is less, and so is the distance from England. But under present conditions Cyprus wine cannot hope to compete with those of Australia or other colonies. In the case of Australia we see that infinite pains have been taken in the processes of manufacture. Large capital has been available. Sound and palatable wines have been produced at moderate prices. Vast sums have been spent in advertisement, and the wines have obtained a firm footing in England. So far there has been no movement towards co-operation in rural districts, but it is quite probable that in time wineries on co-operative principles, similar to those now working in South Africa, might be started with advantage. Wine-making, however, will continue to be one of the most important industries, and one cannot but hope that the day will come when Cyprus will again produce wines suited to modern tastes, which will find a market in England.

Raisins are largely exported, but they have not found favour in England. The preparation should be greatly improved.

Cotton-Growing.

The condition and prospects of cotton-growing are of special interest. In 1904 Professor Wyndham Dunstan visited the island, and his report to Parliament was of great importance. After recalling the fact that in mediæval times the fibre of Cyprus cotton was considered the finest in the Levant, he states that the climate and soil are highly favourable for its growth. But the industry is decadent, the methods of cultivation being primitive, and requiring the light of modern knowledge. He considers that while the cotton-growing area could be largely increased within a few years, "in the future, having regard to the possibility of making cotton a part of a system of rotation with cereal and fodder crops, an area of several hundreds of square miles might eventually be brought under cultivation." The value of exported cotton now only reaches about £6,000 a year.

Olives and Silk.

The olive tree calls for attention. Olives and oil are largely consumed in Cyprus. The insufficiency of production has been characterised as "unpardonable." Trees are not grafted, the methods of cultivation and gathering the fruit are faulty, and the methods of extracting oil antiquated and wasteful. Very little good oil is produced, and the island, which should export oil, now imports to the value of about £2,000.

The rearing of silkworms is an important branch of industry, and calls for very great development. The cultivation of the mulberry tree should be very largely extended. A good deal has been done through the efforts of M. Gennadius, the first Director of Agriculture, by legislation. The Pasteur system of selection is now understood and practised.

Tobacco.

Tobacco, which finds a congenial soil in several parts of the island, was at one time grown, and the leaf acquired a good reputation in the Levant, but owing to fiscal restrictions the cultivation has been practically stamped out. About 150 tons of Turkish tobacco are imported annually, representing a value of from £12,000 to £14,000. The revival of cultivation, and consequent saving to the island of the money expended, has been advocated by the Directors of Agriculture. Cyprus cigarettes are beginning to find favour in England, but they are not of tobacco grown in Cyprus any more than Egyptian cigarettes are of tobacco grown in Egypt. Both are of imported Turkish, or now Greek, tobacco. A fresh experiment in tobacco-growing is now being made by an enterprising resident, and we must hope that it will be successful.

Amongst other products capable of greatly extended cultivation are sesame, linseed, and aniseed, of which articles, after satisfying local needs, there is an export valued at about £6,000. Plants used for extraction of essential oil can be grown on a large scale. Besides these, the chestnut, pistaccio, castor oil, peanut, coriander, cumin, and pyrethrum deserve more attention. The exportation of fruits, now valued at over £4,000, can be very largely increased. Fruit culture, like other industries, is very backward. Any advance in the main branches of agriculture should stimulate a corresponding increase in the smaller products of the farmer's industry. In market gardening, poultry keeping, and dairy produce there is much need of development. Native cows are not milked. Cheese is made from the milk of goats and sheep. No butter is made by natives.

Cyprus bees are renowned in Europe and America. A fair amount of honey is produced. The output could be greatly increased.

The Future.

As regards the future, the outlook is hopeful. There can be little doubt that, although Cyprus can hardly attain to the exceptional wealth which it enjoyed at particular epochs, it should reach a position of comparative prosperity. I am assuming that it will remain a British possession. For the moment a new state of unrest and uncertainty may retard progress. It is manifest that regeneration must be sought in agricultural reform.

The most vital problem is unquestionably that of irrigation. As the outcome of the policy of progressive development inaugurated by Mr. Chamberlain, several storage reservoirs were constructed in the island. Financially, the results have not been satisfactory. The villagers have shown indifference, and have been too apt to say, "If it rains we don't want them, and if it doesn't rain there is no water in them." If, as seems the case, storage works will not be carried out elsewhere, and the immense volumes of water which the winter torrents bring continue to run to waste in the sea, water must be raised from beneath the surface. Should these means fail, and, indeed, in any event, the next course is to increase the water supply from wells by native methods, by water-wheels, by air-motors, and other suitable lifts. A great increase of all water-raising appliances is needed, and here again we touch the weak point. For all these needs the introduction of capital is absolutely necessary. The people must be helped by loans.

Agricultural Problems.

Next to the vital question of irrigation comes that of reforming the present condition of husbandry. Circumspection cannot, of course, be too strongly insisted on in the matter of innovations. Experts are often described as a dangerous class, but it is more to the purpose to insist on the fact that little can be done for progress except by expenditure along lines laid down by competent scientific advisers. Reform is called for all round, and the process of bringing home to the villager the knowledge required will involve an increase of staff of the still undermanned Agricultural Department.

If, again, any progress is to be achieved in the near future, the emancipation of the rural population from the money-lender must proceed *pari passu* with other efforts. Money at a low rate of interest must reach the fairly solvent members of the agricultural community, both for the liquidation of their debts and for application to reproductive purposes.

If I may venture to express an opinion, it is that in the principal problems affecting agriculture the advice of reliable experts should be more courageously and liberally followed out to definite ends and conclusions, under a systematic and consistent policy. Experimental work must have full and fair trial. In the past, methods have been somewhat haphazard and unsystematic, and unaccompanied by the scientific registration of observations and facts. Greater provision should be made for practical demonstrations to villagers. The Government has had the advice of experts as regards water supply, the forests, vines and wine, cotton, sanitation, and other matters, but the results seem to be disappointing, and to bear out the opinion of Mr. Chamberlain that we have not done for Cyprus all that we ought to have done.

A wise, strict, and consistent forest policy should be supported. Having regard to the paramount importance of the forests, there should be no flinching in the matter of goats. Reafforestation should be pushed on. There should be more experimental work and better provision for the registration of careful observations, as advocated by Mr. Hutchins.

Finally, a tourist trade might be developed with great advantage as a means of attracting foreign gold. It is not beneath the dignity of Government and of municipalities to aid in this work, as has been done in Belgium and some other countries. Attractive tours could be arranged in all parts of the island. Thousands who go to Egypt, and proceed to Palestine, Greece, and Constantinople, should visit the island, now carefully shunned.

Reuter's Agency learns that the official Roumanian journal, just received from Bucharest, announces that the Roumanian Government has decided to stop all traffic to or from Bulgaria.

Turkey and the War.

U.S. Consular Reports.

We reproduce to-day further extracts from the U.S. Consular reports from Turkish vilayets.

II.—BEYRUT.

The calendar year 1914 was the most disastrous for business that Syria in general has experienced for many years. The value of the imports decreased from £4,078,140 in 1913 to £1,762,135 for 1914, and the exports from £1,572,734 to £401,025.

Cotton Goods.

Although the year 1914 opened with an overstocked market in textiles (which constitute 40 per cent. of Beyrut's imports), in the early months of the year there were large imports of cotton goods, which amounted, in fact, to an excess over the previous year of nearly 3,000 tons. There was also a large increase in the importation of crockery and earthenware, owing to a great quantity of cheap and inferior goods of these classes having been dumped upon this market. As regards other lines of goods there was a general falling off in quantities and values. The stock of coal was allowed to become so depleted that the supplies were practically used up in May of the current year. In consequence of the lack of coal the gasworks closed down early in the autumn of 1914, and have not since reopened, while railway operation has been restricted to the movement of troops and supplies.

There was a large decrease in the imports of petroleum during 1914 compared with 1913. The stocks on hand in Beyrut were being speedily cornered by a syndicate at the beginning of the war, and therefore the inhabitants have been obliged to pay greatly increased prices for this necessary article. While good kerosene was being sold at 20 cents per gallon just before, and for a few days after the war broke out, in May, 1915, the price was 75 cents per gallon.

Exports.

The export trade in handmade Syrian lace, which at one time amounted to nearly £400,000 per annum, has disappeared, and there are no signs of its revival. The silk industry, which for many years has been the leading source of livelihood for many people in Beirut and its vicinity, is also in a bad way. There was great difficulty in marketing the 1914 crop owing to the disturbance in banking and transportation facilities, and the same conditions will affect this year's output. The current year's crop is a small one, and the prices that the merchants can afford to pay the peasants for their cocoons are but one-quarter those paid in May of last year. In fact, the merchants who are buying up and stocking away the raw silk are running a great risk, as at present it is impossible to ship any goods out of Syria by sea.

The 1914 wheat crop of Syria was an excellent one, estimated at 422,000 tons. In normal times about 80 per cent. of the Syrian wheat crops are exported, mostly through the ports of Haifa, Tripoli, and Latakia the remaining 20 per cent. being sufficient for local consumption. At the outbreak of war, however, the exportation of wheat was prohibited and all of the surplus stocks have been held in Syria.

Owing to the difficulties in the way of transporting goods, and especially wheat, from the interior to the seacoast, such as the lack of freight trains which can not be operated on account of the lack of coal for the railways, and further to the lack of transport animals caused by the general commandeering of animals for army use, it has been difficult to get wheat transported from the interior to the coast; and the result is a most serious shortage of wheat and flour in Beyrut.

III.—MERSINA.

The consular district of Mersina includes the entire Province of Adana, the Sanjak of Cæsarea, Province of Angora, and the greater part of the Province of Konia. The Anatolian Railroad has, however, diverted all trade from Konia to Constantinople, and Adana is the port of the district of that name on the Mediterranean. Practically, therefore, Mersina is only the port for the Province of Adana and to some extent for Cæsarea.

The Adana Province has an area of about 20,000 square miles. The topography of the Province is varied. The Cilician Plain, which is cultivated with cotton and cereals, is the principal feature. There is also a vast mountainous district, the Taurus and Amanus Mountains, which contains large and valuable forests of pitch-pine and other woods and deposits of chrome, copper, iron, and lignite. A number of industries have also sprung up to utilize these various products. Flour mills (some of which are equipped with modern roller-process machinery), cotton-ginning plants, spinning mills, and other industrial establishments.

Mersina-Adana Railroad.

The Province has had a rapid development of late because of improved transportation facilities. The Mersina-Adana Railroad has been practically reconstructed and equipped with much new rolling stock. It connects with the new Baghdad Railroad, which will link Mersina with Constantinople and the Persian Gulf as opposite termini. The transportation of merchandise by camel to various points beyond the railroads still continues on a large scale. While a large part of the Cilician plain is under cultivation, vast tracts of swamp land can be reclaimed, and a system of irrigation would greatly improve the cotton culture. Plans to this end are being considered for execution in the near future. An extensive system of irrigation has just been put into operation on the plain of Konia, and the productivity of over 2,000 square miles of valuable farm land has been greatly increased. The works were constructed by a German company.

The farmers of the Adana plain have been more enterprising than those of other parts of Turkey in regard to the use of modern agricultural implements and machinery. The wooden plough has largely been superseded by steel ploughs; they are mostly of German manufacture. A large number of steam ploughing and thrashing machines are also in use, principally of British origin. American reapers, however, enjoy a practical monopoly both in Adana and Konia. Apart from private initiative the Government Agricultural Bank and schools of agriculture have done much to extend the use of all such modern implements.

Crops.

The cereal crops failed to come up to expectations last year both as regards quantity and quality. The heavy rains in May and June spoiled crops everywhere in the Province. This was especially true in the fertile district of Djihan, where wheat had to be sold at a price 30 to 40 per cent. below normal. Very few exports of cereals were made, because of the prohibition of same after August 1. Many shipments to other parts of the Ottoman Empire were, however, made prior to November 1, but the stocks left were more than sufficient for local use.

The following is an estimate, in tons, of the principal crops and the quantities exported: Barley, yield, 9,000; exports, 900; oats, yield, 3,500; exports, 1,500, wheat, yield, 19,000; exports, 1,800.

The yield of sesame seed was good and totalled about 4,000 tons, of which 2,500 tons were exported.

The cotton crop of 1914 reached a total of 115,000 bales, but owing to the outbreak of the war and local measures exports were few until February of 1915. The total exports in 1914 did not exceed 40,000 bales, of which the greater part consisted of the remainder of the 1913 crop. The ginning and pressing of the entire crop is done locally.

There are four cotton-spinning mills in this Province, with a total of 42,000 spindles. Their activity was somewhat restricted last year, but was increased early in 1915. During the latter half of 1914 only 406,700 pounds of yarn were produced, while in the same period of 1913 the production amounted to 1,053,000 pounds. This is only one-third of the capacity of the mills. There are also two cottonseed oil mills in Mersina, having a total capacity of over 300 tons per month. Only one of these mills was in operation in 1914, and then only for short periods. A large part of the local yield of cottonseed is usually exported to Great Britain, but the outbreak of the war prevented such shipments.

Owing to the lack of transportation facilities only small quantities of gum tragacanth and yellow berries for dyeing were brought from the interior. Only about 35 tons of the gum were exported in 1914. Wool shipments in 1914 only totalled £1,840. In 1913 they amounted to £9,109 and in 1912 to £16,918.

Wholesale Business.

The wholesale business of this district is largely in the hands of a few merchants and exporters in Mersina and Adana. Most of these have small unpretentious offices, which give no idea of the volume of business they transact. Imports are usually made only in sufficient quantity to meet the current demands, and goods are delivered immediately upon arrival to the retailers. The retail business is done principally in small booths in the bazaars of the towns. There are, however, a number of large stores, and a department store was recently opened in Adana. Payment for imports is generally made through local banks, which hold the shipping documents at the arrival of the merchandise. Foreign credits are exceptional, but are allowed to well-known firms and for goods which must be sold on instalment payments, such as machinery.

Even before the breaking out of the European war conditions in Mersina were depressed, owing to the financial stringency which followed the Balkan wars. The European war, however, stopped all credits and advances on merchandise by banks. The regular rate of interest became 9 per cent., but was actually much higher, and continued so. Banking business was confined principally to liquidating outstanding debts, and in most cases this was accomplished despite the moratorium through the acceptance of payment in kind. Orders for merchandise from abroad were either cancelled or could not be shipped. The export trade suffered. For a long time there was no demand abroad for cotton, the principal local product, and the military authorities prohibited the exportation of cereals after August 1.

The general decline in trade is indicated by the following figures: The value of the imports for the months of July to December, 1913, was £401,792, while for the same months in 1914 their value decreased to £68.104. The exports for the last six months of 1913 were valued at £411,924, compared with £197,225 for the same period in 1914.

While surface conditions are not promising for the future, yet it can be safely stated that as soon as the war is over this part of Turkey will quickly recover from its effects. There is abundant cash among the farmers, who sold their cotton at fair prices and were protected by the moratorium from immediate payment of their debts. Stocks of merchandise, particularly foodstuffs, hardware, and cotton goods have been or will soon be depleted, and will require replenishing. While merchants were hit hard at the outbreak of the war, they have more than recouped their initial losses by the rise in price of their stocks.

An interesting experiment is being made in the Sudan in regard to the abatement of the mosquito nuisance, says the *Egyptian Gazette*. Some time ago investigations were carried on for the purpose of studying the shellfish of the White Nile and some of its tributaries, with a view to obtaining a species which would be of value in controlling mosquitoes on artificially irrigated farms. Haplochilus marni Stdr. was selected as being the most promising species met with, and some 2,000 living specimens of this fish have been placed in water channels on the Zeidab estate of the Sudan Plantations Syndicate, to ascertain whether it can establish itself under the conditions which prevail there. News as to the result is awaited with a certain amount of interest.

Engineering Notes.

Electric Pumps.

Electric pumping outfits for suburban and country houses, as well as for factories, warehouses ,etc., have many advantages over other kinds of water lifts, for they require only occasional attention, are quickly installed, and cost from 3d. to 6d. per 1,000 gallons to operate. With an automatic pressure controller an electric pump starts and stops itself when necessary, keeping water on supply at all times at a constant pressure and requiring only an occasional oiling. The smallest sizes of an American design are belt-driven, while other types of varying capacity are connected direct by worm and gearing, by back gears, or by silent chain to a motor on the same base. A very convenient pump, however, for country houses, where the water supply is continuous and cannot be met by the smaller outfits, is a geared-power pump. This can be run by an oil engine, electricity, or by line shafting, to which barn or other light machinery can also be connected. In this type of outfit both pump and electric, or oil, motor are mounted on the same base and connected through a line of machine-cut gears. It will pump about 900 gallons per hour with a motor of 1 h.p., or 1,200 to 1,800 gallons of water per hour with a larger pump and a 2-h.p. electric motor or oil engine.

The Steam Meter.

In the East, where the price of coal is three, and often four, times as much as in England, any means or instrument that can successfully facilitate control in the use of coal or any other steam-producing fuel, and also record the flow of steam over a given period of time, is now more than ever a matter of great interest to engineers and steam-power users. Several devices for that purpose have from time to time been brought out, but for one reason or another most of them have lacked efficiency. Some, however, of Continental and American origin that have been introduced in the East have met with apparently fair success, but it is a remarkable fact that the new steam meters which are now obtainable in the British market are not better known, and more adequately brought to the notice of power users in those regions. For they are superior in efficiency, and are better able to meet the requirements of factory owners in the East. By the use of the steam meter the amount of steam produced can be seen at once, also the amount that is used for other purposes than engine-driving, and the amount that is wasted through carelessness or imperfect covering of the steam pipes. With the aid of this meter steam can be sold to an adjoining factory without risk of dispute, for it measures the steam with the same certainty as coal gas is measured by the gas meter. The meter is especially valuable when charges have to be adjusted between several departments of a factory using steam from the same boiler-house. The steam meter records the flow of steam along any pipe by means of a pencil line on a chart giving the volume that has passed within a fixed period. Only one opening has to be made in a steam pipe to connect the meter; and, in a design that we have in view, this opening admits a plug through which pass two small tubes bent at right angles at the end, one facing the steam current and the other pointing in the opposite direction. These pipes continue to the instrument, and the difference of pressure within them furnishes the power that controls the meter. The connection is so easy to make and break that the meter may be moved from one department to another in a very short time.

Mine-Laying Submarines.

Every ounce of ability in the German Empire, says the naval critic, Mr. Archibald Hurd, is being utilised in the hope of gaining victory. The dictum is quite correct, although, unfortunately, German Kultur and technical ability prove to be rather more weighty in the invention of weapons and methods of aggressive warfare. Having seen the practical failure of submarine piracy, the Germans have now inaugurated a fresh policy with a new type of submarine, which is practically another agent of outrage. It is built to lay mines, and not, apparently, to discharge torpedoes. Ships of this class are now busily engaged in trying to destroy British as well as neutral ships, for there can be no discrimination. These new submarines have a specially constructed airtight chamber into which the mines are placed ready to be sown. The mines are rather smaller than those hitherto used, but, nevertheless, are sufficiently destructive. When the preparations have been completed and the submarine has reached the desired spot, the air-and-water-tight door from the hull of the submarine leading to this chamber is shut and another trapdoor is opened, flooding the chamber. The mines, by mechanical means, are then released. In this manner an area of water can be rendered perilous to shipping. Only chance will reveal the lurking danger. Each mine, when it is put into the chamber, rests on a series of "fingers" of steel, which may be compared to the fingers of the human hand; a hawser is fixed at one end of the mine, and at the other to the base of the "fingers"—which is in the relation of the wrist to the hand. The mine goes down in the water with the ingeniously constructed "sinker," as it is called. As it descends a mechanism is set in motion and the mine, which is much lighter than the water, is released from the "fingers" and rises to the surface. Meantime the "sinker" turns over, with the fingers pointing downwards; it thus reaches the bottom of the channel. The mine is set like a time-fuse shell, and when it has attained the required distance from the surface of the water it is checked by a kind of grip. The more the mine tugs to rise the more firmly it is held. But that is not all. Its struggle puts pressure on the hawser where it is fixed to the "sinker," and the "fingers" are made to claw fiercely to the bottom of the channel. The mine-laying submarine creeps along, on or under the water, as circumstances suggest, and her progress, at night in particular, cannot be easily detected.

Near East Markets.

COTTON MARKET.

Liverpool. Thursday Night.

Messrs. Reynolds and Gibson telegraph:—The market has been quiet this week, and only a moderate business is reported. Quotations show a decline of five points, except for Uppers, which are unchanged. The sales which include 300 bales Sudan cotton, are estimated at 2,700 bales.

Manchester.

Although the volume of trade has been restricted here this week, prices have been very steady, chiefly owing to increased cost of production and the steadiness of raw material. The demand from India for cloth has been on a smaller scale, especially from Calcutta and Bombay.

EGYPTIAN COTTON.

Reuter's Agency reports from Cairo that the "Monthly Bulletin" of the Ministry of Agriculture, dated November 1, shows that there is no change in the condition of the cotton crop as compared with the previous "Bulletin" of a month ago, the crop in Lower Egypt being 7 per cent., and that in Upper Egypt 1 per cent. below the average. The weather was favourable, though cold and damp, especially at night, with a certain amount of morning fogs. The water supply was ample. The pink boll worm continues its ravages, and practically all the remaining bolls in Lower Egypt are now attacked. In Upper Egypt attacks from both species of boll worm are still prevalent, more particularly in Fayoum. Specially satisfactory results of the second picking were obtained in Assiut and Girga. In Lower Egypt, however, this picking only gave cotton of inferior quality. With the exception of Giza, the gathering of the crop in Upper Egypt is nearly finished. The law for the destruction of remaining bolls on cotton is being rigorously enforced with a view to the more complete reduction of the infesting boll worms.

PRODUCE REPORT.

Currants. London, November 18.

The market has been, comparatively, quiet this past week, and prices are steady with the exception of better grades, which are a little easier. The political crisis in Greece will, undoubtedly, affect the market, and already prices there are dearer than in England. The market in Liverpool is quiet at late rates.

Sultanas.

With the arrival of some Afghan and Cretan fruit the market has been a little more active. Greek sultanas are almost scarce and dearer. It is noticeable that Cretan fruit receives better attention this year, and although it reaches this market in comparatively only small quantities, sells freely and at satisfactory prices.

Seeds.

Linseed is firm, but inactive, and favouring sellers. Calcutta to London, spot 67s.; Oct.-Nov. and Nov.-Dec., 67s. Bombay, Nov.-Dec., 68s. 9d. La Plata ditto, 64s. Cotton-seed is quiet and rather easier, Egyptian to London, November, is quoted £11 13s. 9d. per ton. East African, in Liverpool market, is quoted £7 15s. to £8 per ton, nominal, quay terms. Rapeseed is very firm; brown Cawnpore, Nov.-Dec., pure basis, 59s.; yellow Gugerat ditto, 55s. 6d.

Oils.

Linseed oil is very firm, but quiet. Spot pipes quoted £33 2s. 6d., barrels ditto £33 17s. 6d.; landed Nov.-Dec., £33 12s. 6d.; Jan.-April, £34 17s. 6d.; May-Aug., £35 15s. Rape oil is steady. Refined English in barrels on spot, £41 to £42; ordinary brown naked spot, £39. Cotton oil is firm, but quiet. Crude spot pipes, £33 15s. to £34; refined pale pipes, £35 10s.; and barrels sweet, £39 to £41, as to make. Olive oil is firm; spot Levant or Spanish, £52 per ton, ex store.

Locust Beans.

There is still a great scarcity, and needy buyers are compelled to pay the full price of £8 5s. for whole and £8 15s. for kibbled. In Liverpool Cypros locust beans are quoted £7 5s., ex quay, net terms.

TURKISH LICORICE ROOT EXPORTS.

At the monthly council meeting of the Liverpool Chamber of Commerce, held on the 2nd inst., the question of Turkish licorice root exports was discussed, and, at the request of the London Chamber of Commerce and members interested in the trade, the Chamber addressed the following communication to the Foreign Office, viz.:—

"Liverpool, October 14, 1915.

"The attention of the Chamber has been called by members to the serious diminution in the supply of licorice that is bound to result from the inability of British importers to obtain from Turkey large supplies of the article bought and paid for before the outbreak of the war. These supplies are still in Turkish territory. The Chamber understands that the Board of Trade in December, 1914, informed importers that there was no objection at that time to their obtaining from Turkey and shipping either to this country or America licorice root and extract which was their property, and had been paid for before the declaration of war with Turkey. As this is now apparently impossible, owing to the blockade of the coast of Turkey by the British and French navies, the Chamber respectfully asks that his Majesty's Government may see their way to suggest to the French Government, as well as to the British Admiralty, the necessity and advisability of allowing the export of the article by sea in neutral bottoms should an opportunity of so doing ever arise."

CYPRUS OLIVE STONES.

The High Commissioner of Cyprus reports that some 2,000 to 3,000 tons of olive stones, together with all the residue of the olive after pressing, valued at from 20 to 25 francs per ton, are exported annually from Cyprus to the Piræus for crushing. In this way some 8 to 10 per cent. additional oil is extracted which is used in the manufacture of soap, whilst the residue is used for fuel purposes. In Cyprus olive stones have been used as food for pigs, as fuel, and often as manure.

THE WATER HYACINTH.

The Egyptian Ministry of Agriculture issues the following circular:—In the Mahmûdia and a few other canals the introduction of a water plant with a blue flower called the "water hyacinth" has been noticed. This plant, which caused the stoppage of certain river ways in America and cost the American Government a large sum to remove, is in danger of spreading, and should be destroyed wherever seen. It is also found in private garden ponds, where it is frequently grown for its handsome flower. It should be destroyed here also. If canals are not cleaned of this weed, their flow may be seriously interfered with and the cultivation of crops will suffer.

visional deposit equal to 2 per cent., or a bank guarantee of 10 per cent., of the value of the offer must accompany each tender. A copy of each of the specifications and conditions of tender may be consulted by United Kingdom exporters of the materials mentioned at the Commercial Intelligence Branch of the Board of trade, 73, Basinghall Street, London, E.C.

Tenders are invited by the Egyptian Ministry of the Interior for the supply of equipment and clothing required by the Stores Department during 1916, including the following:—Bandoliers, belts, bayonet frogs, ammunition pouches, cartridges, and other accoutrements; brushes; bits, bridles, chains, collars, reins and other horse and camel equipment; camp equipment; bedsteads, chairs, cupboards, tables, and other furniture; tools; calico, canvas, uniform cloth and other textile materials; leather; oils; paints; boots; breeches, jackets, shirts, tunics, trousers, and other clothing. Copies of the specifications, with forms of tender, etc., may be obtained, at a cost of 2s. per copy, from the office of Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Broadway, Westminster, London, S.W. Sealed tenders, on the proper form, will be received up to noon on December 1, by the Under-Secretary of State (Personnel and Equipment Department), Ministry of the Interior, Cairo.

Tenders are invited by the Director-General, Coast Guard Administration, Cairo, for the supply of coal, petroleum, and benzine required by the Service during the year 1916. Specification may be seen and all information obtained at the Coast Guard Magazine, Arsenal, Alexandria, or at the Coast Guard offices at Port Said, Ismailia, Suez, and Damietta. Date, December 1.

Tenders are invited by the Egyptian State Railways and Telegraphs Department for the supply of 20,000 oak sleepers and 101,300 pine sleepers. The sleepers must be of very good quality wood, and preferably of one of the following species:—European and Japanese oak, Montenegrin, Swedish and Norwegian and Baltic red pine or any other species of oak or pine of equal quality. In default, tenders for sleepers of any other quality of wood coming from Japan, America, India, or Australia, would be taken into consideration. Copies of the specification, containing form of tender and form of bank guarantee, may be purchased, price 2s. each, from Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Broadway, Westminster, London, S.W. Sealed tenders, on the proper forms, will be received up to 10 a.m. on December 15, by the General Manager, Egyptian State Railways and Telegraphs, Cairo.

Cyprus.

An import and export firm in Cyprus, with branches in Alexandria, Port Said, and Cairo, is desirous of representing Canadian exporters, in Cyprus and Egypt, upon a commission basis. Articles specially suggested are wheat, flour, barley, roofing and flooring lumber, and leather. For further information application should be made to the Canadian Trade Commissioner's Office, Portland House, Basinghall Street, London, E.C.

Tenders are invited for the supply of articles required for use in the Central Prison and for the prisons and police at Larnaca, Limassol, Paphos, Kyrenia, and Famagusta, for the half-year ending June 30, 1916. All tenders should be sealed, and should be addressed to the President of the Tender Board, the Office of the Treasurer, Nicasia. They should be marked "Tender for Central Prison or District Prison and Police of Larnaca, Limassol, Paphos, Kyrenia, and Famagusta," as the case may be, in the left hand top corner of the envelope, and should reach the office of the treasurer not later than December 1. All details regarding the articles to be supplied can be obtained from the Resident Superintendent, to Central Prison, and Local Commandants of respective districts.

Egypt's Trade in September.

(From Our Own Correspondent.)

Cairo, October 23.

The Customs Bulletin for September shows that the satisfactory state of affairs referred to last month is continuing. Imports during the month amounted to £E1,782,948 and exports to £E1,273,184, as against £E936,275 and £E373,614, respectively, in August last year, i.e., there was an improvement of £E846,673 in the former and of £E899,570 in the latter. The nine months total gives a net decrease of £E5,550,098 in imports (from £E18,782,432 to £E13,232,334) and of £E549,446 in exports (from £E16,871,509 to £E17,420,955).

As mentioned last month, however, the comparison with any of the months since the war, while it, of course, shows whether any recovery is being made, does not of itself convey an accurate idea of real trade position. For this purpose it is necessary to make a comparison with a normal year, say 1913. If, therefore, we take the figures at the end of September of that year we find, that whilst imports for 1915 have fallen off by £E6,493,364, exports have only dropped by £E790,232. The trade position of the country may under these circumstances be considered as very satisfactory.

During the month the principal imports were frozen and preserved meat £E41,650, of which £E30,372 came from Australia, cereals £E114,500, coffee £E28,358, petroleum £E25,751, and mineral oil £E15,132—of these two the United States sent £E32,029—coal £E256,392; a further increase in quantity—natural indigo £E10,026—all from India—textiles £E630,293, and worked iron and steel £E66,666.

Suspicious Imports.

It is interesting to note that Denmark and Holland appear among the exporters to Egypt of beer, and that Norway and Holland similarly figure for packing-paper and cardboard. The amounts in question are, it is true, not large, but the facts are significant. In 1914, Denmark and Holland did, for all practical purposes, no trade in beer with this country, whilst the share of Norway and Holland of the total imports of packing-paper and cardboard was under 10 per cent. On the other hand, Germany and Austria supplied between them 50 per cent. and 38 per cent., respectively, of these categories, and under the circumstances one is, I think, justified in wondering whether the Austro-German industry is not finding an indirect outlet for these—and perhaps other commodities—through the countries in question.

The chief exports during the month were eggs £E4,142, livestock £E20,961, skins and tanned goods £E31,869, cereals £E182,639, cotton seed £E99,563, sugar £E23,140, cotton £E766,556, wool £E17,653, gold and silver goods £E44,781, and cigarettes £E25,389.

Cotton exports for the nine months have fallen by £E2,860,442, by comparison with those of the corresponding period in 1913, although the quantity is some 700,000 cantars more. This is due to the comparatively low prices ruling during the early part of the year, but thanks to the country's productivity the net decrease in exports is as already mentioned, only £E790,232. The following gives an idea of the impetus that has been given to the country's export trade. Compared with the corresponding period of 1913, eggs have increased by £E172,930, skins by £E56,825, cereals by £E948,557, sugar by £E408,871, wool by £E98,807, and gold and silver articles by £E510,410 at the end of September this year. If, moreover, we take note of the fact that during the same period the imports of cereals, and that category diminished by £E1,896,216 (from £E3,015,828 in 1913), we cannot help coming to the conclusion that the economic condition of the people has undergone an enormous improvement.

Of the total imports of £E1,782,948, the British Empire sent £E1,059,028 or 59 per cent., of which £E856,750 came from England; Italy was the next largest exporter with £E174,911. Of the exports, the United Kingdom took £E613,876 or 48 per cent. (£E380,542 cotton, £E98,030 cottonseed, the whole of the wool export, and £E55,748 cereals), Italy and France were both large buyers of cereals, the former for £E83,228, and the latter for £E36,495, whilst Russia purchased but one item—cotton for £E78,329.

During September the trade turnover between Egypt and the Sudan amounted to £E133,338. The imports into the Sudan from Egypt—£E95,185—included cereals £E9,027, sugar £E21,028, cotton tissues £E24,954, and tobacco £E7,429. On the other hand, the imports thence into Egypt, which came to £E38,153, included cattle £E17,704, cereals £E5,622, and cotton £E1,975.

NEWS FROM ALL SOURCES.

It is officially announced by the Postmaster-General that the parcel post to Serbia is suspended.

Mr. W. Gordon Campbell, of the Standard Oil Company of New York, is in Athens, where his firm have established large main offices for the Levant at Pluton and Kapnikarea Streets, No. 1.

The directors of the National Debt announce that the payment of the coupons of redeemed Bulgarian loans will be made only in Sofia, Berlin, Hamburg, Vienna, and Budapest. Payment in all other places is postponed, says a Reuter message from Amsterdam.

Cotton exports from Egypt to Russia have usually been shipped from Alexandria to Odessa, but owing to the war zone changes have had to be introduced. Thus recently a shipment of 4,000 bales of cotton left Alexandria, via the Suez Canal for Vladivostock, whence it will be carried.

According to a telegram to the *Echo de Paris* from Salonika, the Greek Budget for 1915 will show a deficit of £14,300,000.

According to the returns issued by the Roumanian State Railway authorities, which deal with the financial year 1913-14, the number of locomotives fitted with oil-burning apparatus up to the end of March last year was 751, out of a total of 873 locomotives. The quantity of residue (oil fuel) consumed during the year under review amounted to approximately 108,000 tons, says *Petroleum World*.

COMMERCE IN TURKEY.

(From Our Special Correspondent.)

Athens, November 5.

The announcement that the Turkish authorities are laying their hands on all the cotton in the Adana district is indicative of the expectation that direct communication between Germany and Constantinople will soon be established. In fact, the Turkish papers are commenting on the political and commercial importance of this through communication between Turkey and the Central Powers, and point out the advantage to Germany in being able to avail herself of the resources of Asia Minor such as copper, cotton, grain, etc., and the benefit which will likewise accrue to Turkey in her ability to import Austrian and German products including munitions of war.

Crop Exports.

The grain crops of Asia Minor are, however, only barely sufficient to meet Turkey's own requirements, and she is not likely to be able to spare any grain for export. The crops were reported good, but the actual yield has been much diminished owing to the primitive harvesting methods and the want of labour.

The exportation of sheepswool is prohibited, and all is bought up, or, more correctly speaking, requisitioned by the Government. An exception has been made in the case of a brother-in-law of Enver and the Bulgarian contractor Tufenkdjieff, who have obtained permits to export a small quantity to Germany, for which 16 piastres per kilo has been paid.

There is very little mohair on the market, barely 1,500 bales, and very small quantities come down from the interior by means of the parcels post. Good qualities have been sold at 21-22 piastres per oke.

Sheepskins are also not allowed to be exported, and prices are therefore nominal, but an Austrian officer is said to have been allowed to export 300,000 pieces.

Small lots of canaryseed come in to Rodosto from the producing districts, and find local buyers at 53-55 paras per oke.

Hazelnuts can be bought at the low price of 3 piastres per oke.

There is not much doing in opium just now, and the price remains at about 190 piastres per oke.

Dried Fruit.

Dried Fruit from the Smyrna district is finding its way in small quantities to Constantinople, and in the event of transport being available the fruit crops would doubtless be bought up by Germany and Austria when the expected communications are opened up. At present the railways are paralysed through want of coal, and have been burning mostly wood and lignite, and, as coal in large quantities is not likely to come from Germany, it is clearly of the utmost importance that coal supplies from Zoungouldak should now, more than ever, be prevented from entering the Bosphorus.

The sealing of private safes belonging to enemy foreigners in the banks appears to be a preventive measure more of the nature of an embargo than a seizure or confiscation. The banks have been told not to deliver to the subjects of Turkey's enemies any securities held by them, or to allow them to withdraw their deposits.

The special correspondent of the *Echo de Paris* at Athens says:—"The Greek Government has just bought 9,000 cases of petrol from an American company, to be delivered at the Piræus and Patras.

COMPANY NOTES.

Anglo-Egyptian Bank.

The report of the Anglo-Egyptian Bank, Limited, for the year ended August 31 states that the gross profits, after making full provision for all bad and doubtful debts, are £188,930, and, deducting the expenses, amounting to £86,631, there remains £102,299 net profit. To this must be added £77,000, the balance carried forward on August 31, 1914, making £179,299, which the directors propose should be dealt with in the following manner :—Contribution to staff provident fund, £2,555; interim dividend at 10 per cent. per annum paid, less income-tax, June 1, £25,000; dividend at 20 per cent. per annum, to be paid, less income-tax, on December 1, £50,000; amount written off investments, £26,744; bonus to staff, £5,000; provision for war contingencies, £20,000; balance carried forward, £50,000. Meeting, 23rd inst., at 3 p.m., 27, Clement's Lane, E.C.

Credit Franco-Egyptien.

The Credit Franco-Egyptien has reduced its capital from 12,500,000 frs. to 9,000,000 frs. For the amortisation of doubtful debts a sum of 5,459,448 frs. has been set aside from the profits and the capital. The net profits on the past year's working are 164,677 frs. No dividend was declared.

Societe Generale de Pressage et de Depots.

The annual general meeting of this company was held at Alexandria on October 27. The following are extracts from the report :—536,850 bales weighing 4,066,073.97 cantars were pressed, against 549,182 bales of 4,159,374.92 cantars last year. The amount cleaned was 1,222,528.14 cantars, as against 720,346.89 cantars. Profits amount to £E26,935.138, to which must be added the balance in hand from last year's account, namely, £E13,069.092. An allowance of P.T. 80 per 1,000 cantars pressed is made to the pressers, and a dividend of 7 per cent. per share is paid, leaving a balance of £E13,069.092 to be carried forward. An interim dividend of 3 per cent. was paid last March, making the total dividend for the year 10 per cent.

Oriental Gas.

The report of the Oriental Gas Company, Limited, states that while, on the one hand, the revenue account shows a gas rental lower by about 7¾ per cent. and a reduction of 18 per cent. in the yield of residual products, owing to very severe market depression, large savings have, on the other hand, been effected under the chief heads of expenditure and the item of bad debts and allowances is, in spite of war conditions, affecting all classes of consumers, lower by £614 than the corresponding figures for the preceding year. In result, the reduction in revenue has been more than counterbalanced by £75. The operations in the nature of extensions and additions properly assignable to capital expenditure have not been upon a considerable scale. So much had been done in the previous year to anticipate requirements of that nature that the comparatively light sum of £3,200 covers all the outlay which has fallen to the charge of the year under review. The whole of this outlay has been defrayed out of the revenue of the year, without recourse being had to the reserve fund. The rate of exchange has been adverse—a minor result of war conditions. The directors recommend the payment of a dividend at the usual rate of 4½ per cent., less income tax, on the 25th inst., making a total dividend of 8 per cent. for the year.

Malta and Mediterranean Gas.

The directors of the Malta and Mediterranean Gas Company, Limited, announce an interim dividend at the rate of 4 per cent per annum, free of income-tax, on the ordinary shares for the half-year, payable December 14.

Salonika, says the *Financier*, has long been an important base for the German as well as for the Austrian flag. In 1913 Greek shipping took the premier place with 879 vessels, aggregating 297,798 tons; Austria came next with 120 ships, totalling 247,638 tons; followed by France with 134,917 tons, Great Britain with 88,698 tons, and Germany with 87,908 tons. The incoming and outgoing tonnage in 1913 was 1,237,440, compared with 839,195 tons in the previous year.

COMPANY RESULTS, &c.

ANGLO-ROUMANIAN.—Production of crude oil for week ended 30th ult., 201 tons.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended October 20 amounted to £E5,727, as against £E4,703 for the corresponding period of last year.

NOTES OF THE WEEK.

With a lull on the Western front, and again on the Eastern front, save where the Russians are pressing back the enemy from dangerous points, the centre of gravity of the war has for the moment been shifted to the Near East. A variety of causes may help to keep it there for months to come. Early in the war the advantages of an advance through Hungarian territory up the Theiss Valley and the Danube were pointed out in these columns. The enterprise would at that time have had to be left exclusively to the Balkan States, whose co-operation the Allies could have had, if they had desired it. The opportunity passed, because the value of the military support of the Balkans was not appreciated, and because they were looked upon as merely cantankerous people with exalted ideas of their own importance. Now, sixteen months after the outbreak of war, the Austro-German combination has seen fit to strike at the Entente Powers from the very point which the latter ought to have threatened. The enemy's flank is protected by Bulgaria and Turkey, while Roumania has been isolated. The Allies have no alternative to accepting the enemy's challenge, but they start with all the disadvantages of a single port of entry and a railway line of limited capacity.

The Allies have established the principle that they can break through in the West when they will. But the effort has proved to be costly, and—*pace* the frontal-attack school, which affects to believe that if a sufficient number of heads are run against a brick wall, it must give way—there would seem to be little justification for making the sacrifices entailed, so long as a third line of advance remains open and untried. In hammering away in France and Flanders the Entente Powers have failed to mobilise their sea power to the fullest extent. While Germany's railway system gives her undoubted advantages in rapidity of movement, the Allies' command of the sea enables them to concentrate their strength, within certain limitations, at any point on the seaboard of Europe. Germany's thrust towards the Ægean has drawn attention to a factor which the Allies had almost allowed themselves to lose sight of. Even Italy has hitherto set her face against an expedition oversea, and has been content, while making wonderful progress against unprecedented difficulties, to exercise the minimum effect on the course of the war, viewed as a whole, in return for a maximum effort. Before a co-ordinated advance of the Italians from the Adriatic, the British and French from the Ægean, and the Russians, with or without the Roumanians, from the Black Sea, there would be no trench warfare to interpose almost interminable delays. Nowhere could the Allies' superiority in numbers be used to greater effect than in recovering Serbian territory and then following the movement to its logical conclusion.

The actual accomplishment of the plan will naturally present more difficulties than the mere recital of it. We have already indicated one in the inadequacy of the Salonika railway system. There remains the political consideration involved in the attitude of Greece and Roumania. Even if the Greek problem does not solve itself in the course of the next few days, any hesitation on the part of the Hellenic Government when only a few thousand Allied troops had landed at Salonika to cope with enemy forces of half a million or more will disappear behind a screen of a million men stretching from the Adriatic to the Black Sea. As for Roumania, there is some reason to suppose that she does not want to wait for half that number before taking her place on the side of the Quadruple Entente. When once the enemy's thrust has been contained—and we shall hope to hear that this stage has shortly been reached—the work of co-ordinating the movements of the three expeditions could be begun.

The prospect of a winter campaign in the Balkans is not attractive, but the actual experience can be shorn of most of its terrors if adequate preparation be made beforehand. Climatic conditions will resemble those experienced during the winter in Russia, and the clothing of the troops will have to be modified accordingly. Caps with ear-lappets must be warmer than any worn at present; gloves must give place to lined gauntlets; overcoats cannot be too thick or too warm. Anyone with experience of a winter in Macedonia, where there will be no coal to be found, and the country has been denuded of forests, will be able to suggest a variety of elementary precautions which will make all the difference to the efficiency of any troops operating in it.

The negotiations between the Allies and Greece are dealt with elsewhere in this issue. Here we need only recapitulate the sequence of events. Nothing seems to have marred the popularity of M. Cochin's visit to Athens. He had his audience of King Constantine, and on his subsequent return to the capital, after a visit to Salonika, he is reported to have lunched *en famille* at the Palace. But his mission so far failed in its object as to necessitate the issue of a *communiqué* from the British Legation at Athens announcing the imposition of disabilities on Greek commerce and shipping. The very next day, on November 20, Lord Kitchener arrived in Athens. His visit was limited to one day; but he had an audience of the King and met the Prime Minister, M. Skouloudis. Even after his departure Greek merchandise continued to be subjected to search at sea, but as the result of a favourable reply to the Allies' demand these measures are understood to have been considerably relaxed. All information emanating from Athens is optimistic, and adumbrates an early return to normal relations between Greece and the Allied Powers. If it be correct that the latter's demands are limited to a clear undertaking on Greece's part that she will not seek to interfere with the Allied troops on their way to or from Serbia, little wonder that the Greek Government itself should be surprised to find how little the Allies require of Greece.

M. Venizelos and his party have resolved to withdraw from the Greek Chamber and not to contest the forthcoming elections. The decision is not one that will meet with ready approval among those outside the country who are friendly to Greece and admirers of M. Venizelos. In an interesting letter to *The Times* Mr. Swift MacNeill recalls precedents in British history which tend to show that such withdrawals have proved to be a mistaken policy, and he argues that the doctrine will be confirmed in the case of M. Venizelos. Time alone will show. Present conditions in Greece have several points of difference from those that obtained in the days of Fox and Grattan. On the other hand, the elections are being forced upon the country by the political opponents of M. Venizelos in the belief that they will eliminate his influence altogether from Greek politics. He runs the risk of playing into their hands; but, as he stands without a rival in Greece, he may feel confident that his opponents will be unable to profit by his temporary eclipse, and that ultimately the justification of his policy by the course of events will bring him back to power.

A delay, which it is hoped will prove a definite check, has occurred in the enemy's sweeping movement across Serbia. At a moment when it seemed as if Monastir must fall into the Bulgarians' hands, their advance stopped, and their line has remained based on Prilep. The first suggestion that consideration for Greece's susceptibilities has made the enemy chary of entering a town which would belong to Greece, if it were not Serbian, may be ruled out of court in view of the tenour of recent German representations to the Greek Government. It was not to be supposed that Germany would remain passive in the face of the Allies' diplomatic activity at Athens. Her first efforts will have been directed towards the internment of the Serbian and Allied armies, if they should be driven back on to Greek territory. Having been worsted on this point, the German and Bulgarian armies are more likely to be preparing to invade Greece than to spare a town which the Greeks hanker after in Serbia A more probable explanation of the Bulgarian halt at Prilep would be that their advance at this point had pushed ahead of the rest of the enemy line, and would need to be arrested to give the other forces time to make good on their own fronts. Possibly, however, the steady increase in the number of Allied troops landing at Salonika is introducing in the situation in the Balkans a new factor enjoining caution on the invaders of Serbia. The Serbian northern army continues to fall back, while making the Austro-German advance difficult and costly. But Mitrovitza and Prishtina have now fallen, and the Serbian Government has withdrawn to Skutari in Albania. The road to Monastir would seem to be still open for the Serbian forces, but it must offer an exceedingly precarious route for a retreating army.

The absence of news of the Mesopotamian Expedition suggested that the force was finding the last few stages to Baghdad more arduous than some of the earlier stages. It was impossible for the expedition to leave the course of the river, and at this season of the year the current is likely to prove a serious obstacle to heavily laden steamers of a miscellaneous description. Now comes the news of a severe engagement at Ctesiphon, eighteen miles from Baghdad, on November 22. After fighting lasting all day the Turkish position was captured, together with 800 prisoners, but at a loss to the expedition estimated at 2,000 killed and wounded. On the night of the following day the enemy delivered heavy counter-attacks, which were successfully repulsed; but on November 24 want of water necessitated the retirement of our force to the river, three or four miles below the captured position. A withdrawal even for a few miles is unfortunate in such circumstances; but the confidence felt in General Nixon will enable the public to possess its soul in patience until news that the finishing touch has been put to the expedition has been received.

At the beginning of the week it seemed as if the situation in Persia had taken a definite turn for the better. The Shah and his Government had not only abandoned their intention to leave Teheran as the result of German intrigues, but had frankly accepted all the assurances given them by Russia and Great Britain. A telegraphic notification was sent to all the provinces announcing this decision and the restoration of sincerely friendly relations with Russia, while an appeal to the people confirmed the Shah's resolution to develop the old bonds of friendship uniting Russia and Persia. The *rapprochement*, moreover, evidently had the support of national sentiment. The Germans had become discredited and had evacuated Teheran.

Following hard upon this satisfactory picture comes the explanation of the unconfirmed report that the British Consul and the manager of the Imperial Bank of Persia at Shiraz had been arrested. The gendarmerie, under its Swedish officers, had risen in revolt against the Teheran Government. They arrested the members of the British colony at Shiraz on November 10. The male prisoners had been interned at Borasjun; the women had been sent under escort to Bushire. A night attack was made on Hamadan, but the Persian Cossacks in that town were able to drive off the gendarmes. As Shiraz and Hamadan are nearly five hundred miles apart, the revolt of the gendarmerie has evidently been carefully organized. The complicity of the Swedish officers, if it should be confirmed, introduces a particularly unfortunate feature, and would call for action on the part of the Swedish Government. A later message suggests that in the case of Hamadan the action of the gendarmerie was brought about by deliberately misleading information from Teheran. In September it was reported that as the wages of the gendarmerie had not been paid for several months, the head of the force, after three warnings, had proceeded to disband the force. Officers and men would seem to have fallen easy victims to German intrigues, and the money which German agents have been represented to be carrying about with them will have been expended to good purpose. It is typical of the failure of the British and Russian Governments to keep in touch with the course of events in Persia, that they should have made no attempt to secure payment for the gendarmerie, and should have given an organized force of this description the opportunity of allying itself to German emissaries and the swashbuckling Consuls whose activities in the country have been known to the world for many months.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, November 9.

Abdin Palace Improvements.

To-day is the Moslem New Year's Day. No reception has, of course, been held at the Palace, but a register has been opened for the signatures of all who wish to pay their respects to H.H. the Sultan. The precincts of the Palace had quite a busy aspect throughout the morning. Those proceeding to sign in the book, whilst they could not help reflecting upon the fact that the previous New Year had been the last occasion on which they had performed the same formality in honour of Abbas Hilmi Pasha—although at the time his deposition had been decided upon—had an opportunity, as they drove across the Square, of admiring the improvements which his successor has caused to be executed. Hitherto Abdin Palace has never given the impression of being the official residence of the ruler of the country. The building itself was imposing enough, but its approach was, to say the least, undignified. The main doors, *i.e.*, those through which the sovereign, his family, notable visitors, and high officials passed, gave in to a quadrangle, which formed part and parcel of the public square. As a result the crowds of ragamuffins who disported themselves all day in that square—for the most part careering about on bicycles with galabeas flying in the wind, and shouting at the top of their voices—invariably strayed on to what were in reality palace grounds, and turned them into a public playground. Advantage has been taken of the Sultan's long absence to change all this. The quadrangle has been separated from the public square by means of an imposing set of high railings with large gates, and a neat guard-house has been erected at the north end on the ugly vacant space that existed there before. The alteration is a credit to the good taste of the Sultan, who conceived it, and of the Public Works officials who have carried it out. Abdin Palace has now acquired a dignified appearance that brings it more into line with similar edifices in other capitals. It only remains for the somewhat squalid set of houses that fills the south-west corner of the Palace Square to be replaced by a building more in keeping with the rest for the situation of the official residence of the Sultan of Egypt to leave nothing to be desired.

The Ex-Khedive and His Coterie.

Reference to the ex-Khedive reminds me that *Al Mokattam* has just published some interesting and amusing news that has reached it concerning that personage and some of the Turco-Egyptians who accompanied, or followed, him into exile. According to that well-informed vernacular organ, Abbas Hilmi Pasha, who, despite his deposition a year ago, has clung to the title of Khedive, has tendered his resignation of that position to Sultan Mohammed V.; Moheb Pasha, the ex-Minister of Wakfs, who, albeit he owed his rapid promotion purely to the British, had prior to the outbreak of war with Turkey defected to the ex-Khedive and had been ordered to leave Egypt, is reported to be detained on suspicion at Vienna; and Yussuf Saddik Pasha, one-time unsuccessful broker in Cairo and latterly the ex-Khedive's trusted agent in all his intrigues and business deals, is now leading a gay and extravagant life in Switzerland. With regard to Abbas Hilmi Pasha, the story was that the Kaiser commissioned him to assist in preventing Italy from breaking her neutrality, and that he was so annoyed at the failure of his "protégé" that he refused to receive him when he recently visited Berlin. The ex-Khedive, piqued at this treatment, with characteristic impetuosity, sent his resignation to Stamboul. Moheb Pasha, it appears, had of late been endeavouring to get back into the good graces of England, and had begged Sir Rennell Rodd to intervene for him. Meanwhile came a summons from Vienna. Moheb, unsuspecting and still trying "to run with the hare and hold with the hound," made a bee line for the Austrian capital, where his attempted intercourse with the British Ambassador at Rome had evidently aroused suspicion, for, finding that there was nothing doing there for him, he endeavoured to leave, but was ordered to remain under supervision.

The misfortunes that have befallen Abbas Hilmi Pasha and Moheb Pasha are entirely due to their lack of all sense of proportion and their perverted characters, and there can be few who are surprised at their present position or pity them in the disappointment that must now be theirs. At the same time a certain amount of amused satisfaction is felt that while those two personages should have cast themselves so completely into the toils of the Turco-Germans, at least one member of the Khedivial coterie should have got the better of that band of arch-schemers, for Yussuf Saddik Pasha is disporting himself in Switzerland with the gold entrusted to him by the German Foreign Office for the carrying on of anti-Entente intrigues in Italy prior to the latter's intervention in the war!

The Khedivial Wakfs Scandal.

Last Tuesday saw the conclusion of the second case in connection with what is known as the "Khedivial Wakfs Scandal," which was proceeding when I despatched my last letter. The feature of the trial was the brilliant exposition by the Substitut of the Parquet of the accusations levelled at Hussein Pasha Moharrem, Ahmed Bey Saddik, and Osman Bey Moharrem, and the eloquent pleading of the lawyers for the defence. Moharrem Pasha's counsel tried to establish the omnipotence of the ex-Khedive in Wakfs and trustee matters, and the complete subservience to his will of the curators and staff, and Helbawi Bey, in the course of his pleading, created much amusement by stating that "the ex-Khedive was a man who liked thorough methods. For philosophy he employed philosophers, for agriculture he employed agriculturists, . . . and for signing documents he employed fools, amongst which latter category his client (Moharrem Pasha) stood!" The evidence, whilst it did not reveal very much more than what we already knew, certainly tended to confirm the notorious unscrupulousness of the methods adopted by the ex-Khedive and the extreme venality of the persons with whom he surrounded himself. Judgment in this case will be delivered on the 18th inst., at the same time as the verdict in the action recently brought against Ahmed Khairy Pasha, which should have been published yesterday, but has been postponed for ten days.*

Unfortunate Egyptian Institutions.

The affairs of the Egyptian University and of the Orwa-el-Woska Society, the well-known Moslem charitable and educational institution, are exciting public interest. Space prevents my going into any details to-day, but with regard to the society, I may say that the Commission of Inquiry that was appointed has sub-

* A Reuter's telegram received from Cairo last Saturday announced that Saddik Bey has been sentenced by default to eighteen months' imprisonment for misappropriation of the funds of the estate. Prince Seif-ed-Din Bey, who is in a lunatic asylum in England, and Hussein Pasha Moharrem, have been sentenced to ten months' imprisonment on the same charge. Prince Seif-ed-Din, who was formerly Under-Secretary for War, benefits by the law of respite. Evidence showed that both were tools of the Khedive, who benefited by the spoliation. Khairy Pasha has been sentenced to three months' imprisonment, with respite, for misappropriation of the funds of the Khedival wakfs when he was director-general of that department.

mitted its report, which, it is understood, imputes negligence to the managing committee. It is possible that a public inquiry may now be ordered.

Echo of the Law School Strike.

The seventeen students of the Sultania Law School who were expelled some time back under circumstances recorded in this correspondence at the time, and who were interned in the course of the political inquiry into the bomb outrage on H.H. the Sultan, were yesterday brought before the Prime Minister, who had simultaneously summoned their parents before him. Rushdi Pasha informed the students that, although their conduct had been most blameworthy, the Government had decided, on the occasion of the New Year, to forgive them and set them free. They would be allowed to accompany their parents to their villages, which they must not quit under any circumstances without official leave. As regards their readmission to the Law School, that is a question which has not yet been considered by the Government, and which may not be entertained for some time to come.

"Our Day" in Egypt.

Just as I close my letter for the mail I receive the advance figures of the collections made throughout Egypt for "Our Day," which was held on October 30 last. The total amounts to £E107,110—equals £109,857—made up as follows:—

	£E.
Governorate, Alexandria	16,609
,, Cairo	12,000
Province of Menufia	14,494
,, Sharkia	8,766
,, Assiut	8,167
,, Gharbia	7,890
,, Dakahlia	7,003
,, Minia	6,147
,, Behera	5,164
,, Fayoum	4,636
,, Giza	3,624
,, Kaliubia	3,355
,, Beni Suef	3,033
,, Girga	2,860
,, Kena	2,195
,, Assouan	477
Governorate, Suez	288
,, Damietta	201
,, Port Said	201

It is to be noted that the Cairo figures include a sum of £E3,500, which is the total of the special fund opened by H.E. Ali Zulfikar Pasha, Governor of Cairo. Small items are still coming in, and minor adjustments will have to be made before the account is finally closed; but we can say to-day that Egypt's contribution is round about £110,000, which is quite satisfactory, seeing that it is officially confirmed that no pressure whatever has been exercised upon the Egyptians to contribute. The High Commissioner, in a note circulated to the Press, expresses his great satisfaction at the generous manner in which the Egyptian population has responded to the call for funds in aid of the Red Cross Society.

THE SITUATION IN THE SUDAN.

(From a Correspondent.)

Public attention, absorbed by the critical situation in the Near East as well as in the eastern and western theatres of the war, has been but little directed to that portion of the Empire in Central Africa where, but for the continual watchfulness of the Administration, serious and far-reaching trouble might have arisen. Immediately before, and for some little time after, the outbreak of hostilities on the Continent, Khartoum, Omdurman, Suakin, and Port Sudan became so many centres of enemy activity against constituted authority. In the capital one of the most prominent citizens, of alien birth and long residence, was found to be in active correspondence with German and Austrian agents; he was promptly expelled, but there were those who declared that, rightly, he should have been shot, in compliance with the conditions of the Governor-General's Proclamation.

Failure of Enemy Plots.

The aim of the plotters had been to stir up revolt among the Mohammedan population; but every effort has proved abortive. Nevertheless, the difficulties created have been real, even if but little understood generally. To administer a country comprising about one million square miles of territory, remote and with few means of communication, is no simple problem.

When Vespasian inquired of Apollonius what was the cause of Nero's overthrow, the reply was, "Nero could touch and tune the harp well; but in government sometimes he used to wind the pins too high, sometimes too low." That has been a danger which successive administrators of the Anglo-Egyptian Sudan—Kitchener, Cromer, and Wingate—have always carefully avoided; the policy of preserving an equitable authority over all classes, creeds, and conditions alike, has proved one of the most valuable factors in the government of the country since the British occupation in 1898. The result is to be seen in the complete calm and tranquillity of the people to-day, notwithstanding the persistent efforts of paid incendiaries to create discord and disturbance among them.

The authorities, however, have been, and are, in no way thrown off their guard by this outward appearance of tranquillity. It is known that the enemy are contemplating a *coup de main* in Central Africa in case of the failure of their peace proposals—a failure already assured. It is said that the enemy are calculating upon our traditional slowness in moving, but so far at least as the Anglo-Egyptian Sudan is in question they will find that the preventive measures adopted have been in no way remiss.

Tribal Raiders.

Unfortunately, the Government is not altogether free from anxiety in another direction—that of internecine trouble among the various native tribes. The zone of danger lies between the River Atbara, where it enters the Ambara district, and the valleys where the Blue Nile and other southern rivers cross the Abyssinian border. The natives of these districts, a mixture of negro and Arab ruffianism, prove difficult to handle, for they own fealty to no recognised form of government. For years hillmen have swooped down upon the defenceless denizens of the valleys, looting and killing as they pleased, and with comparative immunity. Until the Abyssinian Government joins hands with the Sudan to wipe out completely these pestilential brigands—and this means a heavy annual outlay for both administrations—further raids, followed by usually ineffective punitive expeditions, will continue.

The Abyssinian tribesmen come down principally in search of slaves, for considerable traffic in black ivory is carried on beyond the Sudan border. Whole districts, indeed, have been swept clear of human dwellers, and as the supply of victims grows smaller the raids of the tribesmen become more widely extended, so that the actual frontier is no longer the only territory exposed to danger. The situation is undoubtedly becoming more serious, occasioning keen anxiety to the Administration, which, owing to the lack of loyal co-operation on the part of Abyssinia, finds itself practically paralysed.

The French Colonial Government might materially assist in minimising the trouble by putting a stop to the continual traffic in arms and ammunition which, to a large extent, is conducted into Abyssinia through the port of Jibuti, French Somaliland, and 190 miles distant from Harrar, with which it is connected by railway.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, November 3.

The Change of Cabinet.

Greece has not yet seen the last of its political crisis. The Zaimis Cabinet could not in the nature of things long survive, since it depended entirely upon the Opposition when it might be outvoted. And thus it came about that, after a discussion of no importance at all, the vote of confidence was put to the Chamber. The Zaimis Cabinet, one suspects, had had enough of the equivocal situation and wished to put an end to it. As to the country's foreign policy, all the eloquence of former premiers was of no avail. Greece remains neutral. Successive Cabinets can only follow blindly the course of action that appears to have been mapped out for them.

Failing to secure a vote of confidence, the Zaimis Cabinet could do nothing but tender its resignation to the Sovereign, who, in turn, could do nothing but accept it; and thus the first step in the new crisis was taken, and Greece found herself confronted by a serious dilemma. Either she had to conform to the constitutional laws and leave the power in the hands of the leader of the Parliamentary majority, or, ignoring the Constitution, she had to invest the King with absolute power. There seemed to be no way out of the impasse. The general opinion was that the Chamber would be dissolved and that new elections would take place, which would bring about a general demobilization. However, in spite of the misgivings of certain journals, the Chamber has not been dissolved, and the general demobilization has not taken place. But, the difference of opinion between M. Venizelos and King Constantine not having been surmounted, the former has not been recalled to power. The Cretan statesman's policy could not now be followed by the Crown, or even accepted. Therefore, another man was needed to save the situation. Latest advices from the capital are to the effect that the King has called on M. Skouloudis to form a Government. M. Skouloudis is of Cretan extraction, but is said to be opposed to the views of M. Venizelos. The newly formed Cabinet has taken the oath to-day; and the announcement of its policy is awaited with much impatience.

The Fighting in Serbia.

The fighting in Serbia is still of a fierce description. After occupying Kragujevatz the Austro-German armies had, so to say, an open road to Nish, and all their efforts have been concentrated on capturing the latter town. The plan of the Serbian Staff, working in accord with the Allies, was to keep the Serbian army intact, ready for further service at a propitious moment; and in accordance with this plan the Serbian forces are retreating slowly, methodically, and in accordance with well-made preparations. According to Austro-German communications received here, no Serbians have been taken prisoners.

French officers had prepared Nish for a lengthy defence and a stout resistance, and large quantities of stores and munitions had been collected in the town in anticipation of a prolonged siege.

On almost all the fronts fierce fighting has gone on between the Serbians and the Austro-Germans, but in spite of the former's heroic defence the enemy has gained possession of certain commanding and fortified positions. The Bulgarians, also, guided by old *komitajis* well acquainted with the terrain, have pushed on in Serbian territory. This week a rumour has gained currency that the Babuna Pass, which is of great strategic importance, has fallen into the hands of the Bulgarians; but as no official confirmation has been received, this report is probably untrue.

In the frontier region of Valandovo desperate fighting has taken place between the French and the Bulgarians, as a result of which the Bulgarians, in spite of a stout resistance, have had to fall back, abandoning certain frontier villages to the French. A French *communiqué* reports that the Bulgarian losses must have been enormous in view of the terrible havoc that the French artillery caused amongst them.

News has been received by the Serbian Consulate here of sanguinary fighting between the Franco-Serbian forces and the Bulgarians between Perlepe and Kavadar, an extremely difficult and mountainous region. The French have occupied the region of Isvor and have been wonderfully successful.

Reinforcements for the Allies.

Anglo-French troops for Serbia still continue to disembark here, the port is constantly full of waiting transports, and French and British soldiers throng the town. Besides men, the transports continue to unload vast quantities of stores and munitions of war of all descriptions. The aerodrome established here by the French has been the scene of several flights, which have been wonedrfully successful.

French and British regiments are leaving daily for Serbia, where they are reported to be acquitting themselves admirably.

DARDANELLES POSTAL ARRANGEMENTS.

In course of a statement regarding the postal arrangements in connection with the Dardanelles, Mr. Pike Pease, the Assistant Postmaster-General, says:—

Under existing conditions all letters and parcels for the troops in the Dardanelles are despatched first of all to the base Army Post Office at Alexandria. The letters are forwarded with the civil mails for Egypt viâ Marseilles. The parcels are despatched by the long sea route. On arrival at Alexandria the whole mail, both letter and parcel, is carefully checked by the Army Post Office staff against the way-bills which accompany it, and it is then sub-divided and re-way-billed for transmission to the Dardanelles.

For the transmission from Alexandria onwards we are entirely dependent on the transport service. The transports do not run at any regular intervals, and the time the mail may wait in Alexandria before it can go further may in certain cases be quite considerable. This particularly applies to parcel mails, as whenever the accommodation in a transport is limited, preference must naturally be given to the more important letter mails.

The transports from Alexandria naturally, under present conditions, take some time to reach their destination. When they reach Mudros Bay, Lemnos, where the advanced postal base is situated, the mails are again taken over and exhaustively checked by the postal staff and transferred to the smaller fleet sweepers, which are regularly despatched from Lemnos to the various Beaches in Gallipoli. Here, again, owing to the difficulties of transfer in an open harbour and the fact that often two or three transports with several thousand mail bags arrive together, there is often a delay of two or three days. On reaching the beaches the mails are again transferred from the fleet sweepers to lighters, landed on the shore and carried up to the various Army Post Offices, where they are, after a further exhaustive check, handed over to the post orderlies of the various units, who in turn distribute the letters and parcels to the men.

With regard to the complaints of the loss of letters, and in a greater degree of parcels, Mr. Pike Pease mentions that Mr. Samuel recently sent out one of the chief officials of the Post Office to carry out investigations on the spot, and he claims that so long as the mails are in the custody of the Post Office loss is almost unknown. The system of check at every point at which they are handled is so complete that the loss of a single bag would be at once detected. There are, he says, two main causes for the undoubted failure of a large number of mails to reach the addresses, and the first of these is the inadequate packing of parcels. The second is the difficulty experienced in disposing of letters and parcels addressed to men who have been wounded and sent from their unit to hospital. These the post orderly returns to the Army Post Office, by whom they are sent back to the base at Alexandria.

In the base there is an extremely elaborate organisation for dealing with these parcels. Every hospital, about seventy in all, sends in each day to the Army Post Office a detailed list of admissions and discharges. From these the Post Office compiles a "Hospital List" for every unit in the Force; there are at present between 50,000 and 60,000 entries on the Hospital List, and a number of men are employed for their whole time on keeping the list up to date.

The letters and parcels received from the front are first of all sorted out according to units and each batch is then checked against the Hospital List for that unit. Every article for which an address can be found is then forwarded to the appropriate hospital; but the casualties have been so heavy that the work has been overwhelming, and in spite of the strenuous efforts of all concerned, it has at times not been possible to deal promptly with the great mass of postal matter received in the office.

One of the greatest difficulties of the service, viz., the very slow transmission of the mails, will shortly be remedied, as the French War Office have now kindly allowed us to make use for our letter mails of their transport services running direct from Marseilles to Mudros. This will enable us to reduce the course of post by about a week. We have also been able to concert arrangements with the Admiralty which will, it is hoped, enable us to make a similar reduction in the time of transmission of parcels.

CYPRUS.

I.—Annexation and its Effects.

[The Near East *has been opposed to the cession of Cyprus to Greece; but on the outbreak of the war now being fought with the object,* inter alia, *of establishing the principle of nationality, we recognised that, in order to bring about a lasting settlement in the Balkans, which would necessitate territorial concessions on the part of the several States, Great Britain might be called upon to give a lead, by compensating Greece by the transfer of Cyprus under proper safeguards. These were not the principles which actuated the British Government when the offer of Cyprus was actually made to Greece. That offer, however, has lapsed, and the following article, written by our Cairo Correspondent before the offer was made, states the case against the cession of the island.*]

Cairo, October 15.

I have just returned from a brief visit to Cyprus, the island which, for the second time in history, has become a British possession, and as the first anniversary of its annexation to the British Empire is approaching, it may be of interest if I give a short account of its present political and economic situation, and add some of my impressions.

Despite its peculiar geographical position and the lively interest which at the bottom of their hearts all the elements of the population take in the momentous events occurring close to their shores, absolute tranquillity has reigned throughout the island since last November. From enquiries made in every direction, confirmed by my own observation, I gather that even in parts far removed from direct official influence the people, be they Turco or Greco, are absolutely loyal and obedient to their Government, and live quite at peace with one another.

As a matter of fact, annexation has materially improved the internal political situation, for it appears to have called a truce to the controversy between the Moslem and Greek communities, which had caused the authorities so much trouble in the past, and to have had the remarkable effect of rallying all the communities to the side of the Government. The Turco element, of course, is keenly interested in the struggle on the mainland; but if it wishes well to its co-religionists—and one cannot blame it for nourishing such sentiments—"it wishes them well from afar" only. As for the Greco element, its former attitude has changed to one of conciliation of the authorities, and so things have become much easier in the Council for the Government. The Pan-Hellenist element on the island feigns to regard annexation to Great Britain as one step nearer to that annexation to its so-called Motherland for which it has agitated so much in the past; but for nearly a year now there has been no local attempt to bring the question into prominence. This may be due to the fact that every effort in this direction has always encountered the cold douche that it deserved; but judging from various symptoms there is no doubt that adherents of the cause are restricted to a circumscribed circle of Cypriots, who, when they have not their own axes to grind, are merely animated by sentiment, and that the movement is by no means as widespread as its self-styled leaders would have the world believe.

Considerable regret was expressed to me—and not merely in British and Turco circles—that a certain section of the home Press should have taken up the question; for the arguments put forward for a cession of Cyprus to Greece can at best be but sentimental, and they certainly repose on no foundation that deserves any serious attention. The claim of the agitators is based on the facts that at the present date the Greco element is predominant on the island, and that Greece at one time occupied it. The Greco, or Greek-speaking, element in Cyprus certainly is predominant, for it accounts for 78 per cent. of the entire population. Prior to 1881 there are few reliable data as to population to go on, but there is every reason to believe that the Greek preponderance is of comparatively recent growth, especially seeing that out of the total increase in population since the British occupation, amounting to 88,000, the share of the Greco community was 77,000, or 87.5 per cent., representing 56 per cent. of the previous Greco population.

Turning to history and taking as date of departure the year B.C. 569, when, after a series of occupations by the Phœnicians, Assyrians and Ionian colonists, Amasis II. conquered the island and annexed it to Egypt, a recapitulation of events down to A.D. 1878 shows that of the 2,500 years under review Cyprus spent 250 under Egyptian, 190 under Persian, 450 under Roman, 830 under Greek and Byzantine, and 300 under Turkish domination. On these premisses the Greek claim appears to be stronger than that of any other nation. Unfortunately for the agitators, Greek influence proper over the island came to an end in A.D. 1191, when Richard Cœur de Lion conquered it.

It can scarcely be maintained with any seriousness that Greece should be given the island merely because she occupied it 800 years ago, and the shadowy nature of the claim is emphasised by the fact that it is in the highest degree improbable that any of the Greco-Cypriots now resident on the island are descended from the original colonists or from those who settled under the Byzantine occupation. If the plea of former Greek possession were admitted, then Greece would have an equally good claim to Egypt, which was occupied by her at the same time as Cyprus; while if that of preponderance of population were conceded, then with this interpretation of the principle of nationality as a precedent, we should have "Naboth's vineyards" cropping up all over the globe, and Powers could at will "peg out" claims to coveted territories actually belonging to other countries merely by encouraging emigration of their subjects, and, thus, eventually, secure possession without any difficulty. In the face of all these facts the Pan-Hellenist claim must inevitably fall to the ground.

Moreover, if the agitators and their supporters would only study the historical side a little carefully, they would find that the island's close connection with Egypt and the fate of Egypt is a very noticeable feature of the various occupations which it has undergone, and that this feature, while it militates heavily against the cession of the island to Greece—or, for that matter, to any other Power—absolutely confirms the actual occupant in its possession.

Apart from the fact that the island was for 247 years directly under Egyptian domination, both the Persian and the Roman occupations synchronised with the subjugation of Egypt by the same nations. Even Alexander the Great's occupation and the Byzantine domination coincided with the possession of the Valley of the Nile; while the Turkish followed closely on Selim I.'s conquests of Egypt, and the loss of the island preceded by but four years that of the Khedivial vilayet. Incidentally, it may be mentioned that in A.D. 1489 Venice occupied the island in view of its value as a naval and military base. With these facts before one, it can be affirmed that Cyprus has always fallen to the occupant of Egypt, and that history conclusively puts the Pan-Hellenists out of court.

There are, however, other important arguments against any further change of status. First, there is the Turco-Cypriot community, with which I do not propose to deal at any length, but which, small as it is, deserves consideration if only on account of the assistance and support it has consistently given to our occupation in somewhat trying circumstances, and at times when the Greek element has, to say the least, obstructed progress. Next there is no doubt that vital changes are imminent on the surrounding mainland. In such circumstances how could Great Britain, with her Far Eastern interests and her position in Egypt, be expected to entertain for one moment the idea of the cession to-morrow to a second-class and consequently weak Power, of an island which is shown to have strategic potentialities *vis-a-vis* the Valley of the Nile and which in the hands of a foreign Power, be it strong or weak, may come to be a terrible menace to our hold on the Suez Canal and thus to our Empire? From every point of view, therefore, the Pan-Hellenist agitation is as ill-founded as it is ill-timed, and the more the question is studied the clearer does it become that there is every reason in the world why we should retain our hold on Cyprus and not repeat the error we made in the case of Corfu.

So much for the political position. Economically the situation on the island is fairly satisfactory; at any rate, it is no worse than might be expected from comparison with other countries similarly situated. Of course, the outbreak of the war interfered with commerce. It came just as the

carob crop—the most valuable product of the island—was in sight, and the difficulty in obtaining gold for moving the crops and the restricted shipping facilities naturally affected trade. The financial difficulty was to some extent overcome, as in other countries, by the issue of currency notes, all of which it may be remarked have since been withdrawn from circulation; but it was some time before the shipping situation could be adjusted. The difficulty can be gauged by the fact that during the nine months ending June 30 only 354 steam and sailing vessels, with a tonnage of 106,279 tons, entered, and 328, with tonnage of 108,029, cleared from Cyprus ports in the foreign trade, as against 598, with tonnage of 273,933 tons, and 619, with tonnage of 275,827 tons, entering and clearing during the preceding corresponding period. It is therefore not surprising to find that during the six months ending December 31, 1914, the import and export trade fell by nearly 40 per cent. It is, however, pleasing to note that during the succeeding half-year, ending June 30, whilst imports recovered a little, exports picked up considerably and were barely 10 per cent. below what they were the year before. The general opinion seemed to be that, given a continuation of shipping facilities, the island would come through with little loss, and the powers that be appeared to be quite satisfied with the outlook as far as trade and the immediate finances of the island were concerned.

Turning to the general condition of the island, there is no doubt that it is still in a backward state, especially considering that we have occupied it for nearly four decades. The fault does not, however, lie at the door of the authorities. Every effort has been made to develop the country along the most remunerative lines, and considerable sums have been and are being expended on public works, agricultural experiments and education. But albeit the Government has applied itself to the task of relieving the oppression and ruin that existed, and of introducing reforms in every direction, it has frequently met with opposition, and it has, of course, had to contend with a very difficult financial problem. The great obstacle in the latter respect has been the Turkish Tribute (now the Turkish Debt) of £93,000, towards which the home Government now contributes £50,000. If only at the end of the war some more equitable arrangement can be made in regard to this unjustifiably heavy burden which the island has borne for 37 years, there is every reason to hope that a considerable improvement would speedily make itself apparent in the general condition of the country, which, as it is, has been wonderfully well administered in the face of countless difficulties.

That the authorities have met with success in their task is evident from the revenue, trade and other statistics. Since 1878 the population has increased by 50 per cent. to 274,108, the export trade has risen from £157,000 to about £700,000, while the revenue has progressed from £139,586 to £341,816—the latter, be it noted, accompanied by a remission in taxation, so that to-day the Cypriots are amongst the most lightly taxed communities of the world.

All this shows that the material position of the people is improving, and it is not surprising to learn that Government schemes are beginning to be received in a more satisfactory manner. The spread of education is undoubtedly assisting, and is conducing gradually to, the disappearance of the opposition that used to be manifested, but it is doubtful whether any marked advance will be made, or whether the Cypriot will be persuaded to take much interest in the welfare of his country, so long as he remains in his present serf-like position. Like the Egyptian *fellah* the Cypriot is a prey to the usurer, but his state is far worse than that of his fellow worker across the water; for he is little short of a bondsman of the moneylending fraternity, for whose benefit all his work is done, and by whom he is actually used as a political pawn. It is difficult to prescribe for this serious state of affairs. Some while ago it was proposed to found an agricultural bank; but unless most stringent State control is exercised such a remedy would turn out more of an aggravation than a remedy for the ill. It would appear that only Government intervention and the introduction and rigorous enforcement of a series of laws will ever succeed in giving the Cypriot his financial and political emancipation, and so afford him an opportunity to work out his own salvation.

Cyprus is undoubtedly an island with admirable prospects. Its soil is wonderfully fertile, and only requires careful development to give the country back its old reputation. Now that its status is assured, there should, after the war, be little difficulty in obtaining capital for this purpose, but over-capitalisation and speculative ventures will have to be guarded against. Whilst the task of protecting the Cypriot from exploitation by capitalists and against the rapacity of the usurers who abound on the island, and practically control its politics, will fall to the Government, everything depends on the people. If they wish to take advantage of what the future undoubtedly holds out for them they must display more enterprise, more public spirit, and more industry than they have hitherto done. Until the difficulties I have mentioned above have been remedied, they will undoubtedly be handicapped. Nevertheless they can help themselves somewhat, and those journals at home that have so unwisely taken up the cause of a "Cyprus for the Greeks," would do well to advise the clique that is responsible for the present agitation, and whose attitude has in the past tended to encourage obstruction, to concentrate their energies on more practical matters, and by their co-operation to facilitate the development of the country along lines that cannot fail to be for the benefit of all its inhabitants alike.

FROM THE ÆGEAN THEATRE OF WAR.

The following passages are extracted from a letter written by an Englishman formerly resident in Constantinople, who, on the outbreak of war between this country and Turkey, transferred his residence to Dedeagatch. He has now made another move, to Athens, whence the letter from which we quote was written on October 10:—

Circumstances have obliged me once more to move on, so here we are again, having left Dedeagatch on September 25 per Messageries' steamer Sydney for the Piræus viâ Mudros Bay, where we landed two or three officers and a party of sixty-three British workmen, consisting of carpenters and mechanics. They left the vessel singing "It's a long way to Tipperary" and amidst cheers from the passengers remaining on board, amongst whom were a party of twenty-two nurses returning home after a six months' stay in Serbia.

At Mudros Bay the sight is a grand one, and if only a few of our British people who are "asleep" could catch a glimpse of it they would soon "wake up." So, too, might those unpatriotic strikers, and especially that traitorous ——, who ought never to have been elected a member of such an honourable institution as the House of Commons. They would all quickly realize the seriousness and importance of this war, and how necessary it is that selfish motives should be set aside, and that all should work in unity, shoulder to shoulder, for our ultimate success in this war. . . . Yes, if only those . . . miners who go out on strike and those who encourage them by traitorous speech could have a look at the thousand and one craft here—British and French, dreadnoughts and super-dreadnoughts; ordinary cruisers and armoured cruisers; torpedo boats and destroyers of every class; huge liners and transports of all sizes; cargo boats, busily discharging coal, stores, provisions, ammunition, etc.; water boats and tanks; motor barges of all sizes and descriptions, some fitted with cranes for handling heavy material; steam launches innumerable; and last, but not least, hospital ships of all sizes, including the yacht Erin, and those brave trawlers that have been doing such excellent work in the Straits of the Dardanelles and patrolling the high seas, assisting in hunting down the murderous enemy submarines. What would all these do if their coal supplies were stopped? Do the miners and their leaders not think for a moment that by striking they are helping the enemy? Have they no feelings or spark of patriotism?

Our own submarines in the Sea of Marmora have done much to strike terror into and demoralize the Turks, as the following incident will show. A few days ago a suburban train running on the shore of the Marmora from Constantinople to San Stefano was suddenly stopped between two stations. The Turkish ladies cried out, "Aman! Shéitan vapor olmasin" ("Ah, me! may it not be the devil steamer?" meaning submarine). . . .

When the Turkish battleship Haïredine Barbarossa was sunk by our submarine in the Marmora she was taking to the Gallipoli Peninsula 500,000 Turkish liras in gold to pay the soldiers, besides Baïram backsheesh, as the event occurred a couple of days before the feast of Baïram. Some old Turks have been heard to remark that they did not mind the old ship being sunk, but regretted the loss of the gold.

The Turkish soldiers complain that they don't get paid, and say: "The English soldiers are always paid, because we always find money on those who are killed."

The dissatisfaction and complaints of the Turks against the Germans increase daily, which is only natural when they have such hard masters. For example: a Turkish soldier, wounded in the shoulder, was being carried along roughly, his feet and legs being raised higher than his head and shoulders. He begged the carriers to stop, so that the pain in his shoulder should be eased. A German officer thereupon asked why they had stopped, and on being told the reason immediately ordered them to move on, adding, "You are a soldier, and must bear pain."

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of the "NEAR EAST" to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

TANGIER TO TEHERAN.

The American Eagle, being a respectable bird, and a wideawake one withal, has long ago formed a fairly accurate opinion of the Prussian Vulture that has been trying to pass itself off as an Eagle in Belgium and elsewhere. Here, at any rate, is the comment of one Bird of Freedom on the bald-headed, unclean fowl that has made a howling wilderness of Belgium :—

> Bulgarians haven't much of "Kultur," but our opinion is that Lady Ralph Paget is safer in their hands than any Englishwoman is in Belgium under Von Bissingenism.—*Brooklyn Eagle.*

***

The Bulgarians, by the way, appear to have had a nasty surprise in regard to the qualities of the French fighting man. They have been carefully fed with stories of Prussian prowess, and doubtless it was represented to them that even if they did run up against the Allies, they would find them not such very formidable fighters after all. If so, they must be painfully disillusioned by now. In a letter just received from a naval officer who has been helping to make things lively down Dedeagatch way, I read : "Things appear to be getting rather more interesting up Salonika way, and I gather that a very fine type of French soldier is being sent there. Brother Bulgar has had a bit of a biffing from our allies, and I think he finds them very different stuff from the poor Turks of 1912." It is rough on Brother Bulgar, but—he ought not to have given Ferdy such a free hand in the management of his affairs.

***

From another correspondent, who is serving with the Mesopotamia Expeditionary Force, I am glad to learn that the reports about our gallant troops in that theatre of war not being well looked after in regard to such things as the supply of books, 'baccy, and so forth, do not appear to be well founded. I wrote to my friend some time ago on this subject, and he replies: "I have spoken to several of the O.C.'s of British regiments, and they have all told me that their men are pretty well looked after from India, and did not seem to think there is any special need to move from your side." This, coming from one who is exceptionally well placed to ascertain the real facts of the case, is very satisfactory hearing; for though we should all of us, I feel sure, be glad to do anything in our power to make up for the shortage of "comforts," if such existed, it is good to know that there has actually been, and is, no such shortage.

***

I should be sorry indeed if the above remarks should give any reader the impression that this Mesopotamian campaign has been an easy one; for nothing could be farther from the truth. The men who have taken part in it have had difficulties to contend with which cannot be realised by anyone who is not personally acquainted with the country, and they have faced them, and overcome them, with the same courage and the same cheerfulness that our soldiers and sailors have shown in other theatres of the war. I have referred often in these notes to the heat of Lower Mesopotamia, its insect pests, its usually vile water, and a number of other items that go to make up the catalogue of its general unpleasantness. It is bad enough to have to put up with these things, as I know from personal experience, when you can command such alleviations of your discomfort as a (comparatively) cool *serdab* to rest in during the hottest part of the day, with a *punkah* going, something cool (and not likely to poison you too quickly) to drink when you are thirsty, and netting of various kinds to keep at least a few of the mosquitoes, sand-flies, "flying scorpions," and other horrors from making you ready to emulate the example of those former visitors who sat down and wept by the waters of Babylon. But our soldiers have had none of these advantages—though, it seems, that some imaginative creatures at home have got it into their heads that *punkahs*, ice, and all the rest of it have been provided! They have had to march and counter-march, to do sentry-go, to convert themselves into coolies for the time being and shift great cases of all kinds of stores, to be ready to fight at an hour's notice, day or night—and to do it all in a region where the thermometer will register anything up to 126 degrees for days running. It is not surprising if they are inclined to feel a little sore at the idea of *their* "show" being regarded as "a small and easy" affair. The sick lists and the casualty lists prove that it has been nothing of the kind.

***

The Egyptian is usually pictured as a simple soul, and the tourist who has "done" the Nile is fond of talking and writing about him as "unsophisticated." But when you have lived in Egypt some little time you are likely to discover that he is not always quite so lacking in guile as he seems. I have just been reading in the Egyptian papers of a case which illustrates this point rather nicely. Two Nilots, members of the same family, fell out, and the quarrel led to one of them determining to "have the law of" the other. After the usual round, the proceedings reached a stage at which the Court called on the plaintiff to put in a personal appearance. He failed to do so, and this being, apparently, the last of several chances given him, the case was decided against him. Subsequently it transpired that he had been met on his way to the Court by an envoy of the defendant's, who had promptly picked a quarrel with him, the result of which was his enforced appearance at the nearest *caracol*. The aggressor, having accomplished his mission satisfactorily, confessed that he had been hired by the defendant to prevent the plaintiff's appearance in Court at any cost, and added that he had taken the only means he could devise to carry out his contract. The whole incident, it strikes me, would provide Mr. Marmaduke Pickthall with an admirable *motif* for one of his delightful sketches of *fellah* character. But the only bit of simplicity about it is the confession of the paid brawler. And I strongly suspect that that would never have been forthcoming if he had been paid a sufficient amount.

***

A correspondent has favoured me with a cutting from a recent number of the *Evening Standard*, in which a Greek from New York sets forth his views on the recent crisis in Greece and her relations with Great Britain. Why such an ill-flavoured, ungrammatical effusion should have been thrust upon me I do not know; for it contains nothing that is representative of Greek opinion, nothing, indeed that is striking in any way save its exposition of colossal ignorance and black ingratitude. Briefly, the letter is apparently intended to convey the information that Greece has nothing but bitterness in her memory of British diplomacy in the past. I merely mention it here because, as I have previously remarked in these notes, the traditions of Greece had always appeared to me something far too glorious to be undermined, and my purpose is to expostulate with the Editor of our much valued contemporary for having given the desired publicity to a name that must hereafter "stink in the nostrils" of all true Greeks, wherever their sympathies may lie in the immediate present.

***

Some time ago I commented upon the remarkable generosity which had characterized the British officers and officials in the Sudan in their contributions to the various war appeals of the present day. And now Egypt comes in with the second largest contribution received from overseas. Ontario came first with £200,000; Egypt, with its comparatively small British population, sends £109,000 as the proceeds of the collection for "Our Day." For a large proportion of this sum we have to thank the Egyptian people themselves, for, from the Sultan downwards, they gave and gave generously. Indeed, all classes of the community, members of all races and nations are to be congratulated on a result that was almost without precedent, and which gives Egypt a very high place among the Good Samaritans of to-day.

***

I see that the famous Winter Palace Hotel at Luxor is being transformed into a sanatorium, and although I had often resented the presence of this gigantic modern building, with its broad verandahs ringing with footfalls that overwhelmed the whisper of ghostly revellings at Karnak, I can almost find it in my heart to envy the wounded who are to be tended there this winter. For there is no gainsaying its comfort or the grandeur of its position. The opening of this hotel is among my most vivid memories of the social side of Egypt. I journeyed to the ceremony from the heart of the desert, and it was like going into a new world. The place was full of journalists, but there were a lot of respectable people present, too. All went well until, late in the afternoon, one of the former tribe, representing an Alexandria contemporary, conceived a brilliant scheme for the diversion of the remainder of his clan. It so happened that at this time an English Member of Parliament of pronounced Nationalist tendencies was in the country; it also happened that among the journalists was a man who still regarded his profession as one of great seriousness and responsibility. Choosing an obviously inoffensive and grey-haired gentleman as innocent protagonist to his scheme, our friend of Alexandria approached his *confrère* and told him in great confidence that the grey-haired one was in reality the Patet M.P. who had been causing such trouble in the country. "He's incognito at present, and always refuses interviewers. If you can succeed where others have failed it will be the greatest *coup* of the year." Off went the enterprising one, with results that were vastly entertaining to the watching crowd on the verandah. The elderly gentleman denied the identity thrust upon him, the interviewer would take no denial. It was only during the excellent dinner of inauguration which followed that serenity was restored, and later in the day the Alexandrian earned the friendship of both parties concerned by his adroit and diplomatic commisserations with either party.

NEAR EAST BOOKSHELF

MIXED MARRIAGES.*

The sense of appropriateness is instinctive. The majority of authors and novelists, writing over their own names, possess it. Others, again—and Mr. Andrew Firth is to be numbered among them—seem to take a pride in trumpeting forth their lack of it to the whole world at large. They do so in various ways, but one way especially has come very much to the front in the past few years—namely, the novel dealing with mixed marriages, in which the "white girl" mates with the coloured gentleman, and finds him—coloured. There is no real excuse for any such plot; it is unnatural, instinctively abhorrent, and thoroughly nauseating. "The Furnace of Iron" is a case in point, a distinctly repulsive Egyptian office-seeker and intriguer marries a high-strung, decadent English girl, and tragedy is their offspring. But the tragedy is sordid, repellant, and, what is even worse, uninteresting and monotonous. Thereby the author shows that not only does he lack the sense of appropriateness, but also the artistic touch which enables a writer to turn ordinary vulgar clay into shimmering pearls. There is no such touch in the book under review, which seems to have been conceived with the main purpose of airing such Arabic utterances as "andak," "ishmallak," and "minak," with the superior air of the ten-day Cook's tourist in Cairo. That the author has some little experience of Moslem domestic life cannot be gainsaid, but he has put his knowledge to questionable use. It may be argued by those who revel in reading about the untold miseries of mixed marriages that these very miseries are the best antidote against such unnatural unions, to which we gladly retort that the average British girl needs no preventatives, that she is above demeaning herself, and that as regards the high-strung decadent girls who are willing to sacrifice themselves on the altar of one of the cardinal sins, they cannot interest us either in real life or in fiction. As a matter of fact, they are even more uninteresting in fiction, because they are so dreadfully unconvincing; they cannot rise to the *rôle* of heroine, and consequently are doomed to insignificance, and their troubles leave us indifferent. Greater authors than Mr. Andrew Firth have dabbled in the same pool, have stirred up muddy waters, and have achieved no literary or artistic results—at least, in Great Britain. Why? Because we hold strong opinions on the matter of mixed marriages and strongly disapprove of one of our girls, even if only in fiction, mating with a man of another race.

C. R.

ANOTHER MAP OF THE BALKANS.

We have received a copy of the *Egyptian Gazette's* War Map of the Balkans and Eastern Europe (No. 3), which is edited by Alexander Gross, F.R.G.S., and produced in colours by "Geographia, Limited." The field covered embraces all the countries of the Balkan Peninsula, practically the whole of Austria-Hungary, and sufficient of the neighbouring countries to enable the average person to "focus the picture" at a glance; and the map is certainly one of the clearest and best printed we have seen at the price. The number of towns and villages marked is surprising, and even more surprising is it that it is, in all cases, easy to read the names. The spelling of these names is a matter on which it is possible to differ from the editor; but that is a point which is not likely to trouble the general public, who, having once faced the difficulties of Balkan place-names, have acquired a fine facility for "spotting" any particular town, village, pass. or mountain in the theatre of war, however its name may be rendered. From these remarks it must not be inferred that the map under notice is a bad offender. On the contrary, it is wonderful that the editor has achieved such success, confronted, as he certainly must have been, by so many conflicting authorities. The fact is that the whole question of rendering place-names in the Balkans—and elsewhere—badly requires to be threshed out and dealt with in authoritative fashion once and for all.

The map is very up-to-date in most respects. The new frontier between Turkey and Bulgaria is shown, and, as an example of attention to detail, it may be mentioned that Rhodes and the other islands in Italian occupation are appropriately coloured. Its weakest feature is the failure to indicate the existence of mountains. On the small inset map of Northern Serbia, it is true, they are sketched-in; but on the large map they are not even suggested; and this, in a map of the Balkans, is rather like a case of "'Hamlet' with Hamlet left out." Roads and railways are shown; but while we find the line between Parachin and Zaitchar marked on the inset, it is not shown on the larger map. Such discrepancies are sure to prove puzzling to conscientious students. The map, however, is a very handy one for general reference, and the publishers' enterprise in putting it on the market at such a low price is to be commended.

* "The Furnace of Iron." By Andrew Firth. (Unwin. 6s.)

BOOK NOTES.

Messrs. Bartholomew have published a revised edition of their War Map of Italy and the Balkan States, at 1s. net.

Messrs. Macmillan will publish shortly "Homer and History," by Dr. Walter Leaf.

A quite recent publication of the British Museum is Dr. Wallis Budge's "Miscellaneous Coptic Texts in the Dialect of Upper Egypt." English translations of the texts are provided, and the volume (which is published at 40s. net) is illustrated in the text as well as by numerous plates.

Among Messrs. Blackie's announcements of "gift books" we notice two with titles of a Near Eastern character: "At Grip with the Turk," by Captain F. S. Brereton, the popular writer of stories for boys, and "Constantinople," by Percy F. Westerman. The price of the former is 5s. and of the latter 2s. 6d.

The *Egyptian Gazette* announces that Mr. J. Lewis Bonhote, of the Zoological Gardens at Gizeh, is the author of a new work on vigour and heredity, which is to be published shortly, at P.T.45 per copy.

This distinguished Anglo-Egyptian official, the *Gazette* adds, has from his schoolboy days been mainly interested in the study of wild animals, and during the whole of that period he has kept careful notes on all the numerous little happenings which were daily taking place among the different individuals of his stock. In 1900, when the rediscovery of Mendel's Law was given to the world, he commenced, at the late Professor Newton's suggestion, a series of experiments in the crossing of various wild species of duck, and from then to the present day his energies have been devoted to the study of heredity.

SIR EDWIN PEARS AT THE SOCIETY OF ARTS.

Last Wednesday, at the Society of Arts, Sir Edwin Pears told again the interesting story of Constantinople, its origin, and the part it has played in the world's history. Speaking of its prospects, he said he did not think it could ever again become the great commercial city it was before the Turkish conquest of 1453, because the introduction of steam and the opening of the Suez Canal had entirely altered the conditions of trade. The Baghdad railway would be of immense importance to the country it served, but heavy goods from the East to Europe would continue to be sent by steamer, and even passengers would not care for the railway journey in summer over the plains of Mesopotamia.

The principal fault of the Turk was that he could never rule subject races, he could never be just to them. The story of the Armenians furnished a ghastly illustration of that fact. The Armenians, all things considered, were the manliest race in Asia Minor. The elevated plain they inhabited had bred a sturdy people. At Zeitun they had always observed a certain amount of independence. Twenty years ago Abdul Hamid wanted to exterminate every Armenian there, but a number of European residents of Constantinople brought all the influence they could to bear on every Ambassador, and they got a message to the Sultan that it would not be permitted. Now, the decree has apparently again gone forth that the Armenians were to be exterminated.

In the course of a short discussion that followed, Mr. G. Hagopian (Chairman of the Armenian Patriotic Association) said that the early emperors of the Turks were men of character and justice, and it was that fact that drew to their flag so many of the races of the Near East. But the time came when this was changed, and the decadence of the Ottoman Empire was the result. The Armenian literary language was one of the most powerful in the world; a nation that used it could never be suppressed; it was so eloquent, majestic, and inspiring.

Mr. Charles Woods said that Turkish decadence was partly due to the fact that the Turks could not rule, but also in modern times it was due to the want of roads and railways. As a result of his travels, alike in the old Turkish times and in the new Turkish times, he had formed the opinion that had the Young Turks done something in the way of public works their position would have been very different to-day. He agreed that the massacres of Armenians were in response to orders from the Turkish Government.

JUST PUBLISHED.

THE CALIPHS' LAST HERITAGE

A Short History of the Turkish Empire.
By Lt.-Col. Sir Mark Sykes, Bart., M.P.
With Illustrations and Maps. 8vo. **20s.** net.

THE TIMES.—"Sir Mark Sykes's book is full of first-hand facts and acute observations . . . a book of intense interest and present importance."

THE OUTLOOK.—"To say that there is not a dull sentence or a laboured phrase in his latest work, 'The Caliphs' Last Heritage,' is high praise. But it is merited, for the fact is there."

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

BULGARIA AND THE PRINCIPLE OF NATIONALITIES.

Sir,—We have read in your last issue the letter under this heading, signed by Mr. A. H. E. Taylor.

Mr. Taylor appears to be very confused regarding the terms of the Secret Treaty of 1912. We have read that Treaty again, and find no clause in it which refers in any way to Serbia's attempt to reach the sea. He is also obviously misinformed as to Serbia's reply to the Allies' proposals. Bulgaria did not claim the Contested Zone, and Serbia is hardly likely to have offered it gratuitously. Moreover, Monastir, Ochrida, and Prilep are in the Uncontested Zone, and not in the Contested Zone, as Mr. Taylor states.

Mr. Taylor asserts that the men of the Vardar have fought well for Serbia in this war. He is apparently unaware of the fact that Bulgaria recently formed a corps of volunteers composed of Macedonians who had deserted or surrendered to the Austrians, who provided them with an Austrian uniform, a kit-bag, and a few gold coins, and despatched them by trainloads to Bulgaria. On the outbreak of war with Serbia, these men were placed, at their own request, in the front line.

In order, however, to avoid discussion on side issues, we would suggest that Mr. Taylor might find it interesting to examine this question for a moment, not from his or our, rightly or wrongly conceived, point of view, but from that which the Allied politicians themselves had adopted, though failed to maintain in practice, with the present situation as a consequence.

In his statement in the House of Commons on the 2nd inst. the Prime Minister referred to the Treaty of Bucharest as an unhappy legacy. The authors of that Treaty—Greece, Serbia, and Roumania—have expressed no grievance against it, though M. Venizelos and M. Také Jonescu have in turn admitted the expediency of revising it. Bulgaria, the other party to the Treaty, has, ever since its accomplishment, groaned under its oppression.

Having regard to these facts, it would seem reasonable to conclude that, in the Prime Minister's mind, the Treaty of Bucharest was an unhappy one principally because it imposed injustices on Bulgaria, which had had, like all other injustices, evil consequences. That conclusion would seem, moreover, to be justified by past events, inasmuch as the Entente Powers aimed at removing the evil in the Balkans by urging upon Serbia and Greece to cede certain territories to Bulgaria. The result of the diplomatic action undertaken with this object was unsatisfactory both to Bulgaria and to the Entente Powers themselves, for it did not enable the latter definitely to offer to Bulgaria what they, the Venizelist party in Greece, and the Serbians by their treaty of 1912, had recognised either as due to Bulgaria or expedient to give to her. Roumania added her tacit recognition of the evil by generously agreeing to cede to Bulgaria the greater part of the Dobrudja.

In view of the testimony to be drawn from the statements of our own Prime Minister, M. Venizelos, M. Také Jonescu, the terms of a clearly worded treaty, the diplomatic action of the Allies in the Balkans and the convincing eloquence of many competent exponents of the question, we venture to think that even the staunchest friends of Serbia will clearly see that Bulgaria was the victim of an injustice—due to whatever cause it might be—which the Allies, when championing the rights of small nations and the principle of nationalities, had undertaken to remedy. That was the point we wished to emphasise in our first letter on this subject.

It is perhaps Mr. Taylor's "bitterness" which has led him to regard as "Pro-Bulgars" several of your distinguished contributors, whose untiring efforts to save the Balkan peoples and ourselves from an inferno of intrigue and treachery have, in the opinion of Mr. Taylor, bemused so many of your readers.

Before leaving Sofia for Dedeagatch with the Ministers and staffs of the retiring Legations we had provided ourselves with a copy of that evening's issue of the *Echo de Bulgarie*, which contained a leading article concluding with the following words:—

"Si quelqu'un a travaillé dans les Balkans pour le Roi de Prusse, c'est la diplomatie de l'Entente."

It was somewhat consoling to feel that the compliment of "Pro-German" addressed, on this humorously chosen occasion, to our diplomats did not apply to ourselves; and we are not likely to be perturbed if we are called "Pro-Bulgars" by a compatriot whom the pro-Germans in Bulgaria would hail a fellow disciple.—We are, etc.,

H. L. ANDREWS,
CHAS. TURNER.

London, November 22.

THE SITUATION IN KURDISTAN AND THE URMI CRISIS.

To the Editor of THE NEAR EAST.

Sir,—It is a great pleasure to write to THE NEAR EAST—a paper that has our highest esteem for its splendid work.

I write of what I know and have seen, and in writing have an object in view—an attempt at the relief of some 80,000 destitute refugees, Syrians and Armenians, in Urmi and Salmas, Persia, to say nothing of the thousands of Syrians from Kurdistan who are in a desperate position, both as regards safety and livelihood for this winter.

Your correspondent of September 3 has given us the bare facts of the Urmi situation. May I add that the number of the Christians at Urmi, Syrians and Armenians, if we add the districts round about Urmi—Sulduz, Tergavar, Mergavar, Bradost, etc.—is not 30,000, but nearly 50,000. This is exclusive of 10,000 or more Armenians and Syrians in Salmas, north of Urmi plain.

The horrors committed in Urmi and Salmas have resulted in leaving over 90 per cent. of the Christians destitute, homes plundered, villages ruined, inhabitants decimated by massacres and disease. Then nothing has been sown except what there was in the fall of 1914, and no cultivation could be attempted for lack of facilities and safety. For the harvest of this year there were no animals and no implements. Most of the latter were plundered by the Moslem neighbours.

I was one of the few Commissioners appointed by the Russian Consul at Urmi and the Persian authorities to get back Christian property from among the Moslems. I was sent out to the southern district of Urmi to Baranduz villages. I went there with a dozen armed Syrians to encourage the starving Christians to venture out of their five months' quarters at the American and French missions in the city to go and look after their vineyards and crops. When we got to one of the villages, which formerly had eighty families with their own homes, it presented the appearance of a ruin. A few houses were burned, the rest were pulled down. There were, however, some rooms standing, and we wanted to go up to one of them. There was no ladder in the whole place, and we had to send for one from the neighbouring Moslem villages. Grass and wheat had grown in the yards and in the streets. All the time that we were there we slept without any windows to our rooms. As for doors, there were none at all. So we instituted a search in some of the neighbouring villages. They would rather keep our goods concealed lest we should find the offenders and ask for more stolen property; but we got some 35 doors out of some 400 missing ones.

In this one particular village, during the massacres of last January, 23 men had been shot and 85 had died of disease during the winter. Of the 300 or more animals that the villagers had owned, not one was to be seen. They had nothing to carry on farming and gather last year's crops. The vintage this year was not very good, owing to lack of cultivation in the spring. Some of these people had not eaten meat for six months; bread was all that the missionaries could offer them. Other villages were worse off.

While we were working on this plan, trying to send men to the various Moslem villages and get evidence regarding things stolen, the Persians placed every possible obstacle in our way, so that in the end hardly anything was achieved. Then, suddenly, on August 6, the whole Christian population left Urmi and Salmas, for the second time, for the Russian frontier, some eight days' distance, and marched by thousands on foot. They felt the position insecure, and that the Kurds and Turks were approaching. For fifteen days the people, mostly women and children, remained scattered all through the roads from Urmi to the Russian frontier; some were actually starving. At last the Russian General at Salmas reassured them, and the people went back to their various places, where they are still under the protection of the Russian army of occupation. Such in brief is the position of over 50,000 Syrians and Armenians of Urmi and Salmas. The picture of the village, above, is typical of the 100 odd villages.

A new danger has been added to the situation as described above, by the arrival of some 35,000 Syrians from Kurdistan in Turkey. Last June the seat of Mar Shimun, the Patriarch at Kudshanis, was plundered and the village burned. Then a formidable Turkish army, of regulars,

Digitized by Google

with modern ammunition, and thousands of irregular Kurdish forces took the offensive against the 100,000 Syrians in their mountain fastnesses, who occupy the mountains between Van, Urmi, and Mosul, and are some eighty miles distant from each one of these places. What happened in Warsaw to the Russians took place also with Mar Shimun's gallant tribes, and fighters—lack of ammunition. For over forty days they defended themselves, when it was of no use to continue the uneven struggle. The villages in the valleys were burned and plundered; many of the people were killed, women carried captive and forced to become Moslems. This was especially the case in some forty villages of Barwar. The rest of the people took to the high mountains, and formed huge camps in the district of Tal, wi[illegible] Mar Shimun's sister and brothers, in the centre of the famous church of Mar Oudisho, where they remained for about three months, threatened by famine. The Patriarch came to Salmas to consult with the Russian General in order to effect an escape for his congregation. I know from private letters, and Mr. Shipley, the British Consul at Tabriz, has wired to the Foreign Office, that some 35,000 Syrians are in Salmas. The fate of those left behind is not quite certain, although one would hope that, though they are hard pressed, their position will be secure in the winter if they can get supplies from Persia to subsist on to the spring.

The position of the new refugees in Salmas is far from satisfactory. They are destitute and in rags. Many slept in the streets in hard, winter weather, and the Russian Consul was trying to quarter them. Unless assistance is sent they will starve. Seeing the desperate position, his grace the Archbishop of Canterbury has wired £500 for their assistance, and has appealed for them throughout all England. Then the Armenian Relief (Lord Mayor's) Fund has wired another £500. I am very grateful for all this timely help, which will stay the hunger and misery for a time. But if it is intended to save these members of the oldest Church in Christendom from annihilation, the number of pounds should correspond to the number of those in destitution, reduced to it by no fault of their own, any more than the Serbians.

The Armenian writers themselves acknowledge that the condition of the Syrians is worse than that of the Armenians in the Caucasus, where there are societies to look after them and help in the distribution of funds to alleviate their miseries. But the Syrians have no rich persons of their own nation, and their cry has been heard in this country only and in the United States. The new situation of Mar Shimun's people calls for further effort. And will God Almighty, in whose hands are the issues of war, allow the extinction of these races that have for years grappled with the Turks for an existence and for Christianity? I am sure Englishmen will be the first to see the need, and to come to the rescue. The offices of the Archbishop's Mission (Rev. F. N. Heazell, sec.) are at Church House, Westminster.—I am, etc.,

PAUL SHIMMON,
(Representing the Patriarch.)

29, Richmond Gardens, Shepherd's Bush, W.,
November 24, 1915.

A PLEA FOR THE ARMENIANS.

To the Editor of THE NEAR EAST.

Sir,—We, in common with all those who have worked so long for Armenia, are stricken with sorrow at the news of the awful tragedy which has overtaken her unhappy people. It is estimated by Lord Bryce, one of Armenia's staunchest friends, that 800,000 of her peoples have been done to death by their cruel masters, the Turks. For these we can only feel they are past earthly aid. But there are others of this martyred race for whom we may still care. For months past those who could do so have fled into the Caucasus, at a terrible sacrifice of life, for they were utterly destitute. There are now said to be gathered at Tiflis and other Caucasian towns 250,000 refugees in the utmost poverty and wanting everything that makes a continuance of life possible.

The appeal we now make is a more urgent one than ever before issued by us, and we ask that those who can will give generously so that we may be enabled to make the fate of these refugees more bearable and preserve the remnant of the nation for, it may be, the happier future which we may have hoped and prayed so long.

The Armenians are a clever people, with strong vitality and great powers of endurance and recuperation.

We believe that the nation will yet survive, and we confidently appeal for help, to enable them to do so, from the friends who have never failed us yet.—For the Committee of the Friends of Armenia,

LUCY C. F. CAVENDISH (President),
E. WRIGHT BROOKS (Hon. Treasurer),
MARY HICKSON (Hon. Secretary).

47, Victoria Street, Westminster, S.W.

SERBIAN BALLADS.

Last Tuesday, at the National Liberal Club, Mr. W. M. Pestrovitch delivered an address, entitled "The Epic and Lyric Poetry of a Peasant People." Ninety-one per cent. of the Serbs, he said, were peasants. They were a very poetical people, and in the course of their history had produced nine cycles of poets. The earliest cycle described the deeds of Stephen Nemanya, who first succeeded in uniting the Serbian clans into a powerful state; the later ballads which centred round Kossovo were, however, more beautiful. A Serbian bard reciting his verses accompanied the words by music on a primitive instrument called a gusle—a kind of one-stringed mandoline that produced a sad, droning sound, contrasting strongly with the matter of the bard's song. In the Middle Ages the bard would generally be a monk or student from a monastery, or a simple peasant, who wandered from fair to fair and from castle to castle. The ballads, passing from mouth to mouth, were gradually polished during the centuries, and most of them were collected in the early part of the 15th century; but many remained to be collected even yet. Of those collected many had been translated into other languages, and the best translation was that into English, by Sir John Bowering. Prince Lazar was the grandest figure in the Kossovo cycle, but Milosh Kobilovich, the assassin of Murad, was Serbia's conception of a perfect knight. One ballad showed him after the deed overwhelmed by 12,000 janissaries, leaning on his lance exhausted with the killing of innumerable enemies, and waiting for death. The favourite hero of the entire Serbian nation was Kralyevitch Marko; the cycle of poems that related to him were popular not only in Serbia and Montenegro, but in Slavonia, Croatia, Dalmatia, and even Macedonia. The ballads ascribed to him tremendous strength. His mace contained sixty pounds of steel, the same weight of silver, and forty pounds of gold; and this tremendous weapon he would throw into the clouds and catch again in his hand as it descended. This feat he would perform without dismounting from his horse. He was the protector of the oppressed, especially of women and children, and the avenger of every wrong. He had his faults, which were those of the Serbian people. He was a very heavy drinker of red wine, though he never became intoxicated. Whenever he left his castle on a night's expedition he had a skinful of red wine slung on the left side of his charger, Sharatz, as a counterpoise to the mace that hung on the right. He drank the wine from a cup holding 36 pints, but never emptied it, half was always given to Sharatz. Marko was a vassal of the Sultan, who loved and feared him and adopted him as his son; and for the sake of his rebellious vassal would make concessions to his oppressed Christian subjects. There were various legends about Marko's death.

Besides the songs of heroes Serbia had its lyrical poetry, which was chiefly the production of women. The Serbian woman sang when in the fields, when lulling her baby, when going to church, in church, when rejoicing and when lamenting. These songs were distinguished by brevity, sincerity of emotion, and infinite love of nature. M. Pestrovitch read some translations, of which one was as follows:—

> All the night two nightingales were singing at the window of the affianced maiden; and the affianced maiden thus addressed them: "Tell me, ye two nightingales, are ye brothers? Are ye brothers' children?" Thus the nightingales made speedy answer: "Brothers are we not, nor brothers' children. We are friends, friends of the verdant forest. Once we had another friend, another; but that friend is lost to us forever. We have heard that nuptial bliss awaits him, and have come the cheerful bride to look on, and to offer her a golden spindle with the flax of Egypt bound around it."

Another was:—

> Oh, nightingale, thy warbling cease,
> And let my master sleep in peace;
> 'Twas I who lured him to repose,
> And I will wake him from his rest.
> I seek the sweetest flower that grows
> And bear it to his presence blest,
> And gently touch his cheek and say:
> "Awake my master, for 'tis day."

Mr. Chedo Miyatovitch, who occupied the chair, told a legend of Marko killing a dragon that had taken possession of a crystal lake wherein the animals of a wood had aforetime been wont to quench their thirst.

Dr. Clarke, who moved a vote of thanks to the lecturer and chairman, said the Serbs and Bulgars were both mainly Slav, but presented a striking contrast in national character. The dreamy, poetical character of the Serb might be mainly due to an admixture of Italian and Greek, whereas in the case of the Bulgar there was an admixture of Tartar and Turk.

To-day is the birthday of H.M. Queen Maud of Norway.

To-morrow is the birthday of the Dowager Empress of Russia.

Wednesday is the birthday of Queen Alexandra.

Thursday is the birthday of Prince Peter of Greece, the eldest son of Prince George and Princess Marie.

It is announced from Constantinople that the Sultan has given his sanction to the wedding of the Princess Behieh Sultana, described as his granddaughter, with the Prince Omar Bey, son of the Grand Vizier.

Lord Kitchener arrived at Piræus from Mudros last Saturday morning, accompanied by Sir Henry McMahon, High Commissioner for Egypt, General Sir John Maxwell, commanding the British forces in Egypt, General Horne, and Colonel Fitzgerald, Military Secretary. The party was met on landing by Sir Francis Elliot, the British Minister, and Colonel Metaxas and Major Staïcos, representing the Greek War Office.

Lord Kitchener, accompanied by part of his staff, proceeded to the Palace, where he had an audience of King Constantine lasting over an hour.

In the afternoon a luncheon in Lord Kitchener's honour was given at the British Legation. This was attended by the Allied Ministers, General Dousmanis, the Chief of the Greek General Staff, Colonel Metaxas, Major Staïcos, and the officers of Lord Kitchener's staff. The luncheon was followed by a reception, to which the British colony and many leading Athenians were invited. The Mayor and the Chairman of the City Council of Athens appeared to tender the greetings of their fellow-citizens, and the Anglo-Hellenic League presented an address of welcome through the Chairman and the Council.

At three o'clock Lord Kitchener left the Legation to visit M. Skouloudis, the Greek Premier, being greeted with cheers by the large crowd outside the Legation, and a still larger crowd outside the Premier's residence. Lord Kitchener left in the evening for an unknown destination.

Although still critical, the condition of Sir Gerard Lowther, formerly British Ambassador in Constantinople, is no worse than it has been for some weeks past. It is hoped that he will soon be able to leave his room at Sandwich.

Viscount Errington, eldest son and heir to the Earl of Cromer, who has been at Simla during the past year on the staff of Lord Hardinge, is now in Srinagar, where he is a guest of the Maharaja of Kashmir. He is proceeding on a shooting trip in the State Rukhs and surrounding jungles.

The manager of the Imperial Bank of Persia at Shiraz, who has been seized and carried off by Persian gendarmerie, as reported in a Foreign Office statement issued yesterday, is Mr. M. Ferguson. Mr. Ayrton, the accountant of the Bank, has also been made prisoner by the same band. Mrs. Ferguson and her daughters, and the wife of the telegraph superintendent at Shiraz, have arrived safely in Bushire.

Madame Vesnitch, wife of the Serbian Minister in Paris, arrived in London on a visit last week.

The tour of the High Commissioner of Cyprus, Sir John Clauson, included visits to Limassol and Larnaca, where matters of local interest were discussed, writes a Cyprus correspondent.

A mural tablet to the memory of Lady Miéville, wife of Sir Walter Miéville, K.C.M.G., was unveiled in St. Mark's Church, Alexandria, on the 11th inst.

We understand that Mr. Clarence Wodehouse, Commissioner of Larnaca, Cyprus, is retiring very shortly. He originally went to Cyprus as a commandant of police, and was afterwards for many years Commissioner of Papho.

The *Morning Post* Rome correspondent reports:—Mr. Lamb, who was British delegate in Albania, and formerly Consul at Scutari and Consul-General at Salonika, has left Rome for Durazzo, to organise relief for the Serbians.

On November 17, at Gezira, Cairo, the wife of Mr. P. M. Tottenham, Inspector-General, Irrigation Service, of the Egyptian Public Works Ministry gave birth to a son.

A marriage has been arranged, and will shortly take place in Cairo, between Norman Donnelly Macnaghten, Ministry of Interior, Cairo, second son of Canon and Mrs. Macnaghten, of Tankersley, Yorks, and Ida, second daughter of Mr. and Mrs. Arthur E. Gunning, of Twerton-on-Avon, Bath.

Lady Richmond, wife of Sir W. B. Richmond, R.A., of Beavor Lodge, Hammersmith, died on Saturday night from injuries received as the result of an accident while crossing King Street, Hammersmith. Lady Richmond was knocked down by a private motor-car. She was taken to her home, where she died soon afterwards. Lady Richmond was the daughter of Mr. William Richards, of Cardiff, and was married in 1867.

The death is announced of Sir Allen Young at 11, Albemarle Street, in his eighty-eighth year. Sir Allen was a son of the late Mr. Henry Young, of Riversdale, Twickenham. He entered the mercantile marine in 1846, and commanded the Marlborough, East Indiaman, and Adelaide, troopship, during the Crimean war. Between 1857 and 1882 he was closely connected with Arctic exploration, and greatly distinguished himself on several occasions. He was present at the operations at Suakim as commissioner afloat to the National Aid Society.

Admiral John Harvey Rainier died on Sunday at St. Margaret's, Southborough, Kent, aged sixty-eight. He entered the Navy in 1860. Commanding the Kingfisher, he landed at Zeyla in February, 1885, and assisted in the arrest of mutinous Somali police. In 1897, as captain of the Rodney he commanded the English, French, Russian, Austrian, and Italian landing parties at Selinos Kastelli during the Cretan insurrection, and successfully relieved the beleaguered Turkish garrison and Moslem inhabitants of Kandanos, embarking them safely to the number of three thousand at Selinos. He was mentioned in dispatches and personally thanked by the Senior Foreign Admiral for this service. He retired in 1905.

We regret to announce that Mr. Robert Fisher, late Commissioner in Cyprus, died on Tuesday at 8, Upper Phillimore Place, W., at the age of eighty-six.

The funeral, with military honours, took place at Rhyl on Monday of Captain Gribbin, aged eighty-five years, who served in the Crimea and took part in the charge of Balaclava.

The death took place on Tuesday, at 34, Chapel Street, Belgrave Square, of Colonel Robert Baring, late 19th Hussars. He was the sixth son of the late Henry Baring, of Cromer Hall, Norfolk, by Cecilia Ann, his second wife, eldest daughter of Vice-Admiral William Windham, and brother of the Earl of Cromer and the late Lord Revelstoke.

The death is announced of Lieutenant-Colonel F. Hall, a Crimean and Indian Mutiny veteran, of the 88th Connaught Rangers. He served at the siege of Sebastopol and the attack on the Redan, receiving the medal with clasp and the Turkish medal. In the Mutiny his service included the fighting before Cawnpore, the relief of Sundeewah, and the capture of Burwah Fort. Colonel Hall was then mentioned in despatches, receiving also the medal with clasps.

Lieutenant Gordon Sanderson, attached to the 2nd Battalion, 2nd Gurkhas, who was killed in France last month, was formerly attached to the Egyptian Ministry of Public Works. He resigned his appointment in Cairo in order to take up the post of Superintendent of the Archæological Survey of the N.W. Provinces, India.

Apropos of the note which appeared in these columns last week regarding the death of Mr. T. S. Blockey, we are informed that Mr. Blockey actually returned to this country from Baghdad eighteen years ago, not twelve years, as stated. He went out to Baghdad in 1867 for Messrs. Lynch Brothers, and remained with them till about 1886, when he started in business on his own account. While with Messrs. Lynch, Mr. Blockey was responsible for many improvements in the working of the river steamers that carry on the service between Busreh and Baghdad; and it was he who obtained permission from the Turkish Government for the Euphrates and Tigris Navigation Company to attach barges to their steamers, thus greatly facilitating the business of the Baghdad merchants. For many years he was the *doyen* of the British colony, and he was much respected both by the Europeans and by the natives. He was twice married, and leaves a widow, five daughters, and two sons.

The death is announced from New York at the age of sixty-seven of Dr. Solomon Schechter, the well-known Hebrew scholar. He was born at Foksham, Roumania, and studied at Vienna and Berlin, graduating as a Rabbi at Vienna in 1887. He went in 1902 to the United States, where he took up the post of President of the Jewish Theological Seminary of America.

Another well-known Hebrew scholar has passed away in the person of Emeritus Professor the Rev. J. J. A. Paterson, United Free Church College. His death took place in Edinburgh on Sunday night. He was appointed a professor in the Old United Presbyterian Divinity Hall when little over twenty years of age, and held the chair till the union of the United Presbyterian and Free Churches.

The Duchess of Teck has promised to open a sale of Christmas presents for soldiers and sailors in aid of the Children's Union of the Waifs' and Strays' Society on December 7, at 2.30 p.m., at 9, Chesterfield Gardens, W. Lady Beatrix Wilkinson will give a lantern lecture on "Serbia and the Serbians," the slides having been made from photographs taken by Lady Muriel Herbert while working with a British nursing unit in Serbia.

A Sofia message published in the Austrian newspapers states that the Bulgarian troops in capturing Branjanska Bania made prisoners thirteen former Serbian Ministers, including the former Prime Minister, Dr. Bladan Georgevitch.

Mr. John J. Stavridi, Greek Consul-General in London, returned on Wednesday night from a short visit to Athens, which city he left yesterday week. During his stay he was throughout in close touch with the Ministers and also with M. Venizelos.

We regret to learn that Major H. F. S. Amery, of the Black Watch, has died, after a long illness consequent on wounds received at Ypres in November last year. Major Amery was the youngest son of the late Mr. Charles Amery, of the Indian Forest Department, and brother of Mr. L. S. Amery, M.P. for South Birmingham. He was educated at Harrow and Sandhurst, and joined the 1st Black Watch in 1897. After four years' service in India he was seconded for service with the Egyptian Army in 1901, and remained in it ten years. For the greater part of that time he was Assistant Director of Intelligence and Indian Agent. In 1912 he was admitted to the Staff College. In the present war he commanded a company of his battalion on the retreat from Mons, was wounded at the Aisne on September 14, and returned to the front at Ypres on November 1, only to be wounded next day when leading a counter-attack, for which he was mentioned in dispatches. Major Amery was, says the *Times*, a gifted linguist with an exceptional knowledge of Eastern languages and with much of Sir Richard Burton's peculiar power of entering into the Oriental mind. He was also a fine all-round athlete and sportsman, and a keen polo player and hunter of big game. By his many friends he will be remembered for the promise of a brilliant military career cut short, and for an unfailing sense of humour, never shown to greater advantage than in cheering brother officers and men through the discouragements and discomforts of the great retreat, or in facing the ordeal of a lingering and painful illness. A memorial service will be held at St. John's, Westminster, this afternoon at 3 p.m.

An Englishman, formerly resident in Constantinople, informs us that Mr. Cyril Panaretoff, only son of Professor Panaretoff, lately of Robert College and now Bulgarian Minister at Washington, and Mrs. Panaretoff, was killed recently on the Serbian frontier.

Mr. and Mrs. Lang-Anderson left for Egypt by the B.I. steamer Mandala, which sailed from London last week.

The *London Gazette* of Tuesday contained the announcement that the King has granted to the undermentioned officers of the Royal Navy and Royal Marines his Majesty's Royal licence and authority to wear decorations (as stated against their respective names) which have been conferred upon them by his Majesty the King of Serbia in recognition of valuable services rendered by them:—

3rd and 4th Class, Order of Kara-George, with Swords.—Rear-Admiral E. C. T. Troubridge, C.B., C.M.G., M.V.O.

4th Class, Order of the White Eagle.—Captain (temporary Major) B. N. Elliot, D.S.O., R.M.L.I.

4th Class, Order of Kara-George, with Swords.—Lieutenant-Commander C. L. Kerr, D.S.O., R.N.

5th Class of the Order of the White Eagle.—Assistant Paymaster H. M. Fitch, R.N.

4th Class of the Order of St. Sava.—Surgeon E. R. A. Merewether, M.B., R.N.; Lieutenant G. Bullock, R.M.

The President and members of the Jugo-Slav Committee, representing the Serbs, Croats, and Slovenes of Austria-Hungary, are appealing for gifts of money, clothing, and all other necessaries on behalf of the Serbian Relief Fund, 5, Cromwell Road, S.W. The fund has the approval of the British Foreign Office, which will allow its agents to use for the benefit of the civil population the organisation set up by our Government in concert with its Allies, for the purpose of providing food and supplies for the Serbian Army.

Subscriptions of £50 (being one year's upkeep) will entitle the respective donors to have a plate (showing whose gift it is) attached to a bed in the "British Farmers'" Convalescent Home at the Summer Palace of Montazah, near Alexandria, for the wounded of our troops in the Near East. All subscriptions should be sent to the Secretary, Room 5, Tower Bridge Flour Mills, Bermondsey, S.E. The forty-third list, which brings the record up to November 19, shows that the British Farmers' Red Cross Fund has reached a total of £112,598 6s. 11d.

On Monday the British Farmers' Red Cross Fund sent a cheque for £5,000 to the British Red Cross Society, to be expended by them on further stores for Serbia.

The Secretary of the Serbian Relief Fund has received two cables from members of Mrs. Stobart's Hospital unit. They are dated October 28, and were dispatched from Rashka. They read: "All's well." It is therefore concluded that the hospital has retreated to Rashka.

The Wounded Allies' Relief Committee of Sardinia House, Kingsway, has ascertained, through the Foreign Office, that its Serbian Hospital Unit, under Dr. Aspland, was a few days since at Vrnjatchka Banja, which is about forty miles due south of Kragujevatz. The unit, which consisted of a complete 600-bed hospital, is presumably retreating with the Serbian forces.

The London Branch of the Australian Natives' Association held a reception at the Anzac Club, Horseferry Road, Westminster, on Saturday afternoon, in honour of certain members of the Australian Imperial Force who recently received the Victoria Cross for gallantry in the Dardanelles campaign. The names of these V.C. heroes are: Lieutenant H. V. H. Throssell, Lieutenant F. H. Tubb, Lieutenant W. J. Symons, Corporal C. R. G. Bassett, Private Leonard Keyzor, and Private J. Hamilton. Corporal Bassett, who was detained in the North of England, and Private Keyzor, who has recently undergone an operation in a London hospital, were unavoidably absent. Mr. Steel-Maitland, Under-Secretary for the Colonies, and Sir George Reid, High Commissioner for Australia, delivered appropriate addresses, which were received with great enthusiasm.

A special appeal is made on behalf of the Sailors' and Soldiers' Tobacco Fund for a million shillings in order that each man at the front, whether Flanders, the Dardanelles, the Persian Gulf, or Africa, may be supplied with ½lb. of tobacco as a Christmas gift. The Fund has, to date, sent ½lb. to each of 37,000 soldiers. The headquarters of the Fund are at Central House, Kingsway, where contributions will be received.

APPOINTMENTS, PROMOTIONS, Etc.

Reuter's Agency is informed that Mukhber-es-Sultaneh, former Governor-General of Southern Persia, who was recalled from his post by the Persian Government in deference to the wishes of Great Britain, has been succeeded by Prince Musrat-es-Sultaneh, an uncle of the Shah. His Highness has left Teheran for his post, accompanied by an adviser whose views are strongly in favour of England and Russia.

Under date of the 22nd inst., the Sofia correspondent of the *Frankfürter Zeitung* telegraphs:—"The Dutch Government has recalled M. Schmolck, its diplomatic representative, who was entrusted with the care of the Allies' interests in Bulgaria, and will replace him by Baron Meiville. It will not be wrong to assume that in recalling M. Schmolck the Dutch Government has complied with the wishes of the Bulgarian Government." M. Schmolck was formerly Councillor of Legation in Constantinople.

Djavid Bey, formerly Turkish Minister in Belgium, has been appointed Minister at Stockholm, and is to establish a Turkish Embassy at Copenhagen.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

SILLEY.—On November 19, 1915, at 70, Kingsdown Avenue, West Ealing, to Mr. and Mrs. Cecil C. Silley—a son.

SCHOOLS for BOYS & GIRLS.

TUTORS for ARMY, UNIVERSITY, CIVIL SERVICE and ALL EXAMS. REFINED HOMES with EDUCATION for children whose parents are abroad.

RECRUITING IN THE NEAR EAST

The Entente Powers are still short of armies in the Near East, and the "voluntary system" by which it was hoped to secure the enlistment of Greece has shown signs of breaking down. All the features with which the United Kingdom has become familiar in similar circumstances have been reproduced in the international sphere. Greece, eligible, unmarried, holds back because Roumania has been placed on the waiting list. But Roumania, elderly and married, has advanced pleas which have been accepted; in any case munitions claim her attention for the present. Greece has no excuses to urge on her own behalf. Conscription is for the time being taboo; but on this point the Allies, no less than the British Cabinet, find themselves divided. A compromise has been effected. A certain liveliness would be added to the voluntary system and a time-limit would be set for its operation. The final efforts at persuasion were entrusted to M. Denys Cochin, French Minister without portfolio. If he should fail, conscription would follow through the instrumentality of Lord Kitchener. M. Cochin arrived in Athens and saw King Constantine. His mission, we must infer, was unproductive of the desired results, for his visit was at once followed by the announcement that the Allied Powers had "deemed it necessary to take certain measures the effect of which is to suspend the economic and commercial facilities which Greece has hitherto enjoyed at their hands." On the morrow Lord Kitchener reached the Greek capital. He, too, saw King Constantine and departed. The world waited to see conscription enforced. But the British analogy is apparently to be pursued yet further. Just as certain ambiguities of utterance interfered with the recruiting system in Great Britain and led to the postponement of the time-limit, so uncertainty has cropped up in the Allies' dealings with Greece. The suspension of "economic and commercial facilities" is found to be capable of being whittled down to the right of search practised in the Atlantic and North Sea. It is far from imposing upon Greece the compulsion which must have followed from an effective blockade. We must wait, therefore, to see whether we are witnessing merely a postponement of the time-limit, or whether the anti-conscriptionists have won the day and the "single eligible man" is still to be allowed to repudiate his obvious duty.

Even in the face of the most amateur handling of the Balkan problem we cannot bring ourselves to despair of a final favourable issue. But it seems hard for the Allied Governments to break with a policy of vacillation. If Greece's co-operation was worth bargaining for last January or a few weeks ago, it ought surely to be insisted upon when the Allies are hard put to it to save one of their number from annihilation. But at this very point a *communiqué* is issued stating that "it in no wise enters into the intentions of the Powers to constrain Greece to abandon her neutrality, the maintenance of which she appears to consider best calculated to serve her interests." Serbia and her treaty with Greece are forgotten. Last month it was thought worth while by the British Government to sacrifice Cyprus and its Moslem minority in order to make King Constantine honour his obligations to Serbia. To-day there is to be no question of constraining Greece to abandon her neutrality. The Powers, however, are exercised in mind regarding "the attitude adopted by the Hellenic Government towards certain questions closely affecting the security of the Allied troops and their freedom of action." These are "two privileges to which they are entitled in the circumstances in which they landed on Greek territory." As the Allied Powers admit that they consider Greece, or rather King Constantine, capable of a second breach of faith, this time towards them, it would be thought that at last some drastic steps would be taken to clear up the situation. A circumlocutory *communiqué* is issued from the British Legation in Athens imposing "disabilities upon the arrival of merchandise in Greece." In times past to protect Turkey we have not shrunk from a pacific blockade of Greece. To protect the safety of our own men landed on Greek soil at the request of the Greek Government the nation had the right to suppose that at least something as drastic would be enforced to-day. But the policy of vacillation dies hard. The circumlocution of the British Legation at Athens requires to be annotated in London: "No Greek ships are being seized or held up in the ports of the United Kingdom, and no blockade of Greek ports has been instituted or is in force," and the mystification of the man in the street continues. If after the mission of M. Cochin the security of the Allied troops was still in doubt, no step would have been too drastic in order to safeguard them. If, on the other hand, we admitted the right of the Hellenic Government to prolong the negotiations until Lord Kitchener arrived on the following day, then there can have been little call for exercising any pressure on Greece. All that can be said in regard to what has actually happened is that the Allies' immediate demands have been restricted to requiring guarantees for the security of the Allied troops in Greece, and the Greek Government has now given these guarantees.

From the day when M. Venizelos was compelled to resign until the moment when Lord Kitchener set foot in Athens there can hardly have been any real change in the situation in Greece. The country is dominated by the King's policy, which is dictated, as has frequently been maintained in these columns, more by fear of the Germans than by love of them. Nothing that the Allies could ever threaten would convince King Constantine that he was likely to suffer as much from the Entente Powers as he would from the Germans in the event of throwing in his lot with the losing side. To overcome his fears it became necessary to impose a more immediate menace to the King's equanimity than the Germans could. This was only to be done by the exercise of sea power, but it ought to have been done many weeks ago. The efforts of Entente diplomacy have, it is to be feared, been such as to convince the Balkan States that the Allies are incapable of resolution or of resorting to drastic action. The position in the Balkans required the Entente Powers to welcome any opportunity of removing this impression. Definite action in regard to Greece—forcing King Constantine to declare himself in one way or the other—would have done as much to dishearten the Bulgarians as a signal defeat. The friends of the Entente in Roumania would have taken note and felt encouraged; while, if there should be any movement in Turkey with the object of escaping even at this stage from German thraldom, it could not have failed to have drawn support from a sign of a vigorous initiative on the part of Great Britain and her Allies. Can it be supposed for a moment that, if the Entente Powers had shown themselves bold to conceive and quick to execute, there would have been occasion for them to become alarmed over "hints" of action by Greece likely to affect the security of their troops? The diplomacy of the Allies still seems to believe in watertight compartments. The dealings with Greece do not concern Greece alone; they affect every Balkan State, and may thus exercise a marked influence on the course of the military operations. We are of opinion that if the future peace of the Near East is to be assured, Greece must still vindicate her honour by taking part in the war. As the British Cabinet has steeled itself to contemplate compulsion as an alternative to voluntary enlistment, we will hope that, similarly in the international sphere, no stone will be left unturned to hasten the moment when Greece will do justice to herself.

MESOPOTAMIA IN TRANSITU.

By Sir Lionel Jacob, K.C.S.I.

The troops of the Empire fighting their way from the Persian Gulf towards Baghdad, with all the almost intolerable hardships and discomforts of the past hot weather in addition to their anxieties, will not have found the same soothing consolation in the sound of the word Mesopotamia as did the old lady of tradition. They have had a near view of an exceptionally desolate and uninviting country, which those at a distance see in the mind's vision "foreshortened in the tract of time." Seen in that way, Mesopotamia has its glamour. In it lay the Garden of Eden, and, watered by the four streams, the Pison, Gihon, Tigris, and Euphrates, the country is known to have been one of great opulence and prosperity. "Cursed be Pharaoh, who said in his pride, 'Am I not King of Egypt?' If he had seen Chaldea he would have said it with humility," were the words of Maimun, the son and successor of Harun-el-Rashid. Egypt was wealthy and green with cultivation even in those days, and the superior affluence of Chaldea may be inferred from the comparison. Indeed, from the ruins of the old canals, and cities such as Opis, Baghdad, Ctesiphon, and Babylon, it is evident that the tract possessed great agricultural resources. Also, when Alexander of Macedon marched his army from the Hellespont to the Hydaspes, he found the plains of Mesopotamia fertile and densely populated, or he might have progressed no further. Loyal and devoted to their leader as were his soldiers, if they had seen Mesopotamia as Sir John Nixon's forces have seen it, it is not improbable they would have forced Alexander to return, just as they forced him on the banks of the Beas with all India at his feet, because a scorching and a barren desert lay between.

But it is just as certain that at some period something occurred to change a rich and productive country into a sterile waste of alkali swamps and shifting sands. That something must have been an irrigation disaster. Precisely, as Egypt without irrigation from the Nile would be a mere sandy plain, so also were the conditions of Chaldea. It depended on irrigation, and deprived of it, it was—as a civilised country—wiped off the face of the earth. The Tigris apparently abandoned the channel in which it had flowed for many centuries for its present course. In that sudden change it engulfed cities and villages, canals and cultivation, men and animals, in one wide sweep of devastation; but because we have this picture of Chaldea's evil day, there is no reason why the former prosperous conditions should not be restored. The fact that the Sublime Porte has done so little during the four hundred years of its rule means nothing at all. Sir William Willcocks might shout himself hoarse before the Turks would re-establish Eden, or make the gardens of Babylon blossom once more like a rose, but with the British the future would be quite certain. There are no engineering difficulties the hydraulic engineers of the day would not readily surmount, and it would be strange if the science of the twentieth century failed where the wise men of old succeeded. Sir William Willcocks has, it is believed, estimated that for an expenditure of thirty millions sterling an annual irrigation of 3½ million acres could be secured, increasing the value of the land from practically nothing to over a hundred millions sterling, with a gross annual value of crops of about forty millions. There is no reason to suppose that this is too sanguine an anticipation. But the engineering alone is not the only heavy item of the undertaking; the indigenous Arabs are notoriously bad cultivators; colonists would have to be introduced, and if the Panjáb need expansion for its energetic surplus population, no part of the world is more suitable for the purpose than the twelve million acres of the Tigris-Euphrates delta.

The end of the war is not, however, in sight, much less the territorial redistribution to follow it, and it would be "counting chickens" to rely on what may possibly happen to Mesopotamia in the dim future. In the meantime there appears to be one point which calls for more immediate attention. Sir John Jackson, in a lecture delivered before the Royal Institution in May last, laid stress on the navigation difficulties of the Persian Gulf. He said that dredging, and not only dredging but training groynes to reduce waterway and increase scour, would be required, and that when the irrigation potentialities of the Tigris and Euphrates had been fully exploited he foresaw that these rivers would be less navigable than they now are. For that reason he advocated that the Baghdad railway should be extended to Koweit. In short, he had discovered what engineers in India had found out before him, that when eastern rivers are tapped by irrigation canals navigation is likely to suffer at certain seasons in the year. The proper combination in such cases is water for irrigation and railways for transport. But in the meantime navigation is important, and it suffers, although the great irrigation scheme is still in the air.

Baghdad is some five hundred miles from Busreh, and Sir William Willcocks has pointed out that the river Tigris is the only means of communication worth the name between the capital of Mesopotamia and the outer world. If this navigable channel were interrupted, Baghdad would be isolated, and from the conditions of the river this is more than a remote possibility. There are several places where, in the dry season, navigation is very difficult. Steamers have to be handled with great skill, and are often delayed. In some years the mails have to be conveyed in launches, as the larger steamers cannot be employed. These are the natural vicissitudes to which all Eastern rivers are subject, but Sir William Willcocks has explained that the difficulties can be to a large extent remedied at comparatively small expense. There are three branches of the Tigris river—the Chala, the Majar Kabir, and the Machera, which are a serious menace to the existence of the main stream. They act as a safety valve at times of high flood, but they also drain off water from the river in the season of low supply, and regulators at their heads are necessary if communication between Baghdad and Busreh is to be steadily maintained. The cost of the works, to provide for the free escape of floods, and to prevent water at a low level from so escaping, has been estimated at about £33,000, or about £44,000, with a special allowance for unforeseen contingencies. The British forces are now nearing Baghdad; it is essential that communication with the Gulf should be maintained, and whatever may be the ultimate fate of Mesopotamia in the matter of irrigation and railways, this small expenditure in navigation interests might well be incurred.

CTESIPHON.

Ctesiphon, at which point the latest fighting between our Mesopotamian Expeditionary Force and the Turks is reported to have taken place, lies on the left bank of the Tigris, and is famous chiefly for the ruins of Chosroes Palace. The great arch of these ruins is over a hundred feet in height, and the wall of one wing of the palace still left standing is about the same height. The ruins are almost opposite those of Seleucia, which, though equally famous, are not in any way imposing. Both sites are covered with mounds. These, though of no great height, assume considerable importance in such a flat country; and this fact probably induced the Turkish general to select the spot for what, we may hope, will prove his last stand outside Baghdad. Ctesiphon is some eighteen or twenty miles by road from Baghdad, and has always been a favourite point for excursions from the latter city on the part of English and other European residents.

THE WAR IN THE BALKANS.

RAYS OF HOPE.

If we were to follow a custom prevailing in this country of emphasizing the losses of our friends, as gathered from enemy reports, the situation in Serbia to-day would be utterly forlorn. Day by day the Austro-German forces in the north have captured thousands of Serbian prisoners and an almost equal number of Serbian guns, whereas the Bulgars, not to be outdone, have marched from victory to victory with flashing brilliancy, and hold Serbian prisoners galore. At this rate, the Serbian army must now be decimated, unable to offer any resistance to the invader, much less to inflict reverses on him. It is a wonder, therefore, that fighting has not ceased entirely.

Happily, the picture painted for us by the enemy is exaggerated. The hour of peril has, admittedly, not passed away, but the gloom is not so impenetrable as some would have us believe. There are things happening in the Balkans about which we as yet know little; so long as our communications through Salonika with Serbia remain intact and Voivode Putnik's army is unbeaten, there is hope.

Kossovo.

Chief interest centres again in the Kossovo Polje. From the very first we predicted that this historic plain would loom large in the present campaign, and were not mistaken. The great battle of Kossovo—either on the plain itself or in its immediate vicinity, preferably to the immediate west and south-west—is preparing; perhaps even it has already begun at the time of writing. If, however, by any chance it should not take place, it can only mean that Voivode Putnik has decided in the last moment to retreat into Albania and thus, temporarily, to throw up the game. We doubt whether he will choose this course, and operations during the past week seem to argue against it.

There are two north-south routes through Serbia, one in the east formed by the Morava and Vardar valleys, and one in the west along the Mitrovitza-Uskub line. For obvious reasons the retreat of the main Serbian army from the north could not be consummated along the former route; it had of a necessity to take place in the direction of Prishtina, pursued by the Austro-Germans from the north and pressed by the Bulgars from the east, and if possible, checked by them from the south. The past week has seen the development and counter-development of these operations.

The Austro-Germans.

The advance from the north has been slow, but it has culminated, as was foreseen, in the capture of Novi Bazar. Mackensen's centre, proceeding up the Ibar Valley to Raska, and his right advancing from Vishegrad, have thus been able to join forces in the upper Ibar, about ten miles north of Mitrovitza. The left army, having advanced up the Toplitza from Nish, seized Kurshumlia, whence a road runs south through Prepolatz into the Lab Valley, and thence on to Prishtina. The most recent enemy reports claim that Prepolatz has fallen and that the Lab valley has been reached; moreover, that Mackensen's right wing has approached to within a few miles of Mitrovitza.* The iron circle on the north is, therefore, drawing closer without, however, having impaired Voivode Putnik's vital position somewhere between Prishtina and Prizrend. As pointed out by the *Times'* Special Correspondent in Monastir (November 21), "the retreating armies (Serbian) have suffered relatively little loss either in men or in material; their *morale*, in spite of great hardships and privations, is unshaken; the losses they have inflicted on the invaders have greatly exceeded their own, which are estimated at not more than 3 per cent. of their total strength." King Peter, moreover, the aged hero-king of Serbia, is with his army on the plain of Kossovo, cheering his soldiers and urging them to valorous deeds. Besides, it can be taken for granted that Montenegrin troops have joined the Serbs at Kossovo.

The Bulgars.

Mackensen evidently intends leaving nothing to chance, and, not content with driving the Serbs southwards, has ordered the Bulgars to advance westwards from the Morava to Kossovo. Two ways are open to them, one from Leskovatz up the Jablanitza to Leban, thence in a south-westerly direction to Prishtina and the other from Vranja along the Upper Morava to Gilan, and thence in a north-westerly direction to Kossovo. In the first-named sector, the Serbs have won a fine victory over the enemy at Lebana, and have driven him back; but whether they themselves will be able to tarry here with the Germans advancing from Prepolatz, along their line of retreat, is doubtful. In the second sector the Bulgars have taken Gilan, but have not been able to advance beyond.

From the south, also, the Bulgars are still attempting to push from Uskub northwards through the Katchanik Pass to Kossovo. Their losses here are reported to have been exceedingly high, but the Serbs still hold their commanding positions in spite of all the enemy's attempts to dislodge them.

The above, then, is the military position in and around the Kossovo Polje. Developments are anxiously awaited; but it is our opinion, frequently expressed, that we can place the same faith as the Serbs in Voivode Putnik, and trust that he has carefully matured his plans, and will give battle in that part of the field and at the time chosen by him. May the God of Battles fight on the side of the hero people whose fight is our own fight!

Southern Serbia.

A week ago to-day the situation in Southern Serbia was perilous indeed. Prilep, on its five roads, was on the point of capture, the Entente Consuls (exclusive of the British Consul, who remained at his post) in Monastir, had left for the Greek frontier, and the Babuna position held by the Serbs had been broken by the Bulgars. The Allies—or, rather, the French, for, up to the present, our forces have not participated actively in any engagement to the west of, or along, the Vardar—had failed, by a few hours only, to link up with the Serbs, and could, therefore, only hold desperately on to their line. As predicted, the defeat of the Serbs at the Babuna Pass obliged the shortening of the French line, and Gradsko was abandoned, the position farthest north now held by them being the left bank of the Cerna, a tributary of the Vardar. The fighting in this region has been obstinate, and the French defence of their positions against overwhelming Bulgar forces, forms one of the bright military pages of the war. Mr. Ward Price in his dispatches from this front has rendered eloquent justice to the valour and intrepidity of the French troops in the immediate vicinity of Krivolak.

In spite of their victories in Southern Serbia, the Bulgars have been unable during the past seven days to take advantage of their successes. This is mainly owing to two causes: (1) The strong French wedge along the Vardar, which the Bulgars are unable to break or capture; and (2) the development of the military operations to the north, east, and south of Kossovo. Mackensen has staked everything on the success of his strategy in this region, and he has had to rely mainly on Bulgar co-operation. For this purpose the southward push from Uskub along the Vardar, Treska, and Markovo has been turned towards the north, in the direction of Kachanik and Gilan, and the Serbian Southern Army, operating between Krushevo, Prilep, and Monastir, along the upper Cerna, has had a respite. This is one of the bright spots in the week's operations, as it enables the Allies to strengthen their positions and to make a further attempt to reach the Serbs westwards along the right bank of the Cerna. Moreover, if the worst should come to the worst, in the Kossovo region, the remnants of Marshal Putnik's army can pass through Albania southwards to Ochrida and Monastir, and thus strengthen the Allies' position in Southern Serbia, and prepare for future advances from the south against the invader.

Rays of Hope.

From the foregoing it will be seen that, in spite of the gloom which is hovering over Serbia, there are rays of hope—hope that Voivode Putnik will surprise the enemy again, as he did last November, and hope that the Anglo-French army will, in view of present circumstances, be able to lengthen out its line westwards, and, together with the remnants of the Southern Serbian army, hold on to the right bank of the Cerna River, along the whole of its tortuous length.

* Since writing the above, the enemy reports (Thursday) claim that Mitrovitza and Prishtina have fallen, and that the Serbs have retreated across the Sitnitza, a small river flowing through the Kossovo Polje in a northerly direction; further, that the Serbian Government has removed to Scutari in Albania. The fall of Mitrovitza is only a natural sequence of the fall of Novi Bazar, and the fact that the Germans only claim to have taken 700 prisoners shows that the place was evacuated. Regarding the fall of Prishtina it is to be assumed that it was evacuated in order to enable the Serbian army unimpaired to take up its last stand on Serbian soil in strong positions to the west of the Sitnitza River.

THE FRENCH FRONT IN SERBIA.

Mr. G. Ward Price, the Special Correspondent of the London Press with the Allied Powers in smitten Serbia, has sent two exceptionally interesting despatches, dated November 18 and 21, giving a summary survey of the situation. We reproduce the following extracts:—

The only troops of the Allied Forces in the Balkans which have so far been in action are the French. The engagement, in which they have fought, and the positions which they at present occupy, bear witness to the energy which General Sarrail showed in grappling with an eleventh-hour situation. They are evidence, too, of the determination with which his subordinate generals boldly attacked the enemy in greater numbers in a most difficult country and under special handicaps, some of which I shall refer to later. Without waiting for the whole of their force to be transported up country, and as each detachment arrived at railhead, General Sarrail immediately took the offensive. The principal aim in this was to bring help to the Serbians by forcing a way through to them, where they were holding on to the Babuna Pass before the Serbian Army was thrust back by sheer weight of numbers, and out of reach of the French. At one moment this junction was within ten miles of being made. It just failed, and the responsibility for failure rests neither upon the Serbians nor on the French, but rather upon a whole chain of circumstances which led to our forces not arriving in the Balkans till the Serbian Army was already overwhelmed.

The first thing General Sarrail did when he arrived at Salonika on October 12 was to push troops as fast as possible up the railway. The first French railhead on the line from Salonika northwards was made at Strumitza station, which is just before you come to the Demir Kapu ravine. This was another weak spot of the vital railway line, for here is the only place where the line crosses the Vardar and runs along its eastern or Bulgarian side for some distance. General Sarrail threw out detachments along the heights towards the Bulgarian frontier, and then pushed still further up the railway, past the Demir Kapu ravine, to Krivolac, where, after some fighting, the French have established a strong bridgehead on the east side of the Vardar, which forms another bastion in their present triangular position.

Now came the moment to attempt what was the first objective of our forces in the Balkans, to join up with the Serbians, who by this time had fallen back down the road south-west from Veles into the Babuna Pass, and were making a stand there. From Krivolac, General Sarrail's furthest point along the railway, the Babuna Pass lies about twenty-five miles due west across country. But the distance is no indication of the difficulty in getting there. The French forces that set out to try and fight a way through to the Serbians had to leave the railway and march along a single up-and-down road that runs south-west from Krivolac through Negotin and Kavadar, to where the long wooden bridge of Vozarci crosses the swift, unfordable Cerna River, a tributary of the Vardar. Passing this single bridge, they had yet to cross another few miles further on over the Rajec mountain torrent that falls into the Cerna, and, having thus marched with all their supply and ammunition eighteen or twenty miles, and crossed two precarious wooden bridges, which were the sole possible line of retreat, they were at last able to attack the Bulgarian left flank in its entrenched positions along the mountains running parallel with the Cerna River that form the back wall of the Babuna Pass, in which the Serbians were holding back the Bulgarian main army that had come pouring down the road after them from Veles to Monastir. As late as November 15 there was desperate fighting between the French and Bulgarians here, our Allies being outnumbered by three to one. The Bulgarians hurried back reinforcements from the army that was advancing down the Monastir road; they had excellent artillery positions, and the French attack, chiefly through sheer and unavoidable lack of reinforcements, failed to carry Mount Archangel, the key of the Bulgarian position.

The attack would doubtless have been renewed had not the Serbians in the Babuna Pass meanwhile been compelled to give way and fall further back towards Monastir. The possibility of joining up with them by forcing a way across mountains having thus gone, the objective of the French offensive disappeared with it, and since then they have been content to defend the bridgehead on the left bank of the Cerna, which their advance had established. . . .

The forces of the Allies so far present in the Balkans have been able to do no more than support the heroic Serbian Army in its stubborn retreat under the pressure of numbers by holding back the left wing of the Bulgars between Prilep and the Vardar river, in the extreme south of Serbia. As for doing anything from here to hamper the Germans in the undisturbed use of the railway line for the transport to Turkey of munitions, which will considerably increase the difficulties of our position in the Dardanelles, it will be long before that is possible. The distance from the nearest point where we are resisting the Bulgars to the railway is 120 miles as the crow flies, and in country like this, 120 miles is a long way. . . .

In the meanwhile the present is more a time for preparation than for execution. On the left the Serbs, who have withdrawn from the Babuna Pass, may make another stand in the plain in front of Monastir. In the centre the French are holding the Bulgars in check on the left bank of the Cerna river, and on the extreme right, where the French hold the heights along the Bulgarian frontier, a part of the British Contingent is in reserve in the second line. . . .

THE PRESS ON THE NEAR EAST.

British Advance on Baghdad.

The *Morning Post* (November 25) publishes an interesting article on the British advance to Baghdad. In describing the battle of Kut-el-Anarah the writer shows how near utter destruction were the Turkish forces on that occasion. The enemy occupied a position of great strength, from which he was driven by a well-conceived attack, in which our men fought magnificently:—

Unfortunately, night fell before the British force had been able completely to surround the enemy's left wing, on the east bank of the river; and, thanks to this fact, part of this left wing and the whole of the right wing managed to make good their escape.

According to statements made by Turkish prisoners, the Turkish left—to which our main operations were directed—had been regarded by the commander as an impossible line of attack. In dealing with the quality of our enemies, the writer says:—

The Turkish leadership was not bad, and the Turkish regulars appear to have fought as steadily and as well at Es Sinn as they did further south at Shaiba, where it is on record that in falling back from their front trenches the men merely walked, several of them smoking cigarettes quite calmly. But the Arab levies, who at the best of times have no love for the Turk, are described as being "fearfully sick of the whole business," and deserting on every possible occasion. The Arab, in fact, seldom fights really well except when he is fighting for his own hand, for his grazing grounds or his wells. Of course, he is generally ready enough to join in a "scrap," but the present fighting in Mesopotamia is not at all to his taste: it is far too grim and serious. These facts are worth bearing in mind in view of General Nixon's manifesto to the tribes, the text of which was circulated by Reuter's Agency last week. The Turk, however, is made of sterner stuff than his Arab ally, and he proved it after the unpleasant surprise he received at Es Sinn.

The article includes many extracts from letters written by officers from the fighting line, and the quotation which we give below follows a lurid description given by one of these correspondents of the miserable state of Baghdad at the present day:—

That a British occupation of Baghdad would be welcomed by the *Baghdadis* will hardly be questioned by anyone who knows the city and the people. That it would in a very short time become equally popular with the people of Irak generally is likewise sure, for our reputation in that region has stood very high for three-quarters of a century, and not even the insidious work of a host of German agents has been able to impair it seriously. Such an occupation would, if it became permanent, restore prosperity to the land and peace to its people, and it would also bring into cultivation once again one of the most fertile regions in the world. There is, therefore, every reason to hope that the work to which we have set our hand will be carried through to a finish; that the Union Jack will be planted in Baghdad by the gallant men who have carried it forward triumphantly in face of odds and difficulties that are, perhaps, hardly realised yet in this country; and that, once planted there, there it will remain permanently.

Strategical Significance of Serbia.

In the first of a series of articles on the Crisis in the Balkans which appeared in the *Nineteenth Century* (November) Dr. Niko Zupanié deals with the strategical significance of Serbia in the present war. He thinks that this significance is insufficiently understood by the Allies, and more especially by Great Britain:—

A little reflection, however, will show even to those who have not studied the map that Serbia occupies a position of the very greatest importance in the present war. . . . The fact that the German Government is directing the armies of four States against little Serbia should suffice to show that the German strategists attach vast importance to her downfall, that they believe that the issue of the war may, perhaps, be decided in that country. Possibly the German strategists are right. It is not inconceivable that the world war will be decided by another Battle of Kossovo.

The writer next deals with the geographical-strategical factors of the country, and passes on to a brief history of the rise of the Serbian nation, and shows it to have long been the stumbling-block in the way of German ambition:—

Indiscreet Pan-Germans have published books and maps depicting a Greater Germany stretching from Hamburg to the Per-

sian Gulf, or even from Antwerp to Aden, long before the present war began. The present war might conceivably make the hopes and dreams of the Pan-Germans come true. The Berlin-Baghdad railway was not merely an economic undertaking, but it could be carried out only if Serbia, which holds the pass, could be incorporated in some form or other in the Austro-German combination. This explains the unceasing hostility of Austria-Hungary, which no doubt acted on Germany's behalf as has already been stated, and it explains why the Dual Monarchy declared during the Balkan war that she would make war upon Serbia if the Serbians retained the ports on the Adriatic which they had conquered.

Dr. Zupanic laments the irresolution of the Allies at the time of Bulgaria's mobilization, but hoped, at the time when his article was written, that the Serbian army might still be saved:—

But every moment counts. As I ventured to say in the beginning, a few weeks, and perhaps a few days, may determine the fate of Serbia; and Serbia's downfall, as I have endeavoured to show, may have the most far-reaching consequences. It may determine the issue of the war, and with it the future of civilisation.

Slatin Pasha's Prophecy.

The *Morning Post* (November 23) quotes from the *Temps* the following interview which Slatin Pasha, the late Inspector-General of the Sudan, recently gave to the Editor of the *Berlingske Tidende*:—

Egypt is plainly defensible if the people do not rise against the British, which, however, might very well happen. The population is Egyptian, and composed of peaceful agriculturists, but when once an agitation starts anything becomes possible. However, the conquest of Egypt is not the only danger for Great Britain. It will be possible for the Central Powers, by means of a Zeppelin bombardment, to destroy the locks of the Suez Canal and to stop all traffic through it.

The establishment of free communication between the Central Powers and Constantinople will necessarily bring the Egyptian question definitely into practical politics. In Austria-Hungary we are wondering if England will allow matters to drift as far as that. We do not think so. On the contrary, the Austrians seem convinced that England will not dare to continue the war when communications are effectively established between Constantinople, Berlin, and Vienna. Despite everything that happens, the attack on Egypt will be the next great enterprise of the Central Powers.

France and the Near East.

The *Morning Post* (November 22) publishes some interesting extracts from the French Press regarding affairs in Greece. Our first quotation is from an article, written three weeks ago, but only just received, from the special correspondent of the *Echo de Paris* in Athens:—

That the King is King he owes to M. Venizelos. That Greece has come victorious out of her last two wars and that she was able to take Salonika he owes to M. Venizelos. From the German standpoint that is quite enough to explain why M. Venizelos must go. . . . When the war broke out France occupied a privileged position in Greece. The country unquestionably was unanimous in its good wishes towards us and unanimous also in regretting that its King, whom it adores and whom it calls Constantine the Victorious, should not share its views. . . . The King is obsessed by the single thought that no Greek soldier should fire a shot at the Germans.

M. Gustave Hervé, writing in the *Guerre Sociale*, insists that the troops in Salonika should be reinforced, and maintains that this could be done at the expense of the home front, which, he claims, is stronger than is necessary. His article opens in the following words:—

Can we help thinking of the heroic Serbian people whom the Austro-Germans, with their Bulgarian accomplices, are engaged in assassinating? Is there a single one of us who does not think several times a day with anguish of our people who are there in Macedonia facing the Bulgarians, with the chance of Greece plunging a dagger into their back?

"Polybe," writing in the *Figaro*, says:—

We were summoned to Salonika by the man who had the right to speak in the name of the Greek nation and Hellenism. We are there by virtue of the treaties which impose on us the duty of defending Greece against Turkey with her helmet, Germany, and Bulgarian with her turban. We, the English and ourselves, are there until we have concluded our peace, as was the case at Malakoff.

Bulgarian Responsibility.

Mr. James W. Ozanne, writing on Germany's latest adventure in the *Nineteenth Century* (November), devotes the greater portion of the beginning of his article to a résumé of events in the Balkans over a very considerable period of time. The author's remarks date, indeed, from a week before the battle of Sedan was fought. The writer considers unity to be the one essential to ultimate victory, and deprecates the "tendency in certain quarters on our side of the Channel to disparage, carp, and criticize, as if the task with which our Government was confronted in that fateful August week was not well-nigh superhuman." Mr. Ozanne thinks that our own errors and those of our Allies are as nothing in comparison with those of our Teutonic enemies. He concludes:—

At the present date very harsh things are being said of our diplomacy by critics at home, as if it is to blame for the black ingratitude shown by Bulgaria in ranging itself against its liberator to whom it appealed time after time, and not in vain, when the folly—to use a mild expression—of its own selfish Tsar had dashed it from its proud eminence and brought upon it shame and something very like ruin. Right-thinking Bulgars are the last to adopt such a view, as they well know the man with whom we have been dealing, and the indignant protests which they have raised more than exonerate the diplomacy of the Allies. *Quem Deus vult perdere prius dementat.* Surely such megalomania comes under this category; and ambassadors are not physicians.

An Appeal to England.

The following quotation is taken from a forcible appeal to the British nation which appears in the *Southern Slav Bulletin* (November 20):—

Before the overwhelming forces of the enemy the hard-pressed Serbian army, red with the blood of battle, but strong and intact, carrying with it the aged King and the Government of the country, is retiring into the God-given mountain strongholds of the Balkans, where the struggle can be prolonged and maintained until it ends in victory or death. Into those rock-bound and almost inaccessible fastnesses it is followed by hundreds of thousands of unarmed and defenceless women, old men, and young children. *They must follow*, for they are flying for their lives from the slaughter, flying so that by saving themselves they may save the nation and its future. Amid these lofty mountains and grim passes the Serbian army, from the first man to the last, will redeem its sacred pledge.

The writer recognises with gratitude the generosity of the British public towards Serbia in the past, and issues the present appeal for military aid, and plain, material assistance in full confidence that the British Empire will not be insensible to the urgency of Serbia's need.

An Enemy Opinion.

We take the following quotation of an enemy's opinion of Britain from the Budapest paper *Az Est*, as reproduced in a recent number of the London *Sphere*. The paper comments upon the fact that our Eastern ally is being driven back, but says that the Englishman, "unlike the good business man he is so persistently deemed, will now do his utmost to settle down to a three or four year war," working with bull-dog tenacity to crush his enemy in the end.

When that end may come is no concern of his. He began the business. He will see it through. In this strange phase of the English character there is enormous strength. We may be sure that if all the belligerents are beaten into insensibility he will still hammer away with bleeding fists, tired and exhausted. England in her persistence will never stop, even if she knows that the longer the war lasts the more she will bleed, even if she knows that all possible gains at the finish will not make good half of what she has lost. . . . Those Germans who look forward to an early peace in this world with longing hearts must turn their eyes on England hopelessly, for as long as the sun of peace is not rising in the isles to the west of us, there is no hope for peace. And England, secure in her citadel, behind the bulwark of her fleet, can go on and on and on.

Articles to Note.

"The Crisis in the Balkans: A Postscript," by Alfred Sharpe, and "The Real Austria," by Caroline F. M. Zanardi Landi, in the *Nineteenth Century Magazine* (November).

"Napoleon's Dromedary Corps," by L. FitzGerald, in the *United Service Magazine* (November).

"The Picture at Yildiz: The Sad Chronicle of Our Diplomacy in the Levant," in the *World's Work* (November).

"Bagdad Supplement" to the *Standard* (November 23).

"The Allies and Greece," by a Student of War, in the *Manchester Guardian* (November 23).

"Germany in Asia. II.—The Bagdad Railway," by Evans Lewin, in the *Evening Standard* (November 22).

"Russia's Move to Teheran," in the *Field* (November 20).

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Situation in Persia. Nov. 18.

Replying to questions put by Sir G. SCOTT ROBERTSON and Colonel YATE, Lord R. CECIL said that so far as the Government had information, the Shah was still at Teheran. He was afraid he could not tell the House when the German, Austrian and Turkish Ministers had gone.

Greece and the War.

Sir E. CORNWALL asked the Secretary for Foreign Affairs if he could lay on the Table of the House papers dealing with the attitude of Greece during the war and in the course of the recent negotiations; and if he could state whether the Foreign Office had official knowledge of the Greco-Bulgarian Treaty, announced to have been signed on October 15.

Lord R. CECIL: Papers will be laid eventually, but I cannot undertake to lay them now. The answer to the last part of the question is in the negative.

Dardanelles Sick List.

Mr. TENNANT, in reply to a question addressed to him by Mr. JOYNSON-HICKS, states that up to date about 55 officers and 1,700 other ranks have died with the Mediterranean Expeditionary Force from causes other than wounds. These figures include the Royal Naval Division.

Food for Serbia. Nov. 23.

Sir E. GREY, replying to Sir R. COOPER, who asked what had been done by the Government to protect the Serbian people from starvation, said:—Everything possible has been done, and his Majesty's Government are actively engaged in endeavours in concert with their Allies to provide early and sufficient supplies of food.

Persian Disorder.

Mr. GRANT asked whether the Secretary of State for Foreign Affairs had received official information to the effect that his Majesty's Consul and the manager of the Imperial Bank of Persia at Shiraz had been made prisoners, and, if so, by whom and by whose orders.

Sir E. GREY: The answer to the first part of the question is in the affirmative. The arrest of the persons in question and seizure of property was carried out by the gendarmerie, but without the knowledge of the Persian Government. It was an act of unprovoked brigandage. Details have only just been received, and when possible a fuller communication will be made to the Press. Information has also been received that the gendarmerie, under its foreign officers, is in open revolt against the Persian Government and cut telegraph lines, and seized and robbed road toll-houses and offices. Our information is that all this has happened in defiance of the Persian Government, who resent the conduct of the gendarmerie and their officers.

Entente Payments to Greece.

Sir A. MARKHAM, having asked the Secretary for Foreign Affairs: Whether, seeing that the treaty of 1863 between Russia, France, and this country, of the first part, and the National Assembly of Greece, of the second part, provided under Article X. that the three Great Powers would each make a payment of £4,000 per annum as a personal donation to the King of the Hellenes out of moneys due to them by Greece, these payments were still being continued, or if the capital moneys owing to the three Powers had been repaid,

Sir E. GREY, in a written reply, states: The payments referred to ceased with the death of King George of Greece in 1913. The Greek debt to the three Powers is still in process of discharge.

Greece and the Entente. Nov. 24.

Sir H. CRAIK asked whether the Treaty of 1863, which confirmed the gift of the Ionian Islands to Greece, and by which, at the same time, the independence of Greece as a constitutional monarchy was guaranteed by Great Britain, France, and Russia, retained its binding force, in view of the present relations between the Greek Government and the Parliament, the powers of which were now virtually in abeyance.

Lord R. CECIL: I do not think it can be said at present that the conditions of the Treaty have been violated.

LETTERS FOR THE SALONIKA FORCES

The Postmaster-General announces that the address of all letters and other postal packets intended for members of the British force operating from Salonika should include:—(i.) Regimental number (if known), (ii.) rank, (iii.) name, (iv.) squadron or company, (v.) battalion, battery, regiment (or other unit), Staff appointment or Department, (vi.) Salonika Force.

In order to ensure delivery the following particulars should be inserted:—(i.) Infantry: Number of battalion as well as name of regiment. (ii.) Artillery: Number of battery. If the battery is lettered the number of the brigade is necessary. (iii.) Cavalry: Letter or number of squadron and name of regiment. (iv.) Royal Engineers: Name and number or letter of company, section, squadron, or troop. (v.) Royal Army Medical Corps: Number and name of ambulance, hospital, section, or squad. (vi.) Army Service Corps, Army Ordnance Corps: Number, name of company, section, or other unit.

The rates of postage are as follows:—Letters, 1d. per oz.; postcards, 1d. each; newspapers, ½d. per 2 ozs.; parcels, not exceeding 3 lbs., 1s.; parcels, exceeding 3 lbs., and not exceeding 7 lbs., 1s. 9d. Parcels exceeding 7 lbs. in weight cannot be accepted. Letters will be accepted for registration, but not for insurance or express delivery. Parcels will not be accepted for registration or insurance, or for express delivery.

THE ARMENIAN MASSACRES.

At a meeting held at Newport (Mon.) on Monday, under the presidency of the Bishop of Llandaff, to protest against the Armenian massacres, a letter from the Archbishop of Canterbury was read. In this the Primate, referring to "these appalling massacres, cruelties, and wrongs," said: "If we as a belligerent Power are unable to take effective action in the matter we can at least do our utmost to secure that non-belligerent nations shall be awakened to those fearful realities. We want not merely to render impossible the continuance of the present horrors, we want to prevent their recurrence in years to come. To that end every effort that we can make is worth while. I shall take every suitable opportunity of calling attention to the subject and of bidding men and women weigh the true meaning of these vast and organised iniquities perpetrated by Turkish hands and apparently with the connivance of their German Allies."

Bishop Crossley, in a speech describing the massacre, said it was the most awful picture which had ever been put before the world. He did not think the British people realised it, but he hoped that the people of the United States would vindicate the cause of justice. The Armenians, the oldest Christian nation in the world, were being exterminated because the Young Turkish Party wanted to get rid of the most enterprising and best business people in their midst.

DIRECTORY—*continued from page* 104.

SACKVILLE-WEST, Hon. B. G., 13, St. George's Road, Eccleston Square, S.W.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C

Greek shipping has been well to the front during the past week. On November 19, the British Legation at Athens communicated a statement to the Press to the effect that "in view of the attitude adopted by the Hellenic Government towards certain questions closely affecting the security of the Allied troops and their freedom of action (two privileges to which they are entitled in the circumstances in which they landed on Greek territory), the Allied Powers have deemed it necessary to take certain measures the effect of which is to suspend the economic and commercial facilities which Greece has hitherto enjoyed at their hands." This was generally taken to mean here that a state of "peaceful" blockade had been established against Greek ports, and that the loading of Greek ships in British ports would be summarily stopped. On Tuesday, however, the Foreign Office issued the following statement: "No Greek ships are being seized, or held up, in the ports of the United Kingdom, and no blockade of Greek ports has been instituted, or is in force."

***

In the port of Cardiff (says the *Financier*) Greek vessels continue loading and sailing unhindered, and further charterings of Greek tonnage are reported for neutral ports or for the requirements of the Allied countries. A few weeks ago there were inquiries for a large quantity of coal for Greece, but the transaction appears to have been deferred in view of later developments, and at present there are no coal orders at Cardiff for Greece. The market is, however, brisk with charterings for Mediterranean ports, particularly Italian and Northern Africa. Freights maintain high record rates, tonnage shortage showing little sign of relief.

***

The position, therefore, as regards Greek ships in home ports is that restriction in the way of loading is only applied to bottoms loading for Greek ports. As long as the attitude of Greece is a riddle, the Allies, in command of the sea-routes, have decided to control the passage of military and other supplies to Greece, such pressure, peaceful and yet firm, being applied (1) to the loading of Greek ships at home ports (or at the ports of allied countries) with a Greek destination; and (2) to the search of suspect craft approaching Greece. It is to be hoped that these precautionary measures will have the desired effect without interfering too much with the economic situation in Greece, at present anything but brilliant.

***

Since writing the above notes the Greek situation seems to have eased. An official statement issued by the Greek Government on Wednesday evening, as reported by Reuter, claims that the Government's reply is "couched in very friendly terms, and gives satisfaction to the Entente demands and all the guarantees considered essential." I am glad to see that this is so, as it will immediately reflect on Greece's economic and shipping prospects. Thus, the Greek steamers at Malta have already been released, as the following official communiqué announces:—"The British Government has authorised the departure of Greek steamers loaded with corn and other goods which have been held up at Malta. The transmission of cables via Malta (adds Reuter's Agency) is also authorised." Greek shipping in British ports will also feel the immediate effect of a better understanding between Greece and the Entente Powers.

***

In view of the opinion generally obtaining that the cupriferous deposits of Cyprus are practically exhausted, it seems strange to hear of the reported good work being done by the American copper-mining syndicate in Skouriotissa. "The total quantity extracted from these mines to date aggregates about 4,000,000 tons (says the U.S. Consul at Alexandria), and it is believed that after some necessary tunnelling has been completed the daily output of ore will approximate 1,000 tons." The figures appear to me to be "some" figures, to use an American colloquialism; neither has the percentage of copper contained in the ore been made public. However, I wish the company every success, principally because it will open the eyes of those who continually decry Cyprus to the fact that her mining resources have not been exhausted. Admittedly, it would be a shame for us if our cousins from across the Atlantic had come to show us that our prognostications about the Cyprus copper-fields were all wrong, but by all means let them do so. In the meantime, I read that the syndicate has applied for Government permission to lay a railway from its mines to the port of Karavostassi, so as to facilitate the shipping of ore.

***

The formation in the United States, as announced by the *Times* New York correspondent, of the American International Corporation, with a capital of £10,000,000, is an event of transcendent importance. Following so closely on my remarks last week anent the practical steps being taken by the United States to prepare *now* for the coming trade war, this new organization comes as a conclusive proof that the great magnates—commercial, industrial and financial—of New York and other American cities have decided that the time has come for action. The new corporation is registered "to do international business and establish trade relations with different countries which will help to make a market for American products; to finance and promote development in foreign countries by American engineers and manufacturers of great public and private undertakings; to assist in financing rehabilitation of industries in foreign countries, and to undertake such domestic business as seems advantageous in connection therewith."

***

The scheme is a bold one. It is backed by large capital and such names among its directors as Morgan, Rockefeller, Stillman, Armour, Corey, Otto Kahn, etc. It proposes "to enlist the support and co-operation of American investors in foreign enterprises; to form, in financing old or new undertakings abroad, separate companies and offer American investors its own debentures, secured by bonds or stocks of foreign properties." That is the way to prepare for the coming trade war, and it is left to the Americans to be the first to initiate steps that will place them in the very front rank of the world's traders. Compare this attitude with ours. We are still discussing ways and means, and are trusting to our proverbial luck. Where is our international trade corporation backed by ten million pounds sterling? Where are our Rockefellers, Morgans, and Kahns, to give their valuable assistance to the cause? They are as yet unorganised, indifferent, too busy with other problems. In the meantime, the States spurt ahead, and in Germany the whole industrial world is taken directly under the powerful protection of the Government, and is preparing for its share in the world's trade of the future. Only we are inactive (except as far as schemes are concerned), and we shall regret it. There is only one thing to be done: we must follow the American lead without loss of time, and also form a powerful international corporation.

***

Mr. J. F. Lynch, chairman of the Euphrates and Tigris Steam Navigation Company, has written a letter to the *Times* pointing out that all published reports of the operations in Mesopotamia omit any reference to the fleet of steamers, tugs, and lighters belonging to the company in question. The statement is, I venture to say, hardly accurate, as reference has been made to them in these columns. These vessels with their crews, including British mercantile officers and engineers with an intimate knowledge of the difficult navigation of the rivers, have been employed in fighting and transport work in all the engagements on the Tigris and Euphrates since the arrival of the British-Indian forces in Mesopotamia, and, as Mr. Lynch rightly surmises, their assistance must have largely contributed to the success of the expedition.

***

Reuter's Agency reported yesterday from Cairo:—"In view of the large purchases of agricultural and other produce by the military, a scheme is being considered to form a board on which the Egyptian Government will be represented, to safeguard the interests of Egyptian landowners and the fellaheen by preventing the depletion of their agricultural resources, at the same time enabling them to sell surplus stocks direct to the purchaser." The scheme seems to me to be a practical one if it can be carried out satisfactorily. At any rate, it is clearly our duty to guard the fellah against either the depletion of his stocks or his exploitation by middlemen. Incidentally, I see that the Egyptian Government have provisionally revoked the prohibition of the exportation of eggs, which can now be exported to places within the Empire. This will be a great relief to overstocked holders of eggs.

***

It will be remembered that some months ago the Bulgarian Government invited tenders for the construction of four railway lines. No response having been forthcoming, the Government has now begged Austria to capitalise and construct the lines for her—a proposal that was, of course, warmly welcomed in Vienna. Germany, on the other hand, judging by M. Tontcheff's success at Berlin, referred to elsewhere, is only too eager to repay Bulgaria's treachery by financing her during the war. The more Germany has to pay out, now and later, the merrier. For the overdraft (partly used in paying servants), plus interest, will have to be met some day!

Trade Methods in Roumania.

Openings After the War.

H.M. Consul-General at Galatz has published some important information regarding Roumanian trade, from which the following are extracts :—

Trade Returns.

The total value of the foreign trade of Roumania in 1912 (the latest year for which statistics are available) was £51,200,370, of which imports accounted for £25,516,220, and exports for £25,684,150, showing an increase in imports of £2,726,420 as compared with 1911, but a decrease of £1,984,650 in exports. The chief articles of import into Roumania are iron and steel, cotton goods, machinery, woollen goods, ready-made clothing and drapery goods, carriages, leather and leather goods, timber and articles made from timber, silk goods, fruits and groceries, chemicals and drugs, rubber and manufactures of rubber.

The chief competitors of the United Kingdom in the Roumanian market are Germany and Austria-Hungary. The former country in 1912 supplied nearly 38 per cent. of the total imports, and Austria-Hungary accounted for just under 22 per cent. The share of the United Kingdom, on the other hand, was under 14 per cent.

In 1912 Germany contributed goods to the value of £3,444,407, or over one-half of the total imports of metals, metal goods, and mining products imported into Roumania; the United Kingdom contributed £1,030,545, or less than one-sixth. In the case of iron tubing, Germany contributed nearly 95 per cent., and of bar iron over 60 per cent.; the share of Austria-Hungary in this latter article was 30 per cent., while that of the United Kingdom was less than 2 per cent. There does not appear any apparent reason why Germany should hold such a commanding position in the market.

While Germany occupies a leading position in almost every class of iron manufacture, it is in the case of small articles that German supremacy is most marked. Carpenters' and blacksmiths' tools, e.g., hammers, saws, planes, vices, squares, etc., are almost exclusively of German manufacture, and no British goods are to be found in the market. The total imports of locks, padlocks, and hinges in 1912 was 1,120 tons, and of this quantity Germany provided 770 tons, while only eight tons came from the United Kingdom. Many of the locks at present imported into Roumania leave much to be desired, and British manufacturers ought to have little difficulty in introducing a better class of article. These things may appear small in themselves, but they mount up, and the aggregate trade done in small articles of different kinds is very considerable.

Nearly all the iron obtained from the United Kingdom is in the form of sheets. The market for tin plates is almost exclusively in British hands, the import from the United Kingdom in 1912 having been £117,880 out of a total of £124,270. The United Kingdom also furnishes nearly all the galvanised sheets and the thinner black sheets imported, but the thicker gauges of black sheets are mostly obtained from Germany and Austria-Hungary.

Machinery.

The machinery imports in 1912 reached £2,614,443, of which Germany supplied £1,499,929, or over 57 per cent., Austria-Hungary £394,254, the United States £325,080, and the United Kingdom £222,649. German firms are thus far ahead of their competitors in this market, and their share in the trade shows a more or less steady increase. The proportion of the trade in British hands, on the contrary, is decreasing.

Hydraulic machinery came almost entirely from Germany and Austria-Hungary; railway engines from Germany and Belgium; oil engines from Germany and the United Kingdom; gas engines from Germany; machine tools from Germany and Austria-Hungary; printing, paper-making, and textile machinery practically all from Germany; engines for use in agriculture and threshing machines from Germany, the United Kingdom, and Austria-Hungary; reapers and binders from the United States; other agricultural machinery almost entirely from Germany and Austria-Hungary; sewing machines from the United States and the United Kingdom; typewriters also from those two countries; electrical machinery and apparatus nearly all from Germany.

Carriages.

Under the heading of "carriages" are comprised railway and tramway rolling-stock (except locomotives), motor-cars and motor cycles, and ordinary bicycles. The imports in 1912 reached £1,017,685, of which Germany contributed £380,514, France £202,554, Austria-Hungary £160,232, and Belgium £130,982. The import from the United Kingdom was only £51,745, or about 5 per cent. of the total, and was confined almost entirely to motor-cars. With the spread of luxury these are coming into much more general use, especially in Bucharest, and the market holds out good prospects. The trade at present is chiefly in the hands of Germany, France, and Italy, whose manufacturers seem to have been more energetic in pushing their makes than have their British rivals. The British cars which have been imported up to the present have generally given satisfactory results, and there seems to be no reason why manufacturers in the United Kingdom should not be able by energetic and well directed efforts to obtain a fair share of the trade. The plan adopted by the most successful of the foreign firms has been the establishment in Bucharest of depôts where a stock of cars is kept on view and where accessories and spare parts can be obtained and repairs carried out. British firms might find it worth their while to consider the adoption of such a system. The expense of running an establishment of the nature indicated might be too great for some individual firms, but a number of firms could co-operate and save management expenses by having one depôt where their respective makes could be kept in stock. In any case, the market is at present only in its infancy, and seems to be well worth nursing.

German Transport Facilities.

Among the disadvantages with which manufacturers in the United Kingdom have to contend in competing in the Roumanian market with their German and Austro-Hungarian rivals, one of the most obvious is that of geographical position. The fact that both Germany and Austria-Hungary are situated close to the market enables manufacturers in these countries to deliver goods much more rapidly and at less expense than their British competitors. The great bulk of the goods exported to Roumania from the United Kingdom have to make a sea voyage lasting from three weeks to a month, while most of those obtained from Germany and Austria-Hungary are sent direct by rail in a couple of days. As those articles are best suited for railway transport which are of high value in relation to their bulk, it is in these lines that the Germans and Austro-Hungarians are gaining ground and manufacturers in the United Kingdom losing it most rapidly. In the case of bulky goods, where the advantages of railway transport are less marked, there is a less apparent decrease in the share of the trade in British hands.

Trade Terms.

The preponderance of German and Austro-Hungarian goods in the Roumanian market is not, however, due to geographical position alone; the chief reason of this success is, probably, that German firms are more alive to the possibilities of the market, have taken greater pains to cultivate it, and are much better represented in Roumania than are their British competitors. British merchants and manufacturers have never looked with favour on the Roumanian market; at any rate, they have never shown anything of the keenness displayed by German and Austro-Hungarian firms to extend their business with the country. They have hitherto relied almost entirely on the services of commission agents to push their wares—that is on persons representing probably a large number of firms of different nationalities, and having few or no reasons for pushing the goods of one in preference to those of another. As a matter of fact, any preference that might exist would probably be for German and Austro-Hungarian goods, as nearly all the commission agents in the country are German-speaking Jews, and many of them are of German and Austro-Hungarian extraction. Continental merchants, on the other hand, generally send out travellers to obtain orders, and in some cases they have branches in the country itself. Such a system secures to the exporter a much better chance of doing business than the employment of agents on a commission basis. The establishment of a branch may not commend itself to some British firms on account of the expense, but a number of firms in any particular industry could combine to run an establishment in Roumania for the sale of their goods. All travellers and other representatives should be able to transact business in German or French (the former for preference), failing Roumanian. Catalogues should also be in one of these languages, and the metric system should invariably be employed in quoting prices.

Another point is the question of credit. As a general rule, in an agricultural country such as Roumania, where money is not plentiful until the crops have been harvested, credit is a necessary element in all business transactions on a large scale. Particularly is this so in the case of agricultural machinery and other expensive goods, which must be paid for directly out of the produce of the harvest. Both German and Austro-Hungarian firms generally grant more liberal credit terms than those offered by their British competitors. That they are able to do so is largely due to the fact that, being better represented, they have a more complete knowledge of the market and of the standing of their clients than have their British rivals. There is little doubt, however, that if British manufacturers had better representation they could discriminate to a greater extent between the different classes of clients and adopt a more elastic credit policy without fear. The fact that in Germany so many of the industrial concerns and commercial establishments are owned by limited liability companies is another factor which enables German firms to give easier credit terms than their British competitors. For these companies, with a big capital at their disposal owned by a large number of shareholders, are able to undertake operations on a more extensive scale and to run greater risks than firms with limited resources in which all the capital is in one or two hands.

Banks.

Among the other advantages which the Germans and Austro-Hungarians enjoy in competing in the Roumanian market, one of considerable importance is that the majority of the local banks are financed by, and in many cases are branches of, the large banks in Germany and Austria-Hungary. That being so, they naturally do everything in their power to further the trade of these two countries. Through them, manufacturers in Germany and Austria-Hungary can obtain continual information and advice regarding the state of the market, the financial position of their clients, and the credit which may safely be allowed them; they can also get their debts collected, and, in general, have their interests watched in many ways which would otherwise be impossible. There is no bank in Roumania which looks after British

interests in the way that German and Austro-Hungarian interests are looked after by the banks financed in Germany and Austria-Hungary.

Notwithstanding this, it is considered that manufacturers in the United Kingdom, by taking greater pains to nurse the Roumanian market, could attract to themselves a fair proportion of the trade at present in German and Austro-Hungarian hands. It seems necessary, however, that they should send out representatives to Roumania to study the conditions of the market and ascertain the requirements of the people. There can be no doubt that, so far as quality is concerned, British goods are generally recognised as being superior to those of Continental manufacture. Unfortunately, the Roumanian public is apt to put smartness of finish and cheapness before quality and durability, but manufacturers must accustom themselves to this, and, whilst endeavouring to a certain extent to embrace in their own manufactures some of the points which seem to meet with popular favour in the products of their competitors, they should seek to educate traders and the public generally to appreciate the superiority of British goods. This can only be done by keeping the latter constantly before the Roumanian public. Advertisement may be resorted to with advantage in this connection, but it can only supplement—it cannot supplant—the benefits to be derived from personal explanation and demonstration by capable representatives.

Although existing difficulties in the way of transporting goods and transmitting money make the conduct of business with Roumania almost impossible, the present is undoubtedly the time to secure orders, for there will be a large demand for manufactured goods of every description as soon as these difficulties have been overcome.

The British Consul at Bucharest states that the United Kingdom manufacturer on the look out for an agent almost invariably picks the cheapest, no matter what his qualifications may be. Such a thing as a fixed salary would never be allowed, the idea generally being that a man on commission works more actively. The idea seems good, but not where one has to do with semi-Orientals. Unless the agent is very conscientious he soon puts himself in accord with the buyer or buyers to the disadvantage of the seller. This is done by the buyer objecting to the goods as not being up to sample and demanding a reduction in price, in which he is backed up by the agent; or also with the help of the agent, by the buyer going bankrupt altogether, an arrangement agreeable to all concerned, except the seller, being arrived at. On the German plan this kind of thing cannot occur. Either the agent is himself a German, chosen from those resident, or is a person sent by his firm to be always, more or less, on the spot. It is quite likely that a sub-agent is chosen from the local fraternity, as, if well kept in hand, he is very useful; but he is never left long enough to his own devices to play any tricks. Again, where the agent is a resident German, he is always placed on a fixed salary basis, with a commission as well; therefore he feels no need to try any of the devices as above explained.

In a word, the difference between the German and the British manner of working travelling is that German firms do not consider expense, whilst British firms do, and as a result, the latter not only secure less business, but suffer losses in the end. If the honest agents at Bucharest were more patronised, the Roumanian market would not have been avoided by British exporters.

Turkey and the War.

U.S. Consular Reports.

We reproduce to-day further extracts from the U.S. Consular reports from Turkish vilayets.

III.—TREBIZOND.

At the beginning of last year the business people of the Trebizond district were of the opinion that the year 1914 would make up to a great extent for the hard times and losses following the Italo-Turkish and the Balkan wars. After the European war broke out, however, these expectations came to naught.

Following the decree of general mobilization in August, the first step was the cancelling by importers of all their previous orders. In September, the busiest time for exports, the Dardanelles were closed, which stopped almost entirely all the exports and imports of Trebizond. In November an enemy fleet bombarded for the first time the city of Trebizond, which bombardment paralyzed all business, the people leaving for the villages and the market being kept practically closed.

Trade Returns.

There are no official statistics available showing the trade of Trebizond with foreign countries. The statistics of imports and exports given later in this report are those based on information received from merchants interested in each branch of the import and export trade, from the foreign steamship companies, banks, etc. It was difficult to secure the necessary data for last year owing to the abnormal conditions. The merchants have left the city for the villages in a great many instances, the foreign steamship agencies have been closed, the bankers rarely come to the city and at irregular intervals. Even the Imperial Ottoman Bank opens its doors only three days in the week, and that for three hours each day, and the market that we used to study keeps practically closed.

The influence of the war upon the trade, and particularly for this district the closing of the Dardanelles, is evidenced by the fact that the imports decreased in value from £1,649,000 in 1913 to £967,000 for 1914. The imports from July 1 to December 31, 1914, were valued at but £10,403. The exports decreased in value from £821,358 for 1913 to £351,260 for 1914. The exports for the last six months of 1914 amounted to but £78,285.

This district is an agricultural and not an industrial one; and although it remains undeveloped, it is rich in mines and forests, with vast and rich plains, and a considerable amount of water power. If proper attention was paid to the development of the country, and particularly to railroads, and to the improvement of communication and transportation facilities, it should not be long before this district enters into a prosperous era. War has brought the people in contact with modern improvements, such as automobiles, motor-boats, etc., and their advantage over the old system has been so evident that it is believed after the war is over there is going to be a considerable demand for the same.

Exhausted Stocks.

Another important point is that this district, unable to import, has used up all the available stock, therefore when steamship communication is resumed there will be a great demand for all the articles listed in the table of imports and for other articles. Owing to the depleted stock the price of leather has increased considerably. Fortunately for Trebizond, at the time the imports stopped there was a considerable stock in this market in transit for the interior, which for lack of means of transportation has been left and consumed here. It therefore follows that the demand for goods in the hinterland will be even greater than in the coast towns.

It is natural that after a crisis some changes are inevitable, and firms that intend entering into commercial relations with this market should take certain precautions with regard to granting credits; cash on delivery is the only acceptable term. Exporters should enter immediately into communication with importers and come into some understanding in regard to their goods, prices, and terms, so as to be ready to send their goods when steamship communication is re-established. Money is scarce throughout the district. Although the Trebizond branch of the Imperial Ottoman Bank paid in full all the money deposited with that institution, and most of the other banking houses have done their best to refund to their depositors, either totally or in part, there still remains unpaid a large sum floating on the market, at an interest of 9 per cent. and protected by the moratorium.

Crops and Shipping.

The tobacco crop of 1914 was of good quality and was over 1,000,000 pounds more in quantity than the crop of the preceding year. Tobacco exports from the Trebizond-Platana region in 1914 amounted to 500,447 pounds, against 3,315,259 for the preceding year. Fortunately tobacco improves in quality by remaining one or two years; therefore it is hoped that there will be no important loss on this article.

The annual crop of filberts for the whole district, usually estimated at 600,000 cantars (of 124 pounds each) of unshelled nuts, in 1914 was a record crop of 1,200,000 cantars, of which hardly 1-10th has been exported. The remainder is being held for a market.

Steam vessels numbering 662 and sailing vessels totalling 4,782, with a total registry of 694,131 tons, entered the port of Trebizond in 1914, as against 636 steam vessels and 5,261 sailing vessels with a total tonnage of 1,028,044 in 1913. Ottoman vessels—372 steam and 4,773 sailing—had the greatest tonnage, 251,948; French were second, numbering forty-two steam vessels with a total tonnage of 113,107; and Russian vessels had third place, numbering sixty-nine steam and nine sailing with a total tonnage of 104,022. The remainder were Austrian, Persian, Italian, German, British, Greek, Belgian, Roumanian, and one American of 782 tons registry. A considerable part of the above total registry of 694,131 tons was for military purposes, which makes the difference for commerce still greater compared with the preceding year.

The steamers that have called at this port since the closing of the Dardanelles have been from Constantinople, carrying mostly Government and Red Cross supplies. The amount of other goods brought by them has been insignificant. Some filberts have also been exported by these steamers via Constantinople-Dedeagatch, but the transit did not prove encouraging; besides being expensive, it took over three months from the time the goods left Trebizond to the time they were reshipped at Dedeagatch.

The International Institute of Agriculture estimates at 2,960,000 metric tons the Roumanian harvest of 1915, as compared with 1,260,000 tons in 1914. The harvest was excellent, surpassing by more than 600,000 tons the average of the harvests from 1910 to 1914. The crop of oats for the current year reached 380,000 tons, against 367,400 tons in 1914; that of corn, 2,800,000 tons, against 2,782,700 tons in 1914; barley, 516,000 tons, against 536,600 tons in 1914; rye, 80,000 tons, against 49,700 tons in the preceding year.

DATES.

SPHINX BRAND.

PRODUCE OF BASRAH.

Selected from the famous Gardens.
Only superior qualities of
Hallawees, Khudrawees, Sayers and Zehdi
are packed.
In cartons of one to four pounds, small boxes, ordinary cases, baskets, tins, and skins.
SPHINX competes with all other brands in quality, packing, and is guaranteed to be clean, sound, fresh, and free from disease.
Sole Proprietor:
BAHJET S. FORAGE, BASRAH.

Engineering Notes.

Combined Machine Tools.

The value of a machine-tool which combines in its construction and handling the capacities of various other tools, is particularly appreciated in factories and workshops where either want of space or a consideration of outlay hinder the acquisition of separate machine-tools for each kind of work. Such disadvantages are very frequently experienced in the East, where, owing to a comparative scarcity of engineering workshops for repairs, etc., every well-managed factory employing machinery is obliged to provide a workshop on the premises equipped, as a rule, with one or two of the more expedient machine-tools for doing the necessary repairs which at times may be needed. On the other hand, it often happens that engineering workshops, which depend more or less on casual work, and which have not sufficient work for the continuous employment of certain machine-tools, prefer rather to do without them than to embark on an outlay which they often cannot afford; and thus on occasions when such machines are mostly needed they are obliged to make shift with dilatory methods which, of course, do not always secure satisfactory results. It is obvious, therefore, that a machine-tool which is capable of being converted into various other machines is a most economic and very efficient equipment in such factories, engineering workshops, as well as in motor garages, and, generally speaking, repair works. As an example of the utility of a combined machine-tool we may refer to a new and very interesting machine.

A Universal Machine.

It is a lathe of massive construction and high-class workmanship. It can turn any diameter from ¼ in. up to 36 in., the speed for this great range of work being easily regulated from 270 revolutions per minute to 5 revolutions per minute. Its centre height can be varied from 7 in. to 18 in., and it is as easy to handle as any ordinary screw-cutting lathe. By the removal of two nuts and the slide rest it is instantly converted into a very efficient boring and drilling machine, with all the usual conveniences of such machines. By the attachment of the necessary upper bar and centre the machine is converted into a milling machine of practically the usual form. A powerful dividing head and supporting centre renders it a universal milling machine capable of cutting spur, bevel, mitre, and worm gears from the smallest size up to 40 in. diameter. The handling of the machine is very easy to an ordinary machine man, but in the hands of an expert a great variety of other work can be done. One of the special features of the machine is the ample dimensions of the bed which is box-formed, with large flat bearing surfaces. The saddle has self-acting sliding movements, and carries a slotted boring table with self-acting traversing movement, while a quick-change gear-box under the head gives three speeds, changeable by hand lever while the tool is running. Reversing for screw-cutting and feeds is done by a lever on the apron itself, instead of on the headstock. The usefulness of such a machine in a factory or workshop is obvious.

The Electric Battleship.

While there are nations at the present moment which, in view of the recent achievements of the modern submarine, are considering the inadvisability of spending their money on great battleships, America retains, apparently, a decided confidence in them and their superb efficiency. Her new battleship, California, which was launched last month, will be, from point of size, greater than any foreign battleship built or building, and will also be the world's first electric Dreadnought. The California and her two sister-ships, the Mississippi and the Idaho—the last two to replace the two of the same name sold recently to Greece—will each displace 32,000

tons. The California will be a ship of innovations, and will cost about 7,800,000 dollars without her armour or armaments, which is expected to cost as much more. Her length is 624 ft., her breadth 97 ft., and she will draw 30 ft. of water, while her speed will be twenty-one knots an hour. She will carry twelve 14-in. guns, mounted three abreast in a turret, twenty-two 5-in. rapid-fire guns, and will have four submerged torpedo-tubes. But the principal feature of the new Dreadnought is the machinery for propelling her by electricity. She will be driven by motors which will deliver electricity made by steam. The Navy experts believe that the electric installation is cheaper than steam propulsion, and reduces the weight of machinery. In outward appearance the California will be different to the present-day battleships, for instead of the blunt grey nose of the latter, her bows will be tapered into a graceful, yacht-like stem, her overhanging bow projecting more than 20 ft. beyond her cutwater and giving place for three anchors instead of two as on the present ships. When the new ship is ready for her trial, in 1917, she promises a most interesting study for the naval experts of the world.

Motor Gunboats in the Persian Gulf.

It is stated that Turkish motor gunboats have repeatedly been mentioned in the report of the fighting near the Euphrates. These boats are apparently some of those that were built in this country to the order of the Turkish Government some years ago, says *Motor Boat*, having a length of 18 metres, a beam of 3.25 metres, and being fitted with two 70 h.p. motors. With this machinery a speed of 11 knots is attained, and at this speed the radius of action is 600 miles. Each boat carries two quick-firing guns.

Monazite in Southern Somaliland.

Professor E. Artini reports, says the *Mining Journal*, that in the gravels of the river Giuba monazite is found in minute rounded granules of varying shades of yellow. From the normal alluvials of the river it was impracticable to extract the mineral in quantity sufficient for the chemical examination necessary to confirm the presence of monazite, but it happened that masses of the heavier elements became concentrated near the mouth of the Giuba. These black aggregations were especially rich in magnetite and ilmenite, with a specific gravity of 4.90, and included 56 per cent. of iron and 16.87 per cent. of titanic oxide. By means of a powerful magnetic separator the professor was enabled to obtain from 500 grammes of gravel 0.3 grammes of yellow sand that he succeeded in characterizing chemically. In the interior, in the sands of Lugh, he also encountered deposits in which was recognized the presence of monazite, though in very small quantities, analogeous in aspect to the gravels of the river Giuba, from which the latter were possibly derived.

ALEXANDRIA PRIZE COURT

S.S. Lutzow (Ex Cargo).

His Honour Judge Grain has handed down from the Supreme Court, Alexandria, sitting in Prize, the following judgment:—

This cargo, consisting of five cases of cotton goods and other articles, was invoiced on July 15, 1914, from Arnold German, a Swiss subject at St. Gall (Switzerland), to German and Co., of Manila (Philippine Islands). A formal American consular certificate of invoice is put in, and also a copy of the original invoice, certified by the British Consul at St. Gall, showing that the seller is Arnold German, the Swiss, and the purchaser German and Co., Limited, of Manila. These goods are also invoiced by German and Co., a German firm at Hamburg, to German and Co., of Manila, the invoice being dated July 30, 1914.

The Procurator asks for condemnation of the goods on the ground that the presumption is that the property in the goods is in the enemy firm of German and Co., of Hamburg, as the bills of lading state that the goods are shipped by German and Co., of Hamburg, and one of the invoices shows that the goods are sent by German and Co., of Hamburg, to German and Co., of Manila. The Procurator urges that even if the goods did originally belong to Arnold German, the Swiss, nevertheless he has put himself into the hands of German and Co., of Hamburg, and lost the control of the property in his goods.

It appears that Arnold German was sending these goods for the purpose of finding out how this particular class of goods would sell in America.

In one letter, dated July 29, 1914, from German and Co., of Hamburg, to Arnold German, they ask if he desires to insure his goods against war risks, and inform him that the goods will probably be shipped in the s.s. Lutzow. This certainly makes it appear that Arnold German was looked upon by German and Co., of Hamburg, as the owner and consignor of the cargo.

The correspondence also shows that Arnold German was sending the goods to German and Co., of Manila, on approval, and that they had the option of taking up the goods themselves or selling them for Arnold German. Therefore, there is doubt that the property in the goods is in whoever is decided to be the seller and consignor, either Arnold German, the Swiss, or German and Co., of Hamburg, the enemy firm, and not in the buyer or consignee.

The reason given in the correspondence for the two forms of invoice I must confess I cannot understand. The letter from Arnold German states, "The invoice from German and Co., of Hamburg, is only used for United States Consul invoices and copies thereof, because Manila wants for the Customs House uniform invoices for all imports of the firm."

But, taking into consideration that the copy of the original invoice, certified as a true copy by the British Consul at St. Gall, shows that Arnold German was the seller, that the certificate of the invoices from the American Consulate at St. Gall (Switzerland) shows also that Arnold German is the seller; and taking into consideration that there is practically no evidence of any property in the goods having passed to German and Co., of Hamburg, beyond the second invoice and their names on the bills of lading, I am of opinion that there is sufficient evidence placed before me on behalf of the claimant to enable me to grant a release to him.

The order of the Court will, therefore, be for the release of the cargo in question to Arnold German, the Swiss, of St. Gall.

ROUMANIAN REFINERY INDUSTRY.

Even if, in spite of the war, the production of oil in Roumania has maintained, and even exceeded, the figures for the corresponding period of last year, this cannot be said as regards the refining activity during the same period, says the *Petroleum Review*. While the production of crude oil in the country during the first six months of the year has amounted to 906,472 tons, as against 878,516 tons during the corresponding period of 1914, thus showing an increase of 28,956 tons, or 3 per cent., the refining industry has during the same period considerably diminished, for while during the first six months of 1914 there were treated in the refineries 880,143 tons of crude oil—that is to say, a quantity exceeding the production obtained during that period—during the six months of this year there were treated but 757,870 tons of crude oil, which quantity is less than the actual production by 148,602 tons, or, in other words, amounts to but 83½ per cent. of the total production, as against over 100 per cent. treated during the corresponding period of last year.

The cause of this lamentable state of affairs lies, naturally, in the difficult situation created for the Roumanian industry by the present events, and especially by the total closing of the sea and water-ways by which under normal circumstances 90 per cent. of the Roumanian exports are made. The exportation by land, which the Roumanian industry has managed to organise with enormous difficulty, naturally cannot absorb all the products obtained in the refineries. On the other hand, a certain number of products are totally prohibited for export. All this has resulted in the stocks in the refineries and export installations accumulating very rapidly, and this, in its turn, has rendered impossible the continuation of the refining industry to the full capacity of the refineries.

The following table shows the quantities of various products obtained in the refineries during the six months as compared with the same period of 1914:—

	1914. Tons.		1915. Tons.
Benzine	208,040	....	190,174
Kerosene	190,902	....	129,764
Lubricating oil	47,828	....	60,219
Residuals	422,335	....	365,084
Total	869,105	....	745,241

The percentage of the above quantities in proportion to the total can be seen from the following:—

	Per cent.
Benzine	25·5
Kerosene	17·4
Lubricating oil	8·1
Residuals	49·0
	100·0

The total quantities of products delivered for inner consumption during the six months amounted to 388,756 tons (not including 842 tons of paraffin), as can be seen from the following table showing the various products delivered:—

	Tons.
Benzine	14,679
Kerosene	21,584
Lubricating oils	21,752
Residuals	254,062
Paraffin	842
	312,919

Trade Notes.

Egypt.

Tenders are invited by the Controller, Cairo Tanzim Department, for the supply of general stores required during the financial year 1916-1917. Date, December 1.

Tenders are invited by the General Post Office, Alexandria, for the supply of general stores for the financial year 1916-1917. Date, December 1.

Tenders are invited by the Inspector-General of Prisons, Cairo, for the supply of various articles and materials required for the prisons' workshops, such as English leather, brush materials, timber, coal, khaki drill serge, oils and paints, iron, ironmongery, Indian cotton yarn, yellow soap, tools, miscellaneous stores. Date, December 1.

Tenders are invited by the Controller, Cairo Tanzim Department for the supply of general stores required by the Giza and Gezira Water Works during the financial year 1916-1917. Date, December 2.

Morocco.

The Board of Trade understand that certificates of origin are required to accompany all goods imported into the French Zone, and that, so far as exports from the United Kingdom are concerned, the authorities in the French Zone accept certificates of origin issued by Chambers of Commerce in this country if drawn up in the form which is accepted by the French Customs authorities in the case of certificates issued by Chambers of Commerce in respect of certain goods exported from the United Kingdom to France. Particular attention is directed to fact that in the case of certificates of origin issued by Chambers of Commerce for goods exported to the French Zone in Morocco, the signature of the issuing authority must be "legalised" by the local French Consular officer.

The British Post Office agencies at Alcazar and Mequinez, in Morocco, will be closed on the 30th inst. Letters for these places should henceforth be prepaid at the international rate of postage of 2½d. for the first ounce and 1½d. for each additional ounce or fraction of an ounce. Parcels cannot be sent.

Bulgaria.

A Supplement to the *London Gazette* of November 10 contains an Order-in-Council authorising the High Court of Justice and the Prize Courts in Egypt, Zanzibar, and Cyprus to institute proceedings in respect of all Bulgarian vessels and cargoes captured or detained by His Majesty's armed forces.

Malta.

The Board of Trade have received, through the Colonial Office, copy of a Government Notice (No. 234), dated October 21, which amends and prohibits the exportation of certain articles to destinations from Malta. The full list is published in the current issue of the *Board of Trade Journal*.

Cyprus.

An import and export firm in Cyprus, with branches in Alexandria, Port Said, and Cairo, is desirous of representing Canadian exporters, in Cyprus and Egypt, upon a commission basis. Articles specially suggested are wheat, flour, barley, roofing and flooring lumber, and leather. For further information application should be made to the Canadian Trade Commissioner's Office, Portland House, Basinghall Street, London, E.C.

The Board of Trade have been informed by the Chief Collector of Customs at Cyprus that, by an Order-in-Council (No. 646 of 1915) appliances and equipment for any Municipal Poor House in Cyprus are allowed to be imported free of Customs duty on the certificate of the Commissioner of the District.

Near East Markets.

CYPRUS NOTES.

(From a Correspondent.)

Cyprus, November 12.

The exportation of barley has been prohibited, and power has been given to carry out searches for hoards of the grain, as was provided for in the matter of wheat in February last. The local papers estimate that the wheat supply of the island will not suffice for island needs beyond next March, and they call upon the Government to take measures which will provide against future scarcity, especially by importation of grain from Egypt.

COTTON MARKET.

Liverpool. Thursday Night.

Messrs. Reynolds and Gibson telegraph:—

There has only been a quiet demand for cotton this week, and the amount of business reported has been comparatively moderate. Quotations of good and above in Joannovich and Sakellarides show an advance of 20 points; all others 5 points. The sales, which include 250 bales of Sudan cotton, are estimated at 2,600 bales, against 2,700 bales last week.

ADANA COTTON CROP.

The U.S. Consul at Messina reports:—

The Cicilian cotton crop in 1914 amounted to about 120,000 bales, some of it having been lost owing to scarcity of labour for picking. In the Smyrna district, the output decreased to about 16,000 bales. or about 50 per cent. of the 1913 crop. About 40,000 bales were exported to Germany and Austria, partly via Italy. The Adana cotton crop in 1915 will hardly exceed 50,000 bales, owing to smaller area planted and ravages by locusts, and the output is likely to be requisitioned by the Government.

It was thought at one time that the lace industry in Turkey would become a national asset of consequence, as the American demand was important. In 1912 the exports of cotton lace to the United States were valued at about £120,000. They were reduced in 1914 to £10,388. It appears that Syrian laces became discredited in America (1) owing to attempts to sell them as genuine Irish lace; (2) by using inferior qualities of thread when the American demand increased; (3) conservatism in styles which remained unchanged in spite of protests from consumers. It is possible that the industry may be revived after the war, if some foreigner should organize the production somewhat along the lines of Turkish carpet manufacturing.

THE SITUATION IN TURKEY.

A correspondent calls our attention to some statistical errors which appeared in our issue of October 29 under the above heading, from our Special Correspondent at Athens (October 13). The following are the necessary errata:—

Stocks of Mohair remaining in Constantinople were 2,000-3,000 bales.

Opium stocks in the interior were 6,000-7,000 cases, and in Salonika 150-200 cases.

The maize crop in the Ada Bazar district is estimated at 4,000-5,000 tons.

PRODUCE REPORT.

Currants. London, Nov. 25.

The news of the favourable development of the political situation in Greece, which has been telegraphed early this morning from Athens, produced a noticeable effect in the market to-day, and the prices are firm, with an evident probability that the tendency for a further advance will be lessened. Provincial and Pyrgas are quoted 40s., in bags 37s.; Gulf, cases, 45s. to 48s.; Patras, 44s. to 46s.; Vostizza, 45s. to 53s.; and smalls, 39s. to 45s.

Sultanas.

The available stocks are extremely small. The first shipment of new Afghan fruit has arrived, but that will not help much the situation. Smyrnas are quoted 85s. to 105s., Afghans 85s. to 90s., and Greek 98s. to 115s.

Figs.

There is only a fair demand, owing, it is believed, to the prices asked, which do not encourage buyers.

Dates.

There is a good demand, with fair business passing. Hallowee are quoted at 16s., Khadrowie 16s. 6d., and Sair 14s. 9d., but there is a probability of an advance.

Seeds.

Linseed commands rather more attention, and sellers in some instances ask a slight advance. London-Calcutta in any position has buyers at 66s. 3d., with sellers asking 66s. 6d. Bombay, November-December, 67s.. La Plata to Hull, ditto, 62s. 6d. Cottonseed is quiet. London-Egyptian, November, is quoted £11 15s. per ton. Hull spot £12, November £11 15s. Bombay to Hull spot, November-December, December-January, and January-February £10 5s., all sellers. Rapeseed is firm and sparingly offered. Guzerat, November-December, is quoted 65s. 6d.; and brown Cawnpore, ditto, pure basis 59s. 6d.

Oils.

Linseed oil is closing quiet, but not lower. Spot pipes £32, barrels £32 15s., November-December £32 10s., January-April £33, May-August £34 10s. Cotton oil is quiet. Crude spot pipes £34 5s., refined pipes pale £36, and barrels sweet £40 to £42, as to make. Rape oil is firm. Ordinary brown naked, spot £39, English, refined, barrels £42 10s. Olive oil is very firm. Spot Levant £52 per tun, ex stores.

Oilcakes.

Linseed cakes.—There is only a slight improvement in the demand, and values are firmly held up. Best London made are moving freely at £11 17s. 6d. to £12. East India seed pures are offered at £11 12s. 6d. to £11 15s. for arrivals. Fine seedy Bombay is quoted at £11 17s. 6d. to £11 18s. 9d., ex quay.

Cotton cakes.—A small quantity of Egyptian has been offered on spot this week at £9 5s.; and for December shipment £8 17s. 6d., ex steamer, was asked. English makes are held at extreme prices, £9 7s. 6d. to £9 10s.; and Bombay £8 17s. 6d.

Locust Beans.

The demand is good, but holders ask extreme prices, £8 10s. for whole and £9 for kibbled.

COMPANY MEETING.

ANGLO-EGYPTIAN BANK, LIMITED.

The twenty-ninth ordinary general meeting was held on Tuesday at the bank, Clement's Lane, E.C., Mr. Henry Adair Richardson, the chairman, presiding.

The Secretary (Mr. George H. Soul) read the notice convening the meeting and the auditors' report.

The Chairman, at the outset of his remarks, expressed great regret at the loss which the bank had sustained through the death of Mr. Thomas Usborne and the retirement of Mr. J. Howard Gwyther, and warmly recognised the services which had been rendered to the bank by those gentlemen.

Continuing, the Chairman said:—It is my good fortune to-day to present you with the strongest balance-sheet I have ever put before you. This is what it should be in wartime, and satisfactory as showing the liquid nature of our business, especially as I can tell you that we have not unduly pressed any of our customers. Nor have we been hiding your talent under a napkin, for we are able to show a very good profit and loss account. We maintain our dividend, and out of the surplus profits of the last two years have provided in full for depreciation of securities, for all ascertained war losses, and put aside £20,000 for losses that may arise—and are pretty sure to arise—as the war goes on. The result has been largely due to a very gratifying increase in current accounts, the cotton crop having sold much better than seemed likely, and to the fillip that the large number of soldiers located in Egypt has given to business generally. It is a feather in our cap that we have kept the military accounts in Egypt. Too much praise cannot be given to our officers there for the able way in which they tackled the heavy extra work thrown on the staff, impoverished as it was by the drain on it for Army service; and to judge from the many flattering letters received from commanders of regiments, their efforts have been much appreciated.

In Malta and Gibraltar—where we have the Treasury accounts—we have, I believe, done very useful work. Under contract, we have to supply all the funds they require there, and in Malta, owing to the war, their requirements have been very large indeed—double what they were before the war, and now, I believe, they are three times as much. Our Malta branch has met all these demands, and has, I am sure, been of very great service to the country. Our newly opened branch at Khartoum has shown an encouraging profit.

Now, as regards Egypt. A year ago it looked very gloomy, with cotton at 5d. a pound, and not readily saleable at that; but Egypt has, after all, come through the year much better than might have been expected. The revenue showed a deficit of only £1,700,000—no very serious matter in itself. For the first few months of the war trade was at a complete standstill, and losses faced every one. Yet, so soon as the Government fixed a minimum for cotton values, things began to improve all round; the moratorium was brought gradually to an end, and the settlement of cotton contracts on the local Exchange—which promised to be a serious source of danger and difficulty—was ably and satisfactorily arranged; paper took the place of gold, and readily passed into currency (proving an excellent counter for marketing the cotton crop), whilst the large arrivals of soldiers put money freely into circulation;

£5,000,000 sterling was transferred by the War Office to Egypt between February and August—to the great advantage of importers and others; while, with rising prices for cotton, exporters were in most cases able to make good their losses of the earlier months.

On the other hand, the cultivators of cotton have suffered severely, though there may be some little compensation in the cereal crops, and sugar cultivators must have done exceedingly well. The crop turned out to be only 6,300,000 cantars—a million cantars less than the estimates, but it was all sold for export—an encouraging fact for the future. Its value was, however, something like £11,000,000 to £12,000,000 less than the larger crop of the previous year. That is the dark cloud that will hang over Egypt for some time, but there is a silver lining to it, for cotton is now round about 10d. per pound, and it seems quite possible that, with the reduced crop of this year, the price may be maintained. At any rate, the process of recuperation is getting a good start. The necessaries of life produced in the country do not appear to have risen in price, and Egypt is much better off in this respect than many other countries since the war began. Trading generally has been conducted on a sound basis, and credits have been curtailed and shortened.

He afterwards referred to the principal figures in the balance-sheet, and called attention to the changes shown as compared with the corresponding entries a year ago, remarking that investments were nearly double, and, having now paid the instalments on the War Loan, stood at £840,000, of which £620,000 was Four-and-a-Half per Cent. War Loan written down to 98. He concluded by moving the adoption of the reports and accounts.

Mr. Alan Richardson seconded the motion, which was carried unanimously; and resolutions were passed approving the payment of a dividend at the rate of 10s. per share, less income-tax, and re-electing the retiring directors and auditors.

The meeting closed with a cordial vote of thanks to the chairman, the directors, and the staff.

GERMANY'S LOAN TO BULGARIA.

Reuter's Agency reports from Amsterdam that, according to the *Lokalanzeiger*, the Bulgarian Finance Minister, M. Tontcheff, has successfully concluded in Berlin his negotiations with the German Government. A group of German banks, headed by the Disconto Gesellschaft, will advance sums to Bulgaria for covering her war expenses, these advances to be transformed later to a loan. In an interview with a representative of the *Lokalanzeiger* M. Tontcheff declared that the districts conquered by Bulgaria which ethnologically do not belong to Serbia will for ever be incorporated in Bulgaria. The Minister includes Nish and Monastir in this territory. Regarding the attitude of Greece, M. Tontcheff emphasised that the Entente will not be able to intimidate Greece, as King Constantine well knew that neutrality alone could be to the interest of Greece, and he was convinced that Bulgaria does not think of conquering Greek territory.

GREEK MORATORIUM.

With reference to an earlier notice intimating that the Greek Moratorium published by Royal Decree of July 26/August 8, 1914, was no longer in operation, but that exemptional measures of relief would remain in force until the end of the current year, H.M. Minister at Athens has forwarded translations of two Decrees dated September 11/24 and Sept. 30, October 13 respectively, relative to the re-establishment of the Moratorium in Greece. The first Decree re-establishes the Moratorium, and is in most respects similar to the Decree of August 17, 1913. The second Decree modifies the first Decree in certain respects. The translations of the two Decrees referred to above, together with a statement showing wherein the present Moratorium differs from previous Moratorium measures in Greece, may be consulted by British firms at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

Two Greeks and one Roumanian were among the foreigners naturalised in Great Britain in October.

BULGARIAN FINANCES.

The following notes are from the British Consular Report for 1914, published last week:—

Financial Situation.

The Budget estimates for 1914 provided for receipts for £10,270,000 and an expenditure of £10,190,000. The total foreseen was not attained, as the European war upset calculations. The Government prohibition of the export of cereals and live-stock, forming three-fourths of the exports from the country, seriously affected the receipts. The peasants, not having sold their crops, limited their purchases; consequently, the heads of indirect contributions, excise duties and railway receipts all suffered. Imports were also much affected, and the customs receipts fell to a low level.

At the end of 1914 the consolidated debt amounted to £24,400,000.

The Budget estimates for 1915 place the revenues at £10,800,000 and the expenditure at slightly less. To attain this total it was necessary to obtain £950,000 from new sources. Excise duties are being provisionally levied upon wines, and export dues upon certain articles hitherto exempt. The most notable increases are those in the Budgets of the Ministries of War and Public Instruction.

Banks.

Leaving the Bulgarian National Bank and the State Agricultural Bank out of consideration, the capital and the interests of the principal banking houses in the country are mainly German and Austro-Hungarian. They are as follows:—

The Banque Générale de Bulgarie (dependent on the Pester Ungarische Commercial Bank), which in 1914 increased its capital from £200,000 to £600,000.

The Banque Balkanique, favouring Austro-Hungarian interests, and which during the year increased its capital from £240,000 to £400,000.

The Banque de Crédit, founded by the Disconto-Gesellschaft of Berlin.

There are also a number of banks with Bulgarian capital, of which the chief is perhaps the Banque Bulgare de Commerce.

Industries.

Native industries have made considerable progress and have rapidly increased during the past five years. The capital involved is estimated at £3,720,000, and is mainly Bulgarian; it is only within the last few years that foreign capital has begun to become interested. The production in 1912 was £4,407,000, the most important branches being those of food-products (£2,600,000) and textiles (£856,500). The major part of these products is disposed of within the country, only one-fifth being sold abroad. The principal industrial districts are those of Sofia and Tirnovo.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for week, 452 tons (including 208 tons recovered from sediment); Gemsah production for last week, 336 tons (including 109 tons recovered from sediment); Hurgada production for week, 438 tons (last week, 408 tons).

ANGLO-ROUMANIAN.—Production of crude oil for week ending 13th inst., 204 tons.

ANGLO-ROUMANIAN PRODUCE. — The accounts of the Anglo-Roumanian Produce Company, Ltd., for the year ended December 31, 1914, show a loss of £3,138, which increases the debit balance to be carried forward to £54,916.

BANQUE EGYPTIENNE DE COMMERCE (in liquidation).—The postponed meeting of shareholders is to be held to-day in Cairo.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the eleven days ended October 31 amounted to £E6,556, as against £E5,526 for the corresponding period of last year.

ROUMANIAN CONSOLIDATED OILFIELDS.—Production for week ending November 13, 1,500 tons.

NOTES OF THE WEEK.

Greece's position in relation to the march of events in the Balkans has not yet been satisfactorily regulated. In the collective *démarches* made by the Entente Powers the Greek Government was asked to withdraw its troops from the zone which the Allies were obliged to use in sending help to Serbia. The reply presented this week expresses the opinion that it would be impracticable to withdraw the Greek troops, as it would be impossible to keep them supplied elsewhere. At the same time it is pointed out that Greece's neutrality will continue to be benevolent to the Entente so long as her sovereign rights are not infringed and no restrictions of a military order are imposed. Such a reply is little calculated to satisfy the Allies, particularly if military exigencies require a large force to be based on Salonika for any length of time. Greece's difficulties arise from the fact that she chose to withdraw from the position she took up when she asked the Allied Powers to land troops at Salonika for her own protection and for that of her ally, Serbia. If she had played the part she then intended to play, and had sent her army to the support of Serbia, no controversy need have arisen over the control of Salonika and the railway. Greece's defection, however, imposes upon the Allies the necessity of landing a much larger force than was originally contemplated, and the question of the safety of these troops must overrule Greek susceptibilities.

To the British and French forces at Salonika have now to be added Serbian refugees, who will have to be provided for, and for whose welfare Greece is not likely to make herself chargeable. According to the latest reports, hundreds of refugees, many of them destitute, were arriving daily by the single train that still ran from Monastir. The train arrived at midnight, and as the majority of the refugees could obtain no shelter they had to wander about the streets in the piercing cold. Subscriptions for their relief had been started locally, but not one-tenth of the actual suffering could be relieved by this means. So long as responsibility for providing for these unhappy people is divided between the Greek authorities and the Allies they will fare ill. Their presence in Salonika is an additional argument in favour of the administrative control of the war zone being vested in the Allies. Any inconvenience experienced by Greece will fall very short of her debt to Serbia.

It is to be hoped that the negotiations with Greece will not be allowed to follow a course which will tend to confirm not only Greece but Roumania as well in the opinion that no decisive action is ever to be expected from the Entente Powers. If the claims advanced by the Allies are justified by the circumstances in which they find themselves, there must be abundant reason for insisting upon Greece's immediate compliance. The history of the Near East during the last fourteen or fifteen months is strewn with well-meant attempts to make words do duty for deeds. Negotiations with people to whom nothing but a show of force appeals have been carried on with the strictest attention to copy-book manners and maxims. The British Government and the British Press have been "kind" in turn to Turkey, Bulgaria, and Greece, and to those who are responsible for the destinies of those countries. The result in regard to the first two is to be seen in the graves of the Allied troops in Gallipoli and Serbia, which, if they could speak, would appeal for the adoption of other methods at this juncture, in case Greece, too, against the will and better judgment of her people, should be dragged down into the vortex of the Central Powers. One point must not be overlooked, that if the Central Powers and Bulgaria continue to respect Greek territory, *a priori* evidence is afforded of the existence of an understanding between them and the Greek Government.

The occupation of Monastir by the Bulgarians seems imminent, and with it the last hold of the Serbians on their own country will have been relinquished. A small triangle in the south-east remains in Anglo-French hands, with the River Cherna between them and the Bulgarians on the western side, and there is so far no report of the enemy being between Dibra and Ochrida. But with this exception the Austro-German and Bulgarian forces are aligned along the Montenegrin and Albanian frontiers. Montenegro is thus surrounded by the enemy on two out of three sides, and only a few score miles separate the invading armies and the Adriatic. The intervening country, however, offers more formidable

Digitized by Google

obstacles than any met with south of the Danube. In their final withdrawal across the border the Serbians were compelled to sacrifice field artillery and heavy guns, and their losses on the plain of Kossovo were probably greater than at any other point in the long retreat. The degree of resistance, therefore, which they could oppose to the enemy in the event of further pursuit would depend mainly on the advantages which a force on the defensive in Montenegro and Albania has over the attack. German Headquarters have, indeed, announced the "close" of the Serbian operations. Our Allies will not trust to the enemy's bulletins for their intelligence regarding his movements, but the chances of the German statement representing the truth are enhanced by the early setting in of winter in the Balkans.

Whatever decision may be reached by the Entente Powers in regard to the nature of the military assistance to be given to the Serbians at this juncture, there can be no doubt that official measures will be required to make provision for the Serbian refugees in Montenegro, Albania, and Greece. Already something in this direction has been done; voluntary relief also has been organised for some time past. But it would seem as if arrangements for the succour of the hapless people who will be pouring into the three countries, for the most part destitute, must be on a more comprehensive scale than anything attempted hitherto. The need will be great and most urgent. It can only be supplied in time from Italy, and we should like to hear that the Allied War Council has already assumed charge of the matter, and is taking steps to make good to the Serbians something of what they have lost by the failure of the Entente to bring them military support in time.

The Allies' future military plans in the Balkans are naturally a sealed book. It is enough that these plans should be maturing, and that the advocates of a policy of leaving Serbia to her fate have been overruled. All that is known is that fresh troops are being landed continuously at Salonika, while a Russian army is being collected at Reni and at Ismail on the lower reaches of the Danube. The destination of this latter force forms the subject of the liveliest speculation, attended with some uneasiness among Germany and her subordinates. One thing is certain, that the Central Powers will have lost no time in making their preparations for defence. Austrian troops are being sent to Rustchuk, and Turkish divisions are said to be at Varna, Burgas, and Mustapha Pasha, thus following out the principle of avoiding as far as possible the chance of the Bulgarians finding themselves opposed to the Russians.

A speech delivered in Bucharest by M. Vintila Bratiano, brother of the Premier, of which a report appeared in the *Morning Post*, may be taken to reflect fairly accurately the Roumanian official attitude. M. Bratiano pointed out that the war would probably still be of long duration. As the Entente Powers could not afford, even temporarily, to allow the Central Powers to dominate the Balkan Peninsula, they would have to reassert themselves even after the occupation of the greater part of Serbia, and thus repair an oversight caused by want of preparation in time. This would, however, necessitate the use of large forces, if the Allies' action was to be effective, and the Balkans would then become an integral area of the European battlefield. It might be expected that next spring would see a large concentration of belligerent forces in Macedonia and Thrace. Such a development would give importance to the neutral nations bordering on the new theatre of war, and would render it necessary for such States to take up a position on one side or the other. A consideration of all these facts, M. Bratiano added, showed that Roumania was justified in the adoption of the policy which she had maintained thus far.

In spite of the correctness of this dispassionate utterance it is easy to see that the speaker's sympathies are with the Entente Powers. He justifies, however, the postponement of Roumania's participation in the war on the ground of the military situation. In other words, Roumania would in all probability have thrown in her lot with the Entente Powers before now, if the Russian withdrawal from Galicia had not taken place. It is now generally admitted that from Roumania's point of view the only satisfactory substitute for the reappearance of Russian troops in the Carpathians will be the concentration of an adequate Entente force in the Balkans. All the indications are in favour of the conditions on which Roumania's co-operation is to be based being fulfilled even before the period anticipated by M. Bratiano.

In a letter from a Budapest correspondent to the *Morning Post* reference is made to the intrigue and bribery practised by the Germans and Austrians in Roumania. It has been understood in Great Britain in a general way that something in the nature of a Press campaign has been carried on in the Balkans; but its actual ramifications, we believe, have been inadequately grasped even in official circles. There is good ground for saying that the correspondent's details are accurate, although he does not attempt to tell the whole story. From the Minister-Presidential Press Bureau at Budapest, runs the message, articles written by hired Transylvanian writers are being sent daily by the dozen to the Bucharest newspapers. "There are four or five papers there which receive regular monthly subsidies for publishing this stuff, and a special news agency is continually at work at Bucharest, whence 'Roumanian News' is distributed to all countries, neutral and belligerent alike. All the items appearing in the neutral Press about the Filipescu group are sent out by this agency under Austrian control. A Hungarian journalist who spent some time in Bucharest tells me that immense sums are spent there on the Press, and that individual journalists are also receiving subsidies from the German and Austrian Press agents. No money is too much and no labour is enough on the part of the agents working in Roumania to ensure the smooth working of the campaign undertaken to keep Roumania out of the war. This journalist tells me that more than thirty million crowns (£1,250,000) have been spent during the war for the Balkan propaganda."

During the present week the Home Secretary has claimed a day of Parliament's time for the purpose of discussing matter appearing in the Continental Press. Without entering into the merits of the controversy, it may be pointed out that, if in the past the British Government had paid as much attention to counteracting Germany's Press propaganda in neutral countries as it has to tracing quotations from British newspapers in the Press of belligerent countries, the German campaign of intrigue and bribery would have been far less successful. The subject is not one that can be profitably discussed in public, but the close connection of THE NEAR EAST with the sphere which this German campaign has made peculiarly its own entitles us to point out that a successful counterpoise to the enemy's activities could only be effected by application of a knowledge of local conditions and by work on the spot. There would have been no call to imitate German methods. The desired results could have been attained without offence to British prejudices. It was only necessary that the steps taken should be well informed and adapted to the purpose in hand.

Lord Kitchener's visit to the Eastern Mediterranean is over. On his way home he paid a visit to Italy and to the Italian front, and reached England last Monday after an absence of rather more than three weeks. The results of the tour have yet to be made known. Unfortunately his flying visit to Athens does not seem to have induced King Constantine and the Greek Government to make an unequivocal declaration of their faith. Whatever may be the nature of Lord Kitchener's report on the Dardanelles operations, there can be no doubt that his visit to Gallipoli Peninsula will have heartened the British troops. One passage in the report of his visit to "Anzac" sent by the official Press representa-

Digitized by Google

tive with the Australian forces may be quoted. "He (Lord Kitchener) went through the front firing trench on the neck where the Light Horse had charged. The troops could scarcely be restrained from cheering him, although the Turks in places were within twenty yards, and the Anzac Staff had some moments of considerable anxiety at certain awkward corners all too visible to the Turkish snipers." Australians, the same writer adds, "do not cheer readily, but as Lord Kitchener, accompanied by Generals Birdwood and Maxwell and others, passed the crowd along the beach the men spontaneously called for cheers, and gave them again and again. It was purely a soldier's welcome."

The news that reaches this country of the operations on Gallipoli Peninsula continues to be of a meagre description. As a result of the opening up of communication between Berlin and Constantinople the Turks are receiving additional supplies of ammunition, and periods of "liveliness" become more frequent and more sustained. Any attempts at attacking the Allied trenches, however, are visited with heavy penalties, and both sides are developing subterranean warfare, in which for the present honours rest with the Allies. A recent report mentions that the Turks are showing themselves nervous and harassed by our aircraft, which bombarded the Constantinople-Dedeagatch railway line and damaged some of the works. The monitors and light vessels which are frequently bombarding the Asiatic coast, it adds, are constantly keeping the Turks on the watch, and they are obliged to oppose us with important forces.

A lesson in the advantages of sea power over land connection has been read to the Germans by one of their own newspapers in regard to the extravagant hopes being formed by the opening up of communication with Constantinople. "Whoever knows that the sea freight to Buenos Aires from Ruhrort (near the Rhine) is less than the railway goods rate from Ruhrort to Berlin will shake his head when he hears that masses of goods are to be thrown to and fro on the railway from Asia Minor to Hamburg. A single railway system from Baghdad to Berlin is not sufficient to support the burden of Germany's economic life." All this is true; but the fact remains that the possession of railway communication between Germany and Asia Minor is far too valuable an asset for our enemies to enjoy for any length of time without very resolute efforts on the part of the Allies to challenge it.

Rumours regarding the situation on the western frontier of Egypt have produced an official statement to the effect that the Grand Sheikh of the Senussi sect continues to maintain an entirely friendly attitude towards the Egyptian Government. The Grand Sheikh, whose stronghold is in Tripoli, repudiated the action of Turkey a year ago, but certain hostile agencies have been at work in the west, and have succeeded in inducing some of the western Arabs to commit minor acts of aggression against the frontier posts and our people. In pursuance of the Government's policy of removing any possible cause of trouble or friction, the smaller frontier posts situated at Sollum and Sidi Berani have been concentrated further east at Mersa Matruh, the terminus of the coast railway, where an ample force has been established for the protection of our Arabs against any such aggressive action.

Further reports of the battle of Ctesiphon confirm the fierceness of that encounter. General Townshend's troops are in possession of the battlefield, and the Turks have withdrawn to Diala, equidistant from Baghdad and Ctesiphon. In previous engagements the Turkish regulars have never failed to put up a good fight, but have nearly always contrived to escape the punishment suffered by their Arab allies. Consequently they have retired from stage to stage without any serious loss of *moral*, and have continued to contest the British advance stubbornly. At Ctesiphon they had received strong reinforcements, and were able to oppose four divisions to General Townshend's single division. It is reported that one of these divisions was annihilated. The British casualties were certainly heavy, the number of wounded alone being now put at 2,500. In view of the strength of the Turkish forces General Nixon will hardly have any other course open to him than to wait for further reinforcements before attempting to enter Baghdad. It will be better to wait indefinitely a few miles outside the city than to enter it and be compelled to withdraw afterwards.

In view of the fact that the Arabs have always suffered more heavily than the Turkish soldiers in engagements with the British forces, the text of a circular letter issued to the tribal Sheikhs in the Tigris line by order of General Nixon, read in connection with an account by Sir Mark Sykes of some aspects of the advance, is of interest. The letter explains the presence of the British force in Mesopotamia, and the gist of the message is contained in the final paragraph:—"In view of the above facts and assurances, it will surely be plain to you that, if you enter unnecessarily into this conflict between the Powers, you will put yourselves to unnecessary loss and difficulty, and you should, therefore, refuse steadfastly to be misled into abandoning an attitude of aloofness and neutrality, from which no harm can come to you." That the assurances given are not empty words is proved by Sir Mark Sykes's description of Kut-el-Amarah after its occupation by the British. It was Kut of the day before, yet with a difference. "Within an hour the women were chaffering milk, dates, and sweet limes, the merchants were offering contracts, policemen were patrolling dirty little streets, a governor was established in an office, tired troops were standing in the sun while billets were sought for them, and the Arab cultivators were dropping in to complain of a certain horseman who had ridden through a crop of beans, and of a supply and transport officer who had packed his belongings in a garden."

While the attitude of the Shah and the Persian Government is regarded as satisfactory, it has to be admitted that a lot of ground has to be covered before the Germans in the country and their agents and dupes can be brought to book. Prince Henry of Reuss, the German Minister at Teheran, is spoken of as Generalissimo of the armed hostile force, which includes the Gendarmerie, and included at one time most of, if not all, its Swedish officers. A split is reported to have taken place among the latter, but the fact remains that the force they controlled has gone entirely over to the enemy. What steps will be taken to deal with the rebels against the Shah's authority remains to be seen. Much will depend on the attitude of the more important tribes, which will, no doubt, be influenced by the show of force that the belligerent parties can muster. The presence of Russian troops ensures the safety of Teheran, but Kum and Hamadan are entirely in German hands. It is satisfactory to learn that the Swedish officers of the Gendarmerie are not the men originally loaned by the Swedish Government; they were obtained locally by the Persian authorities.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, November 16.

H.H. the Sultan.

H.H. the Sultan has left for a trip up the Nile as far as Assiut. The journey will be made on his private steam-yacht, which will be towed by another steamer. His Highness, who is accompanied by H.H. the Sultana and some of the members of his suite, will not land anywhere, neither will there be any receptions or ceremonies at any of the towns *en route*. The Sultan is only making this trip in order to obtain a rest, which he badly needs and richly deserves; for, as this correspondence during the past year will have shown, his Highness has, since his accession last December, taken a continuous and increasingly active part in Egyptian affairs.

The First Egyptian Honours List.

On the occasion of the Moslem New Year the first general distribution of grades and decorations under the new *régime* took place. The only awards made before were those bestowed on the Sultanic family, the Ministers, Advisers, and Under-Secretaries. The list now published contains nominations of Egyptians and Europeans to the various classes of one Order—the Order of the Nile—and promotions of Egyptians to pashaships and beyships. For the most part the distribution has been confined to those who possessed grades and decorations bestowed by the ex-Khedive, but there are a certain number of cases where the recipients held no such honours previously. The list appears to have given rise to little comment, the only criticism heard being in connection with the lower grades of the Order—the fourth and fifth—where, as a perusal of the names will show, the various administrations do not appear to have worked on identical lines in drawing up their recommendations, with the result that the list is here decidedly mixed and scarcely complimentary to some of the recipients. It is to be hoped that this will soon be rectified, and that a repetition will be avoided in the future. Simultaneously with this Honours List there has been issued a fresh table of precedence, which has had to be compiled in consequence of the creation of the new system of grades and decorations under the changed *régime*.

The Mixed Tribunals.

The time is now approaching when the Egyptian Government will have to deal with the question of the Mixed Tribunals, the mandate of which expires on January 31, 1916. It may be remembered that the series of quinquennial periods for which that mandate had been consecutively renewed came to an end in February last, when an extension of a year to the above-mentioned date was agreed to. The idea was that in the meantime the scheme for the unification of the various codes and jurisdictions should be elaborated and completed. The work is still going on, but is, of course, far from completion; for the task of conciliating all the interests is a stupendous one. It will very probably take far longer than was originally anticipated. Neither in other respects has the time come for the introduction of the reforms that such a scheme would necessitate; in any event, no radical alteration in the existing judicial system could be effected until the present war is over. In these circumstances, I understand that the Egyptian Government is about to circularise the Allied and neutral Powers holding capitulations, with the proposal that a further extension of one year to January 31, 1917, shall be made. There is little prospect of this proposal not being agreed to, and the Sultanic decree to this effect will be promulgated at the end of next month or the beginning of January.

I gather that the interior reorganisation, which took place on the renewal of the mandate this year, has given the very best results. The reorganisation consisted, as was pointed out at the time, in a reduction of the benches in the Appeal and First Instance Courts from eight to five counsellors and from five to three judges respectively, and the formation of extra courts by means of the counsellors and judges thus made available. For instance, in the Appeal Court three courts have been formed instead of two, and consequently one extra sitting per week has been held. In the Cairo First Instance jurisdiction there are now four instead of three Civil Chambers and two Commercial Chambers instead of one, holding altogether six sittings in lieu of five per week. Similarly in Alexandria, where there were previously but two Civil Chambers and one Commercial Chamber, there are now the same number of Civil, but two Commercial Chambers; whilst at Mansura, where there had been two Civil Chambers, one of which periodically had to constitute itself a Commercial Chamber, it has been possible to form an extra Civil and a special Commercial Chamber. To sum up, the reorganisation, which the Ministry of Justice had for long proposed as a possible means of setting a term to the congestion of affairs in the Mixed Courts, and which the latter, or more correctly a certain element in it, had opposed tooth and nail, has enabled the number of courts to be increased by over 50 per cent., and a corresponding addition to be made in the weekly sittings. It will be interesting to see whether the statistics, which the Procureur-General publishes as an annexe to the Judicial Adviser's Report, confirm the expectations that the reorganisation aroused.

Cairo, November 23.

The Sultan's River Trip.

H.H. the Sultan is, as reported in last week's letter, at present on the Nile. According to the last advices the Sultanic cortege, which consists of four large steamers and two smaller ones, had passed Minia. All along the route the villages have been most profusely decorated, and the villagers have turned out *en masse* on the river bank to greet their ruler as he passed southwards. Orders had been sent ahead that no preparations, such as are customary on these occasions, were to be made, and it was intimated that the Sultan would land nowhere; but while in the first instance the orders have been freely ignored, in the second his Highness has broken the rule he had laid down for himself, and has landed at several points. One would like to feel that the warmth of the reception which he everywhere received from the population is an indication that the country is grateful for the security and prosperity which it enjoys, and that it appreciates the new régime which has given it a sovereign worthy in every way of the high post that he fills.

The Khedivial Wakfs Scandals.

Judgment was delivered this week in the two cases in which Ahmed Khairy Pasha, ex-Mudir of Behera, first, of malversation of wakfs, and, secondly, of mistor of the Daira of Prince Seif-ed-Dine, was accused, first, of malversation of *wakfs*, and, secondly, of misappropriation of interest money belonging to the Daira; Hussein Pasha Moharrem, ex-Under Secretary of State for War and late Curator of the Daira, was accused of mis-spending £E52,000 of the Daira funds; and Ahmed Bey Saddek, Sub-Director of the Daira, and Osman Bey Moharrem, engineer in the Ministry of Public Works, were accused of complicity with Hussein Pasha Moharrem. The Court held that Osman Bey Moharrem was not guilty, and also acquitted Khairy Pasha on the first charge, in view of the fact that when he resigned the trusteeship of the Khedivial Wakfs the ex-Khedive, from whom he held his mandate, had given him complete discharge thereof, and had accorded him the customary indemnity. Ahmed Bey Saddek, who is still in Europe, but for whose extradition, it is to be hoped, the Egyptian Government will press, was sentenced by default to eighteen months' imprisonment, the Court

Digitized by Google

holding that all the irregular transactions were carried out by and through the Sub-Director of the Khedivial Wakfs, who acted throughout as the ex-Khedive's agent, and could not possibly in the short time have saved from his salary, which was his sole income, the £20,000 that stood to his credit at the Banco di Roma just before the war. The Court found Khairy Pasha guilty of the second charge and Moharrem Pasha guilty of mis-spending the £E52,000, and sentenced them to three and ten months' imprisonment respectively; but as there was no proof that either of them had personally benefited from the sums mis-spent, it decided to allow them the benefit of the First Offenders' Act.

Both Khairy and Moharrem Pashas have appealed against their sentences, although it is generally conceded that they have been treated with all the leniency that the peculiar circumstances of their cases demanded. In this connection it is curious and interesting to note the change which local opinion has undergone. When in January an inquiry into the two administrations was ordered, Egyptian Moslems somewhat resented this action, as, albeit they were well aware that the ex-Khedive had been at the bottom of the irregularities that were said to have been committed, they regarded it more as an act of spite against him than as an act of justice on behalf of those interested in these administrations. In proportion as the Public Prosecutor developed his case, however, their attitude commenced to change, and it is no exaggeration to say that to-day the Egyptian Moslems are overwhelmed with disgust at the systematic and callous abuse of trust and the dishonesty which they now see were inspired and oft-times personally committed by their late Sovereign.

Before leaving this subject I should like to pay a tribute to the excellent manner in which the case for the prosecution was prepared and presented. The inquiry was admittedly an intricate and delicate affair, and the nature of the subsequent trials, with their array of witnesses of Ministerial and similarly prominent rank, was quite calculated—as those who know Egypt will agree—to disconcert the Public Prosecutor's representative. Both the inquiry and the prosecution were handled with admirable tact and firmness of purpose, and the young *substitut*, Zaki Eff. El Ibrachi, who was responsible for both from start to finish, is deserving of the highest commendation. It is to be hoped that the authorities will seize an early opportunity to show their appreciation; for, apart from the fact that El Ibrachi Eff. has succeeded in attaining the end he had in view, it is not often that a young Egyptian is found to possess the *sang-froid*, ability and strength of character that he displayed in these very exceptional circumstances.

El Orwa El Woska.

A week or so ago I referred to the dissatisfaction that had been aroused in Egypt in Moslem circles by the serious situation of the "El Orwa El Woska" Society. This society is the most important Moslem charitable and educational institution in the country. Its centre of activity is Alexandria, but it has also one or two schools in the provinces. Under the auspices of Mohammed Said Pasha, who was its first president, the society had a very successful career, but since his resignation, on his appointment as Minister of the Interior, some seven years ago, it has steadily gone downhill, and so serious were the complaints made in regard to the administration that the Prime Minister, Rushdi Pasha, appointed a commission to conduct a semi-official inquiry. The commission has presented its report, which, after enumerating the defects of the existing organisation, has pointed out that if, as it threatened to do, the Government withdrew its annual subvention—between £E8,000 and £E10,000—the society would have to suspend operations, since, even with that subvention, it with difficulty balances its budget. In these circumstances the Government has decided to continue its financial support, but on condition that the director of the schools is nominated by the Ministry of Public Instruction, that Government inspectors inspect the schools and the accounts of the society, and that the Government shall have four delegates on the board of directors. In addition, the society has persuaded Abani Pasha, ex-Minister of War under Mustapha Pasha Fahmy, to accept the presidency. Now that these reforms have been agreed to, "El Orwa El Woska" should once again fill the useful and successful rôle amongst the charitable and educational enterprises of the country which formerly fell to its lot. The sad state into which it had degenerated was entirely due to the fact that its board of directors consisted of men who were in the first place too busy to give the proper time to its affairs, and who, even if they had been free, did not possess the knowledge or experience necessary for the successful administration of such an institution. The new arrangement has given complete satisfaction to the Moslem community, which lives in the hope that some similar reform will be effected in the Egyptian University, the managing committee of which, in many respects, appears to show the same weak feature as that referred to as characterising the board of "El Orwa El Woska."

PORT SAID NOTES.

(From Our Own Correspondent.)

Port Said, November 23.

Recent events in the Balkans, followed by the retirement of the Serbians and the establishment of communication between the Central Powers and Turkey; the urgent German need for further startling diversions; and the rapid approach of winter are all factors favourable to the belief, generally expressed here, that a second "invasion of Egypt" will take place this winter, probably in the shape, this time, of a German-led Turkish advance on the Canal in formidable numbers. Turkish troops are said to be concentrating on the border, and activity in the Canal zone certainly lends colour to the whispered rumours of coming hostilities on a large scale.

It is thought that last winter's attack by some 12,000 Turks will be a small affair by comparison with the expected campaign, although the situation may undergo a complete and rapid change in consequence of Allied operations in the Balkans. Little anxiety, however, is, or could be felt here; but we certainly anticipate an exciting winter, and it is thought by some that hostilities on the Canal will not be long delayed.

THE KHEDIVIAL WAKFS SCANDALS.

With reference to the article which appeared in The Near East of July 30, 1915, under the heading "The Khedivial Wakfs Scandals," we are informed by the Chairman of the Egyptian Enterprise and Development Co. and the Gharbieh Land Co. (the two agricultural companies referred to in that article) that many of the statements therein contained are untrue, and calculated to cause serious injury to the reputation of the two companies and their respective boards of directors.

We are further informed by the Chairman that the action therein referred to as having been brought against the two companies by Mohammed Pasha Said, as Curator of the Daira of H.H. Prince Seif-el-Din, has been abandoned, and that the Advocate of the Daira has been expressly instructed to withdraw the allegations upon which that action was based.

As the statements to which exception is taken are not specified, we are unable to publish a correction; but we take this opportunity of giving the fullest publicity to the facts that: (1) the action referred to was settled out of court; and (2) the allegations upon which that action was based, and to which reference was made in the article of July 30, were subsequently withdrawn. We would express our regret for any inaccuracies in our summary of the case, and trust that no damage has been done to the companies in consequence of those inaccuracies.

SUDAN NOTES.

(From Our Own Correspondent.)

Khartoum, November 16.

Lady Wingate arrived at Khartoum on November 9 from Cairo, having travelled across France to Marseilles and thence to Port Said via P. and O. s.s. Kaisar-i-Hind. Other arrivals by the same train were Miss Willis, who will spend the winter with Mr. C. A. Willis, Assistant Director of Intelligence; Mr. Turner, from Natal, prospecting for business on behalf of Natal coalfields; and Mr. Nicholls, Inspector of Um Ruaba, returning to duty after a change in Egypt and a spell of temporary duty at Halfa.

Arrivals by the train reaching Khartoum on November 12 included Major L. O. F. Stack, C.M.G., Civil Secretary of the Sudan Government, who has been to Cairo on business, with his wife. Captain Burgess, the police magistrate of Khartoum, also returned with Mrs. Burgess; he has been employed at Ismailia as Provost-Marshal since his return from England. Mr. Hewins, also accompanied by his wife, was on this train; he is the Director of Commercial Intelligence and Secretary of the Economic Board, and is much concerned in the development of Sudan trade.

The Bishop of Khartoum, Bishop Gwynne, has been on duty in the trenches and elsewhere ever since the war began, and his chaplains carried on for some time, but were, unfortunately, incapacitated by sickness, two at the same time, whilst a third had finished his period of service and returned to England. The Sudan was thus left without any clergyman for a period until the arrival of the Rev. Mr. Benham from Cairo, where he is chaplain to the forces. He kindly officiated at the Cathedral when possible. Now, however, he has been ordered back to Cairo, and fortunately the Rev. C. H. Robins, who retired earlier in the year, as described above, has returned with his bride to take up his old duties.

(From a Correspondent.)

Khartoum is fast filling after the autumn recess, and the return of Lady Wingate from Europe marks the commencement of the season. Most of the officials on leave have also reported, these including the Governor of the Province, Mr. R. E. More, who, with Mrs. More, has been on short vacation. Mr. More, one of the few civilian Provincial Governors, has had nearly fourteen years' experience in the service of the Administration, and his work has met with very general approval. The gradual improvement of the town under his governorship has been very marked, especially in the direction of sanitation and water supply. The former Governor, Major E. A. Stanton, a very popular official, was responsible for much of the preliminary work carried out; finding the place little better than a pest-hole, he left it a clean, healthful and pleasant city. The Municipality, which now has charge of all things, was established in 1901.

Judge and Mrs. Fleming have returned to Khartoum, and the Law Courts are again becoming full of business. Mr. M. Fleming has been a judge of the High Court for a good many years, and in the service of the Government since the end of 1904. He has been in sole charge of the bankruptcy work in Khartoum, and in the course of his experience he has had to deal with several important bankruptcies, including that of Mr. Angelo H. Capato.

Mr. J. W. Crowfoot, M.A., who has just returned to the Sudan after a brief holiday, is the newly appointed Director of Education and Principal of the Gordon Memorial College, *vice* Mr. James Currie, C.M.G., resigned. He had long occupied an important post in the Egyptian Ministry of Education, and possesses every qualification for the office. Mr. Crowfoot's academic record at Oxford was brilliant, and, before entering the service of the Egyptian Government in 1901, he was on the staff of Birmingham University. He has invariably proved himself successful in his administrative and other duties, and is no stranger to the Sudan, having been Mr. Currie's assistant at Khartoum from 1903 to 1908. Mr. Crowfoot has a good sound knowledge of scientific archæology, and takes a keen interest in the subject. This is of special importance to the Sudan; for archæology and conservation of ancient sites and remains in that country are under the control of the Director of Education.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, November 10.

The Situation in Smyrna.

It will be a satisfaction to many to learn that the situation in Smyrna continues to be perfectly tranquil; the pro-Entente feeling still exists, and everybody is anxious for peace. The Vali, Rahmi Bey, still maintains towards the English and French the benevolent attitude he has shown ever since the outbreak of hostilities; in fact, apart from the want of many necessities of life, life in Smyrna apparently presents no great discomfort or hardship. There is naturally much poverty amongst the lower classes, and bread is dearer and more scarce, but meat, fruit, and vegetables are plentiful and cheap.

Bulgarian Help for Constantinople.

There is not much news from Constantinople. According to latest reports, bread was again scarce, and petroleum 20 piastres the oke. Two steamers, the Rodosto and the Dobrov Nik, have arrived with coal from Zunguldak, and the Goeben was escorting other colliers to the Black Sea to bring in further supplies.

Eighty-five wagons of coke are reported to have arrived from Bulgaria, and more was expected, bringing the quantity up to 3,000 tons, for use in the munition factories. A number of Bulgarian workmen, said to be 200, have also arrived, and are being employed in the Admiralty and at the Zeitoun Bournou factory. Some Bulgarian gunners have also been sent to the Dardanelles. Four Bulgarian torpedo-boats have also arrived in Constantinople, and some Germans and Turks have been put on board them.

The Question of Ammunition.

The Turks appear to have used up all the scrap-iron they could collect in Constantinople for the manufacture of shells, and now, it is said, they are breaking up all the old machinery in the Arsenal.

Munitions and supplies are sent almost daily to the Dardanelles by steamers, lighters, and other craft; and some of the Bosphorus passenger boats are now being employed for this purpose. The Turks appear to be accumulating large supplies of ammunition at the Dardanelles, and it is rumoured that as soon as they receive some heavy guns from Germany a determined effort will be made to drive the English into the sea.

Von der Goltz's Mission.

There has been much speculation with respect to Von der Goltz's expedition to Asia Minor. Some say it is to organise a force to go to the help of Baghdad; others, to prepare for the second attack against Egypt.

On October 27 a long train left Haidar Pasha for an unknown destination, carrying German and Turkish officers, munitions and war materials. Von der Goltz was unable to leave that day owing to the funeral of Baron Wangenheim, and was to have left by another train.

Ministerial Changes.

There have been some changes in the Ministry at Constantinople. Prince Said Halim, who has acted both as Grand Vizier and Minister of Foreign Affairs, has been relieved of the latter office, which is now occupied by Halil Bey, formerly President of the Chamber of Deputies.

The Chamber is now presided over by Hajji Adil Bey, formerly Vali of Adrianople. It is said that Talaat is to become Grand Vizier, and that Prince Said will be appointed "Khedive of Egypt." The Turks appear to be counting their chickens very much before they are hatched!

Note for Philatelists.

Philatelists will be interested to hear that there are apparently no more ten-para stamps of the current issue, as the Turkish Post Office is now issuing some ten-para stamps of a previous issue, on which a star and a crescent and the year 1331 have been printed.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, November 12.

The New Cabinet.

Like the French Cabinet, the Greek Cabinet consists for the greater part of old men, and the recent changes have added two more octogenarians to the number. M. Skouloudis, the new President, is 79 years of age, though he retains both his physical and intellectual faculties in a remarkable degree. He is a man who, by reason of his wide culture and ripe experience, has rendered great services to his country. The other, M. Michelidakis, is the ex-President of the Revolutionary Assembly in Crete. He at first refused the portfolio of Public Instruction, on the ground of ill-health and owing to his advanced years, but, as he possesses great electoral influence in the country, the Government urged him to accept it, and he at length agreed.

The Dissolution of the Chamber.

Opinion in the Cabinet was divided on the question of the dissolution of the Chamber. It was chiefly M. Gounaris who exerted himself to bring about the dissolution, in order to profit by present favourable circumstances to obtain a majority. The Minister of War, General Giannakitsas, the hero of the incident in the Chamber which brought about the ministerial crisis, and Admiral Coundouriotis, Minister of Marine, were both opposed to a dissolution. As for the President, M. Skouloudis, he also wished and tried to prevent it. It is said that the King was equally anxious to avoid fresh elections at such a time. M. Venizelos, for his part, did everything he could to help the Government to meet the Chamber. He even went so far as to consent that the Chamber should not be convoked until November 16, when, according to the Constitution, the parliamentary session might have been closed. But the dissolutionists were intransigent, and rejected every proposal for a settlement. So, after having for five days made vain efforts to get a certain number of Venizelists to repudiate their chief and join the side of the Government, hoping thus to form a majority, they ended by publishing yesterday evening the decree of dissolution. The impression created was deplorable. The Venizelist Press characterises this move as a *coup d'état*, carried out in defiance of the country. It is indeed but a parody of elections, since the vital part of the population of the country is mobilized, and those who have the right to say whether they want war or not are absent. M. Venizelos has not yet decided whether or not his party will take any part in such elections. A definite decision will be come to in a week's time. It is, however, very probable that his party will abstain from taking any part, as a protest against such a state of things.

The German Demarche.

The Greek Government has been placed in a very perplexing position by the *démarche* of Herr von Jagow, by which he informed the Greek Minister at Berlin that should Greece fail to disarm Serbian or Allied troops who might be driven back upon her territory, the Bulgarians and Germans would be obliged also to invade Greek territory in pursuit of their enemies. A communication to the same effect, and having the same object, was made nearly a month ago by the Turkish and Bulgarian Ministers, but M. Zaimis paid no heed to this. However, soon after Germany, in turn, raised the question, M. Zaimis made a vague reply, and the matter was allowed to drop, as such an eventuality seems hardly probable. But recent events have led to a *démarche* on the part of Germany.

The Attitude of Greece.

After lengthy Cabinet Councils and other deliberations, the Government, in spite of all denials published, would seem to have given a reply in a sense satisfactory to Germany. Moreover, the Government has informed the Entente Powers that Greece will disarm Serbian as well as Allied troops. These declarations have made a painful impression in Allied circles, and more especially in Serbia, the ally of Greece. And, as in this matter Greece seemed to have in mind more especially the Serbs, the Ministers of the Entente informed M. Skouloudis that their Governments made no distinction between the Serbian troops and the French and British troops, and that any action taken against the former would be considered as being directed against the Allies themselves. They also reminded the Greek Government of the assurances of benevolence given even after the disembarkation of their troops at Salonika, and laid stress on the fact that these promises constituted an obligation on the part of Greece to treat the troops in a friendly manner. In short, the Greek Government was pressed to declare its intentions positively for the future guidance of the Allies, who did not wish to be taken unawares, should the case arise. The terms employed seem greatly to have impressed the Government, who, it is said, in view of the grave dangers to which their country might be exposed, ended by making it understood that they would not insist on the stand they had taken up. One Government journal suggests that the best possible solution of the problem would be to allow both sides to cross the frontier if need be, and to fight it out on Greek territory!

ODESSA LETTER.

(From Our Own Correspondent.)

Odessa, November 4.

General Dimitrieff Interviewed.

Radko Dimitrieff, the famous Bulgarian general who from the beginning of the war has been serving with the Russian army, has just granted an interview to the representative of the *Novoye Vremya*. He said:

It is necessary to let the Bulgarian people understand that when fixing the new boundaries in the future the Powers of the Quadruple Entente will be guided by magnanimity and equity. The Bulgarians are being assured at present that the Russians and French are going to wipe out their country. It is necessary to undeceive them. If this is done, I am convinced that the history of the battle of Leipsig will be repeated, when the Saxons, fighting on the side of the French, went over to their opponents and turned their guns against them. If the French and the British, before putting in action their guns and rifles, will appeal to the patriotism and duty of the Bulgars, it may perhaps avert further bloodshed. I think in any case the Bulgarians will not show much fight against the Russians, coming, not as oppressors, but as deliverers from their German enemies. If my voice reaches Bulgaria, my late command, the Third Army, will have regard to it.

To the question as to whether he would be willing to place himself at the head of the Allies' troops, he replied: "At the head of the Allied troops, even at the head of the Russians, brothers by race, it would be difficult for me to fight against the Bulgarians; but if there is a change in Bulgaria and an uprising against the present Government, and if the nation is without a leader and calls upon me, I am ready to lead the troops —of course, against the Germans."

Bulgarians in Russia.

The Russian Government is meantime treating the many thousands of Bulgarians residing in Russia in the same way as it is treating other enemies of Slavonian race, *i.e.*, as friends, and is not putting into operation against them the measures found necessary against the Germans. Even against the Germans severe measures would never have been resorted to had not Germany started from the very first day of the war treating enemy subjects within her borders in a way that might have been appropriate a few hundred years ago, but which is quite unheard of in these times. This has naturally called down retaliation from all the Allied Powers, and it indicates a very short-sighted policy on Germany's part, when it is remembered that there are much greater numbers of Germans in the territories of the Allies than *vice versâ*.

NEAR EAST BOOKSHELF

A CRIMEAN VETERAN'S RECOLLECTIONS.*

Dr. T. Buzzard is one of the few survivors of the heroic army which besieged Sebastopol in 1855-6, and his account of its exploits, based on letters sent home from the front, has all the freshness of a contemporary record. It is matter of history that England's heart was profoundly stirred by Dr. William Russell's disclosures in the *Times* of preventible suffering from cold and hunger, which caused a far higher mortality in the besieging force than the incidents of actual warfare. After remedying the more glaring lapses of our supply departments, the War Office bethought itself of the Turkish contingent, 20,000 strong, which was even worse provided with necessaries than the British Army. It gave a retired Anglo-Indian medico named Fuller temporary rank as Inspector-General of Hospitals, and authority to organize a British medical staff for the benefit of our Turkish auxiliaries. Dr. Fuller secured the services of four youthful surgeons, who had just emerged from studentship; and our author was one of the devoted band. In March, 1855, they sailed for the Near East with a plentiful supply of hospital requisites. On reaching Constantinople they found that the War Office, with its usual negligence, had omitted to notify the Divan of its proceedings. Thus the British staff did not receive recognition until the very eve of peace, while their native colleagues regarded them with intense jealousy. On the other hand, Omar Pasha, the Turkish Generalissimo in the Crimea, received them with open arms. This soldier of fortune was a Croat convert to Islam, still in the prime of life, and possessing a restless energy which stood in marked contrast with the oriental impassiveness of his subordinates. He was a great talker, given in his spare moments to joking, chess, and fishing with a worm. Such picturesque personalities as his were, indeed, oftener met with sixty years ago than in the swarming human hives of the present day. A passionate lover of music, he maintained a large German band which filled the Turkish encampment with Verdi's haunting strains. His British officers were a splendid set of fellows, who commanded heart-whole devotion from their men. Of the latter, Kinglake wrote:—

> So ready and so deep is their trust in any of our countrymen who will take the trouble to lead them, that if Turkish soldiers be camped within reach of the enemy the coming amongst them of a few English youths supplies the one thing needed.

It is impossible to read this passage without a feeling of poignant regret that a wholesome influence should have been supplanted by one which may involve the Ottoman Empire in irretrievable ruin. Dumas the Elder would have found ample material for one of his stirring romances in the foreign officers on Omar Pasha's staff. France, Italy, Poland and Hungary were represented by swashbucklers of the Athos, Porthos and D'Artagnan type, most of whom "had left their country for their country's good." But Dr. Buzzard formed a high opinion of the Turkish soldiery, whose patience under appalling maladministration, and stubborn courage in battle convinced him that, given efficient leadership, they would have accomplished greater things.

Omar Pasha's army was encamped on rising ground to the east of Balaclava Valley, and three miles south of the Fediukin Hills, then in the enemy's occupation. It is interesting to compare the defences which sufficed sixty years ago with the elaborate protective system necessitated by modern warfare. An attacking force

> would have to cross a plain a mile or more in width—then comes a steep ascent well covered with clumps of thick brushwood, and lined by our sentries: then a series of *trous de loup*, i.e., pits, about three feet in diameter and six in depth. There were three or four of these placed so closely together as to make it very difficult to pick one's way between them, the ground being, as it were, honeycombed with obstacles. Should he succeed in passing them without tumbling in, the assailant had to cross a deep ditch, and find himself confronted with a wall about five feet in height, guarded by sentries, and with 68-pounder cannon protruding through the embrasures.

The Turkish contingent had taken no part in military operations since the battle of Balaclava, fought on October 25, 1854, but a few weeks after his arrival Dr. Buzzard received orders to accompany the expedition against Kerch, led by General Sir George Brown.

Our author witnessed the battle of Chernaya, on August 15, 1855, when the Russians made a last despairing effort to capture Balaclava. Their attack was met by French and Sardinian troops, with help from the British artillery, posted on the Fediukin Hills, which had been wrested from the enemy. Just after daybreak a dense column was seen breasting the slope in admirable order. The first line was overwhelmed by a murderous cannonade, and driven back in some confusion on their supports. But the assailants quickly re-formed, and attempted another advance. The officers were seen ahead of their men, cheering them onwards, while dark masses, resembling lumps of earth, suddenly appeared in the rear, which the doctor's field-glass revealed as heaps of dead and dying. On reaching the Allies' position, they were met by a fierce bayonet charge, which hurled them back to the banks of the River Chernaya. For a third time the dauntless Russians advanced to the attack, only to be again overwhelmed by superior numbers. Before 8 a.m. the death-knell of Muscovite resistance sounded.

After the fall of Sebastopol on September 7, 1855, Omar Pasha was allowed to transport his army to the eastern shore of the Black Sea, in view of raising the siege of Kars. They wasted precious weeks at Sukum Kaleh, and then were transferred to Trebizond, a port whose nomenclature evokes memories of comic opera. In the winter of 1855 it was the scene of countless tragedies. Thither came a stream of sick and wounded Turks:—

> Starvation, scurvy, fever, and frostbite of an indescribably severe description, were to be found amongst the large majority of the sufferers. . . . The splendid patience and fortitude of these poor Moslems, not, be it understood, in exceptional cases, but as a rule, was of a kind that I have rarely, if ever, seen equalled. Their gratitude, too, for our efforts to relieve their sufferings were no less marked.

Hospitals capable of accommodating 2,000 patients were improvised, and the British medical staff proved more than equal to the emergency. But it soon became clear that Omar Pasha was too late in the field. After a heroic defence against overwhelming odds, the garrison of Kars, commanded by General Williams, was forced by starvation to surrender, and received chivalrous treatment from their victors. In consequence of this untoward event, Dr. Buzzard enjoyed a brief interval of respite from absorbing duties, which he utilized in an excursion to the desolate mountains south of Trebizond. While riding through a trackless pass, many miles from human habitation, he was beset by wolves, and owed his escape to amazing presence of mind:—

> They clustered round my horse, and as he began to take a few steps, advanced with howls, and made as though they would fly at his throat. I pulled up, and after remaining quite still for a minute or two, again let him move cautiously forward. This action produced a more threatening attitude on the part of the animals, and to add to my discomfort, I could now perceive the horse under me in a state of violent tremor.

The doctor was in a sore dilemma. If he used his only weapon—a loaded riding whip—he would infallibly be torn in pieces. If he tried to gallop off, the pack would soon overtake his tired and frightened horse. The only chance of escape was to rein up and remain as still as an equestrian statue. These tactics puzzled the voracious brutes, which sat in a circle gazing with bloodshot eyes at their quarry. After a few minutes, which seemed centuries to one whose life was in deadly peril, a wolf turned and trotted slowly away, followed by his comrades.

Peace with Russia was proclaimed in April, 1856, and it sounded the death-warrant of the British medical staff. By dint of hard work, professional skill, and sympathy with their patients, they had overcome the jealousy of their Turkish *confrères*, and the manœuvres of Constantinople intriguers. Dr. Buzzard, indeed, thinks that if the war had been prolonged they would have been placed in charge of the entire Turkish medical service.

BOOK NOTES.

Messrs. Macmillan published last week "Letters from a Field Hospital," by Mabel Dearmer, with a memoir of the author by Stephen Gwynn. Mrs. Dearmer, it will be remembered, went to Serbia to nurse the sick and wounded, and herself succumbed to typhoid.

Another book recently published by Messrs. Macmillan is "The Annual of the British School at Athens. No. XX. Session 1913-14." This work is printed for the subscribers and sold on their behalf, at the price of 21s. net.

Mr. Grant Richards has just published "Petrograd, Past and Present," by W. Barnes Steveni. The price is 12s. 6d. net.

Volume two of the Catalogue of the Greek Papyri in the John Rylands Library, Manchester, has just been issued from the Manchester University Press. Edited by Mr. J. de M. Johnson, Mr. Victor Martin and Dr. A. S. Hunt, it is devoted to papyri of the Ptolemaic and Roman periods, and is illustrated with between twenty and thirty plates The price is one guinea.

A useful publication of the Oxford University Press is "The Balkans: A History of Bulgaria, Serbia, Greece, Roumania, Turkey," by Nevill Forbes, D. Mitrany, Arnold Toynbee, and D. G. Hogarth, which is pjublished at 5s. net. It is in the Histories of Belligerents series.

Messrs. Bailliere, Tindall and Cox have published (6d. net) "Infectious Diseases in Serbia," by John Furse McMillan

TANGIER TO TEHERAN.

An Englishman just returned from the Balkans tells us of a generous tribute paid to the British gunners at Belgrade by a Serbian. The Huns, it seems, had brought up some of those monster guns on which they place so much reliance, and our gunners at one spot found themselves hopelessly outranged. But they continued to "try," and stood to their guns to the last, although the enemy shells were falling round them and amongst them incessantly, and playing fearful havoc with them. "I could never have believed," said the Serbian, to my informant, "that any men could have shown such courage!" And that, coming from one of a nation that has crowned itself with such well-merited glory, strikes me as one of the finest compliments paid to our brave troops.

***

I am sorry that General Townshend's force was not able to hang on to those advanced positions of the Turks at Ctesiphon which it had captured. But I am not surprised. And as to being downhearted, nobody who has followed the fortunes of our splendid Mesopotamian Expeditionary Force is likely to be anything of the kind. It was just a bit of bad luck, and in due time the withdrawal will be converted into another advance—*inshallah!* To me the wonder is, not that General Townshend and his men have not got to Baghdad yet, but that they have got so near it already. The withdrawal is easy enough to account for. You remember, no doubt, that about a fortnight ago the German papers were talking about the fall of Baghdad being imminent, but at the same time they spoke about the strong reinforcements that were on their way to the help of the hard-pressed Turks, and expressed the hope (very natural from their point of view) that these reinforcements would arrive "at the right moment." Well, they have evidently done so; while the reinforcements which are, no doubt, being sent on to General Nixon have not yet had a chance to show what they can do.

***

In such circumstances, it seems to me, it would have been folly to press on. I imagine that our troops will now take up a position in which the gunboats can most effectively co-operate with them—that is to say, on one of those peninsulas of which the tortuous Tigris makes so many in its windings—and there sit down and take a well-earned rest until reinforcements join them. The rise in the river, unless it should be such a high one as to flood the country out, would be all in our favour, as it will make it easier for us to bring up supplies by water, and give the gunboats a better chance to command the banks effectively with their fire. Therefore, I think our troops can afford to wait for their "right moment," and we, for our part, can afford to wait for news with a reasonable expectation of its being good news.

***

The British occupation of Busreh has resulted in something uncommonly like a return of those palmy days of the good Haroun er-Rashid to which the Arabian story-tellers so often make mention. This is clear to me, after reading, in the *Busra Times*, the announcement of an entertainment that was to be given, on October 9, at The Palace of Variety Theatre—which, for the benefit of any reader who feels tempted to undertake a journey Busrehwards, I may add, quoting from the announcement, stands "(Near the Customs House, Ashar)." Alas, that in my Busreh days I never dreamed that Paradise with all its Peris would one day be brought down to earth in the neighbourhood of the (then) never-too-salubrious Ashar! Had I done so, I should assuredly have paid heed to the urgent entreaty of the announcement:—

> Once again! Once again!! Once again!!!
> Be sure that you do not miss this opportunity, for, have your seat reserved at once, and mind you, there will be quite a rush this time.

I should have taken part in the rush, and have had my "seat reserved at once," even though it would have been something in the nature of a record in the way of advanced bookings.

***

For, clearly, the entertainment must have been one of unparalleled magnificence, consisting as it did "of numerous dances, performances and comic acts, which will make each and all roar with laughter; in fact, nothing can be more perfect." This seems a rather tall order, perhaps, but, then, we are assured by the Busreh disciple of the late lamented Mr. Crummles that the "world-famed artistes are again endeavouring their best in your behalf to entertain you in every possible way." And consider the cast:—

> M'lle. Samieh, the charming singer and dancer of the Aleppo world.
>
> La Bella Tara, Busra's idol indeed, you cannot take off your eyes from her. A regular Aleppo.
>
> M'lle. Nedjma, there is not a dull movement from start to finish. Do'nt miss her dances.
>
> Comedian Salem, the irresistable comedian. The funniest of clowns. The most popular of all.

The thought of "Comedian Salem," I admit, does not attract me greatly; but the ladies! Why, why was I not in Busreh on October 9? Why should M'lle Samieh, of the Aleppo world, waste her charms on the "Soldiers and Sailors in uniform" who are privileged to gaze on them in return for the paltry sum of "Rs. 1"? Why should "civilians" for twice that sum be enabled not to miss the exciting dances of M'lle. Nedjma? Above all, why should La Belle Tara, the regular Aleppo, remain Busreh's idol only, when we would so gladly make her ours, even though we could not take off our eyes from her—as I, for one, am quite ready to believe? A regular Aleppo, indeed! If THE NEAR EAST next week announces in its "Personal and Social" columns that "Corsair" has left London for Busreh, you will know the reason why.

***

To judge by the tone of the wireless message regarding the opening of the Roumanian Parliament, Berlin appears to hold curious views concerning the possibilities of Roumanian behaviour. "Only one member," states this message, "made a scene, and his ears were boxed by the other members in his immediate vicinity." It is gratifying to notice that only one member misbehaved himself; it is equally gratifying to find that he was *strafed* with such promptitude. The *strafing* was done, too, in such a kultured and gentlemanly manner. Presumably he got it right and left, a double-barrelled affair that left his head buzzing; there was no unseemly crowding, no leaning over by other outraged and indignant members. In many of their wireless dispatches the Teutons give evidences of a greater fund of humour than they themselves are aware.

***

We are told that it is "ridicule that kills," and I fancy that one of the main causes of German hatred for Britain and the British soldier is that they fail to take the ponderous German as seriously as he would wish. Even the "Hymn of Hate" lost its favour in his eyes when he found that it was quite as popular in the British trenches as it ever was in Berlin. The "'Ymn" was, indeed, until abandoned by the Germans themselves, the one song common to the trenches of Briton and Teuton. In America Mr. Punch's audacity in braving German threats of vengeance, and in continuing to shower ridicule upon the Kaiser and his satellites, led to serious alarm among the Germanic party in that country, so, with the guile and underhandedness that we have gradually been forced into associating with the German name, they raked up ancient cartoons of *Punch*, published many years ago, and served them up as expressions of British opinion of America and the Americans. Chance, however, took the secretary of the famous journal to New York three days after the spurious edition of *Punch* appeared on the bookstalls, and his interview with its discomfited publishers left them chastened men—liars caught in their lying. I often think that it would be a good and patriotic thing if *Punch* were to be distributed broadcast, with its letterpress translated into the vernacular, throughout the countries in the Balkans, which are prone to be overawed by the splendour of Teutonic majesty.

LETTERS TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

THE FUTURE OF CYPRUS.

To the Editor of The Near East.

Sir,—As one who takes a deep interest in this fascinating island, may I express some ideas on the political situation? One fact is quite clear, that Cyprus is not satisfied. We have been there for thirty-seven years, and still the people call out for other rule. Why? The question is similar to the Irish one: Why has Ireland been disloyal? Why are Irish-Americans the most dangerous of British foes? Because in Ireland, as in Cyprus, we did not sufficiently consider national sentiment. We named their city bridge "Carlisle" bridge. We called their fishing village "Garrison." Ireland now is prosperous, and nearly satisfied, because Gladstone, Balfour, and Wyndham gave Ireland nearly what she wanted. South Africa is loyal, Canada, Australia, and New Zealand are loyal, because they are self-governing communities under the British flag.

We have not given Cyprus sufficient self-control. Hence, on every occasion Greek flags fly in thousands. The people think they want union with Greece—but they don't quite know what they want. What they really want is power to express their national sentiment, and carry out their national conceptions in home affairs. Greece does not want Cyprus. The island is too far away, and would need a stronger naval Power than Greece can be to secure its protection. Greece wants stability nearer home—north of Salonika and east of Salonika.

To hand Cyprus over to Greece would be unwise. The Turks would be dissatisfied. Our Imperial position facing Egypt would be menaced. Why not rule Cyprus on thoroughly national principles? Send less English officials, there, and pay well those you send—and let more Cypriots (not imported Greeks) be employed in governing their own country. If you fear nepotism, then link Cyprus to Egypt. Let the English representative in both countries be the same man: and let Cypriots be employed in Egypt, and Egyptians in Cyprus.

This seems the true solution of a question which must be solved. A wise, strong, yet firm, delicate hand is needed, like the hand of Kitchener: and plenty of self-government, local nationalism—green flags, any kind of flags, side by side with the Union Jack, which must be supreme in all Imperial questions.

Not long since I was told by a leading Turk that what he would like to see is what I have sketched, or something like it, *all through Turkey*. Turkey self-governed, but suzerained by England.—I am, etc.,

A Lover of Cyprus.

Surrey, November 28, 1915.

"BARBAROUS SERBIA."

To the Editor of The Near East.

Sir,—In your paper of November 19 you reprint some passages from an article published by a young American student in the New York *Independent*, and entitled "Barbarous Serbia."

The passages referred to are calculated to be needlessly hurtful to the feelings of the heroic and intensely patriotic Serbian people, and after a residence of over six months in Serbia, when I visited the country from north to south, I can only say that Mr. Palmer Smith's opinion is diametrically opposed to the opinion I have formed after careful observation. I found the Serbian people—not only the young, but the older people also—eager to learn and to follow English ideas on sanitation and otherwise. The peasant population I found far above the average in intelligence, and their faces alone are sufficient proof of the fact. It should be borne in mind that the best blood of the manhood of the nation is serving with the army or has been removed by war or disease. In spite of this condition of affairs, I found the remaining population ready and willing to learn, but the process naturally requires tact and patience, and it is not perhaps sufficiently realized that a bad schoolmaster makes a bad scholar. A further index of a country's intelligence is to be found in its proverbs, and America might consider itself fortunate if it possessed a collection half as comprehensive or dignified as the sayings of the Serbian people.

Mr. Palmer Smith's studies from the medical standpoint I am unable to criticize, but the people, young and old, have the clearest skins and complexions I have ever seen, and his statements would seem to need verification. Then, again, young American students would be wise to consider some of their own country's "doorsteps" a little more closely before indulging in too severe strictures of their less fortunate neighbours, who have had few of the advantages of the great Western people, and who possess still fewer of their defects.—I am, etc.,

Chas. T. Jenkin, M.Inst.C.E.

BULGARIA AND THE PRINCIPLE OF NATIONALITIES.

To the Editor of The Near East.

Sir,—In my former letter to you under this heading the word "contested," in reference to the 1912 treaty "zones" in Macedonia was an obvious slip for "uncontested," which I regret.

As regards the treaty itself, I have not only studied its text as published, but have discussed it several times with those who possess first-hand knowledge of the circumstances attending its conclusion, and of the actual official text. I neither asserted nor implied that its provisions contain any reference to an Adriatic outlet for Serbia. The governing motive, however, for Serbia in concluding the treaty was the imperative need for such an outlet, and it was in return for future Bulgarian help in this direction that she made to Bulgaria concessions in Macedonia of so far-reaching a character. This was perfectly understood by the Bulgarian statesmen concerned in the discussions preceding the agreement. When, then, in early November, 1912, Dr. Daneff went to Budapest and dissociated Bulgaria from Serb aims for the possession of a port, Serbia no longer felt it incumbent upon her to pay the price, consideration for which had not been received.

Messrs. Andrews and Turner will, I hope, allow me to protest against their turning a statement, made in general terms, about the nature of so much that has appeared in the periodic Press in reference to Serbo-Bulgarian relations, into a specific accusation against The Near East or its contributors. I was not thinking of The Near East at all, and should hardly be a regular reader if I considered its contents bemusing. I must also disclaim any bitterness. To say that it is difficult to discuss certain propositions without bitterness is not to acknowledge, as the writers somewhat curiously seem to consider, that one is discussing them with bitterness; rather the reverse.

As to Serbia's offer, my authority is unimpeachable for the statement I made. Serbia, in the beginning of September, offered the whole of the uncontested "Bulgarian" zone with the reservation of Ochrida, and, so I understood, of Prilep.

Mr. Andrews and Mr. Turner, in saying that the cause of Bulgaria's action was her grievance under the Treaty of Bucharest—the result of her own policy—imply, I gather, that she went to war for the sake of the addition of these two towns to Serbia's offer, and they would seem not to condemn her action on its merits. In view of all that passed, Bulgaria's attack on her allies, the result of the ensuing war, and the cutting of the Vardar railway in this present war, I do not think—apart altogether from the merits of the Macedonian question—that such action was anything but grasping and unreasonable. Her "grievance," even upon her own interpretation of it, had been adequately and generously met. But, sir, it is surely futile now to argue that Bulgaria's action has been due to regard for the principle of nationality or to grievances under the Treaty of Bucharest. M. Rizoff has, unfortunately for his compatriots, given the whole case away. In an interview with a Berlin paper, reported at some length in the *Westminster Gazette* for Wednesday, November 17, he stated that one of the governing motives of Bulgaria was to prevent Serbo-Croat union, as such union would make the Southern Slavs more powerful than Bulgaria, which the latter could not permit. That admission seems to dispose of the excuses still put forward for that State.

I should not have returned to the matter at such length but for what, I consider, would be the unfortunate effect that would be produced in the Balkans if it were thought that even now English people are prepared to sacrifice Serb interests to Bulgaria. To put it in its briefest form it would be this, that to be allied with the Entente Powers would not protect national interests even in the case of success since they might be sacrificed to those of a rival and hostile Power, while, on the other hand, openly to join the Central Powers would not preclude the gaining of what is desired at the hands of the Entente itself. In short, to side with the latter might bring disappointment in either event, while to side with the former would bring realization. To give currency to such an idea would greatly increase our difficulties—even to-day I see by the *Morning Post* that the Greeks are still distrustful of the alleged continued Bulgarophilism of the British Government.

We have enough to do to help ourselves and our Allies without considering our enemies. I am wholeheartedly in favour of the principle of nationality, but if Bulgaria fights against us to obtain the hegemony of the Balkans she must, I fear, abide the result.—I am, etc.,

Canterbury, November 26. A. H. L. Taylor.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (New Style.)	—	Moslem.	Jewish.
1915. Dec.	1915. Nov.		1334. Moharr'm	5676. Kislev.
3	20	Friday	25	26
4	21	Saturday.....	26	27
5	22	Sunday	27	28
6	23	Monday	28	29
7	24	Tuesday	29	30 Tebet.
8	25	Wednesday	30 Safer.	1
9	26	Thursday	1	2

We regret that by a slip of the pen we stated last week that yesterday (Thursday, December 2) was the birthday of Prince Peter of Greece, the son of Prince George and Princess Marie. The Prince was born in Paris on December 3, 1908.

A Russian official telegram reports that the Shah of Persia has left Teheran and is staying at his shooting box at Farakabad, about six miles from the capital.

Lord Kitchener reached London on Tuesday on his return from his mission in the Eastern Mediterranean.

Reuter's Paris correspondent reports that on Monday morning Lord Kitchener had a long interview with M. Briand, the French Premier.

On Wednesday afternoon Lord Kitchener had an audience of the King at Buckingham Palace. The audience lasted nearly an hour and a-half.

H.M. the King of Italy has conferred upon Lord Kitchener the Grand Cordon of the Order of SS. Maurice and Lazarus.

The Aga Khan has returned to London, and is staying at the Ritz Hotel.

General Sir Ian Hamilton had the honour of being received by the King on Tuesday.

Sir Murdoch and Lady Macdonald, who are at present in London, are returning to Egypt by the P. & O. steamer Caledonia, which leaves for Port Said on the 11th inst.

H.E. the Greek Minister, M. J. Gennadius, was confined to his room over the week-end through indisposition. He had, however, recovered on Monday sufficiently to go out.

M. Denys Cochin left Athens on Sunday morning, and at the Piræus embarked on the Greek cruiser Helle for Italy. Before his departure he was received in audience by King Constantine.

On Thursday of last week, at Heathside, North End, Hampstead, a son was born to Mr. and Mrs. Ernest Gabriel Lomas. Mr. Lomas, who is Vice-Consul at Rabat, became a Student Interpreter in the Levant in 1902 and was Acting Vice-Consul at Constantinople in 1905.

Last Friday, in Cairo, the wife of Mr. Kinahan Cornwallis, of the Egyptian Civil Service, gave birth to a son.

Last Saturday, at Leewood, Dunblane, Perthshire, a son was born to Mr. and Mrs. J. R. van Millingen.

We learn that a marriage has been arranged between Captain G. E. Whittall, 1st Oxford and Bucks Light Infantry, son of Mr. and Mrs. Herbert Whittall, of Bournabat, Smyrna, and Lorna, eldest daughter of Mr. and Mrs. H. E. Pears, late of Constantinople and now of London.

On Monday, at St. James's Church, Birch, the marriage was solemnized of Captain Eric Newton Oppenheimer, 2/9th Manchester Regiment, only son of L. J. Oppenheimer, 2nd Lieutenant 2/23 London Regiment, and of Mrs. Oppenheimer, of Alexandra Park, Manchester, to Isabel Aileen, second daughter of his Excellency General Charles Vinicombe Pasha and Mrs. Vinicombe, of Constantinople.

The marriage of Miss Violet Asquith, elder daughter of the Prime Minister, with Mr. Maurice Bonham Carter, took place on Tuesday afternoon at St. Margaret's Church, Westminster.

The Berne correspondent of the *Morning Post* reports that the ex-Khedive, who is now staying at Geneva, has undergone an operation for an affection of the tongue.

We understand that Sister Wheatley has been recalled from service with the British Expeditionary Force in France, and has left England for service with a Mediterranean Expeditionary Force. Her previous experience of the Near East will doubtless stand her in good stead in her new field of work, and she will carry with her the good wishes of many friends now in this country who knew her in Turkey.

Captain George Ryfield Taylour, 2nd Battalion Royal Warwickshire Regiment, who was previously reported wounded, and is now believed to have been killed in action at Kleythoek, in Flanders, on October 19, 1914, was before the war in command of the British detachment of the International Forces at Scutari, Albania. He was the third son of the late Major-General Lord John Taylour and of Lady John Taylour, of 39, Argyll Road, Kensington, and grandson of the second Marquess of Headfort, K.P. Born in February, 1875, and educated at Wellington College, he entered the Army in 1897, and reached captain's rank in February, 1901. He served through the South African War, and was twice mentioned in despatches, and was decorated with the Queen's medal with six clasps. Captain Taylour fought in the battles of Vet River and Zand River, and in the actions near Johannesburg and Pretoria and at Diamond Hill and Belfast. He was captured by Boers while in a hospital train after a gallant defence, where he was wounded. On the outbreak of the present war he left Albania and rejoined his battalion at Malta. On October 5 of last year he sailed from England, and was believed to have been killed during the attack of the 7th Division on Menin while leading his company, and only about eighty yards from the German machine-guns. Extremely tall, he was a very good heavy-weight boxer and always a keen sportsman. When stationed on the West Coast of Africa he narrowly escaped from being killed by an elephant when engaged in big game shooting. Captain Taylour was universally popular, and is a great loss to his friends.

Lieutenant Charles Cornwallis Chesney, Indian Army, Reserve of Officers, attached 117th Mahrattas, who has been killed in Mesopotamia, was the youngest son of the late General Sir George Chesney, and a great-nephew of General Francis Rawdon Chesney, the well-known explorer and originator of the scheme for constructing a railway through Asiatic Turkey to the Persian Gulf. Lieutenant Chesney, who was born in 1885, entered the service of the East India Railway Company, and was officiating as district traffic superintendent at Howrah when the war broke out. After serving for some months with a regiment in Rajputana, he was transferred to the 117th Mahrattas, and accompanied them to the Persian Gulf. He had some time before his death been promoted to the adjutancy of his regiment.

A Cyprus correspondent writes:—A concert at Limassol, arranged by Miss Bolton, daughter of the Commissioner, in aid of the Red Cross Society, was very successful, a sum of about £40 being raised. Generous subscriptions have also been made in this and other towns in aid of the Belgian Fund.

A representative of the *Daily Express* who made inquiries at the Serbian Legation, the London offices of the Scottish Women's Hospitals, the Serbian Relief Fund, the Red Cross headquarters, and the office of the First British Field Hospital for Serbia regarding the fate of British doctors and nurses who have been working in Serbia, has gathered the following information:—The popular writers, Alice and Claude Askew, who are helping with the First British Field Hospital for Serbia, are known to be safe. The Second British Farmers' Hospital was blown up at Belgrade several weeks ago, but the nurses have now got safely down to Macedonia.

A vague message has come through to the London headquarters of the Scottish Women's Hospitals suggesting that Dr. Beatrice Macgregor, of Leopold Road, Wimbledon, who has been working at Mlavadovatz, was making her way to Montenegro.

One of the Scottish Women's Hospital units under Dr. Mary Blair has got safely to Salonika. The London unit of the same hospital, which was working at Valievo, is known to be safe. Mrs. Harley, sister of Field-Marshal Sir John French, and Dr. Louise M'Ilroy are reported to be at Ghevgeli. They were both formerly at Troyes, France.

The Serbian Relief Fund received last Friday a telegram, sent from Salonika by one of the members of Lady Paget's unit, stating that all was well with Lady Paget and her staff.

Mr. Greig, the British Consul at Monastir, who has been busy distributing relief for some time, has been assisted by his aunt, Miss James. Compelled to leave Monastir by the approach of the enemy, Miss James has succeeded in reaching Salonika.

Field-Marshal Lord Grenfell has received a memorandum from Lord Methuen, the Governor of Malta, suggesting that persons sending gifts to the wounded in the hospital at Malta should direct them to the Commissioner, Red Cross Society, Valetta, Malta, and put clearly on the consignment the name and address of the person who has sent the gift. It is added that if hitherto parcels have not in any case been acknowledged the reason is those gifts arrive with no indication where they come from or who has sent them.

The British Farmers' Red Cross Fund has sent a further sum of £5,000 to the British Red Cross Society for stores for Serbia. The grand total collected by the Fund up to November 26 amounted to £121,819 5s. 11d.

At a meeting held on Wednesday at the House of Commons, the Armenian Relief Committee decided to send a further £3,000 to the Mayor of Tiflis for distribution amongst the refugees.

Serjeant P. Berjeant, a member of the Imperial Ottoman Bank's staff at Alexandria, now serving with the French Mediterranean Expeditionary Force, was a short time ago awarded the Croix de Guerre with two stars, and we now learn that M. B. de la Morinière, of the same staff, has been decorated on the field with the Croix de Guerre.

On Tuesday, December 14, at a meeting of the Royal Asiatic Society, to be held at 22, Albemarle Street, at 4 p.m., Sir Charles Lyall, K.C.S.I., will read a paper entitled, "Some Experiments in Adapting Arabian Metrical Forms to English Verse." The Right Hon. Lord Reay, K.T., will preside.

A marriage has been arranged, and will take place in Alexandria during the first week of December, between Harold E. Bell, son of Horace L. Bell, of Alexandria, and Violet, eldest daughter of Dr. Alexander, Porthcawl, Glamorgan.

H.E. Bernard Pasha, C.M.S., and Mrs. Bernard have returned to Khartoum.

The Rev. H. B. Rivington and the Rev. Lee-Warner are returning to the Sudan.

Her Majesty the Queen and Queen Alexandra have graciously given their patronage to the Africa in London—Cape to Cairo Fair and Red Cross Fête, to be held at the Great Central Hall, Westminster, from December 15 to 18. The fair, which is being organised by *The African World*, is in aid of the Allied Red Cross societies and the Governor-General's Fund of South Africa, and the President is the Earl of Cromer.

Appealing for help for the children of Serbia, Mme. Vesnitch, wife of the Serbian Minister in Paris, who is on a visit to this country, writes:—"The women and children of Serbia are flying like hunted game before the invading German, Austrian, and Bulgarian armies. Every surviving able-bodied man and boy is in the field, bearing arms in defence of our independence and of the Allied cause. Numbers of women have fallen victims to the invaders, thousands have perished of cold and hunger. There remain the children, who are the only hope of the future of our race.

"It is for these that we appeal to the everlasting generosity of England to aid us in saving them from utter extinction. We need funds for the work. Contributions, great and small, should be sent to the Serbian Relief Fund, 5, Cromwell Road, marked 'For Madame Vesnitch's Appeal.' These donations will be used for the children. We have arranged that the supplies purchased shall be forwarded in the quickest possible way to the spot where relief is most needed.

"I am authorised by Mrs. Asquith, the Marchioness of Crewe, the Duchess of Marlborough, and Lady (Arthur) Paget to state that this appeal has their entire sympathy and support."

Miss Lena Ashwell's Christmas production at the Kingsway Theatre, London, will be "The Starlight Express," by Mr. Algernon Blackwood and Miss Violet Pearn. Mr. Blackwood is well known in Egypt, where he has spent many winters, and he has also written largely on the country. "The Starlight Express" is a dramatised version of his famous novel, "A Prisoner in Fairyland."

A number of the leading Greeks in England are collecting contributions to provide motor ambulances for the service of the Allies in Macedonia and thereabouts. A substantial sum—some £6,000—has already been promised. The organisation is in the best possible hands, and the success of the movement may be regarded as assured.

This is by no means the first contribution that individual Greeks in this country have made to the cause of the Allies during the war. Many of them have subscribed liberally to the various funds, while a number of their sons and relatives are serving in the English or French Armies.

APPOINTMENTS, PROMOTIONS, Etc.

The Sultan of Egypt has approved of Major Sir George Macauley, K.C.M.G., General Manager of the Egyptian State Railways, ranking henceforth as an Under Secretary of State.

Reuter's Agency is informed that the Roumanian Government has created a new Department of Munitions as a branch of the Bucharest War Office, and that it has been placed under the direction of M. Saligny, one of the most eminent Roumanian engineers.

Sir David Semple, Director General, Egyptian Public Health Department, has been granted two months leave of absence, to be spent in England.

The *Egyptian Gazette* announces that Mr. J. Williams, Inspector-General, Ministry of Public Works, has tendered his resignation owing to ill health, and will be struck off from April 1 next, the beginning of the financial year.

Miralai Burgess Bey, Police Magistrate at Khartoum, has returned to the Sudan after having passed several months at Ismailia, where he acted as Provost Marshal.

M. Paraskevopoulo, formerly Greek Consul at Alexandria, left that city on November 17 for Cyprus, to take over the duties of Consul in that island.

FRIDAY, DECEMBER 3, 1915.

THE TRAGEDY OF SERBIA.

Within eight weeks of the forcing of the passage of the Danube and Drina, Serbia, with the exception of a narrow strip to the south, is under the heel of the invader. The machine-like precision of the Austro-German forces has done its work, but the result would not have been attained if the Serbians had not received a "stab in the back" from Bulgaria. Against overwhelming numbers the army, which has even won grudging tributes from the enemy, has slowly given ground, contesting every point of vantage and inflicting heavy losses on its pursuers. The end, however, in the absence of adequate reinforcements, was inevitable. France and Great Britain, about the time when, after more than two months of careful preparation, the Austro-German attack was about to be launched, made up their minds to send troops to Serbia's assistance. But with only one port of disembarkation available and a single line of railway, ill-equipped, along which to send troops up-country, the task of bringing help to Serbia in time to hold up the invasion was soon found to be hopeless. The utmost that could be achieved was to prevent the Bulgarians from cutting off the retreat of the Serbian forces. But for the arrival of French troops, reinforced subsequently by British troops, Monastir would have been threatened and must have fallen at an earlier stage in the campaign. The Allied forces have not advanced far from the Greek frontier, but the pressure they have been able to exert from the Vardar Valley must have checked the Bulgarian thrust west and south of Uskub. The main bulk of the Serbian northern army has now crossed over into Montenegrin and Albanian territory. It remains an army in being, deprived no doubt of its heavy artillery and merely a shadow of its former self, but a force that may yet have to be taken into consideration when, rested, provisioned, and re-equipped, it begins, with the support of its Allies, the advance which, in spite of defeat and suffering, every Serb is confident will lead to the realisation of Serbia's destiny. Henceforth *Resurgam* is the watchword to which the Serbian people will respond. Schooled in the bitterest of all experiences, purified, it may be, in the fire that has spread over the country, Serbia we can but hope will emerge from her present trials a new nation worthy of the grander rôle to which the final victory of the Allies will call her.

The first task of the Entente Powers is to decide by what means the most effective help can be given to the Serbians. There are still the Austro-German and Bulgarian forces in Serbia to be reckoned with. German headquarters has announced that, "with the flight of the scanty remains of the Serbian Army into the Albanian mountains, our great operations against the same are brought to a close." The enemy's statements of his own intentions are not always to be trusted. In so far as the announcement betrays an unwillingness to follow the Serbians into the mountain fastnesses of Albania it may correctly represent German intentions, but that it spells inactivity for the Austro-German troops now in Serbia and closing in on Montenegro is not to be supposed. As one of the objects of the invasion of Serbia was to open up communication with Bulgaria and Turkey, so now the chief aim of the Germans must be to keep that communication open. With this end in view, they must either try conclusions with the Anglo-French forces which have crossed the Greek frontier, in connection with which operations a further pursuit of the Montenegrins and Serbians may have to be reckoned with, or they must allow the initiative to pass into the hands of the Allies as soon as these have received the requisite reinforcements. Only the fear of an attack from another quarter is likely to deter the enemy from following up his present advantage. It would seem, therefore, as if the Allies' openings would be determined by Austro-German action, and that instincts of self-preservation will decide the method by which relief has to be brought to the Serbians.

The part that Greece will play in these operations is still obscure. From the bid for her military support, which was to be obtained by the bribe of Cyprus, the Allied Governments appear to have reduced their demands to the minimum of benevolent neutrality with definite safeguards for the freedom of action of all Allied troops setting foot on Greek territory. Even so, the first reply of the Greek Government is now understood not to have been satisfactory, and negotiations which ought to have been carried through without any delay are allowed to be prolonged, in spite of the manifest disadvantage they entail to the Allies. We can only hope that, when the veil is lifted from these negotiations, it will be found that the policy adopted by the Entente Powers towards Greece has been more practical than can be inferred to-day from the seemingly barren results, which are all that can be discerned at present. It is difficult to suppose that the Entente Powers could ever be so confident of success with the forces at their disposal that they could remain indifferent to the co-operation of a Greek army of a quarter of a million. Even if such were the case, it would be worth while to consider the future state of the Balkan Peninsula. If peace were to be signed to-morrow, the storm centre of Europe would present an appearance far more lowering than that which it has shown at any time during the last thirty years. What are likely to be the relations between the States, if no attempt be made by Greece to atone for the betrayal which has brought Serbia so low; if Roumania is encouraged in a policy of opportunism, which won for her the Dobrudja without the loss of a single soldier, and has shown her ready to desert her countrymen across the Carpathians for fear the bloodless record should be broken? Is it to be supposed that the ultimate humiliation of Bulgaria alone will suffice to engender contentment in the Balkans? These political considerations ought to weigh as heavily with the Entente Powers as the views which purely military exigencies are likely to enlist. If Serbia were to be completely rehabilitated at the end of the war, and Greece had taken no steps to wipe out the memory of King Constantine's repudiation of the Serbian Alliance, there would be a fatal flaw in any peace to which the nations of Europe might append their signatures. The Entente Powers cannot afford to ignore this point in their negotiations with Greece. It is not merely a question of securing freedom of action for the Allied troops in Greece or of military requirements for a successful campaign against the Austro-German forces south of the Danube. It is a question of justifying the sacrifices which are now being made for the future of Europe. An appreciation of the relation of the Balkan Peninsula to the war at an earlier stage in the campaign would have brought Roumania, Bulgaria, and Greece on the side of the Entente Powers. There will be no justification, when the war is over, for the plea that future political considerations could not be taken into account during a time of war. Even if the political instinct of the Allied Governments does not prompt them to work for the future harmony of the Balkans, they owe it to the thousands of Serbians who have laid down their lives on the battlefield or in the heartrending flight before the invaders to see that out of their sacrifice shall arise a peaceful Peninsula.

CYPRUS.

II.—Its Attraction as a Hill-Station for Egypt.

(BY OUR CAIRO CORRESPONDENT.)

Apart from its political and strategic importance Cyprus has an additional interest to the Empire in general and to Egypt in particular. The Valley of the Nile promises more and more to become an Imperial military base and training ground, and the proximity of a place like Cyprus should prove of great value from the point of view of the health of the troops. The military authorities have already recognised this advantage. Moreover, the climate and conformation of Egypt are such that, in the event of ill-health or over-work, residents are in nine cases out of ten forced to leave the country, if they wish to obtain a complete cure. Now Cyprus fulfils all the requirements of what in India would be called a hill-station, and if only it could be treated as such by the communities of Egypt the latter would not so often have to undertake lengthy and expensive trips to Europe.

Indeed, at one-third the cost and within thirty-six hours, one can be amid surroundings and in a climate that are as different from those of Egypt as they are pleasant and health-giving. The voyage from Port Said to Limassol—of historic interest since it was there that Richard Cœur de Lion was married to the fair Berengaria—takes but twenty hours, and under normal conditions is quite enjoyable. At Limassol customs and other formalities are not very disturbing, and as soon as they have been accomplished conveyances are brought and a start is made on the drive up to Troödos, the hill-station whither Government House and all who can get away from the plains rush as soon as the hot weather sets in. The conveyances available are really nothing more than victorias such as one sees in Cairo, only without rubber tyres. Three horses, instead of the traditional two, draw the vehicle, and what luggage cannot be got inside is strapped on behind. At first sight these conveyances make one wonder if they will ever reach their destination, and the mode of carrying one's goods and chattels seems highly precarious. Experience, however, shows that these fears are groundless, for so well do the Cypriots do their tying-up that seldom does anything fall off—and then it is usually when some nervous passenger has interfered—whilst so skilfully do they drive, that serious accidents are even rarer occurrences. It is stated that the motor service, which at present carries the coastal mails, will next year be extended inland, in which case the journey to the mountains will be considerably shortened.

For about two hours the route from Limassol lies along what is certainly not a good road,* past comparatively barren and deserted country. After about the tenth mile, however, there is more vegetation, and for miles the road winds up and down the hills, amidst field after field of grape-vines, which are cultivated on every spare bit of field and on terraces cut along the rock, and from which drivers and passengers help themselves freely.

At the end of the sixth hour one reaches Platres, the most important stopping place, and a summer resort much patronized by local residents and the Hellenic community of Egypt. Here starts the real hill-climbing, as can be gathered from the fact that the distance from Platres to Troödos is but three miles, and the difference in altitude 2,000 ft. The drive thence takes the best part of three hours, and is by far the most enjoyable, and at the same time the most exciting, portion of the trip.

Up hill, down dale, in and out of the mountain winds the road. At times gazing down into the valley, we see the road we have just covered; further on we glance upwards and catch a glimpse of a white streak, which the driver, unable to speak intelligibly in any known language, indicates is that which we have to take; and looking at the carriages and horses, and again at the white streak above, we wonder whether we shall ever do it. If—as seems quite probable, seeing the hairpin turns the road takes—the carriage overturns, we shall bump nicely from terrace to terrace until whatever remains of us and the carriage lands where we now are. But on we push; and we are well rewarded. The scenery becomes more and more delightful, and the sound of running water from some of the streams as we pass is most refreshing. The nearer we get to the summit the more exhilarating does the air become and the more buoyant do we feel, while with every yard the exquisite scent of the pines becomes more noticeable and more penetrating.

When finally we reach our journey's end, we readily concede that no finer spot than Mount Troödos could be found for a summer station. Situated 6,000 ft. above sea level, commanding the surrounding country for miles, it is just the place for the brain-fagged civilian, the nerve-racked soldier and the convalescent to obtain the rest, quiet and invigoration that he or she so badly needs. The view one gets from the surrounding country from various points is superb. On one side one looks across deep valleys to hills of almost corresponding height covered with pines and vegetation, and round which curve the roads and paths, cunningly cut, in the first instance, to give the easiest gradient and in the second to afford the best view and the quickest mode of descent and ascent. On the other side stretches out before one a marvellous tract of country with the sea clearly defined in the background. The entire panorama presents a picture that gives a curious combination of moorland and Central European landscape; while the mount itself, entirely covered with pines—it is to-day, thanks to the wanton destruction carried out by the olden Cypriots, practically the only wooded part of the island—with red earth, delightfully green bracken and fern underfoot, contributes, especially in spring and autumn, when the ground is covered with the most fragrant and dainty wild flowers, a charm that clings in the memory of every one who visits the hilltop.

Just behind the residential part of the hill lies the summit of Mount Troödos, called Mount Olympus, whither at sunset and on moonlight nights visitors repair to get a view of the surrounding country. It is in parts a stiffish climb, but the view from the summit well repays the exertion. From it can be seen distinctly Morphou Bay to the north, Limassol and the bay to the south, and on very clear days, the coast of Asia Minor to the north-east. We were on one occasion able to pick out a ship which had just landed its cargo, standing out in the sunshine like a toy steamer in the vast bay below.

For those who are able to take them there are walks galore and rides as well, all through the most delightful scenery; but for the weary in mind or body the best thing of all is to lie under the trees on one of the slopes, or half-way up to Mount Olympus. There, as one lies, one draws in with every breath the scent of the pine, so healthful to both brain and lungs. Absolute quiet reigns on all sides, a quiet that almost touches one, so complete is it, and that gives at first an uncanny, awe-inspiring feeling. Soon one gets accustomed to the absence of all noise and to the hush that seems to have fallen over the earth, and one feels curiously at peace with oneself and with mankind. Drowsily one recalls stories one has read of the "Mountain of the Gods," and conjures up visions that seem absolutely to have their place in these surroundings. Suddenly the dream-picture is broken in upon by a great whirring in the air, which, in a way, seems but to accentuate the illusion. It is as if Mercury was passing along on his way to summon the deities to one of those legendary meetings which the poetic exponents of mythology tell us took place on this very mount, whilst the rumble of thunder, which we hear behind us, might well be Jove expressing his impatience at the tardiness with which his fellow gods and goddesses are responding to his summons! The noise in the air is caused by some eagles or vultures winging their way across the valley. We are so high up, and the spot is so quiet, that the swish of their wings as they pass quite close overhead is most distinct.

The life on the mountain is healthful to a degree, and, although essentially British, is free from all social conventions. Indeed, therein lies its innate charm, and hence its great attraction to those who long to get away even for a brief respite from Egyptian life and surroundings. When excursions are not on the order of the day, the morning is spent as indicated under the trees until about noon, when all foregather at the tent of one of the officials to discuss the latest cables, or the local "gup," or to make plans for the future. Afternoon sees a general assembly at the Tennis Club, which, thanks to the munificence of the Government, owns a most attractive little club-house, and where some excellent matches were witnessed during the Troödos Tournament. In the evening there are impromptu and organized concerts in the hotel and elsewhere; but often everyone is so healthily tired, that "who's for bed" sounds as soon as (very often before!) dinner has been digested.

This year the residents arranged entertainments for the soldiers at the Convalescent Camp. It is no small matter to provide twice a week a two-hour programme that will always satisfy such a critical audience as one composed of Tommies, but the applause that greeted each turn showed that the entertainers had attained their object. It is not surprising that the men appreciated the efforts made to amuse them, for without exaggeration they could go a long way before they would find such a galaxy of talent as was congregated on Troödos this summer.

The convalescents, too, contributed their share, and some of them were really first-class singers and comedians. But, of course, the bulk of the items fell to the residents. A pierrot troupe, one of the best I have seen, held the

* I was subsequently informed that it is intended shortly to open another and better road to the hills.

Digitized by Google

boards for two nights, so, also, did a voice-trial, which could not have evoked more laughter if Pélissier and his merry troupe had given it. Curtain-raisers and scenes from well-known London successes were given, and also a series of tableaux, the diversity of which was simply astounding when one reflected that Troödos is the end of the world in so far as shops are concerned, its "Bond Street" consisting of half-a-dozen grocery shops and its sole haberdashery being a tent kept by "Blind George," whose slender and simple stock has to be periodically "taken" and tidied up by kindhearted lady residents. The crowning feat was, however, the reproduction of an extravaganza a few nights before we left. The committee responsible for the entertainment was at its wits' ends to know what programme to give at the next "show." Someone suggested that they should write a play of their own. To the versatile brains that had scored so many successes the hint was more than sufficient. Rapidly the plot was sketched and parts allotted, and within the incredibly short time of forty-eight hours the "Extravaganza"—it was that with a vengeance and original to boot, even to the dresses—had been staged and produced. It proved a howling success, and the audience voted the "Four T's"—the troupe's name is too long to give in full—one of the best "stunts" any of them had ever seen.

With all this can it be wondered that the convalescents—albeit they longed to be at the Turks again—and the civilian visitors regretfully found the day come round when duty called them back to Egypt, and that everything conduced to make one's stay one of the most enjoyable and most recuperative holidays any one could have.

CYPRUS AND GREAT BRITAIN.

(From a Correspondent.)

Since the conditional offer of Cyprus to Greece lapsed, the Cypriot people have accepted with good sense the course of circumstances. At first there was considerable excitement throughout the Greek community. After a meeting, held in the palace of the Archbishop, at Nicosia, telegrams were dispatched to the Prime Minister and to both Houses of Parliament in London, expressing the gratitude of the Greek people. On November 5 the High Commissioner received the Archbishop and members of the Legislative Council at Government House, when an address was handed to his Excellency for transmission to the Secretary of State for the Colonies.

The reply of the High Commissioner has been communicated to the Press and people. After thanking his Beatitude and the members for their loyal expression and wholehearted sympathy with England and her Allies in the great struggle for liberty and civilization, his Excellency observed that, having regard to the reported official statements that the offer had been made and refused, and had lapsed, the Greek Cypriots would doubtless now recognize in the fullest manner their obligations as British subjects. "In particular he desired that they would avoid at the present juncture any public expression of racial sentiment that might be interpreted as derogating from their political allegiance, or disturb the susceptibilities of any of their fellow subjects, or lead to disquiet among the more ignorant and excitable classes of the population."

His Beatitude assured his Excellency that the Greeks would give no cause for unrest among the people; and other members of the deputation reiterated their acknowledgment of their status as British subjects, and asked for a continuance of the Liberal attitude maintained towards them by the British Administration. The Turkish community has continued to regard the course of events with complete loyalty and equanimity, notwithstanding the feelings of dissatisfaction to which late events might with good reason give rise.

THE EGYPTIAN INSTITUTE.

The *Egyptian Gazette* reports that at a private meeting of the Egyptian Institute, held at Cairo recently, the question of the enemy subjects who are members of the Institute was discussed. After a debate, it was decided to expunge their names from the list of the members of the Institute, as has been done by other learned societies in England and France. Among the members thus dealt with were Emil Brugsch Pasha, formerly the Conservator of the Museum of Egyptian Antiquities; Herr Ottmar von Mohl, formerly German member of the Public Debt Commission; Max Herz Pasha, formerly Chief Architect to the Wakfs Administration; and Professor Loos, of the Kasr el Aini School of Medicine. The decision to expunge the names of these members was unanimous.

A Syrian newspaper announces that the American missionaries in Egypt intend to establish a new university at Cairo, modelled on the lines of the American University at Beyrout. Provision will be made for the study of mechanics, agriculture, medicine, and pharmacy. A large sum, it is added, has already been collected in order to carry out the scheme.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Entente Loans to Greece. Nov. 25.

Sir E. Cornwall asked the Secretary for Foreign Affairs what advances of money had been made, or promised, to Greece by the Entente Powers since the war started.

Sir E. Grey: I realise that this is a very natural question, but I regret that it is not desirable in the public interest at this moment to give details of financial transactions between this country and its Allies and neutral countries.

Bulgaria and the War.

Sir R. Cooper wished to know whether the British Minister in Sofia informed the Foreign Office about last March that Bulgaria would join the Central Powers, and that further negotiations with her would be abortive.

Sir E. Grey: The answer is in the negative.

Sir R. Cooper inquired whether the British Minister Plenipotentiary in Sofia was recalled in the early part of this year.

Sir E. Grey: He was not recalled. He was granted leave of absence.

Great Britain, Russia, and Persia. November 30.

Lord Robert Cecil informed Sir P. Magnus that energetic steps were being taken in various ways to counteract the effect of false statements made in the interests of the Central Powers in Persia and other countries.

Sir E. Cornwall asked whether Russia and Great Britain had now agreed to the moratorium requested by the Persian Government in respect of the payment of interest on loans made by this country and Russia.

Lord Robert Cecil said the British and Russian Governments were engaged in amicable negotiations with the Persian Government with a view to placing the latter in a position to maintain order in Persia and to uphold the duties incumbent upon a neutral State. Until these negotiations were further advanced it would not be in the public interest to make a detailed statement on the subject.

British Subjects in Serbia.

Lord Robert Cecil informed Sir Henry Dalziel that he had no information with regard to the safety or otherwise of British subjects in Serbia other than those connected with the different hospital units in that country. Sir Ralph Paget reported on November 1 that it was practically certain that some five or six British units (about 200 individuals) appeared to have been taken prisoners between Krushevatz and Kralievo. On November 26 His Majesty's Minister at Cettinje transmitted a message to Sir Ralph Paget to the effect that the Serbian military authorities had decided at the last moment that it would be safer for Red Cross units to leave Serbia for Montenegro instead of for Monastir through Albania, as originally intended. Sir R. Paget was endeavouring to make arrangements for shelter and food for hospital units along the roads, and hoped that the first detachment might arrive at Podgoritza on November 27. The following were the approximate numbers of the various units on the way:—Scottish Women's Hospital, 47; the Stobart unit, 22; the Wounded Allies' Relief unit, 13; and Second Farmers' unit, 9.

Mr. Chaplin asked if that statement included all the nurses in the different Red Cross units serving in Serbia.

Lord Robert Cecil said it was difficult to be certain, because the means of communication at present with our own representatives, whether Sir Ralph Paget or Sir Charles Des Graz, were so difficult. He would not like to pledge himself that it included all the nurses, but he hoped and trusted that it did.

Greece and the Allies.

Lord R. Cecil, replying to Sir E. Cornwall, said he did not think that any statement could be usefully made at present as to the exact understanding which had been arrived at between the Allied Powers and the Greek Government.

The Persian Gendarmerie.

Sir J. Rees having asked the Under Secretary of State for Foreign Affairs under what leaders, whether Swedish, German, or other, the Persian gendarmerie were acting who had made prisoners of His Majesty's Consul and the manager of the bank of Persia at Shiraz,

Lord R. Cecil, in a written reply, stated that he was unable to add anything to the communication issued to the Press on November 24, as he had received no further details on the subject, except that the Persian Government had recalled the foreign instructor who was in command of the gendarmerie in Fars. The Swedish Government had always shown readiness in meeting any wishes expressed to them in regard to any Swedish instructors of gendarmerie when it was in their power; and there could be no question of the Swedish Government being in any way responsible for the conduct of the gendarmes or for anything the officers of the gendarmerie might or might not have done. The officers were, of course, not Swedish officers in the sense of being under the orders of the Swedish Government at all. The more correct description would be Persian gendarmerie instructors of Swedish nationality.

Lord Kitchener's Mission. Dec. 1.

Sir E. Cornwall asked the Prime Minister when he proposed to make a further statement as to the plans and mission of Lord Kitchener; and whether such statement would include a full report giving the House and the country all possible information which the military circumstances admitted as to our position on the Gallipoli Peninsula and the Balkan situation generally.

Mr. Asquith: Any such statement as my hon. friend contemplates would not be desirable at the present moment.

THE WAR IN THE BALKANS.

Sursum Corda.

Since last writing the inevitable has happened, and Voivode Putnik's army has been driven back westwards from the plain of Kossovo. A week ago to-day we wrote that the brave leader of the Northern Serbian Army had two courses open to him: either to give battle on the left bank of the Sitnitza or to retreat into Albania. The latter alternative has been chosen. To argue now why this course was chosen would be superfluous, but, knowing as we do the heroic courage of the Serbs defending their country against invasion, we are inclined to think that either the numerical superiority of the enemy or the tremendous dearth of munitions on the side of the Serbs, or both, were the causes which led to Putnik's retreat into the Albanian fastnesses.

The situation thus created in Serbia is a weeping tragedy. Belgium, momentarily, is a strip of land, Serbia another, but if anything can outdo the horrors of Flanders, it is the tribulation of that brave Balkan people which, refusing to come to terms with an aggressive enemy at the eleventh hour of its trial, led its army out of the Sitnitza valley into Albania, there to recuperate and gather fresh supplies for the renewed attack at a later period.

The Serbian Plight.

To moralise over past events is out of place; to bandy words as to the reason why the Serbian tragedy should have been enacted is a forlorn consolation; to argue whether another military campaign would have been more successful than that which has just taken place is, in present circumstances, utterly worthless. We have all of us our well-defined opinions as regards the tragedy of Serbia, but it is wiser not to utter them. We are face to face with a new situation, as complex as any on the map of Europe, and it behoves us now to turn our eyes to the future rather than to the past. But before doing so, a few words as to the present. Hundreds and thousands of Serbs, of loyal fighters for the good cause, and their wives and children—especially the children—are destitute, homeless waifs wandering over the face of this earth in search of kindness and commisseration. Cruelties beyond words have been perpetrated by the Austrians blood-mad after their defeats of last November, by Bulgars thirsting for revenge, and by Germans because they practise frightfulness as a wild beast practises savagery. These people, these destitute victims of enemy persecution and Nature's harsh inclemencies, need all the help they can get. Let us show them that, though we were unable, owing to circumstances beyond our immediate control, to come to their help in time to save their hearths and homes, we have not forgotten them, shall not forsake them in this their greatest hour of need, nor will we be slow in coming to their immediate rescue.

The New Situation.

Two months ago the enemy line followed the Danube from its source to Orsovo; it then struck north-east around the Carpathians and the Roumanian frontier to where it reached the Russian line. Turkey was not linked up with the Central Powers, and even when Bulgaria fired the first shot against Serbia, the enemy's eastern line went no further west than the Serbian frontier. To-day the situation has altered: the enemy line reaches down the Danube beyond Rustchuk; from Constantinople westwards the enemy line reaches to the Sitnitza, thence northwards to the Drin and the Save. In other words, what was Serbian territory is now—with the exception of a small tract of land in the extreme south-east, another in the extreme south-west, and a strip of land along the Albanian frontier, broken in half at Prizend—enemy territory. Through it runs the main artery of communication between Berlin-Vienna and Constantinople, the control of which was Germany's main objective in undertaking the present campaign. It has been achieved, but the following remarks are appropriate. The railway from Hungary to Sofia crosses many bridges in Serbian territory, foremost among them being the long bridge across the Save near Belgrade, now utterly destroyed, with the river in flood; then the long bridge across the Morava, near Nish, equally destroyed; then a series of bridges and tunnels between Nish and Pirot which in all probability will have likewise been blown up. Thus, though the route, as such, is open, it will be of no practical use for months to come. As for flank attacks on the line from the west, from Montenegro and Albania, they have been temporarily rendered impossible by the final retreat of the Serbian Army. But it must not be forgotten that this is the most vulnerable, the only vulnerable point of the enemy line: as long as we hold Montenegro and Albania, and are able to supply the Serbian and Montenegrin armies with provisions, munitions and men if necessary, the German line is unsafe. The parallelogram Montenegro-Albania occupies the same position on the eastern front as Portugal did during the Peninsula Wars.

The situation in the south is, practically speaking, unchanged. The Allies hold their old line from the Cerna River to Doiran, though, as was to have been expected, they have retired from the left to the right bank of the Cerna. Prilep to the north-east of Monastir, the railway line to the south-east and Prizrend to the north have fallen, and Monastir itself, famous for its heroic defence, is on the point of succumbing. With its capture the south-west corner of Serbia will likewise have fallen into the hands of the enemy, and, with the exception of the Cerna-Doiran line, Greece will be surrounded by Bulgars and their kin.

Sursum Corda.

Such is the situation at present. The picture, admittedly, is a gloomy one, but the gloom is not impenetrable. The Serbian army is not wiped out: it has retreated. It can and will recuperate, but its supplies and provender must come from the Adriatic. Let this be fully and frankly realised, and the sooner steps are taken to organise a regular service of supplies through Albania, the sooner will the vulnerable point of the Berlin-Constantinople line be attacked with strong forces, and a New Serbia arise in the valleys of the Ibar and Morava. As for the southern campaign, it must be relentlessly pursued; our Cerna-Doiran line is the only obstruction in the enemy's path to the bays and harbours of Greece. It must be strengthened and held until the Serbs, aided by all the Allies, have reconquered Nish. They will do so, given the necessary equipments.

TWO MONTHS' CAMPAIGN..

The following diary of the war in the Balkans, from September 30 to November 30, is extracted from *The Times* "Diary of the War," published on Wednesday:—

September 30.—Von Mackensen masses 250,000 men and 2,000 guns on the Serbian frontier.
October 2.—Bulgarian forces massing on the Serbian frontier. German battalion attempting to cross the Danube at Semendria repulsed by the Serbs.
October 4.—Russian ultimatum to Bulgaria.
October 5.—Allied forces land at Salonika, at invitation of Greek Government.
October 6.—Austro-German invasion of Serbia begun; the Drina, Save, and Danube crossed.
October 9.—Belgrade occupied by Austro-German troops.
October 11.—Bulgarians cross the Serbian frontier. Semendria captured by the Austro-German forces.
October 12.—Greek Government declines to assist Serbia.
October 14.—Bulgaria at war with Serbia; war declared by Great Britain.
October 16.—Franco-Serbian forces repulse Bulgarians at Valandova.
October 17.—Bulgarians capture Egri-Palanka and cut the Nish-Uskub railway at Vrania.
October 18.—Austro-Germans take Obrenovatz on the Save. Fierce fighting between Bulgars and Serbs at Vrania.
October 20.—Bulgarians occupy Veles.
October 21.—Bulgarians occupy Kumanovo. Bulgarians repulsed by French troops near Rabrovo, south of Strumnitza.
October 22.—Bulgarians occupy Uskub; Bulgarians again repulsed by French at Rabrovo.
October 23.—Bulgarians cross the Timok and occupy Prahovo.
October 25.—Franco-Serbians recapture Veles, and threaten Uskub; Bulgarians retire on Ishtip.
October 26.—Austro-German and Bulgarian forces in touch at Ljubichevatz; Serbians retiring along the line Zaitchar-Kragujevatz.
October 27.—Uskub retaken by Serbians.
October 28.—Bulgarians capture Pirot; they occupy the Katchanik Pass on the Uskub-Mitrovitza Railway.
October 29.—Bulgarians recapture Veles; Strumnitza Station occupied by the French.
October 30.—British in action on the Ghevgeli-Doiran front; Bulgarian attack on Krivolak repulsed.
November 1.—Fall of Kragujevatz, the chief Serbian arsenal, to the Austro-Germans. Bulgarians advancing from Veles in the direction of Monastir; Serbians holding Izvor, between Veles and Prilep.
November 4.—Austro-Germans reach Parachin; Bulgarians defeated at Izvor by Serbians, assisted by French and British.
November 5.—Fall of Nish to the Bulgarians.
November 7.—Austro-Germans reach Krushevatz.
November 10.—French troops occupy Gradsko.
November 12.—Serbians retake Tetovo from the Bulgarians.
November 14.—Bulgarians take Krushevo and advance on Prilep: Tetovo again in Bulgarian hands.
November 15.—Serbian success on the Babuna front.
November 16.—Fall of Prilep. Bulgarians repulsed on the French front on the Tcherna.
November 20.—Fall of Novi Bazar. Bulgarian offensive against Monastir checked.
November 22.—French attack on the Krivolak front; Brusnik occupied.
November 23.—Fall of Mitrovitza and Prishtina: Serbian Army in retreat towards the Albanian frontier.
November 26.—Bulgarians cross the Tcherna and threaten Monastir.
November 30.—Prizrend taken by the Bulgarians.

THE PRESS ON THE NEAR EAST.

Germany's Position in the Balkans.

In a leading article upon the Balkan position the *Times* (November 29) comments upon the modified tone of the German Press during the past few days, when the greater part of their Headquarters' report has been devoted to detailing the armies employed to crush Serbia:—

The enumeration of the armies employed to crush the poor little Balkan people, whom Austria-Hungary thought herself competent to "chastise" single-handed until a cruel experience taught her better, somewhat detracts from the glory of the operation, however calculated it may be to intimidate other Balkan States. It took a combination of von Mackensen's group, von Koevess's Austrian army—"reinforced by Germans"—von Gallwitz's army, and two Bulgarian armies on the flank to drive the Serbians to the mountains, into which it is apparently not thought expedient to follow them. All the available forces of two mighty Empires, treacherously aided by the whole strength of the most powerful of Balkan States, were summoned to the task, and boast that they have performed it, though they leave the Serbian Army "in being."

The *Evening Standard*, in dealing with the situation, says:—

But though Serbia has gone down to the tomb, it is in the hope of a splendid resurrection. That hope lies not only in the friendship of Allies who are solemnly sworn to obtain for her such restitution and compensation as her sacrifices merit. It is firmly based on the character of her people. Of the Christian races that fell under the dominion of the House of Othman, two only, the Serbian and the Magyar, have retained their full share of manliness. The Serbs are not traders like the Greeks, or usurers like the Armenians. They have fighting blood, as the Turk found before he crushed them.

The *Globe* (November 29):—

Serbia is, for the time being, utterly crushed, but whether the Berlin-Constantinople line of communications which the enemy proposes to restore will be quite so secure as the German public is encouraged to believe is a matter upon which we should like to have the candid opinion of General von Mackensen and his very competent staff. . . . The massing of the great Russian army on the north bank of the Danube is a factor which cannot be neglected. . . . There is an extremely unpleasant situation known as being between the Devil and the Deep Sea, and the German announcement that "the great operations against the Serbian army are brought to a close" reads to us as though the Germans have begun to realize its implications.

The *Pall Mall Gazette*, in a leading article, also shows the position to be by no means as secure as Germany might desire:—

The massing of Russian armies for the Balkans counts for a good deal in itself, and there are possibilities of Roumania jumping into the "flowing tide" of which Berlin is by no means oblivious. Germany, in short, may have all her work cut out shortly to keep what she has seized. If she does not celebrate her "triumph" now—and extract her popular thank-offering—another opening for those performances may not occur.

An Indictment of the Bulgarians.

Vasili Nemirovich-Danchenko, the well-known Russian writer, is contributing a series of articles to the *Russky Slovo* on Ferdinand and the Bulgarians. The writer knows his subject well, having lived and worked among the Bulgarians, and, moreover, his previously well-known great friendship for that country lends his present articles the more weight. The articles are of very great interest. An idea of them can be gleaned from the following few extracts:—

"We are not sentimental," boast the Bulgarians. They forget that from sentimentality to base treachery the distance is wide as the poles. They are not sentimental! What a pity we did not foresee this in 1876, and earlier, when they threw themselves at our feet, praying in tears that we should save their towns and villages from fire, their sons from the Turkish knives, and their daughters from outrage and dishonour! . . .

They complain that we robbed them in 1913 of the fruits of the victory in the Balkan Peninsula. I do not dispute that our diplomacy was then short-sighted. Nevertheless, instead of accepting our proffered mediation and retaining Adrianople and Macedonia, her Cains preferred to strike a robber's blow at Serbia. . . .

If you Bulgarians were magnanimous and honourable you would have risen as one man together with us. You would have cried out to the whole world, "Ah, yes, we were insulted and affronted, but we will forget all, and march together with all the Slavs." . . . Ah, but you are not a nation of knights, and everything knightly is foreign to you.

Perhaps it is better so. Now we are for ever freed from the anxious thought of you and your fate. We shall never forget that in the conspiracy of the rulers against their people (Roumanian, Greek, and Bulgarian) you, covered with our blood and bought with our sufferings, were the first to rise against us; that you, hissing our flag in the streets of Sofia and in the square on which the Tsar-Liberator looks down from his bronze horse on to your House of Deputies, that you yourselves cut the artery that bound us together. . . . And I, who worked for you, and with you suffered for your sorrows and rejoiced at your victories, with curses and repugnance wipe out from my memory every mutual recollection. . . . Do not excuse yourselves by saying that it is not your fault, that your Government is to blame. Every nation is worthy of its own Government.

A Neutral at Salonika.

To the *Independent* (New York) Mr. Elon Jessup, who was a member of the Columbia Relief Expedition which went to Serbia in the summer to aid in the distribution of supplies and farm implements, contributes an interesting article entitled "Is Salonika Safe?" On the whole he thinks that the Greeks have keenly resented the rigour of Britain's naval activities in regard to the examination of Greek shipping, and points out that "what Greece permits for the sake of continued existence as a nation and what she feels are quite different."

As a result of ships being held for days, and in some cases for weeks, the Greek steamship companies and merchants suffered heavy losses. Wherever possible the steamship companies made up their losses by taxing the cargoes. Many shipments to Serbia have been subject to such a tax. An anti-British feeling crept in and gradually grew in intensity. In Salonika we were accepted as English. Nothing was said, but there was no mistaking the furtive glances cast in our direction.

The Diplomatic Need.

The *Daily Chronicle* (December 2), in a leading article urging the consolidation, or pooling, of the Allied forces in order to be able to dispose of them to the best advantage, concludes:—

The outstanding need of the moment is a prompt and energetic military policy in the Balkans. Upon whether or not it is carried through depends to a large extent not only Greece's but Roumania's attitude. Following their conquest of Serbia, the Central Powers are certain to put extreme pressure on Bucharest. What Roumanian statesmen will need from the Allies in order to resist it are not clever diplomatic arguments, but the visible guarantee afforded by Allied military strength.

Baghdad and the Persian Bandits.

The *Times* (December 2), in a leading article under the above heading, reviews the detailed report of the battle of Ctesiphon, and thinks that—

It may be assumed that Sir John Nixon, who is in chief command in Mesopotamia, will probably await reinforcements before resuming his advance. His communications are good and safe. The river should be rising by now, and in peace time the passage from the sea to Baghdad itself usually took the little river steamers less than a hundred hours' actual steaming. The British can readily obtain all the reinforcements they require, and no doubt are receiving them. The really important question is whether the Turks can receive further reinforcements rapidly.

The paper considers that the reply to this question is that while men might be hurried from Constantinople, the transport of military supplies will only be undertaken with difficulty and delay.

Turning to the situation in Persia, the *Times* emphasises the fact that there is no disposition to blame the Swedish Government for the defection of some Swedes.

The officers originally nominated by the Swedish Government to form a force of gendarmerie in Persia have all returned. Those Swedes who are now in Persian service are there as private adventurers, and we may leave them to the public opinion of their countrymen. The Swedish Government disowns them. They have proved unfaithful to the Persian Government, whose salt they have eaten, and that is an offence unpardonable in the East.

The conclusions of the paper are summed up in the sentences which we quote below:—

It would be extremely unwise to regard the Persian situation lightly, but it would perhaps be equally unwise to take it too gravely at present. One good and successful thrust at the more vital positions of Germany in Europe, and all these melodramatic plots in the Middle East would vanish like smoke.

Tricks of the Trenches.

Under the above heading "Special Reserve" contributes an interesting article dealing with the operations at the Dardanelles to the *Pall Mall Gazette*:—

Directly you leave the beach, like a human mole you enter into a sap, and it is now possible to walk for four or five miles without coming on to ground level for more than three or four hundred yards.

So necessary is the work of the Sappers in this region that the slightest move on the part of either belligerent is usually followed immediately by the formation of new trenches. "The physical features of the place change every day, and even after a week's absence it is sometimes difficult to recognise a place through which you could have found your way blindfolded."

Digitized by Google

The Turks appear to be well instructed and ingenious, as the following quotation will show:—

At one point they had a most ingenious arrangement, on the principle of the game often seen at country fairs, where you throw a ball on to a slanting board with holes in the surface and a trough at the bottom to catch the balls, which come trickling back, bobbing into the holes and out again in the most exasperating manner. The trench being on higher ground than the one our men were holding, a groove had been made down the slope, and at the bottom of this groove was another more or less horizontal groove, the two forming a sort of inverted T. The horizontal groove was in its turn pierced with little drainpipes, leading into the trench we had captured. One man, with a good supply of bombs, started them rolling down the top groove as fast as he could, and gravity did the rest. When the bombs got into the horizontal cross-groove they were lost to sight, and there was no way of telling from which of the numerous drainpipes one might emerge into the bottom of our trench. In this way one man could do more accurate work, and more damage, than a dozen skilled bomb-throwers.

"There were no overs or shots" in this game. "Every bomb reached the trench."

An "Artful Dodger."

Who is the most efficient driver of a bargain in the Orient? This is an often debated subject, and the following opinion of Mr. Ashmead-Bartlett in the *Sunday Pictorial* (November 28) will probably only serve to increase the controversial spirit:—

The Modern Greek is not a fighter. He is, in fact, the "Artful Dodger" of the Orient. He can run circles round the Armenian and the Jew in a deal.

From the context of his article it is evident that Mr. Ashmead-Bartlett does not hold a very high opinion of the Greeks, but in the concluding paragraph it will be seen that he is prepared to do full justice to any arguments which may be produced in support of the King's policy:—

In this world-struggle each nation is apt to consider its own paramount interests when dealing with the Balkan States. But there is another potent and honourable reason why King Constantine wishes to avoid a rupture with the Central Powers and their allies at all costs. There are still hundreds of thousands of Greeks living in Constantinople and in Asia Minor. The first shot fired against the Turks will probably lead to a general massacre of these unfortunates, who would thus share the awful fate which has been meted out to the Armenians just to keep "the Turkish soldiers amused and occupied," to quote Enver's reputed words.

Italy's Part.

"A Student of War," reviewing in the *Manchester Guardian* (November 27) a week of the war, is optimistic regarding the future of our Allies in the Balkans. He shows that an attack on the Allies is dangerous because Bulgaria cannot disregard the possibilities of a Russian invasion.

A considerable reduction of the Bulgarian forces in Southern Macedonia is, therefore, not unlikely. A further reduction must be made for the line of communications, which runs through a country which is still in all probability very hostile. . . . If the Allies act on the defensive, and have employed their long wait to advantage, there is no need why they should not manage to beat off the attacks. Defeat or a check will, under the circumstances, if Russia can invade in force, be exceedingly dangerous; if Roumania were to throw in her lot it would mean disaster. On the other hand, for the Germans not to advance but to wait expectantly would be hardly less dangerous.

The writer refers to the part which Italy is playing in the war, and of its effect upon the Balkan campaign.

The steadily increasing Italian pressure on Gorizia is very valuable, for it will prevent the Austrians from reinforcing the Balkan army to any purpose. The fall of Gorizia, which seems likely to come soon, will open a formidable campaign against Trieste, which the Austrians must resist with all their strength.

BULGARIA BEFORE 1878.

The story of Bulgaria was told by Dr. Seton-Watson at King's College on Thursday of last week. By the tenth century, he said, a Bulgarian Empire had been founded extending to the Adriatic. It fell in 1014, after a defeat by the Eastern Empire. Fifteen thousand Bulgarians who had been taken prisoners were blinded, except that one man in every hundred was allowed to retain one eye, so that he might lead his companions back to the Bulgarian Tsar, who was said to have died of horror at the sight. The barbarity of the period was almost consistently on the side of the Greeks, and the subsequent horrors of Turkish history were largely traditions of the Byzantine Court. Until the end of the twelfth century Bulgaria remained under the rule of the Eastern Empire, but then had another revival, and extended its territories until they reached the three seas—the Black, the Ægean, and the Adriatic. But Bulgaria fell before the rising power of Serbia, to which it became a vassal State; and the quarrel between the two races led to the undoing of both, and made possible a little later the entry of the Turk into Europe. No country was more completely crushed under the Turkish rule, for Bulgaria lay on the road from East to West, and was also the point nearest to Stamboul. All that was left to the Bulgarians was the church, and that was in the hands of the Greeks, who in 1637 succeeded in destroying the last fragments of the two autonomous churches of Serbia and Bulgaria. People became ashamed of being Slavs, and if you asked a peasant what he was he would reply, "I am a Greek." This explained the failure of Kinglake and other travellers to detect the presence of Bulgarians in Bulgaria even in the nineteenth century. In the early part of that century Venelin, who wrote books on Bulgarian history, pioneered a revival. His first book had led in 1835 to the foundation of the first Bulgarian school. These schools had spread rapidly, and the Bulgarians had since shown a greater passion for education than any other Balkan race. The national revival also showed itself in a demand for a national episcopate, and the first Bulgarian church was built in Constantinople in 1848. In 1873 the Bulgarian Exarchate was formed. The growing national consciousness was accompanied by various revolutionary attempts, and that of 1876 led to the Bulgarian massacres. Sir Edwin Pears drew the attention of Mr. Gladstone to these, and they were the first stage towards the Russo-Turkish war, which ended in the independence of Bulgaria.

THE EGYPTIAN FRONTIER.

Under date of November 27, Reuter's Cairo correspondent reports:—

The following official statement is issued here:

The Sherif-el-Senussi continues to maintain an entirely friendly attitude towards the Government, but certain hostile agencies in the West have succeeded in inducing some of the Western Arabs to commit minor acts of aggression against our frontier posts and our people.

In pursuance of the Government's policy of removing any possible cause of trouble and friction the smaller frontier posts have now been concentrated at Matruh, where an ample force has been established for the protection of our Arabs against any aggression.

GERMANY AND EGYPT.

The Copenhagen correspondent of the *Morning Post* reports in a message dated November 28:—"Travellers from Germany stated that all over the German Empire one hears the cry 'To Egypt,' where, it is believed, there is a possibility of attacking England. A Danish engineer who asked a prominent military person whether Germany intended sending an army to Egypt received for answer: "No, we shall only send 1,000 officers."

Public Opinion

Edited by PERCY L. PARKER

PUBLIC OPINION'S greatly increased and increasing circulation since the war began shows that it fulfils a most useful purpose to-day by way of inspiration and information. It gives a magnificent analysis of all the great problems—social, political, financial, and religious—arising out of this War of Nations which will alter the whole of life for the present generation.

PUBLIC OPINION *can be sent to any address in the United Kingdom for three months for 2s. 3d., or to anywhere in the world for 3s. 3d. Yearly subscription in the United Kingdom 10s. 10d., or Abroad 13s.*

A SPECIMEN COPY *will be sent to any address on receipt of a post card to THE MANAGER, PUBLIC OPINION 28-34, Temple House, Tallis St., London, E.C.*

TWOPENCE WEEKLY

Digitized by Google

THE E.E.F.

The annual meeting of the Egypt Exploration Fund was held last Friday in the Hall of the Royal Society, Burlington House, with Mr. J. S. Cotton in the chair. The report of the committee pointed out that the reorganisation of the society, carried out in 1913, had had to be modified owing to the exigencies of the war. The number of members had decreased from 321 to 260, and the society had lost a large number of foreign subscriptions. Expenses, too, had naturally gone up. The committee recorded their thanks to Mr. Cotton and Mr. Gardiner, who had kindly consented to edit the *Journal* at no cost to the fund. No work had been done in Egypt during the past winter by the fund as a whole, as it was not considered appropriate to appeal for subscriptions for the purpose. The American Committee, however, being under no obligation to save, had gone on with its special work at Balabish, under Professor Whittmore and Mr. Wainwright. The hon. treasurer reported that the income of the fund, apart from special donations for the Osireion work or other purposes, showed a decrease, as compared with the previous year, of £575, and that the adverse balance on the year was £658. Measures had been taken by the committee which should effect a saving of at least £450 in salaries this year, and, if the cost of publications did not exceed the average and the income did not fall further, the situation at the end of the current year should be rather better than it was in the year under review. No work in Egypt was proposed this season, either for the fund proper or the Græco-Roman branch, but the American Committee proposed to take up the exploration of a site in the Delta, Tell Tibelleh, near Mansûra. The public lectures of the society would go on as usual, and the memoirs would continue to appear when ready for publication.

AN "APPRECIATION" OF FERDINAND!

Lecturing last Tuesday at the Bishopsgate Institute on "Bulgaria and the Tsar Ferdinand," Mr. Oliver Bainbridge said that Ferdinand was twenty-seven years of age when he was called to the throne of Bulgaria, and had now reigned twenty-eight years. He had gone there knowing nothing of the country, its history or language, but he had faced all those disabilities and conquered them. Some newspapers said that he was egotistical and vain, and wanted people to pay obeisance to him, and complained because he had taken the title of Tsar. But that was the ancient title of the ruler of Bulgaria, and there were Tsars of that country (and of Serbia also) long before there were Tsars of Russia. So far from being egotistical, he was remarkably democratic in sentiment, and took great delight in going among the peasantry and talking to them. He was a brilliant man, but not a wise one; the late King Edward said of him that he was the most brilliant man in Europe and the most dangerous. Studying the history of the country since his accession, one must agree with the Infanta Eulalia of Spain that he had made modern Bulgaria. Thirty years ago Sofia was a poor, dirty little village, with only one decent building—that was a mosque, now used as a museum; to-day it was a magnificent modern city, with splendid buildings, and inhabited by 125,000 people. Ferdinand had invested his money in banks, railways, harbours, and the like, in the country; he had furthered agriculture and assisted in the erection of hospitals, schools, and similar institutions. Bulgaria had now magnificent school buildings; absolutely the finest school in the world was the William Gladstone School for boys in Sofia. He was not very fond of hunting or shooting; he was a great botanist, and one of his principal pleasures was the searching for rare plants.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR
Flannels, Serges, Blankets, Tweeds,
Broadcloths, Coatings, Hosiery, Rugs,
Puttees, Uniforms, &c., &c. . . . .
CONTRACTORS TO GOVERNMENT

COOPER, ALLEN & Co., Ltd.,
CAWNPORE, INDIA.
Army Boot and Equipment Manufacturers.
CONTRACTORS TO THE INDIAN, EGYPTIAN AND OTHER GOVERNMENTS.
THE LARGEST CONCERN OF ITS KIND IN THE WORLD.

The NORTH-WEST TANNERY CO., Ltd.,
CAWNPORE, INDIA.
Tanners and Curriers, Leather Goods Manufacturers.
Saddlery and Harness of every description.
Travelling Requisites, Bags, Trunks, &c.
CONTRACTORS TO GOVERNMENT.

The ELGIN MILLS Co. Ltd.
CAWNPORE, INDIA.
Spinners, Weavers, Bleachers, Dyers, and makers of every description of Cotton Goods such as TENTS, DURRIES (Cotton Carpets), and other Floor Coverings, Dusters, Towels, Bed & Table Linen, &c., &c.
Contractors to various Government Departments for Uniforms, Tents, Camp Equipment, &c.

New Egerton Woollen Mills Co., Ltd.
DHARIWAL, PUNJAB, INDIA.
Sole Manufacturers of the Famous . .
Dhariwal
Long Life Wool Wear
Costume and Suiting Materials, Blankets, Rugs, Lohis, Hosiery, Puttees, Uniforms, Liveries, &c., &c.
CONTRACTORS TO GOVERNMENT.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C

Our Cairo Correspondent, cabling on Wednesday, announced that the Egyptian State Railways took over on December 1 the Helouan line, previously the property of the Egyptian Delta Light Railway. This confirms my recent prognostication in these columns on the subject. It will be remembered that originally the Government was to have taken over the line more than a year ago, but, owing in the first place to some legal land ownership question, and in the second to the outbreak of the war, the transfer was postponed. Both the Government and the company are to be congratulated on the conclusion of the operation—the former because it acquires a useful, short passenger and traffic line, and the latter because it can in future devote an undivided attention to its system of light railways in the Delta, with which the Helouan Railway stood in no direct, tangible connection.

***

It will be remembered that two years ago THE NEAR EAST took up a strong attitude on the question of the linking up of Tripoli and Egypt by rail. At that time the ex-Khedive attempted to sell his Mariut line to a (nominally) Italian company, but in reality a German concern. His scheme was, however, happily frustrated, the Egyptian Government acquiring the line, without having, to the best of my knowledge, any intention to continue the line to the Tripolitan frontier. Now that Italy has come in on our side, the arguments against closer relations between Egypt and Tripoli no longer bear the same gravity, and it is, therefore, not surprising to read in the *Egyptian Gazette* that "it is stated that an Anglo-Italian company has been formed for the purpose of opening up communications. Representatives of this company propose to enter into negotiations with the Egyptian Government shortly. It is said that the company intends starting a regular service of automobiles between Egypt and Tripoli by way of Mariut." The motor-car service will, I feel sure, be quite adequate for all general purposes, and will do away with the enormous expense entailed in the construction of a railway line.

***

Yesterday Reuter's Agency reported from Amsterdam that, according to a Constantinople telegram, the Turkish Budget for the financial year beginning March 14, which is now being discussed in Committee, shows an expenditure of £T36,817,125—that is to say, an increase of £T1,159,579 over the expenditure in the previous year—and a revenue of £T22,961,688, a decrease of £T1,874,749. The deficit amounts to £T13,855,437, and is £T3,034,329 higher than last year. In order to cover the great expenditure involved by the present war, loans will be raised by the Governments of Turkey's allies. For a portion of the loans banknotes have already been issued, and the issue for the remaining portion will shortly follow.

***

According to another Amsterdam telegram from Constantinople, says Reuter's Agency, the Ottoman Government has submitted to the Chamber a Bill regarding a new tariff which replaces the present 15 per cent. tax of the value of imported goods by a tax of 30 per cent. for the duration of the war, and demands urgent settlement of this Bill. The President of the Chamber, Hadji Bey, emphasised the importance of the Bill, which completely revolutionises Turkey's previous financial and economical policy. The Bill was referred to a committee. The Government also presented an urgent Bill which authorises the Government to conclude a loan of £T2,112,000 with Germany for the completion of the Baghdad Railway.

***

If a report current in Zurich, and sent out by Reuter's Agency yesterday, is correct, the Serbs deserve our heartiest thanks for an exceedingly smart bit of work. It appears that Budapest reports from Orsova tell of the fury and disappointment of the Germans at finding that the Serbians had completely destroyed, so far at least as any present working is concerned, the extensive and valuable copper mines at Bor, in Northern Serbia, the importance of which has frequently been emphasised in these columns. All the mining machinery, workmen's dwellings, furnaces, and workshops were, it appears, blow up by the retreating Serbians. They also prevented the working of the pits by destroying the pumping machinery and water-pipes, thus completely flooding the mines. To the further dismay of the Germans, they had carried off all the copper stocks on hand and the movable machinery. The German commander has brought a staff of engineers to ascertain if it is possible to put the mines in working order again within a reasonable period.

***

According to a Swiss financial critic in the *Gazette de Lausanne*, who bases his statements on German data only, Bulgarian finance is completely under German control, the Disconto Gesellschaft managing everything, says the Berne correspondent of the *Morning Post*. Altogether Bulgaria has received £30,800,000 from Germany, £10,800,000 being in gold and £20,000,000 in war material, besides which a further £4,000,000 has been paid her for developing her mineral resources.

***

On December 20 the Khedivial Mail Steamship Company hold their annual meeting. These meetings have in recent years been characterised by some sharp criticism levelled at the board by shareholders opposed to the directors' extreme conservative policy. An echo of this dissension is to be found in the letter which is published elsewhere in this issue of THE NEAR EAST; but it is sincerely to be hoped that it is not a forerunner of opposition this year.

***

The fact of the matter is that present shipping conditions are such that the company which does not "go ahead" and take all measures that are necessary for its immediate future development will fall into a hopeless groove. This is perhaps applicable in a greater degree to the Eastern Mediterranean trade than to any other. At present the shortage in tonnage in these seas is hardly felt owing to the great decrease in trade, but this is only of a temporary nature. With normal times will come a great demand for tonnage, and to meet this demand adequate steps will have to be taken by the big firms interested in the Eastern Mediterranean trade. Prior to the war German shipping companies had acquired an almost pre-eminent position in these waters, and both the North German Lloyd and the Hamburg-Amerika Lines were doing their utmost to improve their services. Unless we are careful—as I pointed out recently in these columns—the same companies will leave no stone unturned after the war to regain their old position. It will be said: "We must not let them do so; we and our friends must boycott them." Such arguments are worse than useless, because they are not arguments. Where ships are wanted, whether for passenger or goods trade, they will be employed regardless of nationality, and the bulk of the trade will fall to the best conducted service—the most rapid, the most accommodating, the most obliging. Thus it was before the war, and thus it will be after the war.

***

These remarks have taken me far from the "Old Khedivial" and the subject matter under discussion, but they are, nevertheless, pertinent thereto. The company in question contains the germ of a big British Mediterranean shipping company, if the directors could only be made to realise it. Some of the shareholders do, but their voices have hitherto been fruitlessly lost. They understand that if the Khedivial does not hasten to step into the breach made by the disappearance of enemy shipping, its opportunity will have gone for ever, and it can end its days by plodding a wearisome pilgrim route to Mecca and Medina. May the gods (and the board) deliver it from such a fate! It is not for me to point out how the company can rejuvenate its services, but to argue that it cannot be done is to argue that no industrial concern is susceptible of expansion. Obviously, such is not the case, and I have no doubt that the directors of the Khedivial Mail Steamship and Graving Dock Company fully understand the steps that must be taken to transform the "Old Khedivial" into a new, enterprising, go-ahead concern, an asset to Egypt and the Empire, a line of great profit to its proprietors, and a serious spoke in the wheel of our enemies' machinations. Knowing this, they will act accordingly. I feel sure of it. Nevertheless, the meeting of the shareholders in about a fortnight's time is awaited with more than usual interest.

***

I have received from Messrs. Raphael Tuck and Sons, Limited, their reproduction of the charming set of Christmas cards which have been specially prepared by them for their Majesties the King and Queen, Queen Alexandra, and the Prince of Wales. The King's card is an excellent representation of Bernard F. Prebble's painting, "A Glorious Chapter of British History," the subject of which depicts Drake's famous flagship the "Revenge." Both the Queen and Queen Alexandra have also chosen incidents of the past for their cards; the former is of "Queen Matilda Embroidering the Bayeux Tapestry," by Howard Davis, and the latter "Queen Margaret of Scotland Praying for the Victory of the Scottish Army." The Prince of Wales alone has chosen a modern subject in having reproduced the prow of a modern battleship. It is entitled "Guarding the Empire." All these cards are, by the gracious permission of their Royal owners, to be reproduced for the benefit of the public, and I congratulate the publishers upon the softness and excellence of their work.

Bulgarian Trade in 1914.

British Goods Preferred.

The following are extracts from the report by H.M. Vice-Consul at Sofia on the trade of Bulgaria for the year 1914 :—

When studying the trade returns for Bulgaria for the past few years, one must bear in mind that the last normal year for the commerce of the country was that of 1911. In 1912 the last quarter was disturbed by war; commerce in 1913 was paralysed by the Balkan wars, while the latter half of the year under review saw the outbreak and continuance of the European war. During each of these three years also the Dardanelles have been closed for longer or shorter periods, severing all maritime communication between the Black Sea ports and the rest of Europe.

At the time of writing the latest returns issued are those for April, 1914. It may safely be asserted, however, that imports for the seven months from the commencement of the year up to the outbreak of the European war reached a total not previously exceeded. Exports, while showing an enormous increase over the abnormally low figures of the preceding year, were probably surpassed by those for 1912.

The available figures for 1914 show a rapid recovery from the economic depression caused by the Balkan wars. As the country is in the main agricultural. these latter did not leave as lasting an impression as would have been the case with an industrial country. At the same time it must be remembered that the population of Bulgaria was increased from 4,350,000 to 4,750,000 by the acquisition of her new territories.

The beginning of August saw the commencement of the European war. A moratorium was declared for three months on August 7 and, having been prolonged at the expiration of this period, was still in force at the end of the year. A week after the moratorium had been announced, the export of food staples and transport animals was prohibited, and additions were made from time to time to the list of prohibited exports.

After the closing of the Dardanelles towards the end of September, Dedeagatch, the port of Bulgaria on the Ægean, acquired an unwonted importance, but the existing facilities there were not sufficient to cope with the stream of commerce diverted to it. Moreover, the railway from Dedeagatch to the territories of old Bulgaria passes through Turkey, and so could not be used for the transport of British merchandise after the rupture with Turkey. The Bulgarian market was thus practically closed to British goods during the last three months of the year, which is precisely the quarter when commerce is normally most brisk.

Imports.

Imports for the first four months of 1914 exceeded those for the same period in 1912 by £1,376,000, an increase of 49 per cent. The largest increases are observable in the figures for Germany and Austria-Hungary. Imports from the United Kindgom have not kept pace with this general improvement, the figures up to the end of April, 1914, exceeding those for 1912 by the relatively small amount of £65,400. As usual, the principal imports from the United Kingdom have been textiles, coal, metals, machinery, and chemicals.

The first place in the import of textiles, formerly held by the United Kingdom, has now been taken by Austria-Hungary, which has profited by the difficulty of communications between the United Kingdom and Bulgaria for long periods since the autumn of 1912.

The British share in coal is steadily increasing.

Metals and metal goods come mainly from Germany and Austria-Hungary. The United Kingdom is maintaining its place.

Machinery imports dropped to a very low level in 1913 to the corresponding advantage of Austria-Hungary, but the previous position was regained in the early months of 1914.

The most satisfactory increase is observable in the import of chemicals, the imports for the first four months of 1914 equalling those for the whole of 1912 and greatly exceeding those for 1913.

Exports.

The following exports for the first four months of 1914 exceeded those of the two preceding years for the same period :—Tobacco (a large increase), raw sheep and lamb-skins, barley, cloths and serges, and wheat. Cereals were exported mainly to Belgium, and livestock to Turkey. Exports to the United Kingdom consist only of cereals, tobacco, attar of roses, eggs, and haricot beans. During the latter part of 1914 exports dwindled almost to vanishing point owing to the Government embargos on the exportation of most articles. In 1914 33,850 acres were planted with tobacco in all Bulgaria, producing 9,900 tons. The importance of the new territories for this industry is indicated by the fact that their share of this was 16,550 acres, yielding 4,900 tons.

Harvest.

The harvest in 1914, although fairly satisfactory, both as to quality and quantity, was not equal to those of the two preceding years. The weather conditions were less favourable, especially in Southern Bulgaria; in the north-eastern part of the country, too, the effects of the previous year's inundations which ravaged the fields were still felt. The production of maize, however, exceeded that of 1913 by 40 per cent.

In 1912 there were 1,388 miles of railway completed in Bulgaria, the number of passengers conveyed being 3,342,000. The weight of merchandise transported annually averages 2,000,000 tons.

Railway Construction.

The construction of the following lines are to be taken in hand in 1915 :—Radomir-Dupnitza-Gorna-Jumaia, with prolongation down the Struma Valley to the Greek frontier, Plevna-Lovetch, Dupnitza-Bobov-Dol and Gabrovo-Sevlievo.

Work is progressing on the survey and preparation of the Mikhailovo-Haskovo-Porto Lagos line. The following details supplement those given in the trade report for Bulgaria for 1912-13 :—The maximum inclination will be 15 per cent., and it is intended to establish stations every five to eight miles. As to Porto Lagos itself, where the construction of a considerable port is contemplated, the harbour is to have an area of 3,000,000 to 3,500,000 square metres, and will be protected by a breakwater 1,500 yards long.

Shipping.

In August the ports of Varna and Bourgas could only be entered during the day time and subject to certain restrictions. After the closing of the Dardanelles the following month all communication between the Black Sea and the Mediterranean was interrupted. Consequently, the shipping returns for Varna and Bourgas for 1914 must not be regarded as representative. Varna, moreover, suffered from the fact that its natural hinterland, the Dobrudja, had been ceded to Roumania by the Treaty of Bucharest.

During the latter part of the year the stream of European commerce which normally passes through the Black Sea ports was largely diverted to Dedeagatch, which became more active than ever before. It is, however, an open roadstead, and not suited for such an important rôle.

British Goods Preferred.

Speaking generally, Bulgarian merchants prefer British goods to any others. They often state, however, that the German and Austro-Hungarian firms know the market better, and offer more acceptable conditions. This is especially the case as regards credit. Buyers expect from three to six, or even nine, months' credit, according to the class of article and the size of the order. The Bulgarian is generally honest, and it is but seldom that a firm fails to meet its obligations.

Catalogues intended for Bulgaria should be made out in the currency and weights and measures of the country. German is the language most generally understood in commercial circles.

The imperative necessity of making no error in the Customs declaration, and the advisability of sending a sample previously to the Customs Department of the Ministry of Finance, should there be any doubt about the legal description of the goods or the duty to which they are liable, have been pointed out in previous reports.

The desirability of founding a British bank and a British commercial agency in Sofia still continues.

The present moment cannot be considered as very favourable for extending British commerce with Bulgaria. It is to be hoped, however, that such British houses as have already relations with the country will at least maintain them through this period, and that British commerce generally will now prepare the ground against the arrival of a more normal time by making its wares, prices and conditions known as widely as possible. When access to Bulgaria again becomes easier, a great opportunity should lie open to it.

KHEDIVIAL MAIL LINE.

To the Editor of THE NEAR EAST.

Sir,—Some correspondence under the heading, "Alexandria's Link with Europe: Opportunities for British Steamship Lines," which appeared in the *Egyptian Gazette* of October 22 and 29, has been brought to my notice. I have since wondered whether these letters and the several articles and comments published in your esteemed journal in the earlier months of this year, have made any impression on the Board of Directors of the Khedivial Mail Line.

The annual general meeting of this company will soon be held, when doubtless some of the shareholders will want information as to what the Board consider are the prospects of the company after the war is over. Have they studied the question of the development of the company, of extending its services or improving the old-timed itineraries, or of increasing the fleet of steamers?

They have sold several of their old steamers, and the popular old "Saïdieh" was submarined in the Channel. In what manner will they replace all these? Or, taking a lesson from the Government, will the Board procrastinate and act when it is too late and when others have already cut them out? Some years ago the Khedivial Mail Line inaugurated a service from Alexandria to Marseilles, which the management was too timid to maintain, not having given the line a fair trial.

Another question before I close. Is it not strange, in view of the fact that the Khedivial Mail Line have been doing well during the past year that, whereas the shares of most shipping companies are quoted on the market at higher figures than they were twelve months ago, those of the "Old Khedivial," if I am not mistaken, to-day stand at lower rates? The Board and management must "wake up."—I am, etc.,

A SHAREHOLDER.

London, November 23, 1915.

In reply to a question in the House of Commons, Mr. Runciman informed Mr. Peto on Tuesday that the steamers of the Khedivial Mail Steamship Line were entitled still to fly the British flag. He understood that the steamship Menzaleh is chartered, but not on time charter, to Messrs. La Roda Hermanos, of Valencia. The steamship Tantah is on the time charter to the same firm, who claim that the steamship Benha is also chartered to them on time charter, but the owners dispute this. He believed there was some arrangement between Enrique Behn and Messrs. La Roda Hermanos. The Khedivial Mail Steamship Co. state that all officers of enemy nationality have long since been removed from their service.

Suez Canal Dues.

New Regulations Concerning Payments.

(From Our Own Correspondent.)

Port Said, November 16.

A circular letter issued here this week by the Suez Canal Company to steamship companies' agents and banks notifies an important alteration in the "rules of navigation," relating to the method of payment of transit and other dues by the company's clients. Up to quite recently canal dues have been payable at Port Said, Cairo, Paris or London at the choice and convenience of the steamship owners, but the new regulation stipulates that they must in future be paid in Port Said at the company's office, but that the company are willing to accept payment at places out of Egypt *on conditions stipulated by themselves.*

The reason for this somewhat drastic change is to be found in the abnormal rise in the rate of exchange between Paris and London. Shipowners, during the past year, have not been slow to realise that by paying their dues in London each pound sterling they paid had a value in Paris for payment of Canal dues of from Fcs. 27.50 to Fcs. 28—according to the daily fluctuations in the rate of exchange. This rise in the exchange represents to the owners of a steamer whose Canal tonnage is, say, 5,000 tons, a saving of from £100 to £130 on each passage, as the following figures will show :—

Dues on 5,000 tons at Frs. 6.25 per ton	= Frs. 31,250
Paid in Egypt at exchange Frs. 25.27(par)	= £1,236
„ „ London „ (say) Frs. 27·75	= £1,126
Saving to steamship owner	**£110**

The notification of the change referred to is accompanied by a long explanation of the motives which have actuated the Company in making it, ending in a statement that they are prepared to accept payments in Paris from French steamship owners in francs, and in London from British owners in pounds sterling at an exchange rate of 26.40 frs. This represents to the Suez Canal Company at the present London-Paris rate a profit of 1.35 frs. in the pound, or on the above-mentioned steamer's passage £58, and the steamship owners saving is reduced by that amount.

The Suez Canal Company's argument that payment should be made where the service is rendered is undoubtedly a strong one, but as it has suited them in years past to receive cash payments in London and Paris, thus obviating the expense of remitting their receipts to Paris from Egypt at ruling disadvantageous rates, it is thought by some steamship owners that the company is acting in an arbitrary manner in declaring the dues now payable in Egypt, and accepting them in London only by what is termed exceptional arrangement at an exchange rate stipulated by themselves.

The dues of practically all British-owned steamers having, since the rise in the London-Paris exchange rate, been paid in London, for transmission to Paris, the Suez Canal Company, although they have received in Paris the exact amount of their bills, have, by the stoppage of receipts in Egypt, suffered considerable losses in remitting money from Paris to Egypt to maintain their services there, and it is this loss that they are covering by, as it were, sharing the exchange profit with the British shipowner. It remains to be seen whether the British companies, the Canal's most valuable clients, will accept the decree in a spirit of humble resignation, or whether the matter will be carried by shipping interests to a higher court.

It should be borne in mind that the Suez Canal Company is an international concern, and some feeling is likely to be aroused amongst British firms by the company's preference shown to French owners in accepting their payments in Paris, while refusing a similar facility to British firms. On the other hand, certain old clients of the Canal are satisfied with the treatment they have received from the company in years past, and are content to "share the plunder" with them.

EGYPTIAN FINANCES.

(From Our Own Correspondent.)

Cairo, November 16.

The September accounts of the Egyptian Government record a continuation of the improvement already shown in previous monthly statements. During the month the receipts were £E287,767 in excess of what they were a year ago, and only £E59,632 less than in September, 1913. Land Taxes increased by £E40,818, Customs by £E93,077, Legal Fees by £E31,410, Railways by £E109,087, Telegraphs by £E6,066, Post Office by £E5,316, and Domains receipts by £E8,440. Tobacco Dues (£E6,349) and Ports and Lights Dues (£E3,203), were the only heads that showed any important decrease. Expenditure during the month was reduced by £E115,820, the chief items showing economy being Irrigation £E41,963, Railways £E47,413, and War Office £E17,996.

The total revenue at the end of September came to £E7,144,023, and the expenditure to £E7,404,415, as against £E7,040,531 and £E8,752,092 respectively, twelve months ago, showing an increase in the former of £E103,492, and a decrease in the latter of £E1,347,677. It should be noted that, compared with the end of September, 1913, when things were normal, the expenditure has been reduced by £E1,578,201, while the revenue is only £E166,075 to the bad.

The September account brings the first half of the financial year to a close, and the following table may prove interesting as giving some indication as to how the actual figures are working out by comparison with the estimates for the whole year :—

Revenue Head.	*Position on Sept. 30, 1915. £E.	†Budget compared with preceding estimate. £E.
Direct taxes	+ 467,436	.... + 43,000
Customs	— 85,907	.... — 750,000
Tobacco Dues	— 5,367	.... — 300,000
Ports and Lights.....	— 103,694	.... — 236,000
Legal Fees.....	— 25,940	.... — 361,000
Railways	— 36,236	.... — 943,000
Telegraphs	+ 10,327	.... —
Post Office.....	— 11,270	.... — 80,000
Rent of Land	+ 22,903	.... + 3,000
Domains.....	+ 64,512	.... — 6,000
Military Exemption ..	— 21,800	.... — 40,000
Investment of funds ..	+ 384	.... — 32,000
Sundry Heads	— 171,856	.... — 130,000
	+103,492	.... —2,832,000

From this table we see that only in the case of Ports and Lights Dues and Military Exemption has the decrease on the half-year come anywhere near the proportion of the anticipated diminution, and that the item, "Sundry Heads," which includes such accounts as Sale of Land and Receipts of an "extraordinary nature," is the sole instance of the anticipated decrease being exceeded. On the other hand, items like Direct Taxes, Customs, Tobacco Dues, Railways, Telegraphs, Domains, and Post Office show such a marked improvement on the estimate, that they confirm the contention that the country is economically in an excellent condition. As it is, the excess of expenditure, which stood at £E1,711,561 on September 30, 1914, and at £E1,672,518 on the same date in 1913 has been reduced to £E260,392 only this year. The period, April to September, always contains the lightest collections, and it is highly probable that when six months hence the account comes to be balanced the current financial year will be found to provide a very pleasant surprise.

* Position in favour of financial year 1915-16 as compared with that at same date a year before.

† Preceding estimate was for financial year 1914-15

SUDAN FINANCES.

In connection with the detailed article published recently (November 12) in these columns by our Cairo Correspondent, under the title of "The Sudan and the War," the following statement, which appeared in a recent issue of the *Egyptian Gazette*, will be of interest:

The Sudan Government is now busy preparing its estimates for the forthcoming year. Owing to the locust invasion, aggravated by draught, and the economic crisis resulting from the war, it is expected that the Sudan Government, with its restricted revenue, will meet with exceptional difficulties in balancing its budget, more especially as the Sudan revenue, unlike that of other countries, is not susceptible of increase in the shape of raised imposts or the creation of new ones owing to the resources of the inhabitants being so limited. Given, however, the capabilities and long experience of the Financial Secretary, it may well be hoped that the balancing of the budget will be effected without recourse being had to the Egyptian Government for assistance, or to the contraction of a loan.

It may be remembered that the Sudan Government, in order to effect the balance between its revenue and expenditure for the current year, has been obliged to stop the granting of salary increases to its officials. It is more than likely, however, that it will not resort to the same measure in the coming year. The arduous character of the task of the officials in the Sudan makes its incumbent on the Sudan Government to exercise even greater indulgence in this connection than has been the case with the Egyptian Government in its recent economies.

NEWS FROM ALL SOURCES.

The Board of Trade are notified by the Colonial Office that, as a result of judgments given in the Prize Court of Malta on August 16 the Ottoman sailing ships "Aghios Nicolaos" and "Elleni" have been condemned as enemy property, and appraisement and sale ordered. The cargoes were to be dealt with later.

The Anglo-Roumanian Mercantile Company, Limited, of Baltic House, Leadenhall Street, E.C., is being wound up voluntarily.

Engineering Notes.

Cement Testing.

A laboratory for testing cement has been established at the Scientific and Technical Research Department of the Imperial Institute. Certain countries have adopted an official specification to which all cement intended for use in the construction of public works must conform, and in some cases, as in Argentina, such cement must be certified by a laboratory recognised for that purpose by the Government of the exporting country. The cement-testing laboratory of the Imperial Institute has received the recognition of the British Government, and is prepared to carry out analyses and tests of British-made cement for contractors, engineers, manufacturers, and others desiring to export cement to Argentina and other countries where a Government certificate is required.

The Fuel Problem.

With the enormously increasing utilization of mechanical power in all branches of industry, agriculture, navigation, aviation, and other purposes too numerous to define, the problem of fuel supplies is daily becoming more difficult. Dr. Dugald Clerk told us the other day, in his very interesting lecture at the Institution of Mechanical Engineers, that coal and oil constitute the basis of the world's present civilization, and he maintained that it was the duty of engineers to do everything they could to conserve the world's supplies of these two great power producers. In this direction, it is admitted, British engineers in particular have done, and are doing, more than others. For, as an example, whilst Watt's early engines required 6 lbs. of coal for each indicated horse-power hour, the modern reciprocating engine has a consumption of 2 lbs., and the steam turbine only 1½ lb., which is a great achievement in the economy of coal. However, Dr. Clerk said that out of 168 million tons of coal used annually for power production in this country, it was estimated that sixty million tons could be saved by the use of internal-combustion engines and turbines. At the same time, showing how dependent on coal the world was, and how little reliance could be placed on oil, he pointed out that even if all the oil available in the world—sufficient only for ninety years—were used for power production it would be capable of performing only 5 per cent. of the work done by coal in existing steam engines, or 15 per cent. if steam engines were replaced by internal-combustion engines. The fuel problem therefore is very important, and the urgent necessity of finding new contributory sources of fuel which would meet adequately the world's requirements is quite obvious.

The Use of Alcohol.

Last year a campaign was started here in favour of alcohol as fuel for internal combustion engines, but owing to the war which, then, broke out, very little progress was made. In Germany, however, some specially designed engines were made, running on alcohol alone, but at a rather slow speed; and some of them that were exported to the Near East it is said, have given good results. They were, as a rule, employed as stationary engines for pumping water, or in factories, etc. For high speed engines, alcohol alone has not proved quite suitable; but during the Russian occupation of the rich oilfields of Galicia, when the necessary supply of petrol for running the numerous engines in the German and Austrian Armies was not available, the Germans discovered that such high speed engines can work satisfactorily on a mixture consisting of equal parts of benzole and alcohol, as previously mentioned in these columns. In some quarters it is believed that this mixture gives even better results than benzole used alone.

British Experiments.

The proof, however, that alcohol, by itself, can be successfully used in ordinary internal combustion engines, is due to British efforts. The Royal Automobile Club conducted, some time ago, a prolonged trial of alcohol fuel

produced in Natal—and for that reason called "Natalite"—which has given most satisfactory results in an ordinary petrol engine. The engine was of the four-cylinder type, with cylinders of 95 mm. bore and 130 mm. stroke, the volume swept by the piston being 921.47 c.c., while the volume of the combustion chamber was 340 c.c., giving a compression ratio of 3.7. During the running of the engine, which was fitted into a 1910 Charron car of 22 h.p. and weighing, laden, 32½ cwt., the amount of fuel used over a distance of 500 miles was 30.59 gallons, representing a mileage of 16.40 per gallon of fuel consumed or 26.20 ton-miles per gallon. These figures are considered quite good, bearing in mind the weight transported and the obsolete design of the motor; and a subsequent trial showed that petrol gave, approximately, the same mileage. Even if this had not been the case, there would appear to be everything to gain by using the alcohol fuel, as it is stated that the latter can be produced at a cost somewhere between fivepence and sixpence per gallon at the distillery.

GREEK CEDRATS.

Present conditions have made the port of Piræus for the first time an important shipping centre for cedrats, which formerly reached consumers through various foreign ports, says the United States Vice-Consul at Athens.

The cedrat is a citrus fruit used by orthodox Hebrews at the celebration of the Feast of Tents, following Atonement Day, and plays an important part in the ceremonies. Owing to the increasing difficulty with which good specimens are procured, the closing of certain former sources of supply, and the high prices demanded, much attention has been given to the Greek cedrat.

The tree itself is a variety of the *Citrus medica*, bearing a large fruit, not acid, and having a high and agreeable perfume. The tree is about the same size as the Mandarin orange. The greatest care is necessary for the proper development of the cedrat fruit from the time of blooming to the moment of picking, which takes place about the last of July. After the bud has appeared, all surrounding thorns are removed from the branch, even the nearest leaves are removed, and the young fruit is wrapped loosely in flax lint, lest it be marred by a scratch or blemish. For religious purposes it is of the greatest importance that the fruit be perfectly smooth and without excrescence. The stamens are an important part in the sentimental value of the fruit, and must be preserved intact. When mature the cedrat is packed carefully in individual compartments of a specially constructed box, each tiny compartment lined with flax lint, in which condition it is ready for the buyer.

Cedrat groves are located on slopes where the winter winds are cut off by protecting peaks, and where the temperature does not go too low, for the slightest frost withers the stamens, rendering the fruit no longer suitable for religious purposes.

The use of the cedrat in religious celebrations dates, according to tradition, from a period near the Babylonian captivity, and its use is zealously adhered to by orthodox Hebrews in various parts of the world. Each member of the congregation is supposed to possess on the ceremonial day at least one perfect specimen of the fruit, without fleck or blemish, and retaining the stamen.

Until the outbreak of the present war Trieste was the greatest cedrat market, but the closing of that port has shifted the market centre to Piræus, whence a large export is developing from the increased production which has taken place in the cedrat groves in the districts of Parga and Chimera, in Northern Epirus, on account of the blockade of the Syrian coast, whence a large amount of the crop was formerly sent to Trieste.

Competent ecclesiastical authorities pronounce the Chimera cedrats, grown in New Greece, to be the best in the world for religious purposes, the excellence of which variety is said to be due to a secret process of cultivation, which is jealously guarded by its fortunate possessors.

Trade Notes.

Egypt.

Tenders are invited by the Ports and Lighthouses Administration, Arsenal, Alexandria, for the supply of uniforms, boots, shoes, and tarbrushes. Specification may be seen and all information obtained at the above office, on any day, Sundays and official holidays excepted, from 9 a.m. to 1 p.m. Date, January 3, 1916.

Tenders are invited by the Egyptian State Railways and Telegraphs Department for the supply of 20,000 oak sleepers and 101,300 pine sleepers. The sleepers must be of very good quality wood, and preferably of one of the following species :—European and Japanese oak, Montenegrin, Swedish and Norwegian and Baltic red pine or any other species of oak or pine of equal quality. In default, tenders for sleepers of any other quality of wood coming from Japan, America, India, or Australia, would be taken into consideration. Copies of the specification, containing form of tender and form of bank guarantee, may be purchased, price 2s. each, from Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Broadway, Westminster, London, S.W. Sealed tenders, on the proper forms, will be received up to 10 a.m. on December 15, by the General Manager, Egyptian State Railways and Telegraphs, Cairo.

Messrs. H. W. Peterson and Co., Ltd., and Mr. Frederick Cree were recently the successful tenderers to the Egyptian Government for the supply of canvas and engine oil.

The Army Finance Department, Cairo, invites tenders for the supply of 120 tons of cotton seed oil, 9 tons of olive oil, 26 tons of caustic soda, 11 tons of silicate of soda into the War Department Stores, Tura. Date, December 7.

At the request of some of the Cairo members of the British Chamber of Commerce of Egypt, a deputation of members of the Chamber waited upon the Director-General of Customs, and explained to him the position in which import merchants found themselves with regard to Custom's dues, and mentioned the difficulties they had to contend with.

The Director-General (says the *Egyptian Gazette*) expressed the pleasure he had in meeting them on the question, and explained that if an importer had a complaint with regard to the valuation put upon his goods by the Customs valuers, he could apply to the Controller of the section. Then there was the Local Director, who would give the matter his attention, and lastly it was open to him to appeal to the Director-General by letter, who would order an immediate investigation to be carried out by one or two of the higher officials of the Administration, and who would make a fresh estimation. The importer being present if he wished. This re-valuation being final, the importer could pay the dues either in cash or in kind.

Cyprus.

Declarations of the ultimate destination of goods exported to any foreign place in Europe or on the Mediterranean Sea, with the exception of those situated in Russia, France, and Italy, are required to be made to the collectors or other proper officers of Customs and Excise. A single declaration of ultimate destination may be used to cover any number of consignments by the same exporter from the same port by the same ship at the same time. The prescribed forms of certificate of origin for imports and declaration of ultimate destination for exports are similar to those prescribed in the notice to importers and exporters for the United Kingdom.

The Cyprus *Gazette* of October 27 announces that transhipment facilities will not be allowed to goods shipped by or to enemy firms or their intermediaries in China, Siam, Persia, or Morocco.

TRADE OPENINGS IN GREECE.

The British Consul, reporting on the trade of the Piræus and district, points out that the present is a propitious moment to push trade which has been in the hands of our rivals, namely, in textile machinery, aerated water machinery and accessories, agricultural machinery, ploughs, engines for steam, gas or oil, pumping and irrigating machinery, flour mills, oil-mill plant and olive-oil presses, water wheels, turbines, steam and oil tractors, brick and tile machinery, and other machinery for industrial and other purposes, electric motors and tools of different descriptions. Germany and Austria-Hungary were also doing very good business in cast-iron water-pipes, iron bars, black and galvanised sheets, wire, iron joists and girders, iron bars, angles, tees, roller shuters, corrugated iron, etc. In tools, implements, etc., Germany has had the lead not only on account of having sold much cheaper than British manufacturers, but because the German travellers studied what was required locally to suit the buyers, whereas the British designs were more than often unsuitable for this market. Austria-Hungary has been supplying Greece with more than double in value of the following compared with British imports :—Electro-technical appliances, electric conduction apparatus in boxes, electric motors, transformers, switch and contact devices, mounted fuses, etc., and also imported dynamos, motors, electrical fittings, electric lamps, high-pressure cable and transmission lines and electrolytic copper. Switzerland is a contributor for high-pressure wire. Electrical instruments have generally been supplied by the United Kingdom, low-pressure wire by Sweden, and transmission lines by Belgium. The reason of the success of our rivals has been, to a great extent, their sending very capable representatives with a practical knowledge of their duties, explaining to the buyers all they want to know about machines, etc., and ready to agree to any alterations to meet local requirements. Representatives of British firms are seldom seen in Greece. There have been many complaints at the slackness of delivery on the part of British firms, which has deflected much from them, and has enabled our rivals to step in and secure trade by prompt deliveries. With the exception of steam boilers, which are principally imported from the United Kingdom, all the machinery in the factories came from Germany. The reason, according to a Greek manager, is : "German agents visit us daily : they study our requirements and give exactly what we want. They inundate us with catalogues in French or German—in not a few cases even in Greek. The prices are invariably quoted with delivery in Athens. Weights and prices are given in the metric system, so that we can judge to a lepta how much we have to pay, and, best of all, goods are delivered on easy terms, payable at three, six, nine, and even twelve months."

German shippers continue to extend the same terms of credit that they gave before the war. On the other hand, British manufacturers who formerly gave credit, or who accepted cash against bills of lading on presentation in Greece, now demand either cash with the order or a confirmed banker's credit in London to guarantee cash before shipment.

To the further detriment of British trade with Greek ports, freights are now so high and uncertain that business has become practically impossible. The result is that Greek merchants are being driven into the arms of American exporters for such articles as they can no longer obtain from Germany and Austria-Hungary. Strange as it may appear, it is nevertheless true that merchants here have found it easier to obtain goods from America than from the United Kingdom, orders which have been sent there having been executed with great promptitude and without any change of terms. Thus a good opportunity has been lost by British manufacturers of securing the German trade.

Trade continues as usual, and the Athens and the Piræus markets are both remarkably strong and brisk.

Near East Markets.

CYPRUS NOTES.

(From a Correspondent.)

The following are extracts culled from letters which have been received this week from Cyprus:—

The early showers of October have not been followed by November rains, which are anxiously awaited for early ploughing and sowing. A considerable number of Cypriots risk the "xerovolo," or dry sowing, but the majority wait till the land is "khortasmeni," or well saturated. It is hoped that there will be a large increase of wheat cultivation.

The exportation of cattle and potatoes is now allowed, the latter conditionally. It is provided that a sufficient stock should be kept for local consumption, the prices of retail dealers to be regulated by the Provost Marshals of districts. The price of potatoes in Egypt is now very high (5 to 7 piastres and over, while that in Cyprus is 2 piastres and under), so that exportation to this market brings good profits. The potato crops are in most parts plentiful. This vegetable is now one of the principal articles of food in the island.

The vintage is disappointing, and below the average in quantity. The failure to sulphur vines attacked by mildew has not been the only cause of the inferior yield of grapes. Atmospheric conditions during critical months have been a contributing reason. The result of experiments in growing sultana grapes will be of no little interest. The vines, called here *Sultanina*, were introduced two years ago, and are being cultivated in the experimental vineyard of the Agricultural Department at Omodhos, a Nile village of the Limassol District, where a small muscatel variety has been grown for centuries in limited areas. The vineyard is in charge of an overseer from Smyrna, who has already prepared a few raisins on the spot. Should the trial succeed there may be a good opening for the production of these raisins.

So far there is little prospect of any general alleviation of the peasant's lot, as regards indebtedness to the money-lending class. The hopes that were based upon the establishment of an agricultural bank by the Anglo-Egyptian Land Allotment Company have not been realised. It may be remembered that an agreement was entered into with the Government of Cyprus about nine years ago, which gave to this company the exclusive right of establishing an agricultural bank in Cyprus for fifty years. The bank was to open for business on or before January 1, 1907, the capital being not less than £100,000. The scheme appeared promising, and Sir William Wilcocks personally took great interest in it, spending some time in the island. A brilliant prospect appeared to be opening for Cyprus; but the result has been disappointment. Little, if any, money is now advanced, and outstanding debts are being gradually collected. The *Chiftliks* and properties which were acquired by the company have been almost entirely disposed of. Space does not permit any explanation of the causes of failure here.

PRODUCE REPORT.

London, December 2.

Currants.

The market has been quiet this past week, and the prices are steady at late rates. The s.s. Erato with about 1,000 tons arrived, and is followed by the s.s. Drake with a similar quantity. The market in Greece is reported very strong.

Sultanas.

The scarcity of supplies continues. Small quantities of Afghanistan fruit arriving sell freely at full prices, whilst Greek and Cretan fruit that may be available command high prices.

Figs.

The demand is only moderate and prices are unchanged, although holders in some instances are willing to accept lower prices to effect sales before the approach of holidays.

Dates.

The quality of the new crop is very satisfactory, but the demand is moderate for the time of the year. Hallowes are quoted 15s. 9d., Khadrowie 15s. 6d., and Sair 14s. 4½d.

Seeds

Linseed is quiet and lower to sell, in sympathy with linseed oil. Calcutta for shipment is obtainable at 67s. 6d.; Bombay, December-January is offered at 68s. 6d. La Plata shippers ask higher prices, November-December and December-January, 62s. 9d.; January-February, 63s. Rape seed is very firm. Ferozepore, pure basis, November-December, quoted 60s. 9d.; Toria, ditto, 62s.; brown Cawnpore, ditto, 60s., and Guzerat, 63s. Cottonseed is steady but quiet. London-Egyptian loading is quoted £11 17s. 6d., and December shipment £11 16s. 3d. per ton.

Oils.

Linseed oil.—There is little doing, and prices are nominally 5s. to 10s. lower. Spot pipes, £32 10s.; December, £33 10s.; January-April, £34 7s. 6d.; May-August, £35 5s. Cotton oil is well maintained. Crude spot, in pipes, £34 5s., refined pale, pipes, £36; and barrels sweet, £41 to £43, as to make. Rape oil, is very firm. Ordinary brown, naked, spot, £40; English refined, barrels, £43.

Oilcakes.

Cotton cakes.—A quantity of Egyptian afloat is offered at £9, ex ship, while shipments of November-December are offered at £8 17s. 6d., ex ship. English makes command £9 5s. to £9 7s. 6d., and bombay £8 15s. per ton. Linseed cakes: Owing to the high prices asked, sales are moderate, and there seems to be no probability of lower values, owing to the short supplies of home, as well as foreign,, descriptions.

Locust Beans.

There is nothing offered, and quotations are only nominal at £9 for whole and £9 10s. for kibbled.

EGYPTIAN EGG TRADE.

In view of the announcement last week that the Egyptian Government had decided temporarily to permit the exportation of eggs from Egypt to parts within the Empire, the following account of the trade reproduced from the *Monthly Journal* of the British Chamber of Commerce, Egypt, will be of interest:—

The shipping of Egyptian eggs to Europe began about the year 1894, in a modest way. In 1900, when the first Customs returns of this trade were made up, they showed that during the year 13,232,000 eggs, valued at £E10,736 were exported. Comparing these figures, with present day figures, we find that during last year the following quantities were exported, viz.: 150,972,000 eggs valued at £E226,457, giving an increase twelve times greater in quantity and twenty-one times greater in value.

The following table gives the exports of eggs from Egypt for 1914, with destination, quantity and value:—

		£
Great Britain (including poss. in Mediterranean)	118,487,000	177,737
Austria-Hungary	6,375,000	9,563
France	23,021,000	34,527
Greece	143,000	218
Holland	936,000	1,404
Italy	285,000	428
Spain	1,260,000	1,889
Tripoli (Africa)	465,000	691
	150,972,000	236,457

The season for the export of eggs begins in November and continues until end of April of the following year.

A great number of native merchants up country are engaged in the egg business: they have numerous collectors who go around the country gathering the eggs, and these are packed and dispatched to Alexandria by rail for sale in the general market at Gabbari. Upper Egypt furnishes 70 per cent., Fayoum and Middle Egypt 10 per cent., Lower Egypt 20 per cent. of the total supply.

COTTON MARKET.

(From Our Own Correspondent.)

Liverpool. Thursday Night.

Messrs. Reynolds and Gibson report: The demand for cotton continues to be quiet, and the amount of business reported is only moderate. In sympathy with the general tendency, prices improved, and quotations show an advance of 15 points for the week. Sales, which include 1,000 bales Sudan cotton, are estimated at 2,900 bales.

Manchester.

The turnover this week has been somewhat disappointing, and on a rather reduced scale from the last two weeks, chiefly owing to erratic fluctuations in the raw material.

GREEK FINANCES.

It is a pity, says the *Economist* in an able survey of Greek finances, that the Greek Government has not given more consideration to the bearings of the crisis on the national finances. The Allies' offer of a loan of £1,600,000, to help in meeting the expenses of mobilisation, follows a loan of £800,000 from France last April; and it should be very welcome at the present juncture. In 1898, after the catastrophic defeat of Greece by Turkey, the finances of the kingdom were placed partly under the control of an International Commission, and a loan of nearly £6,000,000, bearing 2½ per cent. interest, was issued under the guarantee of Great Britain, France, and Russia, while a reduction of interest was effected on the other external loans, amounting at that time to about £22,000,000. To meet the interest on these loans various revenues were placed under the control of the Commission, derived from Government monopolies, stamp and tobacco duties, and the Pirœus Customs, any actual annual surpluses over their estimated proceeds being divided—less an allowance for expenses—in fixed proportions between the Government and the holders of the older external loans. Since this settlement numerous other loans have been issued, amounting in the aggregate to £19,342,000, and secured partly on the Greek Government's share of the revenues assigned to the Commission, and most of them also on railway receipts and other assigned revenues, varying in each case more or less. At the end of 1914 the total amount outstanding of all these loans was slightly below £44,000,000, or about £10 per head of population, besides which there were currency loans to the amount of nearly £6,000,000. The "service of the Debt" figured in the Budget of 1914 for a little less than 45,000,000 frs., or about £1,800,000, while the "ordinary receipts" were nearly 140,000,000 frs., or £5,600,000, and the "ordinary expenditure," apart from the debt service, nearly 175,000,000 frs., or £7,000,000. Broadly, therefore, Greece has a debt of about £50,000,000, requiring for its service about £1,800,000 annually, and the deficit last year on the ordinary revenue was nearly £2,800,000. It is true that rather more than this sum was derived from the annexed territories and classed as "extraordinary revenue," but in these critical times it cannot be relied on. Nor, in the event of serious disturbance, can the surplus values, which have kept up satisfactorily during the present year. And, as the service of the loans is a first charge on the best half of the revenues, any additional expenditure cannot well be met except by new taxation or new loans.

The latest issue of the *Official Journal* contains a notice issued by General Maxwell to the effect that no payments can be made directly to persons interned in Egypt. Payments may be made to the account of such persons at banks in Egypt, but no bank may honour any cheque drawn by such persons unless the cheque bears the countersign of the Commandant of the camp in which the drawer is interned.

COMPANY MEETINGS.

EASTERN PETROLEUM.

An extraordinary general meeting of the Eastern Petroleum Co. (1913), Limited, was held on Monday at the Institute of Chartered Accountants, Great Swan Alley, Moorgate Street, E.C., for the purpose of submitting resolutions providing for the amalgamation of the company with the Suez Oil Co., Limited, Mr. A. H. Bonnard presided. The Chairman, in moving the adoption of the resolutions, said, *inter alia*, the scheme for amalgamation of this company and the Suez Oil Company has already received the support of a large number of shareholders of both companies, as shown by the proxies—representing about 100,000 shares—and many letters of approval which have been received—so many, indeed, that the success of the proposal is already assured. And, indeed, it would be remarkable if the shareholders did not make an effort to preserve their properties until better times. To sell them now would be suicidal, for in these days of gloom there would be few bidders for them, and they would not produce more than would pay the liabilities of the companies. But by entering into this scheme means are found to tide over these bad times, and to wait until hostilities cease. After the amalgamation the new company will possess large interests in Egypt of a most promising character, held under licence from the Egyptian Government, on some of which big development work has taken place. Among these licences are the areas of Jemsah Headland adjoining the properties of the Anglo-Egyptian Oilfields. The site of our first well there is within 125 yards of the big gusher which produced 3,000 tons a day when it first came in. These properties are the subject of a contract with a powerful group of financial people in the City, who are under agreement to do all the necessary drilling and development work to our mutual advantage. Other of our licences cover the Jubal Islands and Ranim Island, on both of which very extensive work has been done. Before the outbreak of war the Board had negotiated with people to provide the further necessary working capital, which it was hoped would bring this enterprise to a successful issue, and a draft contract was being drawn up, but on the outbreak of hostilities this project had to be abandoned—at any rate temporarily. A large interest is held by this company in the Fersan Island Oil Company, and in Java. As to the former, it is considered to be of a most valuable character, which reports from experts amply corroborate. It was only after long negotiations and much difficulty that the purchasers of the concession were successful in their efforts, the chief competitors being the German Government, who made strenuous efforts to obtain it, but, I am pleased to say, failed to do so. It is for these reasons that I urgently recommend you to come into this scheme of amalgamation and reconstruction.

The Solicitor read the draft agreement, under which the shareholders in each company will be entitled to apply for one share in the new company, credited with 9s. paid up, in respect of each share at present held by them. The resolutions were carried with two dissentients.

SUEZ OIL COMPANY.

An extraordinary general meeting of the Suez Canal Company was held on Monday at the Institute of Chartered Accountants. Mr. A. H. Bonnard presided, and having explained the circumstances in which the meeting had been convened, resolutions authorizing reconstruction and amalgamation with the Eastern Petroleum Company (1913), Limited, were carried unanimously.

COMPANY NOTES.

New Egyptian Company.

A general meeting of the holders of Debentures secured by Trust Deed dated February 3, 1909, and made between the company of the one part, and Leon Carton de Wiart (since deceased) and Reginald Quixano Henriques as Trustees of the other part, will be held at the registered office of the company, 13, Austin Friars, in the City of London, on Friday, December 10, 1915, at 12 o'clock noon, for the purposes, among others:—(1) of considering and, if thought fit, approving the appointment by the company of Victor Naggiar, of Alexandria, as a Trustee of the Trust Deed of February 3, 1909, in place of the said Leon Carton de Wiart, deceased; (2) of considering and, if thought fit, passing an extraordinary resolution, authorizing and empowering the said Reginald Quixano Henriques and the said Victor Naggiar (when appointed) as such trustees to concur in executing and to execute a supplementary trust deed in the terms of the draft (which will be submitted to the meeting) embodying the modifications necessary.

Roumanian Consolidated Oilfields.

The report of the Roumanian Consolidated Oilfields, Ltd., for the year to June 30 last states that the profit and loss account shows a gross profit from wells and refineries of

£172,515, less Roumanian deductions for taxes in Roumania, etc., £6,635, the balance of Roumanian trading profit being £165,880. After deducting administration and general charges, bonus to Roumanian staff, etc., £11,396, and adding interest £1,319, there remains a balance of £155,803, out of which the directors have written off depreciation £46,862 and debenture discount and expenses £3,325, leaving net (subject to exchange) £105,616. The production of crude oil has amounted to 103,920 tons (including Chiciura), against 66,232 tons in the previous year. The disturbance due to the war still continues. The balance carried over (from the first and second years of the company's operations) was £93,866, which with the balance from this year, less exchange fluctuation £26,031, of £79,585, leaves a net amount standing to credit of profit and loss of £173,451. The directors propose to add to general reserve (raising same to £100,000) £40,000; create a new special reserve against possible lapses of some of the leases under the Law of 1904, £7,000; fire insurance fund, £5,000; reserve for taxes in England, £8,000; and carry forward £113.451. At Bana Moreni the indications continue favourable. The company's discovery of a prolific oil source under the Pontic formation in well No. 30 has had even greater consequences than at first anticipated and extensive areas of land in which the company holds important pieces have been brought with in the proven zone. At Chiciura, where the company through its subsidiary is one of the principal owners of oil lands, development has not progressed so rapidly as expected, owing chiefly to the shortage of labour during mobilization, but the directors see no reason to doubt the eventual success of this field. The company now operates over 175 kilometres of pipeline, over 50,000 tons of tankage, and is able to pipe the oil to its refineries both at Targoviste and Ploesti. As regards depreciation, the directors are of opinion that, having regard to the large reserve fund, it is not necessary to deal with the values of the lands, especially as there is no doubt that in many cases they stand at sums considerably below their intrinsic values. The directors consider that the depreciation, £46,862, written off the other items is ample. If the exchange had been normal the directors would have been prepared to recommend the payment of a substantial dividend.

Peninsular and Oriental Steam Navigation Company.

The directors submit the accounts for the year ending September 30, 1915. The form in which the accounts are submitted on this occasion has been simplified. The result of the year's operations, after making allowance for depreciation and contingencies, and bringing the Provident Good Service Fund up to £150,000, which is the company's actuarial liability, shows a balance of £499,863 11s. 5d., which includes £68,702 18s. 5d. brought forward from the previous year. The directors propose to divide this amount as follows:—5 per cent. dividend on the preference stock, £152,000; 10 per cent. dividend and 5 per cent. bonus on the deferred stock, free of income-tax, £269,681 2s. (of which 2½ per cent. on preferred stock and 5 per cent. on deferred stock was paid as an interim dividend in May last), or a total of £421,681 2s., leaving a carry forward of £78,182 9s. 5d. Notwithstanding the fact that a large number of the company's steamers was commandeered by Government for war purposes, and that thirty-one of the ships are still in Government service, no mail departure has had to be abandoned, and the services were satisfactorily maintained. though at much extra cost. The freight market ruled high during the last nine months of the year, but the company did not thereby benefit to any extent, their steamers for the most part being necessarily restricted in cargo capacity, owing to the high speed required by the mail contract, and the large space occupied by mails and parcels post. The amalgamation with the British India Company is working satisfactorily. Economies, as well as advantages to the public, are being gradually introduced. A non-contributory pension scheme has been inaugurated for the commanders and chief engineers, involving, with existing pensions an actuarial liability which has been provided for by the addition of £100,000 to the Provident Good Service Fund. The Board are satisfied that this will have the approval of the proprietors. A banking system for all the company's employees, afloat and ashore, has also been established, which appears to be appreciated. The directors regret to have to record the wreck of the Nile in the Inland Sea of Japan on January 11, and of the Nubia near Colombo on June 20, happily without loss of life in either case. They have also to report, with great regret, that the India, requisitioned by Government as an armed cruiser, was destroyed by an enemy submarine on August 8 last. In this case the vessel was manned by a Government crew, and there was, unfortunately, considerable loss of life. The loss of the Nile and Nubia falls on the company, but in the case of the India, she having been entirely taken over by the Admiralty and out of the company's charge, her loss falls on the Government. Two of the older steamers, Arcadia and Oriental, have been sold. The expense of working, maintaining, and running the steamers has increased enormously owing to advances in wages and to higher prices of stores and coal, while delays in loading and discharging at all ports have lengthened the duration of voyages, still further adding to the cost. The rates of charter for vessels commandeered by the Government have been very moderate, shipowners having displayed a patriotic disposition to assist the Government in the present great emergency.

The insurance against war risk has involved a premium of over £250,000. The attacks by enemy submarines on merchant shipping have occasioned the Board considerable anxiety, but the exertions, skill, and seamanship of the company's commanders, officers, and engineers, in cases where attempts to capture P. and O. steamers have been made, have so far saved the ships from disaster. No praise is too high for the elaborate and highly successful arrangements made by the Admiralty and British naval officers all over the world to guard and protect the merchant service. The company, like most institutions, has sufferec a serious loss through the fall in value of the securities in which its reserves are invested. It is difficult to say what the depreciation is in the absence of a free market, but it amounts to a very large sum, the greater portion having been caused by the war. There has been no opportunity to lay down new ships in the past twelve months, and the two mail steamers which are under construction, and which in the ordinary course would have been delivered this autumn, will not be completed for some considerable time, the builders having been obliged to devote their attention to Government work. Instead of investing the amounts set aside for depreciation in new tonnage, as would have been the case in normal circumstances, the directors have placed them, together with the proceeds of certain securities which have been sold, in the Government War Loan and Treasury Bills. The Board have no doubt that this will have the approval of the proprietors.

Ernest Haliburton Cunard, Esq., and Peter Williams, Esq., retire by rotation at this meeting, and, being eligible, offer themselves for re-election.

Sir Thomas Sutherland retired from the Board at the end of last year, when Lord Inchcape was elected chairman. The Board desire to place on record their high appreciation of the services rendered by Sir Thomas Sutherland to the company over a period of upwards of sixty years, during thirty-four of which he occupied the position of chairman.

COMPANY RESULTS, &c.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended November 10 amounted to £E6,475, as against £E5,265 for the corresponding period of last year.

KHEDIVIAL MAIL STEAMSHIP COMPANY.—The annual meeting of shareholders will be held on Monday, December 20, at 12 noon, Winchester House, Old Broad Street, E.C.

ROUMANIAN CONSOLIDATED.—Week ended November 20, 1,595 tons; week ended November 27, 1,500 tons.

ROUMANIAN CONSOLIDATED OILFIELDS.—The annual meeting will be held at noon on the 15th inst. at the Cannon Street Hotel.

NOTES OF THE WEEK.

The British campaign in Mesopotamia, which, together with the conquest of German South-West Africa, has hitherto formed one of the few bright spots in our conduct of the war, has experienced a severe setback. After the battle Ctesiphon on November 22 General Townshend found himself compelled to withdraw in the face of the strong reinforcements which had reached the enemy. He had already lost heavily—4,500 casualties in all—in the attack on the Turkish position and in repelling the subsequent counter-attacks. The retreating expedition was followed by the Turks, and on the night of November 30 had to fight a rearguard action south of Azizieh against superior forces. The retirement, however, was carried out in perfect order. Two river gunboats were disabled by shell fire and had to be abandoned, but their guns and engines were rendered useless. General Townshend's force has now reached Kut-el-Amarah, which the Turks had already strongly fortified before it was captured by us on September 29, and has been still further strengthened in the interval by General Sir John Nixon.

It would be idle to attempt to disguise the national disappointment to which this reverse has given rise. The British public had been priding itself that in General Nixon they had found a commanding officer who was determined that no mistakes should be made in the operations for which he was responsible. Each stage of the expedition had so far been carried out successfully. The advance on Baghdad appealed to the popular imagination, and General Nixon's record warranted the belief that all would go well with the enterprise. All has not gone well. For the moment, however, there can be no question of any attempt to allocate blame, supposing blame is necessary. We may content ourselves with noting what has happened and in recording our disappointment. In his speech in the House of Lords on Tuesday Lord Crewe anticipated certain possible comments. The advance on Baghdad, he said, was not a rash military adventure; it had been contemplated some months ago, and "a sufficient force was collected to carry out the operation. It was clear to everybody that the early capture of Baghdad, if it could be effected, would be a great stroke in the war, not merely as a military move, but from the political results which would follow. . . . The force which was set apart for the purpose was by universal competent military opinion considered to be sufficient for it. No charge whatever could be brought against the leading of the troops, either the higher leading or the commands in general. It is evident that the troops behaved splendidly. The task, however, proved to be a heavier one than was anticipated, owing to the greatly superior forces of the enemy and their powerful armament of artillery."

Lord Crewe is not a military expert, otherwise he would have curtailed his references to the political aspect of the advance and told the House of Lords something about the intelligence on which General Nixon relied in pushing on to Baghdad. It is, of course, a contradiction in terms to say that "a sufficient force was collected to carry out the operation," and a little further on that "the task proved a heavier one than was anticipated, owing to the greatly superior forces of the enemy." A force is only "sufficient" in relation to the enemy's strength. Consequently the point of interest connected with the advance is the intelligence at General Nixon's disposal. How did it happen that the British expedition advanced to within twenty miles of Baghdad without learning that the Turks had received strong reinforcements?

In a letter from Athens, dated November 10, published in our issue last week, reference was made to Von der Goltz Pasha's expedition to Asia Minor. On October 27, it was stated, a long train left Haidar Pasha for an unknown destination, carrying German and Turkish officers, munitions and war material. An expedition commanded by the German Field-Marshal would hardly be confined within the limits of a single trainload, and it is probable that Turkish reinforcements had preceded him. As the British military authorities cannot be altogether without information of what is happening in Constantinople, we must suppose that General Nixon had already got wind of formidable reinforcements for the Turks being on their way. Was, then, General Townshend expected to forestall these, and, if so, was

Digitized by Google

there a reasonable chance of his being able to hold Baghdad against them when they arrived?

It will be noticed that Lord Crewe referred to the enemy's powerful armament of artillery. His remarks and the emphasis laid in the reports of the retirement on the Turkish gunfire seem to indicate that the Turks were found to be unexpectedly strong in this arm. If that be the case, here is a point which may well call for elucidation. Quite early in the year, as we have good reason to know, the military authorities were informed of the despatch of heavy artillery to Baghdad. In civilian parlance, the guns, which had already accomplished half their journey, were capable of smashing any gunboat to bits. From General Nixon's report it is to be inferred that they fulfilled their description, *au pied de la lettre*. But if this piece of intelligence was passed on to General Nixon, as, of course, it must have been, how came it that General Townshend was allowed to advance inadequately equipped with artillery? Were his guns outranged or merely outnumbered?

Disappointment over the check experienced by General Nixon's expedition does not imply the least doubt as to its ultimate success. It is obvious, however, that much more attention will have to be paid to intelligence than hitherto. We can only suppose that, as frequently happens, native information has proved thoroughly unreliable. If this should be the case, it is probably owing as much to the shortage of intelligence officers of the type of the late Captain Shakespear, who know and are known to the Arabs, as to inherent defects in the Arab character. In regard to this point the situation will become still more difficult after the retirement from Ctesiphon to Kut-el-Amarah, which will have exercised a powerful influence on the native mind. A point to be cleared up when fuller reports are available will be whether General Townshend was adequately served by airmen. Very little mention has hitherto been made of the aircraft with General Nixon's expedition; but Turkish reports speak of six British aeroplanes having been captured. It is obvious that air reconnaissance will be invaluable for the purpose of checking or supplementing dubious native intelligence.

It is well to remember that at this season of the year the activities of the Turks and Arabs will not be the only subjects to engage General Nixon's attention. References to heavy rains in the upper sections of the Two Rivers have appeared during recent weeks. The Tigris begins to rise early in November, and in the event of exceptional rainfalls the flood-tide may assume such proportions that the country for many miles on either side of the river becomes uninhabitable. Abnormal floods of this nature occur periodically. If there should be one in preparation this year, General Nixon will hardly care to meet it even at Kut-el-Amarah. In regard to this matter, however, the movements of the enemy's forces will probably provide adequate warning.

One other point must be borne in mind in connection with the check administered to the Mesopotamia expedition. In the debate in the House of Lords on Tuesday Lord Bryce referred to the report, and Lord Crewe admitted that it was a fact, that German and Turkish agents had carried their skilful and unscrupulous propaganda into Afghanistan right up to the Indian frontier. So far these intrigues have met with very mediocre success. The Moslems of Persia, Afghanistan, and India may not be enthusiastic over a British advance to Baghdad, but the more fanatical elements, to whom the Turco-German appeal will have been made, will have argued that, so long as Great Britain is strong enough to defeat the Turks, there is not much scope for their activities. Anything in the nature of a reverse to British arms operating against Turkey will at once be used by Germany's agents to support their theory that the British Empire is breaking up. We must be prepared, therefore, for an increase in the unrest in the Middle East, and the advance on Baghdad should be resumed at the earliest possible date consistent with assured success.

The difficulty of the position in Persia has to be admitted. There are almost insuperable obstacles to such action as would put an early end to the anarchy now prevailing at German instigation and under German leadership; until such anarchy is suppressed, it must tend to increase by its own momentum. The British and Russian Governments would seem, therefore, to have to choose between bigger operations than they care to face at the present moment, and something approaching a formidable campaign involving the whole of Persia at a later date. It must be difficult for the two Governments to reconcile themselves to leaving Prince Henry of Reuss, the German Minister, and his fellow-filibusters a free field indefinitely. Sir Edward Grey has stated that what measures are possible are being taken. We must hope that the action of the Persian Government will gradually exercise a steadying influence on the Persian people over a widening area, and enable more and more effective steps to be taken to cope with the evil. The condition of the country during recent years will have provided the Germans with plenty of material to work upon in an attempt to stir up the more fanatical elements against Russia and Great Britain, but the more unrest they create the less can it be to the liking of the better class of Persian and to the merchants.

Any uncertainty that may have prevailed regarding the identity of the officers of the Persian Gendarmerie will have been removed by Sir Edward Grey's plain statement that they were not Swedish officers in the sense of being under the control of the Swedish Government; but they were men of Swedish nationality, employed by the Persian Government. This bears out what was stated in these Notes last week. The Swedish Government is thus relieved of direct responsibility in the matter, but unless we are to suppose that it has no means of making its wishes or orders known to its nationals in Persia, a certain moral responsibility attaches to it. Lord Crewe amplified Sir Edward Grey's statement by saying that over some of these "Swedish soldiers" the Swedish Government has a certain degree of control, if they are in possession of pensions. It is only fair to state, he added, that over these the Swedish Government in the most correct manner has always endeavoured to exercise a sound influence "and to prevent them from engaging in any unneutral manner." From this qualified praise we must infer that some of these Swedes make fitting associates of the Turkish and German agents in the country, and will require to be dealt with, in common with the latter, when Persia settles down to a more satisfactory existence. It is eloquent of the plane of civilization which the German nation as a whole has reached that it does not realise that Germany's action in Persia is the equivalent of what Great Britain's would be, if she hired a few gangs of Chinese ruffians to exterminate every German in China.

The situation in the Balkans remains thoroughly unsatisfactory. Monastir has been abandoned by the Serbians, Germans are in control of the town, and a Bulgarian force has cut the railway line with the object apparently of cutting off the Serbian retreat in the direction of Greece. The evacuation of Monastir has necessitated a retirement of the French forces holding Krivolak. These have fallen back some twenty miles on Demir Kapu, where a more favourable position is said to be available. The British troops holding Strumnitza have been subjected to heavy attacks by the Bulgarians, and have in turn withdrawn in conformity with the new French line. The whole Allied line is on the defensive. Further to the north the Bulgarians and Austrians are following the retreating Serbians; Jakova has been occupied by the former, Ipek by the latter. Both towns are in Montenegro. The German forces under Field-Marshal von Mackensen, or a large portion of them, are said to have crossed into Bulgaria, and to this extent the statement of the German *com-*

Digitized by Google

muniqué that the operations against the Serbians had been brought to a close might prove correct. The Austrian and Bulgarian pursuit into Montenegro, however, continues. No doubt it is hoped that the appearance of these armies, even if they do not penetrate far, will have the effect of rousing the Albanians to finish the work of harassing the Serbians all the way to the coast.

King Constantine has explained his position to a correspondent of *The Times*. "At all costs his Majesty's desire was to keep his country from sharing the perils and disasters of the great European conflagration. The only circumstances in which he could consent to proceed to war were if the mortal existence of Greece were threatened, or if there was a certainty of victory so great that the rewards would justify the sacrifices. From the very commencement the King had given the most solemn assurance that Greece had not, and never could, cherish designs against the Allies. That Greece, and especially her King, could have been thought capable of treachery was an insult to that country and to its Sovereign. Greece's friendly feelings had surely been sufficiently demonstrated when she placed her railways and telegraphs at the disposal of the Allied forces which had disembarked at Salonika." If the King's statement up to this point covered the whole of the case, there would be much ground for his Majesty's contention that "the suspicions which exist regarding his political views and aims are as unjustified as they are cruel." But so far he was laying stress on an aspect of the question which was of little concern to the people of Great Britain.

The whole trouble, we can assure King Constantine, centres in the Greco-Serbian Treaty. This matter his Majesty was most anxious to make clear, and his words may be quoted at length. "The Greco-Serbian Treaty deals with a Balkan war, and a Balkan war alone. It was only to come into force in case either Greece or Serbia were attacked by Bulgaria alone. Clearly it did not refer, and was never intended to refer, to the case of Serbia being attacked by two of the great military Powers of Europe as well as by Bulgaria. What adequate assistance could Greece have given? The only result would have been the ruin of two countries instead of one." In regard to this explanation, it must be stated quite plainly that it is one which can never be expected to appeal to a Briton, or indeed to any citizen of the Allied States. King Constantine's contention is wholly incomprehensible. So long as Serbia was attacked by Germany and Austria, she made no claim upon her alliance with Greece. The Treaty, as King Constantine admits, dealt with an attack by Bulgaria, and directly Bulgaria showed signs of attacking Serbia had every right to expect that Greece would honour her pledged word. If quibbles were to be the order of the day, it was for Greece to explain to Germany and Austria-Hungary that in coming to Serbia's aid against the Bulgarians she was actuated by no feelings of hostility towards the Central Powers. There would have been no difficulty in placing an effective screen between the Greek troops and the Austro-German forces, with the result that no country need have been ruined, unless, indeed, Bulgaria. In betraying Serbia King Constantine committed an act which, we regret to have to believe, will never be forgiven him in Great Britain or by the majority of his own people. It is on account of that act that the suspicions which more properly attach to the Coburger Ferdinand or a Bethman-Hollweg have hung over him.

There is considerable force in King Constantine's argument that he received no help from the Entente Powers towards taking the decision to participate in the war on their side. "The attack on the Dardanelles," he urged, "was a gamble which might or might not succeed. But Greece's position did not allow her to run such a risk. Nor was the Balkan policy of the Allies at any time a very definite one. Suppose Greece had joined the Allies, and suppose that subsequently the Allies had decided to reduce their action or to retire altogether, in what position would Greece have been left? To become a second Belgium, at the mercy of her enemies." The same state of affairs prevails at the present moment, according to King Constantine. "The Allied Powers have made certain demands upon Greece regarding the Greek forces in Macedonia and upon one or two other points. We have replied by giving the most solemn assurances that nothing detrimental to the Allies need be feared from Greece. But before we can absolutely bind ourselves to a fixed and irrevocable programme, we are desirous of knowing the programme which the Allies have drawn up for themselves. In reply, we are told England and the Allies are at this moment deliberating, but that up to the present no fixed programme has been decided upon. Can Greece, in justice, be pressed to undertake measures of the deepest political and strategic importance under these conditions? Can she, in justice, be invited to remove her troops into other districts, so long as the Allies have arrived at no decision as to whether they will occupy and hold the evacuated region? Greece must know the definite plans of the Allies, though, whatever these plans may be, she will not abandon her neutrality."

It is to be feared that the final clause in King Constantine's statement militates against the rest of his contention. Clearly if Greece is not going to abandon her neutrality in any circumstances, the Allies need not be over-squeamish in their treatment of her. The main point in studying Greece's feelings ought to be to render it as easy as possible for her to redeem, even at this late hour, her pledge to Serbia. If she persists in an attitude wholly prejudicial to the Allies, which has already brought one of their number to ruin, it ought to be difficult for Greece to drive her own terms in any bargain with the Entente Powers. Wherever the fault lies, the negotiations between Greece and the Allies are being indefinitely prolonged, but with some indication that the latter are less pleased with the Greek attitude than they affected to be a few days ago.

FOR PRISONERS IN TURKEY.

In reply to a letter from the Secretary of the Imperial Merchant Service Guild respecting the transmission of money and parcels for British prisoners of war in Turkey, the Secretary for Foreign Affairs states that information has been received from the United States Ambassador at Constantinople that remittances of money should be despatched through the offices of the International Red Cross Committee at Geneva for transmission to the Ottoman Red Crescent Society at Constantinople, by whom the payment to the recipients will be effected. No information has yet been received from the Turkish authorities as to whether this applies also to the case of parcels. It is to be understood that the above regulation does not in any way preclude the public from taking advantage, should they prefer to do so, of the facilities afforded by the Prisoners of War Help Committee, 5, Southampton Street, Strand, who, under an arrangement recently announced in the Press, are prepared to receive any sums destined for this purpose, and to forward once a week to the Foreign Office the total amount handed to them, for transmission and distribution through the good offices of the United States diplomatic representatives in London and Constantinople.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, November 30.

The Sultan.

H.H. the Sultan returned on Friday from his trip up the Nile. He has expressed himself as highly satisfied with all he saw, and appears to have benefited very considerably in health from the change of air and surroundings. The High Commissioner and General Maxwell are also back once more in Cairo. Their absence was kept a dead secret, but since the Press Bureau has now permitted the local Press to refer to it, it is no indiscretion to state that both Sir Henry MacMahon and Sir John Maxwell went to meet Lord Kitchener, and were with him during his historic visit to Athens. So much interest has been taken in, and such importance has quite rightly been attached to, the British Secretary for War's visit to the Eastern Mediterranean area of the war by the local population that it is to be hoped some authoritative statement will before long be issued.

The Eastern Frontier.

Communiqués dealing with the two frontiers were issued this week. The first announced that a party of the enemy, which had approached the Canal, had been dispersed by an Indian mounted column, with the loss of one Indian trooper, the enemy losing seven killed and twelve prisoners. No undue importance should be attached to this incident. It is now more than six months since any official statements have been made with regard to the eastern frontier, and the natural deduction, which the man in the street might quite reasonably make from this week's *communiqué*, is that the Turks are once more showing activity. Such deduction is, however, entirely erroneous. Ever since the "invasion" last winter the Turks have maintained patrols in the Sinai; at first they consisted of Turkish soldiers, but later they were replaced by Bedouins from the borderland, who received a rifle, ammunition, and a small monthly payment, and in return were expected to report on our movements on the Canal. These patrols have throughout the summer prowled about the Sinai desert; our aeroplanes have known all about them; but, although they continually came close up to the Canal zone, they were left unmolested. On the 22nd inst. a patrol was signalled, and, for a change, it was decided to attack it; hence the encounter and the subsequent *communiqué*. The situation on the eastern frontier is absolutely unchanged, and this incident cannot be regarded as indicating that the Turks have resumed activities there.

Nevertheless, we must be quite prepared for a diversion to be attempted in the near future in the Sinai. It would, indeed, be foolish to think otherwise. Climatic conditions in the peninsula, even with the aid of artificial devices, will not permit of the safe passage of any large body of men until the turn of the year, but once that period is at hand we must expect, whether the Germans have reached Stamboul or not, that another attempt will be made on the Canal. It is the obvious course for the Turco-German combine to follow, since it will immobilize a large force of our troops; and unless we, in the meantime, take certain preventive measures outside Egypt there is little doubt that the new year will see "liveliness" once again on, or near, the Canal. Every preparation is being made on this side to meet this eventuality, and we can feel perfectly confident that the next attempt will be as unsuccessful as was the first one in February last.

The Senussi and the Tripoli Arabs.

The other *communiqué* dealt with the situation on the western frontier, which has undergone a slight change within the last week or so. That situation has hitherto been quite satisfactory, but has entirely depended on the attitude of the Sheikh El Senussi and the tribes controlled by him. El Sayed Ahmed El Sherif has always entertained friendly relations with the Egyptian Government, and has, especially since the outbreak of war with Turkey, repeatedly given proof of his desire to continue on peaceful terms with his eastern neighbour. Of late, however, there have been unmistakable signs that the Turkish and German agents, who were known to be at work in Tripoli, had been steadily undermining the Grand Sheikh's influence over certain of the Arabs, and had succeeded in inciting them to raids on the frontier. In these circumstances, as the authorities had no wish to provoke any incidents, it was decided to withdraw from Solloum and Sidi Barani the small outposts which in times of peace had been maintained at those points for purely political purposes, and to create a strong post at Mersa Matrouh. This, as stated, is purely a precautionary measure, and has been taken for the more effective protection of our own Arabs. There should be little fear of anything serious occurring on the western frontier, for the simple reason that, since the occupation of Tripoli by Italy, Egypt has been the sole source of supply for the Senussi, and any actively aggressive action on the part of the Tripolitan Arabs would definitely close this last channel, and so would react somewhat seriously on them.

The Disposal of Our Turkish Prisoners.

The taking of more prisoners on the Canal last week brings into prominence the question of the disposal of the very large number of Turkish soldiers who are now held here. These men are at present, and have been since their capture, fed, housed, and clothed at the expense of the Government. They do very little work, if any; and the question which arises is whether the Government could not turn their presence to more profitable account. The Germans use their prisoners for the making of roads, the ploughing of fields, etc., and there should be no reason why these Turkish prisoners, who in the main are drawn from the peasant and labourer classes, should not earn their keep by some honest work for the country which is paying for their maintenance. All "new works" have been stopped in Egypt, owing to the financial stringency caused by the war; but those works will inevitably have to be resumed after peace has been declared, whilst the country is also badly in need of roads. Could not these prisoners, instead of being allowed to eat their heads off at Tura, be turned on to the "spade work" necessary for the execution of the drainage schemes, or on to the making of some roads in districts where such means of communication are sadly lacking? If it sought to use these prisoners in this manner the Egyptian Government could scarcely, in view of the precedents in Europe, be accused of harsh treatment, and, whilst giving them a chance to earn their keep and a little extra pocket money, it would be effecting a double economy.

The Purchase of Army Supplies.

It is announced that in view of the large purchases of agricultural and other produce by the military authorities a scheme is under consideration to form a board, on which the Egyptian Government will be represented, to safeguard the interests of the Egyptian landowners and fellaheen by preventing the depletion of their agricultural resources and at the same time enabling them to sell their surplus stocks direct to the purchaser. This is a very welcome step, and one that ought rightly to have been taken sooner. The advent of an enormous army has naturally inflated the demand for locally produced foodstuffs. Fortunately in a way, Egypt, owing to the restrictions on the cotton area this year, has produced an abnormally large supply of cereals and other agricultural commodities; but unfortunately, although the cultivators have disposed of their holdings at fairly remunerative prices, they have not received anything approaching what the military authorities have had to pay for their supplies. The difference—at times a stupendous difference—has gone into the pocket of the middle-men and contractors, who accumulated supplies and worked the market as the spirit moved them. Under the arrangement foreshadowed by the official notification such a regrettable state of affairs will henceforward not be possible, and the military authorities will buy direct from the cultivators, thus assuring the latter a fairer return, and at the same time meeting their own requirements at more reasonable prices. Incidentally, it will protect the masses against the high prices which the speculative manœuvres of the contractors tended to create.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, November 24.

Greece and the Entente.

A very precarious situation has arisen as a result of the ill-advised declaration made by the Greek Government to the representatives of the Entente Powers, following immediately upon its assurances of benevolent neutrality. M. Skouloudis has informed the British, French, and Russian Ministers that, in the case of a retreat on to Greek territory, the Serbian troops would be disarmed, and those of the Allies interned. The confidence in the benevolence of Greece's neutrality with which M. Zaimis had inspired the Allies has been shaken by this declaration, which has made the Entente Powers suspect the intentions of Greece, who, they fear, may have a disagreeable surprise in store for them. Unfortunate misunderstandings at Salonika have had the effect of making the commander of the Allied troops there suspect the attitude of the Greek authorities to the extent of fearing that the Greek troops were preparing to surround the Allied troops at a given moment and attack them. One well versed in the situation at Salonika has told me that the Germanophil Jews there, hostile alike to the Greeks and to the Allies, have sown the seeds of dissension, and have helped largely to spread these mischievous rumours. True, the Greek Government soon thought better of it, and withdrew the declaration, having, it seems, declared instead that, in the case of Serbian or Allied troops being driven back on Greek territory, they would not be either disarmed or interned, but would be obliged to go to the coast to rejoin their ships. Needless to say, such a strange proposition, which was in direct opposition to the promises given to accord the Allies every facility, had no chance of being accepted, and has only served to increase the Allies' suspicions. The Entente Powers then thought it necessary to be reassured as to Greece's real intentions. It was in these circumstances that, after having vainly tried to obtain sufficient guarantees, they thought it more efficacious to publish in the Press a *communiqué* which, while stating that they had no wish to constrain Greece to depart from her neutrality, denounced in a veiled manner the attitude of the Greek Government as being a menace to the security of their troops, and making known their decision to suspend the economic and commercial facilities hitherto enjoyed by Greece. At the same time Greek boats, filled with wheat, were held up at Malta, and a strong Allied squadron made a demonstration at Milos, where the telegraph station was occupied. These measures made all the more impression, as the supply of wheat could last only for four or five days.

This communication was made and the above-mentioned measures taken by the British Legation on the eve of Lord Kitchener's arrival at Athens. The long interview he had with the King (who, it is stated, invited him to come to Athens) had very satisfactory results, and it seems certain that it was at this interview that the basis of an arrangement was reached.

The intervention of M. Denys Cochin having also contributed to this result, the Entente Powers handed a Collective Note to M. Skouloudis. The exact contents of this communication are not yet known in detail. The Note demands formal, written assurances that the Allied troops will not be disarmed or interned, and that they will have absolute security and freedom of movement, as well as all the facilities implied by Greece's promises of benevolence. In short, the Powers demand Greece's consent to Salonika being made the base of their military operations in the Balkans.

After a lengthy Cabinet Council, the Greek Government has to-day sent its reply to the Legations of the four Powers, giving the assurances asked. At the same time the coercive measures have been stopped and the vessels laden with wheat have left for the Piræus. It now remains to settle the details of this agreement. It is greatly feared in diplomatic circles that fresh difficulties will arise in the course of the discussion.

Lord Kitchener at Athens.

The visit of the British War Secretary was a very short and busy one. He arrived unexpectedly, and stayed only a few hours. The fine presence and tall figure of the great Field-Marshal, who was in full uniform, made him the admiration of all who had the opportunity of seeing him at the reception held in his honour by Lady Elliot at the British Legation.

The Venizelists and the Elections.

M. Venizelos, having definitely decided that his party shall abstain from taking any part in the coming elections, explained to his supporters at a meeting at his house last Sunday the reasons which had led him to this decision. Indeed, putting aside any other considerations, his participation in the elections would not be of any practical utility, since, even if he were returned again, as seems likely, it is very doubtful whether he would have a chance of applying his policy, or if there would not be another dissolution. Recalling the conditions under which the former elections were held, M. Venizelos pointed to the fact that his opponents never ceased declaring that his programme was war. Albeit the result of these elections had again placed him at the head of the majority, enjoying the confidence of the people, he had remained in power only until such time as the King thought that circumstances dictated a different policy. Then he had been obliged to resign, though the people had never withdrawn their confidence from him. Such a proceeding was characterised by M. Venizelos as unconstitutional, and the recent dissolution of the Chamber as being opposed to the fundamental laws of the Constitution. He regards the coming elections in the light of a political comedy, seeing that of the 730,000 voters who took part in the last elections half are under arms, and consequently unable to vote. The result of these elections cannot, therefore, be considered as representing the verdict of the people. In these conditions, the participation of the Liberal party in the elections would mark their approval of the comedy that is taking place, the principal actors in which would be in a position to say that the Greek people had approved their unfortunate policy, which has led to Greece failing in her duty towards her ally Serbia.

The Liberal Party's Manifesto.

M. Venizelos' supporters, having approved their leader's resolution, authorised him to address a protest to the people in the sense indicated above. Considering the way in which the crisis had been provoked, it constituted, in M. Venizelos' opinion, an abolition of the Liberal régime after fifty years of constitutional freedom. M. Venizelos maintains in the manifesto that the combatants of Bizani and Kilkis have thus been deprived of their political liberty. The following passages from the Manifesto, which criticise severely the attitude of the Crown, have created a great impression:—"Thus," says the Manifesto, "we are face to face with an obvious dislocation of the existing régime, which daily seems going to pieces. Successive dissolutions of the Chamber, with the object of imposing on the people a settled policy, inaugurate with us a system of government which could only be possible under a monarchical régime, such as that of Prussia, where the monarch is the sovereign organ of the State, a system which constitutes a radical negation of our Parliamentary régime. The Liberal party, in abstaining from these hateful elections, leaves with the Government all the responsibility for the deviation from the régime and for the misfortunes which the present policy may bring upon the nation, remaining free to take up the struggle for constitutional liberty later on, when the foreign crisis will be over. The restoration of the liberty of the Hellenic people is necessary if the State is to avoid the atrophy and obscure end which the definite establishment of despotism would lead to."

NOTICE TO SUBSCRIBERS.

Subscribers to "The Near East" who have left the Ottoman Dominions since the war will oblige by notifying the Manager of their new address as early as possible, so that the supply of the paper should not be unduly interrupted.

SALONIKA LETTER.

(From Our Special Correspondent.)

Salonika, November 23.

M. Cochin's Mission.

The diplomatists continue to be exceedingly active, but the *démarches* of the Entente have not achieved the results aimed at, either because they have not been suitably made or because they have been counterbalanced by the German efforts. And perhaps for this reason the French Government has thought it advisable to despatch M. Denys Cochin on a special mission to Greece. On his arrival in Athens the illustrious Academician had a magnificent reception; wherever he went he was cheered, and the city was illuminated in his honour. He had numerous interviews—with members of the Government, with M. Venizelos, and with the Ambassadors of the Entente Powers—and he was also received in audience by King Constantine. Yesterday he arrived here, from the capital; and here also he had an enthusiastic welcome. As to the results of his mission to Greece, it would be a bold person who would predict regarding them in present circumstances.

The Germanic Advance.

Meanwhile, the Balkan campaign follows its course, though there are those who profess to believe that it is over as far as the Austro-Germans are concerned. The Franco-British forces are still in the field, available for the creation of a military diversion, but not in sufficient force, it appears, to attempt any move that calls for rapid and energetic action. We may hope, no doubt, that the Serbian armies, despite their present difficulties, will be able to extricate themselves and to resume the offensive; for they are splendid fighting men. But one cannot ignore the fact that the Germanic and Bulgarian forces have effected a junction, and sooner even than the Bulgarians expected; nor can we deny the strategic importance of this success.

Roumania's Attitude.

Roumania apparently maintains a Sphinx-like attitude. It is reported that she would be prepared to take action if the Entente would send a force of 600,000 men into the Balkans, in which case she would supply 400,000, thus making up an effective of a million, which would be able to deal to good purpose with the Austro-Bulgaro-Germanic forces.

It goes without saying that the Entente has been active in making representations at Bucharest; and the result of these representations is anxiously awaited. It is rumoured that the present Government contemplates resigning; and should this come to pass there would certainly be a great upheaval in Roumanian policy. Moreover, it must be borne in mind that most active military preparations have been ceaselessly carried on in that country, and Roumania would have to be remarkably rich to pay the expenses of a mobilization without any substantial reasons.

Possibly the preparations referred to are being made because the prospect of Russian intervention in the Balkans is becoming more and more certain. There is talk of a Russian landing on the Bulgarian coast, a landing which King Ferdinand's army is incapable of repelling. According to a Viennese report, 600,000 Russians are concentrated on the Danube, on the Roumanian frontier; and, according to news coming from various centres, Italy also is contemplating a landing on the Ægean coast of Bulgaria. In such circumstances Roumania could not still maintain a waiting attitude in the Balkan conflict.

Serbia and Albania.

Apropos of action in Albania, which seems more than probable, there are reports of concerted action on the part of Albanian bands and Bulgarian troops, and agents of the interested parties are carrying on a very active propaganda in Albania. But the situation of the Serbian armies, though critical, is not desperate, and official Serbian circles deny the rumour that Serbia contemplates making peace on her own account.

The Landing of Troops.

The landing of Allied troops still continues with the greatest activity. Five, six, and even ten transports a day unload great numbers of men and vast quantities of stores and munitions. The clearance of these troops can, however, only proceed very slowly, since railway communication is interrupted at several points. A certain number of aeroplanes have also left for Serbia during the past few days. The headquarters of the aviators is in this town, where a large aerodrome has been erected.

In spite of all the excitement caused by this constant landing of troops and the Greek mobilization, the people of Salonika are more concerned with another topic. There is a shortage of bread in the town, recurring periodically. Hungry people gather in front of the bakers' shops, which are inexorably closed. It was reported that this shortage was due to the arrival of the foreign troops; but this is wrong, for the newcomers bring everything with them, down to their field bakeries.

LADY BEATRIX WILKINSON ON SERBIA.

Lady Beatrix Wilkinson lectured last Tuesday at 9, Chesterfield Gardens on Serbia and the Serbians, the proceeds going to the Church of England Homes for Waifs and Strays. The lecture was illustrated by lantern slides, and chiefly described the experiences of a party of English ladies who went out there to assist in hospital work and the distribution of relief. In the hospital where they worked they found some of the orderlies were undergraduates from English universities who had failed to pass the medical examination for the army; among these was a young man who had been cox of the Oxford boat. Others were Austrian prisoners, and these included the proprietor of the largest hotel in Buda Pesth. One of the most heroic things in connection with the war was, she said, the conduct of the English nurses at Uskub, who remained after it had fallen into the hands of the enemy rather than desert the wounded men in their charge.

A telegram from Athens states that 250 refugees from the Turkish Island of Moschonissi are reported to have arrived in Mytilene, fearing being sent into exile in the interior by the Turkish authorities. It is rumoured that disturbances have occurred at Moschonissi.

A semi-official denial is issued from Petrograd to the rumour that the Turkish warships Goeben and Breslau and a number of transports with troops have recently been seen in the western region of the Black Sea steaming towards the Bulgarian coast.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of the "NEAR EAST" to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, October 30.

(Delayed in transmission.)

Interventionists' Mass Meeting.

The great meeting of the "Federatzia Unioniste" has come—and gone. What effect it may have remains to be seen, but at the present moment it looks as if, after a fortnight's advertising and discussion, it had ended in a rather feeble flicker. That the Government was determined to back up the stringent regulations issued by the police was early in the day made clear; for two regiments of infantry were drafted into the city to reinforce the garrison, and anyone passing through the streets of Bucharest might have imagined that the capital was in a state of siege. The Austrian and German Legations had their military guards doubled, and the half-dozen police who usually protect M. Marghiloman's residence were reinforced by a company of infantry. Strong patrols guarded every street leading to the Palace, while reserves were posted at various spots in the vicinity, and the cavalry of the Guard was stationed in the rear of the Palace.

Long before three o'clock, the hour for which the meeting was timed, the Dacia Hall was packed to its utmost capacity, and a black sea of people surged outside the building. The Opposition had done everything possible to make the demonstration a success, and many sympathisers from the provinces had come in to swell the meeting, practically every Conservative and Takist of note being present. Among the principal speakers were Dr. Istrati, MM. Filipescu, Také Jonescu, Gradisteanu, and Xenopol; but their arguments need not be repeated, since they covered ground already familiar to your readers. After speeches inside and outside the building, a motion was carried calling on the Government to order immediate mobilization in order to prevent a junction of Austro-Hungarian and Bulgarian forces, a junction fatal to Roumania's legitimate aspirations.

Street Fighting.

The meeting being closed, a surging crowd made its way up the Calea Victoriei. It was unmolested by the authorities until it reached the space before the theatre; but there its way was barred by rows of soldiers. Some of the leaders entered the Conservative Club, which is situated at a corner of the Calea Victoriei here, and from a balcony urged the crowd forward. A rush was made, and for a moment there was some stiff fighting of sorts, the mob using sticks and stones, and the soldiers the butts of their rifles and, occasionally, their bayonets. But the result was never in doubt; no headway was made, and the crowd had to content itself with hooting, whistling, and stone-throwing. From the balcony of the Conservative Club some speakers attempted to address the soldiers, calling on them not to fire on unarmed citizens, but rather to demand that they should be led against the Hungarians. These appeals, however, were lost on the troops, who were promptly ordered to mark time, thus drowning the voices of the speakers. Another rush was now made, and a few revolver shots were fired, and one soldier was wounded in the cheek, while others had their heads broken by blows from heavy sticks.

At about six o'clock the crowd was still as dense as ever, though probably half its members were merely sightseers, and appeared to be ready to spend the night in the open if necessary. But it was now announced from the club balcony that MM. Také Jonescu and N. Filipescu had gone to the Palace, presumably as delegates from the meeting, to demand an audience of the King. To pass away the time of waiting patriotic songs were started; and as the darkness deepened numbers of torches were handed out from the club windows, and soon the strange scene was lit up by their dancing light. Someone, too, brought up a gypsy band, and scores of people joined heartily in dancing the national dance, the "Hora"—a somewhat curious way of demonstrating.

At half-past eight the delegates returned. The King could not see them—as a matter of fact, he was at Cotroceni—but they had handed in a written demand for an audience. What to do? The troops stood firm as ever. The crowd began to thin out gradually. But a large body turned back to the Marghiloman party's club and the Liberal Club, where, amid cat-calls and hooting, the windows were smashed with stones and bricks, the police and military being powerless to prevent this ebullition of feeling. The windows of the *Minerva* newspaper shared the same fate. Then Bucharest, feeling hungry, went home to dinner, or supper, as the case might be; though a party escorted M. Filipescu to his residence, before which there was more dancing and singing. By ten the streets were empty, save for the military tramping back to barracks.

A Victim.

The demonstration was responsible for one death. In one of the rushes a young Jew was bayoneted by a soldier, and died later in hospital. The Union had intended to make his funeral the occasion for a further demonstration; but the authorities frustrated this plan by having the body hurriedly buried at night—an incident of which the Opposition journals made considerable capital, accusing the Government of being cowards and "body-snatchers."

MM. N. Filipescu and Také Jonescu were received in audience by the King on Tuesday, in accordance with the request referred to above, in order to acquaint his Majesty with the motion passed by the mass meeting. They were received separately, but, according to the papers, they both received the same reply, as follows:—

His Majesty is not, and has never been, opposed to the realization of national ideals and the reunion of all Roumanians; but as a constitutional monarch he keeps within the limits of the Constitution, and leaves the responsibility of the situation to the Government and Parliament.

The "Federatzia" declares its determination to continue its campaign unflaggingly, and meetings are announced for next Sunday in six of the principal towns, where the various leaders will again speak.

Serbian Refugees.

The inhabitants of the northern part of Serbia, now occupied by the Austro-Hungarian and German troops, are fleeing in all directions, and many have sought refuge on Roumanian soil. The Roumanian authorities have done everything in their power to help these unfortunate people, and have transported them on tugs and lighters across the Danube, whilst the inhabitants of the riverside towns have been most charitable in aiding those who are, in many cases, their blood relations, the inhabitants of the northern corner of Serbia being practically entirely of Roumanian origin. At Turnu Severin there are already 7,000 refugees, and at Gruia 3,000, apart from the numerous parties who have crossed the river at other spots.

Several of the Roumanian philanthropic societies have subscribed large sums for the help of these unfortunate victims of the war.

Smugglers Sentenced.

Some time ago it was mentioned in these pages that some people had been caught on the frontier when endeavouring to smuggle dynamite into Roumania, no doubt destined for Turkey. The Ploesti tribunal has now condemned the two German agents—Benuig, a Jew, and Tenhof, a Bulgarian—to a year's imprisonment, four accomplices to six months, and a woman, who was also an accomplice in a lesser degree, to a month's imprisonment.

A Defaulting Hun.

Sometime ago a certain German "agent" arrived here from Berlin, charged with the mission of securing the "neutral" Press, or as much of it as possible. He is now missing, and much wanted by those above him, as he has disappeared with about four million marks.

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, November 18.

The German Invasion.

According to recent advices from Constantinople, preparations were being made there for the reception of the German Army. Many houses had been requisitioned for the German officers, and the whole of the Pera Palace Hotel had been reserved for the Staff. The Greek papers to-day announce the actual arrival there of the first detachments. It remains to be seen how the Turks will like their capital being occupied by the Huns.

Trouble in Syria.

There are rumours of an insurrection in Syria under the leadership of Jemal Pasha, formerly Minister of Marine. No definite information of what has actually occurred has yet leaked through, but there are indications of trouble amongst the Arab troops, and it is reported that the 6th Army Corps is being transferred from the Dardanelles to Smyrna. There are reports that a force of 30,000 men, under either Perteb Pasha or Halil Bey, an uncle of Enver, are marching against the insurgents in Syria; but the recent military movements in Asia Minor are shrouded in mystery. There is evidently some expedition being undertaken, but whether it is for the relief of Baghdad or to operate against the Syrian insurgents is not yet known.

Naval News.

One of the British submarines operating in the Marmora recently bombarded Zeitoun Bournou Munitions Works, but did not cause very much damage.

Three more steamers carrying munitions, the Bithnyia, Plevna, and Hanifié, have been sunk in the Marmora.

The Turks have salved the French submarine Turquoise, which was put *hors de combat* in the Dardanelles, and have taken her to Stenia. It was, however, rumoured in Constantinople that another German submarine had been captured off the entrance to the Dardanelles.

The Breslau has been repaired, and is apparently fit to go to sea again.

The Cost of Living.

In Constantinople it is feared that the approaching winter months will not only bring untold misery to the poor, but also inflict very great hardship and discomfort on the better classes. It is anticipated that meat will probably be sold by tickets, in the same way as bread and sugar. The authorities have now prohibited the sale of rolls of white bread, which were being sold at the high rate of six piastres the kilo. In future bakers may make loaves of a better quality than the ordinary bread, but they must be half a kilo in weight, and must be sold at not more than forty-five paras the loaf.

An effort was being made to accumulate a quantity of grain in Constantinople from the interior, but of late the Anatolian Railway, owing to want of fuel, has been running only one train per week for transport of merchandise. Such articles as onions, potatoes, and beans, which are fairly cheap in the interior, are at exorbitant prices in Constantinople.

Prisoners Well Treated.

Two of the batch of Englishmen who were deported to Kara Hissar some time ago have been allowed to return to Constantinople. They are Messrs. Willard and Lee, the former of the National Bank of Turkey, and the latter the keeper of the British Cemetery at Scutari. They say they had not a bad time, and were well treated. It is reported that several of the others, if not all of them, will shortly be liberated. On the other hand, Mr. James La Fontaine has now been exiled to Angora.

Most of the unwounded prisoners from the Dardanelles are concentrated at Angora and some at Afion Kara Hissar. It is difficult to obtain the names of these prisoners, or rather to identify them, owing to the muddle which the Turks make in writing foreign names in the Turkish language.

Parliament's Preoccupations.

Parliament is still sitting, but the reports of the proceedings that reach here are very brief. The Chamber has voted the credit demanded by the Minister of War for the construction of a railway from Rodosto to Muradli, and a line from Angora to Erzeroum. These kinds of enterprise are announced from time to time, but one never hears of any progress being made towards their realisation!

The *Hilal* announces that sixteen German professors have been engaged for different subjects for the Turkish University, and are to arrive soon in Constantinople.

An announcement appears in the Press that doctors of the enemy countries are not allowed to practise in Berlin.

Sterilised Fresh Milk

Obtainable from all leading Grocers and Druggists in Egypt and the Levant.

CYPRUS NOTES.

(From a Correspondent.)

The acknowledgment by the House of Lords of the telegram despatched by the Archbishop and Greek members of the Legislative Council has been received, and published in the local papers.

Refugees from Turkey.

Considerable numbers of subjects of the Allied Powers, who, through the energy and good offices of American representatives, are allowed to leave the Ottoman Empire, are expected in Cyprus. They will include refugees from Constantinople, Smyrna, Beyrout, and Messina. The Government is making arrangements for their accommodation in different towns. Mr. Bowring, the Treasurer, has been appointed to direct arrangements, and will be aided by an assistant in the several districts.

Kyrenia District Court.

In the Kyrenia district the people are exercised over a rumour that it is in contemplation not to appoint another British President of the District Court. Court work in this pocket district has always been comparatively light, whereas in the large Nicosia district the Court is generally overcharged with cases, with the result that work has often fallen heavily into arrear. The proposal is that an additional judge in the latter division should deal with cases in the Kyrenia Court as circumstances may require, visiting the district from time to time. There are in every district a Greek and a Turkish judge, who deal with certain cases, and who also sit singly as magistrates. The needs of the Nicosia division have long been recognised. So far there is no official announcement. The change here suggested is strongly deprecated by the Greek Press.

Local Opinion on the Offer of Cyprus.

Greek papers comment on the opinions expressed in England regarding the late conditional offer of the island to Greece. One paper states that it has 105 extracts from the British Press of October 23-27. They follow keenly Balkan events, and appear to consider that armed neutrality is not for the best interests of Greece. They comment anxiously on the impotence of the Greek Parliament during a critical period, on party bitterness, and on the fact that the genuine will of the people is not represented. What, it is asked, will be the position of Greece with a powerful and greatly enlarged Bulgaria, and a reinforced and rejuvenated Turkey, by her side? Was not Venizelos right in his view of Greek interests, and of the outlook should German tyranny ultimately prevail? By timely action Greece could have turned the balance. Cypriot Greeks, removed as they are from the heated party animosities that prevail at Athens, have a cool and clear perception of the situation. They trust that all will go well for Greece under the guidance of the King, who has done so much for the glory and enlargement of the country.

NEAR EAST BOOKSHELF.

THE TURN OF THE WHEEL.*

"The net political result of the Balkan wars and the Treaty of Bucharest, so far as the Balkans themselves are concerned, is that they have left an aftermath of wars of 'extermination' and the seeds of future wars of annexation."

Thus the anonymous, unknown author of "Nationalism and War in the Near East," one of the latest contributions to the Carnegie Endowment for International Peace, written before the great European war broke out, but published, together with some characteristic footnotes, long after the aftermath of the Balkan Wars had spread like some diabolic glow throughout the Old World. Much that is contained in the carefully planned volume has an historic interest only, and will serve as a useful, though astonishingly complex, compendium for future students of the Balkan Wars; again, other chapters are of special interest to-day as showing the connection between these wars and the present universal conflagration. That there is such a connection no student of contemporary history will deny, but to trace it to its causes is no easy proposition. Some indications are, however, contained in the book under review, and, therefore, it serves a useful purpose.

As the title of the work indicates, the author has been at some pains to develop the "nationality" forces of the various Balkan peoples working at the expense of the Turkish Empire. These forces are as old as the Near Eastern question itself. Left to themselves, they would doubtless have pursued a course radically opposed to that followed in 1913, but other external forces, both propulsive and restrictive, conscious and unconscious, acted upon them, and conflicts arose, which, after a few months' lull, burst out anew on the battlefields of Flanders, the Trentino, Poland, Albania, Macedonia, Mesopotamia, and the Caucasus. These external forces were "diplomatic"—that is to say, they were defined by the conflicting national aims of the two great groups of Powers interested in the fate of the Ottoman Empire in Europe. The result, if a graphic picture may be drawn, was the harnessing in the Balkans of wild stallions in two opposing teams, with consequences that have latterly proved disastrous to the drivers.

In the space at our disposal it is utterly impossible to do even partial justice to the theories and hypotheses of the author. Both are based on and deducted from historical facts and developments, and must be read carefully by the student of world movements. The average reader will find them confusing rather than concise, and will be lost in their depth of reasoning. This is a pity, because the subject matter treated is of more than usual interest, the more so considering that it touches the mainsprings of the present war. And it is, above all, in connection with the latter that we are here more closely concerned. Besides, we have it on the author's authority that his work was written before the Kaiser threw his glove in the face of Europe, and, this considered, it is surprising how accurately some of "The Diplomatist's" theories have been borne out by happenings. Personally, we are sorry that this should be so, if for no other reason than that it reflects on the judicious (*sic*) reading of events as evidenced by our Foreign Office. Surely what was foreseen by "A Diplomatist" (whoever he may be, and I think I could offer a shrewd guess) might have been foreseen by our own officials in Downing Street, and we should at least have been spared our Canossa in Sofia. That, in the eyes of the author, Bulgaria would perforce drift into the orbit of the Central Powers seems to have been a foregone conclusion—as has turned out to be the case—and it is, therefore, a pity we wasted so much time in persuading her to look through our glasses, thereby creating a certain amount of antagonism in Greece. Admittedly it is easy to be wise after the event, but, though this does not apply to "A Diplomatist," it certainly does not excuse our own Foreign Office for having been blind until the event. If anything, the author of the work under review has pro-Bulgarian sympathies (he certainly knows Sofia better than Belgrade, in which he errs in good, though most misleading, company), but, nevertheless, he is objective enough to understand that the very force of circumstances—more particularly the Dobrudja affair, and the growing friendliness between Turkey and Bulgaria brought about by similar sympathies and interests and a lack of antagonism—would necessarily lead to a reconstruction of Balkan politics, in the course of which Bulgaria would perforce come to an arrangement with the Central Powers whereby it could strengthen its strategic position (a vague term) and complete, or almost complete, the link between Berlin and Constantinople. This has happened; it ought to have been foreseen.

A second point of interest in "Nationalism and War in the Near East" is the clear indication, likewise arising out of force of circumstances, that Turkey would have to throw in her lot with Germany. Here, again, Russian antagonism to Turkish aspirations—or lack of such, for static forces can at times be as inconvenient as dynamic forces—was the guiding principle of Ottoman polity, and the fate that willed closer relationship between Russia and Great Britain willed likewise that Constantinople should look in the direction of Berlin. It may be true, it is true, that Austria and Bulgaria, the former in annexing Bosnia-Herzegovina, and the latter in declaring itself an independent State, were the first to profit by the extinguishing of the Hamidian *régime;* it may be true, and is true, that the next assault on the integrity of the Ottoman Empire was perpetrated by Italy—at the time a member of the Triple Alliance—but this notwithstanding, and notwithstanding the tremendous economic preponderance of France in the Empire, the Sublime Porte turned to the Teuton, the enemy of the Slav, for guidance. This brings us to our starting-point, the turn of the wheel. We have Austria and Bulgaria defying the Turks; we have Bulgaria fighting the Turks; we have the Turks, in collusion with Roumania, taking Adrianople from the Bulgars; and now we have Bulgars and Turks and Austrians fighting side by side. Truly, the top spins, and, spinning, reveals to us motives beyond the pale of diplomatic intrigue and prestige. As regards the latter, it is, or may be, a driving force; it may restrict or impel action to a certain degree, but, on the whole, its power is subordinate to stronger forces. A British Bieberstein at Constantinople or a British Hartwig at Sofia would hardly have altered the trend of Balkan or European politics. The reasons are obvious: Turkey saw, or thought she saw, in the long line from Berlin to Constantinople a safeguard; Bulgaria saw, or thought she saw, in Austro-Turkish backing a chance to dominate the Balkans. No diplomacy, however strong or able, could dissuade them from what was intrinsically a foregone conclusion; only arms can do so, and to arms we have had to recur.

A third point to be referred to is the growth in the Balkans of imperialism out of democracy, or the evolution (some, like the author, might call it degeneration) of nationalism into militarism. In Turkey it had become omnipotent before the war broke out; in Bulgaria it threw the country into the hands of the Court party; in Greece it hurled Venizelos out of power. How far it has evolved in Roumania remains to be seen. Nevertheless, it is curious to note that in Bulgaria, Greece, and Roumania the Court parties are satellites of the Court of Potsdam. In Bulgaria the party has triumphed along the whole line easily, because its ambitions were in accord with the aspirations of the people. In Roumania and Greece ,on the other hand, the parties in question are opposed to the national aspirations, and hence doubtless the hesitation of the past months.

Admittedly some of the above conclusions are not included in the book under review, however much they may have been inspired by comments or hints thrown out by the author. Lord Courtney of Penwith aptly remarks in his preface that the work is "thought-provoking," that it "invites to inquiry and reflection"—above all now that Bulgaria has joined the fray and Greece and Roumania are hesitating whether to do the right thing or not. We may not agree with many of the theories contained in the volume (the democracy thesis as applicable to international pacificism is, we believe, untenable), but, on the other hand, the quotation which introduces this review is characteristic of many others, as shrewd as they are accurate. Take, for instance, the following neat survey of the political result of the Balkan Wars on Europe:—

* "Nationalism and War in the Near East." By A Diplomatist. Edited by Lord Courtney of Penwith. (Clarendon Press. 12s. 6d. net.)

JUST PUBLISHED. Price 21/- net.

CONSTANTINOPLE OLD AND NEW.

By H. G. DWIGHT.

With 190 Illustrations.

The author of this book lived in Constantinople in boyhood and manhood in real intimacy with the people, and the vividness of his early impressions has been supplemented by a deep study of the marked character and significance of the city's associations.

The illustrations, made from the author's own photographs, often taken under circumstances of special privilege, will, it is believed, add greatly to the interest and value of the book.

LONGMANS, GREEN & CO., 39, Paternoster Row, London, E.C.

It has "already caused a heavy addition to the armaments of Germany, France, and Russia. Every slow movement of the Slavonic hordes is met by some swift manœuvre of the Teutonic hosts. Only the restraining influences of the Western Powers can prevent the Balkan Wars infecting European nationalism with the war fever of its younger days." If, in connection with this, it is remembered that "German nationalism, considered as an underlying current too strong and deep to be affected by political distinctions between Austro-Germans and Prusso-Germans, or even by racial differences between north and south, is perhaps the greatest political force now operative," and that "Turkey, having lost Macedonia as an appanage, has gained Bulgaria as an ally," it can readily be understood why the Western Powers could not restrain German nationality, and why Turkey and Bulgaria relied on the latter instead of Western assurances backed by Russian complacence.

C. R.

TANGIER TO TEHERAN.

I see that Charles Neufeld, one time prisoner of the Mahdi, is doing yeoman service to his fatherland by stirring the Arab races to join the enemies of England. At first sight it may seem monstrous that this man, who was relieved from years of captivity by British soldiers, and who, through the long years of his subsequent freedom, has thriven in Egypt, should turn upon his benefactors now; but it must always be remembered that he is a German serving his fatherland in the manner most pleasing to an Emperor who has gone out of his way to show his contempt for the petty things of truth and loyalty. And if it comes to that, there is nothing in the record of Charles Neufeld himself to lead one to suppose that the uncleanness of his present work will lie heavily upon his mind. When Kitchener entered Omdurman, Neufeld was found to be a prisoner heavily shackled, but there were always natives to affirm that he had not borne his burden long. Be that as it may, I know that he was never altogether above suspicion, although he was treated with uniform consideration by Englishmen, both of the Sudan and of Egypt. It is perhaps as well, indeed, that the authorities kept a watchful eye upon him long after the events of the Mahdi's time had been forgotten. A man does not become a reptile in a moment, and Charles Neufeld, slinking about the desert ways stirring the coloured man to revolt, is the meanest of reptiles now. Why he was allowed to leave Egypt, after, we are told, war was declared, I do not know. It is possible that he crept out of the country disguised as a native: that would have been easy. He is certainly not a "white" man.

***

As the war goes on I grow increasingly ashamed of my former acquaintances. Neufeld, Bernstorff, the unspeakable Rustem Bey—what an unholy crew to have shaken by the hand! And last week I saw the name of yet another acquaintance billed for the part of a bandit chief in far Persia—Henry of Reuss, twenty-eighth Prince of his house. I liked the boy when I knew him; he was so full of youth and high spirits. He was a musician, too, of no common attainments. He was travelling with his mother and two sisters when last I saw him; each played a different string instrument, and they sang "My Bonnie" and other well-known old songs in pretty broken English for my benefit. And now they are alien enemies, the four of them, and Henry 28th is busy with sedition in Persia. Truly there are things almost more horrible than bloodshed in the midst of war!

***

According to the *Pall Mall Gazette*, journalists are having a golden time in Roumania, where German patriots are showering wealth upon all writers who agree to support their cause. According to this paper, one lady journalist was offered £4,000 to cease upholding the Allies, while her amanuensis was promised half that sum should she induce her employer to accept the German terms. All newspapers, with three exceptions, are reported to have passed under German control, and as much as £12,000 and a pearl necklace have been offered for one vote for M. Marghiloman. If all this is true, it seems that the Huns must be more than a little uneasy regarding Roumania at the present moment. History does not relate the official attitude of the Allies in this matter. Perhaps they do not regard the Press as an important factor in Roumanian politics. Yet very recently it seemed as if at least one member of our Government was prepared with his last breath to defend the axiom that "the pen is mightier than the sword."

Our withdrawal from Ctesiphon to Koot-el-Amarah is not a subject for us to rejoice over, of course; but neither is it, I think, such a severe setback as the pessimists would have us believe. It was just a bit of bad luck once more; and I, for one, shall wait with confidence for the turn of the tide. For it seems to me that a force which can do what our little Mesopotamian Expeditionary Force has done already is not going to be sat upon for long by any Turco-German combine that was ever engineered, provided only that it receives adequate reinforcements. Mr. Chamberlain's statement on the subject is encouraging, and if our authorities think it necessary to press on to Baghdad, it is unthinkable that the requisite reinforcements will not be forthcoming, both as regards men and guns. The guns are obviously as necessary as the men, since it seems to be clear that the Turks had received very formidable additions to their artillery before the last fight.

***

The German rejoicings over the alleged treachery of the Arabs are—characteristic! The Huns would like nothing better than to think of our suffering as the result of treachery; but whether any considerable body of Arabs did play us false, and, if so, whether their treachery really had any serious effect on the fortunes of the day, we have no means of judging as yet; for, of course, the German reports are merely the offspring of the German wish. And the typical lie about the capture of "several flags amongst the booty," which has been promptly nailed to the counter by our own official announcement ("British troops never take colours into the field"), shows what value may be attached to the Teutonic statements.

***

On the whole, it looks as if the withdrawal, though a distinctly unfortunate necessity, may yet be regarded as one of the finest incidents of the campaign. For General Townshend is able to report that it was carried out in perfect order, and that his troops exhibited great steadiness. In such circumstances that is a fine testimony to the quality of men and officers alike. As to our having had to fall back as far as Koot, that is not at all surprising or distressing, considering that the country possesses no natural features that would provide any good standing place. Koot will do. But even if we find it necessary, or advisable, to fall back still further, we need not join the pessimists. As long as we hold Busreh and the Shatt-el-Arab firmly we can afford to wait. And the Turks and Germans can't. So let us possess our souls in patience.

***

In the Windsor Police Court last week an old soldier who had served under Sir Garnet Wolseley at Tel-el-Kebir, and afterwards with Sir Donald Stewart in the Sudan until 1885, was charged with stealing a coster's barrow. Before his service in Egypt the man had also served through the Afghan War; he held both the Afghan Medal and Star and the Egyptian Medal and Star, and his record was described as a "splendid" one. But the most splendid part of it, it seems to me, lies in the fact that, at the age of 67, he, finding himself still fit to serve his King and country, re-enlisted. Unfortunately, feeling certain qualms, I dare say, as to whether he would pass on the score of age, he took a little too much to drink; and afterwards, being not quite aware of what he was doing, commandeered the coster's barrow, apparently for no good reason at all. Or perhaps he may have taken it to help him get to the recruiting office. At any rate, what does such a small slip matter in the case of a man so emphatically of the type we want just now? After the Chief Constable had said all he could for the game old warrior, the magistrates very sensibly discharged him, expressing the hope that he would go back to his regiment and do good work, as he had done in the past. "I'll have a good try," said the defendant as he left the court. And I am sure all my readers will join me in wishing him the best of luck and a speedy return. What an example to the slackers and shirkers!

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE FUTURE OF CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—In your last issue "A Lover of Cyprus" states that the people (the Greek community *bien entendu*) of the island call out "for other rule." . . . "They think they want union with Greece, but they don't know what they want." He proceeds to enlighten them. His explanation seems somewhat vague, but he tells them, as I take it, that they want more "self-control," *i.e.*, home rule, or self government under the British flag, similar to that of our great Dominions of Canada, Australia, New Zealand, and South Africa.

Your correspondent has not, I think, grasped the situation. It is perfectly clear, and can be stated in a few words. Of the Greek population (of about 220,000) the rural classes, which form the great majority, are completely satisfied with British rule. They only want to cultivate their lands under a just and stable Government, and have no taste for politics. In the towns there is a party, headed by the Greek Archbishop and members of the Legislative Council, which clamours for union with Greece. It affects to speak for the whole Greek community; and through the press, the village schoolmasters, and by other means it endeavours to make the people follow its "patriotic" lead. This is the "other control" which they desire.

This Greek movement is a local manifestation of the Hellenic, or "national," idea, which aims at the progressive consolidation and expansion of the scattered Hellenic kingdom, and which inspires Greeks in all countries where they congregate. It is perfectly natural and proper, and no Englishman has reason to quarrel with it, provided it is held consistently with loyalty where loyalty is due. Its aspirations now include the hope that, as the Ionian islands and the "heroic sister" Crete have been united with the "Mother Country," so in its turn Cyprus may be similarly incorporated.

Your correspondent says that "they want power to express their national sentiment." Perhaps he is not aware that there is in Cyprus full liberty of the press, and that a large number of Greek papers give weekly, and profuse, expression to the views and aspirations referred to.

The Turkish community (about 60,000) is entirely opposed to this Greek agitation. They, too, have their feelings and claims; but they have always loyally accepted the situation which a convention with their Sultan brought about. They have frequently, and even since the annexation last year, expressed their appreciation of the benefits secured by British rule.

The opinion of "a leading Turk," which your correspondent quotes, is, to my knowledge, shared by many others. Turks in general would no doubt prefer independent Ottoman rule to any other (genuine reforms being at the same time advocated by all their best men); but if they cannot have this, they would much prefer British suzerainty to any other.—I am, etc.,

December 6, 1915. CRITIC.

PESSIMISM.

To the Editor of THE NEAR EAST.

Sir,—Cassandra is abroad in the persons of certain newspaper men and armchair critics, who ignore the late Lord Salisbury's advice to "study small-scale maps." There is really no excuse whatever for the pessimistic note which resounds in our Press and clubs. Everyone will admit that Napoleon knew something of military science, yet he pronounced campaigning to be a "series of mistakes," and added that "the general won who made the fewest." Let us try to establish a balance-sheet as between the Allies and the Central Powers. The Allies neglected ample warnings of a coming cataclysm, were absorbed in domestic squabbles, while a vast plot against their existence was being engineered. Of their diplomacy in the Near East the less said the better. This western campaign, after the battle of the Marne, became a deadlock owing to lack of munitions, men, and intelligent staff work. They have blundered badly in East Africa, the Dardanelles, Mesopotamia, and Serbia.

This seems a formidable list of indictments, especially when the credit side is ignored. But let us glance at the enemy's position. He plunged into war without any sound knowledge of the internal condition of our Empire and those of our Allies. He has waged it with a degree of savagery which excites horror and indignation throughout the civilised world. His inconceivably base intrigues in neutral countries have effected little in comparison with the pains and money expended in maturing them. His strategy contemplated the reduction of Paris and Petrograd, an invasion of England, the slow destruction of her naval power by attrition, that of her commerce by submarine attack, and the terrorisation of her people by aerial raids. In one and all of these aims the enemy has miserably failed, and his recent adventure in Serbia resembles the mad struggles of a wild beast against the meshes of a net from which there is no escape. His industry and commerce are being strangled by superior sea-power, his asylums are packed with women, driven mad by bereavements and starvation.

Contrasting our plight with that of Germany, we may well take heart of grace, and realise that no momentary setback can long postpone the doom so richly merited by her crimes. —I am, etc.,

SIGMA.

December 8.

HOSPITAL EXPERIENCES IN SERBIA.

Speaking last Tuesday in the hall of the New Constitutional Society for Woman Suffrage, Miss Ruby Logan gave an account of her experiences in Serbia last summer. A large building in Belgrade, originally a school, was placed at the disposal of the hospital unit, of which she was a member. It had to be got ready, and application was made to the Government for assistance, which led to a number of gypsy women being sent. Miss Logan said these were the most beautiful women she ever saw, but oddly dressed; one, for instance, wore a full white muslin dress trimmed with green ribbon. It was a question whether the English staff would not have been better without the assistance; for, apart from all the difficulties of language, the gypsies were extremely lazy. On one occasion when Miss Logan was busy polishing a window in a room where two of them were working with her, she noticed a strange quiet, and, turning round, found they had coiled themselves up in bed and gone to sleep. The orderlies at the hospital were Austrian prisoners, mostly weak from the effects of typhoid; an Austrian doctor told her that of one band of two thousand prisoners one-half had died from this dread disease. So many prisoners escaped by swimming across the river that the Serbian Government removed the others further into the country. Some of those who had been employed in the hospital wept at leaving the English people with whom they had been associated, and Miss Logan said that when she reflected that these were her enemies, the fact did more to bring home to her the extreme stupidity of war than any other of her experiences. The Serbians she described as an extremely charming people, and very grateful for what was done for them.

THE HISTORY OF THE EASTERN QUESTION.

Speaking last Thursday at King's College, Dr. Seton-Watson said that the Eastern question, in one form or another, dated from many centuries back. The arrival of the Turks in Europe gave it a new form, and it was only with the decline of the Ottoman Empire that it entered on the phase which led inevitably to the cataclysm of 1912 and the far greater cataclysm of 1914. The year 1571 might be considered as the one which saw the top of the Turkish wave. In that year the fall of Cyprus into their hands was the last of an unbroken series of conquests, but in the same year was fought the battle of Lepanto, which destroyed their naval power in the Mediterranean. In the following century they conquered other territory, and even appeared in 1683 before the gates of Vienna; but the Ottoman decline had already set in. That decline had been very prolonged, lasting over centuries. This fact was partly due to the "sick man's" powers of resistance—these had always been underestimated, and apparently were so to-day—partly it was due to the mutual mistrust and animosities of Christian States. At the time of the Reformation Protestant Powers leagued with the Turks, regarding Islam as a less deadly enemy than the Papacy; and subsequently there grew up the rivalry between Austria and Russia.

PERSONAL & SOCIAL.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (New Style.)	—	Moslem.	Jewish.
1915.	1915.		1334.	5676.
Dec.	Nov.		Safar.	Tebet.
10	27	Friday	2	3
11	28	Saturday.....	3	4
12	29	Sunday	4	5
13	30	Monday	5	6
	Dec.	Tuesday	6	7
14	1			
15	2	Wednesday	7	8
16	3	Thursday	8	9

Monday is the birthday of Princess Marina of Greece, second daughter of Prince Nicholas, who was born at Athens in 1906.

Tuesday is the birthday of H.R.H. Prince Albert.

Tuesday is also the birthday of H.R.H. Prince Paul of Greece, third son of King Constantine, who was born at Athens in 1901.

Next Friday is the birthday of H.R.H. Prince Alexander of Serbia, who was born at Cettinje in 1888.

Earl and Countess Brassey left London on Saturday for Egypt.

Lady Hamilton Lang left London on Monday for New York, where she will join her daughter, whose husband, Paymaster B. D. Rogers, of the U.S. Navy, has died in Hayti Island.

King Ferdinand of Bulgaria visited Nish on Saturday.

H.E. the Hellenic Minister called at the Foreign Office last Saturday evening after the usual diplomatic visitors had left.

Last Friday, at 67, West Cromwell Road, the wife of Mr. Reginald Massie Graves, of the Egyptian Ministry of the Interior, gave birth to a daughter.

On Wednesday of last week (December 1) at 40, Hauteville, Guernsey, the wife of Mr. T. J. Morris, of the Sudan Civil Service, gave birth to a son.

An engagement is announced between Captain Henry Somerset Wright, 2nd Manchester Regiment, now in the Egyptian Army, eldest son of Mr. and Mrs. Wright, of the Mardyke House, Cork, and Fern Hill, Clonakilty, Ireland, and Edith May, eldest daughter of the late Mr. Luke Hansard and Mrs. Hansard, of 27, Gledhow Gardens, South Kensington.

We regret to learn of the death of Comtesse Elizabethe de Zogheb, wife of Comte Michel Antoine de Zogheb, daughter of General Caspar Crowninshield, of Boston, Mass., which took place on November 28, at 19, Bruton Street, Berkeley Square.

The death of Sir George Francis Coventry Pocock took place at Ryde on Monday. Born in 1830, he served with the 30th Regiment in Bulgaria in 1854 and in the siege and fall of Sevastopol in the following year, when he was twice severely wounded, losing his left arm. He was mentioned in despatches, and received his brevet of major and the Order of the Medjidieh, 5th Class. He succeeded his father, the second baronet, in 1866; was twice married.

Last Sunday afternoon, in Theberton Church, the Archdeacon of Suffolk dedicated a stained-glass window to the memory of Lieutenant-Colonel Doughty Wylie, V.C., C.B., C.M.G., Royal Welch Fusiliers, who fell at Sedd el Bahr on April 25.

Major the Hon. Algernon Hanbury-Tracy, C.M.G., whose death from heart failure took place last Friday, was the second son of Lord Sudeley. In the Somaliland Campaign of 1901 he was attached to the Abyssinian Army. He served also on the Uganda Expedition, and in the South African War. In all these campaigns he was mentioned in despatches.

Colonel John Gerald Panton, C.M.G., late Royal Sussex Regiment and A.Q.M.G. West Lancashire Division, who died on Tuesday at a nursing home of heart failure after an operation, commanded the British troops in Crete during the rising of 1905, and for this service was made a C.M.G

Mr. William James Garnett, whose promotion to be a First Secretary in the Diplomatic Service is announced, was nominated an Attaché in 1902 and has served in Constantinople, Bucharest, and Teheran amongst other places. We understand that he was attached to the Legation in Sofia before war broke out with Bulgaria.

The Hon. John Francis Amherst Cecil, whose appointment as a Third Secretary in the Diplomatic Service is announced in the *London Gazette*, entered the service in 1913 and was appointed to Cairo in October of that year.

Mr. R. J. V. Astell, who is appointed a Third Secretary in the Diplomatic Service, entered the service in 1913. His first appointment was to Lisbon, whence he was transferred to Berlin. On the outbreak of war with Germany he was employed in the Foreign Office till September of last year, when he was appointed to Constantinople. He left Constantinople just before our declaration of war on Turkey, and has been employed at the Foreign Office since November, 1914.

Temporary Lieutenant H. Pirie-Gordon, D.S.C., R.N.V.R., has been promoted to the rank of Temporary Lieutenant-Commander.

The Press Bureau on Wednesday issued the following statement:—"Official report has been received to the effect that Captain Stanley Wilson, M.P., has been made a prisoner of war, while conveying letters from the Eastern Mediterranean to London. He was travelling in a Greek steamer, which was stopped by an Austrian submarine. It has been ascertained that none of the papers taken from him were of importance."

According to other reports, the Greek steamer referred to was the Spetzai, which was bound from the Piræus to Messina; and in addition to Captain Wilson, Colonel Napier, C.M.G., formerly Military Attaché at Sofia, was also arrested. Another English officer, belonging to the Red Cross, was allowed to remain on board.

Lieutenant-Colonel Napier, who is the third son of Baron Napier of Magdala by his second marriage, was born in 1864, had served in the Indian Army, and had been Military Attaché at Petrograd and Teheran before being appointed to Sofia. Captain A. S. Wilson is M.P. for Holderness, and a director of the Wilson Line.

Sir Edwin Pears distributed the prizes to pupils of the County Secondary School for Girls, Clapham Common, on Tuesday.

Mr. H. L. Andrews, who lately returned to London from Sofia, has now left England for Moscow, where he will take up an appointment pending an opportunity of returning to Bulgaria.

News has been received in England, through the good offices of the United States Ambassador in Constantinople, that Mr. E. G. Hensman, formerly of Olivet House Hotel, Jerusalem, who was amongst the British subjects interned at Urfa, was quite well at the time the message was despatched (apparently about the middle of November).

Since the above message was received the Foreign Office has been informed by the United States Ambassador that, in consequence of representations made by the United States Ambassador at Constantinople to the Turkish Government, the latter promised that the civilians interned at Urfa should be sent at once to Aintab, where it is hoped that the conditions of internment will be better, and where the American missionaries have been requested to give them such help as is possible.

Herr Karl Buenz, who has just been condemned in America to eighteen months' imprisonment for breaches of neutrality, was at one time—about four or five years ago—German Delegate on the Ottoman Public Debt Council.

M. David Mitrany will lecture, under the auspices of the Conservative and Unionist Women's Franchise Association, on "Roumanian Foreign Politics under the Hohenzollern Dynasty, 1866-1915," at 7, Grosvenor Crescent, London (by kind permission of Mrs. Worthington Evans), on Tuesday next at 3.30 p.m. A collection will be taken for the Prisoners of War Fund, which will be handed over to Mrs. Evelyn Grant-Duff at Berne.

"The War in Mesopotamia" will be the subject of a lecture to be delivered on January 12 next by Dr. L. W. King. Dr. King is a professor of King's College and is a great authority on Babylonia and Assyria. He is the author of a history of Babylonia, and is one of the chief assistants in the Assyrian Department of the British Museum.

Another lecture of especial interest to our readers will be on "The War in the Near East." This will be delivered on January 26 and will be by Dr. Burrows, Principal of King's College. The two lectures will be part of a course of nine to be delivered at King's College on Wednesdays at 5.15 p.m. Admission to the course will be free by ticket to be obtained on application.

At a meeting of the British Red Cross Society and the Order of St. John of Jerusalem in England, which was held at the Royal Automobile Club on Wednesday afternoon, the Hon. Arthur Stanley, M.P., presiding, contributions to "Our Day" amounting to £800,000 were announced. A vote of thanks to Egypt was carried, on the motion of Lord Ranfurly, seconded by Sir William Garstin. The latter said that Egypt had contributed nearly one-third of the total amount collected oversea for "Our Day," and it was certain that a large proportion of the money had been subscribed by the Mohammedan people of the country.

At the request of the military authorities the Y.M.C.A. representatives in Egypt have opened recreation tents on the Gallipoli Peninsula and the adjacent islands. At least ten huts are required immediately. The work is being carried on in co-operation with the chaplains, who have asked for pianos, camp song books, sheet music, and a cinema. Those interested are invited to communicate with the Countess of Chesterfield, Scudamore House, Regent's Park.

The British colony in Paris held a reception on Wednesday as a manifestation of sympathy for Serbia. M. Vesnitch, the Serbian Minister in Paris presided. A lantern lecture on life in Serbia was given by Mr. Barrett Braid. The proceeds will be handed over to Serbian charities.

The Hon. Mrs. Lionel Guest is collecting gramophones and records, puzzles, magazines, books and woollen comforts for the hospital ships coming from the Dardanelles, and would be most grateful for any contributions in kind or money sent to her at 44, Seymour Street, London, W.

Workrooms have been opened at No. 10, Cheyne Walk, Chelsea, by Mrs. Reginald Ward Poole (in connection with the Serbian Relief Fund), for making and supplying hospital requisites for the wounded in Serbia. Ladies are invited to come on any day, except Saturday, to help in the work, between the hours of 10 and 1 and 2 and 6.

Digitized by Google

Miss Maisie Dundas, whose marriage with Mr. Hugo Houstoun has just been celebrated at St. Paul's, Knightsbridge, is a niece of Lord Lamington, who gave her away at the ceremony. Princess Marie Louise of Schleswig Holstein was among the guests, who quite filled the church. The Dowager Lady Lamington, the bride's grandmother, who is over ninety, and who has great-great-grandchildren, came with her daughter-in-law, Lady Lamington, and Violet Lady Melville.

Lady Grogan, who is a representative of the Central Serbia Relief Committee in London, and Lady Young were speakers at an afternoon tea given in the Town Hall, Maidenhead, last week in aid of the Serbia Relief Fund. The total realized during the day amounted to over £70.

A telegram from Geneva states that Prince Fuad, a cousin of the Sultan of Egypt, has arrived at Geneva on his way to England.

In aid of the Serbian Relief Fund, which provides food and necessaries for the starving and homeless Serbian women and children, and of which the Queen is the patroness, a Slav concert, consisting of Polish, Czech, Russian, and Serbian music, will be given in the Queen's Hall, on the 15th inst., at five o'clock. M. Safonoff, M. Mlynarski, and Mr. Thomas Beecham will conduct the London Symphony Orchestra. Mmes. D'Alvarez and L. Perelli, MM. V. Rosing, L. Strokoff, Benno Moiseivitch, and J. Bonell are to be the soloists. Some Russian sacred music will be performed for the first time in England by a choral society of 200 performers.

Amongst other payments which the Government of New South Wales has authorized the Hon. B. R. Wise, K.C., Agent-General for the State in London, to make from the collection in New South Wales on "Allies Day," November 19, are a sum of £3,000 to the Serbian Relief Fund and a sum of £1,000 to Lady Roper Parkington for the relief of distress in Montenegro.

Information has been received that a sum of £1,500 sent out by the Agricultural Relief Committee for Serbian peasants has been prevented from falling into the hands of the enemy, and will be distributed later.

According to the latest information received in Anglo-Persian quarters, the British Consul at Shiraz and the other Englishmen who were arrested there on November 10 are, says Reuter, still at Borasjun, where they are being well treated.

Early last week a steamer, in which the Y.M.C.A. had taken space for 300 tons of goods for the troops in Gallipoli, left Swansea. That portion of her cargo the gift of the Association consists of such delicacies as sardines, soup tablets, tinned soups, meat essences, tinned salmon, curry powder, dried fruits, figs, cornflour, porridge, and boiled sweets. In addition there are pipes, matches, hair clippers, and mouth-organs, Dutch ovens, stationery, pencils and pens, puzzles, and table games. The Association have also sent out three large marquees and two huts, with complete canteen equipment for each. All these good things should reach the men in about ten days' time.

Local Serbians, a Johannesburg telegram states, are joining the Union Contingent for service overseas.

At the "Christmas in War Time" bazaar at the Albert Hall the Serbian Committee, over which Mrs. Carrington Wilde presides, is endeavouring to present Serbia in miniature to the visitors, and decorations to maintain the illusion have been completed by the Serbian artist, M. Radovaric. In addition there is an exhibition of native Serbian work, including embroideries and costumes, lent by Mme. Vesnitch and Lady Whitehead. A *café chantant* is included in this section, and MM. Ounuraff, Rosing, and Kalmàn Ronay, and Mme. Coupland contribute towards the programme.

A meeting was held at the Town Hall, Liverpool, on Tuesday, on the question of the Armenian refugees. The meeting was addressed by the Lord Mayor, Mr. T. P. O'Connor, M.P., Sir Edward Russell, the Bishop of Liverpool, and Archbishop Whiteside.

A memorial service for Major the Hon. Sir Schomberg McDonnell was held on Tuesday at Holy Trinity, Prince Consort Road. The Bishop of London, Canon Edgar Sheppard, and the Rev. H. B. Coward (the vicar) officiated. The King and Queen were represented by the Hon. Sir Derek Keppel, Queen Alexandra by Colonel Streatfeild, Grenadier Guards, and the Duke of Connaught by Major Malcolm Murray. Lady McDonnell was unable to attend owing to indisposition.

The London correspondent of the *Manchester Guardian* says:—The attitude of the King and Government of Greece may be dubious, but there has never been any doubt about the sympathy of the mass of Greeks in or out of Greece with the Allied cause. I am told that yesterday the Greek community in London placed orders for nine fully equipped ambulances of the Army standard, which are to be presented to the British Government for use with our Army in the Balkans. The London Greeks, many of whom are well-to-do merchants, have been generous donors to our war funds. The Ambulance Fund is being well supported, over £6,000 having been given already. Many Greeks here were born in England. The only son of M. Grannocopulo, the treasurer of the Hellenic community, is a lieutenant serving at the Dardanelles, and Lieutenant Rodocananchi has won the Military Cross.

In the House of Commons on Wednesday the Chancellor of the Exchequer replied in the negative to a question by Mr. R. M'Neill as to whether Sir Ernest Cassel represented the Treasury directly or indirectly, or acted in any capacity on behalf of the Government, in the recent negotiations for a loan in the United States.

APPOINTMENTS, PROMOTIONS, Etc.

The Serbian Legation here announces that Dr. Ninchitch, deputy, and formerly professor at the University of Belgrade, has been appointed Minister of Finance in place of the late Dr. Lazar Pachou.

The *Gazette* announces that the King has been pleased to appoint Major Hugh Stewart, C.I.E., to be his Majesty's Consul at Muskat.

Dr. F. M. Sandwith, Gresham Professor of Physic and Senior Physician to the London School of Tropical Medicine, has been appointed Consulting Physician with his Majesty's troops in the Mediterranean, and is leaving shortly for Egypt. Dr. Sandwith for many years held the appointment of Professor of Medicine at the Egyptian Government Medical School.

A Cyprus correspondent writes:—The new Hellenic Consul, M. Paraskevopoulos, is well spoken of. The retiring Consul, M. Lambros Enyáles, carries with him the esteem of the Greek community.

BACK NUMBER OF "NEAR EAST."—Advertiser wishes to purchase copy of THE NEAR EAST, dated September 6, 1911, to complete Volume I.—Communications, stating price wanted, to A. S. M., THE NEAR EAST Offices.

SECOND THOUGHTS.

Two points of importance emerge from the speech delivered last week in the Italian Chamber of Deputies by Baron Sonnino, the Minister for Foreign Affairs. In the first place he made the welcome announcement that Italy had formally entered into the agreement signed by Great Britain, France, Russia, and Japan, according to the terms of which the five Governments mutually engage not to conclude peace separately during the present war, and undertake that, when terms of peace come to be discussed, no one of the Allies will demand conditions of peace without the previous agreement of each of the other Allies. The latter clause of the Pact is especially notable, for it ought to go far to obviate ill-considered arrangements which in a comprehensive treaty are liable to make their appearance in the regulation of minor matters. Baron Sonnino then proceeded to outline Italian policy in regard to Serbia and Albania, and thus touched upon a subject which must figure among the conditions of peace. In passing it may be mentioned that the point made in these pages last week that, if the Allies intended to help the unfortunate Serbians who were making their way through Montenegro and Albania to the Adriatic, they must depute Italy to act on their behalf, was met by Baron Sonnino. We welcome his assurance that Italy could not remain deaf to the heartrending appeal that was coming across the Adriatic, and "she would speedily do what was in her power to bring help to the Serbian Army, ensuring, in agreement with her Allies, its revictualling and ammunitioning, and facilitating its concentration." On the question of general policy Baron Sonnino stated that the political and economic independence of Serbia had always been one of the pivots of Italian policy in the Balkans, and was vitally essential to Italy's existence as a Great Power. The political and economic absorption of Serbia by Austria-Hungary would present a grave and constant danger for Italy, and for that reason "she had laid down, in agreement with her Allies, as the irreducible outcome of the present great war, the restoration of the heroic Serbian people in the plenitude of its independence."

Italy's adhesion to the Allies' Pact and the fact that the Minister for Foreign Affairs in making the announcement chose to discuss Italian policy in regard to Serbia will tempt those who are interested in the welfare of the Balkans to look for special significance in the coincidence. It has been no secret that the appearance of Italy on the side of the Triple Entente brought little satisfaction at the time to Serbia, as it was understood that Italy's support had had to be purchased at Serbia's expense. The details of the agreement between Italy and the other Powers of the Entente have not been made public, but it has been generally accepted that the promises made to Italy in regard to the Dalmatian coast involved the disappointment of Serbian hopes. Serbia at one time had every right to contrast the favoured treatment of Italy with the absence of any definite assurances that her own claims in the direction of Croatia and Slavonia would be recognised. At a critical stage in Balkan affairs there can be little doubt that the grievance felt in Serbia over this very point played its part in the reluctance of the Government to make the sacrifices required of it in the interests of Balkan unity. In the past the Italians have shown an inclination to misunderstand the situation on the east of the Adriatic. They have been distrustful of the Slav, and have been too ready to subscribe to the Austro-Hungarian belief that he ought as far as possible to be squeezed out of existence. The war has revealed the fact that there are worse enemies for the Italians than the Southern Slavs, and that failure on the part of Italy to arrive at an understanding with the latter is likely to benefit the enemies of both. Baron Sonnino's remarks, it is to be hoped, indicate an appreciation of this fact on the part of the Italian Government. We should like to think, moreover, that when the time comes for the consideration of conditions of peace it will be realized that the preliminary agreement arrived at between Italy and the Triple Entente has been vitiated by the course of events, and will need to be revised in the light of a fuller knowledge of the Balkan and Southern Slav questions. There would have been more cause for optimism if Baron Sonnino had been less emphatic on the subject of "the traditional policy of Italy in regard to Albania." A matter of very great importance for Italy, he said, was the maintenance of the independence of the Albanian people, whose well-marked and ancient nationality had been vainly disputed and denied for an interested motive. It is difficult to reconcile this description of the Albanians with the records of the warring tribes inhabiting Albania, and many people will have expected to find Italy, while strengthening her hold on the Adriatic as a whole, willing to abandon her former designs on Albania, which were launched as a necessary counterpoise to Austro-Hungarian aggression.

If Italy intends to relax none of her claims on Albania, Baron Sonnino's remarks may have contained no message of hope to the Serbians in regard to the Dalmatian coast. In that case their cynicism, in view of the circumstances in which they were spoken, would be unworthy of one of Italy's leading statesmen. Conditions of peace, which require the previous agreement of each of the other Allies, can hardly leave room for a violation of the very principle for which the Quintuple Entente are fighting. The fact that Italy has delayed so long to notify her adherence to the Pact helps the belief that she has required time to adjust her views to the experience gained from the war. In another sphere also the Allies have an opportunity to vindicate the wisdom of allowing free play to second thoughts. Among the mistakes which have contributed to the failure of the Allies' diplomacy in the Near East must be reckoned M. Sazonof's premature insistence upon Russia's claim to Constantinople and to the control of the waterway connecting the Black Sea and the Ægean. The conviction that Great Britain and Russia had come to a hard and fast agreement on this subject inevitably caused more than one Balkan State to doubt the wisdom of throwing in its lot with the Triple Entente. At the same time it tended to stiffen the resolve of the Turks in a war which they had entered upon unwillingly. Suspicion would be disarmed and the ground cut away from under some German intrigues, if it could be made known that the future of Constantinople and the Straits was still an open question, and would only be settled after due consideration of all the interests concerned. It is not necessary to share the misgivings entertained in some quarters over the fate of Constantinople in order to recognize that the cause of the Allies would gain, if it were known that no vexed question arising out of the war was to be settled by premature agreements, but that all points at issue would be the subject of careful and well-informed deliberation before final decisions on them were reached.

AN ENGLISHWOMAN IN EGYPT.

WAR TIME IMPRESSIONS.

(From a Correspondent.)

Cairo, November 19.

The return of the Residency and of the Sultanic Court to Cairo and the race meeting at Gezira last week remind us that we are now launched on another winter season. The summer has gone by quickly and pleasantly. The majority of Englishwomen who came out last winter have remained right through, and are none the worse for it. For many of us it has been quite a unique experience, and one which has turned out to be by no means unpleasant or trying.

How often have we dreaded a summer in Egypt; and if perchance a hot spell set in before the date fixed for our departure, how wearily have we counted the days to the sailing of our boat! The reason we have "survived" this summer so well is undoubtedly because we have had healthy and interesting occupation. Instead of the endless list of season fixtures which, closely following and often overlapping one another, used to weary and distress although they certainly fascinated us, we have all devoted our time to service to our country, some by actively helping in the hospitals, some by assisting to entertain and distract our gallant wounded, some by working to alleviate in one way or another the lot of those who have been sent here to be cured or of those who are still fighting on that terrible Gallipoli Peninsula, where so many of our personal friends have found their grave. It has been hard work, but none the less congenial and satisfying; for we have felt and seen that our efforts were fruitful and appreciated. Therein lies the secret of our present fitness, in spite of this radical departure from an ingrained habit.

It has often been said—and the assertion has as often been decried—that the reason we women of Anglo-Egypt always find it necessary to migrate north in spring is that the season's gaieties have run us down too much for us to stand the summer heat; and that if we had more healthful and intellectual occupation we should be the better in body as well as in mind, and so be able to resist the rigours of the climate. I dare now to hazard a forecast that, just as this terrible war will at its close show a greater levelling up of classes and introduce many welcome social improvements, so in years to come we shall find that there will be less tendency on the part of Englishwomen in Egypt to rush home at the first hint of the hot weather. Most of us had not known what a summer on the banks of the Nile meant, or, if we had, we had forgotten what it was like. *C'est le premier pas qui coûte!* We have now experienced it; we find its bark is far, far worse than its bite; in fact, we rather like it, and we shall not be in such a hurry in future to forsake Egypt at the close of the winter season. So that this war will not have been without its lesson even to us Englishwomen in Egypt.

Throughout the coming winter we shall be hard at it, carrying on the work that has fallen to our lot ever since this year began. To all appearances our assistance will be required in one way or another; for no matter how the tide of battle rolls in the Balkans, Egypt will for more reasons than one continue to be the hospital centre for the Mediterranean Expeditionary Force. Of "season," as we have known it in the piping times of peace, there will be none. No one expects any tourists, except a few Anglo-Indians on their way to and from the Far East. A familiar touch may still, however, be seen at any time in the day in a short walk past Shepheard's and the Continental—the only two hotels that have remained open—where dragomans and hawkers of "genuine" Egyptian articles (mostly manufactured in Birmingham) throng as thickly as ever, attracted by the soldier element, which is immoderately free with its money and is proving a source of much profit to the Mouski dealers, who are inclined little to regret the ordinary winter visitors. Social intercourse will, of course, remain at its lowest ebb. We shall, as before, dine occasionally and quietly at one of the hotels to speed some parting soldier friends; on our "afternoons off" we shall fly to Gezira for golf and tennis, which are the things we miss more than anything else in the new circumstances of our daily life; we may perchance steal away to a race meeting; and now and again there will be other distractions, such as a concert or a variety show. But for the most part we shall, we sincerely hope, be busy where our hearts undoubtedly are—amongst the lads who are so nobly maintaining the prestige of our race and whom we all love, as much as their officers admire them, for the combination of manly qualities and childlike simplicity which they ever display.

What I wrote on my return from England last October applies equally well to-day to the state of affairs in Egypt. Outwardly Cairo has changed but little from what it is in an ordinary year. Of course, we miss more of the old faces every day, and the share of the work falling to those of our men-folk who cannot be spared has become proportionately greater; but generally speaking things have continued just as if no war was being waged. Even at the height of the "invasion" period there was nothing to denote that an enemy was at our gate, and at no time have we had any cause to feel anxious as to the state of feeling in the country. Indeed, it has been remarkable how the ordinary routine and interior administration of the country have persevered along the same lines as of old, and were it not for the motor-ambulances whizzing along with their loads of wounded and sick, the increased number of cars and buggies with "red-tabs" inside, and the crowds of "Tommies" in the streets, we should not know from outward appearances that any unusual state of affairs existed.

There has never been any want of provisions or ordinary commodities; to be sure, prices have risen somewhat, but the tradespeople have throughout been able to replenish their stocks or meet most of our needs without difficulty. We are inclined to grumble and growl about delays when such occur, but they have never been very great, and our mails have with but few exceptions arrived with a regularity that has conduced to the impression that the world was following its normal course of existence. The fact that, broadly speaking, life in Egypt has continued just as it was eighteen months ago, and that we have little felt the pinch or pressure of war, is surely the greatest tribute that could be found to the efficient manner in which our Navy holds and guards the high seas. The British public is too apt to overlook the part played by "Jack Tar," for the very simple reason that he rarely obtrudes himself on its attention; but those who are stationed as we are at the outposts of the Empire can appreciate better than anyone else what our sailors have done in their characteristically silent but thorough fashion, and we cordially subscribe to Rudyard Kipling's form of grace: "For what we are about to receive, thank God and the British Navy!"

Periodically we hear from home that people cannot realise that we are holding our own and must win through in the end, and that a despondent spirit is abroad. We out here cannot understand this. Perhaps it is because we are differently situated, and see more of the actual facts. At any rate, I can say this: we are all optimists. We cannot be otherwise. First, the climate conduces to that state of mind. And then there are our boys, the gallant lads who are keenly awaiting marching orders, or who have received their "knock" and are recruiting their strength or healing their wounds. The spirit among them is wonderful, and truly shames one's fears of failure or defeat. The women of England have ever had cause to feel proud of their men, and those to whom the Gallipoli contingents belong may justly carry on that tradition; for though the expedition has so far failed in attaining its objective, it has shown that the old indomitable courageous spirit of the British is as prevalent as ever.

I shall never forget the impression I obtained when the first batch of wounded from Gallipoli arrived at the hospital at which I was working. Not a murmur, not a grumble, not a protest from even the more grievously hurt as they lay about in the most uncomfortable positions, waiting to be checked off and admitted. One's heart bled for these poor fellows, but one felt indescribably proud that such were one's fellow-countrymen. The same applies without exception to all the thousands—Regulars, Colonials, "Terriers," and the New Army—who have since come to Egypt from the Peninsula. Every man-Jack of them exhibited the same hope, determination, and sure confidence in the result, despite the circumstances which might reasonably have been expected to have daunted their courage and broken their spirit. We who have had the privilege—I use that word advisedly—to work amongst and with the men who are fighting on the Gallipoli Peninsula can send a message of hope and comfort to those of our fellow-countrywomen at home less fortunately placed to judge, and can tell them that with a spirit such as that which these men have revealed the British nation need never fear for the result of any aggression on the Empire.

THE WAR IN THE BALKANS.

THE LACK OF A POLICY.

The veil which has been skilfully thrown over the military operations in the Balkans continues to impose a regrettable silence on those who would wish to comment on happenings as they occur. Serbian official communiqués, for reasons obvious to everyone, are conspicuous by their absence, those of the Anglo-French armies are laconic in the highest degree, and as for enemy reports, though verbose, they are not to be relied upon.

The Fall of Monastir.

As was to have been foreseen, the enemy forces captured the town towards the latter part of last week, though formal possession was only taken on Tuesday, the German, Austrian, and Bulgarian flags waving simultaneously over the fallen town. Happily, Colonel Vassitch, whose reputation as a skilful, daring, and obstinate leader has increased a hundredfold, was able to extricate the remnants of his army from the city before it was surrounded, and, instead of retreating southwards into Greece, withdrew westwards in the direction of Ochrida and the Albanian frontier, pursued by detachments of the enemy as far as Resna. Here strong positions were occupied by the Serbs, who could have held out some considerable time had it not been for the advance from the north of a second enemy force, which attempted to cut off Colonel Vassitch's retreat into Albania. Holding on to his position as long as possible, the Serbian commander finally continued his perilous march to the lake of Ochrida, skirted it on the east and north, and continued to Struga, from whence either Albania or Epirus can be easily reached. An unconfirmed report states that a part of Colonel Vassitch's forces retreated into Greece, and from there joined the Allies in South-Eastern Serbia, but we see no reason to place too much faith in the report.

Though the fall of Struga has not been announced, it is quite possible that it has already been captured. The latest official communiqué concerning operations in South-Western Serbia is a Bulgarian statement published in Sofia on Sunday. We reproduce it for what it is worth:—

Sunday.—A column advancing north of Monastir across Smilevo towards the road between Monastir and Resna defeated the Serbians after severe fighting at the Bigla Mountains, and occupied the town of Resna. A column advancing north of Monastir from Kitchevo to Ochrida captured, after a bitter resistance, a strongly fortified position near the villages of Medovo and Mramortze, and is now marching towards Ochrida. A column advancing from Kitchevo towards Dibra, after a sanguinary battle, defeated the Serbians at the watershed which follows the ridges of the Jama Mountains, and occupied towards noon Dibra, from which place our troops are pursuing the enemy in the direction of Struga.

The Vardar Section.

With the possible exception of fighting still going on in and around Struga, the whole of Serbia, exclusive of the lines held by the Anglo-French forces, is in enemy hands, and, from a military point of view, therefore, the country offers no immediate interest, whatever its strategic rôle may be in the future.

This, naturally, does not apply to the Vardar sector, where we are maintaining our hold in the extreme south-western corner of Serbia. The British position is to the north and north-west of Lake Doiran, and extends to the Vardar River, where it links up with the left of the French line, which continues northwards along the Vardar to a point which cannot be accurately determined

The first serious Bulgarian attack against the British line appears to have been made last Friday, says the *Times* in its able summary yesterday. It seems to have had no very definite result. "There are no statements as to what happened on Saturday and Sunday. The Bulgarians were again heard of on Monday, when, from points south of Strumnitza, they bombarded the entire British line. The bombardment was followed by an infantry attack, which the British repulsed. On Tuesday the conflict was resumed, but the public know no details of its character, except the single statement that the British casualties were slight." A Reuter report from Salonika (Tuesday) adds that the weather conditions have improved, but that "it is difficult at present to establish whether the Bulgarians intend pressing the attack, or what their strength is." An official report from Athens (Wednesday) declares, however, that "the Anglo-French troops are continuing their withdrawal towards the Greek frontier," which would mean, obviously, that we are shortening our line in conformity with the shortening of the French line. But are we?

Regarding the French line, it is not known how far north it now reaches. When last reviewing the situation—that is, before the fall of Monastir, it went as far north as the confluence of the Cerna and the Vardar, and nominally held the triangle formed by the two rivers as far south as the great bend of the Cerna towards the west. But from enemy reports it would appear that, after the fall of Monastir and the occupation of the Radobil heights to the west of the Cerna, the French shortened their line, even to the extent of abandoning their camp at Kavadar. This is an operation that calls for little comment, because the holding of the Cerna-Vardar triangle, in view of the occupation by the enemy of the whole of Serbia, and in view, moreover, of our own halting, hesitating policy, is of no immediate consequence. Had our policy been a stronger one, it would have been essential to our future progress in the Balkans to hold this position, admirably flanked as it was by the Doiran line. According to the latest official report (Paris, Wednesday), in the afternoon of December 5 the Bulgarians violently attacked the French bridgehead at Demir Kapu, on the Vardar, but the attack was completely repulsed. Whether the French line extends beyond the bridgehead mentioned—in which case the attack was on its flank—or whether the extreme north of the line does not extend beyond the ravine in question, is at present unknown outside military circles, but, in any case, it is obvious that the Allies still held Demir Kapu on Monday. Why, then, should a British "withdrawal" from the Strumnitza sector occur, considering that the French hold the main line of the Allies *at least* as far north as Demir Kapu? There can be only the two rational answers: either (1) that the enemy have amassed vastly superior forces against the Strumnitza sector, and have obliged us to withdraw, or (2) that the Greek report is untrue. In a day or two we shall doubtless know the truth. In the meantime, however, it may be pointed out that, according to all accepted versions, the bulk of the Austro-German forces has left Serbia for Bulgaria. This movement of troops was, nominally, attributed by Press writers to the reported invasion of Bulgaria by Russian troops. Our own opinion is that Mackensen, if he did lead his troops into Bulgaria, was more intent on leading them against the British in the Doiran sector than on fortifying Rustchuk. Any such concentration of forces in overwhelming numbers along the Struma would be bound to oblige the British troops to withdraw to the Vardar or risk being encircled. Besides, there is the danger that the enemy, penetrating from Monastir southwards into Greece, might cut off our retreat to Salonika—a move which would necessarily compel our immediate withdrawal from Serbia.

The Lack of a Policy.

A rapid summary of the Balkan situation gives the following picture: Serbia ceases to be a military factor—momentarily; Northern Epirus, Albania, and Montenegro harbour a footsore, hungry army in retreat, to whom supplies have to be shipped from Italy through a line of Austrian submarines; the Anglo-French army slowly shortens its lines until Ghevgheli is reached; Greece vacillates, and Roumania wonders; the enemy hastens the reconstruction of the Semlin-Pirot railway, and pushes us further back into an insignificant corner of the Balkan Peninsula. And why? Because we are pursuing a "no-policy" policy, a sort of let's-see-what'll-happen policy, a policy of indecision, vacillation, and hesitation. As the *Times* most rightly says: "We hear of tentative decisions and second thoughts, but we do not yet hear of any policy which is complete, emphatic, and final." In the meantime, and as a result of the foregoing, Austrian submarines hamper the victualling of the Serbian army; Italy looks askance across the Strait of Otranto; Serbs and Montenegrins are being driven into the most inaccessible fastnesses of the Albanian fold; the Franco-British *armée d'Orient* is apparently "withdrawing" to beyond Ghevgheli; Greece trembles on the brink, Roumania debates pros and cons, and the enemy build up, brick by brick, an armed fortress tunnel through the Near East which it will take years to destroy. And all because we have no definite policy, and are lost in a sea of conjecture, knowing not whither we are drifting.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

The Situation in Persia and Irak. December 7.

Viscount BRYCE asked for information regarding recent military units in the Persian Gulf region and the political situation in Persia. He expressed the opinion that in Persia the situation called for drastic action. In the East, there was nothing like force, and a display of force would be specially valuable because it would react in the West. It was impossible not to feel interest in a people who had done so much in the world as had the Persians, and he hoped that when the war was ended, some tenderness would be shown to the Persian nation.

The Marquess of CREWE said that two misapprehensions had been prevalent regarding the operations in Mesopotamia. There had been some free comment on the impropriety of advancing on a great citadel like Baghdad with only a single division. But the force under General Townshend was considered by the competent authorities to be sufficient in numbers for the task which it had to perform. It seemed to have been concluded that this was mainly a rash military adventure, perhaps undertaken by the General commanding on his own initiative, and not properly thought out, and perhaps not even fully authorized. That was a complete error. This advance on Baghdad was contemplated some months ago, and a sufficient force was collected to carry out the object. The task, however, proved to be a heavier one than had been anticipated owing to the greatly superior forces of the enemy and their powerful armament in artillery. It could not be questioned that the course which was taken—the determination not to attempt to pursue such advantage as had been gained in the actual fight in the neighbourhood of Ctesiphon, but to retire to a strong position lower down the river—was a wise one, and one which ought to be generally approved. Turning to Persia, and the great activity recently shown in that country by German and Turkish agents, he said it was evident that the German agents and the agents of the Committee at Constantinople had both proved skilful at their work, and they had shown themselves kindred spirits alike in principle and in practice. Their object and intention had been to force Persia into the conflict on the side of the Central Powers. Bribery had been freely used on a most lavish scale. In such a country as Persia bribery had to be conducted with actual cash and by the employment of the most dangerous agents that could be found. It must also be remembered that this propaganda had involved an appeal to the most fanatical elements in Persia, and there had been a free use of pretended conversions to the faith of Islam. Our appeal had always been made to rational elements of the Moslem world. These agents' appeals were made to the most ignorant and bigoted members of it. The next stage of the proceedings was the arrival in Persia of armed guards composed largely of Germans. They were assisted by a number of Turks, and formed a nucleus for the bodies of brigands and outlaws who were only too numerous in Persia. Then succeeded the campaign of attempted assassination. It had been evident for some time that the position of Persia as a neutral State was seriously threatened by these events. A new Government was therefore formed at Teheran, containing some stronger elements—men who were determined, if they could, to restore order. As soon as the new Government was formed the German Minister and the Turkish Ambassador fled from Teheran to the south, where they joined the turbulent elements of which he had spoken. In the meantime German intrigue had been busy with the force of gendarmerie which had been raised originally under Swedish officers. When that body was formed it was necessary that it should be officered by men from some country not specially or immediately concerned with Persian affairs or suspected of any ambition to become so. Some of these Swedish soldiers who had taken service under the Persian Government were under a certain degree of control by their own Government; and over these, it was only fair to state, the Swedish Government had always endeavoured to exercise authority and to prevent them engaging in any unneutral acts. Some of the others had not been to the same small extent under the control of their own Government, and it was perhaps scarcely fair to the Swedish Government to speak in general terms of "Swedish" officers. Although the greater number of the gendarmerie revolted there had been cases where they had remained loyal to the Persian Government, and had interfered to prevent riot. He believed it was the genuine desire of the Persian Government to restore order, and it was to assist them to do so that Russian troops were moved nearer to Teheran, which was visibly threatened by the same agencies as had caused the disturbances elsewhere. Even in ordinary times the maintenance of order without some form of foreign intervention, had from time to time been exceedingly difficult. In the main, though there might have been some few of what were called the advanced school in Persia who had been seduced into joining these German-fomented disturbances because they had been told that the Nationalist Party in Persia was favoured thereby, yet that belief did not seem to have sunk very deep. That was not altogether surprising, because it would be too good a joke to associate German domination in a country like Persia with the idea of freedom, and the Persian Government were wise enough to see that it was a more hopeful prospect for them to obtain the support of Britain and Russia than of Germany and Turkey. The presence of the Russian troops in Northern Persia, just like the presence of the British at Bushire, was designed to support the independence of Persia, which it was to our interest to maintain and secure. Our present action might be taken to be a continued effort for the maintenance of that Persian independence. We had already afforded not a little material help to Persia, and, on a proper guarantee, were prepared to continue that assistance. We should also be prepared to assist Persia in securing her own defence, and in the creation and maintenance of a force for home defence less liable to be carried away by foreign interference than the gendarmerie had unhappily, in most cases, proved to be, and less easy preys to foreign intrigue. One had to remember that the fluctuations of events in such a country were frequent, but he did not think there was any need to despair of the future of Persia. They were all tempted to feel a sincere sympathy with the young Sovereign, called at a very early age to the difficult occupation of the Persian Throne. This would be a time of stress and difficulty for the strongest of grown rulers, and therefore infinitely more so for a man of his age. They could only hope that he might rule later on over a well-governed country, and that he might develop such qualities as were necessary for the production of a successful Oriental Sultan.

Lord SYDENHAM, commenting on the operations in Mesopotamia, said that a short time before the advance was made on Ctesiphon a very remarkable *communiqué* came from the German wireless. It said that Baghdad was as good as lost and prepared Germany and Turkey for its fall. To his mind that *communiqué* seemed highly suspicious. Was it intended to lure our forces on to meet a much larger force? When Kut-el-Amara was occupied on September 29 many people were beginning to be rather anxious as to the future of these operations so far away from Busreh, but they all assumed that no advance would be made till large reinforcements had been brought up. What happened was quite evident, and it had happened so often in our past history. Our General, brave as our Generals were, underestimated his enemy, and received information, very likely from German sources, decidedly false, and it may be that the German plan to lure him on succeeded. But there was one very bright spot, General Townshend fought his action with the greatest gallantry at Ctesiphon. He inflicted very heavy losses on that much larger force. That was a very fine feat of arms. Let them remember that this comparatively small force that won this victory was largely composed of Indian troops, who had been more than a year from home and had endured the extreme stress of a summer in Mesopotomia. No tribute could be too strong for these brave men. He thought General Townshend, finding in front of him further reinforcements, was most wise in making a retreat. He saved his force from a very great danger. The speaker hoped we might now assume that the force was perfectly secure, and that reinforcements were being hurried to him from Busreh. Some day he supposed we should know the reasons which permitted this adventure so far from the base. He could understand the political reasons, but he utterly failed to understand the military reasons. He thought we might hope that no further advance would now take place unless a reasonable security of victory lay before us.

HOUSE OF COMMONS.

The Troubles in Persia. December 2.

Sir E. GREY, replying to a question put by Sir E. CORNWALL, said: The conditions prevailing in Southern Persia have for several years been such as to admit of the perpetration of isolated acts of brigandage and revolt, but it was not till this spring that his Majesty's Government received direct evidence that these elements of disorder were being organised and encouraged by German agents in defiance of the Persian Government. The only regular Persian force available at the time for the restoration of order in the provinces was, apart from the gendarmerie, the Cossack Brigade at Tehran, amounting in all to some 2,500 men. A detachment of this brigade was sent to Hamadan in October, but the Persian Government were unable still further to denude the capital by detailing other detachments for the more remote provincial centres. There was no force that could be sent to Shiraz.

The Balkans.

Replying to Mr. LYNCH, who asked whether, before the House rose for the Christmas recess, an opportunity would be given to debate the military and diplomatic dispositions which had led to the present state of affairs in Serbia and the neighbouring parts of the Near East, Mr. ASQUITH said: I will consider, but I can give no undertaking.

Mr. LYNCH: Will the right hon. gentleman consider that the situation of Serbia is becoming worse and worse?

Mr. ASQUITH: All such things are being most carefully considered.

Mr. LYNCH asked the Under-Secretary for War whether he could state the total number of casualties, killed, wounded, or missing, of the Australian troops in the Gallipoli Peninsula since their arrival, and how far their advance line extended beyond the furthest point occupied by them a week after their arrival.

Mr. TENNANT: It is, of course, very undesirable to state, even if it would be possible to do so at all within the limits of a question, the exact position of the lines now held. In the

Digitized by Google

Gallipoli Peninsula the Australians (as distinct from the New Zealand forces) have sustained approximately 25,000 casualties since their arrival.

For Troops at the Dardanelles. Dec. 2.

Mr. CATHCART WASON asked the First Lord of the Admiralty whether he was aware that numbers of parcels for the troops in the Dardanelles had not been delivered, although perfectly addressed; if he was aware that a trusted representative of the New Zealand Government is willing to proceed at his own expense to the Dardanelles with comforts and necessities for the New Zealand forces, and if the Admiralty would afford every facility in their power?

Mr. TENNANT, who replied in writing, says: It is, of course, not sufficient that parcels should be properly addressed; they must also be properly packed, and many have been undeliverable from this cause. A proposal was made that a representative of New Zealand should go out, and a conference at which this point and others might be discussed was proposed. He thought it desirable that such a discussion should take place if it was still wished that a special representative should be sent. He understood that there was already in Egypt an assistant director of postal services belonging to the New Zealand military forces who is charged with the supervision of mails for the New Zealand troops.

Greece and the Entente. Dec. 6.

Lord R. CECIL, replying to Sir E. CORNWALL, said that he was not yet in a position to make a statement regarding the position of the Entente Powers and Greece.

The Near Eastern Situation.

Sir H. DALZIEL asked the Prime Minister whether, if he was satisfied that there was a general desire on the part of the House that a Ministerial statement should be made on the war situation in the Near East previous to the adjournment for Christmas, he would accede to the request.

Mr. ASQUITH said that if there were such a general desire as his right hon. friend referred to, it would, of course, secure most respectful consideration.

Lord Kitchener's Mission.

Mr. ASQUITH informed Mr. KING that he was not in a position to give any information as to the results of Lord Kitchener's visit to the Eastern Mediterranean.

The Persian Gendarmerie. Dec. 7.

Mr. DILLON asked whether the Secretary for Foreign Affairs could make any statement on the situation in Persia.

Sir E. GREY: I fear that recent events in Persia have demonstrated that little reliance can be placed in the Persian gendarmerie as a whole, although so far as I am informed, it is only at Shiraz and Hamadan that they have as yet openly defied the Persian Government. The British Consul and some members of the British colony at Shiraz were made prisoners; the Consul at Hamadan has made his way to Kasvin. I am confident, however, that the Persian Cabinet, as at present constituted, are sincerely anxious to restore order, and they have already endeavoured to take effective measures at Hamadan, where, there is reason to believe, German agents have stored a large quantity of arms and war material. The presence of Russian troops between Kasvin and Teheran was necessitated by the danger similar to that at other places which threatened the British and Russian Legations and colonies. The Russian troops have not entered the capital, and the Persian Government have been assured that if they are obliged to do so it will only be to protect Allied life and property. Meanwhile, what measures are possible against the revolted gendarmerie who have committed the acts described above are being taken.

Sir E. GREY, replying to Sir J. Rees, said that the gendarmerie in Persia was not Swedish but Persian, and the officers were of Swedish nationality, but were employed by the Persian Government.

The Interview with King Constantine.

Mr. DILLON asked the Home Secretary whether his attention had been directed to an alleged interview with the King of the Hellenes, published in that day's *Times;* whether the interview was submitted to the Censor before publication; and whether the censorship accepted any responsibility for the authenticity or accuracy of the interview.

Sir J. SIMON: I only had notice of this question after I came into the House, but I have made inquiry by telephone and I understand that the interview was submitted to the Censor, but whether it was submitted or not the responsibility for its authenticity and accuracy, of course, rests with the newspaper. The fact that it was passed gives it no official authority.

Naval Mission to Serbia. Dec. 8.

Mr. MACNAMARA, replying to Sir E. Cornwall, said that the naval mission to Serbia, which was sent to assist the Serbian Army in defence of the frontier of Serbia, appeared to have played a highly creditable part in the resistance offered to the overwhelming Austro-German attack, and then to have accompanied the Serbian Army in its retreat. It was, of course, numerically a very small force, and its disposal must naturally be incidental to the general operations, but it was contemplated to retain touch with the Serbian forces so long as its services could be of use.

British Minister at Sofia.

Sir E. GREY, replying to Sir R. Cooper, said that his Majesty's Minister at Sofia was given leave of absence and left on July 9. The diplomatic negotiations in progress at that time had reached a stage when a change in the person of our representative was considered desirable.

Refugees from Serbia.

Mr. ALDEN asked the Secretary for Foreign Affairs if he had any information regarding the condition of the Serbian refugees in Montenegro and Albania, and especially if he could say whether food supplies had yet reached them; and whether he was in a position to make a statement on the subject.

Sir E. GREY: Information is as yet necessarily vague, as the Serbian refugees have not penetrated far enough through the mountains for his Majesty's representatives to be able to report definitely on their numbers or conditions. Two representatives of the Serbian Relief Committee are, however, I believe, now in Montenegro and their report will, I hope, throw further light on the situation. At present our latest information is that there are 10,000 refugees on the road from Ipek to Podgoritza. I am not in a position to make any statement on the subject except that his Majesty's Government are doing all they can to help the Serbian people.

The Tigris Fighting.

Mr. CHAMBERLAIN, answering Sir E. Cornwall, said: The casualties in the fight at and about Ctesiphon were, as already announced, 4,567. These include 643 killed, 3,330 wounded, and 594 not yet accounted for. I have not yet received details as to the distribution of the losses in the retreat, but the total, according to my present information, is under 300. Reinforcements were ordered before the advance on Ctesiphon was begun, and some of them have already arrived. I cannot say when the full report will be received from the General Officer in command. In the communications issued I have endeavoured to give as full an account of the recent operations as military exigencies would allow, and I cannot add anything further. But I should like to take this opportunity of expressing my admiration for the fine military qualities shown by the troops, both British and Indian, in the heavy fighting in which they were engaged in the withdrawal before superior forces. The House will be glad to know that General Sir J. Nixon reports that the condition of the wounded is very satisfactory, and that the medical arrangements worked well under circumstances which must have been of very considerable difficulty.

Prisoners of War in Turkey.

Replying to Mr. AINSWORTH, who asked about the British officers officially reported as missing as a result of the Dardanelles operations, Mr. TENNANT says:—"The total number of British and Colonial officers officially reported by the Turkish Government as prisoners of war up to date is twelve, but the names of some others beyond these twelve have been received through the Red Crescent or as the result of private inquiry by the American Ambassador.'

THE PRESS ON THE NEAR EAST.

King Constantine.

We take the following extracts of opinion from various daily papers concerning the interviews which have been accorded to Pressmen by the King of Greece during the past week.

The Times (December 7), in a leading article on the interview given by the King to its Special Correspondent, says:—

We do not by any means agree with all his contentions. From some of them, indeed, we very strongly dissent. But we believe that a certain accent of sincerity will be recognized by many in this explanation and defence of the King's conduct, and that all will judge them to be more effective than any made for it by others. In all quarters, we are confident, they will meet with the consideration and respect to which the exalted rank of their author entitles them.

This paper, while refraining from discussion of the main points raised by King Constantine, conscious that his Majesty was on "delicate ground" in describing the Dardanelles attack as a "gamble," concedes that there is truth in the statement that our Balkan policy has not been "at any time a very definite one."

On the other hand, his defence of Greece for refusing to fulfil her treaty obligations to Serbia, and his inquiry what adequate assistance Greece could have given to her ally, add nothing to the singularly feeble explanations put forward by his present advisers.

The *Pall Mall Gazette* (December 7) regards the defence offered by the King as neither "very candid nor very kingly," and continues:—

We can best appraise the quality of his Hellenic Majesty by comparing his record with that of the Sovereign of another small State, whose fortunes he cited to his interviewer. "The pitiable condition of Belgium was always before his eyes. . . . At all costs his Majesty's desire was to keep his country from sharing the perils and disasters of the great European conflagration." That is to say that King Constantine, unlike King Albert, confesses himself cowed by German "frightfulness." He has no liking for the path of duty when it may lead to sacrifice or suffering. . . . Belgium has chosen defiance of the Hun, while Greece has been induced to make him a servile obeisance. The one marches with "the van and the freemen"; the other sinks to "the rear and the slaves."

The *Westminster Gazette* (December 7), on the other hand, accepts the King's assurance of affection for England with sincere satisfaction, and thinks that a

Digitized by Google

man who talks as he does of the horrors of Belgium and Serbia, "is not likely to feel a warm affection for German militarism." Turning to his Majesty's comment regarding the indefiniteness of our Balkan policy, the paper adds:—

We are obliged to say that the chief element of uncertainty was the attitude of Greece herself. If we look only at the last phase, the Allies went to Greece at the invitation of the Greek Prime Minister, and in the belief that the mobilization of the Greek army was the first step to a joint campaign for the relief of Serbia. When M. Venizelos fell, and the mobilized Greek army became a force for protecting Greek neutrality against all who threatened it, the original plan necessarily had to be modified.

The *Gazette* advocates a frank appeal to the generosity of the Greek King and people:—

Whatever may be the strict interpretation of the Treaty of Bucharest, they must feel that they owe something to the Serbians, who have fought the battle of Balkan liberty single-handed. In proportion as they have chosen the safer course for themselves, they must perceive that there is a moral claim on them not to hinder those who are trying to render to Serbia the assistance which they were unable to give. They can scarcely forget that, while they disclaim the obligations which their treaty with Serbia appeared to lay upon them, they still retain the advantages which it secured to them, including some territory which is greatly coveted by the Central Powers.

The *Evening News* (December 7) admits the justice of the King's demand for a clearly defined Balkan policy on the part of the Allies, and sums up its leading article in the paragraphs quoted below:—

Finally, we must remember that King Constantine has virtually torn up the Greek constitution in order to carry out his own policy, and that M. Venizelos, disheartened by the prospect of a general election when most of his supporters are with the mobilized army, has practically retired with his party from the fight for the time being.

Also that the aid which Greece swore to give Serbia if she were attacked by Bulgaria has been withheld on the ground that Bulgaria has the Huns behind her, and that Greece might get hurt if she intervened.

All these things should help us to a true appreciation of Greek friendship and its worth, and we may be sure that the British Government will not attempt to strain it unduly. We have got to rely on ourselves, and on ourselves alone.

Enemies' Lengthening Lines.

The *Fortnightly Review* (December), in its "History of the War," shows that the enemies' invasion of Serbia, successful though it has been in one way, is by no means without its element of subsequent danger to the Central Empires:—

The extension of the belligerent area was an imperative necessity for both Germany and Austria-Hungary, who are feeling the economic "pinch of war" with increased intensity every month; but it is not all to the good, for the 1,200-mile battle front has been lengthened out by something like another 600 miles, for the defence of which the Germans are now responsible. They have gained, it is true, a new ally in Bulgaria, but this does not alter the fact that they have added to their vulnerability, and increased the opportunities for attack by their enemies.

The writer includes an interesting survey of the various lines of attack, which might, in certain circumstances be open to the Allies, and emphasises the importance of Cattaro.

The Gulf of Cattaro is one of the finest inland harbours in the world, but is still in Austrian possession, being defended by forts and mines at its entrance into the Adriatic and by a group of powerful forts defending the approach to the town of Cattaro by the road which descends to the harbour from the Montenegrin heights. The forts, which are commanded from these heights, could be demolished by high-explosive howitzer fire if the Montenegrins had any available, but their field artillery is of obsolete pattern, and they have not heavy artillery at all. If the Allies can gain possession of Cattaro harbour, they will have an unrivalled sea base available for any ulterior operations they may undertake for the reconquest of Old Serbia. There is an excellent post road from Cattaro to Cettinje, and thence through Kolasin into Lim Valley.

Special emphasis is laid upon the necessity for intimate co-operation between *all* the Allies in their Balkan operations.

The Retreat from Baghdad.

The check sustained by our forces in Mesopotamia has extracted editorial comment from almost all sections of the Press in England, and the unanimity with which papers of all shades of opinion agree to postpone all judgment constitutes a very high tribute to the generalship with which the campaign has been conducted. The *Manchester Guardian* (December 6), in a leading article, says:—

We shall, of course, go back to Baghdad. But our estimates will have to be revised, and, when we return, it will be, no doubt, with an army largely reinforced, which will carry to a successful end what has been, until this unhappy reverse, a brilliant campaign.

The *Pall Mall Gazette* urges energetic action and an unsparing use of our resources in the East to overcome the check, and continues:

The distance for which the British force has been withdrawn need not be taken as a measure of the reverse that has befallen it. There are only certain positions suitable for fixed stations along the Tigris, and when General Townshend decided that he must evacuate the vicinity of the late fighting, his withdrawal as far as Kul-el-Amara almost inevitably followed. In such a case a retreat of eighty miles may signify no more than one of eight. The distance is determined by geographical and not by military factors.

The *Western Mail* thinks that—

It is important that the loss just suffered should be retrieved, for the sake not merely of the military considerations involved, but for fear of moral and political mischief in Arabia and Persia and in the protected settlements along the coast from Aden to Mohammerah.

The *Birmingham Daily Post*, while not attempting to minimise the effect of the retreat, says:—

Since Sir John Nixon joined the Mesopotamian force in April the campaign has been brilliantly conducted; and nobody is going to be so foolish as to criticize him merely because he has suffered a check.

The *Scotsman* refers to it as a "disappointing incident in an uncompleted and hitherto brilliant campaign."

The *Daily Chronicle* says:—

The Mesopotamian front can be reinforced so much more easily and quickly from India than from Constantinople that the situation should be thoroughly retrieved if the Indian Government takes prompt action.

Balkan Operations.

The Special Correspondent of the *Daily Telegraph* (December 7), in a dispatch from Rotterdam, gives some interesting information concerning the manner in which the Balkan operations are being regarded by our enemies. According to this writer the correspondent of the *Nieuwe Rotterdamsche Courant* at Sofia has contributed to his paper a dispatch which shows the Bulgarians to be far from satisfied at the present position of affairs.

The writer points out that, notwithstanding the extent of the military successes obtained within the short period of a six weeks campaign, there is amongst the inhabitants of Sofia a lack of rejoicing and, on the contrary, querulous grumblings and not a little depression. "They had expected their gains to come more easily, more quickly, and with less sacrifices."

The Serbian campaign was popular, but to fight the French and the English is a different matter.

Many people in this country are of opinion that the fighting against the French and English is not the real task for Bulgarians, and that the former's intervention against them is only due to their association with the Central Powers. Therefore, they argue, the expulsion of the French and English expedition from the peninsula should really be left to the Austro-Germans. Since Bulgaria has had to take such an active part in subjugating Serbia in order to open the road of communication necessary to the Central Powers and Turks, and has had to conquer Macedonia for itself, its taking part in the war must be considered to have finished with that, and the question is here more and more what all these Germans and Austrian military, who for some days latterly have been swarming over the country, are really doing there if they are not intended to hunt out intruders and to take this task over from the Bulgarians.

Roumania's Attitude.

"Politicus," writing in the *Fortnightly Review* (December), studies the problem of Roumanian intervention from the point of view of that country herself. The first portion of the article is mainly historical, and shows the gradual evolution of events that has left Roumania in the form and position she occupies to-day. Coming over to the immediate question of the present war, the writer says:—

The reason why Roumania does not desire to fight for Austria is obvious to all who are acquainted with Roumania's legitimate ambitions. Roumania wishes to remain independent. She does not desire to be absorbed by Russia, but she desires as little to become an Austrian Province. German and Austrian rulers and statesmen may promise her internal self-government under the Austrian crown. They may tell the Roumanians that all the Roumanians will, with their help, be united under the Roumanian flag, provided that Roumania will consent to merge herself in the Dual Monarchy. However, incorporated in the realm of the Hapsburgs, Roumania may become not another Bavaria, but another Bohemia. The Roumanians know that the Austrian Empire is based not on freedom, but on persecution. . . . Besides, they have before them the warning example of the 3,500,000 Roumanians who dwell in Austria-Hungary, and who live under a modified form of slavery.

The writer shows that Magyars will naturally resist the creation of a united Roumania, as such a union is regarded as an abomination, both for political and strategical reasons, by all Magyar patriots. There are

Digitized by Google

possibilities of a great future for Roumania if her vast resources are adequately exploited:—

Clear-sighted Roumanians recognize that the future of Roumania depends upon the issue of this war, that they have everything to hope from the victory of the Entente Powers and everything to fear from the triumph of Germany and Austria-Hungary. It is true that the two Central Empires at the beginning of the war promised Roumania in return for her help vast territories in the East, including not only Russian Bessarabia, but even Odessa. However, it is clear that if Germany and Austria should keep faith with Roumania, that country would at best become dependent upon the two Empires for her existence. Besides, it is doubtful whether the two Empires would keep faith. They consider that Roumania has betrayed them by not only refusing to come to the aid of Germany and Austria-Hungary at the outbreak of the war, but by adopting an attitude favourable to the Entente Powers. They would no doubt welcome Roumania's adherence for the time being, but would probably adjourn her punishment to a more convenient season. They would most likely make use of Roumania in exactly the same way in which Napoleon made use of Prussia before 1806.

An examination of the various resources of the belligerents is followed by the paragraph we quote below:—

Before long the initial inferiority of the Entente in soldiers, arms, and ammunition will be converted into an overwhelming superiority. The day of reckoning seems close at hand. In the interest of Roumania it is to be hoped that she will have taken the great step which should determine her future before it is too late. Roumania's future would be compromised, perhaps irretrievably, should she be told at the critical moment: "You have waited too long. We need you no longer. You have remained neutral so far. Now your help is not wanted. Our military arrangements are complete, and so are our political ones."

Persian Sketches.

Mr. John Foster Fraser, writing under the above heading in the *Standard* (December 1), has produced an article bristling with paragraphs which cry aloud for quotation. As, however, our space is limited, we confine ourselves to quoting the last paragraph of all which will be seen to entirely endorse the views concerning German intrigue in Persia, which we have consistently expressed in THE NEAR EAST.

Time was, and not so very long ago, when British influence was exercised practically throughout the whole of Persia. In Teheran it was believed that there was only one foreign country—England. But Russian influence began to extend southwards from the Araxes River to Tabriz; then to the capital itself, and ultimately to Isfahan. For the last quarter of a century the Teutonic commercial man has been pressing his foot, his knee, and ultimately his whole figure into Persia. I have met him clambering the Kotals, the five ridges of rock-strewn hills lying between Bushire, in the Persian Gulf, and Shiraz. Next came the Consuls, ostensibly to give an eye to German trade, but really to stick spokes in the wheel of British interests in that part. Every German Consul was and is an intriguer. His main business was to create dissension between the British and Persian authorities. The Englishmen in Persia were aware of what was going on. Occasionally a stray traveller would take it upon himself to warn the British Government of what was happening, but he generally got snubbed for his pains, was reminded that Germany was a friendly Power, and that he was foolish for being an alarmist. Anyway, British influence has considerably shrunk within the last 20 years, and what is happening now is one of the consequences of our neglect and shortsightedness.

West and East.

In its weekly digest of the events and possibilities of the war, the *Observer* (December 5) insists upon the necessity for strong and concerted action on the part of the Allies in the Balkans. Men in increased numbers will be required of England—we must throw new legions into the Balkans while maintaining our full quota of strength on the Western front.

There can be no escape from this. If we thought to escape from it by weakness in the Balkans and by merely defensive efforts in Egypt or elsewhere we should be rudely awakened before six months were out to a sense of our error, and would have to pay for it at compound interest with still more men and still more money.

Any faltering now, any withdrawal of force would drive Roumania to intervene against us instead of for us, and might give the enemy the command of the Black Sea.

The enemy wants the Allies to abandon the Balkans so that the Germans may gain Roumania and the best possible freedom and facilities for dealing with the coming Russian offensive. The Germans undoubtedly think this the vital point in their whole problem. If they can fight out another nine or twelve months in the East without such reverses and disasters as would fatally weaken them all round, they believe that for as long a period they can keep their lines unbroken in the West. That is the state of the enemy's mind, and we shall do well, indeed, to reckon with it. The extreme "Western school" which cannot see Europe for Flanders advocates in effect abandonment of the Balkans, and between the North Sea and the Vosges attack at any price with every man and gun France and Britain can muster, and without regard to the only real main aim—that of securing in three months or so from now the full simultaneous and reciprocal effect of the Russian offensive. The programme of the extreme Westerners fits in, it will be seen, to a nicety with the enemy's own programme. It is just what the Germans want.

The writer, after dealing with the bearing which the Balkan campaign has upon the Germanic designs upon Egypt and India, concludes in the paragraph which we quote below:—

The policy of "the Balkans First" is not only the best and surest for both the British and the Russian Empires, but by promoting the offensive plans of our Eastern Allies, and thwarting the enemy's counter-plans, it would be the surest means of accelerating, after a little initial delay, the crowning triumph of the Allies, even in the West.

A BISHOP IN MESOPOTAMIA

The Bishop of Lahore (the Right Rev. H. B. Durrant, D.D.), whose diocese includes the Persian Gulf, has lately concluded a visit to the troops of our Mesopotamian Expeditionary Force, and has returned to India. How much his presence amongst them was appreciated by the troops is shown by the following letter written by an officer of the Indian Army, apparently shortly before the Battle of Ctesiphon, and published in the *Morning Post* of November 27. The *Morning Post* heads the letter "A Noble Bishop," and we feel sure that our readers will consider the title fully justified. The writer says:—

The Bishop of Lahore is with us (our most advanced position), and the great man and his two chaplains are amongst us, living as we do and sharing our discomforts. It is very noble of him to come, as he is an oldish man, and I need hardly say how much we all appreciate his devotion. We shall, all of us, be in battle before long, and the Bishop and his men are here to see us through with it. It is grand of them, and their presence will be of the greatest help to us, especially to the sick and wounded. There is Holy Communion every morning at seven o'clock, so that some time during the next week everyone will probably get a chance of attending.

Last evening we had service at six o'clock, just as the sun set, and a nearly full moon rose in the sky. It was a wonderful service, the men in shirt sleeves, with their rifles beside them, on three sides of a square, with the officers on the fourth side, and slightly in advance; the Bishop and his chaplains in the centre of the square, with the Union Jack draped over some planks to make an altar. Save that an aeroplane hovered round and swooped down like a great bird returning to earth to rest, the endless buzz close by, and from the outposts the signal lights flashing across to headquarters, the camp might have been at Evening Service in peace time. Our thoughts went far from war as we sang the old hymns and listened to one of the finest sermons I ever heard—most inspiring, simple, and eloquent: a sermon that the slowest witted of the men could understand. The old man, with his hands lifted up in the moonlight, took us out of ourselves back amongst our own families and our own people, to our towns and village homes. He made us see the privilege of fighting in this war, fighting with God, for God; and he made us feel that death was nothing, a mere glorious entry amongst the hosts of the Lord and His Elect.

He has visited the scenes of all our battles, consecrating the cemeteries and burying places, and lonely graves of those who have fallen on our long line of advance. The difficulties and hardships and risks he must have experienced and been subject to have been very great; but he has done all this, and surely no man could have done more, for our dead and living.

Sir J. Roper Parkington, Consul-General for Montenegro, has received the following official telegram:—On the 4th instant, the Austrians vigorously attacked our positions on the left bank of the Tchehotina, but were repulsed, leaving a considerable number of prisoners in our hands. Further assaults made in the vicinity of Brodarevo, Sienitza, and Biclopolie were also repelled with heavy loss to the enemy. Nothing of importance on other fronts.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

The reports of three Near Eastern companies have been published during the past week, namely, those of the Anglo-Persian Oil Company, the Khedivial Mail Line, and the Imperial Bank of Persia. Little is to be gathered from the last two named reports, and the respective meetings will, therefore, be awaited with considerable interest. In the case of the Khedivial, the available balance is £28,632, out of which the directors recommend the payment of a dividend of 5 per cent. on the Ordinary shares, leaving £12,637 to be carried forward. Last year no dividend was paid on the Ordinary shares, and only 2¾ per cent. on the five-and-a-half per cent. Preference shares, but in 1912-13 the Ordinary shares also received 5 per cent., this being the first distribution since 1907.

***

Regarding the Imperial Bank of Persia, for each of the three years to September 20, 1913, 10s. per share was paid on the Ordinary shares of the Imperial Bank of Persia; but twelve months ago the rate was lowered to 8s., and it is now proposed to make up the distribution for the past financial period to 6s. per share. Net profits for the year show a decrease of only £5,467 which, in view of the very exceptional state of affairs in Persia, and the great drop in trade is not to be wondered at. The report refers with much regret to the retirement of Lord Inchcape from the Board, owing to the pressure on his time by public engagements as well as his duties as Chairman of the P. and O. Steamship Company.

***

Of paramount interest at the present time is the report of the Anglo-Persian Oil Company. This is mainly owing to the close proximity of the company's fields to our operations in Mesopotamia, and on the Persian border. Necessarily the disturbances at the head of the Persian Gulf during the year have affected the working capacity of the company, the more so considering that "a small portion" of the Pipe Line was damaged by local Persian tribesmen last February, rendering the transport of oil impracticable for a period of 4½ months, and suspending refining operations for about a corresponding period. Nevertheless, the various extensions for which capital has been provided by the British Government are being proceeded with as expeditiously as possible, though the laying of the additional Pipe Line has been considerably delayed. These *contretemps* have given the critics of the Government scheme—whereby the British people took a direct pecuniary interest in the exploitation of the Company's concession—an excuse for inveighing against the whole undertaking. Happily, the number of these critics is decreasing, whilst, moreover, it is generally recognised that the past year is not a criterion to go by. Further, we can take it for granted that the end of the war will see our position in the Middle East strengthened to such a degree that the future smooth working of the Anglo-Persian Oil Company's concession will be guaranteed.

***

It is announced that from April 1 next the transit dues for loaded ships passing through the Suez Canal are to be raised from 6f. 25c. to 6f. 75c. per ton, and for ships in ballast from 3f. 75c. to 4f. 25c. per ton. The dues will thus be brought back to the rates in force before January 1, 1913, since which date there has been a steady reduction. Lord Inchcape, referring to the increase at the meeting of the P. and O. held on Wednesday, said:—"The advance of the Suez Canal Company's receipts has been checked by the war. In that company's prosperity the shipowners hitherto have shared, advances in the rate of dividend having been accompanied by reductions in dues. For the year 1914 the Suez Canal dividend had to be reduced by 45f. per share, but the shareholders accepted the reduction uncomplainingly, and the dues were not increased. For 1915 the reduced dividend will again operate, and it can only be maintained at the 1914 rate by wiping out the reserve set aside in the previous year. For 1916 the outlook is not bright, and the Canal Company propose to raise their charge by 50c. per ton from April 1 next—that is, from 6f. 25c. to 6f. 75c. per ton. If the traffic decreases further we may have to face another rise, but if the traffic does not further decrease, or improves, as we hope it may, the 6f. 75c. rate should remain. When normal conditions return we hope the Canal Company will be able to revert to the 6f. 25c. rate, and we look forward to a gradual reduction from that figure to the 5f. which we trust may be ultimately established."

***

In connection with the announcement published elsewhere regarding the production of drugs obtained from sources within the Empire, I read in the American consular reports that the U.S. Consul General in Cairo recently received from a firm of manufacturing chemists an inquiry for a sample of musenna bark (Albizzia anthelmintica) which the firm stated was indigenous to Kordofan. Upon application to the Sudan Government, the Consul General received samples from the Director of the Commercial Intelligence branch of the Government at Khartoum, and was informed that, as far as known, there was no existing trade in this product, but that if any demand for it appeared to be likely (which I trust will be the case) he would endeavour to arrange for a supply of the bark.

***

I read an announcement to the effect that it is proposed by the recently formed British Chamber of Commerce in Morocco to establish a room in the Chamber's offices at Tangier for the display of samples of British goods. Full particulars may be obtained from the Secretary, British Chamber of Commerce, Tangier, Morocco. Needless to say, I am heartily in favour of the scheme, and applaud the energy of the Secretary in thus adopting a policy which should have been in general practice in all Mediterranean and Near Eastern countries years ago. I remember, within recent years, two attempts that were made to exhibit British samples in the Eastern Mediterranean, and both were doomed owing, simply and solely, to the indifference, not to say apathetic antagonism, of leading British exporters. It is sincerely to be hoped that the Tangier scheme will be successful, and that, after the war, the principle involved will be generally applied in Near Eastern and Balkan countries.

***

If I may offer a suggestion, it is essential that the Chamber should indicate what class of exhibits are wanted—in other words, what articles would be successful. For Morocco, for instance, high-class stationery is useless, also egg-cups of the size usually seen in England, where eggs are large. Such articles would gain nothing by being exhibited, and would only take up space that might be better served. What we must exhibit are such articles as will appeal to the requirements and customs of the natives. We must accommodate our output to their taste, and not attempt to educate their tastes to suit our output. If, for instance, the Continental, thin-soled, pointed footwear appeals to the prospective customer, give it to him, instead of trying to persuade him that the thick-soled, pug-nosed boot is a superior article. While we are arguing with him or attempting to persuade him that the salvation of his feet depends on the adoption of our own peculiar fashions, the foreign rival steps in and sells him just what he wants, books further orders, and lays the foundations of an almost unassailable trade. A palpable deduction from the foregoing remarks is that the samples exhibited in Timbuctoo, for instance, with great success may turn out to be a disastrous failure in Erzerum.

***

Some time ago I praised the initiative shown by Messrs. J. Compton and Sons in opening a clothing factory in Shubra, Cairo, and hastened to predict a great success for the enterprising firm. A recent *Official Journal* contains an announcement of the result of an adjudication for the supply of khaki uniforms for the Egyptian State Railways. According to this, "Nineteen offers were received, and the order has been placed with Messrs. J. Compton and Sons, Shubra, Cairo, for the supply of 5,000 uniforms required for the summer of 1916 only, at the price of 475 milliemes per uniform complete with buttons, delivered free into the Central Stores of the Administration at Bulac, Cairo." I congratulate the firm on its initial success and hope that, now that the lead has been given, British manufacturing firms of all kinds will follow suit.

***

Roumania is at the moment busy with her munition problems. According to a report published in Paris, a Royal Decree has been issued establishing a special department for munitions and war supplies to work in co-ordination with the Ministry for War. The new department will comprise a director of war material, a director of military establishments, and a director of provisions and general war supplies. A number of consulting commissioners, officers, and specialists will also be embodied in the personnel of the department. Another despatch quoted by the Central News Agency states that the Roumanian Commission which was sent to Petrograd to negotiate an agreement with Russia relative to the transit across Russian territory of munitions and merchandise destined for Roumania has telegraphed to the Minister for War that Russia has accorded all the facilities asked for, and that orders have also been given for the fitting out and enlargement of the port of Kola, where the expected munitions will arrive. Transports, however, will not be able to begin operations before the end of December.

Cyprus Blue Book.

A Disappointing Report.

(SPECIAL TO "THE NEAR EAST.")

Interesting as the British administration of Cyprus has been from many points of view, it can hardly be said that the development of its resources has been hitherto such as to fulfil the expectations formed in the early years of our occupation. Much, no doubt, has been done for which the people have to be thankful. Full allowance, too, must be made for many serious obstacles to progress, including the exhaustive burden of the annual Turkish tribute of over £92,000 and the conditional nature of our tenure, which have so heavily handicapped the local Government. Recent events, moreover, may seem now to justify the rigid economy with which the island has been administered. But looking back over a period of thirty-seven years, during which British officials have carried out their depressing and uphill work, one cannot but feel that the record is not altogether satisfactory, having regard to the very backward state of things that still prevails, especially in matters appertaining to agriculture, which is the life of the island.

A perusal of the High Commissioner's recent report on the Blue Book for 1914-15—to which one might turn with unusual interest—does not dispel the feeling. It is, of course, too early to look for any immediate advantage from the recent change of status, the news of which, we are told, was received with enthusiasm in Cyprus. "The annexation," says the report, "created a new situation, but in practice the results were but little felt." Ottoman subjects became British subjects: "only a few, and those chance visitors, elected to retain their Ottoman nationality," and they were required to leave the island. The proclamation of martial law in no way "impeded the normal liberties of the general public." The war naturally caused some dislocation of trade. It interfered, it appears, with the mining industry, and "the progress of several promising concerns," with prospecting for oil, with applications for registration of trade marks, and with various other local interests.

Feeling of Uncertainty.

It has always been imagined that when the island became a British possession, the drawbacks which were inseparable from our previously embarrassing position would disappear, and that the island would make a fresh start on the road to prosperity. It may still be hoped that this era will arrive. Unfortunately, however, as a consequence of the recent conditional offer to Greece—which took people by surprise almost as much as did the original occupation—a new feeling of unrest and uncertainty has been created, and this will tend to prolong the period of stagnation.

But to return to the report. It is the sections dealing with agriculture and the forests that claim most attention. As regards husbandry, one is struck by the large number of insect and other pests that afflict the distressful island. "Every year, crop after crop suffers from one or other of these pests, and the already small profits of farmers and gardeners undergo a serious reduction." The only important foe to agriculture which has been effectively dealt with by means of adequate expenditure—covered by taxation—is the locust. Sir Hamilton Lang believed that this pest had been exterminated under Said Pasha, a few years before the British occupation; but he was mistaken. Very soon after that event formidable swarms again developed under favourable conditions. Measures taken under Sir Robert Biddulph led to a long and costly campaign, which has been maintained to the present time. In 1887, Mr. S. Brown, M.I.C.E., then Government Engineer, who was in charge of operations, thought that the locusts had been reduced to a negligible quantity; but he, too, was mistaken. The plague was soon renewed. This year, in addition to the indigenous plague, fresh invasions of another formidable species have taken place, as in Egypt, from the Syrian mainland.

It would certainly be interesting, both at home and in countries invaded by this scourge, to have some information regarding the results of the campaign in the year under review. During the locust war in Cyprus, all known methods of attack have been employed—viz., traps and screens (*i.e.*, the "Mattei" system), collection of eggs, collection of the insects, and spraying with poison. We do not seem to have arrived at definite conclusions as to what mode of warfare is really the most effective. The direction has been assigned to various Departments in turn—Police, Forest, Revenue, Agriculture, etc.—always under zealous and capable officers. Not a word is said on this important subject in the report; and one can only regard this as a regrettable omission.

Viticulture.

Then, as regards vines and wine manufacture. It was always hoped that substantial progress would be made in the village manufacture of wines, and some firms, British and native, have taken up the matter on a larger and improved scale. Little advance has, however, been made. Two or three years ago, Sir Alan Burgoyne observed, if we remember rightly, that so little consideration was given to this industry in Cyprus, that it was not even mentioned in the annual reports of the High Commissioner.

The principal trouble with the island vines—though there are other minor pests—is due to the spread of mildew (*oïdium Tuckeri*). For twenty or more years the Government has impressed upon the people the need of sulphuring their vines. Full instructions have been given, orally and by leaflets, as to the modes of applying a first, second, and when necessary a third spraying of the vines. Large quantities of sulphur are imported by the Government and sold, at about cost price, at the ports, and in late years at central village depôts. Bellows and appliances for sulphuring have been made and sold at cost price. The result of all the efforts made have, however, been extremely disappointing, with the consequence that the evil continues to spread; and that those who take steps to protect their vines are liable to suffer from the negligence or apathy of those who do not. This being so, many merchant landowners and village cultivators consider that sulphuring should be made obligatory, and that to meet the cost of carrying out an enactment for that purpose a tax should be imposed, not on the whole island, as is done in the case of locusts (though this would involve no injustice), but on the landowners in the vine areas. The majority of the cultivators would probably welcome such a measure, which would only be unpopular with a negligible minority. So far the Government and Legislative Council have shown no disposition to take this course; and we have the annual expression of a pious hope that villagers will learn wisdom.

Cotton.

It would be of interest to know what advance, if any, is being made in cotton cultivation, for which Professor Wyndham Dunstan reported, about ten years ago, that so much might be done in Cyprus. The only reference to the subject appears to be under the head of Public Works, where it is said, in connection with the storage reservoirs, that while "1,543 acres were watered for cotton, the actual area of land under the crop was 675 acres. On the whole the crops did well, and it may be considered that cotton cultivation is now firmly established, and will always be profitable when there is sufficient water available."

Some reference to tobacco-growing would also have been welcome, but it is not referred to.

As regards chemical manures, which are coming into use, it is said that "no article of commerce is more systematically adulterated during the course of handling," before reaching the consumer, and that it will probably be necessary to impose regulations to safeguard him from fraud. Let us hope that measures for controlling the trade will be adopted. On the whole the agricultural outlook is apparently not so encouraging as might be hoped.

Forestry.

The section on forests leaves in the mind a similar feeling of disappointment—not by any means owing to the falling off of revenue of nearly £1,000—due to "the war and agricultural depression," but from other circumstances which the report proceeds to describe.

Over 70,000 trees were destroyed in the year by seventy forest fires. Taking the estimate that damage from this source (over about 40,000 acres) in the last twenty-nine years amounted to £118,755, the total losses since the occupation must have been well over £150,000. The annual damage from fires is computed as £4,095; and as the amount spent on plantations during the year under notice was £4,274, "only a little more than the estimated annual value of forests destroyed is being replaced." Having regard to the very slow growth of forest trees, the need of further expenditure on reafforestation, so strongly advocated by the best authorities, seems manifest.

There was a decrease in sales of timber of £934, due to the causes already mentioned, but there is every prospect of a large revenue in the current year, "as the supplies of timber from Asia Minor and Trieste are cut off by the war and the island is thrown on its own resources." This apparent contradiction seems to call for some explanation.

Goats.

The section concludes with the following statement respecting goats: "There are some 250,000 goats in the island, and the damage done each year by each goat is estimated as amounting to not less than ten shillings. Consequently the damage done by the goats may be estimated at not less than £125,000 every year, a sum probably exceeding the total value of the goats themselves. Last year there were grazing in the forests 50,730 goats, and the damage done by them in eating down forest growth, seedlings, etc., is estimated at £25,000. This tends to show that the sooner the goat is exterminated from Cyprus the better it will be for the prosperity of the island, which depends so much on its forests, its agriculture, and its arboriculture." The conclusion to be drawn would seem to be that no time should be lost in gradually banishing goats from the island by judicious legislation, the application of which should not encounter greater difficulties than in other countries in which similar action has been found necessary. The argument against such a measure is that the Cypriot makes use of the goat for a variety of purposes, for cheese, for meat, and on account of the skin. As regards the use of the skin for transport of wine, the sooner this custom is superseded the better.

Of the zeal of officials in Cyprus there is no question. What appears to be required is a more liberal encouragement of local effort by the Imperial Government, accompanied by strictly practical legislation, that will meet the particular requirements of the people as they are. Poverty and ignorance still prevail, and the indebtedness of the rural classes is a lamentable evil. The report concludes with the hope that the "Co-operative Credit Societies Law," of 1914, will become a means of rescuing the peasantry from the grip of the usurer, who at present holds far too prominent a place in the island community." Such emancipation is indeed a *sine qua non* of agricultural progress in the island.

Alexandria Prize Court.

S.S. Marquis Bacquehem (ex cargo).

His Honour Judge Grain has handed from the Supreme Court, Alexandria, Sitting in Prize, the following judgment in the case of the s.s. Marquis Bacquehem. The facts are set forth in the judgment:—

This cargo consists of bales of cotton shipped by Messrs. Ralli Brothers from Karachi on board the s.s. Marquis Bacquehem on or about July 28. As the conditions of sales differ to a certain extent it is convenient to divide them into two lots "A" and "B."

The "A" consignment consists of: 1,098 bales of cotton consigned to Vereinigte Osterreichische Textilindustrie Co. at Vienna and 221 bales consigned to Ludwig Weiss, Vienna.

The "B" consignment consists of: 2,152 bales of cotton consigned to the Ungarische Textilindustrie Co., Vienna, and 1,097 to the Pottenderfer Bauwollspinnerei Co., Pottendorf.

The Procurator asks for condemnation of this cargo on the ground that the property in it has passed to the Austrian firms on the contract of sale; and that Ralli Brothers have retained no right of disposal in the goods under the above conditions of sale, but have merely got a lien on them and are, therefore, no better off than the bankers, whose claims have been disallowed in the Odessa and other cases.

He points out that the contract, which is in the form of a letter to which the conditions of sale are attached, uses the words: "We beg to confirm the sale we have made to you," and also the phrase, "Should any dispute arise under this contract, this contract shall not be cancelled, but the dispute settled by arbitration."

And he urges that under the conditions of sale, as soon as the contract is signed the full invoice price is immediately debited to the buyers.

It is suggested also by the Procurator that under these conditions of sale the sellers, Messrs. Ralli Brothers, would have no power to sell to any one else even if the buyers did not take up the delivery or pay the price, that they would have an action perhaps for breach of contract, or be able to sue for the amount; but as far as the goods were concerned would merely have lien and a lien only, on them.

Mr. Booth, who appears for Messrs. Ralli Brothers, points out that by the conditions of sale the cotton on arrival at Trieste is to be warehoused in Ralli Brothers' name with Francesco Parisi, who is their agent at Trieste; that by the conditions of sale Ralli Brothers reserve all rights in the cotton.

"All rights in the cotton being reserved by the sellers as guarantee for the account," the bills of lading remain in the hands of Ralli Brothers.

An affidavit is put in sworn by a member of the firm of Ralli Brothers, a British firm, carying on business in England and India. The affidavit states that although the original intention was to appropriate these goods to the contracts already drawn up, nevertheless, owing to the outbreak of war, "no notice of appropriation nor declaration of marks or ship's name was ever sent to the buyers. . . . . ."

Now what were the intentions of the parties to this contract? First as to the terms of the contract: The sellers state that they reserve all rights, and the terms of the contract give only a certain period in which the buyers can take delivery of the cotton. As regards the conduct of the parties: The sellers retain in their possession the Bills of Lading, they consign it to their own order, it is to be placed in their own warehouse under their own warehousemen, in their own name, it is also, under the conditions of sale, to be insured in the name of Ralli Brothers, the sellers.

The sellers also pay for discharging the cargo from the steamer, the putting it into warehouse, the warehouse rent and the fire insurance while in the warehouse. The conditions of sale certainly proceed to say that the buyers have to refund these amounts, but that is at a later stage. It, therefore, appears that as regards the conduct of the sellers up to this point that they have done everything possible to keep this cargo under their own name and to reserve the property in it to themselves.

The affidavit of Ralli Brothers states that although the original intention was to appropriate the cotton to the contract, nevertheless, owing to the outbreak of war "no notice of appropriation nor declaration of marks or ship's name was ever sent to the buyers."

It has also been urged by Mr. Booth that under Sec. 19 of the Sales of Goods Act, the sellers have reserved a right of disposal. That section states that on a contract for the sale of specific goods or goods subsequently appropriated to the contract, the seller may reserve "the right of disposal until certain conditions are fulfilled"; and that notwithstanding the delivery of the goods to the buyer or to a carrier for the purpose of transmission to the buyer, the property in the goods does not pass to the buyer until the conditions imposed by the sellers are fulfilled. Subsection (2) of Sec. 19 lays it down definitely, "When goods are shipped and by the bill of lading the goods are deliverable to the order of the seller or his agent, the seller is *primâ facie* deemed to reserve his right of disposal."

In this case the bills of lading were to the order of Messrs. Ralli Brothers, and, in fact, never left their possession as they were forwarded to Ralli Brothers' agent and warehouseman at Trieste, Mr. Francesco Parisi, but never reached him on account of the outbreak of war, but were returned through the post to Ralli Brothers.

This presumption of the right of disposal may, of course, be rebutted. . . . .

It has been urged by the Procurator that the fact that the price is to be debited to the buyers shows that the property was intended to pass to the buyers, and that, in fact, the property did pass when debited. But the claimants urge that the debiting was merely a form for arriving at the amount of interest which would become due, and that, as a matter of fact, it is stated in the Ralli Brothers' affidavit that the buyers never were debited with the price owing to the outbreak of war.

According to the evidence, Ralli Brothers have not received from the said intended buyers any draft, accepted or otherwise, nor have they received payment in any form for the said bales.

Taking all these circumstances into consideration, together with the terms of the contract and the conduct of the parties, there does appear to me great weight of facts to lead one to the conclusion that the intention of the sellers was that the property should not pass to the buyers and that they, the sellers, were to retain a right of disposal until payment in some form had been made for the goods.

With regard to the phrase in the contract that the Procurator relied upon, viz., "We beg to confirm the sale we have made to you" and "this contract shall not be cancelled"—the phrase "confirm the sale" would be quite consistent with a sale under Sec. 17 and 18 of the Sales of Goods Act, in which the intention of the parties was to reserve the right of disposal in the sellers until certain further things had happened, and also as regards the phrase "not be cancelled," the right of disposal and the retention of the property in the goods being reserved to the sellers until certain further happening would be a part of the contract which could not be cancelled.

After very careful consideration of all the facts in this case, I have come to the conclusion that Messrs. Ralli Brothers have made out their claim in this case, and that their intention and that of the buyers was that the right of disposal should remain in Messrs. Ralli Brothers until the transactions with regard to payment were complete. The order of the Court will, therefore, be for the release of these goods to Messrs. Ralli Brothers.

SHIPPING IN ROUMANIA.

The British Vice-Consul at Sulina reports that the grain shipments from that port during 1914 amounted to 5,449,544 quarters, as compared with 6,475,907 quarters in 1913. These figures represent 62.8 and 55 per cent. respectively of the total shipments from Danube ports.

Wheat shipments fell considerably. In 1913 they were 3,140,426 quarters, and in 1914 only 1,580,375 quarters. Their place was taken by a large increase in the shipments of maize, which rose from 1,491,546 quarters in 1913 to 4,793,586 quarters in 1914. The whole export trade has been quite disorganised since August, 1914, and the closing of the Dardanelles on September 27 effectually stopped later trade.

In the case of British steamers loaded with grain which did not leave Sulina in consequence of the closing of the Dardanelles to navigation, the shipowners refused to release the cargoes, and claimed freight in full, pleading *force majeure*. The Roumanian courts held that as the vessels had not started on their voyage, they had not commenced to earn freight. They consequently ordered the release of the cargoes and disallowed the claim of the owners for freight.

The experiences of one or two British shipmasters loading in Sulina during the year seem to warrant the repetition of previous warnings in regard to the advisability of shipowners exercising slightly more care in the acceptance of charterers' names. The peculiar conditions of the trade seem to make speculative business a necessary evil, and the greater part of the charters made come into this class. This being so, it behoves owners to be more than usually careful in their avoidance of firms which are not of the best standing.

Kustendje Berth Contract.

Amongst other clauses, that relating to holidays has again, during 1914, as every year, led to some disputes between charterers and shipmasters. These disputes would be obviated almost entirely in their present form by the redrafting of the clauses concerned. A new form of charter party was agreed upon for the Danube trade some two years ago, but as the much greater part of Danube shipments is made under berth contract, this reform has not been of much practical interest. It is desirable to avoid creating undue difficulty for the semi-speculative charterer, who is the mainspring of Danube shipping activity; indeed, granted the present conditions of the trade, the shipowner should be prepared to facilitate the course of the charterer's business in every equitable manner. On the other hand, it is difficult to see in what manner the partial revision of the berth contract form could prejudice the charterer's interests. Some of the clauses are unnecessarily ambiguous, and could well be clarified with advantage to both parties.

DATES.

SPHINX BRAND.

PRODUCE OF BASRAH.

Selected from the famous Gardens.
Only superior qualities of
Hallawees, Khudrawees, Sayers and Zehdi
are packed.
In cartons of one to four pounds, small boxes, ordinary cases, baskets, tins, and skins.
SPHINX competes with all other brands in quality, packing, and is guaranteed to be clean, sound, fresh, and free from disease.
Sole Proprietor:
BAHJET S. FORAGE, BASRAH.

Engineering Notes.

Boat Lowering and Raising Gear.

It is remarkable that, in spite of what has been said since the Titanic disaster very little has been done in the direction of adopting new, or improving the existing, means for the safety of life at sea. In recent casualties, and especially in recent cases in the Mediterranean where boats have been sunk by the pirates, and where crews and passengers had very hurriedly to leave the ships, more loss of life was due to the defective methods of lowering the boats than to any other cause. Cumbersome blocks and useless ropes stuck fast, and boats could not be moved, or boats full of passengers were tilted, throwing the occupants into the sea. And all that sacrifice of life because shipowners either for the sake of economy or out of mere neglect will not adopt newer methods, but adhere to the old-fashioned ways and means. Once the writer suggested to a Mediterranean shipowner the advisability of discarding the old and cumbersome gearing for lowering his boats and the adoption of other modern methods, which he described to him as more expeditious, safer, and easier to handle; but the owner shook his head, remarking that that might be so, but that the absence of the old picturesque davits with the blocks and ropes, etc., would spoil the appearance of the ship! And there are many shipowners who, for the same reason, like their Mediterranean confrère, adhere to the old method. However, since the Titanic disaster and others that followed it, the question of safety of life at sea has been so prominently brought forward that several inventions have been placed before the Board of Trade, and it must be admitted that the leading British steamship lines are willingly adopting any approved practical devices which will lessen the dangers of sea travelling.

A Simple and Efficient Device.

A simple, very efficient, and quick method of lowering boats at a time of emergency, from what we saw at a demonstration some little time ago, is undoubtedly that in which a device invented by a naval expert is employed. The invention consists of adapting a pair of winches to existing davits and lowering away on a single wire from each davit. By the way, it may be mentioned that this arrangement seems also to meet the requirements of those who, like the above-mentioned Mediterranean shipowner, study appearance. The winches are attached to the davits by means of bolts, and by simply turning a hand-wheel the operator can lower away and at the same time keep a constant brake action on the gear. The winches are very compact, and occupy a minimum of space. They are neat-looking, and can be operated at a moment's notice by any novice without the necessity of fixing blocks and falls, and encumbering the operators with useless ropes. Powerful controlling wheels of simple construction are fitted to the brake gear, which any novice can manipulate by the simple operation of turning the wheel and easing the brake. When the boats are inboard the davits are turned so as to project the winches over the vessel's side, and so are not an encumbrance when not in use. The ease with which the apparatus can be worked, by the half-turn of a wheel, is one of the important features of this new method. With some twenty men in a suspended boat, it was demonstrated that the boat could be dropped into the water on an even keel, or at an angle as desired by circumstances, in less than a minute, whilst by the introduction of treble purchase gearing three different powers can be obtained to raise a full boat's crew and passengers, or an empty boat, as desired, or the empty fall quickly run up for lowering another boat. Two men only at each davit are required to raise from the water level to the upper deck a fully equipped boat with a full crew; while a similarly equipped boat can be lowered from the deck to the water, or, say, a distance of twenty-five to thirty feet, in ten to twelve seconds.

NEWS FROM ALL SOURCES.

The National Bank of Egypt is expected to open its sub-branch at El Obeid some time next month for the gum season.

A branch of the Bank of British West Africa, Limited, has been established at Casablanca, Morocco.

The Serbian Legation in London announces that Dr. Nincic, deputy, formerly professor at the University of Belgrade, has been appointed Minister of Finance in place of the late Dr. Laza Pacu.

The agricultural estates of Mr. Emin Karam, situated in the Kafr Dawar district, Egypt, will be sold by the Mixed Courts at a public auction on December 14. The estates comprise 2,135 feddans of good farming land. The upset price is £E145,000.

The *Ahram* states that the Egyptian State Railway Administration will probably be transformed into a Ministry after the end of the war.

The Parcel Post services to Russia, Persia, and Roumania by sea direct to Archangel will very shortly be suspended, and no parcels can be accepted for transmission by that route after next Thursday. The route *via* Sweden remains open for uninsured parcels under the conditions already announced. Parcels can also be again accepted for transmission to Russia *via* Norway and Sweden. The dates of dispatch will be irregular.

The following official notice is published at Basra: The importation into Iraq of Persian silver or nickel coins of any description in excess of a total value in the case of any individual of Rs. 15 is prohibited. Any breach of this order will be punishable by forfeiture of the coins.

Trade Notes.

Sudan.

The Government Steamers Department has issued a bulletin giving passenger and freight regulations and tariffs in force on the Government river steamers. A copy of the bulletin may be consulted by British shippers interested at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, E.C.

Morocco.

The Board of Trade are informed by the Postmaster-General that articles liable to Customs duty on importation into Morocco can now be accepted at post offices in the United Kingdom for transmission to Morocco by letter or by sample post. In this connection, the Board of Trade are in receipt, through the Foreign Office, of information from his Majesty's representative at Tangier to the effect that, pending the issue of regulations (which are now under consideration) respecting the importation of dutiable articles by letter and sample post, the authorities in the French Zone of Morocco will offer no objection to letter packets arriving by British post in Morocco being delivered to the addressee without being subjected to examination by the Customs authorities.

Tunis.

The Board of Trade are in receipt, through the Foreign Office, of copy of a Beylical Decree, dated October 4 (and published in the *Journal Officiel Tunisien* for October 27), which prohibits the exportation and re-exportation from Tunis of refuse grapes, stone fruit, and bones.

Greece.

H.M. Consul at Piræus has forwarded a copy of the Greek Government Gazette (No. 376) of October 14/27, containing the text of an agreement, in the French language, made between the Greek Government and an American locomotive company of New York City, concerning the supply of accessories for locomotives and tenders. Attached to the agreement is a priced (f.o.b. New York) schedule of the various accessories.

United Kingdom locomotive manufacturers may consult the above-mentioned Gazette at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

Trade of Morocco.

H.M. Consul-General at Tangier reports as follows regarding the commerce of the ports of the French Zone of Morocco and of Tangier during the first six months of 1915, as compared with the corresponding period of last year:—

It is remarkable that, notwithstanding the general derangement of trade on account of the war, the trade of the French Zone has actually increased.

The trade of Tangier, on the other hand, has diminished, imports showing a decline of about 32 per cent.—i.e., from 13,618,505 frs. in 1914 to 9,286,795 frs. in 1915, and exports a decrease of about 36 per cent.—i.e., from 706,409 frs. in 1914 to 456,115 frs. in 1915. The shrinkage is, however, principally due to the insecurity of the roads in the adjoining portion of the Spanish Zone which has brought about a diversion of the trade of the Fez district from the Tangier route to that by Laraiche. French imports into Tangier have decreased by 39 per cent. and British by about 15 per cent., whilst those of Spain have profited, showing an increase of about 18 per cent. This was to be expected, as Spain was able to supply goods which could no longer be brought from belligerent countries. The falling-off in imports at Tangier is most marked in the case of grain and flour, and building materials, including timber, whilst sugar, tobacco, and oil have been introduced in greater quantities.

Comparing the various ports from the point of view of the value of imports, it is found that Casablanca, though showing a shrinkage, is still far ahead of any other port. The most remarkable feature is the rapidly increasing importance of Kenitra; of the ports in the French Zone it has risen to the third place.

In the import trade of the French Zone the trade of Germany, Austria, Belgium, and Russia has ceased to exist, whilst that of Sweden—almost entirely in building timber—approaches vanishing point. The trade of France has maintained the same level as in 1914, i.e., 36,000,000 frs., whilst that of the United Kingdom has risen to 16,400,000 frs. Spanish trade continues to show a steady increase, though still comparatively small. The most startling rise is that of Egyptian trade, which, from a few hundred francs in 1914, has suddenly leaped to nearly 5,000,000 frs. This is entirely due to large importations of sugar. The trade of the Netherlands has also advanced from the same cause.

The articles in which British trade shows the greatest increases are: Cottons, from 7,371,000 frs. to 10,873,000 frs.; candles, from 743,000 frs. to 1,041,000 frs.; soap, from 50,000 frs. to 211,000 frs.; thread, yarn, cord, etc., from 66,000 frs. to 192,000 frs. There is no great diminution of any special article imported from the United Kingdom.

French trade shows the greatest advance in the following articles: Sugar, from 9,131,000 frs. to 17,480,000 frs.; wine from 1,000,000 frs. to 1,703,000 frs.; candles, from 115,000 frs. to 295,000 frs.; and soap, from 114,000 frs. to 229,000 frs. The greatest fall is in the following articles: Hardware, made-up underclothing, hosiery, etc., metals, cottons, glass and glassware, china and earthenware, chemicals, paper and cardboard, and leather work.

Spanish trade has increased principally in underclothing, hosiery, etc., from 80,000 frs. to 462,000 frs.; leather from 46,000 frs. to 220,000 frs.; and woollens from nil to 150,000 frs.; paper and cardboard also show an increase.

ROUMANIAN SUGAR INDUSTRY.

H.M. Consul-General at Galatz reports that the sugar industry has been fostered in Roumania by means of bounties and protective duties, but its encouragement has been of doubtful benefit to the country. By giving the local factories a practical monopoly in the Roumanian market (the import of foreign sugar in 1912 was only 3,400 tons), it has enabled the shareholders, who are foreigners to a great extent, to earn large dividends at the expense of the general public, which has had to pay excessive prices for an article of every-day use.

The industry was started in the hope that it would encourage the cultivation of beet in Roumania, but, apparently, it has had little effect in this direction, as the beets have been imported from Austria. The following figures show the extent of operations during the three years 1911-13:—

—	Beet employed.	Production of Refined Sugar.
	Tons.	Tons.
1911	263,450	34,750
1912	274,370	31,270
1913	274,470	33,650

The amount paid in bounties in 1911 was £152,900, in 1912 £137,588, and in 1913 £148,060.

A British Consular report on the trade of Persia says that Russia's share last year was the largest, while the British Empire came second, Turkey third, and Germany fourth. Exports to Germany last year were small, owing to the poorness of the harvests in Arabistan. "During the year under review," it is stated, "German agents continued to combine purely commercial methods with political intrigue."

COMMERCE IN TURKEY.

(From Our Special Correspondent.)
Athens, November 22.

Reference was recently made to the steps taken by the Ottoman Government to obtain all the cotton produced in the Adana district, evidently for account of the Germans.

According to a report of the American Consul at Mersina, the total cotton crop in the province of Adana for the year 1915 will probably not exceed 50,000 bales. The previous year's crop was 120,000 bales, of which half has been exported, and about 10,000 bales have been used by the local mills, leaving 50,000 bales still on the market, which, together with the new crop, would make about 100,000 bales available for export to Germany, provided transport can be found, which, under present conditions, is not possible.

There is practically no mohair now in Constantinople, and as much as 30 piasters the oke has been paid for good quality. Very little now comes in from the interior, as the Anatolian Railway are only running one train a week, and are burning wood for fuel. The sendings to Germany are made through the Parcels Post in 5 kilo packets.

Twenty piasters per kilo is being offered for sheep's wool for export to Germany, but none is available, as the Government lay their hands on all they can find.

There is very little doing in opium just now, but prices have advanced to 210 piasters per oke.

Some time ago some of the Young Turks formed an association with the object of buying up groceries and other produce in the provinces and selling to the trade in Constantinople. They now seem to have a considerable organisation, and are making huge profits, buying up nearly everything available in the interior at very low prices, and then reselling in Constantinople at considerably higher prices. They, of course, are able to obtain transport in preference to the merchants, and in this way are able to monopolise the markets in Constantinople.

Near East Markets.

BRITISH-MADE DRUGS.

Considerable publicity was given last week to statements dealing with the present scarcity of certain drugs. The shortage and high price of atropine were particularly commented on and attributed to "the dearth of belladonna, from which (according to this statement) atropine is extracted, and which is obtained from Central Europe."

It is most desirable that this common misconception as to the sole source of atropine should be dispelled. Belladonna is one source, but a far more valuable source is (as was proved a few years ago by investigations at the Imperial Institute) the Egyptian hyoscyamus or henbane. This plant grows wild in the Egyptian desert and in the Sudan, and these countries are the sole source of the commercial supply. Before the war Egyptian henbane went to Germany for manufacture, but large quantities of the plant are freely available and a considerable amount is now, through the initiative of the Imperial Institute, in the United Kingdom awaiting manufacture into atropine by drug manufacturers here.

Eserine, also used in ophthalmic surgery, the dearth of which is alluded to in the same statement, is a product of the Calabar bean of West Africa, and presumably it is the extreme present pressure on the manufacturing resources of British drug manufacturers, rather than any scarcity of this British raw material, that is hindering the production of the drug.

As to cod-liver oil, the present high price—five times more than that of last winter—is due to Germany's demand for the Norwegian supplies. But the increased demand will be to the ultimate benefit of the oldest British colony—Newfoundland—which has been for some years manufacturing, under the Norwegian process, the highest class of medicinal cod-liver oil. Supplies of this oil are now available in the home market.

WORLD'S MAIZE CROP.

The Board of Agriculture and Fisheries have received the following information from the International Institute of Agriculture at Rome:—The production of maize in 1915 in the United States is estimated at 1,545,257,000 cwts., or 15.6 per cent. above last year's production. The total production of maize in the following countries in 1915 is estimated at 1,796,496,000 cwts., or 13.8 per cent. increase on last year's production:—Hungary, Italy, Roumania, Russia-in-Europe, Switzerland, Canada, United States, Japan, and Russia-in-Asia.

COTTON MARKET.

Liverpool. Thursday Night.

Messrs. Reynolds and Gibson telegraph:—There has been a very fair inquiry this week, and good business is reported. Quotations show an advance of five points. Sales are estimated at 3,000 bales, against 2,900 last week.

Manchester.

The turnover has again been restricted by the advance in raw cotton, prices at the moment being too dear to admit of general business on anything like liberal lines. Traders at present prices are only willing to put through a few orders, and do not care to speculate.

COTTON SPINNING IN 1915.

Mr. Frederick W. Tattersall, of Manchester, has prepared an analysis of the stocktaking results of Lancashire cotton-spinning companies for the twelve months ending November 30, 1915. Particulars are given of sixty-six companies. The total paid-up share capital of these concerns amounts to £2,326,969, and loan capital is £906,185. At the beginning of the year spinners were very adversely affected by the war, but some producers of coarse yarns were doing well owing to the active demand in heavy cloths to meet the requirements of the Government. The March stocktakings were, therefore, irregular and, on the whole, disappointing. There was some improvement at the end of June, and

most concerns were in a position to report small profits at the end of September. Recently the margin of profit for spinners has much improved as a result of the shortage of labour and the lessened supplies of twist and weft upon the market. The American section, on the whole, has done better than the Egyptian spinning department. The total profit for the twelve months of the sixty-six companies, after paying interest on loans and allowing for depreciation, only amounts to £5,509. This works out at an average profit per company of £89, as compared with £57 in 1914. The percentage of profit on share capital is, therefore, less than 1 per cent.

PRODUCE REPORT.

Currants.

LONDON, December 9.

The market is lacking the usual seasonable activity, and this may be attributed partly to the difficulties experienced by the trade in forwarding to the country, and partly to the high range of values. The demand, consequently, is limited, and a hand to mouth policy is, evidently, adopted by the buyers. Provincials and Pyrzos are quoted 39s. to 40s., Amalias 40s. to 42s., Gulf 43s. to 48s., Patras 43s. to 46s., Vostizza 44s. to 53s.

The stocks of currants in London on November 30 were 6,830 tons, against 5,487 tons last year the same period, and 8,725 tons in 1913.

Sultanas.

The supplies are very limited, and the demand moderate. The principal business is being done in Greek fruit. Cretans sell well at full prices, while Afghans are comparatively cheaper. The stocks of sultanas, of all kinds, in London on November 30 were 1,057 tons, against 2,494 tons last year, and 5,507 tons in 1913 the same period.

Figs.

The market is quiet and prices are unchanged. There is a fair supply of Calamatas and Spanish, the former being quoted 40s. to 42s. and the latter 35s. to 40s.

Dates.

There has been a better demand this past week and prices are firmer.

Oils.

Linseed oil is quiet in all positions at about unchanged prices. Cotton oil is very firm, crude spot in pipes £35 10s. to £36, refined pale pipes £37 and barrels sweet £42 to £43 as to make. Rape oil is firm, ordinary brown naked spot £40; English refined in barrels £43 10s.

Oilcakes.

Linseed.—There is a better demand; and owing to shortness of supplies prices have advanced fully 5s. per ton since last week.

Cotton Cakes.—Only small business is passing, but prices are steady for Egyptian ex ship, for spot, or near at hand £9 per ton being asked, Bombays also £9, whilst English sells well at £9 10s.

Locust Beans.

There is no offering for present delivery, and quotations are only nominal at £9 per ton for whole and £9 10s. for kibbled.

Gums.

There is very little doing. Arabic, Turkish sorts £3 5s. to £4 2s. 6d., Ghezira 15s. to 2s. 6d. East India common to fine £2 5s. to £2 15s. Myrrh 96s. to 100s. Tragacanth, first, £28 to £42, low to good sorts, £4 10s. to £6 12s.

THE FRENCH WAR LOAN IN EGYPT.

(FROM OUR OWN CORRESPONDENT.)

PORT SAID, November 30.

Striking comparisons are being drawn here between the terms and general conditions of the French and British War Loans. The British Loan being issued at par at 4½ per cent. yielded to the investor abroad, after deduction of income-tax, little more than 3½ per cent., a small return under ruling conditions to Egyptian and investors other than those who subscribed from purely patriotic motives. The French Loan paying 5 per cent. at 88 is not only free of income-tax, but at the present high rate of exchange on Paris, can be subscribed for in Egypt at a figure which yields about 6¼ per cent., truly a remarkable yield on a French Government security.

The fact that the loan is exempt from taxation, present or future, will no doubt afford a strong inducement to the foreign investor to subscribe liberally, a point which our financial authorities at home would do well to bear in mind when the next British loan is issued.

COMPANY MEETING.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

The seventy-fifth ordinary general meeting of the Peninsular and Oriental Steam Navigation Company was held yesterday at the head office, Leadenhall Street, the Right Hon. Lord Inchcape, G.C.M.G., K.C.S.I., K.C.I.E., the chairman, presiding.

The Secretary (Mr. Frederick John Abbott) read the notice convening the meeting.

The Chairman, who was warmly greeted, said, *inter alia:* The year under review has been quite abnormal owing to the war. No less than forty-two steamers of the P. and O. fleet have been taken from their work from time to time, and thirty-one are still being made use of by the Government. The board have, in consequence, had a considerable strain put upon them to maintain the regular mail services, but you will be glad to know that, so far, they have not been obliged to cancel a single departure.

The levy of 30 millions on capital indicated by the Budget—a very moderate estimate, I think—will be lost to reproductive enterprise in this country. While it may help to pay the expenses of the war for the moment, I think it is recognised that it is not in the interests of the country to withdraw large sums from earning taxable revenue. When the war is over a large income will be required to meet obligations incurred by the war, to carry on the administration of the country, and to pay for the country's defence. I am glad to observe that the Chancellor of the Exchequer has stated that the special levy on an increase in profits instituted in this emergency is not to form an integral part of the fiscal system of this country. There is no doubt that most shipping companies have made money during the last twelve months owing to the rise in freights, brought about by so many ships belonging to ourselves and to our Allies having been engaged for the purposes of war, and through the German and Austrian mercantile marine being driven from the sea. The aftermath of the war has to be reckoned with, and the future of the shipping industry of Great Britain will doubtless have much to contend with, especially as neutral and some other shipowners who have been reaping a far richer harvest than British shipping, will find themselves in a much better position to develop than will be the case with British shipowners, but, speaking for myself and for the P. and O. and British India Companies, I have no fear for the future. It may be an anticipation of coming bad times that is inducing some shipowners in this country to take advantage of the present inflated prices of ships to dispose of them and to retire from business. For the P. and O. and British India Companies there is no such *dolce far niente*. They are carrying on a national work, and they could not, if they would, wind up and go into retirement. The steamers which have been commandeered by Government as armed cruisers, transports, and hospital ships are being paid for at rates leaving but a very moderate margin when everything is taken into consideration. The shipowners have met the Government fairly and reasonably, their disposition having been to aid the country in this national emergency.

Over 50 per cent. of our steamers are in Government service. The bulk of the remainder of our fleet has been hard run maintaining our onerous mail contract, and the demands on the limited space of our fast ships for the carriage of mails have been altogether unprecedented. Owing to dislocations in other quarters, and for other reasons, our ordinary mails have greatly increased in bulk, while the letter and parcel mail to the Mediterranean and Egypt is ten times greater than it was some six or eight months ago. Our vessels have now to find accommodation for mails frequently occupying 1,200 to 1,800 tons of space, which leaves, as you will readily understand, very little room for cargo, and we are obliged under our contract to carry all mails that are offered to us. We find ourselves in consequence under a considerable disability, but I make these remarks in no spirit of complaint—on the contrary, we have the satisfaction of feeling that we are doing our duty by the Post Office, which we have served now for an unbroken period of seventy-eight years. To use the formula which was wont to appear in the good old days in the gracious speeches from the Throne, the P. and O. Company is at peace with all with whom it does business—the Admiralty, the Post Office, its fellow-shipowners, its cargo constituents, its passengers, and its employees. In carrying on a great and intricate business such as that of the P. and O. Company, with its mass of detail, questions, and even complaints, must necessarily sometimes arise, but it is the endeavour of the board, and it will continue to be its endeavour, to maintain a satisfactory service, to do its work efficiently, and to retain a loyal and a contented staff. The war has made it impossible to lay down any new ships with a prospect of early delivery in the past twelve months, all the yards being for the most part occupied with Government work, and the only vessels we have under construction are two high-class mail steamers. The board, however, have an extensive building programme in view, and as soon as circumstances permit we shall arrange for the construction of a number of vessels, the plans and arrangements of which are being carefully considered, and the directors hope that before long circumstances may permit of their being able to place contracts for a number of vessels which will enable the company to carry on its mail, passenger, and cargo services to the satisfaction of the Government and the public, and to meet developments. I regret to say that our cargo

steamer Socotra has been wrecked in the English Channel since the issue of our report. She was homeward bound from Australia, had no passengers on board, and there was no loss of life. Being eighteen years old, she stands at a low value in the company's books, but she was a very useful ship, and can ill be spared at the present time. I am also sorry to say that a fine new British India steamer of 5,312 tons, the Umeta, of which we only got delivery from the builders a year ago, and which was engaged in Government service, has been torpedoed in the Mediterranean within the last few hours. The loss of this vessel falls upon the Government, but she cannot be replaced for many months. The fate of half of the crew, or nearly half, is not yet ascertained, and they are reported as missing, while the other half has been landed at a Mediterranean port. You will realize that with vessels constantly in the danger zone—no day ever passes in which we do not have at least three or four ships within it—the past year has been an extremely anxious one for the directors, and their anxieties do not grow less as the danger zone enlarges.

You will be glad to know that the amalgamation of the P. and O. and British India Companies, which was completed about fifteen months ago, is working in every respect satisfactorily, and that considerable advantages have already been realized by the complete fusion of interests, and, as time goes on, these should be increased. After a year's experience of the administration of the two companies, I am glad to say that the anticipations of eighteen months ago which led the directors to bring about the amalgamation are being realized. Our basis has been broadened, our interests are now in all respects identical, the combined experience of our staffs is a most valuable asset, while the financial assistance which one company can render to the other has material advantages. It may be that in some years the P. and O. section of the combine will be good and the British India section will be poor, while the reverse may possibly happen; but we are sanguine enough to hope that, taken together, we shall be able to average out a modest return to the proprietors on what is, considering the intrinsic value and earning power of our joint assets, a very small capital. When paying the interim dividend on our deferred stock in the spring the board gave it free of income-tax. The tax was then 2s. 6d. in the pound. Now it is considerably more, but having started on what you may regard as a rake's progress, we propose, with your approval, to apply it to the final dividend and bonus—at least, for this year.

The motion that the report be adopted was carried unanimously. The motion, "That a dividend for the half-year ended September 30 last of 2½ per cent. on the preferred stock, less income-tax, and a dividend of 5 per cent. with a bonus of 5 per cent. on the deferred stock, free of income-tax, as recommended in the report, be now declared, and that payment of the same be made on and after the 16th inst," was likewise carried. Ernest Haliburton Cunard, Esq., and Peter Williams, Esq., were re-elected directors of the company. Sir Alexander Pedler proposed, "That the remuneration of the directors be paid free of income-tax for the time being in force, and that the payment of such tax by the company in the past be, and is hereby, confirmed," which was also carried.

COMPANY REPORTS.

Anglo-Persian Oil Co.

The directors submit their sixth annual report and audited balance-sheet and profit and loss account for the year ended March 31, 1915. The profit for the year, after charging debenture and other interest, proportion of home expenses, and depreciation, amounts to £90,431 8s. 4d., from which has to be deducted the balance at debit of profit and loss at March 31, 1914, £26,711 3s. 10d., leaving a net available balance of £63,720 4s. 6d. From this there fall to be deducted £55,841 14s., representing the dividends paid on the preference shares at the rate of 6 per cent. per annum, as follows:—In respect of the half-year ending September 30. 1914, £29,540 6s. 7d. (less amount received from the Burmah Oil Co., Limited, under their guarantee, £3,698 12s 7d.), and in respect of the half-year ending March 31, 1915, £30,000, leaving to be carried forward, £7,878 10s. 6d. On February 5 last a small portion of the company's pipe line was damaged by local Persian tribesmen. The transport of oil was thereby rendered impracticable for a period of about four and a-half months, and refining operations had necessarily to be suspended for about a corresponding period. Under the terms of the company's concession, the Persian Government are liable for the consequent loss, but no credit in respect thereof is taken in the accounts now submitted. A claim for the loss sustained will, in due course, be presented, and the amount thereof will be recovered from the royalties payable. The Turkish Government before the outbreak of hostilities with that country requisitioned oil and other property of the company to the value of £51,004 9s. 3d. Although it is expected that the greater part if not the whole of this amount will be recovered, no credit has been taken for it in this year's accounts. The various extensions for which capital has been provided by the British Government are being proceeded with as expeditiously as possible. The laying of the additional pipe line has been considerably delayed by the local disturbances above referred to and by the consequent shortage of transport facilities, but no interruption was thereby caused to the refinery extensions, the work on which is well advanced. The crude output of the First Exploitation and Bakhtiari Oil Companies has not been affected by the unsettled conditions prevailing, but owing to the damage to the pipe line the whole of the production from the flowing wells in excess of storage capacity had to be burnt during the period that the pipe line was out of use. The further drilling for reserve production, referred to in the last report, has not been prosecuted so vigorously as was intended owing to the delay which has occurred in laying the new pipe line and to the excessive production from existing wells. Attention has therefore been chiefly directed to drilling in new fields which have been favourably reported upon. Owing to continued ill-health Mr. C. W. Wallace has resigned his seat on the board, and Sir T. R. Wynne, K.C.S.I., K.C.I.E., was elected to fill the vacancy; Mr. H. E. Nichols has also been elected to a seat on the board. Under Clause 84 of the Articles of Association, the two latter now retire, and, being eligible, offer themselves for re-election. Mr. John T. Cargill, Mr. W. Knox D'Arcy, and Sir Campbell K. Finlay retire by rotation, and, being eligible, also offer themselves for re-election.

Imperial Bank of Persia.

The directors report for the year ended September 20 that the gross profits, after making provision for bad and doubtful debts, amount to £111,291 14s. 3d., to which has to be added £23,358 2s. 7d. brought forward from last account, making a total of £134,649 16s. 10d. After deducting expenses of management and general charges amounting to £74,562 6s. 2d., the sum remaining amounts to £60,087 10s. 8d. From this sum, £4,000, the amount due to the Persian Government in terms of the concession, has to be deducted, and also income tax, £6,980, leaving £49,107 10s. 8d., which the directors propose to deal with in the following manner:—Six months' interim dividend, at the rate of 3s. per share, paid June 9, 1915, £15,000; final dividend, at the rate of 3s. per share, to be paid on December 17, 1915, £15,000; and carry forward to new account, £19,107 10s. 8d. The directors much regret to say the Right Honourable Lord Inchcape felt compelled to resign his seat on the board in the early part of the year, owing to the pressure on his time by public engagements, as well as his duties as chairman of the P. and O. Company. He, nevertheless, continues to take a keen interest in the affairs of the bank. The retiring directors are Sir Hugh S. Barnes and Mr. C. Greenway, who, being eligible, offer themselves for re-election.

Khedivial Mail Steamship and Graving Dock Co.

The directors report for the year ended June that the trading profit for the year, including Government subsidies, and after charging insurance of steamers and all salaries, office and general expenses has amounted to £53,383 13s. 8d., and after deducting therefrom debenture and loan interest, depreciation, directors' and auditors' remuneration, debenture trustees' fees, and the whole of the balance of the cost of debenture issue, amounting together to £33,652 15s., there remains a net profit of £19,730 18s. 8d., to which there is to be added the balance brought forward from the previous year's accounts, after deducting therefrom £8,901 17s. 9d., representing the dividend on the preference shares for the half-year ending June 30, 1914, paid in May last, making the balance shown in the profit and loss account £28,632 16s. 5d. Out of this there has been paid since the date of the accounts, one year's dividend, to June 30, 1915, on the preference shares, absorbing £10,995 12s., leaving a balance available for appropriation of £17,637 4s. 5d., out of which your directors recommend the payment of a dividend at the rate of 5 per cent. upon the ordinary shares, which will absorb £5,000, leaving to be carried forward to the next account £12,637 4s. 5d. During the major portion of the period under review the greater part of the company's regular services had perforce to be suspended, owing to the state of war with Turkey. Many of the steamers thus rendered idle were, however, requisitioned for Government work, while others have been profitably employed in home waters. This complete revolution from the ordinary routine services has been a cause of considerable strain on the staff both in Egypt and at home, and the board wish to express their appreciation of the admirable work done in circumstances of no little difficulty. The board regret to have to report that the s.s. Saideh was sunk by a submarine on June 1 off Ramsgate. All the crew, with the exception of eight who were killed by the explosion, were saved in the ship's boats. During the year under review the s.s. Assouan and the s.s. Minieh were requisitioned and purchased by the Admiralty. The company's fleet is thus reduced by three ships. The directors to retire are Mr. S. Wellhoff and Mr. Francis Allen, who offer themselves for re-election. The retiring auditors, Messrs. Edwin Guthrie and Co., also offer themselves for re-election.

COMPANY RESULTS, &c.

Anglo-Egyptian Oil.—Gemsah, week, 500 tons, including 266 tons recovered from sediment; previous week, 452 tons, including 208 tons recovered from sediment. Hurgada, week, 337 tons, against 438 tons.

Anglo-Persian Oil Company.—The annual meeting of shareholders will be held at Winchester House (Hall No. 174), Old Broad Street, E.C., on the 20th inst., at 12 noon.

European Oilfields Corporation.—Week ended November 28, 83,500 poods. Price of crude oil at Blacktown 51½ copecks per pood.

Greek Five per Cent. Loan of 1890 (Piræus-Larissa Railway).—Coupons falling due on the 15th inst. should be presented for payment at the offices of Messrs. C. J. Hambro and Son for payment of 32 per cent. in gold of their face value.

Imperial Bank of Persia.—The annual meeting of shareholders will be held on the 13th inst., at 12.30 noon, in the Cannon Street Hotel.

Khedivial Mail Steamship and Graving Dock Company.—The annual meeting of shareholders will be held at Winchester House, Old Broad Street, E.C., on the 20th inst. at 12 noon.

Land Bank of Egypt.—The annual meeting of shareholders will be held on December 21 at the offices of the bank at Alexandria.

Suez Canal.—Receipts for the 6th inst. amounted to 150,000 frs., as compared with 270,000 frs. for the corresponding day last year.

THE ALEXANDRIA WATER COMPANY, LTD

INTERIM DIVIDEND.

Notice is hereby given that an Interim Dividend of FOUR SHILLINGS per £5 share on COUPON No. 54 is Payable on and after the 15th December, 1915, at Messrs. Barclay and Company, Limited, 1, Pall Mall East, London, S.W., and 54, Lombard Street, London, E.C., or at the Anglo-Egyptian Bank, Limited, in Alexandria, upon the making of a declaration as to ownership in the form required by the above Banks, forms of which will be supplied upon application.

Dated Alexandria, 22nd November, 1915.

By Order of the Board,
H. R. C. Blagden,
Manager.

NOTES OF THE WEEK.

As the result of an Allied War Council held in Paris on December 9, any indecision in regard to the fate of the Salonika expedition has been removed. To withdraw the Anglo-French troops after their experiences of the last two weeks would have been a fatal confession of weakness. By reinforcing them until the safety of the position at Salonika is placed beyond any doubt and a reasonable chance offers of assuming the offensive the Allies leave the enemy's campaign in the Balkans still "in the air." Even if no advance be made from the coast until the worst of the winter weather has passed, the presence of the French and British at Salonika, of the Russians in Bessarabia, and of the Italians at Valona will probably prevent the Germans from embarking with any conviction upon the great schemes which the re-opening of through communication between Berlin and Constantinople at first held out to them.

The Allied line which had to fall back from Krivolak and Strumnitza when the Serbians were driven from Monastir found no permanent resting-place until it was back again in Greek territory. During the retreat the British troops bore the brunt of the Bulgarian attack, and the stand made by the 10th (Irish) Division near Lake Doiran will rank among the prominent features of the war. For the moment the enemy has called a halt outside Greek territory, the main Bulgarian force being between Ghevgeli and Doiran, with probably an Austro-German force near Nevrokop, further east, while a Turkish division is said to have been brought up to the Greek frontier on the Dedeagatch-Salonika railway. Whether Greece is to be invaded remains to be seen. The bulk of the Greek troops that were in or near Salonika have been removed, one division having gone to Seres. The Allies have secured freedom of action for their military operations, but Greece in the event of an invasion would not seem to be in a position to oppose it, even if she were minded to do so. It has been hinted that out of deference to Greek susceptibilities the Bulgarians will refrain from entering Greece, and will leave the task of following up the Anglo-French army to the Austro-German and Turkish troops. In all the circumstances the Greeks may be better pleased that the Turks rather than the Bulgarians should overrun Greece; but the distinction would only be possible to a nation that had made up its mind not to fight whatever happens.

The supposed consideration of the Bulgarians for Greek feeling has not survived many days in the case of Monastir. According to the latest reports, a purely Bulgarian administration is being installed in the town, and the German Minister at Sofia is said to have declared that Monastir is henceforth the irrevocable possession of Bulgaria. If the Bulgarians are to exercise a self-denying ordinance in regard to Kavalla, they could hardly be expected to keep their hands off Monastir as well. German and Bulgarian solicitude for Greece is of interest and instructive. It must, however, be carried a long way in order to free King Constantine and his advisers from embarrassment over the course of events.

King Constantine and M. Venizelos are availing themselves of the services of *The Times* as a friendly neutral for an exchange of views. In an interview with its special correspondent at Athens M. Venizelos has replied to a number of points raised in the King's message of last week. On the subject of the Greco-Serbian Treaty he gives his Sovereign the lie direct. It is not a fact, he states, that the terms of the Treaty exonerated Greece from rendering assistance to Serbia in case the later were attacked by other Powers as well as by Bulgaria. "The Treaty was absolutely binding upon Greece." It would certainly be a matter for surprise if the Serbian and Greek Governments when negotiating the Treaty had specifically provided for a general European conflict. King Constantine was more likely reading his own interpretation into the agreement than claiming textual authority for a non-intervention clause.

Of no little interest is the passage in which M. Venizelos gives in detail his reason for holding aloof from the new elections—a step which does not command any wide support among his friends outside Greece. Some three-eighths of the electorate, he points out, are

Digitized by Google

now with the colours. While the Government were prepared to grant leave to their supporters to vote, they would refuse it in the case of the supporters of M. Venizelos. Among the Deputies affected by the mobilization fifty-three are Venizelists and twenty-three Ministerialists. The former would be given six days' leave, the latter full leave, with the result that immediately after the elections the Venizelist Deputies would be obliged to leave for the front, thereby diminishing, and possibly extinguishing, the Venizelist majority in the Chamber. "The actual comedy," added M. Venizelos, "was too great, and I and my party have no course open except silently to protest by absenting ourselves. The Greek people fully understand the situation, and are only awaiting the termination of the foreign crisis in order to make their voice heard." Comment upon these disclosures regarding Greek political life is not called for here. We may note, however, the rather ominous ring in the final sentence, which would acquire special significance if the Bulgarians and Turks were to overrun a portion of Greek territory.

The renewal of enemy activity on Gallipoli Peninsula points to the Turks having received further supplies of munitions as a result of the opening of communications across Bulgaria. During December 7, 8, and 9, says a recent French *communiqué*, there was increasing intensity of fire on the part of the Turkish artillery, which very violently bombarded our first lines with guns of every calibre. On both sides, it is added, mining warfare has been resumed with growing activity. In this connection and in view of reports of a Turco-German concentration in Turkey, there can be no doubt that it would give wide satisfaction if the Government could reassure public opinion regarding the position of the Allied forces on Gallipoli. The prevailing impression, after all that has been said on the subject by Ministerial spokesmen, is that the Anglo-French troops are lined up against an impregnable position. So long as the Turks remained short of ammunition the situation might be maintained without further disadvantage for an indefinite period; but as soon as the Turks receive unlimited supplies of munitions, there is something uncanny in the prospect of leaving the men as they were without any efforts to create a diversion in their favour. No doubt vigorous action based on Salonika would once more relieve the pressure on Gallipoli, and this is one of many reasons for pushing on with the preparations for a winter campaign of at least sufficient proportions to keep both Bulgarians and Turks busy. The official answer given this week in the House of Commons that it is estimated that Turkey now has some 650,000 men in the field—a number that might be increased to a million with adequate supplies of German munitions—indicates the extent of the success achieved by German diplomacy over that of the Allies in securing the support of Turkey and Bulgaria.

It is satisfactory to find that the Russian troops in Northern Persia have lost no time in dealing with the German menace. While one force was advancing for the protection of Teheran, another body moved south-west from Kazvin and engaged the rebel force which was based on Hamadan. The Russian victory is reported to have been complete. The enemy, whose strength is put at 8,000 irregulars and 3,000 gendarmes, with an adequate supply of rifles, machine guns, and ammunition, fled in complete disorder from the Sultan Bulak Pass, where he had been fortifying himself under German auspices. A preliminary engagement of this nature ought to exercise a good effect very widely in Persia.

In our issue of last week our Cairo Correspondent explained the action of the Egyptian Government in withdrawing the small outposts which in peace time had been maintained at Solloum and Sidi Barani on the coast near Egypt's western frontier. In the place of the two small posts a strong garrison was to be maintained at Mersa Matrouh, the terminus of the railway from Alexandria, and nearly 150 miles east of the frontier. On December 11 a reconnoitring force from this point encountered a body of 300 Arabs. They were driven off after an engagement, losing eighty killed and thirty wounded, but the casualties of the British force amounted to sixteen killed and eighteen wounded, three of the latter being officers. Two days later more serious fighting took place over the same ground. A British column under Colonel Gordon came into touch with an Arab force, estimated at 1,200 strong, under Gaafar Pasha, equipped with guns and machine guns. The enemy attacked vigorously, but were driven back with heavy loss. As daylight failed, the British force was obliged to withdraw to its camp, which was reached after dark. Our losses on this occasion were four British and four Indian killed, twenty-three British, including five officers, and fifteen Indian wounded. The presence of a hostile Arab force so far within the Egyptian border, armed with artillery and machine guns, removes all doubt regarding the measure of success that Turco-German intrigue has achieved among the Senussi and Tripoli Arabs. A repetition of these encounters might point to the advisability of strengthening the hands of the friendly elements among these tribesmen with a view to encouraging them to deal with the trouble themselves.

The Mesopotamia Expedition remains on the defensive at Kut-el-Amara, and the Turks are engaged in testing the strength of the British position. General Nixon reports heavy musketry fire for an hour on December 12, without any attempt on the part of the Turks to advance. "A heavy attack on a village on the right bank was repulsed. On the 13th all was quiet." More satisfactory is the information that reinforcements continue to be sent up to General Nixon as they arrive. The announcement that Sir George Buchanan, M.Inst.C.E., chairman of the Rangoon Port Trust, who had charge of the works recently completed on the Rangoon river, has been placed on special duty for dredging operations in Mesopotamia calls attention to one of the many ramifications of the new responsibilities Great Britain is incurring in the Middle East. Dredging is required not only on the Shatt-el-Arab and Tigris, but on the great bar at the mouth of the former. Dredgers have been seen in these waters under the Turkish régime, but whether they have done any real work is an open question. The extension of the operations in Mesopotamia renders the makeshift expedients that did duty at first in connection with the landing and transport of our troops at the head of the Persian Gulf wholly inadequate to-day.

A summary of German intrigues in Persia appears in the *Novoe Vremya* of November 27, and may be reproduced here, as it adds not a little to the details hitherto received in this country. "The chief of the Persian gendarmerie, Colonel Edval, on November 15, when the Shah was hesitating at the eleventh hour, was energetically persuading him to leave the capital, together with Prince Reuss and the Turks. He did not attempt to conceal his participation in the conspiracy, so sure was he of the success of it and of his immunity from penalty. Another officer of the gendarmerie, Captain Oenset, furnished a German called Schonemann with machine-guns for his attack on our Consul and the British Consul of Kengavar. Now he is leading the German band which attacked the Persian Cossacks in Kurdistan. A third officer captured the British Consul at Shiraz. The fourth, Major Göstrom, initiated the massacre at Hamadan. With the assistance of the gendarmerie the Germans erected at Burujird, near the line which is called our sphere of influence, a large munition factory. Eight hundred gendarmes arrived at Hamadan. Large supplies of munitions have been sent to Ispahan for the revolutionary bands assembled there. A batch of 250 Austrians were also sent to Ispahan. Finally, the Teheran detachment of the gendarmerie carried off from the Teheran arsenal all the munitions and delivered them to the camp of Prince Henry of Reuss."

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, December 6.

"Our Day" in Egypt.

The accounts of "Our Day" in Egypt have now been definitely closed. They had been left open owing to the difficulty in getting final and exact figures from the provinces, where right up to the last moment subscriptions were still coming in from the Egyptian masses. The exact total is £E112,534.001, or £115,419 9s. 9d., which is slightly in excess of the estimate recently sent you, and which must be considered in every respect a magnificent response to the appeal for the British Red Cross. In announcing the final figures and expressing his cordial thanks to all who have contributed to this splendid result, the High Commissioner states that "in contributing so generously to relieve the sufferings of the sick and wounded soldiers and sailors Egyptians have given convincing proof of their sympathy and good-feeling towards the Protecting Power and their sense of obligation to those brave men, many of whom have suffered wounds or disease in the defence of the peace, security, and interests of Egypt." It is interesting to note that in a recent speech Sir Henry McMahon declared that the British Red Cross was spending £1,500 per day in this part of the Mediterranean, and that consequently Egypt by its contribution has met the entire expenditure of two and a-half months.

Enemy Establishments.

The G.O.C. has just appointed a British controller for the supervision of the Egyptische Hopotheken Bank. This establishment was founded some four years ago by the Deutsche Orient Bank, and was consequently one of the "branches" of the Wilhelmstrasse in this country. It is somewhat surprising, seeing that the mother-bank was placed under control almost a year ago, that a similar step was not taken simultaneously, or at any rate very much earlier, in regard to this mortgage establishment. Still, it is better late than never, and presumably, although they have not told us so, the authorities had some pretty good reason for leaving its administration free up to now.

What, however, requires some explanation is the position of the Deutsche Baumwollpresse Actiengesellschaft. This company was founded in 1906, also under the auspices of the Deutsche Orient Bank, and carried on cotton-pressing operations. Shortly after war broke out it endeavoured to change its name, alleging, if I remember rightly, that the major portion of its capital was now British. The military authorities, evidently not satisfied with the proofs produced, refused their consent, and on June 10 the general public was warned by a notice in the *Official Journal* not to have any dealings with the company under the new name which it pretended to have assumed (Egyptian Cotton Presses Co.).

The company has now issued its report for the year ending August 31, and from this we learn that whereas the cotton handled fell off by over 100,000 bales, it was enabled to recoup some of the profit lost by this diminution by the pressing of fodder, which it undertook for the British Army, and that it held its annual general meeting on November 5, when amongst the business transacted was the re-election of the outgoing directors, Messrs. Lindemann, Lender, and Ritscher. The position is almost incredible, even granted the lax manner in which we have handled such questions at home. Here we have an enemy establishment working freely on British soil—no English controller has been appointed—and doing work for the British Army, yet coolly proceeding to re-elect directors who are enemy subjects, and two of whom have figured prominently in connection with anti-British administrations in this country. The fact that no English controller has been appointed, and that although they refused to allow the change in name, thereby admitting that it was an enemy company, the authorities permitted it to continue operations and gave it a contract for the pressing of fodder for the British Army, leads one to assume that they had some indirect control over its administration. Yet if there was any control assuring that the company's operations would do no harm to British interests, how comes it that at the annual general meeting the re-election of enemy directors was possible? There would certainly appear to be something radically wrong somewhere.

REPORTED DESIGNS ON EGYPT.

According to private advices received in New York by the Syrian colony, in letters which have been smuggled out of Turkish territory, the Turks, with the assistance of German engineers, are pushing a railroad towards Suez across 150 miles of desert, and are laying parallel therewith a water pipeline. When the Turkish troops, under Turkish officers, previously succeeded in crossing the desert, their water supplies were transported in tanks, says the Central News correspondent, and after their defeat they fell back in disorder. If another attempt is made against Egypt it will apparently have the benefit of all that German officers and engineers are able to effect.

The water mains are being laid from Bir-es-Seba, where there are wells, and the water will be forced through the pipes by powerful pumps. Stations will be provided at intervals along the pipeline where troops may obtain supplies of water. According to the *Mirror of the West*, a daily Syrian paper, the Turks are inciting the Moslems against the Syrians. The country is being stripped of its olive and cedar trees, which are being used as locomotive fuel, and all manner of repressive measures have been put into force.

The Exchange's Rome correspondent reports that, according to the Agenzia Nazionale, the Kaiser, at the recent conference with the Austrian Emperor, asked Austria to contribute one army corps towards the proposed expedition against Egypt, but the Austrian Emperor insisted that it was impossible for Austria to make this additional sacrifice.

TURKEY AND BULGARIA.

The *Mokattam* (Cairo), in a recent article on the Balkan situation, considers that the man who named Egypt a "land of wonders and curiosities" could have known nothing about the Balkans. The problem raised by the present alliance between Turk and Bulgar it regards as especially interesting, and as promising material for unfathomable differences in the future. The following extract from the above paper is taken from the *Egyptian Gazette*:—

The Bulgarian politicians—the children of recent times in statesmanship—have supposed that they could deceive their old masters and employ them for their own benefit to serve such desires of the Bulgarian Government as to silence opposition and avert the proposed Russian invasion of their coasts; and that they could then thank the good Turks for their friendly services and wish them a safe return to their country. But the Turks seem to be unwilling to be treated in this manner by their ally . . . . . Fearing the existence of large numbers of Turkish troops in Bulgarian territory, the Bulgarian newspapers are now endeavouring to prove that Bulgaria's mission in the Balkans will come to an end after the occupation of Macedonia.

The paper considers it not unlikely that Germany may ultimately sacrifice Bulgaria in order to satisfy Turkish aspirations.

CYPRUS NOTES.

(From a Correspondent.)

An Isle of Rest.

Government has been taking active measures to provide quarters for our wounded soldiers, of whom over 1,000 are expected. In Limassol large wooden huts are being constructed, contracts for timber having been entered into with local merchants. The stores of the Forest Department cannot meet the demands. Wooden "barracks" are also being put up in other parts of the island, to serve not only as hospitals, but also as accommodation for refugees, of whom very considerable numbers are expected to seek shelter in Cyprus. The numbers will no doubt depend upon circumstances. History repeats itself, for the shores of Cyprus have often afforded a hospitable retreat during wars and times of persecution in neighbouring lands.

A Successful Show.

An agricultural and industrial show held at Kyrenia on November 22 brought together various interesting exhibits, especially of live stock. Sir John Clauson attended with Lady Clauson, who distributed the prizes. A mare, whose sire belongs to the stud at the Government farm at Athalassa, near Nicosia, was greatly admired, and was typical of the improvement in the island breed of ponies, which is being steadily maintained. In addition to the prize awarded, the High Commissioner personally presented the winner with another prize of £5. Generous contributions to the Kyrenia Hospital were made by this and other exhibitors.

Improvements at the Museum.

The Committee of the Cyprus Museum held its last meeting on November 26, under the presidency of the High Commissioner. A new committee will be elected in January. The antiquities now housed in the museum are of great interest. Additions are made by gifts and occasional excavations, as funds permit. The large new rooms recently added will afford space for a number of still unclassified objects, and will greatly add to the growing attractions of this already important collection.

THE SKIRMISH AT KANTARA.

(From Our Own Correspondent.)

Port Said, November 30.

The skirmish on the 23rd, east of Kantara, briefly announced in an official *communiqué*, between Indian cavalry and a marauding band of Bedouin, proves to have been quite a small affair, and is not considered to be the immediate precursor of a military attack by regular forces. The dozen prisoners taken, who have been sent up to Cairo, were a bedraggled lot, and without uniform of any kind.

I learn that among the seven killed was a prominent Bedawi sheikh, who has organised several moonlighting raids on the Canal banks in the past, and is said to be responsible for certain "swimming parties," which in recent months have been a source of some annoyance to the authorities, without doing any actual harm.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, December 1.

Fresh Representations by the Powers.

The second démarche made by the Powers to the Greek Government on Friday last has brought about a very critical situation. The demand of guarantees for the security and freedom of movement of the Franco-British troops at Salonika (which consist chiefly in the evacuation by Greek troops of the Salonika sector, and placing the railways at the disposal of the Allies, as well as policing Greek territorial waters to keep off German submarines and destroy their eventual bases) has fallen like a thunderbolt upon official circles. As soon as the Government received this communication endeavours were made to ascertain through the medium of Greek Ministers abroad whether these requests bore the character of mere proposals or of demands. Nevertheless, the fact that an Allied squadron still lies off Milos, which fact it is endeavoured to hide from the public, would seem sufficient to show that, in spite of its courteous wording, the nature of the démarche is absolutely imperative. In view of this fact the Government, recognising the impossibility of a categoric refusal, drew up, in co-operation with the General Staff and the King, an equivocal reply, which M. Skouloudis handed to the Ministers of the Entente on Sunday last. The Note stated that the Government were prepared to submit the question of the evacuation of Salonika by the Greek troops to the General Staffs of both sides, and that their decision would be accepted, provided it did not constitute an infraction of the neutrality of Greece or any encroachment on her sovereign rights. At the same time, it seems, attention was drawn to the fact that the withdrawal of the Greek troops would cut the Greek Army in two, and make it almost impossible to provision the other section, which would thus be cut off from the Kavalla coast, and that in these conditions the object for which Greece had mobilized would not be attained. M. Skouloudis, having been asked by the Entente Ministers if this reply could be considered as an acceptance of their terms by Greece, avoided giving a direct answer, and confined himself to referring to the memorandum he had handed them. After such a reply, the Entente Ministers made him understand that he should not count much upon the acceptance of the proposition, unless their demands were carried out without delay. The Greek Government, however, hoped that when M. Denys Cochin and Lord Kitchener returned home they would influence the decisions of their Governments in favour of Greece.

Necessity for Further Pressure.

In the meantime, however, in view of the urgent nature of the demands made, the French Minister, who is the one most directly interested in the affair, adopted a very severe tone towards the Greek Government, which led to the belief that recourse to coercive measures was imminent.

As no answer has been given to the Greek declaration, the situation has become critical. The Crown Council, which met to-day, has arrived at no conclusion. Greece finds herself in an extremely difficult position, fearing that, if she allows the Allies to make of Greek territory a war zone, Germany and her allies will not fail, in their turn, to invade Greece and treat her as an enemy, the more so as the Government has not been able to obtain any guarantee from the Central Powers, not even as regards Bulgaria, that their troops will respect Greek territory. Furthermore, it is said that two days ago Germany and Austria addressed a Note to the Greek Government in the sense indicated above. In these circumstances, the Ministers state that they will not consent to the Allies' demands at any price, one of them even going so far as to say to a journalist, "We will not accept. We will submit only to material force, under protest." The *Nea Himera*, the Ministerial organ, which also reflects the views of the General Staff, says: "What do the Allies want in the Balkans, seeing that the Serbian campaign is

Digitized by Google

already over, and the projected co-operation with the Serbian army cannot now be effected? If they want to turn Salonika or the whole of Macedonia into a theatre of operations, then the Germans and the Bulgars will also penetrate there, and the Allied troops will be driven back to the sea. If, disregarding the sovereign rights of the country, they exercise pressure on Greece, she will be obliged to withdraw her troops from Macedonia, and, as she will be unable to prevent the Allies from opening up a new front in the Balkans, she will wash her hands of the whole affair."

In spite of all this, one way or another, whether it be by the acceptance of the Allies' terms by the Greek Government or by the adoption of coercive measures, it is quite certain that the demands of the Allies will be complied with.

Opposition Criticism of the Government.

It now remains to see the upshot of this undertaking, which is as belated as was that of the Dardanelles. Public opinion here inclines towards pessimism, owing to the inadequacy of the Allies' forces, which are being raised to 125,000 men, against 600,000 Germans, Austrians, Bulgars, and Turks. The Ministerial Press throws the responsibility for the present complications on M. Venizelos, who is accused of having brought the foreign troops to Greece. In refuting this accusation, the Venizelist Press deplores the disastrous policy followed by the Government, and, pointing to the fact that it took two months for the Germans and Austrians, aided by the Bulgars, to overcome the heroic resistance of the Serbs, concludes that, if Greece, instead of declaring through M. Zaimis that she would remain neutral, had continued to adopt a menacing attitude towards Bulgaria, the latter would not have moved, and nothing would have happened. Neither would Serbia have been annihilated, nor would the Germans have arrived at Constantinople, and Greece would not have found herself under the necessity of submitting to the humiliations she is undergoing to-day. And, while pointing sorrowfully to the disastrous results of those who would not follow the policy of M. Venizelos, these same organs ask what will be the future position of Greece if she remains, as she now is, isolated and alone. "In these circumstances," says the *Patris*, "we, contrary to the wishes of the Government and of high military circles, ardently hope that the Allied troops will remain in Macedonia, as their presence there constitutes a guarantee for Greece in the sorry plight in which she has been placed by the blunders of her rulers, since she cannot now count even on Roumania, which has ceased to be a Balkan State, having become rather a European State.

THE OCCUPATION OF RUAD.

(From a Correspondent.)

Cairo, November 23.

By reason of its proximity to a land which has been aptly termed the Gateway of the East, the tiny island of Ruad played in ancient history a part the importance of which was out of all proportion to its size and population; and now, thanks to this same reason, the island, still further reduced in size by the erosive action of the elements—its present dimensions being about 800 metres long by 500 wide—has, after centuries of oblivion, suddenly sprung into prominence once more.

The occupation of Ruad may, indeed, be said to mark the beginning of a new era in the history of Syria, and to have sounded the first note in the death-knell of Turkish rule in the Eastern Mediterranean. Now that complete accord and unity of purpose and action have been definitely reached between the two great and allied Mediterranean Powers in regard to their Near Eastern policy, it may be said, without fear of indiscretion, that the occupation of Ruad is the first step towards the occupation of Syria. It has been designed, in fact, as a model of the liberal form of government which the French contemplate inaugurating in that country. To the naval lieutenant appointed as governor of the island, a Syrian gentleman of culture and ability has been attached as Assistant-Governor, thereby showing that the French are coming, not as conquerors, but rather as guides to lead the native population, irrespective of creed and race, along the higher path of Western civilization; while a consultative council composed of the Mufti and some notables, together with the President of the Municipality, has been formed to take part in the local administration. Under present conditions the maintenance of public security is entrusted to a naval garrison, and the faultless behaviour of the marines has been such as to elicit boundless satisfaction from the inhabitants, who, in common with their Moslem brethren of the mainland, were imbued with the most ridiculously prejudiced notions regarding the moral conduct of the French soldier and sailor. Such notions are due to the survival of old tales told in connection with what may have been a few isolated cases alleged to have happened during the expedition of 1860, and which have been exaggerated and made capital of by the fanatically inclined.

All the inhabitants of Ruad are, without a single exception, Moslems, and it is interesting to note in this connection that they are singularly free from the fanatical spirit which unfortunately characterizes some of their co-religionists on the opposite shore. This may be due to three causes—race, environment and occupation. The large number of fair persons with blue eyes points to a strain of European ancestry, dating presumably from the times of the Crusaders; while, on the other hand, the absence of any rival Christian community was calculated to avoid occasion for the whetting of any fanatical appetites. But the principal reason may be the nature of the people's occupation. Ruad being a tiny island, with no land available for cultivation and, indeed, hardly enough to meet building requirements, the inhabitants have had to look to the sea for their living; and, thanks to their enterprise, possibly an atavistic survival of the old Phœnician spirit, they have been able, despite poverty and oppressive rule, to develop their industry to respectable proportions. Apart from the small craft employed in fishing and the sponge industry, they own large sailing vessels that trade with more distant shores and enable them to carry on a comparatively important commerce of their own. This perpetual contact with the outside world cannot fail to have a broadening influence and to round off the sharp angles of narrow prejudice.

They have a peculiar manner of pronunciation, somewhat unlike that of the inhabitants of the mainland, and use certain words unknown in the Syrian popular vocabulary. Some of the houses are more or less of the modern type to be seen in Syrian towns and villages, and contain modern articles of furniture, but the majority are of a primitive kind both in regard to building and furniture. Of course, there are no gardens properly so called, owing to the want of space; and the only open space is to be found in front of the small castle where was read the historic proclamation of the new French Governor, a summary of which has already been given in previous notes.

The population of the island numbers about 5,000, including about 50 Ruadians who had been mobilized, but deserted and clandestinely swam or rowed over from the mainland, since the Occupation. Although there is no actual poverty, yet general ignorance prevails. In the pools of stagnant sea-water the mosquito was allowed to breed unchecked, and malaria and other diseases, such as small-pox, were prevalent owing to the total absence of sanitation. With their characteristic spirit of order and organization the French have at once tackled this problem, and, while purging the island of its dirt and improving the roads, they have created work for the many able-bodied men who have been thrown out of employment by the war. They have also appointed a naval physician with two assistants, and opened a dispensary, and so vigorously applied general vaccination that small-pox appears to have been quite stamped out. They have also founded a school, where Arabic and French are taught; and have cleared the old Phœnician castle and fortress. All these works have been undertaken at the sole expense of the French Government. Indeed, the latter has pushed its paternal solicitude to the extent of providing the inhabitants with free provisions and foodstuffs, and of conferring the privileges of the French flag on the owners of the sailing ships that have since been trading with neighbouring Allied countries.

The only remains of archæological interest are the old Phœnician rampart that runs round the island, the large castle surmounted by the lighthouse, and the smaller Phœnician castle that used to be the Mudir's office. There are two mosques on the island.

The Ruadians are now rejoicing over their good fortune, and well may they do so, when they have seen want replaced by plenty, dirt and disease by cleanliness and health, ignorance and oppression by enlightenment and benevolence, as though by magic. What a contrast the state of this little island now makes with that of the mainland only about a mile distant!

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, November 30.

The Cost of Living.

The postal service with Constantinople appears to be worse than ever, and as very few travellers now seem to come through it is difficult to learn what is going on in the capital. In any case, no incidents of any importance appear to have occurred, and nothing has leaked through about the alleged insurrection of the Arabs under the leadership of Jemal Pasha; in fact, the *Hilal* mentions that he recently took part in some official ceremony at Damascus.

In Constantinople living is becoming more and more difficult, as all commodities rise in price weekly. Petroleum is being sold by the Municipality only, and at 14 piastres the oke; dried beans are now 12 piastres the oke, instead of about five; and cheese is 24 piastres, or about double the normal price. The Grocers' Association continue to reap large profits by laying their hands on everything they can in the interior very cheaply, and selling at exorbitant prices in the capital. Now that there is through communication, a few things are beginning to arrive from Austria and Germany, but the railway line seems to be entirely taken up by the military at present; so there is not much prospect of any merchandise arriving in any quantities.

Everything is being Germanised in Constantinople. The lettering on the trams is now in German instead of French.

Parliamentary Work.

The new Session of Parliament was opened by the Sultan on November 14 with a Speech from the Throne full of the usual nonsense about the glories of the Turkish Empire and the friendship of the Huns.

The Chamber of Deputies has referred to a Commission *ad hoc* the Bill authorising a loan of £T2,112,000 to be made in Germany for the purpose of work on the Baghdad Railway; but this is evidently only a method of regularising payments due to the Germans for the construction of the railway. The Bill has not yet been published, so the nature of the transaction has not yet transpired.

A Bill for the cancelment of the financial agreement made with France some time before the war has also been referred to a Commission.

New Customs Tariff.

A new Customs tariff, which has been drawn up by a special commission, has been submitted to Parliament. It is proposed to introduce a protectionist tariff, and the duties will be collected on the specific system, instead of *ad valorem*, as hitherto. The new tariff is to be applied next March, and a school will be opened in December in order to train the Customs staff in the new method of collecting the duties.

There is again talk of further changes in the Ministry, and there are rumours that the Germans want to hold the portfolios of Foreign Affairs, Finance, and Police.

Turkish Deserters.

It is reported that many Turks are deserting on the Gallipoli Peninsula and going over to the British lines. They are said to be in rags and almost bare-footed, and generally in a miserable condition. An early and probably rigorous winter—snow having already fallen in these parts, with exceptional cold—will bring terrible hardship on the badly clothed and ill-fed Turkish troops, and continuous desertions are not improbable.

SYRIAN REFUGEES.

(From a Correspondent.)

Cairo, November 24.

The U.S. cruiser Des Moines, which was announced as due to arrive at Alexandria about a fortnight ago with a few hundred refugees from Palestine, finally arrived on Thursday, the 18th inst., with no passengers, however, on board. After taking her bunker coal requirements she will return to the Syrian coast. It appears that it had been agreed between the Turkish Government and the U.S. Ambassador, acting on behalf of the Russian Government, that the nuns and domestic staffs of Russian convents and other religious establishments would be allowed to leave the country, and on the strength of this agreement the Des Moines was ordered to Jaffa to embark those passengers; but the Mutessarif of Jerusalem declared to the U.S. Consul that as he had not received instructions to this effect from headquarters he could not allow the departure of these Russian subjects before communicating with the central authorities. After a few days' waiting at Jaffa the Des Moines was instructed to proceed to Alexandria without the refugees, as the Ottoman Government had at the last moment prohibited their departure, alleging, with its habitual cynicism, that when it gave its consent to the Ambassador it was under the impression that the refugees were Jewish colonists, and not Christian, Russian-born subjects! How does this tally with the systematic persecution of the Jews and the wholesale destruction of their properties?

The hand of the German is in all likelihood behind this new move on the part of the Turkish Government. Not only Allied subjects, but all the Christians of Turkey are being subjected to ever-increasing pressure, having for ultimate aim either extermination, as in the case of the Armenians, or paralysis and slow destruction, as in the case of the "less dangerous" Christian elements. The last meagre bit of news to hand from Syria contains the alarming report that all Christians liable to military service, including both those who have already paid the military exoneration tax and those who had been declared unfit on first medical examination, are to be called to the colours. Evidently the Germans, seeing that the new Balkan phase of the war is likely to precipitate events in Syria, have ordered the clearing of the country of all such elements as might conceivably be utilized in the military sense by the Allied forces.

Ever since the outbreak of the war the Germans have looked with deep suspicion and dislike on the Christians of Syria. It can only be hoped that the same fate that befell the Armenians will not overtake these unhappy people, since Syria is open to the action of the Allied fleets and can receive ready help.

There is a rumour that the Maronite Bishop of Beyrout, Monsigneur Shibli, has been arrested by the military authorities, and that this and other important arrests have taken place following on the breaking into the French Consulate-General at Beyrout and the rummaging of its archives, despite the protests of the American Consul-General.

December 7.

The Ottoman Government has finally allowed the Russian nuns alluded to in my last note to leave Palestine, and the U.S. collier Cæsar arrived at Alexandria on Sunday last with 113 refugees, of whom eighty-five are Russian nuns and twenty-eight Jews of British, Spanish, and American nationality. It is expected that the U.S. cruiser Des Moines will be taking another batch of refugees from Syria to Crete, whence a small number may be coming to Alexandria.

No news of particular interest has been obtained from these refugees, save that the Turkish Government has lately been enforcing rigorously its measures for enrolling all the remaining able-bodied men from the age of forty-five up to sixty, and that the economic situation has naturally been aggravated since the blockade of the Syrian coast. In spite, however, of the deep discontent of the population, public security is strictly maintained. This remnant of the male population that is being called up to the colours cannot be of much military value, and it is probably the intention of the Turkish Government to leave no element in the land which might eventually be of assistance to the Allies when they come to occupy the country.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of the "NEAR EAST" to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, November 15.

Cabinet Rumours.

There have been many rumours of late regarding a reconstitution of the Cabinet, but what value attaches to them it is rather hard to say. It is worth reporting, however, that the Prime Minister has been in communication with the prefects and other provincial leading lights, and it is credibly reported that the reforming of the Cabinet has been the subject under discussion. M. Stelian, perhaps the most influential member of the party not included in the Cabinet, is said to have been offered a place by M. Bratiano and to have replied that his first condition would be Roumania's immediate entry into the war, whereupon the matter dropped. Then rumour has it that M. Pherikidi, an active Liberal and a member of former Liberal Governments, is to be offered the portfolio of Minister for Foreign Affairs, in place of M. Porambaru, who has not been a conspicuous success, partly on account of ill-health. In fact, for some time past M. Bratiano himself has practically taken charge of foreign affairs; and as he is also Minister of War, the three offices are a heavy tax on his powers. When the Liberals came into power it was stated that M. Bratiano was only going to the War Office until Colonel Illiescu, his able assistant, attained general's rank, when he would become Minister for War. The former event has taken place, but the General has not yet become War Minister. Other rumours are that the Prime Minister's brother, M. Vintila Bratiano, will replace M. Porambaru; that another Liberal will become Minister for War, and that M. Radovitch, Minister of Commerce, is contemplating retirement from the Cabinet. These seem at least premature.

M. Bratiano, in spite of the efforts of the various Opposition groups, appears resolved to make no movement until help is assured from both north and south, and, taking an impartial view, it is difficult to blame him for the decision. Bulgaria having joined the Central Powers, and Greece's policy of shilly-shally, make Roumania's position extremely delicate, so that her policy needs the most careful consideration and handling for the time being.

Serbian Refugees.

The Serbian Consul at Turnu Severin has left for Kladova in order to arrange with the authorities there for the return of the refugees who, to the number of many thousands, are in Turnu Severin. The authorities at Kladova permitting this, and guaranteeing that no harm should befall the refugees, the latter have commenced to return to their homes.

The Roumanian Red Cross Society has voted for the aid of the Serbian refugees the sum of 30,000 frs., to which the Ministry of the Interior has added 10,000 frs. The number of refugees to be provided for is over 10,000. It is proposed to construct wooden dwellings for these poor folk until homes and employment can be found for them in the country. A goodly number of the refugees have money with them, but difficulty is found in exchanging the Serbian currency. The Serbian Minister has therefore despatched large sums to the localities where the refugees are gathered.

Bucharest, November 27.

The Cabinet and Parliament.

Of the various rumours regarding changes in the Cabinet, referred to in my previous letter, one hears but little to-day. M. Radovitch is now stated to have no intention of resigning his portfolio, and if any changes are made they will probably affect only the Ministry for Foreign Affairs and M. Mortzun. As to the Ministry of War, it is unlikely that any change will take place, at any rate in the next week or two.

In connection with the rumour regarding M. Stelian having been offered a place in the Cabinet, and having refused to accept it unless a more active foreign policy were adopted, it is interesting to note that under his leadership a new branch of the National Liberal Party has been formed, and a new paper, also under his auspices, will shortly appear, with the title *Nationalul*.

Parliament will open to-morrow (28th inst.), when, it is announced, the King will read his message in person unless he is prevented from doing so by a cold from which he has been suffering for some days. It is expected that the message will be brief, and touch as lightly as possible on this country's part in the present war; while retrenchment will be the keynote of the financial part of the document.

Anti-German Demonstrations.

After the anti-German demonstrations here, against the Legation, and at Jassy, before the Consulate, it has been the turn of the German consulates at Galatz and Craiova. At both towns large crowds demonstrated before the consular buildings, and in both cases the police were compelled to intervene and to make some arrests.

Serbian Refugees Departing.

Up to the present the subscriptions for the Serbian refugees in this country amount to 8,620 frs., which sum has been handed over to M. Marinkovitch, the Serbian Minister.

Fortunately for themselves, the refugees are returning to their homes in large numbers. In the district of Mehidintzi, where the majority of them are, only two to three thousand still remain; and many of them are preparing to return to Serbia.

Roumanian Deserters from Greek Army.

It is announced from Mégléine that several Roumanian soldiers of the Greek Army have deserted, and have gone over with their equipment to the Franco-Serbian forces. They are said to be at present on the Krivolak line. Their leaders are the schoolmasters Nita Gorga and Hrista Ceasornicaru, promoted by the French to the rank of sergeant. It is said that the Greek Government made representations to the French military authorities, but without avail.

SIR J. W. BENN ON THE DARDANELLES

Last Tuesday, at the Royal Victoria Hall, Sir John Williams Benn lectured on the operations in the Dardanelles. His address was illustrated by lantern slides, some of them prepared from photographs taken by his son, Captain Wedgwood Benn, who is serving in that part of the world. The lecturer said that the first operations had been undertaken with the approval of the sailors on the spot, and that if they had not been undertaken when they were, we should not have secured the foothold on the Gallipoli peninsula, which has become tremendously valuable in view of recent events, nor would Italy have joined the Entente Powers.

He told an interesting story of Turkish chivalry. An enemy sniper had been giving us some trouble, and an Irishman, who was a good shot, was told off to deal with him. There were these two men, at no great distance apart, each trying to account for the other. At last the Turk wounded the Irishman. Then those who were watching saw him creep cautiously from his shelter, leaving his rifle behind him. He crossed the space to his enemy and bound up the wound. The two men then shared a drink and some smokes, and the Turk went back to his hole.

BULGARIAN NOTES.

(From a Correspondent.)

Bucharest, November 27.

A Many-Sided Monarch.

Like his model, the Kaiser, "Tsar" Ferdinand of Bulgaria has appeared in many rôles, from engine driver to botanist, from naturalist to stamp collector, and so forth; but it has only recently become known that he aspires to medical honours. On the 15th inst., accompanied by the Crown Prince Boris, he visited Pirot, where M. Grigoroff, the mayor, delivered an oration describing the lot of the inhabitants during thirty years of Serbian rule. In his reply, King Ferdinand said: "Assure the population that it is my desire to be their doctor."

Gold from the Invaded Territories.

The Central Committee of the National Bank has been informed that the population of the invaded territories is possessed of large quantities of gold. The bank is, therefore, taking measures for collecting the gold, giving in exchange silver and Bulgarian paper money.

The Greek Government has arranged with the Bulgarian Government for the former to pay 20 per cent. of the value of any grain purchased in Bulgaria in gold.

New Lamps for Old.

From Constantinople comes a note which may be useful to future historians of the new Balkan War. A party of 2,000 Bulgarian reservists left there in the month of October to join the colours, the Turkish Government giving orders that all Bulgarian reservists were to travel on the same terms as Turkish reserve men. These Bulgars left the Turkish capital with cries of "Down with Greece and Serbia!" "Long live Bulgaria and Turkey!" Then they broke into their national hymn. But instead of "Tzarigrad è nach" (Constantinople is ours) they substituted the words: "Makédonia é nach, Salonn é nach!" (Constantinople and Salonika are ours.) At San Stefano they shouted from the windows of the carriages, "We are going to Salonika!" "We are going to Scutari!"

For the Wounded.

Counts Silva-Tarnca and Blankenstein, the delegates of the Austro-Hungarian Red Cross, accompanied by a party of doctors and dressers, arrived a day or two ago at Sofia. This mission, which was received by the representatives of King Ferdinand and by the Austro-Hungarian Minister and Doctor Zolotovitch, will work in the hospital that has been installed in the Gladstone School. Wounded Bulgars who lie there will, perhaps, have strange thoughts about the name of the building they are in.

Under the patronage of Queen Eléonora, the Society Maïka (The Mother) is organising a series of conferences, the profits of which will be devoted to the soldiers at the front.

The Bulgar Bank of Commerce has just arranged at its sole expense a hospital with fifty beds and an allowance of 1,500 levas monthly, until the end of the war. This is the first time a bank has initiated an hospital in Bulgaria at its own expense.

Miscellaneous News.

Headed by Fuad Pasha, a Turkish sanitary mission has passed through Sofia on its way to Berlin.

The official *Narodni Prava* informs its readers of the demise of the Balkan Committee, adding that the brothers Buxton first withdrew from the Committee, and so it has fallen into a state of dissolution.

The *Echo de Bulgarie* publishes the following: "Certain journals have spread a report according to which the Emperor William is to make a journey in the Balkans as soon as the damage on the Belgrade-Nisn-Pirot line has been repaired. In the best informed circles nothing whatever is known of such a journey."

The schools for instruction of schoolmasters at Rustchuk and Philippopolis are closed till the termination of the war.

Last Tuesday the funeral of Petru Sarafoff, father of the celebrated Macedonian chief, Boris Sarafoff, took place. King Ferdinand, several members of the Cabinet, the Mayor and other leading citizens, and a large crowd attended, thus showing the estimation in which the memory of the celebrated guerilla chief is held.

The Casino at Sofia is being transformed into a vast hospital with 200 beds.

From Budapest it is announced that classes for the Bulgarian language have been inaugurated at the University there, in the presence of the Minister of Commerce and the Consuls of Turkey and Bulgaria.

PRISONERS OF THE TURK.

Through the kindness of a correspondent we are enabled to publish the following extracts from a letter written early in November by an English lady who was originally amongst the British imprisoned at Urfa by the Turks, but was released some time ago. Since the letter was written the Turkish Government has promised to remove the civilians interned at Urfa to Aintab, where conditions will, it is hoped, be better.

Mr. —— is in a monastery on a hillside outside Urfa, with all the British and Russian prisoners. The air is good there, and there is a well of delicious water, which we all appreciated in the summer.

The British had formed a mess when —— and I were there, and had got one of the French prisoners to cook for them. This man did the marketing, and Mr. —— kept the accounts. When the expenses were divided up it came to about 1s. 6d. a day for each person, for lunch and dinner. We all gathered together for these two meals, each person having his own mug, plates, knife, fork, spoon, and chair, and three or four shared a plain deal table. Breakfast we all had in our different rooms or corners of the monastery; each family, party, or person had their, or his, own teapot and hot-water jug or mug, and we generally met on our way to or from the general kettle, where we filled up ours. We all kept bread over from our dinner, and could get native cakes from a man who had a sort of shop down in the yard. He also sold jam, but charged a lot for it. Afternoon tea was a repetition of breakfast. We had no tablecloths nor napkins, but had quite enough to eat. The Frenchman cooked some things really well, especially soup, and we had plenty of grapes, figs, and melons. I don't think Mr. —— had suffered through want of food; he looked well, and was wonderfully cheery. The town of Urfa is a regular Eastern place, narrow streets, with blank walls on each side, the houses being built inside, with no windows opening on the streets. The bazaars are like those of most of the places I have been to. There is an American mission church and school, and Mr. Lorlie, the missionary, held service every Sunday afternoon in his house.

We none of us cared for walking in the town much, but went for strolls on the hill or round the ruined castle; and sometimes we went to the garden with the sacred fishpond in it. When we were in the monastery Mr. —— seemed to have enough clothes, but I don't know how he will be off for them if the men are all left at Urfa for the winter. Of course, things of a sort can be bought in the town. My husband said he would have a sheepskin coat made if it got very cold, as he unfortunately sent his overcoat, etc., back to Beyrout from Damascus when the summer began. . . . Of course, I cannot write to nor hear from my husband now I am out of Turkey, which makes it very hard for me.

Sir J. Roper Parkington, Consul-General for Montenegro, has received the following official telegrams:—"On the 9th inst., the Austrians once more directed a violent attack on our positions at Martaroge, but were repulsed, leaving 30 prisoners in our hands. In the vicinity of Sienitza sharp fighting has continued all day. On the 10th inst. there were continuous encounters between the advance guards, and some prisoners were taken by us."

"On the 11th and 12th inst., six Austrian aeroplanes passed over Dulcigno and Scutari; a large number of bombs were thrown, but caused very slight damage. At Antivari two bombs fell in the garden of Prince Danilo's residence, and one bomb struck the Government tobacco warehouse. H.M. King Nicolas has received in special audience the recently appointed Minister from Italy, Baron de Romano."

NEAR EAST BOOKSHELF.

PAST AND PRESENT CONSTANTINOPLE.*

"Constantinople Old and New," by H. G. Dwight, will be a welcome and valuable addition to any Near Eastern bookshelf, and perhaps one should also say to the books on a drawing-room table, for it is artistic from cover to cover both in text and illustration. The author, whilst giving credit to others for a certain number of the illustrations, modestly omits to state that the greater number of the photographs were taken by himself, as the reviewer chances to know. The supreme interest of the book centres in the writer's delicate and discerning appreciation and description of all the old monuments of Constantinople, be they churches, mosques, walls, or fountains. Constantinople Old appeals to him most; later Constantinople he understands and would like to sympathise with, though the latest Constantinople of all he would be the first to lament and decry had not his pen as regards this book left off some months before the tragedy of the present war began.

Mr. Dwight was born in Constantinople, and spent his early and most impressionable years there. After his college days in America and a sojourn in Italy, where his artistic taste was fostered and stimulated, he returned to the city, his first love, well fitted for the task that he undertook—the writing of the delightful descriptive essays that comprise the chapters of "Constantinople Old and New." He returned to Turkey with a knowledge of its peoples and their languages, returned with leisure to study Constantinople's walks and ways, and with a gift for expression that leaves not a dull page. From a literary point of view this book will meet the requirements of the most exacting. To describe a place afresh—and with impelling interest—that has been described a thousand times, to be ready with historical data that cannot be questioned, and to brighten it all with flashes of quaint and unexpected humour, is an undertaking not to be lightly entered into, but one in which this particular author has thoroughly justified himself. He writes of Constantinople as he sees it; it may not always be from one's own point of view; he may see more than meets the average eye in some instances when describing a favourite haunt or scene, and he may fail sometimes to plumb political depths when dealing with recent events in Turkish history. But always one feels that one would like to have been with him on his rambles, would like to have studied Sinan's mosques with him in detail, would have enjoyed those strolls about Scutari that overlooks so grandly old Byzantium and its waters—to have partaken friendly cups of coffee with him in the company of turbaned philosophers, and have become thereby a more mystical, if not a wiser, man.

Constantinople in Balkan war-time was not without charm even in the midst of its wretchedness. What Constantinople is to-day our author cannot describe to us, and it does not require a prophet to foretell that the city will never again possess the fascination, the slow-going ease of existence that have characterised it for so many centuries and which Mr. Dwight has described so vividly and with such scholarly appreciation.

The book will especially appeal to those who know Constantinople well. And those who have left that city by choice or perforce will like to turn over these fresh pages and feel there is no disenchantment in store for them, will like to be reminded of brighter days and see the Bosphorus land with the old glamour still surrounding it—a glamour that history, art, and nature, the triumphant three, have combined to lend it in such large measure.

The ways of the Turk, his haunts, his mild amusements, his art—as exhibited in the making of fountains, the building of *hans* and mosques, the laying out of gardens—are more readily understandable and easy to describe than what manner of man the Turk really is, and why he is what he is! To close the book Mr. Dwight has a "semi-philosophic finale," in which he does some very clever summing-up of the Turkish character. But so complex is this character that each new "summing-up" may be accurate so far as it goes, yet at every fresh turn of the road the Turk develops some unexpected qualities, and what you may have thought of him before may require re-adjustment—since one is never done with him. And, as Mr. Dwight shows, so far as character study is concerned, it is a long, long way from the Turk "set in authority" to the Turk sitting cross-legged in the coffee-house smoking his narghileh, or reclining by his "sweet waters" making *kef*.

"Constantinople Old and New" has a most interesting appendix in the shape of a long list of books by authors old and new, native and foreign, and in this list the reader, if he be a student of Turkey and its people, will find the names of many a volume new to him, perhaps, and well worth the reading and owning.

* "Constantinople Old and New." By H. G. Dwight. (Longmans and Co. 21s. net.)

BOOK NOTES.

"East and West," published recently, at 3s. 6d. net, "Omar Khayyam: Translated from the (original) Persian," by Mr. John Pollen. His Highness the Aga Khan contributes a Foreword.

Mr. John Murray has issued "The Politics of the Balkan League," by M. I. E. Gueshoff, translated by M. C. C. Mincoff. The price is 2s. 6d. net.

Two books of strong archæological interest have appeared lately in America. One is "Sumerian Business and Administration Documents, from the Earliest Times to the Dynasty of Agade," by G. A. Barton, issued by the University of Pennsylvania. The other is a "Handbook of the Cesnola Collection of Antiquities from Cyprus," by Prof. J. L. Myres, of Oxford, and is published by the New York Museum of Art.

NEW MAPS.

The following important maps have been published recently:—

PALESTINE.—Atlas of the Historical Geography of the Holy Land. Designed and edited by George Adam Smith, D.D., LL.D., Litt.D., and prepared under the direction of J. S. Bartholomew, LL.D., F.R.S.E., F.R.G.S. Size, 15 in. by 10 in. London: Hodder and Stoughton. 25s. net.

EASTERN FRONT.—Carte du Théâtre des Opérations (Front Oriental) armes repertoire alphabétique. Scale, 1:1.000,000, or 1 inch to 15.78 stat. miles. Twenty sheets, each 10-15 ins. Paris: Service Géographique de l'Armée (1915). [The area included extends from Vienna to Kiev, and from Petrograd to Bucharest.]

BALKAN PENINSULA.—The Balkans. Scale, 1:250,000, or 1 inch to 3.95 stat. miles. Sheets: Monastir, Uskub. Size, 15 by 33 ins. London: Geographical Section, General Staff, 1915. Price, 2s. 6d. each sheet. London agents: E. Stamford, Ltd., Sifton, Praed and Co., T. Fisher Unwin. [Two sheets of a map of the Balkans, forming an extension of the earlier map of Turkey in Europe, on the same scale. Together the two sheets extend from just south of the Greco-Serbian boundary to about seventeen miles north of Uskub, and include the country on either side of the Vardar River and the Salonika Railway.]

BALKAN PENINSULA.—Balkans 1,000,000e (1 inch to 15.78 stat. miles. Sheet: Adrianople. Size, 15 ins. by 22 ins. Paris: Service Géographique de l'Armée, 1915. Price, 1.25 fr. each sheet. [This is a new edition. Although entitled the Adrianople sheet, the area extends from Bucharest to the Bosphorus and the coast of the Black Sea.]

BOOKS RECEIVED.

The Balkan Peninsula. By Frank Fox. Illustrated. (A. and C. Black. 7s. 6d. net.)

The War and the Prophets. By F. D. (London: Morgan, Son and Co., Ltd. 2s. net.)

La Question du Bosphore et des Dardanelles. By N. Dascovici. (Geneva: Georg et Cie. 7 francs.)

English-Serbian Phrase-Book, with Easy Grammar. By Louis Cahen and Nevill Forbes, M.A. (Oxford: B. H. Blackwell. 1s. net.)

THE WAR IN THE BALKANS.

SALONIKA.

A certain amount of uneasiness has, we fear, been created in the public (and, therefore, inexpert) mind by the retreat of the Anglo-French forces from Serbia during the past week. There is no cause for any such uneasiness. Before the Allied forces had landed in Salonika, Lord Lansdowne warned us that the outlook for the Serbs, whom we had gone to succour, was, in so many words, hopeless. That is to say, we undertook a campaign which we practically knew could bring forth no immediate fruit. In spite of this, we penetrated from Salonika into Serbia, northwards as far as Veles, eastwards to Lake Doiran, and westwards to the Babuna Pass, where, in the eleventh hour, we came within an ace of linking up forces with the brave Serbs. The twelfth hour saw the Serbs' outstretched hand pushed ruthlessly back by the enemy, and the opportunity for which we had struggled and which we had almost seized, vanished for the time being into the night. In spite of this, we remained at the posts we had occupied, acting in the nature of a diversion on the enemy's flank without, however, having any intention of penetrating further into enemy country. Neither were the forces at our disposal nor the season favourable for an adventure in the Balkans, the more so in view of the Serbian retreat into Albania and Montenegro. The fall of Monastir, and the occupation of Ochrida and Struga, the concluding lines of a woeful tragedy, left us without even a "diversion" objective, and, what is more, released the major part of the enemy forces, which were now directed against the Anglo-French forces. In the circumstances, there was only one course to be followed: to retire towards our base, Salonika. To infer from highly coloured Bulgarian reports that in a few days the enemy beat us back from our position and drove us across the Serbian frontier into Greece is utterly nonsensical: we crossed the boundary line because, having no further objective, it would have been the height of folly to risk the weakening of our armies by uselessly awaiting a gathering storm. As it is, our numerically inferior forces were promptly attacked by the enemy, who was bent on encircling us and thus preventing us from reaching the coast. He failed miserably in his attempt, and at the time of writing the Anglo-French expedition has safely reached its new lines to the south of Salonika. This is largely due to the great skill of the Commander-in-Chief, General Sarrail, and to the heroism of a week's wild rearguard action, in which the Irish especially distinguished themselves.

The Great Retreat.

Owing to the inveterate habit of the Bulgars of magnifying, in their official *communiqués*, skirmishes into battles, the only sources which can be relied upon for accurate information are the British and French official *communiqués*, supplemented by special, reliable information which has reached London direct from the front.

On Friday last the War Office issued the following:—

On December 6 the Bulgarians, after a heavy bombardment, attacked our troops to the west of Lake Doiran.

Our advanced trenches were entered by small parties of Bulgarians, who were immediately driven out with the bayonet.

On the morning of the 7th the Bulgarians attacked again, and by weight of superior numbers drove our troops out of their position. Under cover of darkness the troops were withdrawn to a new line. Reports as to our losses have not yet been received.

On the 8th the British troops successfully repulsed all attacks, and in the evening they were withdrawn to a new position in order to conform with the general alignment.

The French official *communiqué* of the same day says:—

Since the last *communiqué* the Bulgarians have delivered violent attacks on various points of our front, all of which have been repulsed, with heavy losses to the enemy.

Fighting continues opposite our bridgehead at Gradel, on the Vardar.

Cabling on the 8th inst. from Salonika, Reuter's correspondent referred to an action on the British front on the preceding Sunday. "Some hand-to-hand fighting has actually taken place," he says, "the Bulgarians having crossed bayonets with a party of the Connaught Rangers, who made short work of their opponents, driving them from the trench which they had occupied under cover of artillery." This is supplemented by a War Office *communiqué* on Sunday, which says:—

After sustaining violent attacks delivered by the enemy in overwhelming numbers, the 10th Division succeeded, with the help of reinforcements, in retiring to a strong position from Lake Doiran westwards towards the valley of the Vardar, in conjunction with our Allies.

The division is reported to have fought well against very heavy odds, and it was largely due to the gallantry of the troops, and especially of the Munster Fusiliers, the Dublin Fusiliers, and the Connaught Rangers, that the withdrawal was successfully accomplished. Owing to the mountanous nature of the country it was necessary to place eight field guns, for purposes of defence, in positions from which it was impossible to withdraw them when the retirement took place. Our casualties amounted to some 1,500 men.

The French official *communiqué* of the same date says:—

In Macedonia the movements of the Allied troops are being accomplished in good order and in the greatest calm. Contrary to the reports circulated by the Austro-Germans and by the Bulgarians, the losses sustained by the Bulgarian troops are much heavier than those of the Anglo-French Expeditionary Force. The retiring movement of the Anglo-French troops was considered necessary when it was found impossible to effect a junction with the Serbian Army. The position occupied by our troops before Krivolac did not admit of our constituting a front before a reinforced enemy, and it was necessary to seek a favourable position in the rear. As soon as the position was found the withdrawal was carried out immediately. Although the Allied troops have at their disposal only one line of railway and no road, the movement was executed in such an orderly manner that the Allies were able to withdraw the whole of their material.

A further case of Irish heroism is reported by Reuter's correspondent, who refers to an action which took place on December 6 in the advanced lines of our Doiran sector. "It was soon recognised," he says, "that the position was untenable owing to the weight of the enemy's fire, and our troops fell back to their third line of defence. Two companies of the Inniskillings, however, held on to the ridge known as Kevis Crest, and kept back the Bulgarians practically the whole morning, although they were backed only by rifle fire. Hardly a man escaped, but their stand impressed and delayed the Bulgarians, thus giving us the much-needed time to complete our defensive dispositions on our third line, where the Bulgarians were finally held up."

The French *communiqué* on Monday stated:—

After having repelled all Bulgarian attacks on December 11, the French troops that night and the following morning resumed their retiring movement without fighting.

Notwithstanding the difficulties of the terrain, this movement was carried out in conformity with the decisions of the commanders, and the complete withdrawal of our stores was assured. On December 12 we occupied the line Ghevgeli-Kilindir.

Salonika.

The situation at Salonika was thus aptly described by the *Times* Athens correspondent on Tuesday (published yesterday):—

According to the latest news, the Allied Force which is falling back from Macedonia will halt on the front Karasuli-Kilindir, and will endeavour to hold this line until the Salonika positions have been fortified. There are already some British troops in the neighbourhood of Kilindir. The French General Staff is confident that the troops are not in any danger, thanks to the naval guns which have been mounted round Salonika. The work of installing and entrenching the Allied troops in and around Salonika continues. At various points north-east of the town, in particular, the necessary arrangements are in progress. Trench and other material shipped to the port is being sent up where required as soon as it is landed.

One Greek division and one Greek cavalry brigade are to remain at Salonika. The rest of the Greek troops were to have been withdrawn to-day.

British reinforcements continued to land all through the night yesterday. The troops landed represent the first contingent of two fresh divisions. Cavalry was landed from the French transports.

Apart from the military operations in this sector, the past week has been chiefly characterised by the improvement of the international situation at Salonika and by the adoption of a uniform plan by the Allies. This will lead up to big developments when the opportune moment arrives.

TANGIER TO TEHERAN.

I am very glad that the plot to assassinate the Persian Minister of the Interior, H.H. Prince Firman Firma, has miscarried; and my satisfaction is not due only to the fact that the dastardly plot was "instigated by refugee pro-Germans," as Reuter's Teheran correspondent informs us it was. The thwarting of the Germ-infested ones is, of course, a matter for gratulation, but it is only a side issue. The important thing is that Prince Firman Firma is really a strong man—and Persia could ill spare such an one at the present time. I have had the honour of meeting him, and in my humble opinion he is probably as good a man for the very difficult—not to say dangerous—post that he holds as could be found in all the Shah-in-Shah's dominions. It has been said of him that he knows just when to lay aside the velvet glove and to make use of the mailed fist; and that is what Persia requires. The German mischief-makers and their ragtag and bobtail following evidently think otherwise, and regard him as an undesirable—as is natural with such ruffians. But their opinion is one of the highest compliments that could possibly be paid him.

***

The mention of my princely acquaintances reminds me that I have an apology to make to one of their number. A correspondent has pointed out that the Bandit Prince Henry of Reuss, to whom I referred in my last notes, is not full of either youth or high spirits; that he is not Prince Henry XXVIII.; and that, in short, I had placed to the discredit of one Prince of Reuss an evil act of infamy which belongs to quite another man. The marauding Prince is, it appears, Henry XXXI., Bandit Minister of the All Highest to the Persian Court since the eleventh day of August, 1912. I am sorry that I did the other Henry the supreme injustice of confusing him with this grey-bearded disciple of Hunnishness.

***

Another item of news that has afforded me much pleasure this week is the announcement—made in the official statement issued by the Secretary of State for India on Monday, regarding the fighting on the Tigris—that "the attitude of the Arabs is reported to be satisfactory." The question was also raised in the House of Commons by Sir E. Cornwall, and Mr. Chamberlain made it quite clear that "the rumour, of German origin," as to Arab treachery was "quite untrue." This disposes of another German-made lie, calculated to injure the reputation of men who cannot defend themselves against such despicable falsehoods. What I wrote last week about the wish being father to the thought was evidently quite justified. And the mere fact of the Huns thinking it worth while to spread such lies about the Mesopotamian campaign is in itself a hopeful sign.

***

As a matter of fact, I am inclined to be more optimistic this week than I have been for some time past. Even regarding the situation at Salonika and in the Balkans-Mediterranean field generally, I am not at all depressed. Unfortunately, I cannot set down the reasons for my cheerfulness, or the Censor might have something to say about it. But, after all, we may as well remember the old saying, "He laughs best who laughs last." The enemy is very cock-a-hoop just now, to outward appearance. But I wonder what he really thinks about it all in his heart of hearts? If he is as clever as he tells the world he is, I fancy he will not spend a very happy Christmas.

***

Those Roumanians who emigrate do not easily lose their national characteristics, and a love of their country and language remains for ever strong within them. As an instance, I learn that at Youngstown (Ohio) the Roumanian community possesses its own church and Orthodox priest, whilst lately a school has been opened, which is attended by thirty-two little Roumanians who wish to learn to write and read their national language.

***

The two interviews which his Majesty of Greece vouchsafed to the Press recently seem to have disposed, once and for all, of the attractive story that the mind of King Constantine was labouring under a burthen laid upon it by a hypnotic doctor of German nationality, who is said to have attended him during his recent illness. Whatever the construction placed upon his Majesty's utterances, they were certainly not those of a man hypnotically disposed in favour of the Central Empires. But now that there is no longer any colour for the suggestion in this particular case, I should like to air my conviction that the idea was by no means so fantastic as some people appeared to imagine. It is sheer lunacy to deny the power of hypnotism in the twentieth century. As a matter of fact, it is around and about us in most of the waking moments of our day. People appear to think that a trance stage is necessary to the successful application of the hypnotic state. This is an entire fallacy. Such a state is only necessary when the subject is possessed of will power at least equal to that of the mind about to transmit the force of its impression to the other by hypnotic waves. As for the rest, hypnotism is, as I have said, part of our daily lives. We find the will of the strong dominating that of the weak in every phase of society. There is many a man in a position of high authority to-day who occupies it more by reason of his strength of will than his intellectual attainments. What is "personality" but the mesmeric faculty exercised, perhaps unconsciously, in everyday life?

***

It is quite possible, therefore, that although the story of King Constantine's subjection to conscious hypnotism is sheer nonsense, his Majesty may well have fallen victim to the mesmeric influences of his electric brother-in-law. Colour may be given to the theory by the fact that the miraculous cure of the King on the occasion of his recent illness seems to point to a mind responsive to the influences of supernatural or immaterial powers. I do not mean to attempt to discredit the miraculous nature of the King's cure, but all these things are on a plane that is not yet fully understood—at least, in the West—and perhaps they are more nearly allied than we imagine.

***

I would draw the attention of all those who like to find "omens" in all manner of trifling events to the fate of a German steamer interned at Baltimore. Suspected of having sent and received messages by her wireless apparatus, she has had to submit to having the said apparatus rendered incapable of committing further breaches of neutrality. And her name is "Bulgaria."

***

For the sake of the Bulgarians themselves, it is a pity that their official *communiqués* cannot be treated in the same way as the "Bulgaria's" wireless apparatus. For the sentence: "It must be stated that the French troops fought much more bravely than the British," which occurs in one of these official *communiqués*, is, to say the least, cheap. Doubtless it was the production of one of the Germans recently imported wholesale into Sofia; for the Bulgarians possess too much common sense to try to sow jealousy between the French and ourselves by such childish methods; and they are too brave fighters themselves to decry the valour of our troops. The French soldiers and our own are not likely to enter into any kind of rivalry except that of honour. They have learned the worth of one another; and it will take a great deal more than a Bulgaro-German squib of this kind to undo the work of the past seventeen months.

***

From many quarters proposals have been forthcoming that when those two Hun undesirables, Boy-Ed and von Papen, are driven out of the United States we should take them in charge and hold them until such time as Colonel Napier and Captain Wilson, M.P., are set at liberty. These proposals have much to recommend them, and it is to be hoped that they will be seriously considered by our Government. But, of course, there is the difficulty that Colonel Napier alone is worth a dozen Boy-Eds and a score of von Papens; and the Germans still appear to be much better hands at bargaining over the matter of exchanges than we are.

***

A friend of mine, addicted to the weed, is much perturbed because the stocks of Latakia available are reported to be only sufficient for a few weeks more. I am not sure that I share his distress. Latakia is a delightfully fragrant tobacco, but I doubt if it is a good thing to smoke much of it. At one time I used to smoke a mixture, specially prepared for me, consisting of one part Latakia and one part "honeydew," and I enjoyed it immensely. But it played shocking tricks with my nerves, and though I still smoke heavily—far too heavily, I fear!—I would never willingly smoke Latakia again. It is too seductive.

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (New Style.)	—	Moslem.	Jewish.
1915. Dec.	1915. Dec.		1334. Safar.	5676. Tebet.
17	4	Friday	9	10
18	5	Saturday.....	10	11
19	6	Sunday	11	12
20	7	Monday	12	13
21	8	Tuesday	13	14
22	9	Wednesday	14	15
23	10	Thursday	15	16

To-day is the birthday of H.R.H. Prince Alexander, Crown Prince of Serbia.

Monday is the birthday of H.R.H. Prince George, fourth son of the King and Queen, who was born at Sandringham in 1902.

Queen Alexandra and the Princess Victoria were present at the Slav Concert given at the Queen's Hall on Wednesday afternoon in aid of the Serbian Relief Fund.

The Earl of Glasgow, whose death took place on Monday at Fairlie Crag, Fairlie, Ayrshire, was formerly in the Navy, and served on board H.M.S. Eurydice during the Crimean War. He is succeeded by his eldest son, Commander Viscount Kelburn, who has been awarded the D.S.O. for his services during landing operations in the Persian Gulf last August. The new peer was born in 1874, and married in 1906 the youngest daughter of Mr. W. A. Bell, of Pendell Court, Bletchingley, and has a son (for whom the Queen was sponsor) and two daughters.

Lord Kitchener left Paris on Saturday afternoon, after attending a final meeting of the Allied Council.

Lieutenant-Colonel Percy Sykes had the honour of being received by the King at Buckingham Palace on Wednesday morning, when his Majesty conferred on him the honour of Knighthood, and invested him with the Insignia of a Knight Commander of the Order of the Indian Empire.

Lieutenant-Colonel Sir Mark Sykes, M.P., had the honour of being received by the King at Buckingham Palace on Tuesday.

General Sir Douglas Haig, who has been appointed to the command of the Army in France and Flanders in succession to Sir John French, served with the Nile Expedition in 1898. He was at the battles of Atbara and Khartoum, and for his services in the campaign he was mentioned in despatches, receiving the Egyptian medal with two clasps.

Under date of the 12th inst., Reuter's Delhi correspondent announces: A report has been received from Kerman that Aga Farukh Shah, a cousin of his Highness the Aga Khan, has been murdered there by a Persian assassin at the instigation of German agents. Aga Farukh Shah was travelling in Persia for private reasons in connection with the affairs of his spiritual followers in that country.

Colonel Mitivoi Nicolaievitch, Serbian Military Attaché, had the honour of being received by the King at Buckingham Palace last Saturday.

Viscount Bryce has been unanimously elected President of the Pilgrims of Great Britain as successor to Earl Roberts, who held that office up to the time of his death.

The Bishop in Jerusalem arrived at Port Said on November 25 by the P. and O. liner Arabia. He was to have stayed in Cairo for about six weeks, and was then going on to the Sudan

Dr. G. Landsborough Findlay and Lady Sybil Findlay have returned from Serbia. They have taken 6, Melina Place, St. John's Wood, for a term of years, and this is now their permanent address.

Mr. Aubrey Herbert, M.P., last week piloted a party of Anzacs, most of whom were wounded, over the Houses of Parliament. The hon. member has recently returned from Gallipoli, where he has been ill. He has a fine record for service. It will be remembered he was wounded and taken prisoner in the first weeks of the war in France.

In a letter dated November 15 our Bucharest Correspondent reports that M. Radovich, the Roumanian Minister of Commerce, has practically recovered from the effects of his motor-car accident, reported some weeks ago in these columns.

On Monday, at Preston, Firle, Sussex, the wife of Lieutenant-Colonel Cyril E. Palmer, R.A., attached to the Egyptian Army, gave birth to a daughter.

An engagement is announced between Hugh Manwaring, of Busreh, Persian Gulf, eldest son of the Rev. Alfred and Mrs. Manwaring, Leire Rectory, Lutterworth, and Evelyn Marguerite, second daughter of the Rev. A. E. D. and Mrs. Disney, Stoney Stanton Rectory, Leicestershire.

On December 7, at Garrison Chapel, Abbassia, Cairo, the marriage took place of Captain Edward Maitland Hutchinson, Royal Field Artillery, attached to the Egyptian Army, fourth son of Lieutenant-Colonel T. B. Hutchinson, C.S.I., Indian Army, and Mrs. Hutchinson, of Jhandra Ghat, Camberley, to Miss Phyllis Motion, fourth daughter of Mr. and Mrs. A. Motion, of Upton House, Warwickshire.

We regret to record the death from consumption, at the early age of twenty-five years, of the Danish explorer, Mr. Barclay Raunkiaer. He was widely known (says the *Geographical Journal*) for his journey in Central and Eastern Arabia, during which he made his way from Koweit by Bereida to the Wahabite town of Riadh, returning to the coast by way of Hafiz.

Writing on November 27, our Bucharest Correspondent reports:—

M. Michel Pacleanu, the Roumanian Minister at Berne, has arrived in this country on leave.

M. D. Psychas, Hellenic Minister at Bucharest, has left for Vienna for reasons of health. He is accompanied by Madame Psychas. During his absence, the Legation will be in charge of M. Dendrammis, First Secretary.

From Salonika comes news of the death of M. F. Capsali, the Inspector of Roumanian Schools in Macedonia. He died in the Italian sanatorium in Salonika, and has been buried in the Roumanian cemetery.

The sum of £2.000 has been received by Lady Barclay, wife of the British Minister here, from the Serbian Relief Fund, for distribution among the Serbian refugees.

News has been received in London that Dr. Clemow and his staff, who had to leave Plevlié, Montenegro, when that place was captured by the enemy, proceeded first to Kolashin, and thence to Podgoritza. From the latter place Dr. Clemow purposed proceeding with his party to Scutari, when he would place himself in communication with Sir Ralph Paget, British Commissioner for the various medical missions which have been working in Serbia and Montenegro.

We understand that Lieutenant Adam Block, R.F.A., son of Sir Adam Block, is now at the Dardanelles.

Dr. Marian Wilson, of Hebron, Palestine, has just been appointed to one of the Scottish Women's Hospitals in France. Dr. Wilson has been working at Hebron under Dr. Paterson for four years, and was in charge, during his furlough, when there was a severe outbreak of typhus in the town in 1912. The work at Hebron, which is one of the finest medical missions in the Near East, was interrupted by the outbreak of war between England and Turkey, when all British and Allied work in Palestine was necessarily suspended. Every member of the Hebron staff is now engaged in war service. Dr. Wilson was twice asked to join units of the Scottish Women's Hospitals in Serbia, and was offered also the charge of a Serbian Government hospital, but she was unable to accept these offers, being then engaged in work at York. Dr. Wilson is now on the staff of the hospital at Abbaye Royaumont, which is recognised by the French Government as Hôpital Auxiliare No. 301. The Abbaye is a beautiful old Gothic building, some seven hundred years old, and was erected by Blanche of Castile, the mother of Louis IX., the Crusader.

Captain F. F. C. d'Erf Wheeler, 3rd Dorset Regiment, whose name has long been on THE NEAR EAST Roll of Honour, has just left England for an Eastern destination, in command of a draft of men and officers. Captain Wheeler was wounded at La Bassée in October, 1914, when his regiment suffered heavily; he was limping forward when his colonel ordered him to the rear, and he then crawled along on all fours for some distance until he was picked up by the stretcher bearers. His stretcher was fired on by the Germans as he was being carried along. As soon as the Medical Board allowed him, Captain Wheeler joined the Regimental Depôt in England, and worked hard training drafts for the Western front. A few weeks ago he was given an appointment in the Flying Corps, but almost immediately that order was revoked in favour of the more responsible charge he has now been given. Captain Wheeler was gazetted captain within ten days of his coming of age last April. He is the eldest grandson of Bishop Blyth.

The *London Gazette* announces that Second Lieutenant J. B. Barron, 3rd Worcester Regiment, has been promoted to the rank of Captain, with effect from August 20. This is almost a record case, even in this war, when swift promotion is the rule, for Captain Barron received his commission as recently as July, and only a month later his company, the usual intermediate step of lieutenant having been omitted. Captain Barron's many Jerusalem friends will be delighted to hear of his well-deserved success.

Miss Wells, the daughter of the Director-General of the Department of Technical, Agricultural and Industrial Education, Egyptian Government, who was recently injured in a motor-car accident at Cairo, is making progress towards convalescence. Her sister, who was with her at the time of the accident, escaped unhurt.

It is announced that Lieutenant-Colonel C. Longueville Snow, of the Egyptian Coastguards Service, was killed in the fighting which took place last Saturday at Mersa Matruh between one of our patrols and a detachment of hostile Arabs 300 strong. Colonel Snow was fifty-two years old. In early life he entered the Canadian North-West Mounted Police, receiving promotion quickly. In 1891 he left that Force and was appointed to the Egyptian Coastguards. His knowledge of the country and language, acquired during twenty-five years in Egypt, made his services very valuable, and on the outbreak of war he was put in command of a Military District and given the temporary rank of lieutenant-colonel in the British Army. He was the youngest son of the late Mr. Thomas Snow, M.A., barrister-at-law, and of Mrs. Snow, Hadley, Grand Avenue, Bournemouth. Colonel Snow leaves a widow and a son and daughter.

A Cyprus correspondent writes: The death of the Greek Judge at Limassol, M. Aristotle Palæologos, has deprived the island of one of the best known, most interesting, and most respected members of the community. Mr. Palæologos was of humble origin, and was first known as a village, and then a high-school, master. Having a strong leaning to journalism, he founded, and for years edited, his first Greek newspaper, *Alêtheia* (Truth), which has been published ever since the early 'eighties. He was elected a member of the Legislative Council during the time of Sir Walter Sendale, who appointed him to be a native judge at Larnaca, from which district he was transferred to Limassol a few years ago. He won the esteem of all classes and communities owing to his strictly impartial judgments and his personal character.

The Chief Justice, Sir Charles Tyser, paid a well-merited tribute to his memory, being supported by M. Artemis, one of the leaders of the bar.

Mr. T. Comyn Platt, who has been adopted as prospective Unionist candidate for the Kingswinford division, was formerly in the diplomatic service, and was attached to the Legation at Athens and to the Embassy at Constantinople.

Apropos of the reference made by our Cairo Correspondent, in his letter published last week, to the formation of a board to facilitate the use of the local resources of Egypt for military purposes, it is interesting to note that the *Journal Officiel* announces the constitution of the board as follows: President, the Brigadier-General in charge of Administration. Members: Brigadier-General R. Ford, C.M.G., D.S.O.; Miralai R. Pringle Bey, Inspector-General of Stores; and Mr. J. F. G. Hopkins, Chief Inspector, Finance Ministry. Secretary: Captain L. E. W. Egerton, Bucks Yeomanry.

The Greek Legation in Paris formally denies that M. Strator, former Minister of Marine, went to Berlin to try and arrange a loan.

We regret to learn that M. Léopold Jullien, manager of the Union Foncière d'Egypte, who was recently sent to the French front with his regiment from the South of France, is now in hospital owing to an attack of typhoid fever.

Mr. Edward Crompton, whose death at Liverpool is announced, was at one time engaged on railway work in Egypt under Sir John Fowler. He was the youngest and the only survivor of the four sons of the late Mr. Justice Crompton.

Miss Ridd presided at the first meeting of the Historic Section of the Bournemouth Literary and Historical Association held at the Municipal College last week, when the subject under discussion was "Roumania and the Unification of Italy."

Madame Vesnitch, wife of the Serbian Minister in Paris, in appealing for help to save the Serbian children from dying of famine and cold, writes:—The terrible necessities and heartrending conditions of these poor children, the great desire we have of saving them from utter extinction, permits me to tell the public how much every donation for them will be the greatest charity, and most gratefully appreciated. Contributions, great and small, should be sent to the Serbian Relief Fund, 5, Cromwell Road, marked for "Madame Vesnitch's Appeal."

Mrs. William L. Sclater, in forwarding a copy of the report of Lady Hamilton's Dardanelles Fund, showing how the subscriptions and donations have been expended, writes: "Since the balance-sheet was drawn up we have had to meet a number of other bills, and our funds are now very low, although the need of help in the Dardanelles is still very urgent. As Sir Ian Hamilton has now left the Dardanelles it is the wish of Lady Hamilton that the fund should no longer bear her name, but she will continue to take an interest in the fund and remain on the committee, while the Hon. Lady Monro, wife of General Sir Charles Monro, now Commander-in-Chief of the Mediterranean Expeditionary Force, will also join the committee and take an active part in the work. It is proposed to continue the fund under the name of the Dardanelles Fund. All contributions in money should be sent to the hon. treasurer, Mr. W. L. Sclater, and donations in kind to the hon. secretary, Mrs. Sclater, at 24A, Hill Street, Knightsbridge.

The Secretary of State for the Colonies announces that the people of Cyprus have offered a gift of 1,000 tons of wood fuel for the use of his Majesty's troops. The offer has been gratefully accepted by his Majesty's Government.

Field-Marshal Lord Methuen has written to the Secretary of the Soldiers' Entertainment Fund (Lord Desborough) a letter which opens up a golden opportunity of helping our gallant wounded and sick at Malta to any clever amateur entertainers with him to spare.

Lord Methuen writes:—"Can you help us here in Malta? I know how full your hands are, but we are urgently in need of amusement for the sick and wounded, so venture to solicit your help. We now have beds for between 18,000 and 19,000 invalids, which may be increased, and during the winter months, when the winds are very cold, it is most necessary to provide indoor amusements. Up to now local talent has done much, but it is limited in numbers, and in the coming months—December, January, and February—something on a larger scale is requisite. What I would like, and what I am asking you to provide if possible, is a variety troupe of about ten or twelve members. Unfortunately, we are not in a position here to meet the cost which would be involved. All we can offer is a fine recreation hall, fitted with theatre, which will hold over 1,000 patients, and which taps five large hospitals; other smaller recreation rooms and tents; and the gratitude of myself and a large number of continually changing sick. I consider amusement of this description essential for health, as it keeps men's thoughts from their own pains and troubles, and themselves away from the many temptations which surround them in a place like Malta."

The Committee of the Serbian Relief Fund has (says an advertisement in *The Times*), owing to the continued generosity of the public, completely outgrown its offices at 5, Cromwell Road, S.W., and is desirous of finding premises of sufficient size to accommodate the whole of its departments, which the owner would place at the disposal of the Fund at a nominal rental for the period of the war. Good ground-floor space is indispensable. Communications should be addressed to the Chairman, Mr. Bertram Christian, 22, Berners Street.

The *Echo de Bulgarie* states: "An order of the Ministry of War declares as deserters from the Bulgarian Army the following officers, who, after the decree of mobilisation, did not return to Bulgaria and have not joined their units: Lieut.-General Radko Dimitrieff, Major-General Sarafoff, Captain of Cavalry Ludtsanoff-Tsankoff, Captain Bratchkoff, Lieuts. Staripavloff, Michaïloff, Karlowsky, Gonbidelnikoff, and Judjéstoganoff, Second Lieuts. Nikofoff and Torkom."

"Quex," in the *Evening News*, of Wednesday, says:—A few days ago I noticed in the Park two people playing that very energetic game which has been described in the "Encyclopædia Britannica" and is known officially as "Ringoal." When I got nearer I discovered that one of the players was its inventor, C. E. Johnstone The second player was Prince Saïd Halim, to whom Mr. Johnstone has been acting as private tutor. Prince Saïd left London a few days ago for Switzerland."

Mr. Johnstone, who is said to know Montenegro almost as well as he knows Switzerland and France, was married yesterday to Miss Kathleen Hamilton, daughter of Lieut.-Colonel Hamilton, Deputy-Assistant-Inspector of our Medical Services.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

DEATHS.

RUSSELL.—At Handsworth, Birmingham, on December 5, Ronald Blair, aged 4½ years, younger son of J. Mac D. Russell, British Postmaster, Shanghai, and formerly of Smyrna, and Mary Russell.

FERGUSON.—At 30, Hampstead Road, Fairfield, Liverpool, on the 6th inst., Jessie W. Ferguson, aged seventy-three, widow of the late George Ferguson, of Constantinople.

SCHOOLS for BOYS & GIRLS.

TUTORS for ARMY, UNIVERSITY, CIVIL SERVICE and ALL EXAMS. REFINED HOMES with EDUCATION for children whose parents are abroad.

Messrs. J. and J. PATON, having an intimate, unique, and up-to-date knowledge of the best Schools and Tutors in this country, will be pleased to aid parents in their choice by sending (free of charge) Prospectuses and Trustworthy Information regarding Establishments which can be thoroughly recommended.

The age of the pupil, district preferred, and rough idea of fees should be given.

THE NEW SITUATION AT SALONIKA.

The stage has been reached in the operations in the Balkans which, we hope, marks the conclusion of the second phase referred to by Mr. Churchill when he said, speaking on November 16 on the subject of his resignation: "We are passing through a bad time now, and it will probably be worse before it is better; but that it will be better, if we only endure and persevere, I have no doubt whatever." In the interval the outlook of the moment has certainly been much worse than it was when Mr. Churchill spoke, and it has been necessary to bear in mind the point to which he did well to call attention, that, while the old wars were decided by their episodes rather than by their tendencies, in this war the tendencies are far more important than the episodes. The recent history of the Balkans brings out the sharp contrast between the two. Among the episodes there have been two months of steady defeat for the Allied cause in Serbia; the country overrun by the enemy, the Serbian army rapidly driven back until it was pushed over the frontier, leaving behind at least a proportion of its forces, together with the greater part of its artillery, stores, and equipment. Other episodes in the same theatre of war have been the delay in sending Anglo-French reinforcements in support of the Serbians, the inadequacy of the first drafts for the purpose for which they were sent, the lack of preparation for a Balkan campaign allowing for the dispatch of small numbers only from Salonika to the actual battle front, the failure of Greece to support the Allies, and the withdrawal, to the accompaniment of, if not under the pressure of, fierce Bulgarian attacks, of the Anglo-French troops back to Greek territory. If now we turn to the tendencies implied in the Balkan campaign we find first and foremost that the operations represent a thrust on the part of the enemy in yet a third direction after failure to achieve decisive results in either of the two main theatres of war. From one point of view, it is true, such a thrust indicates that the Central Powers are still not at the end of their resources; on the other hand, if we adopt the simile of the enemy being besieged within a ring of steel, without hope of relief from without, the occurrence at one or more additional points of further hammering, always accompanied by heavy losses to the besieged force, serves to hasten the inevitable result. Another tendency implied by recent events is that the Allies have definitely accepted the Balkan challenge, and stand committed "to see the thing through" in a part of the world where military prestige entirely dominates the political situation. The protection to which Serbia was entitled has not been given, but the decision to fight her cause in the Balkans provides the best possible augury that the hostile occupation of her soil will be brief.

If the situation at Salonika offers better ground for confidence than it did a week or two weeks ago, the circumstance is due to two factors—correct knowledge, born of experience, of the military requirements, and the adoption of a strong attitude towards Greece. When French and British divisions landed simultaneously, it was found that there would be no means of sending up to the front an adequate number of men to cope with the enemy's advance. A certain number, perhaps as many as possible, were sent forward, and with the support of the Serbian Army these might have sufficed to hold the lower portion of Serbia. But the Serbians were unable to withdraw in a southerly direction, and their final disappearance over the Montenegrin and Albanian frontiers materially affected the prospects of the Anglo-French forces in the Vardar Valley and south of Strumnitza. They could not possibly sustain the whole weight of the Bulgarian attack, reinforced by Austro-German troops, and a retirement was the only course open to them. For a time their position was rendered critical owing to the indeterminate situation at Salonika. The town was still under Greek direction; the movements of the Allied troops were carried out nominally by favour of the Greeks, and the presence of a Greek division or more between Salonika and the frontier necessarily curtailed the railway and transport facilities available for the Allies. To the inevitable shortage of material had to be added the inconvenience of minor obstructions imposed by Greek officers and officials in furtherance of the German aims. In such circumstances the position of the Allies' advanced guard in Serbia might have been rendered hopeless at any moment by the stoppage of supplies and reinforcements. Attempts to persuade the Greek Government to give the Allies complete freedom of action in Greek territory between Salonika and the frontier had failed. It was not until November 26 that a more resolute attitude was adopted by the Entente Powers, and even then King Constantine and his Ministers endeavoured to prolong the situation to the disadvantage of the Allies by transferring the question of the evacuation of Salonika to a joint military commission. During the past week a settlement of the question appears to have been reached. Greece has yielded, as it was evident she must yield, to direct pressure, which in the interests of the Entente Powers ought to have been applied at an earlier stage. Salonika passes under the control of the Allies. The Anglo-French forces falling back upon it will take up the position which military exigencies require, while the town, thanks to the measures taken to put it in an adequate state of defence and to the constant flow of reinforcements, is regarded as being able to deal with any attack that the enemy may launch against it.

The presence at Salonika of an Allied force capable of assuming the offensive at the right moment puts a different complexion on the success achieved thus far by the enemy in the Balkans. Communication with Constantinople has been established, and within the limitations of the capacity of the railway system the Turks will receive fresh supplies of munitions and German officers. The position of the Allied troops on Gallipoli Peninsula will be rendered still more difficult, if not actually untenable; but the Turks will by no means enjoy complete liberty of action in regard to fresh expeditions. There is good reason to suppose that another attempt upon Egypt will be made. Beersheba, the Turkish base for the last attack, was linked up during the last week of November with the Hejaz Railway. Troops are being collected at Jerusalem and other centres. If amongst these few Turkish regulars are to be found, their place is probably being taken by Arab levies trained by German officers. For political reasons Germany will want to hold in front of Turkey the incentive of the conquest of Egypt, and the attack may yet have to be carried out in order to galvanise Turkish resistance in Europe for further efforts. Every preparation, therefore, must be made to cope with a fresh advance on Egypt. When the Turkish forces reached the Suez Canal on February 2 the defence was adequate for the half-hearted attack. It has since been strengthened, and, if it should be tested again, will prove, we may hope, equal not only to repel the invaders, but to follow them up and deal with them far more effectually than was done on the first occasion. The possibility of an attack on Egypt must always be provided for in British military plans; but the most effective method of robbing such an attack of its sting will have been adopted by sending to Salonika a strong Allied expedition capable of assuming the offensive in the Balkans. So long as this force holds the initiative any sense of security that the Germans may hitherto have felt in Constantinople or in Syria will be considerably impaired. Djemal Pasha may push on his preparations, but the grandiose design of an "Army of Egypt" under Field-Marshal von Mackensen is hardly likely to materialise.

THE RUSSIANS AT RENI.

(From Our Own Correspondent.)

Bucharest, November 27.

Reni, that sleepy little town of Bessarabia, wore quite an unusual aspect on the occasion of the visit of the Tsar yesterday. In fact, for some weeks past, instead of being a quiet commercial centre of quite second-rate—if not third-rate—importance, it has been a large military camp, with even the huge lighters, of which a number lie at its quays, crammed with soldiers. And it was to inspect these soldiers that the Tsar paid this visit to a corner of his realms hitherto nearly unknown to him.

This, however, is not by any means the first time that Reni has seen great gatherings of armed men; for in 1877 the advance into Roumania, on the way to attack the common enemy, the Turks, commenced at Reni, and here, on the cessation of hostilities, was seen the curious sight of the whole of the Russian cavalry being landed from these self-same big Danube lighters —"schlepp" is their name locally—after having been brought down river in them, without the loss of a single man or horse, thanks to the efforts of the long-headed Scot who undertook the contract.

The Tsar, who arrived at 9 a.m. in a special train, was accompanied by the Tsarevitch, and a distinguished staff, including General Voikoff and Admiral Niloff. A religious service was held at the Cathedral, after which H.I.M. visited the camps in and around the town. Here the troops were drawn up in a line over a distance of a kilometre and a-half. The Tsar halted very frequently to speak to soldiers and officers. He spent several minutes chatting with the officers of the rifle regiments from Turkestan, of whom very many bore on their breasts the St. George's Cross, these regiments having been in most of the fighting on the Galician frontier. He also visited a number of wounded, speaking to each of them about their wounds and adventures.

The inspection was followed by a review, at which whole brigades of rifles, cossacks, and artillery marched past. Later his Majesty visited the works at the port. On entering the *usines* he was presented with the customary bread and salt, which was offered on a plate specially made by the labourers at the port. The *doyen* of the workmen, who actually presented it, had had a son killed in the wars, of which fact the Tsar had been informed; and when he dropped on his knees to offer the symbol of welcome, the Tsar raised him up, saying: "No no. One who has given a son for Russia should kneel to nobody." This led to a scene of great enthusiasm, the onlookers bursting into volleys of cheering, with cries of "We want victory!" "We will fight to the last drop of blood!" "The Tsar, our protector!"

Reni, as the Tsar saw it, is one great military camp, where 240,000 soldiers of all arms are collected. There are over 200 large lighters all fitted up for the conveyance of troops, and quite sufficient tugs to convey them to any point at which they may be needed.

The soldiers are one and all splendid looking fellows. If good living contributes to making a good "Tommy," then these Muscovite peasants should make excellent ones. In the morning their breakfast consists of tea and white bread. Midday sees *borsch*, in which swim large lumps of meat; this is followed by a dish no less Russian than *borsch*, a mixture of fat bacon and rice. The evening meal is a combination of the other two, beginning with tea and bread, which is followed by two meat dishes. It is reckoned that upwards of 200 head of cattle are slaughtered daily to feed this army of hungry mouths.

What is the exact object for which these troops are being gathered is naturally a subject of much discussion. While some persons hold that it is an attack and landing at Varna, others are equally certain that the Danubian coast of Bulgaria is the objective. If the latter is the case, it is pointed out that any attempt at landing in the Bulgarian Dobruja, viâ the Danube, would be met by artillery fire. Thus such action would demand the provision of powerful artillery to cover it, which would not be possible with a neutral country, Roumania, on the other side of the river. Another alternative under discussion here is that in case of necessity (and a refusal by Roumania to allow Russian troops to cross her territory) Russia could "cut across" the corner of Roumania at the town of Turtukai, as by this means there would be a "back" on which to establish protective artillery. A third group plump for an advance against Transylvania, and Transylvania only.

In any case the problem is a nice one, and its solution is awaited here with the keenest interest. It has excited no less notice in Bulgaria and Austria, the former having during the last few days sent some regiments of infantry and artillery to Rustchuk, which was strongly entrenched some time ago. The inhabitants have been informed that at beat of drum they must flee from the town, as it is expected that it may be bombarded during any attempted landing by way of the Danube.

The Austro-Hungarians, on their part, are stated to have demanded permission of Roumania to pass ships of war down the river to attack Russia. Roumania very naturally refused; and it is now officially stated that the river from Reni to Galatz is mined. River mining, however, does not seem very formidable, if one may judge from the expeditious manner in which the river above was cleared by the Austrians.

The Danube has come much to the fore of late in the struggle, and Germany and Austria-Hungary are hurrying up thousands of tons of cereals by way of this now once more free waterway.

COMFORTS FOR THE MEDITERRANEAN AND BALKAN FORCES.

In an appeal for comforts for the Forces in the Mediterranean and Balkans, now under the command of her husband, General Sir Charles Monro, Lady Monro writes:—

Winter, with all its hardships and terrible suffering, is now upon us. The cold is bitter, and the storms have been very bad. Nothing can be obtained locally, and our men depend entirely for any comforts upon what we can send them from home. Their needs must increase as time goes on, and I feel we cannot do enough to show them our deep appreciation and gratitude.

I am authorized to say that her Majesty Queen Alexandra is specially interested in this appeal, and hopes that it will be generously responded to. I also have a message from Lord Kitchener, who has recently returned from the Near East, and who knows the conditions intimately out there, to say that this appeal has his full approval. My husband writes that they have had gales of wind, accompanied by rain and snow and bitter cold, and our men have suffered a great deal from the effects of the weather. I feel sure that all must realize the inevitable sufferings entailed, and the noble sacrifices that our men are making for their King and country. I specially ask those who have friends and relations in the Mediterranean and Balkan forces to assist me to send out ample supplies of comforts, by giving a whole-hearted response to this appeal.

Queen Alexandra's Field Force Fund have kindly offered to receive, pack, and despatch all goods sent to me. We want warm clothing, tobacco, cigarettes, pipes, etc., and money to spend on the comforts not supplied by the War Office. All gifts in kind, and donations of money, should be addressed to the Hon. Lady Monro, 24a, Hill Street, Knightsbridge, and marked "Comforts Fund for the Forces in the Mediterranean and the Balkans."

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Greece and the Allies.

Dec. 9.

Mr. OUTHWAITE asked whether the attention of the Secretary for Foreign Affairs had been drawn to the debate in the Greek Chamber on November 3, and to the statement made by M. Gounaris that, in reply to the soundings sent to the Governments of the three Allies as to the participation by Greece in the first attack on the Dardanelles, one of the Powers replied that such participation would not be in harmony with public opinion in his country from the moment when she had as goal the conquest of the capital of the neighbouring empire, and to the statement in reply of M. Venizelos that he knew that one of the Powers was not favourably disposed towards the participation of Greece in the enterprise; and could he say whether the opposition of this Power had been withdrawn; and, if so, at what date?

Lord R. CECIL: There is in the Foreign Office a report of this debate. As regards the last part of the question, I have no reason to suppose that any of the Allied Powers would object to the co-operation of Greece against the common enemy.

The Mesopotamian Expedition.

Mr. ANNAN BRYCE having asked whether the decision to advance on Baghdad with only one division was taken on the initiative of the military authorities on the spot or on instructions or suggestions from Home; and whether, if the instructions came from Home, they met with the entire approval of the authorities on the spot,

Mr. CHAMBERLAIN, in a written reply, states: General Townshend's Division was strengthened for the advance on Baghdad by the addition of other troops, but I do not consider that it would be in the public interest to give details at the present time. The force available for the advance was, in the opinion of the General Officer Commanding-in-Chief, sufficient for the operation. The advance was authorised by his Majesty's Government after full consideration of his reports, of the views of the Government of India and of the General Staff, and of all other available information.

Persian Affairs.

Lord R. CECIL, in reply to Colonel YATE, who raised the question of the Southern Trade Routes of Persia, said H.M. Government and the Government of India, in the hope of securing the safety of the Southern Trade Routes, had on several occasions made joint advances to the Persian Government for the upkeep of the Persian gendarmerie. Thus £25,000 was advanced in 1912 for the gendarmerie in Southern Persia, £100,000 in 1913 for the Fars gendarmerie, and £50,000 in 1914 for the Fars and Kerman. In addition to this, the conditions of the joint Anglo-Russian Loan of 1912 for £200,000 contained a stipulation that a "considerable portion" of the advance should be devoted to the organisation of the gendarmerie with the assistance of Swedish officers. He had no information as to whether the salaries drawn by the officers of the gendarmerie at the time of their defection were derived from the sources mentioned or from other and more recent revenues of the Persian Government.

Colonel YATE asked whether H.M. Government would now arrest the German Consul, bank manager, postmaster, and other Germans on the British concession at Shameen, in China, and detain them in custody at Hong Kong until the British Consul, superintendent of telegraphs, bank manager, and other British subjects arrested at Shiraz and detained in custody by the German emissaries in Persia are released and conducted safely to Bushire.

Lord R. CECIL: I have nothing to add to the answers given to the hon. member for Wirral on Tuesday.

Mr. DILLON asked whether about five years ago Major Stokes, an English officer, was appointed by the Persian Government to organize and command the constabulary throughout Persia, and whether the difficulties which caused his resignation were in any degree due to the attitude of the Persian Government.

Lord R. CECIL said the answer to the first part of the question was in the affirmative and that to the second part in the negative. Major Stokes was offered an appointment, the object of which was the organization of a gendarmerie force to assist the Persian Treasury officials in the collection of direct taxes throughout Persia. H.M. Government considered at the time that it would be inconsistent with the spirit of the Anglo-Russian Convention to support an appointment the effect of which would be to invest a British officer with certain executive and military powers within the Russian zone in Persia. Major Stokes was, therefore, induced by H.M. Government not to accept the appointment.

Food for Montenegro.

Dec. 13.

Sir J. REES asked the Secretary for Foreign Affairs whether any application had been made to his Majesty's Government to facilitate the despatch to Montenegro of food purchased or to be purchased by a syndicate operating in that behalf; if so, what action had been or would be taken in respect of such application; and whether any loan to Montenegro for the purchase of food was contemplated.

Lord R. CECIL replied that such an application had been made to the Foreign Office privately, but he did not think that at the moment there was any need for the formation of such a syndicate, the purchase of the necessary supplies having already been undertaken. The answer to the last part of the question was in the affirmative.

The Allies and Salonika.

Sir A. MARKHAM asked whether the attention of the Secretary for Foreign Affairs had been drawn to an interview between King Constantine and an American correspondent of the Associated Press, and to the former's statement that the landing of Allied troops in Greece was made without his assent; and whether, since Lord Lansdowne definitely stated that it was at the instance of the Greek Prime Minister that his Majesty's Government sent troops to Serbia via Salonika, he could make any statement on the matter.

Lord R. CECIL: I do not know that I can usefully say anything on the subject except that Lord Lansdowne's statement was perfectly accurate. It would not be proper for me to discuss the relations between the King of the Hellenes and his Ministers in purely domestic affairs.

Sir A. MARKHAM asked the Secretary for Foreign Affairs whether he was aware that statements had appeared in the Press of neutral countries that by sending troops to Serbia through Greek territory, France and England had violated the neutrality of Greece in the same manner that Germany violated Belgian neutrality last year, and that this same charge was made by the Chancellor in the Reichstag on December 9; and whether, seeing that the Greek Government, through their Prime Minister, requested this country to send troops to Serbia via Salonika to enable Greece to fulfil her treaty obligations to Serbia, he would take steps to have this fact made known in neutral countries.

Lord R. CECIL: I am aware that such statements have been made in neutral countries, but they have been contradicted and ridiculed in the Press of neutral countries without any representations by his Majesty's Government. If there is any danger of their being misled on this point the suggestion of the hon. Baronet will be borne in mind.

In reply to a further question put by Sir A. MARKHAM, asking whether he was aware that all the papers in New York controlled by Mr. Hearst published these statements from day to day, Lord R. CECIL said he was afraid it was quite impossible for our Government to control Mr. Hearst.

Another German Lie.

Sir E. CORNWALL asked whether the Secretary for India had received any report as to the attitude of the Arabs who have hitherto been friendly towards the British troops in Mesopotamia, and if he could state whether adequate reinforcements for all the future operations are now on their way.

Mr. A. CHAMBERLAIN: I presume the first part of the question refers to the rumour, of German origin, that friendly Arabs turned against British troops in the recent action. If I am right in assuming that that is what the hon. member wants me to answer about, I may say I have reason to believe that that is quite untrue. As regards the second part of the question, I have nothing to add to the information given in my previous reply.

Relief of Serbian Refugees.

Replying to Major BAIRD, Lord R. CECIL stated that the whole question of the relief of refugees from Serbia had been closely gone into in co-operation with the Serbian Relief Committee and with the Governments of the Allies. Steps had been taken to collect ample food supplies at points suitable for base depots, which would be stocked with clothing and materials for providing shelter as soon as the need for these could be measured. There were very great difficulties remaining to be surmounted, and in certain areas it was not easy to ascertain exactly how great the influx of refugees was likely to be, but on the whole he believed that the numbers to be supplied would not turn out to be as large as was first supposed.

British Prisoners in Turkey.

In a written reply, Lord R. CECIL informed Mr. AINSWORTH that the total number of British prisoners of war so far traced by the United States Embassy at Constantinople was 534, including 22 officers.

German Agents in Persia

Dec. 14.

Mr. DILLON asked the Secretary for Foreign Affairs whether the Shah's Government had failed to fulfil the promises given to the representatives of England and Russia and had allowed the German agents to transport from Teheran to Hamadan a huge quantity of bombs, maxims, rifles, cartridges, and other military supplies.

Lord ROBERT CECIL: As has already been stated in reply to the hon. member's previous questions on this subject, it appears that large quantities of war material have been smuggled into Hamadan. The Persian Government have assured his Majesty's Minister at Teheran that they will endeavour to the best of their ability to prevent such abuses of Persian neutrality, and in so far as they have been able to make their authority effective these assurances have hitherto been fulfilled. I do not think that under all the circumstances the Persian Government can fairly be said to have failed to fulfil to the best of their ability their promises in this matter.

Turkey's Man Power.

Commander BELLAIRS asked the Under-Secretary for War whether any approximate estimate could be framed of the number of troops Turkey could put into the field after a year of war, as

FOR INSURANCES OF ALL KINDS.
F. W. CUMING & CO., LTD.,

to the permanent loss she had sustained as the result of the war, and as to the increase that could be made with German munitions freely supplied.

Mr. TENNANT, in a written reply, states: It is calculated that Turkey now has some 650,000 men in the field, and that this number might possibly be increased to a million in the circumstances mentioned by the hon. and gallant member.

Greece and the Allies. Dec. 15.

Mr. LYNCH asked whether King Constantine had ever addressed to the British Government any representation of the position of Greece to the effect that the Balkan policy of the Allies was not definite, and that, supposing that Greece had joined the Allies, and that subsequently the Allies had decided to reduce their action or to retire altogether, the position of Greece might be precarious, and that he feared that in those circumstances Greece might become a second Belgium; and, if so, what reassurances, if any, were given to Greece.

Lord R. CECIL replied that no representations had been made to his Majesty's Government in this sense.

The Forces at Hamadan.

Sir J. D. REES asked the Under-Secretary for Foreign Affairs what information the Foreign Office had regarding the forces at or near Hamadan which were believed to be commanded by German officers.

Lord R. CECIL: I have received but little reliable information as to the nature and strength of the force to which the hon. member alludes. I understand, however, that it consists of some 8,000 irregulars and 3,000 revolted gendarmes, and that it has an adequate supply of rifles, machine-guns, and ammunition.

Lord R. CECIL informed Mr. DILLON that, as had already been stated, it appears that large quantities of war material had been smuggled into Hamadan. The Persian Government had assured H.M. Minister at Teheran that they would endeavour to the best of their ability, to prevent such abuses of Persian neutrality, and in so far as they had been able to make their authority effective, these assurances had hitherto been fulfilled. He did not think that under all the circumstances the Persian Government could fairly be said to have failed, to the best of their ability, in their promise in this matter.

The Tigris Fighting.

Replying to a question put by Sir E. CORNWALL regarding the operations in Mesopotamia, Mr. CHAMBERLAIN said: I will publish from time to time any information that can properly be given with regard to the operations in Mesopotamia, and I have done so up to the present. Telegrams received by me to-day from Sir John Nixon report that General Townshend reported to him that on the 12th inst. there was heavy musketry fire for an hour on the north front, but that the Turks did not attempt any advance in that quarter. A heavy attack on the village on the right bank was repulsed. On the 13th all was quiet. Reinforcements continue to be sent up stream as they arrive.

Sir A. MARKHAM asked why we had to get information chiefly from Turkish sources. We had far more information from Constantinople, emanating from Germany, than from our own Foreign Office.

Mr. CHAMBERLAIN: In so far as that is the case, it is because I am unwilling to give to the House information for the accuracy of which I cannot vouch. The information from the sources to which the hon. gentleman refers is frequently grossly inaccurate.

Sir E. CORNWALL asked the Secretary for India if he would state what means were at his disposal for ascertaining the strength of the Turkish forces at Baghdad; whether the Foreign Office and the India Office were in close touch with each other on the subject; whether any explanation could be given for the British expedition advancing so far into Mesopotamia with inadequate forces; and whether he had conveyed to General Sir J. Nixon and General Townshend the appreciation of his Majesty's Government of the bravery, skill, and endurance shown by all ranks engaged in the expedition.

Mr. CHAMBERLAIN: It would not be in the public interest to answer the first and third parts of the question at the present time. The answer to the second and fourth parts is in the affirmative.

SUBMARINES IN THE MEDITERRANEAN.

In a message, dated December 14, Reuter's Malta correspondent reports:—The measures which have been adopted by the Admiralty, in conjunction with the French and Italian Admiralties, for dealing with the submarine menace in the Mediterranean have apparently proved most effective. Not a single mishap to shipping has been reported during the last ten days, although there have been the usual number of arrivals and departures.

On Wednesday evening, at Stratford, Dr. R. W. Seton-Watson, hon. secretary of the Serbian Relief Committee, delivered a lecture on "Serbia's Place in the War." It was, he said, recognised that Serbia had been attacked because she lay on the route to the East. She had held the gates to Constantinople for a year or so against all comers, and in defending that strip of land she was, in the truest sense, defending the British Empire.

THE PRESS ON THE NEAR EAST.

Sea Power and the Balkans.

Colonel F. N. Maude, C.B., writing on Germany's aims in the *Sunday Times* (December 12), considers that insufficient attention is paid to the fact that Germany's advance into Serbia places her in a position of ever increasing embarrassment regarding communications in a mountainous and practically roadless country. The writer compares the enemy's methods of land transport in these regions with those which are open to the Allies by way of the sea, "for the paths of the sea mend themselves automatically as they are furrowed by the keels of ships, and a single big ship will carry more than very many trains, and they can be discharged in a few hours." The article continues:—

These considerations are amply sufficient to justify the policy of the Allies at Salonika in the present instance. All our efforts having failed to bring direct support to the Serbians in time to avert their retreat, the obvious and common-sense solution of the position was to concentrate backwards, thus shortening our own lines of communication and increasing those of the enemy. This course also minimised the dangers of Greek treachery and gained time, not only for the disembarkation of more troops at Salonika, but also for the arrival of the main army destined for the Balkans, but not necessarily intended for a landing at the same place.

The writer considers that thinking men in Germany know that the game is up, and are putting forward exaggerated claims of successes as a consequence of this knowledge and in the hope of influencing neutrals and "peace at any price fanatics."

The Retreat on Salonika.

The *Morning Post* (December 13) in a leading article makes no attempt to disguise the disadvantages under which the Allied armies have laboured since, at the invitation of M. Venizelos, they landed at Salonika.

French and British troops have been jostled and pushed aside in the streets of Salonika. All sorts of obstacles have been put in the way of railway transports, and the trains have been delayed unconscionably at critical moments. Our movements have been spied upon, our encampments approached by Greek troops, and everything has been done to produce friction and make the situation intolerable. The spring of this conspiracy is said to be high up in the Greek Army command and in Court circles. There could be no situation more uneasy and harassing for a retreating army short of a country actually in arms against it.

The *Post* reiterates its previous contention that the scheme of advancing our armies into Serbia in the face of Greece's defection was strategically unsound. In regard to the recently reported decision of the Greek Government to give the Allies a free hand at their base, the paper says:—

If this is indeed true, it marks a change in King Constantine's attitude. This change of attitude may be due to the pressure which the Allied fleets are bringing to bear upon Greece and Greek commerce. For it can no longer be hidden from King Constantine that in certain circumstances the penalty which Greece would have to pay for disregarding the advice of the sea Powers would be nothing less than the total ruin of the country. On the other hand, with Bulgarian and Turkish armies pressing in upon the Greek frontier, it may have occurred to King Constantine that the only way to save Salonika is to leave it in the hands of France and England.

The *Daily Telegraph* (December 13), in a powerful leading article, in which the events of the Near East are reviewed, urges that verbal promises from the Greeks are no longer sufficient.

For we have discovered that they have their own interpretation of what they call a "benevolent neutrality," and that it by no means agrees with what we understand by the term.

While it is admitted that there is cause for anxiety, the article concludes with the following paragraph:—

Not by a hair's breadth has our confidence in ultimate success been diminished. The rush to the recruiting booths is sufficient to prove the strength of British convictions. All we ask is that, in handling the problem, our rulers shall act with that resolute energy which the strength of Allied resources warrants, and which the situation seems imperatively to demand.

Greece and the Allies.

In the *Contemporary Review* (December) Dr. E. J. Dillon has an article of quite exceptional interest under the above heading. The writer has not a high opinion of the political status of Greece to-day.

The Parliamentary storms that burst in Athens this autumn revived in some Entente quarters the illusion that the political atmosphere of Greece would at last be purified and room made for public men of high purpose and moral principle, like Venizelos, who were recalled to power by the King. But it was not to be. As a shower of rain could not cleanse the stables of Augeas neither can a Parliamentary crisis purify the pestilent political soil of King Constantine's realm.

Digitized by Google

The writer does not question the ability or sincerity of M. Venizelos.

But if a child can lead a horse to the river's edge forty men cannot make him drink. A nation may be saved from its enemies, and at a pinch even from its friends, but the very gods cannot save it from itself. Greece may well be an instance of this. She puts her ease, profit, and prosperity above strenuous effort and painful self-denial. She is deaf to the voice of duty. And let it not be urged that "the heart of the Greek or the Bulgarian people is in the right place and that it is only their rulers that have gone astray." Between leader and led one cannot make any such distinction. Each Balkan King claims to represent his respective people, and if the claim were unfounded the nation could and would say so, and follow up the declaration with remedial measures.

Dr. Dillon quotes the case of Italy's intervention, which was brought about by the will of the people in spite of the most strenuous attempts of a pro-German and powerful Minister to preserve neutrality. From this side of the question the writer proceeds to a character sketch of King Constantine, and to an examination of the events which have led him to popularity. Dr. Dillon deals lightly with the latter subject. The King has been hailed as the "first strategist on earth," in consequence of the last Balkan War.

There is something so touching, so unsophisticated, so child-like, in this apotheosis of a reputed military genius by a humdrum mercantile people which exalts itself in worshipping him, that it would be ungenerous to analyse it too closely. But it is well to realize the origins of the harmony which now undoubtedly exists between the King and the bulk of his subjects. One of them is the widespread belief that Constantine is the Greek Messiah, and his military feats are the foretokens of a higher greatness in store for the Hellenic race now that the foundations of the political world are being renewed. And compared with the genius of the Lord's anointed the talent of the Cretan interloper is as a drop to the ocean.

The following paragraph refers to the misplaced confidence which the Allies reposed in the power of Venizelos, re-elected by a sound majority, to carry out the mandates of his supporters.

They did not yet know, or refused to believe, that Greece was an autocracy and Constantine XII. the trusty henchman of the Kaiser. But they were soon to learn the truth. Having dissuaded Serbia from taking effective measures to save herself from a catastrophe at the hands of Bulgaria and bidden her put her trust in Greece, the Allies suddenly woke up to find that their chivalrous Greece had vanished, and the Greece of the Kaiser, Queen Sofia, and Baron Schenk was grinning at them in its place.

Dr. Dillon does not believe in the existence of a Greco-Bulgarian Treaty, for the simple reason that the "Greeks loathe and fear the Bulgars, and these in turn despise the Greeks." An agreement exists between King Constantine and the Kaiser: that is all.

To sum up, Greece is not Venizelos, nor Zaimis, nor Skouloudis, nor the Chamber, nor the nation, but a Field-Marshal of the Prussian army, the Kaiser's brother-in-law and firm believer in the final victory of the Central Empires. Constantine XII., the world's greatest living strategist, is the only factor that counts when the policy of Greece is being forecast. And we now know what to expect of him.

The Attitude of Roumania.

The *Manchester Guardian* (December 14) refers to the anxiety caused in various quarters by the recent action of Roumania in permitting the export of a large quantity of grain to the Central Empires, and in mining the lower reaches of the Danube. The writer, from whose article we quote below, is of opinion that such anxiety is quite baseless.

As regards the exports, it is well to bear in mind that owing to the closure of the Dardanelles Roumania has accumulated a gigantic stock of foodstuffs, which she has kept back as long as she could, hoping for a change in the military situation that would have allowed her to export them through Serbia and Salonika. The occupation of the former has frustrated these hopes, and as the Central Powers are prepared to pay a high price for the stuffs Roumania has been reluctantly compelled to make a virtue—no doubt a very profitable one—of the necessity imposed by the circumstances. As the *Frankfurter Zeitung* itself recently warned its leaders, this sale of grain by Roumania must not be considered as an act of friendship towards the Central Powers. "The enormous price which Roumania is exacting shows that her sole intention is to exploit the present opportunity."

As for the mining of the Danubian waters, it is merely a sign that Roumania is still waiting. As a Russian march through Roumanian territory would necessarily involve Roumania in the war, she has mined her waters so as to ward off the danger. The act of mining the Danube is but another way of proclaiming that the hour of Roumania's intervention is not yet.

The Price of Neutrality.

In a telegram from Paris on the situation in Greece, the "Own Correspondent" of the *Morning Advertiser* (December 14) includes the following paragraph concerning the price that Greece is already paying for her precarious neutrality:—

Meanwhile Greece has paid dearly for her policy of procrastination, for her desire to remain neutral, and thus help the game of the Boche Powers. She has incurred over three millions of unproductive expenditure by the mobilization of her army. She has allowed her enemy, Bulgaria, to take possession of three-fourths of Serbian territory. She has been deprived of her sovereign rights over Macedonia, and probably she will be deprived of those of her maritime empire. "These, for the moment," says the Hellenic journal, the *Patris*, "are the results of the policy of neutrality of the Government of M. Skouloudis."

This newspaper adds that those who accused M. Venizelos of being the political agent of England and France must now see that his policy was based, not on sentimental reasons, but on the interests of Hellenism, which for profound reasons cannot be separated from the interests of the Entente Powers. "May the past serve as a lesson for the future," concludes the *Patris*.

The Defence of Egypt.

Writing of German plans for the future, the Military Correspondent of the *Times* (December 14) says that—

"The central fact of the military situation is that the Austro-German Allies have failed, on their three main fronts, to overthrow the armies of the Great Powers opposing them, or to affect in any way, except by hardening, the resolution of the Allies to continue the war until their political aims are completely achieved."

He thinks it not improbable that the desire to "strafe" England for bringing her plans to naught will lead Germany at least to attack the British position on the western front, and possibly to attempt an invasion of England. He continues:—

Present appearances point, however, to the greater certainty of another operation against us, namely, an attack on Egypt. As soon as the Belgrade-Sofia railway and the Semlin bridge are completely repaired it is probable that the Germans will despatch to Constantinople, presumably in January next—say, four army corps—probably young troops of new formation, to join up with 350,000 Turks, and thus hope to bring 500,000 men to bear upon our troops in Egypt.

The *Times* urges that all our spare troops must be concentrated in the Eastern Mediterranean for this campaign.

Articles to Note.

"The British Expedition to Baghdad," by Lewis R. Freeman, in the *World's Work* (December).

"The German Invasion," by Sir George Makgill, in the *English Review* (December).

"War Map Supplement. Persian Gulf—Dardanelles—Suez Canal—Caucasus," in the *Standard* (December 14).

IMPORTANT TO SUBSCRIBERS.

THE NEAR EAST is published on Friday, and copies are obtainable at any London bookstall early in the morning, and in the Provinces in the afternoon of that day. To prevent disappointment, readers would assist us very much if they would place a standing order with their newsagent or railway bookstall for the supply of the paper every week. Any newsagent or railway bookstall clerk can, however, obtain copies at a few hours' notice if they have temporarily run out of stock; or we will post THE NEAR EAST for delivery on Friday morning, to any address, on the following terms, post free:—

TWELVE MONTHS	£1 0 0
SIX MONTHS	0 11 0
THREE MONTHS	0 6 0

Abroad THE NEAR EAST is obtainable at any of the following agencies:—

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

CAIRO. Cairo Express Agency, near Shepheard's Hotel; The British Library, Sharia Kasr-el-Nil; and at Railway Bookstalls.

ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha; Librairie Cauro, Rue Cherif Pasha; J. Eugenides and Co., 12, Rue Cherif Pasha; Main Station Bookstall.

PORT SAID. Charles Evans, and on board vessels in the harbour.

KHARTOUM. Sudan Stationery and Bookstore.

CYPRUS. Cababe and Wilson, Nicosia.

SALONIKA. Librairie Francaise, Rue Sabri Pasha.

ATHENS. Librairie Th. Vafiades.

BUCHAREST. No. 1, Strada Academiei, and Socec and Company, Calea Victoria.

CALCUTTA. 1, Royal Exchange Place.

NEW YORK. Office of "The New Armenia," Flat Iron Building

Black Sea Shipping.

Enemy Vessels Lost.

(From Our Special Correspondent.)

Athens, November 29.

The following list of steamers destroyed in the Black Sea and in the Sea of Marmora is not only interesting, but is striking evidence of the activity of the Russian Fleet and of the British and French submarines in these waters.

If the Russians have not been successful in stopping all supplies of coal reaching Constantinople from Zungouldak, they must be given the credit of having largely contributed to the destruction of about 80 per cent. of the mercantile tonnage which existed in Constantinople on the outbreak of war.

It will be remarked that very few vessels are now available for the conveyance of munitions and supplies from Constantinople to the Dardanelles or coal from Zungouldak.

In addition to the steamers mentioned in this list hundreds of sailing vessels and lighters have also been destroyed in the Black Sea and in the Marmora, as well as three large warships and several small ones and tugboats.

List of Steamers Reported Sunk in the Black Sea.

Adalia	Turkish (not identified)
Bezmi-Alem	Turkish Government transport
Brousa (628)*	(ex-Greek Mela)
Beicos (1,188)	Turkish
Banderma (474)	Turkish
Derindje (3,373)	German
Dafni (1321)	Turkish
Edindjik	Turkish (not identified)
Edriné (646)	Turkish
Ella (3,510)	Belgian (seized by Turks)
Georgios	Greek (not identified)
Heybely Ada (927)	Turkish
Hilal (1,502)	Turkish
Hellespont	Turkish (not identified)
Hairoullah (139)	Turkish
Iskudar (2,900)	Turkish (ex Craigforth, seized by Turks)
Illiria (1,066)	Austrian
Ivonne	Turkish (French tugboat seized by Turks)
Guzel Girid (1,232)	Turkish
Kinali Ada (297)	Turkish
Kessandra (438)	Turkish
Kizil Irmak (1,945)	Turkish
Leon	Turkish (ex-tugboat belonging to Mr. Grech)
Marie Rosette (759)	Italian
Midhat Pacha (4,455)	Turkish
Millet (817)	Turkish
Morna (1,496)	Greek
Nikea (905)	Turkish
Newa (549)	British
Nilufer (1,088)	Turkish (converted into mine layer)
Nedjat (1,523)	Turkish
Nagara	Turkish (not identified)
On Temmous (2,162)	Turkish
Ogourola	Turkish (ex-Austrian. Not identified)
Principessa Giovanna	Italian (not identified)
Persia	Persian (not identified)
Progress (408)	French
Salonique (1,127)	Turkish
Saghditche (763)	Turkish
Skyros (2,634)	German
Samsoun (275)	Turkish
Sakiz (142)	Turkish (tobacco Regie)
Seihoun (ex-Sabah) (3,013)	Turkish
Seyare	Turkish tugboat
Taxiarchis (885)	Turkish
Tedjelli	Turkish (not identified)
Tenedos (3,564)	German
Washington	Archipelago American Steam Ship Co.
Yechil Irmak	Turkish (not identified)
Zoungbuldak (1,545)	Turkish

Reported Sunk in Sea of Marmora.

Bulbul	Turkish (not identified)
Biga (784)	Turkish
Bosphore	(Steamtug belonging to French Salvage Co.)
Bosprus (2,995)	German
Bahri-Sefid	Turkish (belonging to Tobacco Regie)
Bosphorus No. 44	Turkish (Bosphorus Steam Navigation Co.)
Bosphorus No. 62	Turkish (Bosphorus Steam Navigation Co.)
Bosphorus No. 41	Turkish (Bosphorus Steam Navigation Co.)
Carmen (4,424)	Austrian
Chios (3,304)	German
Golden Horn No. 10	Turkish (Golden Horn Steam Navigation Co.)
Golden Horn No. 14	Turkish Golden Horn Steam Navigation Co.)
Halep (3,684)	Turkish
Erdek (660)	Turkish
Eresos (3022)	German
Hanefé (506)	Turkish
Ihtibah	British (seized by Turks)
Ispahan (843)	Persian (sunk at Haidar Pacha Quay)
Leros (2,679)	German
Mahmoud Chefket Pacha (2690)	Turkish
Mercedes	French tug boat seized by Turks
Plevne (1,154)	Turkish
Younoux	Turkish (not identified)
Zaphir	Turkish (not identified)

Reported Damage by Enemy and Laid Up at Constantinople.

Bitinia (3,125)	Austrian (torpedoed in Marmora)
Gul Djemal (5,071)	Turkish (torpedoed in Marmora)
Scham (3,662)	Turkish (torpedoed in Marmora)
Stamboul (3,559)	German (torpedoed in harbour)
Lily Rickmers (4,081)	German (damaged by gunfire in Black Sea)
Madeleine Rickmers (3,431)	German (damaged by submarine at Panderma)

Steamers Reported Seized by Russians.

Amalia	Italian (lying at Sevastapol)
Craiova	Roumanian " "

Steamers Reported Now at Constantinople.

Corcovado (8,099)	German (reported munitions being made on board)
General (8,063)	German (occupied by German General Staff)
Debrovnik (4,238)	Austrian (used for carrying coal and munitions)
Arimatea	Austrian " "
Irmingard (4,211)	German " "
Nora Hugo Stinnes (4,985)	German " "
Rodosto (3,662)	German " "
Kerkyra (2,564)	German " "
Patmos (1,907)	German " "
Kerassunde (3,056)	Turkish (reported unseaworthy)
Seyer (3,338)	Turkish " "
Touran	Turkish (not identified)
Yourouk	Turkish (not identified)
Altay (about 500)	Turkish
Sally Maersk (2,794)	Danish (laden with maize)
Despina Aivadoglou (774)	Turkish (all these are probably unseaworthy)
Edremid (414)	Turkish " "
Gallipoli (282)	Turkish " "
Nimet (280)	Turkish " "
Inebdlie (240)	Turkish " "
Hawk (117)	British " "

Hospital Ships.
(Painted White.)

Ak Deniz (5,006)	Turkish (ex Oldenbourg)
Rechid Pacha (4,458)	Turkish (ex Port Antonio)
Gul Nihal (1,259)	Turkish (ex Cambridge)

and four Bosphorus passenger boats.

(*) Gross register tonnage in brackets.

CONSTANTZA TRADE.

The British Vice-Consul at Constantza, Roumania, reports that the year 1914 was not a prosperous one either for the port or the district of Constantza. The outbreak of the European war interrupted regular mail communications with Western Europe; the banks restricted credit, and refused to deal in foreign negotiable instruments; and, in consequence, payments could neither be effected nor received from abroad. Loaded ships experienced delays and difficulties in their passage through Turkish waters, so that the trade of the port was practically at a standstill even before the definite closing of the Dardanelles. The harvest, which constitutes the main wealth of the district, suffered from the rains. The abnormally high prices of grain which set in towards the end of the year do not appear to have much benefited the farmer and the peasant.

The local Customs House does not supply detailed statistics of imports and exports, but approximate figures furnished by the Harbour Master put the volume of the imports into Constantza in 1914 at 140,433 tons, as compared with 229,079 tons in 1913, and the volume of the exports at 767,671 tons, against 1,271,180 tons in 1913.

The principal imports are coal and coke, tinplates, cotton goods, and provisions such as tea, coffee, fresh and dried fruits, vegetables, and oils. The quantity of coal and coke imported in 1914 was 48,560 tons, a decrease of 82,092 tons as compared with the 1913 figures; the imports from the United Kingdom in 1913 and 1914 were 54,456 tons and 26,919 tons, and from Germany 70,384 tons and 20,132 tons respectively. Tin plates are in great demand by the petroleum companies at Constantza for making petroleum tins, and there will be a large demand as soon as these can be imported.

DIRECTORY—continued from page 187.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The appointment of an official controller to the Egyptische Hypotheken Bank, A.G., will be hailed with pleasure by all who have watched the peculiar attitude taken up by the Egyptian Government with regard to certain enemy establishments. Our Cairo Correspondent (page 171) has some pertinent remarks to make this week on the subject, and, from what I hear, he might have been even more severe in his criticism.

***

It is a fact, for instance, that the provisioning of the British Army in Egypt is largely in alien hands, and I have reason to suspect that the interest of British establishments in the country have suffered thereby. The welcome announcement is made this week that "the British Army having to obtain its dries supplies solely through the Ministry of Agriculture, the latter has appointed, as its agents in this matter, the Egyptian Markets Company." This is most welcome news, and I congratulate the company in question. On the other hand, I cannot but point out that the authorities should apply this method of procedure to supplies of all kinds, not only to dries, and that the concessionnaires should *in every case* be a British company, or, failing this, under direct British control.

***

This is a matter, I think, which is deserving of immediate attention. That we should fight our battles for the sake of enriching alien provisioners to our Army (and in some cases the aliens are not even friendly to our cause) is driving chivalry in this war a little too far. It may be argued that the only organization for the provisioning of the British Army in Egypt was controlled by aliens when we went there, but this is no excuse for not having created an organization during the last sixteen months, and for not having taken prior and exclusive advantage of such existing British organizations as the Egyptian Markets. Had this been done, the Deutsche Baumwollpresse A.G., referred to by our Correspondent, could not have provided fodder to the British Army.

***

In the latter case, the gravity is accentuated because the Deutsche Baumwollpresse A.G. is an out-and-out enemy concern, an offshoot of the Deutsche Orient Bank, the great agent of German propaganda and corruption in Egypt, a hydra-headed concern of everlasting menace to the Empire, and one that can only be guarded against by completely destroying its power for doing evil. There is not a country in Europe, from Italy to Roumania, that is not cursed with its Deutsche Orient Bank, its Deutsche Hypotheken Bank, etc., which exist only for and by bribery, thereby acquiring tremendous power, and laugh at any attempts made by their victimized countries to coerce them. When we remember that three-fourths of the capital invested in Roumania is German and that Austro-German capital controls Bulgaria, can we wonder at what is taking place in the Balkans?

***

To-day, we are fighting this evil on the battlefields of Europe; to-morrow, if the world is to enjoy a long spell of peace, we shall have to continue to fight it with other weapons, until it is utterly crushed. We can begin doing so to-day in Egypt. If it can be proved—and I should think that there can be no difficulty in doing so—that the Deutsche This-and-That worked, before the war began, with intent to undermine our influence and prestige in Egypt, the concern in question must be swept out of existence, and never again be allowed to open anywhere within the Empire. This is the only way to deal with such enemy establishments and their creations, and if we are energetic in this matter, setting up a precedent if need be, we shall find that other and smaller countries will not be slow to follow our example, with the result that Europe will emerge much cleaner after the process of elimination. On the other hand, to allow such companies to continue their nefarious work, provision our armies and re-elect German directors to laugh at our supineness, is a policy that can find favour nowhere except in Berlin. Surely, that is not what we are fighting for? Allow me, therefore, to urge on the proper authorities in Egypt the immediate necessity for prompt action against enemy concerns that have done the country no good whatsoever and which have openly done us harm in the past, and will do so again if we leave a gasp of breath in their bodies.

***

There is at present, writes our Cairo Correspondent, no means of taxing "war profits" in Egypt. The contractors who have made large profits, and the cotton dealers who took unfair advantage of the situation last autumn, have contributed not one red cent to the revenue, and it seems time that some scheme should be introduced whereby such elements should be made to contribute to the Exchequer some portion of the profit they made out of the war. With regard to the cotton dealers, there is no reason why in normal times they should not make some contribution, seeing that their profits are made entirely out of the produce of the country.

***

An announcement was made in Amsterdam on Wednesday by companies owning Dutch East Indies liners and mail-boats that, "until further notice, boats will not use the Suez Canal route, but will make the voyage round the Cape." The official explanation is that it is due "to the increasing uncertainty of being able to obtain the necessary coal at the appointed stations." This change of route means the addition of from twelve to fourteen days to the length of the voyage, whilst service will be restricted to one of ten days instead of weekly. The companies involved are the Rotterdamsche Lloyd and Stoomvaart Maatschappy Nederland and Maatschappy Ocean, the two first being mail and passenger boats and the third freight only.

***

In an interview on Wednesday the managing director of the Rotterdamsche Lloyd said that telegrams had been received from the company's coaling stations along the Suez route stating that it was impossible to ensure the keeping up of the coal reserves, and that, therefore, it would be inadvisable to continue the use of this route. Another consideration, explained the director, was that in case of delay while waiting for coal it would be impossible to provision passengers and crew for a possible considerable length of time. He added: "There is no political reason whatever for the change of route."

M. Tontcheff has been singing the praises of Germany in the world press. Everything, according to him, is smiling in the Teuton garden, and agriculture in Belgium is flourishing—a circumstance for which the Kaiser can hardly be held responsible, because seeds germinate, just as the tides ebb and flow, in spite of imperial will. So that M. Tontcheff's imitation of King Canute's courtiers will avail him little. Incidentally, the *Times* reports that the German Government War Lending Institutions are prepared to accept Bulgarian Guaranteed Treasury Bonds "as security up to 40 per cent. of the nominal value," and wisely adds: "Berlin could pay no more eloquent compliment to the credit of Germany's ally."

***

The Cardiff correspondent of the Central News telegraphs that the Greek Government has commandeered all Greek ships above 1,500 tons net for, it is stated, carrying foodstuffs from America. Greek vessels loading or empty have been ordered to proceed to Hampton Roads, Virginia, U.S., immediately.

***

With reference to the appointment of a Commission (as announced last week by our Cairo Correspondent) to facilitate the use of local resources in Egypt for military purposes, it is now announced that Brigadier-General Ford has been given a place on the Commission. The creation of the latter (says the Cairo Exchange correspondent) has given general satisfaction, for there has undoubtedly been a certain amount of waste. It is felt that this will not continue in the presence of the Commission, which consists of men familiar with the local conditions.

***

According to a New York paper, it is now possible to grow coloured cotton, and it is believed in the United States that spinners and manufacturers will eventually be enabled to obtain the article in the raw or unmanufactured state in any desired shade or colour. A planter in South Carolina is reported to have succeeded in producing cotton which ranges from snow white to a deep olive green. There is every reason to believe that black cotton, sought for years by spinners and manufacturers, is about to become a reality. The planter's statements are borne out by the receipt in Savannah of samples of his coloured cottons. The exhibit has been framed and hung on the walls of the Cotton Exchange, where it has occasioned a great amount of interest and comment. The seed used in the experiments were those of Egyptian staple. Seed selection has been practised extensively, and in four years this grower has obtained in regular order from the Egyptian seed a cream tan, yellow, green, light brown, olive green, and bronze.

***

British firms in the Sudan are not so numerous as to be passed over lightly, and I should, therefore, like to call attention to Messrs. Law and Company of Khartoum, who have been established in the Sudan for some years doing a large gum and general produce business. Mr. Law, the managing director, has had a long trading experience in the country, and knows it thoroughly. The London offices of the firm are at 15, 16, and 17, Tower Hill.

COMMENTATOR.

Turkey and the War.

U.S. Consular Reports.

We reproduce to-day further extracts from the U.S. Consular reports from Turkish vilayets.

IV.—TRIPOLI.

The first six months of 1914 were the most prosperous, from a business viewpoint, ever known at this port and consular district, whereas the last six months of the year were the worst experienced. The present war has had a paralyzing effect on trade to and from this port, as over 90 per cent. of its imports come from countries that are now at war. During August and a part of September a small quantity of merchandise was brought into this port in order to fill contracts made previous to July 1. The greater part of these shipments was refused, however, as the consignees were not able to pay for them. For several years past, German and Austrian firms have covered this market systematically, and they have gradually increased their sales to about 78 per cent. of the total amount of manufactured articles imported here.

Trade.

Owing to the stopping of all import trade at this port, the supply of goods on hand will soon be exhausted, and when the time comes to supply the demand for new goods American exporters should endeavour to capture this trade. American exporters will do well to keep in mind the fact that 90 per cent. of all manufactured goods and 95 per cent. of raw material, such as iron, copper sheets, brass, tin plates, lead, caustic soda and potash, dyestuffs, cotton thread, and wool yarn, must come from abroad. Cotton yarn (thread) and cotton tissues, the greater part of which comes from England and Germany, and the remainder from Italy and Austria, are among the principal imports at Tripoli.

The unbleached cotton yarn is used mainly in weaving on hand looms and, to a small extent, on hand-power looms.

German and Austrian table knives, pocket-knives, scissors, and razors have superseded those of other countries, as they are cheap in price, which fact alone is sufficient to influence the local buyer. The fact that such goods must be cheap and have a gaudy appearance is witnessed by the thousands of pocket knives with bright finish and inferior blades that are sold annually in this market. Table articles to a considerable amount are imported into this market from Germany and Austria, which are, for the most part, cheap in price, and if one wants to consider cheapness rather than quality, they suit very well. Carpenters' and masons' tools find a ready market, as do all kinds of shoe findings, leather for uppers and soles, the former coming from Germany and the latter from Italy almost exclusively.

Rice, of which large quantities are imported, comes from Rangoon, India, Egypt, and Italy; flour is imported from Russia, France, and Italy; coffee from Italy and Arabia; and sugar is purchased from Russia, Germany, Austria, and a small quantity from France. Canned goods come from France, Great Britain, Italy, Spain, and the Netherlands. Kerosene is bought from Russia, the United States, and Roumania, and motor spirits from the United States and Russia. Germany and the United States furnish this market with wire nails. Iron and steel bars are purchased in Belgium and Germany, while galvanized-iron sheets are imported from the United States and Great Britain. Great Britain and Egypt are the sources of supply for caustic soda and potash. Cement and water lime, also building materials, such as roof and floor tiles, in large quantities are ordered from France, while Italy still holds the market in marble for floors and other purposes.

One can only repeat what has been stated in past reports, viz., that this market requires for the most part looks, not quality, cheap, not expensive, articles, for the purchasing power of the consumer is limited, and it is not likely that conditions will change much in the near future. This is a good market for staple products and the local merchants have a mind of their own as to what they want, and they will purchase thousands of dollars worth of goods directly from a commercial agent, when, on the other hand, they will spend only a limited sum through mail orders. The knowledge of the custom has been taken advantage of by German and Austrian firms, which explains the wonderful success these countries have experienced in selling goods in this market during the past decade.

Concessions.

During 1914 two important concessions were granted to British companies. One was a forestry concession to cut timber in the Taurus Mountains, and the other was a mining concession to work certain iron deposits near Ayas. Operations on both concessions were stopped because of the war. The local chrome mines were also practically neglected. Water works and other public improvements planned for the city of Adana were abandoned, and the electric lighting of Mersina, the installation of the plant for which was about to have been made as the war broke out, has again been halted. The building projects of American petroleum companies to facilitate the handling of their steadily increasing business in Turkey were also abandoned.

Shipping.

The port of Adalia is almost entirely dependent for trade upon Smyrna, Constantinople, and the neighbouring archipelago. It was therefore similarly affected by the outbreak of war. Thus the value of all shipments from Adalia decreased from £278,039 in 1913 to £133,827 for 1914. The greater part of the goods arriving at Adalia, however, consists of re-exports from Smyrna and elsewhere, and these also showed a large decrease.

Despite the war the number of steamers calling in 1914 at Mersina was 555, which was thirty-two more than in 1913. At Adalia the number was 310, while in 1913 it was only 136. These increases are largely due to the frequent calls of Italian steamers, which after the outbreak of war secured the business that had gone to Austrian and German ships. After November the Italian steamers obtained practically a monopoly of local shipping. Their principal rivals were the steamers of the Archipelago American Company, an American-owned corporation.

GREECE AND THE COAL TRADE.

The Cardiff correspondent of the *Financial Times*, writing on Sunday on the coal trade situation, states that the uncertainty of the Greek position has greatly upset the market. Greek tonnage is a most important factor in the South Wales coal market, and the further requisitioning of tonnage by the Greek Government has served to accentuate the shortage of supplies. The many rumours in circulation during the week naturally created an uneasy feeling. The supply of coal going to Greece herself has been greatly reduced of late, and now none is allowed to go. Shipments there last month did not exceed 20,000 tons, compared with 75,000 tons in the corresponding month of last year. The total sent in the last eleven months is only half the total sent in the corresponding period of the preceding year.

BULGARIAN TRADE NOTES.

(From Our Own Correspondent.)

Bucharest, November 27.

The Bulgarians announce that all concessions which had been granted in the territory newly occupied by them are annulled.

It is announced that the archives of the Banque Agricole Serbe, recently founded, have been discovered intact at Uskub. An inspector from the Banque Agricole Bulgare has proceeded thither to examine them.

The journals at Sofia express great uneasiness at the want of sugar which is being felt in Bulgaria. The new crop is not sufficient for the necessities of public consumption; whilst the production of beet is far below requirements, both as regards quality and quantity. The largest amount of sugar on which one can count is hardly 8,000 tons, whereas the annual internal consumption is 20,000 tons. To combat this the price is raised from 80 centimes to 1.35 frs. per kilo. It is hoped to make up the deficiency from Austria or Germany. Two hundred tons have been purchased in Austria to meet the pressing requirements of the capital.

The Banque Agricole Bulgare has sent delegates to the invaded territories to study the situation of the branches of the old Banque Agricole Ottomane. The Banque Agricole Bulgare is itself a creation of the Banque Agricole Ottomane, founded before 1877 in Bulgaria, then the vilayet of Rustchuk, by Midhat Pasha.

The Administration of the Commune of Sofia has just issued an order by which all the inhabitants are obliged to declare within ten days the quantities of maize, wool, and copper in their possession.

Imports into Bulgaria from January 1 to August 31, 1915, amounted to 72,063,864 frs., and exports to 52,694,000 frs. The record of exports was reached in June with 12,442,000 frs.

During the month of August attar of roses to the value of 150,000 frs. was exported to Great Britain and America.

Large quantities of flour have been dispatched to Nish and Pirot during the last few days in order to meet the wants of the civil population. It is hoped that by this means the price of bread will be lowered.

The national Bank of Bulgaria has despatched to Pirot the necessary personnel for the agency which they have opened in the town.

SHIPPERS TO GREECE.

People who have contracts to send goods to Greece are in a serious difficulty, says the *Manchester Guardian*. Some of them have experienced a long delay in obtaining licences, and now they find that there are no shipping facilities available. Even if they could get freight room, however, they would hardly care to run the risk, and they consider it is useless incurring the expense of continuing the storage of the goods. A Liverpool firm of merchants, who write on this subject, inviting suggestions, say in their letter:—

"There is no war with Greece, and yet contracts cannot be fulfilled. The difficulty is that, if goods held so long are resold, the buyers may insist on fresh goods being made when ordinary commerce is possible. Merchants would like to know whether the state of things which prevents their making shipments absolves them from responsibilities on the goods, which there might be heavy losses replacing."

In our view (continues the journal quoted), the merchants who are in the position described have simply a choice of possible evils before them. Restraint by the Crown would be a good defence to a claim for breach of contract, but as long as there is no such restraint and we continue at peace with Greece—as everyone hopes we shall—shippers will have to carry out their contracts or incur the usual risk if they fail to do so. It will be possible in some cases, perhaps, to consign the goods first to some port in the Mediterranean and telegraph further orders on arrival, but, of course, there will be expense and trouble if the goods have to be unloaded at a port of call.

Roumanian Trade Notes.

(From Our Own Correspondent.)

Bucharest, October 30.

According to a communication received from the Roumanian authorities at Salonika, goods on the way from Great Britain, Italy, etc., for transport to Roumania have arrived at that port and have been disposed in warehouses in the town. As, on account of the situation, they cannot be sent on to Roumania, and in order to prevent an agglomeration of merchandise at Salonika, local purchasers of goods abroad are requested to hold up further shipment until arrangements have been concluded for their transport via Russia.

A large amount of parcels post packets are reported to be held up at Drama. The Greek trains at present circulate only to the Greco-Serbian frontier.

Grain Shippers.

Activity is now observable among would-be shippers of grain via the Danube to Austria-Hungary and Germany. There are large quantities of grain in lighters at Braila, Galatz, Giugevo, Magurele, Coralina, etc., awaiting the opening of navigation by the Austro-Hungarian and German forces. According to the papers, this is now a *fait accompli*, and a tug with empty lighters is said to have made the passage of the Iron Gates, and to have passed Turnu Severin, and Calafat, just above Widin on the Roumanian bank.

Several tugs have been purchased lately by Austro-Hungarian agents, so a regular supply of grain will now be available to Austria-Hungry and Germany until the Danube freezes, if it does so. The usual closing is about Christmas, though there is no regular rule, and last year (an exception) the river remained open to navigation all the winter.

Naturally all this grain must pay export taxes, and in order to prevent any evasion of this the Roumanian Customs authorities have issued orders that any lighter leaving a Roumanian river port must pay export taxes, though the vessel clear for a Roumanian port. These taxes can be re-imbursed when it is proved the grain in question has been actually discharged in a Roumanian port.

Revenues.

The financial year 1914-15 ended on September 30 last. The revenues encashed amounted to 553,172,000 frs. and expenditure to 539,609,000 frs., leaving a surplus of 13,563,000 frs.

S.S. Craiova.

The crew of the Roumanian steamer Craiova, which was sunk by the Russian navy recently, have arrived at Constantza and state that another steamer, under the Greek flag, was likewise sunk after the crew had been taken off.

The cargo of the Craiova consisted of 7,800 sacks of walnuts, the value being estimated at more than a million francs.

Disarming Russian Vessels.

The official journals publish the following:—In consequence of the Austro-German occupation of the Serbian bank of the Danube, the Roumanian authorities have taken the necessary measures for disarming in Roumanian ports all vessels under the Russian flag, loaded with arms and ammunition for Serbia, and which have taken refuge in Roumanian waters. With reference to this it is announced that the vessels in question, together with their cargo, have been purchased by the Roumanian Government. The crews have left for Russia, being replaced by Roumanians.

November 27.

A telegram sent by the Roumanian Railway Commission announces that the Russian Government has accepted the plans for the transit of goods and munitions for Roumania through the former's territory.

Work is being pushed on actively for the improvement of the port of Kola, where the munitions will arrive. The actual transport cannot, however, commence before January.

The State Service will shortly despatch two of their cargo steamers to the Sea of Azov in order to load 5,000 tons of coal, a part of the large quantity purchased by the Roumanian Government in Russia.

The Budget

The Budget for the last financial year, as already reported, produced 35 million francs less than was reckoned, this naturally being on account of the abnormal political position. For this reason, M. Costinescu, Minister of Finance, has sent round a circular to all public departments requesting that their estimates for the ensuing Budget be as reduced as possible.

In the Oilfields.

In spite of the various difficulties produced by the political situation, the work on the Baicoi-Constantza pipe-line progresses satisfactorily. In a short time the pipes for all the lines will have been laid, with the exception only of the distance across the bridges over the Borsea and at Czernavoda across the Danube, about 14 kilometres, and another five kilometres between Tzanderei and Buzen, which is a difficult piece of engineering.

The erection of the pumping works, etc., at Baicoi, Ploesti, and Buzen is almost terminated, including the dwellings for employees, offices, etc. The Czernavoda pumping station and engine is also well under way.

The construction of reservoirs is already completed, and for the most part they are already full of petroleum. There remains to be erected one reservoir of 1,600 cubic metres at Buzen and four of 1,500 cubic metres each at Czernavoda.

The reservoirs already erected have a capacity of 157,000 cubic metres, and have already been placed at the disposal of the petroleum companies.

The great difficulty in starting the pipe line is the want of pumps and motors. These cannot at present be brought from abroad. However, the directorate have the matter under consideration, and it is hoped that a favourable solution to the question will be found shortly. In any case, the line will be in working order before normal conditions again prevail.

CONSULAR REPORT.

The British Vice-Consul at Bucharest reports that that city is the centre of all commercial activity in Roumania, and although as regards the timber and grain trades the Danubian ports of Galatz and Braila see the actual loading, the strings may be said to be pulled from the capital, all the larger commercial houses having their head offices there. Its position in the midst of the most densely populated part of the kingdom, as well as its situation as regards railway connection with the neighbouring countries of Austria-Hungary and Bulgaria, serve to make it the distributing point for most of the imports. The amount of merchandise arriving in Bucharest in peace time is exceedingly large, and much trade is done *vid* the Danube and thence to Bucharest by the railway from Giurgevo to Bucharest, a matter of two hours' journey for goods trains. By these means very large quantities of iron and steel goods of all descriptions come from Austria-Hungary and Germany. Rails, for instance, at one time a monopoly of the Cumberland and other north-country manufacturers, now come in great part from Austria-Hungary, though in this case it is the question of price and not of carriage, as might at first be supposed, which has won this trade away from the United Kingdom.

Though France still supplies the greater part of the fashionable goods imported, a taste has grown up of late years for British wares of this class, especially in the larger towns, and this fact should be noted by British producers and exporters. France exports to Roumania large quantities of preserved foodstuffs and wines of the finer qualities and the first grades of olive oil. The United Kingdom, Italy, and Austria-Hungary supply cottons and woollen goods, as well as straw and other headgear. In straw hats of the cheapest qualities Austria-Hungary and Italy have quite superseded the United Kingdom; this trade would seem to warrant greater attention on the part of British manufacturers, all the peasantry having lately taken to wearing straw hats in summer, as well as the many thousands of labourers who come annually from Bulgaria and Serbia to work at the harvest and who invariably make their purchases in Bucharest.

Turkey and Greece ship fruits, fresh and dried, food oils and vegetables, a large trade being done by coasters to Constantza. Coals come for the most part from Cardiff, and coke is also principally British. A certain quantity of Turkish coal is also imported. There are large coal depots in Bucharest, and an important business is done, although the river ports of Braila and Galatz and the seaport of Constantza are the main depots. The consumption of coal, not only for house use, but also for factories and mills, etc., grows daily, and it seems a pity that this trade should not be directly in British hands, instead of being left to Greek and other agents. The same might be said as regards the trade in agricultural machinery, hardware, etc.

With the outbreak of war and the closing of the Dardanelles all import trade ceased, except for very small quantities coming by rail from Salonica. Little or nothing came in by land from Germany and Austria-Hungary, as the railway systems of these two countries were entirely occupied in transporting troops, etc. Another thing which interrupted this means of import was that the exchange of railway trucks did not continue with the same regularity as in time of peace, the Germans retaining all Roumanian trucks sent to them, or sending only very few back from time to time. This caused the Roumanian authorities to issue fresh orders to the effect that all goods arriving and leaving the frontiers should be discharged from the trucks of the one country and loaded into those of the other, all of which caused delay.

The result has been that the few factories in the country have either had to stop work or to continue operations on a reduced scale for want of raw materials and fuel. The rise in price of practically everything was very sudden, and the effect is felt all over the country. Unfortunately, those who had stocks of goods exploited the situation, and the cost of living may be said to have doubled, if not trebled, in a very short space of time.

NEWS FROM ALL SOURCES.

The *Taegliche Rundschau* of Zurich learns on the best authority that the various Roumanian State Departments have given notice to all officials that their salaries will be reduced 30 per cent. on and after January 1, 1916.

The Survey Department (Ministry of Finance), Egypt, is in future to be known officially as the "Survey of Egypt" in dealing with other national surveys and geographical institutions.

Engineering Notes.

Preparations for Trade War.

It has been reported that in Germany and in Austria the manufacturers are laying their plans for the recapture of foreign markets after the war. Among other preparations, they are laying up great stocks of goods with which they propose to flood the markets of other countries as soon as the war is over. Now, we may be allowed to ask, what has become of our plans which we laid twelve months ago? THE NEAR EAST was among the first to advocate and support such a war, but we suggested at the time that unless it was contemporary with the present military war, and pursued with systematic energy, no satisfactory results could be expected. Plans were made, with a Babel of suggestions in the Press, based, more or less, on inadequate methods, and various organisations were formed without, so far as we know, any practical results. The Board of Trade, it must be admitted, has done excellent work by placing before the British manufacturers facts and figures which prove the real value of the various foreign markets. They also supplied to such manufacturers, on demand, the names and addresses of buyers and sellers of goods in those markets. It is not known if the Board of Trade's efforts have been fruitful, or to what extent the manufacturers availed themselves of the excellent opportunities that the office placed before them.

With regard to the engineering trade, from what local experience we possessed in certain markets, we often pointed out to the manufacturers various "openings" and the best methods that could adequately be adopted for "capturing" them; but it appears that in this trade-"war," there has also been a marked evidence of "shirking," and the general excuse of the engineer manufacturers has been "we are too busy with munition work, and cannot attend to any foreign orders!" The excuse is, of course, sound and praiseworthy, and it is not our intention to pass any comments, but in view of the consequences which the neglect of export trade may bring, it is, perhaps, not out of place to remark that there are several engineering firms in Great Britain which could probably, with only a slight increase of their plant, turn out the same amount of war work, as well as a certain amount of their ordinary work, without difficulty. They would thus help to keep up our export trade, which is necessary, not only for retaining our position in the foreign markets, but also, as Mr. Asquith said, to pay for the great amount of goods that we import from those markets. But if this apparent neglect of export trade continues, what will happen when the war is over? Foreign buyers will not easily return to our markets once they have been accustomed to the productions of our foreign competitors, who, undoubtedly, after the war, will redouble their efforts to retain their custom. Work, therefore, will be scarce, many engineering factories, especially the new ones, will close, and the struggle of the unemployed will follow. It may not happen so, but it is probable, especially if the trade-war preparations of German and Austrian manufacturers, as mentioned in the beginning of these notes, are carried out with usual Teutonic thoroughness.

Visionary Optimism.

We know that our pessimistic remarks will be deemed exaggerated by many. Similarly we think ultra optimistic the theory that after the war "there will arise an incalculably greater British engineering industry than has ever existed in the past." Here is a visionary optimism that appeared the other day in one of the leading journals, and which, delightful as it now sounds, may cause disappointments in the near future. "When we have utterly crushed Germany, as assuredly will be the case, the world's engineering trade will be in but two hands—those of ourselves and of America. We shall once more become the workshop of the world. All the war-devastated countries will look to us to supply their immense engineering requirements, their new railways, bridges, steel buildings, factory equipment, electric power stations, tramway systems, gas and steam engines, to mention but a few of an endless list. And—here is the important thing—we shall be in a position to meet the world's demand, thanks entirely to our participation in the world war." It is a beautiful vision, indeed, but what about France, with her great industrial resources? What about Italy, with her great progress in engineering, shipbuilding, and electricity, and of "the fame of Italian internal combustion engineering," which the same journal characterised recently as "world-wide," while in the matter of electrification of railways, the record of Italy is alluded to as standing "so high that no new schemes are undertaken anywhere without a careful consideration of the splendid work done beyond the Alps." In marine engineering Italy is also mentioned as being "in the very front rank, as is shown by the design and equipment—with ten 14 in. guns, and oil-burning engines of 50,000-horse power—of her latest super-Dreadnought, the £3,500,000 'Dandolo'." All these we admit as quite correct. But while it is certain that German militarism will be utterly crushed, German trade will, soon after the war, revive and stand again a formidable competitor of our industrial manufacturers. It is, therefore, wiser, instead of indulging in visionary optimism, to prepare for the coming trade-war; to keep in touch with the foreign markets now that the enemy is bottled up, to capture his trade, and be ready to give him no chance for a speedy recovery.

Helouan Railway.

Referring to the transfer of the Helouan line by the Egyptian Delta Light Railways Company to the Egyptian State Railways, the *Egyptian Gazette* understands that no elaborate improvements in the railway stations are contemplated at present owing to the present financial situation, but the Egyptian State Railways intend to introduce immediate improvements in the cars and rolling-stock, and also in the time-tables. The line, it will be remembered, was taken over by the Egyptian State Railways on December 1 last, as announced by THE NEAR EAST.

Town Planning in Athens.

Mr. Thomas H. Mawson, it is announced, has just completed plans for the reconstruction of Athens, in addition to the work he is now doing for the King of Greece at the Royal and the Crown Prince's palaces. For the larger work he has been directly commissioned by King Constantine, who is taking a deep and practical interest in the town-planning of his capital city now in active progress. Even to-day (says the *Daily News*), when war is surging around her frontiers, the work of erecting workmen's dwellings on the Plain of Marathon is proceeding, preparatory to the removal of the tumble-down dwellings in which the poor live under the very shadow of the Royal palaces. Wide roads, designed to afford long vistas, form the principal feature of the new scheme, and in each of these roads are belts of trees designed as protection against wind-driven dust. Scattered throughout the working-class quarters are playgrounds, ranging in extent from half to one and a-half acres, each park containing a children's theatre and library, while the houses themselves are built in squares, with provision for abundant vines, pepper, and other trees to give shade. The houses will be let at from 5s. to 10s. per week. Financial arrangements have been made whereby this vast reconstruction will not cost the city a penny. When complete it is anticipated that the scheme will actually yield a profit, without calculating the possibilities of increased rateable value. The scheme will be completed in fifty years, and wealthy Greeks will be able to help it by contributing memorial buildings, parks, etc.

The Danger of Petrol in Sewers.

The increasing use of petrol for motor vehicles, as well as for purposes of cleaning fabrics of various kinds, is creating a danger of which the general public, perhaps, is not well aware. There has already been a considerable loss of life from the ignition of the very inflammable vapour discharged from petrol, and the public is often cautioned by the authorities; but, apparently, little is known of the danger that is attached to the wasted petrol which is so carelessly shed in the streets, or in the drains, and finds its way into the sewers. It is calculated that one gallon of petrol, if vaporized into air, will produce something like fifty cubic yards of explosive mixture. A medium-sized sewer, running half full, would only require a gallon of petrol to produce sufficient vapour to blow up some fifty yards of the sewer. It is, therefore, of the highest importance that care should be taken not only by the users of petrol in quantity, such as the proprietors of motor garages, etc., but also by the general public, to avoid the discharge of even minute quantities of petrol, or allied spirits, into the sewers or drains, as these small quantities are liable to accumulate in gully-traps and in any portions of the sewers where the flow is inclined to be sluggish. No more petrol should be used at one time than is necessary. It is dangerous to put even a cupful of petrol down the sewers, because it accumulates and very soon becomes a dangerous quantity.

Engineers and the War.

In the December report of the Amalgamated Society of Engineers, it is mentioned that the membership has advanced from 173,629 to 204,162 in eleven months, and that the funds have increased by £237,070 in ten months. It is estimated that, taking into account increases in weekly wages, increase in piece-work prices, and amount of overtime, the earnings of members must have increased by about £2,000,000 per annum. These results will, we are sure, have the full appreciation of the British public, for, as Mr. Lloyd George said: "This is an engineer's war, for equipment is even more needed than men," and it must be admitted that engineers are doing their bit admirably well, and will continue to do so. The victory which we all feel to be approaching, said Dr. Unwin in his presidential address to the Institution of Mechanical Engineers, last April, will be the result of the general progress in mechanical engineering and in the capacity of our factories and workshops, due to the concurrent exertions of all engineers, civilians and military. The apparently satisfactory remuneration, therefore, for the exertions of the members of the Amalgamated Society of Engineers is well merited.

Near East Markets.

SUDAN GUM.

From January 1 to October 31, 1915, 11,464 tons of gum, valued at £E309,917, were exported from the Sudan viâ Port Sudan, as compared with 11,265,558 kilos, valued at £E284,300 during the same period of 1914.

During October of this year 272,920 kilos of gum, valued at £E8,049, were exported via Port Sudan, as against 276,689 kilos, valued at £E8,182, for the corresponding period of 1914.

According to the *Monthly Journal* (November) of the Sudan Chamber of Commerce (Khartoum), local interest in gum centres entirely in the prospects of the coming season and sales have already been made of Kordofan natural sorts at P.T. 105/115 per kantar of 110 rottles delivery El Obeid December/January. Demand is good, but sellers are shy of making further contracts at these prices. Some very small parcels of new crop have already arrived at El Obeid, tending to the impression that the early fears of a late season may prove unfounded.

The *Egyptian Gazette* (November 24) says: The first arrivals of the new season's gum have now made their appearance on the El Obeid market, which opened at 130 P.T. per kantar of 120 rottles. This is a good opening if the price is a genuine one; that is, if it is based on the real relation between supply and demand. But it is rather early yet to form a really adequate idea of the quantity of the crop, the extent of the demand, and the facility of transport upon which the movement of the crop, and, therefore, its market price will depend.

AUSTRALIAN CURRANTS.

Thanks to the enterprise of Australia, says the *Globe*, Greece's monopoly in the currant trade has now been challenged, and the Empire can produce its own plum-pudding. The journal then proceeds to give some particulars concerning the dried-fruit trade:—

"Australia some time ago decided to investigate the possibilities of the dried-fruit industry. With characteristic enterprise it dispatched a mission to South-East Europe, California, and other fruit-producing climes, with the result that to-day nearly all the provinces forming the vast Australasian continent are raising and drying fruits for both home consumption and export. How far the respective Dominions have succeeded the following figures for the years 1912-13—the latest dates for which figures are available—will show:—Raisins and Currants.—Victoria, 17,697,000 lbs.; South Australia, 9,795,000 lbs.; New South Wales, 494,704 lbs.; Western Australia, 176,000 lbs."

ARBORICULTURE IN PERSIA.

The United States Vice-Consul at Teheran states that, except in the provinces bordering the Caspian Sea and in Kurdistan, where there is sufficient rainfall, there are no natural forests in Persia. On account of the lack of transportation facilities, all the timber consumed in the great plain of Iran is grown locally by irrigation. The trees that one learns to associate with every Persian landscape are the poplar and the plane tree. The plane tree requires very little water, grows quickly, and attains to an immense size and great age. The natural form of plane trees is spreading, but the Persians plant them in dense rows, and by lopping off the branches when young and by constant thinning these trees grow to a great height.

The area of a cultivated wood is generally not large, the usual size being three to six acres. The plane tree and the poplar serve for building purposes in Persia, as does the pine in the United States. Great groves of walnut are also grown in the north of Persia, the nuts being used for food. So scarce and costly is wood in Persia that even branches and the trees that are removed from the groves when the size of a man's finger are carefully collected and transported to the towns to be used for firewood and for other purposes.

COTTON MARKET.

(From Our Own Correspondent.)

Liverpool. Thursday Night.

Messrs. Reynolds and Gibson report:—There has been a good demand for cotton this week, and a large amount of business has been reported. The demand, has, however, been freely supplied, and quotations of all Upper and Good and Below in other descriptions show unchanged prices, while better grades are reduced five points. Sales, which include 100 bales Sudan cotton, are estimated at 4,700 bales, as against 3,600 last week.

SUDAN COTTON.

The estimate of the loss of cotton by locusts at Zeidab has been revised, as the conditions have distinctly improved. The cotton prices to be given by the company this year reach P.T. 325, as against P.T. 300 for Egyptian, and P.T. 270 as against P.T. 210 for American, per kantar of 315 rottles (142 kilos).

It was stated at the monthly meeting of the British Cotton Growing Association that the Governor-General of the Sudan had recently been over the Experimental Station to inspect this year's crops, and had expressed his satisfaction with the progress made.

PRODUCE REPORT.

London, December 16.

Currants.

The market has been quiet this past week, and prices are well maintained.

Sultanas.

Only small business is being done, mostly in Afghan fruit at full prices. Greek sultanas are in a very small supply, and high prices are asked for same. There is no possibility now of getting any supply at present from Smyrna.

Figs.

The market is quiet, and prices steady, as reported last week.

Dates.

There has been a better demand, while Persians are a little dearer.

Seeds.

Linseed is much stronger in sympathy with the oil. London-Calcutta spot is quoted 71s. 6d., December-January was sold at 71s. to 71s. 6d. La Plata, afloat, for Hull, sold at 65s. Rapeseed is firm, but quiet. Guzerat pure basis November-December quoted 67s. 6d. Ferozepore ditto, 61s., Toria, ditto, 62s. 6d. Cottonseed is firmer; Egyptian to London December £13 8s. 9d., paid; to Hull spot and December £13 15s. asked, while Bombay to Hull spot to January-February £12 is asked.

Oils.

Linseed oil is dearer, spot pipes £35 15s.; spot barrels £36 15s.; December £36 10s.; January-April £37 5s.; and May-August £38 5s. Rape oil is firm; refined English in barrels, on spot £45. Cotton oil is dearer; crude spot, pipes, £38 15s.; refined pale, pipes, spot £40, and sweet, barrels, spot £43 to £45. Olive oil is very firm. Spot Levant or Spanish £53 to £53 10s. per tun, ex store.

Oilcakes.

Linseed Cakes.—Supplies are very moderate, and prices are inclined to be dearer. Cotton Cakes.—Arrivals of Egyptian find a ready sale at £9 2s. 6d. to £9 5s., ex ship, while English makes are without change at £9 7s. 6d. to £9 10s. and Bombay at £9 per ton.

Reuter's Amsterdam Correspondent reports that according to a telegram from Sofia, the journal *Outro* announces that the Cabinet has decided to convoke the Sobranje on December 28 for the purpose of discussing financial measures and especially the flotation of a war credit of 550,000,000 frs.

Trade Notes.

Egypt.

Tenders will be received by the Sultania Steamers Administration, Bulac Arsenal, Cairo, up to Monday, January 10, 1916, at noon, for the supply of clothing required by the men of the Nile Steamers of that Administration in April, 1916—viz., linen and cloth suits, jerseys, blankets, tarbushes, boots, etc. Samples can be seen at the Stores of the Administration, at the Arsenal, Bulac, Cairo. Tenders must be submitted on the forms provided by that Administration, free of charge, and in the same manner as shown thereon. They should be addressed to H.E. the Chief Aide de Camp to H.H. the Sultan, Abdin Palace, Cairo, by registered post.

Tenders are invited by the Secrétaire Général des Domaines de l'Etat (Service Technique), Ministry of Finances, Cairo, for the supply of 6,000 kilogrammes of black axle grease. Date, January 3.

Tenders are invited by the Secrétariat de la Direction Générale des Domaines, Alexandria, for the supply of uniforms (serge and khaki). Date, January 8.

Morocco.

The Board of Trade are in receipt, through the Foreign Office, of copy of a Dahir, dated October 21, 1915, which provides that no goods arriving from, or produced or manufactured in, neutral countries may be imported into the French Zone in Morocco unless they are accompanied by a certificate from the local Customs authorities, *visé* by the French Consulate, attesting that the goods were actually produced or manufactured in the neutral country concerned.

Greece.

Several Athens merchants desire to purchase white paper of wood pulp, white paper for newspapers, glazed paper (only glazed on one side), and suitable paper for posters, and paper for making all kinds of envelopes, pencils, typewriter erasers, ribbons, and blue and red ink.

Articles used in the shoe industry, such as shoe tacks, nails, laces, heel irons, and boot protectors, are in great demand in Athens, and samples and quotations, if possible c.i.f., should be sent to dealers and importers. We recommend advertising in the vernacular papers as a sure and cheap means of securing suitable commercial representatives.

Crude black pepper is wanted in Kalamata in large quantities, one import house alone being willing to buy lots of 100 bags at a time.

There is a brisk demand for motor-lorries in Patras. These must be very strongly built and not less than five tons.

Collars, cuffs, hosiery, gloves, handkerchiefs, purses, and general haberdashery are in great demand at Patras, as the stocks are very much depleted, but samples and catalogues should, if possible, reach importers in good time before Christmas.

Sole leather and upper leathers find a very ready sale in Salonika; in fact, importers can command the question of prices. Also flour is wanted. The assembling of the troops here has suddenly created almost limitless opportunities for dealing in a variety of articles of trade, and local tradesmen are having the time of their lives.

Prominent Industries of India

The Announcements below are published to acquaint our readers with the opportunity India affords the keen purchaser.

CAWNPORE WOOLLEN MILLS CO., Ltd.
— CAWNPORE, INDIA. —

Everything in Pure Wool.
MANUFACTURERS OF
"LALIMLI" WOOL WEAR

CYPRUS TRADE.

(From a Correspondent.)

Returns for the quarter ended September 30 show a considerable increase both in imports and exports. Imports, including specie, amounted in value to £146.221, as against £103,348 during the corresponding period in 1914. Exports, £202,868 as against £80,195. The principal imports included wheat, £16,163; flour, £13,550; cotton goods, £12,082; sugar, £8,197; petroleum, £5,427; hides, £9,383; coffee, soap, and woollen goods.

SUDAN TRADE.

The quarterly Customs returns for the first six months of the current year (January 1-June 30) have been published by the Sudan Government. The following figures show the principal imports and exports from January 1 to June 30 compared with the figures for last year:—

Imports.

	1914. £E.		1915. £E.
Cotton fabrics	222,183	....	232,373
Sugar	145,297	....	121,003
Flour	59,621	....	26,800
Sacks	10,386	....	26,134
Tobacco and cigarettes	23,786	....	22,060
Coffee	25,814	....	22,351
Coal	55,393	....	20,958
Timber	13,969	....	20,661
Durra and Dukhn	110,279	....	—

Total Imports.

1913.	1914.	1915.
£E.1,056,627 ..	£E.1,088,620 ..	£E.745,250

Exports.

	1914. £E.		1915. £E.
Gum	243,482	.....	197,656
Cotton, ginned	94,908	.....	127,010
Durrah	3,175	.....	108,153
Sesame	42,046	.....	53,205
Cattle	48,018	.....	52,804
Hides, untanned	31,164	.....	39,615
Gold	34,874	.....	35,185
Ivory	56,886	.....	30,446

Total Exports.

FOREIGN CAPITAL IN ROUMANIA.

(From Our Own Correspondent.)

Bucharest, November 27.

According to the *Economia Nationala*, there are in Bucharest eight large banks of a total capital of 129,250,000 frs. They are:—

The Banca Romaneasca, 26,350,000 frs.;
The Banca de Credit Roman, 20,000,000;
Banca Marmorosch Blanc and Co., 20,000,000;
Banca Agricola, 18,500,000;
Banca Generala Romana, 15,000,000;
Banca Comerciala Romana, 12,000,000;
Banca de Scont, 10,000,000; and
The Bank of Roumania, 7,500,000 frs.

The greater number of these banks were founded on foreign initiative or on Roumanian initiative with foreign capital; of the total of 129 millions only 69 millions are actually Roumanian, 75 per cent. of the remainder being Austro-Hungarian or German. These facts give food for thought as to this country's future financial policy.

CYPRUS FINANCES.

(From a Correspondent.)

The annual report in the Cyprus Blue Book for the year 1914-15 throws some light on the condition of our new possession. The revenue collected amounted to £29,110, a fall of over £51,000 as against that of the preceding year. The grant in aid of £50,000. brings the receipts to £340,110. The expenditure was £316,414, and the share of the Turkish debt charge £92,800; total, £409,214. There was consequently a deficit of £69,104. The expenditure, however, includes a sum of £52,640, appropriated from surplus balances "for works of public utility," and of £21,000, the value of Government tithe grain, sold after the close of the financial year.

The financial history of Cyprus from the British occupation in 1878 to March 31, 1915, is given as follows: Revenue, including grants in aid, £9,173,934; expenditure, including Turkish debt charge, £9,009,919—showing a balance of receipts of £164,015.

There was some dislocation of trade, and a shortage of gold currency; and in order to alleviate financial stringency, a restricted note currency was introduced, first of locally-printed paper, and later of notes printed in England. A moratorium was proclaimed till November 7, 1914. The financial position of the island is regarded as satisfactory.

Imports fell off by £122,594, as compared with the preceding year, and exports by £123,815; but large stocks of goods have remained unshipped and can be disposed of this year.

In the branches of public works, and of the medical, police, educational, and post office departments, steady progress appears to have been made.

The section relating to judicial and criminal statistics shows that 3,340 persons more tha last year were brought before the magistrates; and praise is given to the police for increased efficiency in connection with the results. The report of the Chief Justice shows that "the election of village officials is a fruitful source of crime"; and the fact that the Mukhtar, who is often the village money-lender, executes judgments against his co-villagers by virtue of his office, leads to such consequences that "a more ridiculous state of things could not be imagined."

LOAN TO MONTENEGRO.

On Monday Sir J. Rees asked the Secretary for Foreign Affairs whether any application had been made to his Majesty's Government to facilitate the despatch to Montenegro of food purchased or to be purchased by a syndicate operating in that behalf; if so, what action had been or would be taken in respect of such application; and whether any loan to Montenegro for the purchase of food was contemplated?—Lord Robert Cecil replied that such an application had been made to the Foreign Office privately, but he did not think that at the moment there was any need or, indeed, room for the formation of such a syndicate, since the purchase of the necessary supplies has already been undertaken. The answer to the last part of the question was in the affirmative.

THE LEBANON BUDGET.

Cairo, Dec. 7.

The Administrative Council of the Lebanon has published a budgetary statement, of which a copy has come to hand via the United States. As was explained in a study of the finances of the Lebanon in the "Near East" some time before the war, the revenue of that province is divided into two broad sections; the first fixed comprising principally the land and capital tax originally levied by the establishment of the new regime in the Lebanon, and the second to which the inexact term of "Mahmulaat" has been given, and which comprises a variety of duties and imposts which the successive governments of the Lebanon had to create to meet their needs, which grew with the growth of the country in population and wealth; more especially as, by an inexplicable aberration on the part of those who framed the original budget of the Mountain province, the land and head taxes were so fixed as not to be susceptible of expansion, in spite of the subsequent increase of the population and of the cultivated area.

Now, the total revenue figuring in the said statement under the first heading, amounts to 4,676,859 gold piastres (100 piastres to the Turkish pound of about 23 frs.), and the total of the second source of revenue is put at 2,269,860 gold piastres, making together about £T70,000 in round numbers. As to expenditure, half of which goes to the payment of Government officials' salaries, the total figures at 6,714,128 piastres. It is satisfactory to note, parenthetically, that among the items of expenditure is one relating to the Lunatic Asylum of Asfuriyeh. This establishment which has proved a priceless boon to Syria in general, and to the Lebanon in particular, was founded and has so far been principally run by British and American philanthropy, and is now directed by an English medical expert in nervous diseases, Dr. Watson Smith.

The surplus of over £T2,600 is declared unprecedented by the Council, which further congratulates itself on the fact that the salt revenue has yet to be added. It then proceeds to state that as regards the deficit of past years—viz., about £T20,000, a statement has been sent to the Mutessarif for collection, presumably from the Turkish Treasury.

A copy of this budgetary statement was addressed to the Mutessarif by the members of the Council, with a note embodying a decision passed by them at the close of the financial year ending April last. The Council explains therein that, as the regulation of the finances of the country constitutes one of its most sacred duties, it has set itself diligently to the task of reform, and has decided to appoint a committee composed of three of its members to devote itself exclusively to the study of the means whereby the disordered condition of the finances of the Lebanon may be improved. A significant passage at the end of this note embodies the expression of a pious hope that by persevering in its endeavours of reform, the Council may yet create further sources of revenue which will enable it to institute, among other works of public utility, national schools where Turkish, "the language of our exalted Government," will be taught. This may be taken by inference to confirm the report already mentioned in previous notes, of the appointment of a Turkish Governor to the Lebanon. A supplemntary note addressed by the Council to the Mutessarif mentions the suppression of certain posts.

Although the Lebanon has become practically a Turkish Vilayet, yet it is still thought that its internal administration has, on the whole, not been interfered with yet.

NATIONAL BANK OF GREECE.

COMPANY RESULTS, &c.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production for week, 227 tons; production for last week, 389 tons (including 165 tons recovered from sediment). Hurgada production for week, 380 tons; production for last week, 215 tons (in addition to estimated 1,200 tons from No. 7).

ALEXANDRIA WATER COMPANY.—An interim dividend of 4s. per £5 share on coupon No. 54 is payable on and after December 15, 1915, at Messrs. Barclay and Co., Ltd., 1, Pall Mall East, S.W., and 54, Lombard Street, E.C., or at the Anglo-Egyptian Bank in Alexandria.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended November 20, amounted to £E6,520, as against £E5,980 for the corresponding period of last year.

LAND BANK OF EGYPT.—The annual meeting of shareholders will be held on the 21st inst., at the offices of the bank in Alexandria.

SUEZ CANAL RECEIPTS.—The traffic receipts of the Suez Canal for the 13th inst. amounted to 240,000 frs., as compared with 350,000 frs. for the corresponding day last year.

THE ALEXANDRIA BOURSE.

The general impression is that negotiations will shortly begin between the Government and the Alexandria Stock and Share Bourse Commission with a view to the re-opening of the Bourse, says the *Egyptian Gazette*.

It will be remembered that early in January last the sub-commission of the Bourse Commission made a report on the re-opening of the Bourse, but no steps were taken. According to this report, which was in favour of the re-opening, it was hoped that the Egyptian Government would follow the example of the regulations laid down by the British Government in regard to the London Stock Exchange. It was suggested that the Egyptian Government should make regulations for the local banks as to their dealings in the shares of their clients, and on which the banks had made advances. The report was in favour of the banks being obliged to retain all such securities without forcing the sales, such securities to stand nominally at the rates which were current on June 30 last year. The clients of the banks should pay interest month by month, and the banks should not be allowed to sell such securities until one year had elapsed after peace had been signed. At the same time, in consideration of the banks having such regulations imposed upon them, the Government should be prepared to assist the banks financially, if so necessary.

The banks, however, did not view the matter from the point of view of the Bourse Commission.

TRANSFER OF EGYPTIAN SECURITIES.

A proclamation has been published in the Egyptian *Official Journal* by the G. O. C. to the effect that "whereas it is desirable, in addition to the measures already taken for the control of trading in Egypt with persons resident in enemy territory, to close absolutely to the enemy both directly and indirectly the Egyptian market for securities," it is forbidden, "except with the special permission of the Licensing Officer, at the Ministry of Finance, to assign, transfer, negotiate or in any way deal with stocks, shares or securities, or be a party to any such transaction, unless in each case the securities dealt with are accompanied by a declaration of a banker, registered broker, or other responsible party made at the time of the transaction,

"(*a*) that, since August 5, 1914, the securities have remained in physical possession in Egypt, the British Empire, or in a country now in alliance with Great Britain, and have not since the commencement of the war been in the ownership of a person resident in enemy territory, or

"(*b*) that, since the date of the present Proclamation they have remained in physical possession in Egypt, and have not since that date been in the ownership of a person resident in enemy territory.

"Where securities have been deposited against a loan they shall be deemed, for the purposes of this Proclamation, to have been, while so deposited, in the ownership of the lender."

COMPANY REPORTS.

Egyptische Hypotheken Bank.

The official appointment is announced of Mr. R. E. Moore (Egypt) to be Controller of the Egyptische Hypotheken Bank, A.G.

The Egyptische Hypotheken Bank was an offshoot of the Deutsche Orientbank. The chairman of the board of directors was Mr. Herbert H. Gutmann, and the vice-chairman was Leon von Heller. The board of directors was composed of Messrs. Joseph Aslan Cattaoui Pasha, Mohamed Talaat Bey Harb, Dr. Erich Alexander, Armand Dreyfus, Karl Hesselbach, Hugo Lindemann, Walter Merton, Samuel Ritscher, Ludwig Schneider, Paul Thomas and Richard Witting. The managers were Mr. Albert Najar and Consul Wilhelm Pradel.

Egyptian Markets.

The following announcement appears in the Egyptian *Official Journal* of November 29: "The British Army having undertaken to obtain its dries supplies solely through the Ministry of Agriculture, the latter has appointed, as its agents in this matter, the Egyptian Markets Company, Ltd. Cultivators and dealers are advised to communicate with that company, who are authorized to purchase at a price which will be fixed by the Ministry, and will be posted up at each market."

GERMANS IN PERSIA.

At the meeting of the Imperial Bank of Persia held on Monday the chairman said that shortly after the outbreak of war between Turkey and the Allies in November of last year the Turks and Germans commenced an active propaganda throughout Persia, of which the end had not yet been seen. Every German Consulate became a focus of intrigue, and towards the end of the year, entirely without provocation, a Turkish force crossed the border and attacked and occupied Tabriz. The bank's branch at that place was closed from January 3 to February 27, when the advent of a Russian force compelled the Turks to retire. On leaving Tabriz their branch was placed under the care of the Persian Government, and they found everything in order when it was re-opened. Their branch at Ahwaz was closed from January 20 to June 15, but after order had been restored by the arrival of British troops the bank premises and its contents were found undisturbed. It had been necessary to close the branches at Kermanshah and Hamadan. On November 10 the British Consul at Shiraz, the manager and staff of the bank, and other British subjects were arrested by the gendarmerie and taken prisoners to Borasjun. On September 13 the Isfahan branch was closed, and on November 24 their staff at Sultanabad had to abandon the bank premises, which the directors were informed were looted, and their staff took refuge in the premises of an American firm. Latterly we appeared to have won a diplomatic victory in Teheran, and the German, Austrian, and Turkish Ministers were said to have left the capital. It was, however, hardly an exaggeration to say that Southern Persia was still largely under German domination and control, and the headquarters of the German activities had shifted to Isfahan. In the east, owing to the presence of Russian troops in Meshed and of British troops in Seistan, the German emissaries were less successful but no part of the country had been free from their activities.

ROUMANIA AND THE WAR.

At the meeting of the Roumanian Consolidated Oilfields, held on Wednesday, the chairman took an optimistic view of the political situation in Roumania, and said "these war conditions had increased its output by 50 per cent. As regards the immediate outlook, I take an optimistic view. Roumania's leading statesmen are both able and patriotic. The sympathies of the nation are undoubtedly with us and our Allies. Under great provocation and most difficult conditions Roumania has so far managed to preserve its neutrality. I believe that if Roumania joins in the war at all it will eventually join us at the time and under the conditions when it will be most advantageous both for them and for us that they should do so. They have a splendid national army, well equipped and thoroughly loyal, and when they do join their forces with us and our Allies it will be the beginning of the end of this great war.

NOTES OF THE WEEK.

Whatever may have been the cause, the delay on the part of the enemy in advancing into Greek territory will have proved of inestimable value to the Allied forces. An opportunity has been afforded them of placing Salonika in an adequate condition of defence, while further reinforcements are continually being landed. As it would be entirely inconsistent with Germany's conduct of the war to study the susceptibilities of another country, it must be inferred that the Austro-German troops were not in a position to follow up the retreating Anglo-French expedition. Greece's attitude must have been regarded as uncertain enough from the German point of view to make the German Government hesitate to send the Bulgarian army across the Greek frontier, and there could be no question of the Austro-German forces alone attempting to try conclusions with the Allies. Hence probably the display of consideration for Greece's feelings, the announcement that no decision would be reached until after the general election and the negotiations at Athens. It is possible also that Germany has been misinformed regarding Greek opinion, and has mistaken hesitation to join the Entente Powers as equivalent to a predilection for herself. Be that as it may, there can be little doubt that the long respite will have been quite as advantageous to the Allies as it may be to Germany and to Bulgaria, who has had to call very largely upon her reserve troops to make good the wastage incurred in the attacks on the Serbians and on the Anglo-French forces.

The immediate objects of the Allied Powers, as far as their relations to Greece are concerned, it has been officially announced, are to regularise the military position and to deny to Bulgaria and the Central Powers any control, direct or indirect, over Salonika. This end has practically been attained with the withdrawal from the zone of possible operations of the bulk of the Greek troops hitherto stationed there, and with the delay in the enemy's advance. It would be a mistake to suppose, however, that the decisions of the recent War Councils held in Paris provided for nothing more than the defence of Salonika in the interests of Greece. There can be no point in a defensive campaign in the Balkans at this stage. Refusing to recognise the strategic advantage of a thrust from a southern front, or, having failed to make it possible by diplomacy, the Entente Powers were drawn to the Balkans by an eleventh-hour resolve to help Serbia. They arrived too late to effect their purpose, and force of circumstances has compelled them to embark upon a Balkan campaign. But the very essence of such a campaign must be a vigorous offensive. The moment for the advance will depend upon military preparations. There can be little doubt, however, that in spite of the season of the year everything combines to urge a strong forward policy at this moment. The Austro-German forces in Serbia are by no means strong, the Bulgarians have suffered heavy losses, the internal situation in Bulgaria constitutes a source of weakness, and last, but not least, military exigencies elsewhere point to the urgent need for cutting off the Turks from the base on which they rely for their supplies of munitions and officers.

We can but hope, therefore, that something in the nature of a carefully planned campaign has resulted from the Allies' War Councils, and that we are on the eve of big events in the Balkans. A further bombardment of Varna has given rise to reports of a Russian landing. Considerable uncertainty has rightly shrouded the concentration at the mouth of the Danube. Of one thing we may be sure—the Russians will not leave Bessarabia for Bulgaria until the Allies' preparations for a concerted movement are completed. Experience at the Dardanelles has shown the unwisdom of allowing any considerable time to elapse between a bombardment and a landing, if the former is meant to be a definite introduction to the latter. On the other hand, a force of the dimensions required to carry out a successful forward movement from the Black Sea in co-operation with the Anglo-French Expedition from Salonika will require some time to disembark at Varna or elsewhere. The Italians are known to have landed at two or more ports on the Albanian coast. The public has been asked to believe that their main object is to hold these towns against the Austrian and Bulgarian invaders of Albania, and not to assume the offensive over impossible mountain ranges. If that be the case, the Italian Minister for Foreign Affairs will have misled many

Digitized by Google

people by making a speech which meant nothing, if it did not imply that Italy had at last overcome her domestic difficulties, and was in a position to play her part whole-heartedly in the European war. It was no longer to be a question of an Italian war against Austria, but the Italians would be found accepting the joint responsibilities of the Allies in any sphere where their troops could be profitably occupied. It is possible that the Italian forces in Albania are only strong enough to protect the remnant of the Serbian Army, which has escaped to the coast; but their deficiencies can be made good. The maximum strength of the Allies is called for, in order that a decisive blow may be struck in the shortest time.

In the face of possible military developments, the manœuvring of the Greek Government occupies a smaller portion of the Balkan stage. The negotiations with the Entente Powers regarding Salonika being concluded, it has had Germany on its hands. Reports concerning the progress of the *pourparlers* are contradictory, but it seems well established that the Central Powers have stated that they feel compelled to take action in Greek territory in order to drive out the Allied forces, and that Greece has replied that she will not allow Bulgarian troops to set foot on Greek soil. The latter threat is the most interesting feature in the position. Public opinion in Greece was already becoming restive under the prospect of seeing Greek territory overrun by Bulgarians and Turks, and M. Skouloudis, the Premier, has had the courage to challenge King Constantine's attitude that Greece will in no circumstances abandon her neutrality. His action, however, merely intensifies the chaotic state of the Greek Administration. While M. Skouloudis is speaking, unreal Greek elections are giving M. Gounaris a substantial majority in the new Chamber. M. Gounaris, as far as is known, is prepared, in company with King Constantine, to accept both Bulgarians and Turks on Greek soil. If, after all, M. Gounaris is to return to office—for M. Skouloudis is too honest a man to tolerate a false position—there may have been special significance in Germany's delay to make her advance until after the Greek elections.

M. Venizelos adhered to his resolve not to contest an election which could not reflect the views of the Greek nation as a whole, and the results of which could be manipulated to his political disadvantage. So strong is his influence in Greece that practically two-thirds of the electorate took no part in the polling. To this extent his policy of abstention is justified; but it is impossible to foresee how the course of public affairs is likely to shape itself in Greece in the near future. A Turco-Bulgarian invasion might cut the Gordian knot. In its absence there would seem to be no machinery capable of dislodging the King's advisers. With each additional soldier of the Allied Powers landed in the Balkans Greece's position recedes. M. Venizelos wished to see her occupy an honoured place in the council chamber of Europe, and to be at least the equal of any Balkan State. Her actual position can be gauged from the fact that the Entente Governments now affect indifference towards Greece's co-operation and Greek affairs. She has lost, as M. Venizelos said she would, an opportunity which will never recur.

Military exigencies prevent all but the most meagre reports from Mesopotamia being published. General Townshend remains at Kut-el-Amarah, where he has successfully repulsed a number of Turkish attacks. The British casualties up to December 18—that is, for the eleven or twelve days General Townshend had been at Kut—were 1,127 of all ranks, including 200 deaths. In the engagement south of Azizieh, during the British retreat from Ctesiphon, and again on the night of December 12, when the Turks made a determined attack on the position at Kut, the enemy, it is estimated, lost 2,500 men. On the night of December 17 mixed parties of British and Indian troops surprised the Turks in their advanced trenches, killing about thirty and taking eleven prisoners. General Townshend has received reinforcements since he fell back on Kut, and others are known to be on their way. It is evident that he needs heavy guns as much as troops, and some time may elapse before these can reach him. Von der Goltz Pasha has now announced in public the nature of his mission to Baghdad. His orders to drive the British Expedition into the sea bespeak a vigorous offensive, but he will be the first to realize that Turkey will probably gain more by reducing the expedition to impotence than by incurring heavy losses in attacks on strongly entrenched positions.

Russia is laying Great Britain under no small obligation by a vigorous offensive against the Turco-German sedition-mongers and their dupes in Persia. Following up the success at Sultan Bulak, where a large body of rebel tribesmen, insurgent gendarmes, and escaped Austrian prisoners had established themselves, a Russian force has pressed on to Hamadan, occupying the surrounding country. Another force proceeded to Kum, which became the headquarters of the German Minister and his fellow conspirators when they left Teheran. Kum also is now in Russian hands, after, it is satisfactory to note, a pitched battle, which ended in the complete defeat of the enemy. What is required is the capture of the German heads of the insurgent movement. It is unfortunate that a similar movement could not have been undertaken simultaneously in the south from Bushire, in order to deal something like a "knock-out" blow to German machinations in Persia.

There are indications that the activities of Germany's representatives, under the ægis of her Minister at Teheran, are proving as embarrassing to the Berlin Government, now that the issue of the war is no longer in doubt, as the ill-advised diplomatic campaign in the United States. A Berlin telegram to Amsterdam states that, in consequence of the absence on leave, owing to illness, of Prince Henry XXXI. of Reuss, Dr. Vassel, at present German diplomatic representative at Baghdad, has been appointed Minister at Teheran. It would be a kindness to Germany, and at the same time save Great Britain and Russia a considerable amount of trouble, if it could be pointed out to the German Government that, as there is something in the atmosphere of Persia which affects the health of all her agents, the instincts of common humanity have prompted the Persian Government to close its frontiers to all Germans until the climatic conditions in the country have improved.

The cynicism of the German Press has not succeeded in keeping the whole of Germany in ignorance regarding the massacres of Turkey's Armenian subjects. Fifty delegates, representing all the Protestant Churches in Germany, it is stated, recently waited on the Imperial Chancellor to express their anxiety concerning the fate of the Armenians. Dr. von Bethman-Hollweg, continues the report, replied that the German Government would always consider it one of its highest duties not to allow Christian peoples to be persecuted on account of their religious beliefs. If such an answer satisfies the German Churches, the culpability of the nation as a whole will be complete. They have already been told that the Armenian question is one that concerns Turkey, and not Germany, who has no responsibility for the internal affairs of her ally; that the removal of the Armenians was merely in the nature of a military precaution; that it was the result of Armenian attacks, where many of the victims are the families of soldiers in the Turkish army; that the story of massacres was a wicked invention of the Entente Press. As a matter of fact, the news could only come through neutral sources, generally American. A single sentence from a report emanating from a hospital, where some of the Armenian victims have taken refuge, is the best comment on the German Chancellor's statement. "It is all horrible, horrible—no mere description can adequately portray the awful suffering of these unfortunate people, whose only crime is that they are Armenians." The world knows what the German Churches perhaps do not, that German officers and officials have played no small part in the incidents accompanying the massacres.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, December 8.

Greece and the Allies.

The position in regard to the demands of the Entente Powers bearing on the subject of the Franco-British troops at Salonika has not greatly changed during the past week. The Ministers of the four Powers, while agreeing that the details connected with the removal of the Greek troops should be discussed by a commission of officers representing the two Staffs, have let it be known to the Greek Government that the views of the Greek officers chosen for this task must be strictly confined to the military bearing of the case, and that no corrections and suggestions of a political nature should be made. The organs of the Ministerial Press view this matter with a good deal of optimism, which, however, is in direct contradiction to the statements attributed by these same journals to certain Ministers, who are reported to have said that the decisions of the mixed commission of officers will not be accepted, save in so far as they are not of a nature to affect the defensive value of the Greek Army and to hinder its freedom of movement and its provisioning. Moreover, the two Staff officers, Lieutenant-Colonel Pallis and Captain Staïkos, who have been sent on this mission, are regarded as Germanophil. In the circumstances, Entente circles are not inclined to share the optimism that prevails in Greek circles regarding the pourparlers proceeding. Meanwhile, the Allied squadrons still lie off Milos, which is blockaded, and three wheat-laden ships are detained at Malta. All this has given rise to deep anxiety, although a certain *détente* has been perceivable during the last day or two, due on the one hand to the opening of negotiations, and on the other to the fact that the demands of the Allies are not so insistently put forward as they were in the earlier stages. The Allies have already commenced to carry out the measures for which they asked permission from Greece. Their ships are cruising in Greek territorial waters in pursuit of German submarines, and their engineers are constructing fortifications with a view to making Salonika an entrenched camp.

Ministerial Press Attacks.

The question of the Franco-British troops is greatly agitating official and military circles, whose Press organs are indulging in violent attacks against M. Venizelos, whom they still accuse of having brought these troops to Greece, and, not daring any longer to attack the French and British Governments, they are reviling their Ministers in Athens, who are unjustly accused of having influenced their Governments against Greece.

Interview with M. Guillemin.

With a view to refuting these accusations, a representative of the *Patris* obtained an interview with M. Guillemin, the French Minister, who declared that the Allies had no intention whatever of forcing Greece to fight against her own will, but that they had despatched troops to fulfil the obligations of Greece towards her ally Serbia, and added that the Allies would never abandon Salonika. He recalled the great services rendered by Greece to Germany in having allowed the latter, with Bulgaria, to crush Serbia without going to her aid, and even allowing Bulgaria to reach Monastir. "Unless," he said, "Greece intends to deliver us bound hand and foot to our enemies, she must give us freedom to defend for her Salonika and Macedonia against the Germans, who set alight this blaze in the Balkans, and against her Allies."

These obviously friendly declarations of the French diplomat, whose Phil-Hellenic sympathies are well known, did not fail to raise a storm of abuse in the columns of the Ministerialist Press, which accuses him in undiplomatic language of having made common cause with M. Venizelos, and of having, "under the influence of the fallacious insinuations of his British colleague, induced his Government to commit the gross blunder of undertaking the Balkan expedition, and of endeavouring now to have the French troops kept in Macedonia in order simply to cover up his blunder." Thus the *Nea Hemera* says:—"These troops, far from being able to defend us, are going to draw on to our territory both the Germans and the Bulgars, and that is, no doubt, what the Allies, in agreement with M. Venizelos, desire, with a view to making Greece, in this indirect manner, depart from her neutrality, in which case the Allied troops would be driven into the sea and we should be crushed."

It appears that the French Minister remonstrated with the Government for the language used by its Press organs, and this was followed immediately afterwards by a communiqué to the effect that the statements published in the papers in no way reflected the views of the Government on foreign affairs. The Chief and the members of the General Staff have brought an action against the editor of the *Nea Hellas* in consequence of that paper's allegation that they had been won over to the German cause and had received German decorations.

The Occupation of Monastir.

The capture of Monastir by the Bulgarians, who entered the town accompanied by German troops, has caused a feeling of depression in this country, the place having always been claimed by the Greeks. The Venizelist journals, with natural indignation, point out that the Bulgarian occupation of this town severs the last link that connected Greece with Serbia, and leaves her exposed along the whole of her northern frontier to her traditional enemy, now grown larger and stronger. The *Nea Hellas* printed the news of the fall of the city in a mourning border. The Ministerial journals declare that the fate of the city will be decided at the peace congress, and seek to make the public believe that the town will be awarded to Greece by the Germans. These statements naturally provoke lively expressions of indignation in Serbian circles, which indulge in biting, but merited, criticisms of those Greeks who, having failed to meet their obligations of honour towards Serbia, and having allowed their ally to be crushed, now—to quote a Serbian official—make no scruple about endeavouring to secure a bit of their ally's body.

The Elections.

The leaders of the Venizelist party are using all their influence to restrain their followers from taking any part in the approaching elections, as a protest against their anti-constitutional character. Should they succeed in bringing it about, such an abstention would be an unmistakable sign of popular disapproval, a kind of plebiscite, against the last dissolution of the Chamber, and would place the Government in a very precarious situation. There are barely half as many candidates as there were for the elections of last June.

THE "THREAT" AGAINST EGYPT.

Reuter's Cairo correspondent sends from Paris some extracts from an article entitled "Egypt Is Not Threatened," which was published recently in the *Excelsior*. In this article the writer says that the transport of large forces across Asia Minor presents great difficulties at present, and there is every reason to believe that the Austro-German army released by the Serbian retreat will soon have to play a more necessary rôle in a nearer region.

"If Egypt and India," the paper proceeds, "are to be menaced, it will not be before next spring, and then only on the condition that German enterprises have by that time received no check at any point."

NEWS FROM TURKEY.

(From Our Special Correspondent.)

Athens, December 8.

Questions of Coal and Shipping.

There are now only two Austrian and five German cargo-boats in Constantinople available for transport of coal or munitions, namely, the Dobrovnik and Arimatea and the Rososto, Kerkyra, Patmos, Irmingard, and the Nora Hugo Stinnes. All the Turkish merchant fleet has been destroyed. The destruction of the seven steamers referred to would be an incalculable loss to the Turks, and the Russians apparently have frequent opportunities for inflicting this loss, as two of them leave Constantinople nearly every week for Zunguldak, escorted by destroyers only, and they are about a week at Zunguldak loading.

The Goeben and Breslau are in Stenia Bay and the Hamidieh and Torgout Reis inside the Golden Horn. The last-mentioned, it is said, is quite *hors de combat*, and the other three so badly damaged that their fighting qualities are very considerably impaired.

The most unsatisfactory piece of news related by travellers coming from Constantinople is that coal is still reaching the capital from Zunguldak.

These fairly regular arrivals of coal have enabled Constantinople to hold out; for the absence of coal would have a far-reaching effect. The coal is supplied by the Government to the munition works, railways, flour-mills, electrical station, etc., and is distributed as required. Gas is not being made, and the city is in darkness, with the exception of a few streets which have electric lights.

Cost of Living.

What with a small amount of coal and some lignite and wood, the Anatolian Railway is able to keep the city supplied with just sufficient wheat. The Government provides the flour-mills with coal; and in this way the population are able to obtain, on presentation of a police permit, their daily allowance of a quarter of an oke of bread per person. Meat continues to be cheap, but almost everything else is rising rapidly in price. Coffee is now 40 piastres the oke, and, although the municipality fixed the price of sugar at 8 piastres, it cannot be obtained under 20 piastres the oke. Rice, the principal article of diet of the Turks, is obtained from Angora, and is sold at 14 piastres the oke; and potatoes grown at Ada Bazar are selling at 6 piastres. Fuel is very expensive, and will be beyond the reach of the poor this winter. A limited quantity of coal from Eregli finds its way into Constantinople on small sailing vessels, consigned to the coal merchants, who retail it at an exorbitant price.

A cargo of about 40,000 tins of petroleum was brought to Constantinople from Roumania by a Roumanian steamer; it is said she also carried benzine and lubricating oil.

Our Submarines' Activities.

The British submarines continue to do damage and to create terror in the Marmora.

The German steamer Bosphorus, laden with munitions, left the harbour about a fortnight ago for the Dardanelles, accompanied by destroyers towing lighters with munitions. Outside the harbour a British submarine met them, and a fight took place. The Bosphorus returned to port, and the submarine in retiring threw some shells into Zeitoun Bournou munition works. Fishermen are not allowed to fish in the Marmora lest they should give supplies to enemy submarines.

Turks' Mistrust of Germans.

There appears to be a divergence of opinion among the Young Turks respecting the entry of the German Army into Constantinople. Enver is in favour of this; but Talaat is opposed to it, declaring that Turkey requires Germany's assistance in money and material, but not in men. All travellers from Constantinople express the view that the Turks in general are getting thoroughly sick of the situation, and are asking themselves what benefit they are going to derive from the war. They now realise that they have been duped by the Huns' fairy tales about the conquest of Egypt, India, etc., etc. They say that Germany's object is to obtain all she can from Turkey; and fears are already entertained that the country will be drained by the Germans to the detriment of the Turks.

There is talk of calling up for military service all those who have so far escaped by paying the exoneration tax of 40 liras. The money will not be returned, but a receipt will be given for the amount.

Enemy Subjects' Property.

As mentioned some time ago, there was some intention of seizing the properties of enemy subjects in order to indemnify those who have sustained loss through bombardment by the enemy; but it dawned upon the authorities that the property of Turks in Egypt and elsewhere was doubtless much more than that held by enemy subjects in Turkey, so the idea was abandoned, as there would undoubtedly be reprisals.

FOR PRISONERS IN TURKEY.

The Secretary of State for Foreign Affairs is informed by the United States Ambassador that the Turkish Government desire that, in future, remittances of money not exceeding £5 from private persons for British prisoners of war in Turkey should be despatched to the International Red Cross Committee at Geneva for transmission to the Ottoman Red Crescent Society at Constantinople, by whom payment to the recipients will be effected and a receipt returned to the International Committee at Geneva.

Letters and parcels should also be sent to the International Red Cross Committee at Geneva for transmission. Such letters and parcels are post free. Money should be remitted by International Money Order, which can be obtained at any post office, and which should be made payable to the International Red Cross Committee at Geneva, and sent on with full name, number, and regiment of the prisoner of war to whom the money is to be paid.

Information has also been received from the United States Ambassador that prisoners of war in Turkey are now allowed to write only one letter a week, limited to four lines, and that this regulation applies also to letters addressed to them. Letters of greater length will not be delivered.

SERBIAN REFUGEES.

In connection with the statement by Lord Robert Cecil in the House of Commons last week regarding relief measures for refugees from Serbia, that "it is not easy to ascertain in certain areas how great the influx of refugees is likely to be," and that "it will probably prove not as large as is anticipated," a cable has been received in London by the Serbian Relief Fund stating that the number of refugees at Scutari is ten thousand—half of whom are Montenegrins.

From Salonika the committee of the Serbian Relief Fund have received information that the French authorities have arranged transport for two thousand homeless refugees to be transferred to Ajaccio, in Corsica, where temporary subsistence and accommodation is being provided. They will be accompanied by representatives of the Serbian Relief Fund, which has also arranged for the despatch of other agents to Ajaccio to make preparations for the reception of the refugees.

CYPRUS NOTES.

(From a Correspondent.)

Winter and Agriculture.

December has brought rain and snow. The former has fallen in light and moderate degree, according to reports, throughout the island, raising the hopes of agriculturists, who are busy ploughing and sowing. Mount Troödos, the Kyrenia range, and other picturesque heights are well capped with snow, and frosty, bracing weather prevails at the capital.

It is still hoped that there will be a good increase of cereal cultivation this season. Complaints are made in the local Press that the loans of seed corn advanced to villagers are in many cases insufficient, being limited to four bushels the individual; whereas many ask for much more. One reason for restricting loans is that in poor districts the peasant is always tempted to use the grain as food. Government is keeping itself informed as to the island's need. At Nicosia steps are being taken, by order of the Provost-Marshal, to ascertain the quantities of wheat and barley stored by merchants and farmers. Prices at which meat may be sold are also fixed and published; and this measure may be extended to other articles of food.

Sheep Stealing.

Theft of sheep and goats (not to speak of that of other animals, which has been practically stamped out) is an evil that it has been impossible as yet to eradicate. Formerly it was general, but especially bad in the western or more lawless part of the island. This year Famagusta district is troubled; but the energy of the Commandant of Police, Mr. S. Televantou, is equal to the occasion. Already seventy suspected sheep-stealers are under arrest, and vigorous measures are being pursued. The sheep-stealing season in Cyprus coincides with that of marriages, as meat is a necessary part of wedding banquets and festivities. It ends for the time being with the beginning of the winter fasts.

Priestless Parishes.

Two villages of the Papho district, whose inhabitants were too poor to pay the schoolmasters' salaries, were also without a priest. As a solution of the difficulty, it was hoped candidates would be found who would combine the two offices. In the case of one village this has been possible, and a teacher who desired to enter Holy Orders has been received into the priesthood by the Bishop of Papho. It is hoped that the other village will be equally fortunate.

OUR TROOPS AT SALONIKA.

The following passages are extracted from a letter written from Salonika by an Englishman on December 5:—

Salonika is at present a regular military camp, and offers a wonderful picture. The streets are cram full of British and French soldiers (chiefly officers). There are also many Serbians. I have talked with many high officers and obtained much interesting information, most of which, however, I fear the British Censor would not let me communicate to you.

One curious sight I must mention. Every evening the streets are patrolled by British, French, and Greek soldiers—all fully armed. Sometimes these patrols follow close on each other's heels, and at other times they march abreast. Last night I saw the French and Greek patrols marching together and exchanging friendly remarks as they passed along. Then to-day we had a detachment of the Argyll and Sutherland Highlanders marching along with the bagpipes "skirling" in front of them. But this is not the place to go into more details.

ALBANIANS OF CONSTANTZA.

Our Bucharest Correspondent informs us that the Albanian colony at Constantza has started a journal of its own—a weekly paper—which will be published in Albanian, Roumanian, and French. Its policy is opposed to that of the present Albanian Government.

GREECE AND THE ALLIES.

STATEMENT BY M. GENNADIUS.

The Greek Legation has issued the following statement for publication:—

Certain letters and telegrams, emanating lately from Salonika, contained the following calamitous and misleading statements, to which the Greek Legation is instructed and authorised to give the most emphatic contradiction.

It is absolutely false that the censorship in Greece is confided to a person who was recently in the pay of Baron Schenk, and that the text of telegrams is distorted. The Greek Censorship is carried on with moderation and in an equitable manner, much as in other countries, the service being confided to one who enjoys the confidence of the Government. The censorship in Salonika, more especially, is in the hands of an experienced member of the Consular Service, who occupied the same post during the Balkan Wars, and who resumed it before the fall of the Venizelos Cabinet. That the large minority favourable to Germany is built up by corruption and subsidies, and that it embraces his Majesty the King, his entourage, and the military party of official Greece, is a calumny unworthy of notice. The increase in the prices of provisions, house rents, and commodities in Salonika is the natural result of a great and sudden influx into the country. It is to this cause that must be attributed the difficulties encountered by the Allies, which difficulties the correspondents referred to endeavour to ascribe to a premeditated plan of embarrassing the Allies. The railway tariff has never been raised, all payments being made according to existing regulations.

The Crown Prince, during his recent visit to Salonika, was accompanied only by his Aide-de-Camp, and not by officers of the Staff, who have never left the capital. The defensive works at Kara-Bournou and around Salonika were begun a considerable time ago, and aimed at the defence of the country, and not at an intended attack on the Allies. Moreover, even work on urgent repairs has been suspended, and the personnel of the fortress has been reduced.

The imprisonment of a railway functionary of French nationality was perfectly legal, and consequent upon proof establishing his culpability for insulting language against the Crown Prince. The statement that the commander of a division was transported to another post for expressions favourable to the Entente is absolutely false. The Government has never thought of removing any officer for having demonstrated his sympathetic sentiments towards the armies of the Allies. Prince Hohenlohe never visited Athens, and no one in Greece has ever thought of attacking the Allies.

The statements attributed to Prince Andrew (who is married to an English princess) are the result of the prolific imagination of the correspondent who had indited them. The only truth contained in that correspondence is that the sentiments of the Greek people in general remain faithful and grateful to the Entente.

The Greek Legation is authorised and instructed to give the most categorical contradiction to all these allegations, as well as to the statement that an absolutist régime is in force in Greece, and that there exist revolutionary tendencies. The elections are proceeding in the greatest calm, and the Greek Government will adopt the necessary measures against the dissemination of the false and malevolent reports now contradicted.

THE WAR IN THE BALKANS.

BEFORE THE STORM.

By the time these line are in print the title chosen for our review this week will perchance be inappropriate, but it must be remembered that we only deal here with events in the Balkans during the past eight days. In this respect the week has been uneventful. But the storm clouds are gathering.

Saloniка.

The complexity of the military situation in the Peninsula is unrivalled elsewhere on the Continent. From being a simple military proposition—the sending of help to a betrayed Ally—the Balkan campaign has developed into one of the major operations of the war—a distinction which is emphasised by the political currents and cross-currents with which the Allied armies have to contend. The Anglo-French position is that of a coast enclave in foreign territory opposed by an enemy front reaching north to the Baltic. Salonika itself, which is our base, is a hotbed of international spies who lose no time in reporting to the enemy our every movement, the number of troops landed, positions occupied, etc. This circumstance adds considerably to the danger of our occupation of the town, the more so considering that we are not in a position to gauge the enemy forces with similar precision. Besides, it must never be forgotten that Salonika is a Greek port, and that the Greeks are the subjects of King Constantine, brother-in-law of the Kaiser. Apart from these drawbacks, our position is strengthened by the Navy, which will ever be ready to support the Army in case of need. At present we are hastily fortifying our lines in the enclave ready to meet the foe—on the defensive for the time being—as soon as he has organised his forces for an attack. So far (and we are writing on Wednesday night) the enemy seems to be in no position to deliver what he considers a smashing blow, and, with the exception of feverish preparations on both sides, a deadlock seems to have arisen. It is the calm before the storm. This calm in the case of the Germans, whose strategy hitherto has been characterised by a ruthless rapidity of action, is remarkable, and seems to indicate either a serious weakening of their strength or else their inability to move across that devastated grave which once was Serbia, sufficient heavy artillery to support their proposed smashing blow. Be that as it may, enemy engineers are using the present respite to rebuild the railway lines connecting their present front in the neighbourhood of Ghevgheli with Sofia and Constantinople—via Veles, Nish, and Pirot—and Buda Pest, Vienna and Berlin, via Belgrade and Semlin. By the end of this month it is believed that the Semlin bridge over the Save will have been reconstructed; as for the Vardar section of the Uskub-Ghevgheli line, it will be some time before it is again in a fit state for use.

It is not, however, our enclave position on the Ægean coast which makes the Balkan campaign so extraordinarily complex. Admittedly our base plays an all-important part in the military operations on the Peninsula, and is a pivot on which important actions will turn. There is another front, perhaps even two, which are of exceeding interest, one to the west, in Albania and Montenegro, and the other, so far hypothetical, in the east, on the Bulgarian Black Sea coast. Anent the latter, we know that Russian ships have again bombarded Varna, but for the time being the drastic results expected from Russian co-operation in the Balkans need not be seriously reckoned with.

Albania and Montenegro.

Of far greater importance just now is this front. We know from an Italian communiqué that troops have been successfully landed in Albania, though in what force is unknown. Too little attention has hitherto been paid—perhaps the excuse is to be found in political exigencies—to military possibilities in Albania, but it does seem now that we are beginning to realise the wisdom of preventing the enemy from reaching the Adriatic. An impenetrable screen surrounds the military measures taken by the Italians in this corner of the Peninsula, but we trust and hope that they are adequate (1) to prevent the Boches and Bulgars from occupying the country, and (2) to strengthen and reorganise the Serbian Army. A comparatively small, well-equipped and hardened army in Albania linking up with the Montenegrins—who, by the way, have been fighting bravely against the enemy in the north during the past week—will constitute a grave menace to the enemy in Western Serbia and Macedonia, and, backed by sea-power and transports, will continually threaten communications between Berlin and Constantinople. In the opinion of many, Albania is, strategically speaking, as important as Salonika. Transport facilities are, it must be confessed, atrocious in Albania, but then, are not engineers fighting this war hand in hand with soldiers and sailors? What has been done in Poland by Germans, in Asia Minor by Turks, and is now being done along the Vardar by Bulgars, can surely be done by Allied engineers in Albania.

The Battle of Katchanik.

The following are extracts from a dispatch published by the *Chicago Daily News* (quoted by the *Times*) from Mr. Louis Edgar Brown, recording his impressions of the last brave Serbian offensive in the Katchanik Pass.

"When the Bulgarians took Uskub, 5,000 of the original 20,000 men in garrison made a last stand in the hills midway between Uskub and Katchanik. The Bulgarians outflanked them from the Tetovo plain and forced the Serbians to take up a position at the entrance to the Katchanik Defile. The position was of the highest importance to the Bulgarians, because the Serbian stronghold blocked their advance north to Prishtina and west to Prizrend along the railway. They therefore determined to expel the Serbians. The Bulgarians concentrated two half divisions at Katchanik for this purpose.

The Serbians had more than 100 guns, mostly of the French 75 and 155 (6-in.) type, mortars, and apparently sufficient ammunition for an ordinary engagement. Three Serbian infantry regiments were withdrawn from the northern Austro-German front, and warned that the salvation of the Serbian Army depended on their ability to pierce the Bulgarian line.

"The battle began, and the Serbians saw red. Simple, frank, clear-eyed fighters, they hated the Bulgarians with unequalled intensity. Each Serbian prayed God he might kill two Bulgarians before he himself went to meet his Maker.

"The Serbian artillery began the fray. Thousands upon thousands of shrapnel and high explosive shells were thrown on the enemy. Never during the first days of the bombardment did the Bulgarians hear the discharge of a gun, as everything was drowned in the continuous scream of the exploding Serbian shells.

"The Bulgarians' rude trenches, consisting of two-foot heaps of broken rock, were impregnable to infantry, but vulnerable to artillery. Within forty-eight hours the Bulgarians retreated four miles to escape the withering fire of the Serbian batteries.

"On the third day the Serbian artillery reduced its firing to occasional shells, as they were husbanding their ammunition. The men, having passed many sleepless nights, now dropped exhausted in their gun emplacements and slept uncovered, amid the rain and mud, the *débris*, and the scattered cartridge cases.

"Next day to the infantry came the order to attack, and was received with stolid, unemotional comprehension. The Serbians calmly dug themselves out of the mud, fixed bayonets, and prepared to sell their lives dearly. The first attack struck the Bulgarians in the dusk of evening. The Serbians drove on like huge waves, accepting only hand encounters, and not pausing to aim the fire of their rifles. They seemed to be obsessed with a determination to get their bayonets into the Bulgarians' bodies, laughing at them as their foes lay mortally wounded on the ground. Detached groups at a hundred places along the battle front stabbed, clubbed, bit and choked savagely. The battle became a *mêlée* such as only Bulgarians and Serbians as enemies are capable of fighting. The ruling passions were hatred and revenge.

"The battle lasted all night. Next day the Serbians produced their most prized and most terrible weapon. Imagine a steel, brass-capped case, filled with explosive gelatine, the whole weighing 5 lb., one or more of which, sewn in leather cases, were attached to the belt of every Serbian soldier. The effect of these bombs was terrific.

"After twelve hours' fierce fighting, the Morava and Shumadia Divisions suddenly pierced the Bulgarian front. Victory seemed again possible for Serbia, and the question hung upon everyone's lips, 'What are the Allies doing?' This question remained permanently unanswered.

"The Serbians dashed headlong into the breach made by the Morava and Shumadia Divisions, but the Bulgarians gathered new reinforcements, and before morning that breach, opened at such a price, was again closed.

"The battle was ended, and the Serbians had lost the road to Uskub.

"The Serbians, realising that their retreat was cut off, fought like cornered wolves. The Bulgarians advanced less than a mile a day. The Serbian nation knew its cause was lost, but the army was determined to die in a blaze of glory, resisting to the last shell and to the last man."

Y.M.C.A. WORK IN EGYPT AND AT THE DARDANELLES.

(By Our Cairo Correspondent.)

When the history of the present war comes to be written, among the brightest of its pages will assuredly be that whereon is set forth the splendid record of the activities of the voluntary institutions, amongst which the Y.M.C.A. certainly takes a prominent place.

Wherever our men are fighting, no matter in what part of the world or under what trying conditions—in France, India, the Persian Gulf, Egypt, Gallipoli, South Africa—there will be found the workers of this well-known institution trying to alleviate the hardship and attenuate the privations that are an unfortunate but unavoidable concomitant of warfare, and doing their utmost to lighten and brighten the lot of the fighters on the field and in the camps. I do not propose to deal with the work carried on in the Far East, since I cannot write from any personal knowledge; nor will I speak of what has been done in France, as others far more qualified have already sung the praises of the Y.M.C.A. in those parts. My purpose to-day is to give publicity to the magnificent work carried out by this organisation in Egypt and at Gallipoli—work which the general public has as yet failed to appreciate, and which, owing to the peculiar circumstances in which it has been accomplished, stands out in importance and utility from any achievement of the association or of any other voluntary body in other war areas.

When war broke out great numbers of troops were without warning drafted into Egypt, which, from being a small military station, was at one stroke of the pen turned into a vast training camp, and has since become the nerve-centre of all the expeditions in the Eastern Mediterranean. But although Egypt stands to the Levant much as Boulogne stands to the western frontier, it is much further distant from the fighting line, and the situation of our troops in the two areas cannot possibly bear comparison, whilst the unique position at the Dardanelles is too notorious to need any mention.

In France our men, even in the firing line, are, so to speak, within hail of the Old Country, whence it is comparatively easy to obtain comforts; when they fall sick or are wounded, they are very soon invalided home; and at the worst, if communications with the home folk should go astray, there is always the consoling thought that it may be possible to obtain a few days' leave. Everything combined conduces to keep up the spirit and the *moral* of the men.

But out here, how different, how sadly different, has been the situation! The men, when stationed in Egypt, were for the most part under canvas. They might be training or kicking out their heels waiting for marching orders; but while they were so doing there was nothing to interest them in their leisure hours, nowhere that they could foregather for innocent amusement or recreation. Far from home and friends, cut off from family ties and influences, with insufficient money to enable them to frequent the better-class resorts, amid surroundings which were entirely novel to most of them, and which not unnaturally whetted their curiosity and tempted exploration, the men were at the mercy not only of the temptations that were dangled before their eyes, but also of the pernicious subterfuges of the low element that unfortunately abounds in the Levant and battens on the innocence and inexperience of its victims. The weak point about the situation was that there was no special organisation to cope with such a large body of men as Egypt was called upon to accommodate.

Realizing that something must be done without delay to meet the emergency, and that morally it ought to take its part, the Egyptian branch of the Y.M.C.A., which had carried on its routine work up till then, stepped into the breach, despite the fact that funds were low and an adequate staff was not available. Its aim has been to fill the *lacunæ* in the social organization of the country and to counteract its demoralizing influences by giving the men some place which they could frequent without restraint, where they could purchase good food and extra comforts at reasonable prices, and where they could find amusement and generally spend their spare time pleasantly. Right loyally and thoroughly has the association carried out the self-appointed task; and the G.O.C., who has had to introduce many stringent regulations for the protection of the troops from the parasitic element already referred to, admits that in his endeavour to keep the men out of the clutches of these monsters and to maintain the *moral* of his army he has found the greatest assistance in the activities of the Egyptian branch.

Wherever a camp has been created, the Y.M.C.A. has pitched its tent—at first an ordinary canvas one, but later on one made of matting. Each tent is run by a voluntary secretary—usually a University man—who merely looks to the association for his board and lodging, and who is responsible for the organization of his particular area. At each of these centres the men find materials for letter-writing, papers to read, games to play; they can get good square meals at ridiculously low prices; and they can use the tent absolutely as their recreation room. Every evening there is something doing: concerts, organized by the secretary or by private individuals, in which the men take part; popular lectures; competitions, boxing matches, etc.

En passant it is interesting to note that since the association started operations among the troops here it has distributed 3,500,000 sheets of paper and as many envelopes, and that at the present moment it requires 400,000 sets every month. One wonders how many of these letters would have been written had it not been for the intervention of the association. Those at home who have loved ones at the front, or have experience in such matters, will be able to realise what an amount of pleasure and happiness the letters from this distant land must have brought into thousands of homes in the Old Country, and what good the maintenance of the link must have done to the writers.

In addition to providing the men with pleasant and congenial resorts, the association has carried on educational work that is well worthy of record. French and Arabic classes have been organised for such men as wished to make some acquaintance with those tongues, and the knowledge thus acquired has proved most useful to those who profited by them. Moreover, the association has throughout adopted a most broad-minded policy. Its work has been purely interdenominational, as can be seen from the fact that ministers of every creed are allowed to hold services in the tents on Sundays and Feast Days, at hours arranged amongst themselves.

We who are on the spot are perhaps best able to judge of the value of the work done, and what is thought of the association's enterprise can be gauged from the fact that the Anglo-Egyptian colony is co-operating cordially. The lectures that are periodically given are delivered by prominent officials; the language classes are all held by local Englishmen and women; at every concert residents come down to assist, and when "a rush" is on the secretaries are reinforced by temporary volunteers. Whilst, however, this is eloquent of the opinion held locally—and the warm acknowledgments of the military authorities, from General Maxwell downwards, and the appeals for help from the C.O.'s attest to the utility of the work—the great test of its success must be the manner in which the men avail themselves of the facilities offered them. Go to any tent on any afternoon, provided it is not a day when manœuvres are on, and you will find it full. Watch the end of a parade, or the conclusion of the tea hour, and you will see a long procession of men making for the tent with the familiar letters "Y.M.C.A." outside, where they will spend the rest of the evening. The hum of voices and the contentment that is evident as you walk through is surely the greatest proof that could be required of the men's appreciation of the efforts that are being made to make them happy.

The association has, however, not confined its activities to Egypt. As hinted above, Gallipoli, where the men lived amid conditions and endured privations that were none the less deplorable because they were heroically borne, soon attracted its attention, and several depots have been established on the islands and on the peninsula, where the men can obtain such comforts as may be of use to them in the field. At first it was intended to place these depots in protected positions, but it was found that no site was out of the range of the enemy guns; so, as the representatives were quite prepared to go where the men went and take the risk, it was decided to start work without delay, and depots were established at Helles and Anzac, right within the fire of the Turkish batteries. In addition, depots have been opened on the islands of Imbros and Lemnos, where the headquarters for the peninsula are stationed; and under the auspices of the association a bakery has been erected at Kephalos and a canteen opened at Anzac and Helles. The delight with which the first Y.M.C.A. worker on the peninsula was hailed by the men was pathetic, as it was eloquent of the great need in which they had stood; whilst the success which has attended the running of the various enterprises opened by the association shows what a great want the "peninsula" work fills.

Such, in brief, is the work that the Egyptian branch of the Y.M.C.A. is carrying out in the Eastern Mediterranean. Those who know their Egypt, or who are familiar with the circumstances of war in the Orient, will quickly realize what a boon its enterprise has been to the men and what a debt the Empire owes to the institution whose efforts have so conduced to the maintenance of the spirits, the *moral*, and the health of the thousands of soldiers who have been in Egypt and in the war areas wherein the M.E.F. is operating.

The Egyptian branch started operations, as I have mentioned, despite the fact that its funds were low; and it has since been enabled to carry on for just over a year

Digitized by Google

solely thanks to local subscriptions, grants from England, America, New Zealand, and contributions from other parts of the world. With a guaranteed monthly income of but £300 and a monthly expenditure of £500, it naturally finds itself now in difficulties; and it is forced to appeal for funds to the British public, for without financial assistance it will not be possible to continue the present work, let alone respond to the calls which the regimental officers are daily making upon the association.

The branch has at present twelve centres in Cairo (including a large café and recreation ground in the very heart of the city), six centres in Alexandria, one at Kephalos, on Imbros, one at Mudros, and two on the Gallipoli Peninsula. Nobly has it met every demand made upon it in Egypt—by the way, that demand will be very much heavier shortly, for, apart from the fact that more troops are arriving every day, it has been asked to take up purely social work among the Indian troops on the peninsula; boldly did it assume the burden put upon its shoulders by the Dardanelles campaign, and, like the historic *cantinière*, follow up the troops into the zone of fire with a gallantry that equalled that of our lads themselves. And now, undaunted by the lack of funds, it is responding to the call that has come to it from Salonika, where, before these lines are in print, it is probable that its men and its familiar huts will be established among our troops.

Surely such enterprise, resolution, and courage as it has consistently shown, and such good as, on the testimony of the highest in the land, it has done are deserving of the fullest encouragement, and should command for it the most liberal support from people throughout the Empire. Never has the Egyptian branch refused its assistance or excused itself from co-operation on the plea of lack of funds, and it would be a crying shame if it were forced not merely to stop all expansion to meet the growing needs of our troops, but to curtail its sphere of activity.

That is the prospect ahead unless adequate financial assistance is promptly given. That we should spare no effort to keep going the organisation which has in the past brought them so much comfort and happiness, and enable it to continue its excellent mission in the future, is surely the least we can do for the gallant men who have offered their services and their lives so that liberty and right, for which their forefathers also fought, should continue to reign in the world!

[Subscriptions for the "Egypt" Fund of the Y.M.C.A. will be received either by THE NEAR EAST, or at the London offices of the association, 13, Russell Square.]

A JOURNEY IN SERBIA.

Being further extracts from the diary of Dr. Lauwens, of the Wounded Allies Relief Committee's Mission to Serbia.

KRAGUJEVATZ, July 24.

Yesterday evening I received a telegram from the delegate of our committee summoning me urgently to Podgoritza (Montenegro), for that mission, which has been deprived of its head, who has been recalled to England, has now only two lady doctors and eight nurses, and has immense difficulties to overcome. All the medical and surgical stores are still at Ipek, and horses and mules are used for transport across the mountains. A medical man is absolutely necessary in this country, so I started off at once.

On leaving Uskub the way lies through a picturesque valley of rugged grandeur. It is a steady ascent up the mountain, the summit of which reaches an altitude of 2,500 metres. This peak was in sight for three-quarters of an hour, then we reached a fertile plateau, where the air was comparatively fresh. I was travelling with two Americans belonging to the Rockefeller Mission.

At the station at Mitrovitza the Montenegrin delegate was waiting for me, and took us—the two Americans and myself—to an inn, pompously called the Hotel Bristol. There are three bedrooms in this establishment, and a dining-room downstairs, where the townspeople come to enjoy a cuisine that is not at all bad.

The town of Mitrovitza is three-quarters Turkish, with its minarets, mongrels, cafés with divans, veiled women, beggars, and so forth. From the height of a minaret the chant of a muezzin, calling the Faithful to prayer, reaches our ears.

The following morning at five o'clock our three carriages are ready. With us are a German-speaking Montenegrin, as our interpreter, and three drivers. The carriages, called "brchka," are small, low, four-wheeled vehicles on springs, and are covered with a sort of canvas. The bottom of the carriage is covered with a little hay, over which there is a rug. Here one makes oneself as comfortable as one can.

We start off at a jog-trot, jolted and shaken about unmercifully as we bump over the abominable Turkish paving. (Mitrovitza has been Serbian only since the Balkan War.) One of our drivers is singing and dancing with joy at the thought of returning to Ipek, where he lives; though the interpreter tells us that he will be severely reprimanded by his three wives for having stayed several days at Mitrovitza. We are told also that it is the Moslem Lent (Ramadan), and that two of our drivers (Arnauts) will have to do the whole journey running by the side of the carriage under a burning sun without eating or drinking anything until sunset.

We leave the town and soon emerge into a narrow rocky valley. We meet soldiers and mounted Serbian gendarmes, armed with rifles, as well as several Arnauts driving cattle and horses. The road is abominable; the sun like fire. In some places Austrian prisoners are mending the roads, where they are absolutely impassable; yet I am told that in a few months' time they are going to run motors! The Arnauts have a stern and savage appearance; they are not allowed to carry arms since the Serbian occupation. The most trivial offences are punished most severely; but this is absolutely necessary. The interpreter tells me that two years ago (under the Turkish *régime*) it was exceedingly dangerous to make this journey, and that one had to be armed to the teeth.

After three or four hours on the road we arrive at an undulating plateau. Our little horses seem to be tireless. At mid-day we reach the Montenegrin frontier (Rudnik), a military post, where our passports are *viséd*. Here there is a Turkish inn. It seems as if we shall never come to the end of the descent we are making to reach the bottom of the valley where lies Ipek. In front of us, towards the north, the chain of the Albanian Alps stretches away to Montenegro. The summits of these mountains are for the greater part covered with snow, and afford a magnificent spectacle. The roads are now quite good, but very dusty. The mountain side we are descending is very fertile: maize, barley, wheat; very few trees. The heat is stifling.

My carriage is in front, followed by that of the Americans and the cart with the luggage. Soon we catch sight of the mail cart in front. Two carriages that we had overtaken at the frontier (one of which is driven by a Turk, at whom our driver had levelled jibes and insults) now catch up with us and pass us. The driver of the Americans' carriage is not going to have this. He hurries forward and joins in at the end of the procession, despite the cries and supplications of his passengers. The three carriages now start on a mad race down the road and along the fields on either side, the axles grinding and the wheels throwing up clouds of dust. My carriage remains prudently behind. Soon we come across a broken-down carriage in the middle of the road. The Turk and the driver of the mail cart have been victorious in the struggle. The Arnaut is shouting with joy. The Americans, more dead than alive, are boxed up in their carriage, happily unhurt. On the ground at the side of the broken-down vehicle are the passengers, who have escaped with only a few bruises.

We reach the bottom of the valley at about five o'clock, and shall get to Ipek in about another hour. At the river we stop to water the horses, and go to a small Montenegrin inn for some Turkish coffee, where a few Montenegrin soldiers regard us curiously. Resuming our journey, we can soon see in the distance the minarets of Ipek, which has the characteristics of all Turkish towns: numberless herds of bullocks and buffaloes, here and there a dead horse, abandoned by the road, flocks of ravens, disagreeable odours.

We arrive at Ipek, a town swarming with inhabitants, at six o'clock. There are Turks wearing the fez, Arnauts with small white caps, a strand of hair coming out behind (the rest of the head being shaven); Serbians in the national cap; Montenegrins with their little round Basque cap, leather sandals, full pantaloons of light blue, white shirt and embroidered bolero. The streets are narrow and winding.

Bidding adieu to the Americans, who are going to their camp, half an hour's journey from the town, I make my way to the depôt, where I have great difficulty in finding my belongings. There are hundreds of cases to be unpacked and done up again in small parcels ready for transport by donkeys and ponies across the mountains towards Andregevitsa, whence a motor service starts for Podgoritza. There are no horses, and I am wondering how long it will be before all my belongings reach their destination.

From what one hears there seem to be a good many wounded at Ipek. A fortnight ago the Albanians planned an attack south of the town. The Montenegrin army, helped by the Serbian artillery and reinforced by all the Christians at Ipek, officials, etc., advanced against the Albanians, inflicted severe losses on them, and obliged them to retreat.

As I am anxious to leave for Podgoritza as soon as possible, I am making arrangements with the Montenegrin Bureau de Transport.

NEAR EAST BOOKSHELF.

AN ARTIST AT THE FRONT.*

Although the brush work of Mr. Norman Wilkinson is undoubtedly what it was intended to be—the main attraction of his book—his letterpress is by no means to be ignored. The author has given us a remarkably fresh and vivid picture of service life at Gallipoli, so fresh and vivid, indeed, that it brings to the reviewer's mind the enchanted picture of an author dealing with the live subject of war in some hallowed corner of its theatre where censors are not. He writes of submarine nets and other measures undertaken by the Admiralty for the safety of our Fleet with an openness and familiarity that leave us breathless, and, if the truth must be told, with a vague feeling of discontent with other writers who have been less fortunate in ignoring, or more obedient in obeying, the dictates of Whitehall. It is not, of course, impossible that a German submarine or two have fallen victims to our netting methods, and we quote from Mr. Wilkinson's description of one of our own E boats caught at the Narrows. It is, as far as we are aware, the first thing of its kind which has been published :—

In the early stages of the operations the net across the Narrows could be negotiated by diving under it; but, on a subsequent occasion, a submarine returning to the open sea found that the Turks had placed a deeper net in position. This particular submarine fouled the net at a depth of over one hundred feet, and was actually hung up by stout wire for upwards of fifteen minutes. It is impossible to imagine anything more likely to unnerve men than to be caught like herrings in a net below the surface, and actually to hear, as they did, hydrostatic bombs exploding around them. The Turks would know, of course, by the agitation of the net above, that a submarine was caught; however, by going astern and then ahead, and allowing her whole weight to come on the net, the vessel broke through and returned in safety.

The author gives us an excellent impression of the work done by the Royal Navy, and by the trawlers and other adjuncts of the Service in these waters. In reading his account of our position on certain occasions one is constrained to marvel at the comparative immunity of our Fleet, often confined to a small area lest it should run an added danger from enemy submarines, when the Turks, having found the range, were using the big guns with all the energy at their command.

It is a thousand pities that the Turks should have been guilty of such fiendish acts as the Armenian massacres. Had it not been for this the Turk might, and, indeed, would, have emerged from this trial with a character from which the stain of lust and cruelty had been effectively removed. Mr. Wilkinson, in this book on the Dardanelles theatre, says that "no nation could possibly have conducted warfare in a more above-board and clean-handed manner than the Turks." The author was in a position to see many of the most historic incidents of the campaign, and his gift of recounting them in a pleasant and interesting manner is not to be denied.

In turning to the illustrations we find it very hard to single out any plate for particular mention. They are all good, many of the smaller ones, indeed, too good to have their characteristics blurred by the inclusion of two sketches on one page. The practice of thus spoiling two good pictures in the interests of paper-saving is, in our opinion, the weak thing about this book. If a sketch merited inclusion it should certainly have stood alone.

One picture which seems to call for special attention is that of H.M.S. Talbot in Suvla Bay, shelling enemy ridges at dusk. This picture gives a very faithful idea of dusk, with its attendant greyness of the waters in these regions. If it lacks anything it is the sense of distance. On the other hand, the representation of the balloon-ship Hector, with kite balloon up, is instinct with the sense of space of freedom.

Altogether the book contains no less than thirty-six coloured plates and innumerable sketches in black and white. And, dealing with a campaign in our history no less glorious because it was unrewarded with the full fruits of victory, it would make an admirable gift book that should be carefully preserved as the first of its kind to be published in the greatest war of the world.

A WEIRD VOLUME.†

One of the characteristics most essential to the successful writing of a book dealing with the mystic or supernatural is conviction, both in thought and expression. The most gruesome ghost story often fails to thrill when recounted by a sceptic. The book under review leaves us with the impression that its author's conviction, strong in the beginning, wavered very considerably before he wrote his last chapter, and that thus an original and otherwise enthralling tale has been robbed of full justice.

The story opens with a prologue, the scene of which is laid in Afghanistan, where the principal characters of the book are travelling in pursuit of psychic investigations. On the eve of entering one of the most important centres of psychic manifestation which they had encountered in all their long quest, one of the two, Aga Halfi, the mystic, is seized with a premonition of evil and of failure, and while his white companion sleeps he resorts to the use of all the magic powers of which he is master in an attempt to ward off the threatening calamity. He is only partially successful, and upon the direct results of his partial failure the rest of the story is based.

We read the first portion of the book with unrelaxing interest. Mr. Roland Filkin had got hold of a good plot, and he was working it with skill. If there is a weakness here, it lies in the dialogue; but the author's descriptive powers, and also the sense of conviction that gives colour to every paragraph in this portion of the book, far outweigh any slight failing in this respect. The real fault of the book lies, in our opinion, in the introduction of the love element into its pages. The inevitable ending is so apparent from the moment that Constance Alletson is assigned her place in the little group of inquirers into the mysterious happenings of an English countryside village that interest becomes blunted, and irritation is with difficulty avoided. It is only doing the author justice to suggest that his theme and his method of dealing with it were quite strong enough to have stood alone without pandering to the popular demand for sentiment. As an individual theme, the analysis of such an attraction as the Master of Storton presented to Miss Alletson would not be without interest. But although this attraction asserted itself under conditions that were entirely abnormal, the reader is left to take it for granted that it would remain unchanged when those conditions were reversed. In other words, the author has in this instance done either too much or a great deal too little.

Again, in the matter of the book's ending, Mr. Filkin must surely have tired of his work, or he would never have allowed the long arm of coincidence to play such havoc with its charm. His work is, in fact, curiously uneven. Up to a certain point it is, as we have intimated, entirely satisfying; after that point it fails, at least in comparison with its previous chapters. And the very fact of its being well above the average of books of this kind only serves to sharpen the critical attitude.

In the matter of the Roc's gigantic footprints, Mr. Filkin has, wittingly or unwittingly, re-told, though in a different setting, actual happenings of twenty years ago in Wales. The scene is laid in England, and how far the writer has been influenced by Serbian mystical belief it is, of course, impossible to say, but many of his descriptions might pass for tales common enough among the Serbian people of the twentieth century.

If only for these reasons, his book should command a large sale—it contains a sufficiency of possibility to make it acceptable to all classes of readers, and it appears at a time when there is a very widespread tendency towards inquiring into supernatural matters.

We do not, of course, intimate that the book is in any way more than it pretends to be—a novel—but in its perusal the reader will obtain added interest if he remembers that such beliefs as it contains are accepted as profound truths by thousands of our brave and gallant Serbian allies to-day.

BOOK NOTES.

Messrs. Sidgwick and Jackson published last Saturday "The Glory that was Greece: a Survey of Hellenic Culture and Civilization," by J. C. Stobart. The price of the book is 7s. 6d. net.

Messrs. Blackwood have published Sir Mortimer Durand's "The Life of Field-Marshal Sir George White, V.C." (2 vols., 30s. net.)

Messrs. Galloway and Porter, Cambridge, have published, at one guinea net, a new "Omar Khayyam," illustrated by Mera K. Sett, a young Parsee artist. The edition is limited to 250 copies.

Messrs. Marshall have published a sixpenny booklet, "How the Turk Makes War," by Leon Levison. It contains a narration of the organized outrages in Armenia and Syria and of the "invasion" of Egypt.

Mr. Martin Secker has published "Perfumes of Araby: Silhouettes of Al Yemen," by Harold Jacob. Lord Lamington contributes a forewood to the book, the price of which is 7s. 6d. net.

Any Books mentioned on this page, or any other Publication, can be obtained at the published price, plus 3d. postage in the United Kingdom, or 6d. abroad, from

THE NEAR EAST (Book Department),
16-17, Devonshire Square, London, E.C.

* "The Dardanelles: Colour Sketches of Gallipoli." Text and pictures by Norman Wilkinson R.I. (London: Longmans, Green and Co. 12s. 6d. net.)

† "Aga Halfi, the Mystic." By Roland Filkin. (London; William Rider nd Son, Ltd. 6s.)

Digitized by Google

TANGIER TO TEHERAN.

I see that the camels of the Zoological Gardens at Berlin are being pressed into the service of the German army. In view of the proposed capture of Egypt, the formation of a camel corps has been considered necessary, and, making the best of a lack of colonial possessions where such corps are frequently found, the gentle Hun is settling down to master the precarious game of cup and ball in his own country. I scarcely know which to pity most, the camel or the Hun. I have seen many Germans on camels in Egypt, and somehow the angular lines of the one animal always seemed painfully out of sympathy with the generous contour of the other. Even a lean man requires many yards of flannel tightly swathed round his waist if during his first long ride he is to avoid the sensation of being dissected by a drunken surgeon during a storm at sea; and the German is not, as a rule, a lean man. The amateur camel rider is, too, assailed by the least pleasant of boyhood's memories for many painful days after his first ride is done; so, as he is usually too stiff to walk, the only place of rest is in bed. And from my personal acquaintance with many camels, I know they will not hesitate to say exactly what they think concerning the weight of their new riders over and above that of the normal white man. I am a man of few recreations, but I should dearly like to see the Berlin Camel Corps on parade.

***

Mr. J. Harding King, who has many winters in the desert to his credit, told a tale at a recent meeting of the Royal Geographical Society which goes a very long way towards accounting for the notorious irritability of the camel tribe. I am sure that it will be new to many who formerly thought they knew the worst about a camel to learn that he is keenly susceptible to electrical influences—a regular storage battery, in fact. "I have heard," said Mr. King, "on rather doubtful authority, of a brush discharge about six inches long on the ears of a camel during an unusually bad sandstorm." The tale is not, as we see, guaranteed as gospel, but it may be true, and if so it's small wonder that the camel has the hump. I would simply hate to have a brush of electric sparks flying from my ears.

***

Another instance of electric phenomena quoted by Mr. King as having come under his personal knowledge was that of woollen blankets having become charged with electricity during a sandstorm. When shaken to rid them of sand these articles literally blazed all over with sparks, and in one case Mr. King could even feel the spark drawn from a blanket when he touched it. I wonder if some of the irritation I have experienced while sleeping in the desert has also, unbeknown to myself, been due to a similar agency? I used to put it down to quite different causes.

***

In writing of life in the desert, it occurs to me that many of the tricks adopted by our pioneers in search of bodily comfort might be useful to such men of our new armies at home as find it difficult to keep warm. I know from experience that two blankets sewn together in the form of a sack give as much warmth to the man inside as will double the number used in the ordinary way. A small stone carried in the trousers pocket will generate a considerable amount of heat, and will be found useful when the fingers become numbed. If it is necessary to sleep in the open when your bedstead is of canvas, or camp type, it is best to dispense with the framework altogether, and, laying the canvas on the ground, make your bed upon that. A canvas neatly swung on its fittings is undoubtedly more comfortable, but people seem to forget that cold goes up as well as down, and as on these occasions the thickness of one's mattress is usually negligible, the cold, baffled by many blankets on one side, plays havoc on the other. While I am not in sympathy with the Native's custom of converting himself into an amateur mummy while he sleeps, he certainly knows how to make the best of things in the wilds.

***

A young Frenchman recently captured by the Huns wrote to friends in London: "You will be sorry to hear that I have been made a prisoner. I am now awaiting the end." "The end" of what? Of the war, let us hope. But if I fell into the clutches of the Huns I am not sure that I should feel very hopeful of seeing the coming of peace, for reports of the way in which they treat their prisoners are far from reassuring. Contrast the message just quoted with another sent by a Turk who was made prisoner by our Mesopotamia Expeditionary Force. He asked if he might send a brief message to his friends, and, receiving permission, dispatched a telegram, stating simply: "Safely captured." The writer of the letter from which I quote adds: "The Turks like being taken prisoners by us." Which I can quite believ

Apropos of my reference to Prince Henry XXXI. of Reuss, a friend tells me that when his Serene Highness left Simla for his mysterious mission to Teheran he sold all the wine that was left in his cellar to his acquaintances, keeping back only a few bottles of specially good champagne, which he purposed taking with him for use on his journey. One man bought from him twelve dozen bottles of German dark beer, which were delivered to him some days before H.S.H. departed. When the first bottle was opened it was found that the beer was bad, and on investigation it transpired that not a single bottle was drinkable. Thereupon the indignant purchaser invited the Prince to lunch, and gave him a bottle of the beer. The Prince tasted it, but could not drink it, and at last said he fancied the beer was flat. His host replying bluntly that so far he had not found a single bottle that was fit to drink, the Prince, with the best grace he could muster up, offered to take back what was left. Shortly after he took his departure, not much pleased with his entertainment. But worse still was in store for him. After he was well started on his journey to Teheran, he found that his servant, misunderstanding the order to take with them all the wine that had not been sold, had carefully packed nearly twelve dozen bottles of beer, while the champagne had been left in Simla, to the tender mercies of a native caretaker.

***

I am indebted to a correspondent for a newspaper cutting in which reference is made to the rules and regulations governing the conduct of our troops in Busreh, and from these I see that: "Bathing is permitted from the various piers, but the use of soap on these piers is forbidden, as it makes the planking slippery and is therefore dangerous." Incidentally, I may remark that I greatly admire the wording of this rule, which, it seems to me, is all the more likely to be obeyed cheerfully because the reason for making it is so clearly set forth. No sensible man objects to obeying rules that are obviously wise; but, as a friend of mine once observed, "Rules that are made just for the sake of saying 'You mustn't' are the very devil." But what strikes me as strange about the business is that the rule makes no mention of sharks. These pests used to be quite common in the river, even as far up as Baghdad. Have they now disappeared entirely? And if so, why? Perhaps the mining that has been done in the river, by both sides, has upset the finny ones and driven them back to the Gulf. If so, the war has done one good turn to Irak.

***

Whether the advent of the British has driven the sharks away or not, it is certain that it has woken the town up considerably. In looking through a batch of the *Busra Times* received by the last two mails, I have come across many items that serve to show how the place is developing already. Thus, apart from such minor items as a notice about the founding of a Masonic lodge, I find: (1) An official notification regarding "the reclamation and sale of the foreshore between the Serraji creek and the Kut al Frangi creek on both sides of the Shatt el Arab"; (2) an item of "Local News" to the effect that a *gharrywallah* has been sentenced to fifteen days' hard labour for "refusing to ply for hire without being paid backsheesh"; and (3) an announcement of the opening of an hotel. The first of these items looks as if we had definitely made up our minds to stop in Busreh; the second shows the place has progressed enormously already since the bad old days when there were no *gharrywallahs* at all—not even ruffians who demand backsheesh!—and no roads fit for them to drive their *gharries* on, even if you backsheeshed them up to their eyes. As for the third item, I must confess that it appeals to me by the modesty of its claims. The hotel, I gather, is near that earthly Paradise, referred to recently in these notes, in which the incomparable Mademoiselle Samieh and that "regular Aleppo," "La Bella Tara," made glad the hearts of the Busreh citizens. "It is," I read, "a Decent Bungalow, with separate Rooms, and is a fine site." And the next sentence informs me that: "The undersigned will be grateful to receive those that are forthcoming." So now, as soon as I can put my affairs in order here, and hasten to feast my eyes on the fair enslavers just mentioned, I shall know where to stay in Busreh.

CORSAIR.

PASSPORTS FOR EGYPT.

The Press Bureau issued the following announcement on Sunday night:—

In view of the large number of ladies who have proceeded to Egypt, it has been decided, at the request of the General Officer Commanding, that, until further notice, no more passports will be issued to ladies to enable them to travel to, or winter in, Egypt.

Those who are already in possession of passports valid for that country are warned that unless they are in possession of special permission from the General Officer Commanding in Egypt, they will not be allowed to disembark.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. (New Style.)	Julian. (Old Style.)	—	Moslem.	Jewish.
1915. Dec.	1915. Dec.		1334. Safar.	5676. Tebet.
24	11	Friday	16	17
25	12	Saturday.....	17	18
26	13	Sunday	18	19
27	14	Monday	19	20
28	15	Tuesday	20	21
29	16	Wednesday	21	22
30	17	Thursday	22	23

To-day is the birthday of H.M. the Queen of Denmark.

Wednesday is the birthday of the Queen Dowager of Roumania, who was born in 1843.

The *Giornale d'Italia* states that King Peter of Serbia is in Albania with his Army, and that he does not propose to leave it, at least, for the present. Preparations have, however, been made in case the King should wish to go to Italy to recover his health.

The Earl of Cromer left London on Monday for Gourock.

Lord Kitchener had an audience of the King at Buckingham Palace on Monday.

Amongst those present at a Te Deum sung at the Russian Church, Welbeck Street, last Sunday, in celebration of the name-day of the Emperor of Russia, were: the Roumanian Minister, the Serbian Minister, M. Alexandre V. Georgevitch, M. G. Todorovitch, and Colonel Milivoi Nicolaievitch.

The Moslems of India are reported to be much excited at the murder in Persia of the Agha Farikh Khan, a cousin of the Agha Khan, which was referred to in these columns last week.

Mr. Bertram Christian, chairman of the Serbian Relief Fund, has received information that Sir Ralph Paget, British Relief Commissioner in Serbia, has arrived at Modano from Albania with a party of 120 members of the various hospital units, which have been at work among the Serbians. The party is now on its way home.

Mr. R. L. Naville, Director General of the Banque Franco-Serbe, is in London, having recently returned from Serbia and Salonika.

Sir Edward Boyle, we understand, arrived in Salonika at the beginning of the month, accompanied by his mother, Lady Boyle.

On December 17, at the Old Rectory, Eastwell, Ashford, Kent, the wife of Lieutenant-Colonel P. J. Melvill gave birth to a daughter. Colonel Melvill was formerly H.M. Consul-General at Baghdad.

Last Monday, at Windholme, Parkstone, Dorset, the wife of Major Mervyn J. Wheatley, the Dorset Regiment (attached Egyptian Army), gave birth to a son.

The marriage took place at St. Andrews, N.B., last week, of Demetrius John Cassavetti, Hon. Secretary of the Anglo-Hellenic League, only son of Mr. and Mrs. Alexander Cassavetti, of Shenley, Herts, to Miss Lilian Moir, daughter of Dr. and Mrs. Moir, of St. Andrews. The bride was given away by her father, and Mr. Anthony Kephala was best man. The Bishop of St. Andrews, assisted by Canon Winter, officiated. The bride wore a simple white satin dress and a Belgian tamboi lace train of her great grandmother, Lady Sutherland, which was carried by her nephew, Master Ian Moir. She was attended by her sisters, Misses Mary and Noel Moir, as bridesmaids.

A Cyprus correspondent writes :—Mr. J. R. Holmes, President of the District Court, Nicosia, left on December 4 on six days' leave, to escort a daughter to Port Said. She has recently become engaged to be married, and leaves for India, her new home.

The *Egyptian Gazette* reports that "news has been received in Cairo that Sir Robin Paul, formerly of the Irrigation Service, has been made a prisoner."

Our Special Correspondent in Athens, in forwarding us news of Constantinople under date of December 8, writes :—Mr. James La Fontaine, who had been exiled to Angora, has now been transferred to Chorum. The reason assigned for his exile is because he was in correspondence with two mercantile captains who are prisoners at Magnesia. The other Englishmen at Karahissar are confined in a large khan, but have a certain amount of liberty, and are as well as can be under the circumstances.

Mr. Tully, the manager of the Gresham Life Insurance Company, having embraced the Mohammedan faith, has been allowed to return to Constantinople.

Sir Thomas Jackson, chairman of the Imperial Bank of Persia, and late chief manager of the Hong-Kong and Shanghai Bank, in Gracechurch Street, who died suddenly in an office at the bank on Tuesday, was the son of the late Mr. David Jackson, of Urker, Crossmaglen, Ireland, and was born in 1841. Beginning his career in the Bank of Ireland, Belfast, he went to the East in 1864. He was knighted in 1899, and received a baronetcy in 1902. Sir Thomas held appointments on the boards of several other banking and insurance companies, including the London County and Westminster Bank, the Union Discount Company of London, the Royal Exchange Assurance Corporation, and the Yorkshire Penny Bank. He married, in 1871, a daughter of the late George Julius Dare, R.N., by whom he had four sons and four daughters, and is succeeded by his eldest son, Major Thomas Dare Jackson, M.V.O., D.S.O., Royal Lancaster Regiment, born in 1876, who gained his D.S.O. in the South African War. Sir Thomas's second and third sons have both been wounded in the present war.

We regret to announce the death of Mr. F. W. Manson, which occurred in Alexandria on the 18th inst. Mr. Manson, who was partner in the firm of Messrs. Back and Manson, was very well known in Egypt, where, in addition to being proprietors of the *Egyptian Gazette*, his firm have large commercial interests. The deceased gentleman, who was sixty-five years of age, was this year accompanied by Mrs. Manson on his visit to Egypt, and much sympathy is expressed for her in her sad bereavement. The cause of death is given as apoplexy, following dysentery. Mr. Manson had two sons serving in the Army. One, who has been wounded on four occasions, is at present convalescent in London; the other, who has been serving at the Dardanelles, was due to arrive in Egypt during the present week. Mr. Manson's death will be sincerely regretted by his many friends both in England and in Egypt.

We regret to announce the death of Mrs. F. E. Johnston, wife of Brigadier-General Francis Earl Johnston, C.B., which took place on the 15th inst. at Cairo, following an operation for appendicitis.

Colonel Charles Frederick Pollock has died at Conheath, Dumfries, at the age of seventy-one years. Entering the Army in 1867, he joined the Royal Army Medical Corps, and saw service with the Egyptian Expedition, 1882. He was at the battle of Tel-el-Kebir, and received a medal with clasp and also the bronze star.

We regret to announce that official notice has been received that Sub-Lieutenant B. W. Kenny, R.N.V.R., was killed in the Dardanelles on the 19th inst. He was on the staff of the Imperial Ottoman Bank, Manchester, and joined the R.N.V.R. on February 22, 1915, going to the Dardanelles in July. He was invalided to Egypt and Cyprus in September-October and returned to the Dardanelles in November. He is the third member of the Imperial Ottoman Bank, London and Manchester staff, to lose his life in the war, and a fourth member has been missing for many months.

Last Friday was celebrated throughout Victoria as an "Anzac Remembrance Day" for the benefit of forty-four soldiers' institutes in Australia, Egypt, and Gallipoli. It is estimated that about £10,000 was obtained.

On Saturday afternoon, at the Anzac Club and Buffet, Horseferry Road, a presentation was made to Lady Birdwood, wife of the General Officer Commanding the Dominion Forces at the Dardanelles, from the Australian and New Zealand soldiers now in England. The presentation took the form of a boomerang with a suitable inscription, and an autograph album which will contain as many as it is possible to obtain of the signatures of the 15,000 men of the Australian and New Zealand Army Corps, now in hospital or on furlough in this country. Mr. A. H. O'Connor, who presided, referred to the splendid services which General Birdwood had rendered not only to Great Britain, but also to Australia, and said that the General had shown that he understood and appreciated the spirit which animated the Australian people in this war.

During the day, messages of Christmas greetings were received from General Sir Ian Hamilton and General Sir William Birdwood. Sir Ian Hamilton's message ran: "Happen what may, the Australians who have fought at Gallipoli will bequeath a heritage of honour to their children's children." General Birdwood telegraphed: "Good cheer, boys, from all old comrades in the firing line. Return soon, and we'll see this through together."

The *London Gazette* announces that the King has been pleased to give directions for the following appointment to the Most Distinguished Order of Saint Michael and Saint George: To be an Additional Member of the Third Class, or Companions, of the said Most Distinguished Order: Colonel (Second Commandant) Godfrey Estcourt Matthews, C.B., Royal Marine Light Infantry, in recognition of his services in command of the Plymouth Battalion, Royal Marine Brigade, Royal Naval Division, at the Dardanelles.

The *London Gazette* of last Friday contained the announcement of the bestowal on Colonel Milivoï Nicolaïevitch, General Staff, Serbian Army, of honorary membership of the Third Class, or Companion, of the Order of the Bath.

It was notified in last Friday's *London Gazette* that the King has awarded the Distinguished Service Cross to Lieutenant Theodore Douglas Hallam, R.N.V.R., now acting Flight-Lieutenant, R.N., in recognition of his services and signal gallantry in charge of machine-guns in the Gallipoli Peninsula.

On January 10, at an evening meeting of the Royal Geographical Society, to be held in the Society's Theatre, Burlington Gardens, at 8.30, Sir Arthur Evans will read a paper on "The Adriatic Slavs and Their Relation to the Future Overland Route to Constantinople." Other papers announced are:—"Cyrenaica," by Professor J. W. Gregory, on January 24, and "Communications in the Balkans," by Mr. H. C. Woods, on February 7.

Professor L. W. King will deliver two lectures on "Recent Excavations in Mesopotamia" on March 2 and March 9, at 3 o'clock in the afternoon in each case. The lectures are given under the auspices of the Royal Institution, and further particulars may be obtained at the office of the Institution, 21, Albemarle Street, W.

The Director-General of Voluntary Organizations acknowledges a gift of £100 for the purchase of material for the manufacture of comforts for the troops at the Dardanelles, and of £50 for a similar purpose for the benefit of those in Mesopotamia, from Mrs. W. P. Martin, Chulmleigh, North Devon.

Digitized by Google

Mr. D. P. MacGillivray has arrived in London from Khartoum.

The English ambulance unit which left London in October under the direction of Mr. Ivor Bevan has been accepted by the Russian Army for work on the Caucasian-Persian frontier, where the cars are expected to arrive before the end of the month. Mr. Bevan cables that two more experienced drivers are badly needed at once—either two men or one man and one woman. Applicants, who must be prepared to pay their own expenses, are asked to write to Mrs. Ivor Bevan, 126, St. James Court, Westminster, who will give further information.

Mrs. Henry Lee, Francis's Hotel, Bennett Street, Bath, writes: "The need for bed socks in hospitals at Lemnos is most urgent. The cold is severe there now, and there is much difficulty in heating water for hot-water bottles, as they have only the tiniest oil stoves in the tents to do it with. There is also great need for candles. After dark the poor patients have no light whatever. Chocolate, toffee, acid drops, peppermints, and condensed milk and biscuits are wanted. The poor men just crave for something sweet. I shall be very grateful to any of your readers who will be good enough to send any of these things, or money to buy them with, either to me at the above address, or to Mrs. Anderson, Red Cross Hospital, Southampton Docks.

The Agent-General for South Australia last week received by cable from Mr. J. M. McBride, of South Australia, the sum of £500 for the Serbian Relief Fund, which sum has been paid to the Chairman of that Fund.

A bazaar, arranged by the Women's Volunteer Reserve, 15, York Place, Baker Street, in aid of the Serbian Relief Fund, will be held at the Portman Rooms, Baker Street, on January 27. The bazaar is under the patronage of the Duchess of Marlborough, the Marchioness of Londonderry, the Countess of Pembroke, Lady Cowdray, Lady Rodney, Lady Beatty, Lady Wolseley, and others. The Reserve is responsible for all the stalls, but help is urgently needed in money or in kind. Contributions of medical comforts, stationery or books, clothing, fancy articles, and provisions will be most gratefully received at 15, York Place, Baker Street.

Count Mensdorff, formerly Austro-Hungarian Ambassador in London, is reported to have been charged with a political mission of great importance—the character of which it is not difficult to guess—when he visited Bucharest recently on his way to Sofia. Ostensibly he went to the Bulgarian capital on Red Cross business, and it was officially stated that he visited Bucharest only on his return journey. The *Morning Post's* well-informed correspondent in Budapest, however, denies this, in a letter dated December 7.

The Serbian Relief Fund received last week from Sir Edward Boyle, a member of the Committee, now representing it at Salonika, the following telegram: "Thousands of refugees from the direction of Ghevgeli already approaching Salonika. Am requisitioning accommodation here which is indifferent and inadequate for present arrivals. Am endeavouring to keep refugees from Macedonia in Florina, Vodena, and Sorovitch until arrangements are made for their maintenance elsewhere. All reports agree that condition of refugees is lamentable and the need of assistance very urgent. Problem will attain increasingly grave complexion in the next few weeks. Earnestly beg British public to supply us with funds to cope with actual and prospective situation." The Serbian Relief Fund Committee are collecting and packing, and despatching from the headquarters, 5, Cromwell Road, London, S.W., large consignments of clothing and other necessaries and remitting funds for disbursement on the spot. They urgently appeal for further contributions in cash or in kind.

A party of women doctors, nurses, and orderlies, who left Serbia when the Bulgarians and Germans invaded that country, arrived in London on Wednesday. They had all been attached to the Scottish Women's Hospitals units, and amongst them were Dr. McVea, Miss Linton, Dr. Chesney, and Miss Bedford. The last-named had been matron at Krushevatz. Dr. Alice Hutchison, who was in charge of the work at Valievo, is expected to arrive in London very shortly. She had remained in Italy with some of the members of the S.W.H., who had fallen ill as a result of the privations they endured and the hardships they encountered in their flight. Dr. Elsie Inglis is reported to have been captured, with most of the members of the unit, at Krushevatz, by the Germans, but the fugitives received information that the captives were being well treated.

Under the patronage of the Serbian Relief Fund, Mr. James Buckland is giving a lecture for children on January 4, at 3.30 p.m., at the Whitehall Rooms, on the home life of interesting and beautiful birds of other lands. The proceeds are to be devoted to a fund which is to be raised by the children of Britain to found a home in Serbia for orphans. Tickets, 5s. each, may be obtained from Mrs. James Buckland, 29, St. Thomas's Mansions, Westminster Bridge, and from all the usual agencies.

The ex-Khedive, Abbas Hilmi, who is staying at the Hotel National, Geneva, has attracted around him quite a little court of Egyptians of the "ancien régime," says the Zurich correspondent of the Central News. Visits are made daily to the Hotel National not merely by members of the group of Egyptian Nationalists, who have always made Geneva their centre, but by such personalities as Sadik Pasha, grand dignatary of the former Court at Cairo, Moheb Pasha, and others. The number of Egyptian students at the Geneva University has been increased by the arrival of some young Egyptians from England.

The Serbian Relief Fund has received from Mrs. Parsons, wife of the Administrator of the Second British Farmers' unit now at Vranska Banja, information dated November 21 to the effect that up to November 18 the unit was in charge of a hospital in that town. Orders were shortly expected for the transfer of the unit to Krushevatz. The report says the members—numbering thirty-one—are all well and receiving every courtesy at the hands of the Austrian authorities.

Christmas Day is to be observed at Bedford as "Serbian Day," every household being asked to make a collection on Christmas morning for the Serbian Relief Fund.

Frances Isabella Catherine, Dowager Marchioness of Bath, of Manchester Square, W., mother of Lady Cromer, who died on October 31, widow of the fourth Marquess of Bath and eldest daughter of the third Viscount de Vesci, has left unsettled estate of the gross value of £49,869, with net personalty £49,151. Probate of the will dated December 18, 1897, with a codicil of February 2, 1914, is granted to her son, the present Marquess of Bath. Lady Bath gives £10,000 to her daughter, Lady Beatrice Thynne, and £5,000 to Lady Cromer. After providing for annuities of £100 to her butler and £30 to her coachman, and for some legacies to other servants, she leaves her plate, pictures, household and personal effects to her son, Lord Bath; and the residue of her property to her son, Lord George Alexander Thynne.

Sir Alfred Pearce Gould writes that Mr. F. W. Twort, superintendent of the Brown Animal Sanatory Institution, whose mission to the Eastern theatre of war was recently announced in the *Times*, is going out to establish a bacteriological laboratory for the service of the military hospitals there. Mr. Twort is a bacteriologist with wide experience in pathology; his work will have nothing to do with veterinary surgery.

According to an Exchange telegram, a despatch from Salonika states that an insistent rumour prevails there that Prince William of Wied has arrived at Prizrend, where efforts are being made to secure support from the Albanian tribes to permit him to reclaim the throne.

APPOINTMENTS, PROMOTIONS, Etc.

The War Office announces that General Sir Charles Monro has been appointed to succeed General Sir Douglas Haig to the command of the First Army, on the latter's appointment to the supreme command of the British Forces in France and Flanders. Lieutenant-General Sir Archibald Murray, Chief of the Imperial General Staff, will succeed Sir Charles Monro.

Our Bucharest Correspondent reports that Colonel Stephen Holbau, of the Inspectorate-General of the Roumanian Army, has been appointed Military Attaché to the Roumanian Legation at Petrograd, and that Lieutenant Florian Georgescu, of the 2nd Regiment of Artillery, has been appointed as his assistant.

Messrs. J. L. Rees and T. B. F. Rees, sons of Mr. T. Bowen Rees, of Smyrna, have been granted temporary commissions as sub-lieutenants in the Royal Naval Volunteer Reserve.

The Budapest journal *Az Est* learns that Roumania is sending as the new Minister at Sofia M. Pissozki, formerly the Roumanian representative in Egypt.

A telegram from Berne announces the arrival there of Selim Fuad Bey, who has been appointed to the new post of Minister for Turkey in Switzerland.

A Sofia message received in London last Friday, by way of Amsterdam, stated that M. Chaprachikoff had been appointed Royal Commissioner at Nish.

The following transfers are announced in the Egyptian *Official Journal* from the dates stated:—

Bimbashi C. Cassidi, M.B., Recruiting Department, to Medical Corps, 20-10-15; Bimbashi T. W. Stallybrass, M.B., Medical Corps, to Recruiting Department, 20-10-15; Bimbashi J. J. Bramble, 3rd Battalion, to Upper Nile District, 6-11-15; Bimbashi R. W. Hutton, Upper Nile District, to 2nd Battalion, 21-11-15; Bimbashi G. F. Hudson Kinahan, Sobat-Pibor District, to 2nd Battalion, 21-11-15.

M. Anghel Saligny, the well-known Roumanian engineer, has been appointed Director of the new Munitions Department of the Roumanian Government.

A Berlin telegram states that in consequence of the absence on leave, owing to illness, of Prince Henry of Reuss, German Minister to Persia, Dr. Vassel has been appointed Minister at Teheran. Dr. Vassel was Consul at Fez up to the outbreak of war, and is at present diplomatic representative at the headquarters at Baghdad.

BACK NUMBER OF "NEAR EAST."—Advertiser wishes to purchase copy of THE NEAR EAST, dated September 6, 1911, to complete Volume I.—Communications, stating price wanted, to A. S. M., THE NEAR EAST Offices.

SCHOOLS for BOYS & GIRLS.

TUTORS for ARMY, UNIVERSITY, CIVIL SERVICE and ALL EXAMS. REFINED HOMES with EDUCATION for children whose parents are abroad.

Messrs. J. and J. PATON, having an intimate, unique, and up-to-date knowledge of the best Schools and Tutors in this country, will be pleased to aid parents in their choice by sending (free of charge) Prospectuses and Trustworthy Information regarding Establishments which can be thoroughly recommended.

The age of the pupil, district preferred, and rough idea of fees should be given.

J. and J. PATON.

ROLL OF HONOUR.

British Subjects from Turkey in H.M.'s Forces.

The Editor of THE NEAR EAST *would be obliged if relatives of former British residents in the Near East who have joined H.M.'s forces would communicate additional names or other particulars for insertion in our Roll of Honour. Biographical details concerning those who have fallen in their country's service would also be appreciated.*

ASHE, Lance-Corp. R., R.E.
ATKINSON, Bombardier G. M., 266th Battery, 85th Brigade, R.F.A., Colchester.
ATKINSON, Gunner T., "A" Co., Royal Field Artillery.
BAKER, Captain A. Warden, 7th Royal Scots Fusiliers.
BARKER, 2nd Lieut. C., Interpreter, British Central European Expeditionary Force.
BARRON, Captain J. B., Worcester Regiment, France.
BATH, Nurse, Sister, Army Hospital, Malta.
BELL, Sister M. J., Edinburgh War Hospital, Bangour.
BINNS, Lieut. C. E., R.M. (Interpreter to Mediterranean Forces).
BINNS, Lieut. Harold H., Royal Naval Division Headquarters, British Mediterranean Expeditionary Force.
BINNS, Lieut. W. Hylton, care of The British Consul, Brindisi.
BLYTH, Captain R. C. P., 1st Gloucestershire Regiment, attd. Egyptian Army. (*Killed in Action.*)
BOLTON, Alfred, Naval Brigade.
BOND, Private H. C., 7th (Reserve) City of London Regt.
BOND, Gladwyn J. T., Inns of Court O.T.C.
BOND, Trooper Sidney (1,779), Royal Horse Guards. (Wounded.)
BOND, Corporal R. (41,357), Headquarters Staff, "D" Battery, 79th Brigade, R.F.A., 17th Division, B.E.F., France.
BORRELL, Rifleman Alfred, 7th Service Batt. Rifle Brigade.
BOWMAN, Private Henry J., R.A.M.C., Duke of York's Barracks, Chelsea.
BROOK, Corporal George, 41356, D. Batt., 78th Brig. R.F.A., 17th Div., B.E.F., France.
BURN, E. R., 7th Service Batt. Rifle Brigade.
BURNS, Rifleman Edward, 7th Service Batt. Rifle Brigade. (*Accidentally Killed.*)
CASTELL, Rifleman Henry, 7th Service Batt. Rifle Brigade.
CAUCHI, Act. Corporal Henry (6113), 19th Service Battalion, C. Company, Royal Fusiliers, Epsom, Surrey.
CHARNAUD, Lieut. A., R.N.V.R., Acting Interpreter.
CLEMOW, F. G., M.D., C.M.G., British Red Cross Mission, Plevlié, Montenegro.
CLIFTON, Capt. H., Interpreter, 11th Batt. Durham Light Infantry, 54th Division, Mediterranean Expeditionary Force.
COLES, Dr. D. A., R.A.M.C. (formerly of the English Hospital. Haifa).
COLLEY, Trooper Isaac E., Royal Horse Guards.
CORBETT, Lieut. H. C., M.D., R.A.M.C.
CRAWFORD, Private James, 7th (Reserve) City of London Regiment.
CUMBERBATCH, Lieut. A. Noël, 9th East Yorkshire Regiment, Fulford Barracks, York.
CUMBERBATCH, 2nd Lieut. H. D., 6th Battn., The Buffs, 12th Division, B.E.F., France.
CUMBERBATCH, Lieut. R. C., 7th Battn., The Rifle Brigade, 14th Division, B.E.F., France.
CUMING, Bombardier A. C., No. 38983, R.F.A., B. Battery, 84th Brigade, 16th Division, British Expeditionary Force, France.
DAVIDSON, Bombardier C. T., 266th Battery, 85th Brigade, R.F.A., Colchester.
ELLIOTT, Eric C., 2nd Lieut., Essex Regiment, 11th Battalion.
ELLIOTT, Flight Sub-Lieut. Clifford W., R.N.A.S.
EPPSTEIN, Lieut. W. R., Durham Light Infantry.
FAULKNER, Lieut. M., Admiralty House, Malta.
FROMANT, Private F., Grenadier Guards.
GALLIA, Rifleman M., 7th (S) Batt. Rifle Brigade.
GOODACRE, Miss C., Red Cross, Shoreham.
GOUT, Captain Charles L., 24th K.O.Y.L.I., Brighton Road Schools, Gateshead-on-Tyne, Durham.
GOUT, Rifleman Evelyn, 7th Service Batt. Rifle Brigade.
GOUT, Rifleman Richard, 7th Service Batt. Rifle Brigade.
GRAVES, Captain Philip, Intelligence Department, Mediterranean Expeditionary Force.
HADKINSON, Rifleman Vivian H., "A" Co., 7th Batt. Rifle Brigade, Queen's El Ward, Bed 40, Graylingwell War Hospital, Chichester. (*Wounded.*)
HIGGS, Private J., 6th Dragoon Guards.
HOLMES, 2nd Lieut. Gerald H., 2/5th Batt. Leicestershire Regiment.
HOLTON, Corporal Alfred, Royal Naval Division, Divisional Engineers.
HOLTON, Trooper John, B. Squadron, Essex Yeomanry.
IRELAND, Private D. J. (3346), 15th County of London Regiment.
JACKSON, Rifleman Edward, 7th Service Batt. Rifle Brigade.
KERR, Miss E., Q.A.I.M.N.S.R., H.M. Hospital Ship Brighton, British Expeditionary Force, France.
KEYSER, Lieut. A. G., 8th Batt. King's Own Yorkshire Light Infantry.
KEYSER, 2nd Lieut. R. N., 10th Batt. East Lancashire Regiment.
KEYSER, 2nd Lieut. Henry, 2/10th Batt. Middlesex Regiment.
KEYSER, 2nd Lieut. J. C., 2/9th Batt. (D.C.O.) Middlesex Regiment.
LA FONTAINE, Rifleman Fred., 7th Service Batt. Rifle Brigade.
LA FONTAINE, 2nd Lieut. Hugh, 27th City of London Regiment, Acting Interpreter, British Central European Expeditionary Force.
LA FONTAINE, Sub-Lieut. J. S., R.N.V.R., Hawke Battalion. (*Wounded.*)
LANDER, 2nd Lieut. Arthur.
LE BAILLY, Lieutenant R. F., R.N.V.R., Recruiting Officer for Royal Naval Air Service, Brook Green Road, Hammersmith.
LORIMER, Private D., Army Service Corps, Aldershot.
MACKENZIE, 1st Lieut. W., Egyptian Labour Corps.
MACKINNON, Private Eric, 9th Royal Scots Highlanders.
MACKINNON, Dr. Frank I., Lieut., R.A.M.C., St. George's, Malta.
MACKINNON, Dr. J. M., Captain R.A.M.S., British East Africa.
MACKINNON, Patrick, Sapper, Divisional Engineers, 1st Canadian Contingent.
MACKRAY, E. D., Dardanelles Expeditionary Force.
MCLOCHLAN, Private B., 1st Canadian L.I.
MCLOCHLAN, Private G., 1st Canadian L.I.
METCALFE, Sister E. J., Queen Alexandra's Imperial Military Nursing Service Reserve.
MICHEU, Bombardier C. G., Royal Field Artillery.
MOORE, Miss K. M., Royal Red Cross, Serbia.
MORRISON, 2nd Lieut. J., 4th Seaforth Highlanders, B.E.F., France.
MORTON, Private Stanley, 2nd Sportsman's Battalion.
MOSS, 2nd Lieut., Public Schools Battalion.
MUMFORD, P. F., Army Service Corps, R.E., Baldock.
MUNRO, 2nd Lieut. J. G., 4th Scottish Rifles, Fort Matilda, Greenock.
NOWILL, 2nd Lieut. Sidney, 2/17th City of London Regiment, Acting Interpreter, British Central European Expeditionary Force.
PARKER, Trooper G., Royal Horse Guards.
PATERSON, Lieut. Alexander, R.A.M.C., Haddington.
PEACOCK, 2nd Lieut. Frank, 4/4th Batt. London Regiment, Royal Fusiliers.
PEARS, Captain G. B., Military Cross, R.E. (*Wounded.*)
PENGELLEY, Sapper Walter, R.E.
POYNTER, Lieut. Hugh E., No. 2 Base Supply Depot, Portishead, Somerset.
RAMSAY, Corporal F. R. F., 14th Service Batt. Argyll and Sutherland Highlanders.
REES, 2nd Lieut. J. L., R.N.V.R.
REES, Trooper R. (1709), Squadron D (in Egypt), Herts Yeomanry, c.o. G.P.O., Southampton.
REES, 2nd Lieut., T.B.F., R.N.V.R.
RICHARDS, Miss, Dispenser, Edinburgh War Hospital, Bangour.

RICE, Rifleman Cecil, 7th Service Batt. Rifle Brigade. (*Died from Wounds.*)
ROUTH, 2nd Lieut. C., 3rd/8th (D.C.O.) Middlesex Regiment.
SACKVILLE-WEST, 2nd Lieut. Hon. B., R.N.V.R.
SAMSON, Seaman George McKenzie, V.C., R.N.R. (*Seriously Wounded.*)
SEAGER, Lieut. J. A., 16th Middlesex Regiment, France.
SEAGER, Lieut. John Owen, B. Co., Public Schools Batt., 16th Middlesex Regt., Woldingham.
SELLAR, Lieut. Fred. B., Interpreter, Central European Expeditionary Force.
SEMPLE, Rev. S. H., C.F., 7th Royal Scots, 156th Brigade, 52nd Division, Mediterranean Expeditionary Force.
SHAW, 2nd Lieut. T., R.E.
SIMMONS, Gunner H. C., 123rd Heavy Battery, R.G.A. (*Died from Wounds.*)
STEPLING, Rev. Canon, R.A.M.C.
STOCK, Lieut. H. W., Royal Marines. (Serving abroad.)
SUMMERS, Lieut. H. C., R.N.V.R., H.M.S. "Europa."
SUNDERLAND, Interpreter (at the front).
THOMPSON, Lieut. Harold H., R.N.V.R.
THOMPSON, John, Interpreter, Mediterranean Expeditionary Force, Alexandria.
THOMPSON, Commander W. A., R.N.V.R., H.M.S. "Egmont."
THWAITES, Captain H., R.A.M.C., France.
TORRANCE, Dr. D., R.A.M.C.
TRENTER, Trooper T., Household Cavalry.
VAN LENNEP, Private E., 2nd Sportsman's Battalion.
VAN MILLINGEN, 2nd Lieut. Charles A. M., 14th Rifle Brigade.
VAN MILLINGEN, Private R. G. C., 3rd Batt. London Scottish.
VEDOVA, Rifleman Eghbert, 7th Service Batt. Rifle Brigade.
VEDOVA, Rifleman Lionel, 7th Service Batt. Rifle Brigade. (*Killed in Action.*)
VERE, Lieut.-Commander Harry, R.N.
WARREN, Act.-Corporal R. M., 7th (S) Batt. Rifle Brigade. (*Killed in Action.*)
WEALE, 2nd Lieut. W. W. C., 11th Batt. Devonshire Regiment. (*Wounded.*)
WELLS, Nurse, Sister, Army Hospital, Malta.
WHEATLEY, Miss, Sister, Q.A.I.M.N.S.R. No. 21, Ambulance Train, British Expeditionary Force.
WHEELER, Captain P. F. C. d'Erf, 3rd Dorset Regiment, Medit. Exp. Force. (*Wounded.*)
WHEELER, 2nd Lieut. Geoffrey Nowell Popham d'Erf, 7th Dorset Regiment, Portsmouth.
WHITEHOUSE, Mid. L. E., R.N.
WHITTALL, Captain G., 1st Oxford and Bucks Light Infantry.
WHITTALL, 2nd Lieut. Arthur, 7th (Res.) City of London Regiment.
WHITTALL, Lieut.-Commander F. E., R.N.
WHITTALL, Lieut.-Commander H. E. C., R.N.
WHITTALL, Lieut. Hugh, Royal Marines. (Serving abroad.)
WHITTALL, 2nd Lieut. H. V., Interpreter, British Central European Expeditionary Force.
WHITTALL, 2nd Lieut. Kenneth, Interpreter, Mediterranean Expeditionary Force.
WHITTALL, 2nd Lieut Roland, Interpreter, Mediterranean Expeditionary Force. (*Died from Wounds.*)
WHITTALL, Rifleman Walter, 7th Service Batt. Rifle Brigade. (*Wounded.*)
WILSON, Dr. Marian E., Scottish Women's Hospital, Abbaye Royaumont, France.
WOODS, Harold, Interpreter, Mediterranean Expeditionary Force, Alexandria.
WRATISLAW, Captain J. C., 8th Leicestershire Regiment, 110 Brigade, 37th Division, B.E.F., France.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.
The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.

Are the Finest on the Nile.

Alexandria.
MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Bucharest, Roumania.
GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Alexandria.
CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 50 per day.
G. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

CYPRUS PALACE HOTEL
NICOSIA, CYPRUS.
Charming position. Beautifully situated in the best part of Nicosia.
Most magnificently built and furnished.
FRENCH and ENGLISH CUISINE.
Every Comfort. Moderate Charges.
Special terms for extended visits.
BRANCH OF THE CYPRUS HOTEL CO.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

THE GALLIPOLI WITHDRAWAL.

It is impossible to contemplate the abandonment of the Anzac positions without a sensation of the keenest regret. But war leaves little room for sentiment, and the uppermost feeling must be one of admiration for the masterly execution of a hazardous enterprise. The position of the British troops at Anzac and Suvla was not only hopeless from the point of view of any purpose that their retention there might be expected to serve; it was in danger of becoming untenable with the arrival of fresh supplies of ammunition for the enemy. None of these terms, unfortunately, is absolute, and in a case where the withdrawal of troops is known to be attended by grave risks there must always be a temptation to hope that the unexpected may yet justify their retention for a little longer. How long the Australasian force was kept after the time when withdrawal was first seen to be inevitable we can only surmise. The dilemma with which the responsible authorities were confronted had been the subject of discussion on the spot between General Sir Charles Monro and Lord Kitchener, and no secret was made of the belief held in military quarters that the withdrawal of the troops could only be effected with heavy loss. Several weeks had elapsed since Lord Kitchener visited Gallipoli. In the absence of news from this front, the fear began to gain ground that once again the policy of "wait and see" was to be adopted, and that rather than face an awkward decision the British Government was inclined to favour the retention of the position, even at the risk of its becoming altogether untenable and of the ultimate sacrifice of all the men holding it. To the credit of the military authorities, the situation was faced, and faced in time. They went further, and, recognising that the peculiar conditions rendered the re-embarkation of the troops a naval rather than a military affair, gave the Navy a free hand in the task. As the result of this co-operation, "a great army," although in closest contact with the enemy, was withdrawn without the enemy being aware of the movement. With the exception of a relatively small quantity of stores and six guns destroyed, all the troops were transferred, with the insignificant loss of only one naval and two military men wounded, "to another sphere of operations."

The curtain has been rung down on one of the great tragedies of the war. Gallipoli, like Balaclava, will live in the annals of British history as a classic of unavailing heroism, and it is to be hoped that it will be immortalised as fittingly in verse as the Charge of the Light Brigade. In spite of the failure to effect a surprise landing, a mere handful of Australians, of such fighting stamp, in the words of one eye-witness, as the world had never previously seen, launched their attack against positions which nature had meant to be impregnable. The first ridge gained, they fought their way ridge after ridge for four miles, down deep gorges and up steep precipices, until they had gained the heights which overlooked the Dardanelles. The Peninsula was as good as won; all that was needed was that the Australians should have been reinforced and their position on Sari Bair consolidated before the Turks could recover from their surprise. But the reinforcements never came. They had been landed at the foot of the Peninsula sixteen miles away, under the impression, it would seem, that it was better to meet the enemy in his own carefully prepared positions than to attempt to take him in the rear and cut him off from all supports. Thus the Turks, free from anxiety in the south, were left to deal with the heroic Australians, whose brilliant dash had for the moment virtually secured the forcing of the Dardanelles. Massing for a counter-attack, they pressed back the invaders by sheer weight of numbers, until a line was reached short enough for the Australian Corps to hold. For the next three months the strategical value of the Anzac position was ignored, while more and more troops were landed at Cape Helles to be wasted on a venture long since proved to be hopeless. On August 6 an attempt was made to retrieve the initial mistake. An advance was ordered from the Anzac postion, and a fresh landing was to be effected at Suvla Bay. Once more misfortune dogged the operations. The landing was carried out at night; but in spite of the weakness of the Turkish opposition no attempt was made to press home an attack. There was little to prevent the occupation of Anafarta Hill, and when once that position was in British hands, the dominating heights of Hill 971 would have been outflanked and rendered untenable for the enemy. But again the opportunity was lost, and before the mistake could be rectified the Turks had had time to rush forward their reinforcements and take advantage of the natural strength of their positions.

Now that the withdrawal from Gallipoli has begun we are forced to regret the elaborate disclosures with which Mr. Churchill distributed the responsibility for the initiation of the Dardanelles campaign. As the rash venture of an impetuous Minister, some excuses might have been found for it; but when we are told that it represented the matured deliberations of the Cabinet, assisted by the War Office and the Admiralty, the national pride experiences a heavy fall. In the three months during which the project was discussed before the preliminary bombardment on February 25, in the additional two months that elapsed before the first landing was effected, it would be thought that someone in authority would have made a careful study of a map of the Peninsula. The Greek General Staff, it is stated, expressed the opinion that the only way to reach Constantinople was through Dedeagatch, either with Bulgaria's help or in spite of her hostility. The Japanese Government also appears to have held the view, as a result of the experiences of its forces before Tsingtao, that a naval bombardment could not result decisively unless accompanied by land. Both these opinions were ignored in the decision, first, to attempt to force the Dardanelles merely by a bombardment from the sea; and, secondly, to land at the extreme point of Gallipoli Peninsula. The failure of the enterprise will have taught us, it is to be hoped, the value of expert advice. General Birdwood and his gallant Australasians have been withdrawn from Anzac, but their part in the war is not yet at an end. Their desire, we may be sure, will be to try conclusions once more with the Turks, and if the retirement from Anzac releases any large number of Turks, they will have the choice of several spheres for their next encounter. Wherever they may be used, they will be given, we trust, a better chance to reap the fruits of their dash and heroism.

POSTAGE OF NEWSPAPERS TO NEUTRAL COUNTRIES.

By an order of the War Office all papers posted to neutral countries are stopped, except those sent by the publishers or newsagents who have obtained special permission. No information is given as to the disposal of such stopped papers. Readers are therefore asked to bear in mind that if they desire to post a copy of the "NEAR EAST" to a friend in a neutral country they should order its despatch by the publishers, at 16-17, Devonshire Square, London, E.C.

THE BOSPHORUS IN WAR TIME —1913.

By MARY A. POYNTER.

"No one, of course, undervalues the advantages of steam navigation, or suggests a return to sailing ships. At the same time it remains true that never again will men see the Bosphorus so beautiful as it looked in days when its waters were untroubled by steam."

Thus wrote scholarly Professor Van Millingen, in his book "Constantinople," published some eight years ago. And true, in a general sense, this quotation must always remain. But there were at least several hours, perhaps a whole day, some two Sundays ago,* when the veil of the sometimes thin, sometimes heavy, smoke left in the wake of the many steamers passing up and down the Bosphorus was lifted altogether, and when the blue waters of the strait were again dotted only with the white sails of larger craft and the slender *caiques* and *sandals* of earlier and more picturesque days. Not that these latter have ever disappeared, but on this day they alone dominated the waters as of old.

One would hardly expect this picturesque return to come in war time and in mid-winter! But winter in Constantinople is dependent upon "which way the wind blows," and a gentle southerly breeze can almost bring summer back in a day; that is, it can bring an agreeable temperature and the soft tones of colour we call atmosphere in these Mediterranean lands, if not the pulsating heat of a real summer's day.

In the summer of the calendar the heights of the Bosphorus, above the gardens of the Turkish *yalis* and palaces that border the historic waterway, are burned to a rich brown by the sunshine that is rarely interrupted by shower. In winter these heights are a deep green, save when the north wind blows and a storm from the Black Sea covers the pleasing background with snow. For the shores of the Bosphorus are not abrupt or barren, save near the entrance to the Black Sea. Here they threaten somewhat, as if to ward off blows of unpleasant weather to be expected sometimes from that direction.

The Sunday of which I write dawned sunnily and with a southerly wind. There was a feeling, too, in the air as if the strain upon human nature, for the past three months resting so heavily, had been lessened; one did not go instinctively to the window and listen for the boom of cannon to sound from the lines of the two great armies facing each other, and at war again, only some twenty-five miles away. No, instead of this, one listened for and heard the cheery calls of the chaffinches from the acacias in the garden and a woodpecker rapping briskly at some closed door among the branches.

My companion said: "Let us go across to Asia to-day! The Bosphorus will be beautiful, and our friends in Scutari will be glad to have us bring them the news from this side of the water."

"But are there any boats running?" was my question. "The papers told us yesterday that they had nearly all been requisitioned to carry troops to the Dardanelles!"

"Yet there are the little boats, and it is just the day for a row on the Bosphorus!"

As nearly all the able-bodied horses, and some of the not able-bodied, had also been requisitioned by the army, we walked down to the landing-place—in this instance near the Sultan's Palace of Dolma-Baghtche, which faces the water and enjoys all the privileges of the location together with more humble dwelling-houses. On this particular morning the white palace had a black frieze, high up, and running all along its front, composed of a line of hundreds of grave and almost motionless cormorants, resting from their labours, having performed successful fishing feats earlier in the morning. Many of the houses along the Bosphorus are decorated in this way during fine days in winter. It is one of the signs of the season, and is what might be called a characteristic sight. Where most of the abundant waterfowl go in summer must be asked of the bold bluffs, that invite nest-building, along the Black Sea coast.

On our way down from Pera to the boat we remarked how the parade ground and every other empty space was occupied by recruits being trained in the use of arms. But somehow they did not seem to be drilling for real war, only just as a sort of pastime. Even the loads of rifles being taken from the armoury did not suggest a deadly purpose. We would let nothing suggest such a thing that peaceful and perfect morning. My companion, who has the heart of a soldier and appreciates the discipline that goes to the making of one, remarked that some of the men being drilled would never learn to keep step, so little did the process interest them. Loitering behind the plough, or standing guard over a herd of sheep grazing upon the uplands of Koniah, that were a step natural to them and easy to acquire and far sweeter to keep!

Some representatives of the old clans of Constantinople street dogs crossed our path or followed us a little distance if we gave them a friendly word of recognition. There is quite an aftermath of these now springing up in certain portions of the city. A few that lived in the outskirts of the town escaped being sent to die in exile on a lone isle in the Marmora three years ago, and these have multiplied and seem well fed and content to roam at large as formerly. With thousands of human beings homeless and hungry in our midst, driven this way before the march of armies, one wonders how this humble "friend of man" finds food for well-being. Perhaps there is truth in the story that some of the Turkish people of the old school were deeply incensed at the treatment meted out to the dogs, dating a part of the misfortunes of their country from that time, and on this account they make haste to give alms to any of the remaining members of the canine population.

At the landing-stage of Beshiktash there were no smoky though convenient steamers bound up or down or across the Bosphorus, as the voyager might be going. Indeed, there were only small boats, rocking gently on the water while awaiting the traveller's pleasure. It was true the steamers had been requisitioned—at least, there were none in sight that fair morning. Looking up stream, a blue stretch of some miles lay outspread, unbroken by the prows of throbbing, noisy steamers, the air unsullied by their smoke—the Bosphorus, in fact, as it must have looked in those halcyon days before steam!

But it was a busy Bosphorus, too, with little boats flitting in all directions, some of them spreading a single white wing to save exertion with the oar; and there were also the big, old-fashioned Greek barques, with a dozen sails all set, some bound back through the Marmora to the Ægean and others heading with provisions and charcoal for some white town on the shores higher up. It is a fact that the breezes of the Bosphorus are very obliging; if there is any wind at all, it is willing to do double duty; with a little shifting of the sails the same wind will blow a boat up or down the stream—of course, taking its time. It would not be dignified to hurry in Eastern waters. A few days in the year there may be a superabundance of wind and also no wind at all, and that is rather disheartening to both sides. I shall say nothing about the strong currents of the Bosphorus, for it would need a nautical understanding to do them justice.

The unusually picturesque appearance of the boatman, where all are more or less picturesque, decided us in our choice of boat for our journey across—a journey some half-hour long. Being sure of a strong, brave stream to hold back her enemies and guard her interests, Asia draws almost within voice range of Europe at this point, and certainly within easy beauty range for the whole length of the Bosphorus. And who has ever been this way since the days of Orpheus, of Jason, of Darius, who has not played or sung or spoken its praises!

To take a rowboat without animated bargaining or without some reference to backsheesh would be considered hardly justifiable or proper in anyone able to command a few words of the Turkish language. One learns to look upon it as a pleasing incident, just as bargaining at the bazaars in Stamboul adds, when all is said and done, to the pleasure and pride in the object purchased. Our boatman, or *caiqueji*, as such are called in this part of the world, was not unduly rash in his demands, and he looked the picture that that lovely morning background demanded. A Georgian he was, recently come from Trebizond, he informed us, and with knowledge of the sea and of mankind. This latter fact was shown by his interpreting our unspoken wishes and heading up the Bosphorus instead of directly across to Scutari, as he might have done. Black mus-

tachios had he, and blacker eyes; a silver amulet was on his right arm and a medal on his breast; he wore a broad silver belt, of exquisite workmanship, holding various weapons whose handles shone with the polish that use and affection had given them. His costume was of some green stuff, showing here and there bits of gold—a woman's handiwork—and the *bashlik* of the same material bound about his head made him look like one of the Persian warriors on the sculptured battle scene of the wonderful so-called Alexander Sarcophagus, now in the museum at Stamboul. The war that has called many men here from the distant parts of the Empire has renewed the picturesqueness of dress to be seen in the streets and elsewhere, often leaving the impression of another age and race. Primitive man likes adornment, and this he can have in most parts of Asia without interfering with his ordinary usefulness. At any rate, our boatman rowed his boat just as skilfully, and put up a white sail just as handily, as if he had been an unpicturesque boatman on the Thames. I also intercepted a smile of compassion and understanding he bestowed upon my companion when I leaned rather anxiously to one side at what seemed to me the rather perilous leaning of the boat towards the other.

And how beautiful the Bosphorus was in that clear and unstained light—how beautiful it always is! Palace and garden-girt, and white with many a sail; a waterway of homes, of history, of tragedy, of romance, of gently wooded slopes where nightingales sing, of great patches of the crimson of Judas trees in May and luxuriant then also with the mauve of the blossoming wistaria—a bloom that floods the little villages along the shore with its fragrance, and that furnishes many a little café with its delicious shade. On this summer day in winter one did not miss the flowers, so green were the hillsides, so full of colour was the distance, so blue the water beneath our boat. A muezzin came out and called to prayer from his minaret among the cypresses. There was no note out of tune. Then our boatman changed his course, and we floated down the stream and close to the Asiatic shore. From here we looked across toward Stamboul, and saw at anchor in the harbour representative warships of nearly all the fighting Powers of Europe. We knew why they were there, and some of their flags were dear to us, but it was somewhat of a rude summons back to the present to see them that morning. No smoke was coming from their funnels to cloud the view of the city beyond, on its Seven Hills, with Santa Sophia in the foreground, reminding one of a great past and also of the recent sad history of seven hundred men dying from cholera beneath its noble dome.

At intervals during all these months of war great transports have come bringing troops from the interior by way of the southern Black Sea ports. Often they have passed through the strait at night, the sleeping population of the Bosphorus being wakened by the cheers of the men as they rounded the point where Mohammed the Conqueror built his imposing towers and fortifications at the time of the taking of Constantinople. At this point also the soldiers caught their first glimpse of the city they were come to defend. More recent transports brought several thousands of Kurds, with their sturdy little horses, well-fitted to stand the strain of hungry life and hardship at the front. We saw many of these Kurds when we landed at Scutari where they had been stationed temporarily, but were now preparing to re-embark for the seat of war. They looked very businesslike, though not always pleasantly so. There was not a man among them who could not "swear by his beard"—in most instances, by a very black, luxuriant, and untrimmed one. They were not yet in Turkish uniform, but in the dress of Kurdistan, which deepened, perhaps, the impression of wild, mountain valour, of physical force, not to say fierceness.

And this Scutari, where our boatman was finally pleased to permit us to land, is a town thoroughly Asiatic in character, and might be miles away in the interior, for all the influence it shows of Europe, that has been so long its near neighbour. Its vast cemetery is not uncheerful, for the living use it in summer as a favourite meeting-place, the cypresses lending welcome shade. The heights behind Scutari command one of the most beautiful views in the world; from here the Bosphorus can be traced nearly all its classic length, from here Constantinople, with all her surrounding charm, lies outspread—the city which is the desire, and has sometimes been the despair, of nations.

THE PRESS ON THE NEAR EAST.

The Bronze Bride of Austria.

The manner in which Austria is being done to death by her more powerful ally is dealt with in the *Morning Post* (December 20). The writer compares Austria with the Bridegroom of Prosper Merimée's ghastly story of "La Venus d'Ille"; Germany with the brazen bride who encompasses his death. The Kaiser's recent visit to Vienna and the consequent changes in the Austrian Ministry are quoted as proof that Austria is gradually being forced to the abandonment of her individual will; Hungary, it seems likely, is being hurried on to the same fate.

But Austria's position is for the present more unhappy because she can be deceived by no promises and beguiled by no illusions. . . . She has for centuries enjoyed a snug monopoly of Balkan commerce. The Austrian merchant and manufacturer had a secure and well-recognised place in Balkan trade. Further, Austria was strong throughout the Levant and Turkey. Germany has long coveted that Austrian monopoly in felt which made the Turk indebted to Austria for his fez and his harem for their slippers. . . . Austria had a preferential position on the railway system of the Balkans, that railway system which has now been seized, not by Austria, but by Germany. The Austrian merchant was secure in this monopoly as long as the Austrian tariff and the Austrian Army stood like a wall and a hedge between Germany and the Balkans. But now that wall and hedge are both broken down, now that Austria is consenting to an Austro-German fiscal union and German soldiers are guarding the railway that runs through the Balkans to Constantinople; now that these things have happened, or are about to happen, Austria can no longer expect to enjoy either her monopoly or her preferential position. Austria will now have to use the Balkan railways on the terms imposed by Germany, and German commerce will compete with Austrian on more than equal terms in the Balkans, the Levant, and Turkey.

The article goes on to explain that Austria was induced to invest considerable sums in the Baghdad Railway, and that she took this course feeling that "her use of and profit from that railway was assured by her privileged position as the connecting link in the Balkans."

Now that the control of that link has passed into German hands Austria's security disappears. Austria will be given, no doubt, a little corner in the waggon on Mondays and Thursdays, if it is not too full of German goods, and on condition that Austria behaves herself. Such is to be the position.

It is pointed out that if Austria gives up her independent fiscal system she gives up not only her present independence, but her power to regain it. Even now it is difficult to see how she can successfully struggle against German pressure "without the help of some outside friend."

The Greek Attitude.

In an attempt to make comprehensible the Greek attitude during the recent crisis, Captain H. M. Johnstone, R.E., has included in his "War Notes," contributed to the *United Services Magazine* (December), the translation of an article from the pen of M. Gustave Fougères, director of the French School at Athens, which originally appeared in *Le Matin*. M. Fougères shows that Athenian opinion was at first all in favour of the Allies. As time went on, however, and the effect of the victory of the Marne began to wear away, discordant voices were heard, and doubts arose.

On these doubts the German Press, skilful at drugging, grafted its sensational *communiqués* and its insinuations; party rivalries and the inextricable disorder of Greek politics in its relation to the war succeeded in upsetting public opinion.

It was not, thinks this writer, only the military supremacy of the Allies that inspired doubts—Bulgaria and the possibility of having to cede to her territory as the price of her friendship was at the root of all hesitancy. M. Venizelos was "not spared" because he had even faced the possibility of "the cession" of Kavalla.

Although, when he made his specific statement in official form, the project offered to Greece large compensations in Asia Minor, Greece, as the phrase went, did not wish to know anything about it. The hypothetical gift that was being presented to her told her nothing she reckoned of value, she saw nothing but the immediate and definite loss which the loss of Cavalla would inflict upon her, her economic treasure and strategic barrier in the part of Macedonia which she had annexed. Germany profited by this confusion to promise Greece her territorial integrity. It was a playing on her winnings, and she won moral benefit from it, in spite of the contradictions in which her diplomacy plunged her of irreconcilable promises to the two parties, Greece and Bulgaria. It is comprehensible that from that time the Entente had not a chance, until at last the situation was cleared up by the recent Bulgarian crime.

Digitized by Google

M. Fougères considers that the present hesitation of Greece to be in a large measure due to an "unjust mistrust in her own power." If confidence is to be given to the country it will come to her as the result of "persuasive example," not through the offering of bribes.

The Bulgarian.

Writing in a recent number of the *Saturday Review*, Mr. David H. Low affirms that before the war Englishmen had become accustomed to gaze at Serbia and the Serbians through German spectacles. It was Germany's plan to make the world think ill of Serbia, that her ultimate crushing might be condoned.

But the Germans were not alone to blame for the scales that dimmed our eyesight. In London there existed, and, perhaps, still exists, an organisation misnamed the "Balkan Committee." At its head were distinguished politicians and public men: its one object appeared to be the furtherance of Bulgarian ambitions, and its mischievous activities gave just cause of offence to both Serbia and Greece.

The article concludes with the following reference to the opinions held in certain quarters, that in adverse conditions Bulgaria may go so far as to change sides during the war.

We trust that if any such proposal were made we should spurn it from us in loathing and scorn. Let us have no dealings with the accursed thing. Already there are many indications that Bulgaria has abandoned her claim to Albania and is prepared to adopt an attitude calculated to save her own skin in the possible event of the victory of the Entente, and in Greece, as we have seen, the fear prevails that our statesmen are only too likely to be hoodwinked and cajoled once more.

We are not too high and mighty to be above learning a lesson from distracted Greece, and if, when the day of reckoning comes, we incline our ear to the honied tongue of Ferdinand of Bulgaria, if we hearken to the lying voice of this whited sepulchre, then upon our heads be the blood of those countless men and women and children whose homeless bodies lie where they fell: by the roadside or in the cold mountains of desolate Serbia.

Anzac and Suvla.

The withdrawal of our troops from Anzac and Suvla has been dealt with in leading articles by practically all the daily newspapers in the United Kingdom, which unite in paying tribute to the bravery and devotion of the troops concerned. The *Morning Post* (December 21) says:—

The troops concerned are, of course, the Australians, New Zealanders, and, what seems unaccountably to have been overlooked, a battalion of Newfoundlanders. These regiments have earned in Gallipoli a reputation as fighting men second to none in the world. The storming of the hills about Anzac and Suvla Bay, the desperate valour of the subsequent attacks, will shine for ever in British history besides the most splendid achievements of British soldiers.

In so far as officers and men are concerned, they may rest assured that no such deeds are done in vain, and that their comrades whose bones are left in the peninsula have won undying honour.

This paper hopes that the Government may make a statement covering the whole subject, and concludes:—

The account of the matter presented to the House of Commons by the ex-First Lord of the Admiralty explained nothing, and confused everything. The Prime Minister accepted, as, indeed, he was bound to accept, full responsibility for the whole business. What the country desires to know is whether the same methods, for which the Prime Minister assumed responsibility, are still in operation.

The *Daily Telegraph* (December 21), after dealing with the brilliance of the withdrawal, says:—

We shall not attempt to go behind the Government's announcement in search of reasons for the retention of the force occupying the extremity of the Peninsula, while the Suvla-Anzac zone is evacuated. If the partial retention of our hold on Gallipoli is meant to continue, it is presumably so decided in accordance with Lord Kitchener's report after his personal survey of the strategic field in the Eastern Mediterranean. Unmilitary public opinion would unquestionably rather see the whole Dardanelles Expedition abandoned at one blow if there is to be abandonment at all. It has been taught, rightly or wrongly, to regard the holding of the Suvla-Anzac position as essential to the scheme of operations. It can face the failure of that scheme unmoved; but if it were led to think that our troops and the French were clinging on before Achi Baba simply for the sake of appearances, there would be bitter and universal indignation. The country, however, will leap to no such conclusion. It realises that there are considerations of which it knows nothing. It knows, and it is glad to know, that a strong decision has been taken, upon the best advice available, and has been carried into effect: it is definitely told, furthermore, that "by this contraction of front operations at other points of the line will be more effectively carried out," and it awaits the fulfilment of that assurance.

The *Manchester Guardian* discusses the alternating hopes and disappointments of the campaign, and calls for an official statement:—

This moment of triumph and the disappointment which followed has still to be described in official despatches. Their publication cannot now be long delayed, and now that our evacuation has been successfully accomplished there is no longer any excuse for withholding the whole truth. But even on our present knowledge there is no doubt that this was one of the supreme moments of the war, and Mr. Asquith has himself told us how bitterly disappointed he was when its hopes were frustrated. We wish that he had been equally candid yesterday when he announced what, although it was a retirement and not an advance, we are justified in regarding as one of the great successes of the war. From beginning to end the casualties at Anzac and Suvla can hardly have fallen short of 100,000. That debt is not discharged by a beggarly hundred words—barely a word to every thousand casualties. It still remains to be paid.

This paper is emphatically of the opinion that "it is due to those who have fought so well that all mistakes and failures should be relentlessly exposed. The article concludes:—

Much as we have to regret in the events of the last three months in the Balkans, we should have had much more to regret had Germany and Bulgaria conspired to annihilate Serbia and her Allies never raised a finger to help her. It is better to have tried and failed than never to have tried at all, and we believe that future events will fully justify, even from the strictly military point of view, those who insisted that Serbia should not be abandoned to her fate. The occupation of Salonika has, it is true, cost us much. It is possible, though not certain, that but for it we might have been able to hold Anzac, if not Suvla, through the winter. Still, if we have abandoned some ground won by our best blood, it has been generously abandoned to the cause of Allies who have suffered even more than we. And in abandoning it we have won a military victory comparable for its brilliance even with that first landing on the Gallipoli Peninsula, which many people now recognise for what it was—perhaps the supreme exploit of British infantry in the whole of its history.

America on Gallipoli.

The *Morning Post* (December 22) publishes extracts from several American papers on the Gallipoli withdrawal, which it has received from its own correspondent, and from which we quote below. The *Washington Times* compares our action with that of Germany in the West:—

The Allies, in abandoning the campaign, are doing precisely what the Germans did when they withdrew great forces from their Western front last spring and hurled them against Russia. The Germans had failed in their drive against Paris as the Allies have failed in their effort to break through the Dardanelles. They had failed to reach Calais as the Allies had failed to save Serbia.

It admits the abandonment of the campaign shows a failure, but holds that it is far less serious than the German failure at the Marne.

The *New York World* considers that the campaign has been muddled right through, and thinks that had we followed the "Goeben" and "Breslau" at once Turkey would probably have been prevented from entering the war:—

The attack on the Straits was a permissible naval gamble, "but the military blundering which robbed valour as great as was ever shown under any flag of its fruits of Sedd-el-Bahr and Suvla Bay, when in both cases decisive advances were sacrificed for lack of timely support, was akin to that which wrecked the drives at Neuve Chapelle and at Lens."

The *New York Evening Post* also compares the situation with that of the Marne, and regards both as an attempt to win the war by a simple great stroke.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Roumania and Danube Shipping. Dec. 16.

Lord R. CECIL, in reply to another question put by Sir E. CORNWALL, said: All river tugs and the greater number of lighters in Roumania have been requisitioned by the Roumanian Government, though certain formalities have still to be completed. Vessels requisitioned are, however, allowed to ply between Roumanian ports with a military guard on board to control their movements. The measure does not apply to sea-going vessels. There are no British tugs and only a few British lighters on the Danube. These, seeing that they may still, under the condition already stated, ply between Roumanian ports, are hardly affected by the requisition, as they could not, of course, in any case proceed to enemy ports.

Refugees from Serbia. Dec 20.

Lord R. CECIL, answering Mr. Alden, said that Sir Ralph Paget, who was acting for his Majesty's Government in the matter, had succeeded in collecting the members of the British units who escaped from Serbia at San Giovanni di Medua, whence it was hoped to transport them to Italy. He hoped that transport would be provided very shortly, and until then Sir R. Paget might be trusted to do all that was possible for the safety and comfort of the units under his charge.

Mr. ALDEN a little later asked whether the Under Secretary for Foreign Affairs had any fresh information with regard to the numbers and situation of the Serbian refugees in Albania; and whether he could state what action, official or unofficial, had been taken by the United States to supply them with food and clothing.

Lord R. CECIL: Recent reports indicate that there are about 10,000 refugees in or near Scutari, about half of whom are Montenegrins. I am not aware that any action has yet been taken in the United States in connection with this matter.

The Allies at Salonika.

Sir ARTHUR MARKHAM referred to Lord Lansdowne's statement that it was at the instance of the Greek Prime Minister that his Majesty's Government sent troops to Serbia viâ Salonika, and asked whether the Under Secretary for Foreign Affairs was aware that M. Venizelos, on October 23, in the Greek Chamber, stated that the official correspondence concerning the disembarkation of the Anglo-French troops at Salonika proved that such disembarkation had no connection with the question previously asked by the Greek Government of the Powers, whether they were prepared to send 150,000 men to co-operate with the Greek army against the Bulgarians. Was the Under Secretary aware that this official correspondence was read to the Greek Chamber; and would he see that it was laid upon the table, so that this House might have the same information as the Greek Chamber?

Lord R. CECIL: I have seen a report of the proceedings in the Greek Chamber on October 23, from which it appears that M. Venizelos did make a statement to the effect mentioned in the first part of the question, and referred to a previous occasion on which he had read from the official correspondence on the subject. What actually was read does not appear, and has not been, as far as I know, published. I am afraid that in the present position of affairs it would be impossible to lay papers on the table which would give a complete account of those transactions, and an incomplete account would be misleading.

Our Casualties in Serbia.

Mr. KING asked the Under Secretary for War what were the number of casualties, up to the latest date available, resulting from the operations in Serbia and for the Salonika Expedition.

Mr. TENNANT: Up to December 11 the casualties resulting from the operations in question amounted to 32 officers and 1,246 other ranks, of whom only one officer and 85 other ranks were killed.

The Suez Canal.

Lord R. CECIL, replying to Mr. Alden, said that he was informed that certain vessels of the Rotterdam Lloyd Line were proceeding in future viâ the Cape. The remainder would proceed viâ the Suez Canal as usual. The reason for this change of route was said to be the alleged uncertainty as to the amount of coal for bunkering at Port Said.

Casualties at Kut-el-Amarah.

Sir E. CORNWALL asked whether the Secretary for India could give the number of casualties sustained by General Townshend's force in the fighting which had taken place since its return to Kut-el-Amarah; whether Sir John Nixon was still at the front; and what was the latest information he has received from Mesopotamia.

Mr. AUSTEN CHAMBERLAIN said the total casualties of all ranks up to December 18 was 1,127. These included 200 deaths, of which forty-nine were from disease. Sir John Nixon was in chief command of the forces in Mesopotamia, but he was not now actually at Kut.

The Dardanelles Operations. Dec. 21.

Sir E. CORNWALL asked the Prime Minister whether General Sir Ian Hamilton returned from the Dardanelles to make a full report to the Government on the situation on the Gallipoli Peninsula; whether he was now about to return to the command in the Near East; and, if not, what other duties would be assigned to him.

Mr. ASQUITH: The answer to the first part of the question is Yes; to the second part No. If any other duties are assigned to Sir Ian Hamilton an announcement will be made in due course.

Mr. ASQUITH, in introducing the Army Vote for an additional 1,000,000 men, referred to our retirement from the advanced positions so long held at Suvla and Anzac—"a retirement," he pointed out, "which does not involve any similar operation at Helles, where our joint naval and military forces command the entrance to the Straits." That step had been taken by the Government on the combined judgment of our military and naval advisers, and after all the positions had been examined by General Monro and Lord Kitchener. It has been carried out by the Navy and the Army in combination in a manner to which no praise can be high enough, and which I believe will give it an enduring place in the annals of warfare. With the exception of a relatively small quantity of stores and a very few guns—six guns—which had to be left behind and which were destroyed, the whole force at both these places, with its full equipment, was removed with perfect security. The total casualties—it seems almost incredible, but it is a fact—during the whole operation were two military and one naval wounded. I do not believe there is anything comparable to it. I am sure the House will join with the Government in taking the earliest opportunity of expressing their admiration and gratitude to General Monro for the whole of this difficult operation, and, as he is careful to point out, to the officers, to whom he gives special praise—General Birdwood, who will always be associated with Anzac, and Admiral Wemyss, who supervised the naval operations.

Mr. J. REDMOND said that every member of the House had learnt with the deepest sense of thankfulness that the difficult withdrawal of our troops from a portion of Gallipoli had been successfully carried through. The prospects of the withdrawal had been to some of those who knew the state of affairs something like a nightmare. Up to this moment they had not had a detailed despatch from General Sir Ian Hamilton as to what occurred at Suvla Bay. He thought that was something of a scandal.

Sir E. CARSON also thought it was a scandal that while three months had elapsed since the landing at Suvla Bay we had, save for a telegram or two, had no word of these operations. Great hopes had been held out regarding the Gallipoli Peninsula; these hopes had been falsified. The time will come when the miscalculations will have to be gone into, and we shall have to know who is accountable for them. What I am protesting about at the present moment (he continued) is this: In the month of August you had your last operations in Gallipoli, and from that day until this we have not heard a single word about what has been happening there, and now we find it is held up to the nation as if it were a kind of victory that we have successfully abandoned two of the fronts in Gallipoli. No one joins with greater joy than I do at the successful operations so bravely carried out by our Army and by our Navy. We may well send congratulations to all who were engaged in such an operation. But what the country would like to know is, if we were doing nothing in August, September, and October, and on up till December 20, why were these men left in a kind of hell there. As far back as August it was the business of those who have charge of these matters to make up their minds, first, what would be the force necessary to drive through, and then, if you had that force, to use it, and if not, not to keep on with an operation which has cost us disaster, death, illness, and discomfort beyond all description. The abandonment of Anzac and Suvla has been a glorious page in the history of this country; but from August till now the hesitancy, the doubts, the failing to make up your mind has been a blot upon the management of this war which it will be difficult to obliterate.

Mr. TENNANT said that Sir E. Carson, in the indictment he brought against the Government with regard to the Dardanelles, seemed to forget that operations were not determinable beforehand. Our splendid troops made every conceivable effort to carry out tremendously difficult operations, and although they were not successful there was always a hope that the operations would be triumphant. To say that thirty or forty thousand men were doing nothing when they were holding up a hundred thousand or more Turks was not a truthful representation of the facts.

The Suvla Bay Landing. Dec. 22.

In the course of the renewed debate on the vote for an additional 1,000,000 men, Captain AMERY said that the Prime Minister spoke of the withdrawal from Suvla and Anzac almost as if it had been the climax of a great and successful campaign. All of them admired the way in which the operations were conducted, but it made them feel more than ever that the fault was not with the men nor the Staff at the front, but that it lay with those at home. If those men could be moved so successfully and so rapidly to some other destination, why could they not have been moved at the end of September to help Serbia? This withdrawal ought to have been made sooner, when it would have been of inestimable benefit to the whole conduct of the war, and might have strengthened the forces at our disposal in Serbia, and possibly, in that case, the Greek and Roumanian Armies might have come in with us. It was only one more illustration of the habit, which had become ineradicable with the present Government, of always putting off an important decision until it was too late.

Sir H. Bax-Ironside.

Lord R. CECIL replied in the negative to a question, put by Sir RICHARD COOPER, asking whether Sir Henry Bax-Ironside made a request to the Foreign Office about April last that he should be recalled from Sofia because the Foreign Office did not accept the information he tendered with respect to Bulgaria.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

"The most extraordinary thing," says the *Morning Post*, referring to the recent debate in both Houses of Parliament on the Trading with the Enemy Bill, "is that it seems to be generally assumed that the Government is on the side of the German trader." Or, as Sir Arthur Markham exclaimed: "I cannot for the life of me understand why the Government have had this tenderness all through the war for the German alien enemy." Elsewhere I read that the German Government has placed "under compulsory administration undertakings whose capital belongs wholly or mainly to British subjects, and the Administrator has discretionary powers either to carry on or liquidate or dissolve the business." How does our attitude compare with this? "The powers conferred (by the Board of Trade on the supervisors of enemy concerns established in this country) are so carefully limited as to be almost useless, and in some cases the supervisors are even cautioned against any interference with the business of the German who is to be supervised."

***

The above quotations, it may be argued, bear small relation to Near Eastern questions. I beg to differ. Last week I discussed at some length the status of enemy (and enemy-neutral) companies in Egypt, and I now ask: Does not, perchance, an echo of our own Government's apparently benevolent attitude towards enemy trade reach the banks of the Nile, where the Deutsch Baumwollpresse A.G., an enemy concern, supplies fodder to the British Army, and where enemy concerns openly and unblushingly elect German directors and seat them in triumph on the board? There, surely, must be some connection between the Thames and the Nile, between our benevolent consideration for the enemy trader and that shown by the Egyptian Government for the same oily, greasy individual.

***

Then as to the matter of sequestration. I urged on the authorities the adoption of an energetic policy, namely, the sequestration, liquidation, or compulsory winding-up of all enemy concerns, such as the Deutsche Orient Bank, Deutsche Hypotheken Bank, etc., against which it could be proved that prior to the war they had sought to, or succeeded in, undermining our authority in Egypt, or had been guilty of engineering an anti-British propaganda (i.e., bribery), to our detriment, and consequently to that of Egypt. In view, therefore, of the "discretionary powers" bestowed by German law on the "administrators" of British companies established in Germany, I again maintain and with greater reason that short shift should now be made of those enemy concerns in Egypt, the very names of which are intensely maladorous. As for supplying the British Army with provender, etc., it is unthinkable that they should be allowed to do so, but I would even go a step farther, and say that *no* alien firm, unless owing allegiance to one of the Allied Powers, or distinctly friendly, should be allowed to purvey to our Army. Whether the powers that be take this common-sense view of the matter, remains to be seen, but I should like to point out that feeling in the British colony in Egypt is being bitterly roused by the favours bestowed on enemy, and unfriendly neutral, concerns by those who watch over our destinies in the Valley of the Nile. At any rate, the sooner Egypt is swept clean of its Deutsch "this" and Deutsch "that," the better, and I, for one, shall certainly watch the cleansing process with undisguised interest.

***

The article on the Baghdad railway, which is reproduced elsewhere, gives us a somewhat cursory review of progress on the line. The first section from Haidar Pasha to Aleppo is now almost completed, and the tunnel through the Taurus has been pierced, but certain stretches have still to be completed. The coal question seems to have been satisfactorily settled—an assertion which I am inclined to doubt—and the "Prussian" rolling stock is stated to be adequate. All of which makes a very pretty picture—on paper. Incidentally the writer of the article states that the Turkish Government, at "German" instigation, contemplates the construction of new railways in Central and North-Eastern Asia Minor. These would seem to be a line from Angora to Sivas, a second from the Taurus to Sivas, a third from Sivas to Samsun, a fourth from Sivas to Erzerum, and a fifth from Erzerum to Trebizond. These, it appears, are projects only, but for the Germans to claim the initiative as regards their construction is grossly inaccurate, as they have one and all, with the possible exception of the Taurus-Sivas line, been projected and partly surveyed by the French years ago. In some cases even the concessions for constructing and exploiting the suggested lines have been granted to French companies, so that the German claim to initiative is, like so many of their claims, utterly devoid of foundation

***

Herr Dernburg, the late successful (*sic*) German propaganda agent in the United States, has now proceeded to Vienna, where he is lecturing the Hun-ridden Austrians on the future greatness of the Central Powers. Strange to say, he does not regret the loss of German sea power, and this comes all the more strangely from him considering that he was at one time Colonial Minister, and must realise that without sea power there can be no oversea colonies. Apparently, however, Herr Dernburg has wisely given up all idea of colonies and sea power, and prefers to dilate on the magnificent future Continental position of the Central Powers. They will not enjoy sea transport, but they will "develop the Central European canal system, and improve waterways which are not navigable. In this way (adds the optimistic orator) the Teutons can to a considerable extent obtain the advantages which belong to sea transport." There is nothing like self-contentedness in the presence of defeat.

***

The Khedivial Mail meeting on Monday was a great success for the Board, and I heartily congratulate them on the way they have conducted the company's interests during the past year of trials and tribulations. The references made by the directors and shareholders to the valuable services of Mr. Charles Holland were well timed, and the subsequent proposal for a monetary mark of gratitude as a reward for his strenuous work was, I am glad to see, passed unanimously. Mr. Branch, the capable secretary, was likewise the recipient of special expressions of well-deserved praise. The meeting is fully reported on another page.

***

One of the most interesting meetings during the past week was that of the Sudan Plantations Syndicate, held on Tuesday, and at which the chairman emphasised the marked improvement, without increased expenditure, in the cotton yield for 1914-15. Unfortunately, the low price of cotton reduced profits considerably, but, nevertheless, the directors were able to propose a dividend of 5 per cent. This, being the first of its kind, augurs well for the future.

***

The company has now three cotton-growing stations in the Sudan, of which Barakat, in the Gezira, has only recently been opened, and is of peculiar importance because it stands in close relationship to the great Sudan irrigation project of the plateau between the Blue and White Niles. Referring to this promising station, the chairman of the syndicate said: "In January, 1914, it was agreed between the Sudan Government and our syndicate that a new station in the Gezira would be very useful in training the natives and our staff on more extensive lines than could be done at the original station at Tayiba, the object being that, on the arrival of irrigation water from the Blue Nile barrage, development on a large scale could at once be undertaken. The conditions on which Barakat station is run are similar to those at Tayiba and also to those proposed for the Gezira scheme—that is to say, on a partnership basis, the natives getting 40 per cent. of the proceeds from the land, the Government 35 per cent., and your syndicate 25 per cent. At Barakat, however, your syndicate receives the 35 per cent. Government share, plus their own 25 per cent., in consideration of our erecting the necessary pumping installation for the supply of irrigation. On the other hand, I must repeat that the Barakat station, as a training ground for the contemplated bigger operations in the Gezira, is of inestimable value to both the Government and ourselves."

***

The *Morning Post's* Berne correspondent reports that the Turkish Chamber has ratified agreements concerning advances, stated to be in gold, made by Austria and Germany in May and April last respectively, and amounting to 47,250,000 kronen (nearly £2,000,000) and 80,000,000 marks (£4,000,000) respectively, which have been paid, it is said, into the Treasury of the Ottoman Government Debt. On the strength of this alleged gold the Turkish Government has issued Treasury notes, with forced legal currency throughout Turkey, to the value of over six and a-half million Turkish pounds (over £5,909,000). The notes are said to be repayable in Constantinople six months after the end of the war. The correspondent adds that he has been assured on the best authority that no such large amount of gold has ever been paid into the coffers of the management of the Ottoman National Debt by Germany or Austria—an assertion with which I have no intention of quarrelling.

Economic Situation in Egypt.

Lecture at the Sultanieh Society of Political Economy

(From Our Own Correspondent.)

Cairo, December 4.

So much has from time to time been written and said about the effect of the present war on Egypt that particular interest attaches to the paper on the subject presented at the last meeting of the Sultanieh Society of Political Economy by Dr. Alfred Eid, the managing director of the Caisse Hypothécaire d'Egypte.

The lecturer commenced by pointing out what excellent prospects of a considerable improvement in the situation existed just before the war broke out, and went on to state that, in spite of the measures taken by the Government last autumn, the cotton crop realised 15¾ millions less than that of an average year. Egypt's trade during the first six months of the war showed a diminution of from 55 to 60 per cent. by comparison with the normal, and even later the exports showed a decrease of 14 per cent., and the imports of 40 per cent. This retrograde step, according to him, is due not only to the stopping of all trade with enemy countries, and to the restriction imposed on commerce with neutrals, but also and especially to the diminution in purchasing power suffered by Egypt as a result of the losses incurred on the cotton crop and the stoppage of credit in Europe.

Government Economy.

With regard to the steps taken by the Government to balance its Budget, he remarked that, while the stoppage of new works, which was the chief direction in which economies were effected, may have been necessary, this action was none the less regrettable, as the works in question were just those which materially affected the development of the resources of the country. These economies, which amounted to £E1,254,000 on the previous Budget of £E1,787,000 would, if maintained, have very serious effects on the progress of the country. As to the loan which will be necessary, Dr. Eid was inclined to agree with the Financial Adviser, that at no time during the past two years had the money market been so unfavourable for such an object, and he considered that, even if conditions improved, it would remain to be seen whether the country, with its reduced resources, could meet as easily as in the past this addition to its foreign debt. Turning to the question of the monetary circulation, the speaker pointed out that Egypt has no cash reserve *qud* reserve, and that an increase in bank-note circulation, such as took place last autumn, when the amount in circulation rose from two to eight million, is always very dangerous unless closely controlled and an adequate security is accumulated by the bank concerned. He paid a warm tribute to the Government, which had succeeded in solving the circulation problem most satisfactorily without depreciating the note issue or causing abnormal fluctuations in the exchange.

The Agricultural Position.

Dr. Eid next turned to the agricultural situation, which he affirmed is far from brilliant, as various factors had tended to aggravate the effects of the decrease in cotton values—viz., the forced collection of the taxes during the early part of the war, the restriction of the cotton area, and especially the old debts of the fellaheen. With regard to the restriction of the cotton area, he pointed out that experts had long clamoured for some such measure, but that the moment chosen for this restriction was inopportune, since it was imposed just when the cultivators required all their resources to enable them to make good the deficit due to the previous short crop.

Reverting to the harm done by the suspension of the new works, the lecturer stated that the results obtained by the first drainage works had been beyond all expectation and had given the total execution of the vast scheme, due to the initiative of Lord Kitchener, the aspect of a veritable renaissance of Egyptian agriculture. Whilst he bowed to the budgetary consideration which dictated this suspension, he expressed the opinion that it constitutes more than a serious delay to the agricultural development of the country, for the land which will not be drained in time will have a decreased yield, and that which may have to wait too long for proper irrigation will either have to be abandoned or will no longer be able to yield remunerative crops.

Land Values.

Dr. Eid considers that the agricultural situation will have its repercussion on the position of the mortgage banks and on land values. He declared that the arrears due to the five leading mortgage institutions had increased by 50 per cent. between March 31, 1914, and March 31, 1915, though fortunately since that date the rise in cotton prices had appreciably improved the collections. With regard to land values, the lecturer declared that in addition to the diminution in the saleable value there was also the decrease in the intrinsic value of the land, which in his eyes was a far more serious matter. The fertility of the soil of Egypt, he said, is world renowned, but that fertility is in reality the result of a daily fight against the factors which, especially in Egypt, threaten the land. The Egyptian fellah is a sober and industrious worker under normal conditions, but he is easily discouraged, and is inclined to relinquish his efforts as soon as he sees that he is about to lose his land. As a result, says Dr. Eid, most of the land expropriated is found to have been terribly neglected. This double diminution is already making itself felt, and, according to him, experts estimate that good land fully developed has lost from 25 to 30 per cent. of its value as compared with the prices in force in 1910 and 1911, and that that loss rises to 60 per cent. in the case of lands in course of improvement which have been neglected by their owners. If these prices are maintained, which he considers quite likely, the result will be the putting back of the country by fifteen years.

In conclusion, Dr. Eid pointed out that a very marked rise had taken place in the price of agricultural products and had tended to awaken an optimistic spirit, but that this rise was due to special circumstances on which one must not rely in the future. As regards the rise in cotton prices, it will be counterbalanced by the reduction in the quantity. Even admitting, however, that during the current year the cotton pests do not commit more ravages than in previous years, and that we can count on the same revenue as in 1912 and 1913, it will not meet the deficit of 1914, for the simple reason that in those years the revenue was scarcely sufficient to balance the accounts. The crisis due to the war was particularly arduous, because it came whilst the country was still in a stage of transformation, and had scarcely recovered from a previous long crisis. One factor is consoling, and that is that the cause of the present crisis is external. Excepting as regards the cotton diseases the productive forces of the country are quite untouched; but there is still a lot to be done to maintain and develop them. Between 1900 and 1914 a good deal of work was done, but all the efforts were concentrated on irrigation and improvement of the land, the while the economical organisation of the country was entirely neglected. Credit organisation is still most primitive. Beyond the mortgage banks, there exists only the village usurer. Even in the large towns the banking system is very inadequate. The cultivators, big and small, have no technical knowledge, and experiments, etc., are left to private initiative. The small cultivators especially are badly equipped, and no co-operative organisation exists to help them progress from their old situation to that required by modern conditions. The lecturer paid homage to the Sultan, whose interest in agriculture and in the lot of the smaller fellaheen is so well known, and to the Ministry of Agriculture, which has assisted considerably since its creation four years ago. But everyone, public authorities and individuals, will have to collaborate if the task of regeneration of economic development is to succeed; and this success will only be assured if strict economy, enforced in public and private finances, enables the diminished resources of the country to balance its daily increasing obligations. Once this economy and this reorganisation are effected the recovery of the country will be assured; but the process will be long if it has to rely on itself. To accelerate that recovery it will be necessary that the European money market undergoes a radical improvement, so as to permit of Egypt finding in abundance and cheaply the funds which she needs.

An Optimistic View.

At the conclusion of this paper Dr. I. G. Levi, Secretary of the Society and Inspector of the Egyptian Department of Statistics, addressed the audience and declared that he absolutely disagreed with the views expressed by Dr. Eid. His remarks are of particular interest, and I will summarise them as carefully as I can.

Dr. Levi agreed that the drop in cotton prices due to the war had caused the cultivators considerable loss, but he disputed the valuation thereof made by Dr. Eid, who set the loss on the 1914 crop at £E17,500,000. Dr. Levi said that one should never, in dealing with agricultural statistics, compare the yield of one year with another; a comparison is always made with the mean of at least the previous ten years. If one were to proceed according to this recognised rule, one would find that the mean cotton crop is 6,800,000 cantars and not 7,500,000, as Dr. Eid took it, and that its mean value was £E28,500,000. Dr. Levi values the 1914 crop at £E19,700,000, so that the loss of the agricultural element was only £E8,800,000. This is taking it for granted that all the cultivators disposed of their holdings at 1914 prices, which is scarcely probable, seeing that we know that there exists either in the provinces or in Alexandria a stock of 1,300,000 cantars from the last year's crop.

With regard to Dr. Eid's assertion that the loss will never be made up by the agricultural masses, Dr. Levi declared that there existed data to prove the contrary; that, in fact, a large part of that loss had already been compensated. According to the official wholesale prices in Egypt during the last four months the seven principal crops can be valued in the aggregate at £E55,000,000 as against £E47,000,000 in 1914. This gives an excess in value of £E8,000,000 in favour of the current year, and leaves out of account the other products, which have similarly benefited by a rise in prices. Even comparing prices over a period of four years for cereals and ten years for cotton, an excess in value of £E2,000,000 will still be found.

Favourable Factors.

In further confirmation of this conclusion, Dr. Levi mentions other factors, viz., the area under cultivation, the yields, the payment of taxes, and the repayment of mortgage debts. With regard to the first factor, compared with the preceding year the area under cultivation during 1914-15 showed an increase of about 500,000 feddans in spite of the reduction of 570,000 feddans in the cotton area. This increase, he said, is incompatible with the discouragement of the agricultural classes of which the lecturer spoke or with complete absence of resources, seeing that all credit has been stopped. As regards the yields, except in the case of beans and maize, they have been above those of 1914, whilst the State receipts at September 30 last showed an increase of £E500,000 in land tax alone, as compared with the same date in 1914, notwithstanding that the collectors had been instructed to show great leniency. Coming to the repayment of mortgage debts, Dr. Levi reminded us that the returns of the Agricultural Bank, which lends to the small cultivators, showed that the amount collected up to October 31, 1915, on account of matured instalments, was double

Digitized by Google

that recorded on the same date in 1914. In addition, according to a communication made by the Credit Foncier Egyptien, the payment of annuities due is being made in quite an unexpectedly satisfactory manner, some of the debtors even paying up their arrears of 1912 and 1913. This is all the more remarkable, seeing that all credit has been stopped. Thus, says Dr. Levi, the mortgage debt of Egypt is diminishing, and under these circumstances if there are expropriations, it is not because of the war.

As regards the land values, he affirmed that the intrinsic value could not diminish, by reason of the suspension of the drainage works if that value without those works was not already diminishing. As for the sale value, if the latter was based on the only proper element, i.e., sale in its scientific sense, then, with prices of products rising as they are actually doing, there is no reason for that value to diminish; indeed, the contrary would be a new phenomenon on economical science. Nor, in his opinion, is there any reason for the value to drop if, after the war, the price of agricultural products returns to its normal level. If Egyptian land values are based on an artificial foundation, it will be a blessing if, after the war, that value is brought to its proper level. Agriculture will benefit and the national wealth will in reality not lose.

Agriculture.

Turning to the agricultural situation, Dr. Levi says that it is not bad. The prices of all agricultural products have risen and the balance of trade for the first ten months of 1915 is in favour of the country by £E4,500,000 against £E1,400,000 the other way in 1914, which, he pointed out, included only three months of the war in the period under review. Moreover, trade in general in the country does not seem to be suffering, for there are no unemployed. The various elements have had to economise, but on the other hand very few people have gone to Europe for the usual holiday. Of course, these economies reflect on local commerce and industries, but on the other hand they have been amply compensated by the amount brought into the country by the 300,000 British soldiers, on behalf of whom the authorities spend on an average £E1,250,00 per month, half of which remains in the country, and which does not include what the troops spend themselves. The swarms of hawkers prove that trade is good and, moreover, the local merchants have been able to clear out their old stocks at remunerative prices.

State Accounts.

The Speaker considered that the statement of accounts of the Ministry of Finance at September 30 justifies the hope that the deficit foreseen by the Financial Adviser, which was estimated at £E1,140,000, will not be realised. At the above-mentioned date the deficit was only £E260,000. Whilst the expenditure is evenly spread over the whole year, the land taxes, which constitute one-third of the full revenue, are collected as to 30 per cent. in the first half, and 70 per cent. in the second half. It is quite possible that Egypt, a country at war, will be able to announce to an astonished world that in the year of grace 1915, it was able to show a surplus, thus justifying its ancient appellation of "a land of paradox."

As for the future, the country has lost neither men nor money; its finances are in a good state; its energies and its credit are intact; the war, moreover, has, if anything, improved the general situation, since it has removed all the international obstacles which stood in the way of economic and judicial reform. The country's burden has diminished instead of increasing, and there is no reason for us to contemplate the future with anything but complete confidence.

Conclusion.
